OPEN LETTER TO THE PATRON-SUBSCRIBERS OF THE JEWISH ENCYCLOPEDIA

[FROM DR. ISIDORE SINGER, PROJECTOR AND MANAGING EDITOR]

At the beginning of the year 1898, when I proposed the publication of THE JEWISH ENCYCLOPEDIA to the FUNK & WAGNALLS COMPANY, the magnitude and originality of the enterprise appealed to them strongly; but when they realized the enormous difficulties such a pioneer work necessarily presented, they felt some measure of dismay. However, as they were loath to forego the honor of publishing so great a literary undertaking if it were at all feasible, they felt their way cautiously, and were soon convinced that the entire Jewish public of America and Great Britain looked upon the ENCYCLOPEDIA not as an ordinary, every-day publication, but as a great Judeo-national work, to further the distribution of which was felt to be a duty and a privilege. The leaders of Israel throughout the civilized world openly encouraged the publishers to make the venture.

After the publication of the first prospectus, scores of prominent Jewish writers offered their services as propagandists for the work; the editors of the Jewish papers, and almost every one of the two hundred American rabbis from New York to San Francisco and from Montreal to New Orleans, received the representatives of THE JEWISH ENCYCLOPEDIA as missionaries of a cause that deserved their energetic support; and the FUNK & WAGNALLS COMPANY accordingly resolved to make this undertaking another *magnum opus* of their publishing-house. In the first announcement, issued August, 1898, the expense of producing the entire work, to comprise twelve volumes in all, was estimated at $100,000. More than this amount has already been spent in the preliminary work and in the production of the first volume; and the FUNK & WAGNALLS COMPANY believe that considerably more than $500,000 will be required to render this undertaking worthy of the great causes of Truth and Justice which I am convinced it is destined to serve.

An encyclopedia of this magnitude could be produced only as a subscription work on the instalment plan; and to bring it to a successful completion the publishers rely upon the continued cooperation of the Patron-subscribers, to whom they now extend their thanks for the interest and support so freely given. More than half of the Patrons are Jews of foreign origin, and have but recently arrived in America. When the representatives of the FUNK & WAGNALLS COMPANY, in order to avoid any misunderstanding, explained to these eager supporters of Jewish lore the legal aspects of the engagement into which they had entered, their answer was invariably to this effect: "Every Jew considers his word a solemn pledge; and twice solemn does he consider his pledge if it be given to a non-Jew, especially if, as in the present case, the non-Jew serves the cause of Israel. Every Jewish subscriber would consider it as a *chillul ha-Shem* [profanation of the Holy Name] to place in the way of the Christian publishers of a Jewish work the slightest obstruction to the carrying out of the obligation signed by him."

I, as a Jew, knew this to be the attitude of my coreligionists; but, having assumed the responsibility of inducing a firm of Christian publishers to enter a field of literature comparatively new to them, and to venture upon such a costly enterprise, I felt bound to furnish them with the strongest guaranties I could command. My expectations were more than realized. A great many of the Patron-subscribers of the work—bankers, merchants, and other business men—volunteered their services to advertise the work among their personal friends. One of the first subscribers, a rich manufacturer of Baltimore, wrote: "There are twenty thousand well-to-do Jews in the United States who can afford to buy your book and will do so if properly approached and by the right person. I deem it a duty and a privilege to introduce the ENCYCLOPEDIA whenever and wherever I have the opportunity to do so. If every one of your Patron-subscribers will take it on himself to secure, through his personal efforts, only two additional supporters for your enterprise, then your work will have laid the foundation of a Jewish library in twenty thousand Jewish families, and the old love for Jewish learning will have been awakened throughout our land."

One Friday afternoon DR. EMIL G. HIRSCH, of Chicago, that foremost representative of the American Jewish pulpit, called at the editorial rooms. The large assemblage of scholars, translators, revisers, typewriters, and proof-readers who were assiduously working in order to tell the world of Israel's glorious record, "to show in one vast, imposing array what sublime teachings Judaism has promulgated, what a thrilling history has been that of our ancient people, and how numerous and varied have been the talents of its sons and daughters," manifestly impressed the rabbi of Sinai Temple. In reply to my inquiry as to the probable number of subscriptions that THE JEWISH ENCYCLOPEDIA might receive in Chicago, DR. HIRSCH replied solemnly: "Sir, I guarantee five hundred in my own congregation. Send me your agents; I will provide them with personal letters of introduction to each of my friends; and wherever your agent fails to obtain a subscription I will accompany him, for to my mind this work of yours is what we call a veritable *Kiddush ha-Shem* [glorification of God]; and every Jew who knows what this term implies will feel in duty bound to do his part toward carrying to completion a work begun in such a disinterested spirit."

It is impossible to tell in detail the many proofs received of the sincerity of the support tendered in the course of the last three years—such support as led the FUNK & WAGNALLS COMPANY to believe that they could rely with confidence on material assistance from Anglo-American Israel to complete this undertaking successfully.

An illustration, however, of the appreciation of the educational value of the ENCYCLOPEDIA I must mention, for the instance is characteristically Jewish, and redounds to the honor of Jewish idealism. Two years ago a subscription blank—written in Hebrew characters and signed by a well-to-do Russian merchant—was received from Philadelphia. It was endorsed as follows: "Although I don't know the English language and will, therefore, not be able to read this book myself, nevertheless I will buy and pay for it, for I wish my children raised in the love of the holy Torah of the Lord." And this Russian immigrant in his naive style truly penned the conviction of the leading Jewish and non-Jewish thinkers of our day concerning the great importance of this ENCYCLOPEDIA for the future development of Israel.

ISRAEL ZANGWILL, the widely known Anglo-Jewish novelist and art critic, writes: "It is curious that a century greedy of all knowledge, anxious to explore every nook and cranny of history, should have neglected the story of Jewish life and thought, especially as that story is essentially of the center, however it may have got crushed into the background of the world's thought. But the century, repentant in its dying hour, is making splendid amends by the inception of THE JEWISH ENCYCLOPEDIA. Christianity will learn from it to understand Judaism and to respect Jews. Jews will learn from it to understand and respect themselves. The publication of THE JEWISH ENCYCLOPEDIA is an historical event, which is bound to have far-reaching effects both on Judaism and Christianity."

Similar thoughts are expressed on the Christian side. Thus, the late PROF. MAX MÜLLER, of Oxford University, wrote: "I and many more want to know a great deal more of the origin and the historical development of the Jewish race than is known at present. To my mind the differences between the Jewish and the Christian religion seem to be very small as far as essentials are concerned, and a thorough knowledge of the causes that made Jews and Christians differ from each other, such as THE JEWISH ENCYCLOPEDIA is sure to supply, will, I trust, serve to bring the two more closely together in the future. Both Jews and Christians consider themselves the chosen people of God. Why should they not consider themselves as brothers, worshiping the same Father and bearing with each other as brothers ought to do?"

We Jews have nothing to lose, but much to gain, by this encyclopedic work. Justice, once set on foot, will spread in our favor as did cruelty against us, for justice no less than cruelty is contagious. Despite the discord and strife that still divide nations, creeds, and classes in these days of universal enlightenment, it can not be denied that a deeper longing for the truth is making itself felt throughout the world, and a fuller recognition of the rights and claims of humanity is being granted to-day to each race and individual. Fanaticism is giving way to fairness; the hostile attitude of former days is being transformed into one of friendly intercourse. Justice and truth—the foundations of the throne of Israel's God—are becoming more and more the pillars of the world's tribunal.

But in order fully to attain the end which the Projector, Publishers, and Editorial Board have sought from the outset, and which has been so eloquently set forth by scores of Christian and Jewish thinkers, it will not be sufficient simply for this ENCYCLOPEDIA to become a household book in every Jewish family; it must become the spiritual property of the *civilized world at large.*

THE JEWISH ENCYCLOPEDIA will collect, sift, and analyze the vast material accumulated by more than forty generations of Jewish and Christian scholars; in it the whole range of human knowledge accessible to us at the present hour will be exploited in order to throw full light on the past and to enable us eventually to foretell somewhat of the future of the Jewish race. It will be more than a mere compilation of twelve volumes, aggregating 8,000 pages and including 2,000 illustrations. It is destined to inaugurate, on the one hand, an epoch of revival within Jewish literature itself, and, on the other, to advance in great measure the literature of the world in so far as the knowledge of Jewish matters is concerned. I hope that before the twelfth volume of the work shall have been placed on the shelves of the forty thousand public and private libraries now extant in the world, the governments of Europe and high-minded Mæcenases of the United States will have come to the conclusion that no curriculum of a university can be complete without including a series of lectures on the literature and history of the Jews. In a word, to render the Science of Judaism *universitätsfähig* was the first and principal impulse of my efforts. This ENCYCLOPEDIA once firmly established as an indispensable instrument of scientific instruction, not only in the libraries referred to, but also in the studies of the hundreds of thousands of Catholic and Protestant clergymen, professors and teachers, lecturers and journalists, lawyers and physicians, the full truth about Judaism and the Jews will begin to spread steadily from the pulpits of cathedrals and churches, from the professors' and masters' platforms, and through the columns of thousands of magazines and newspapers, to the millions of those to whom the framers of public opinion address themselves day by day.

It is somewhat embarrassing to plead one's own cause; may I, therefore, be allowed to present to our Patron-subscribers, to whose zealous support I owe the realization of the ideal of my life, the peroration of a sermon delivered March 16, 1901, by the rabbi of Temple Emanu-El, New York: "The success of the technical and financial sides of THE JEWISH ENCYCLOPEDIA is assured. It remains now to give its educational value the largest possible scope. Every Jewish home must possess a copy; but that will not be sufficient in order that Israel and humanity may gain the greatest possible benefit therefrom. This ENCYCLOPEDIA should be universally accessible in the smallest city and village of America and Europe, so that wherever any discussion arises concerning a point pertaining to Judaism and Israel this work will be at hand for consultation.

"I propose, therefore, that Jews of means buy copies of this ENCYCLOPEDIA, not only for themselves, but also for distribution among the libraries in those cities and villages that lack the necessary funds to purchase copies. No better investment can be made in behalf of Israel and Judaism. When every library is thus equipped there will be no more justification or excuse for misrepresenting Judaism and Israel in press or pulpit or on the rostrum. The facts will be readily available, and low indeed must be the mind that will refuse to learn the truth when it is within easy reach.

"I trust my words will be heeded. I trust many will esteem it an honor and a privilege to make such a donation to some library. MR. ANDREW CARNEGIE has set a noble example to the world in establishing about two hundred libraries in Europe and America. Let the Jews emulate his example, at least to the extent of placing in every school, church, or public library a copy of THE JEWISH ENCYCLOPEDIA, and thus contribute to the propagation of the truth, to the glory of Israel, and to the welfare of humanity."

And now, after having briefly related my efforts and expressed my hopes, I wish to tender my hearty thanks to those who extended to me their personal support, their advice, and their moral encouragement while the work was still in its preliminary stage: HON. JACOB H. SCHIFF; HON. OSCAR S. STRAUS, late ambassador to Turkey; JUDGE MAYER SULZBERGER, of Philadelphia; EMANUEL LEHMAN; LEONARD LEWISOHN; MORITZ ELLINGER, editor of "The Menorah"; DR. HERMANN BAAR, late superintendent of the Hebrew Orphan Asylum, and MOSES OTTINGER, trustee of the Jewish Theological Seminary. My thanks are respectfully tendered likewise to all our PATRONS—for PATRONS they are indeed, and their names deserve to appear on the Roll of Honor appended to the first volume of the ENCYCLOPEDIA. This imposing list, wherein the names of Catholic and Protestant archbishops, English nobles, presidents of American universities, and American statesmen are side by side with those of small Jewish storekeepers and dealers who landed but a few years ago on these shores as fugitives from persecution, is an historic list, and as such it will go down to posterity reproduced in the chronicles of Israel in future generations. Such a harmonious association for a common purpose, for the great ideal of "Justice to the Jew," formulated so eloquently a couple of years ago by an American Christian clergyman, was possible only on the free soil of America.

Although still early in the undertaking, this JEWISH ENCYCLOPEDIA has already initiated a notable spiritual movement: the Renaissance of the Science of Judaism in our country. One rabbi after the other mounts the steps of his pulpit on the Sabbath, and, in referring to this great work that you as Patron-subscribers have made possible—for without your help this enterprise could not have been undertaken—tells his congregation of the grandeur of Israel's literature, of its great scholars and artists, and kindles the fire of enthusiasm in the hearts of Jewish youth. Young Israel is being taught to consider this ENCYCLOPEDIA a household book, to conceive for it a portion of the same reverence as his ancestors paid to the Talmud, with which, indeed, for vastness and breadth and influence to be wrought on coming generations, it has already been compared by one of the most eminent American rabbis, a professor of Rabbinical literature at one of our universities.

American and English Judaism seems destined to take the lead in the fortunes of Israel in the twentieth century. To have contributed to this great and beneficent evolution in the history of the People of the Book through this work, will afford much satisfaction to the FUNK & WAGNALLS COMPANY and to myself. The COMPANY will continue to bear the burden of financial administration and technical supervision required to carry on the work. As to the rest, the book is the book of modern Israel; it is the national property of the tribe of Judah. Jewish scholars preside over its literary form, and the Jewish merchant and clerk are destined to become the financial mainstay of this vast undertaking, which is not only a great monument of the glorious past of Israel, but shall be also a mighty bulwark for its future.

Brewster Lurton Kahle, jew, internet archive owner, hmm makes you wonder why the censorship of real jewish history posts on there right?

It's The Jews Stupid

Several years ago I was attending a University in the Northwest. While I was doing so I received several of Edgar Steele's Conspiracy pen pal missives. I still read them, I just go to his website at http://www.conspiracypenpal.com/ rather than receive them as an email. In any case, during that time I "acquired," one of Mr. Steele's better known sayings and kind of "adopted," it as my own. My essay, "It's the Jews Stupid," was not as original as I thought when I wrote it. Mr. Steele wrote an excellent essay several years ago with the same title, and it seems that I must have liked it so much that I began to use the phrase, "It's the Jews Stupid," and embraced it as my own. In any case, this statement, which will precede my essay on my blog site from this moment on is my attempt to remedy this usurpation of his prose/ideas and to give him the attribution he deserves. Mr. Steele was very kind about all this, I wrote him and he asked if I was the one that had written an essay with the same title as his. I realized at that point what must have happened, i.e. I read his essay in 2004 and accidentally appropriated his title. I apologized and he graciously accepted my apology. I highly recommend his essay "It's the Jews Stupid," it is an excellent expose as to how our friends the Jews conduct themselves in this day and age and how we Goyim allow them to get away with their bad behavior.

Curt Maynard

It's The Jews Stupid

By

Curt Maynard

I have long thought about writing this article but hesitated because I didn't want the reader to conclude that I believed that all Jews are complicit in what amounts to a vast conspiracy to undermine western civilization and establish a Talmudic centered one world government. However, times have changed, and I feel obligated to write this and post it on the last bastion of freedom of speech, the Internet – before even that, in its present form is made unavailable to mankind.

Of course all Jews aren't engaged in this nefarious plan, but unfortunately most of them will come to the aid of those who are. There are some exceptions, on occasion one will criticize another, but as a rule, those who are in a position to publicly denounce one of their own are still pro-Israel/pro-Zionist in orientation. A Jewish conservative talk show host named Michael Savage recently condemned George Soros, a multinational Jewish Supremacist, for engaging in the kind of activities that according to Savage led to the holocaust more than sixty years ago. In a sense Savage is right, Soros is exactly the kind of Jew that inspired Germans to wake up and democratically elect Adolf Hitler in 1933, the financial shenanigans Soros engages in today, are pretty much the same thing German Jews were engaged in prior to the Second World War. Unfortunately, Savage can't be looked at as a role model for Jews either; he's a hard core Zionist and an Israeli apologist, blindly towing the line for this little provocateur no matter what it does or whom it does it to

This little spat between Soros and Savage illustrates an important point and one I intend to thoroughly expand on in the next few pages. Savage is allegedly a "right wing" Jew and Soros is allegedly a leftist, both are Jewish, both have a voice, both have a platform, Savage's is talk radio and Soros speaks through various organizations, like Moveon.com and whatever else his money and influence buys. You won't hear any non-Jewish critics of Israel on the radio, television or on Moveon.com – they have no voice, no platform, not in the mainstream media anyway. The networks have gotten to the point where when Israel and/or Middle Eastern affairs are discussed; the experts and analysts are introduced, and they may as well be referred to as Jew #1, Jew #2 and Jew #3. I can't tell you how sick it makes me when Fox News, the allegedly "fair and balanced," network introduces Charles Krauthammer and William Crystal to their viewers as if either could possibly offer an unbiased opinion when it comes to Israel and/or organized Jewry, both are in every sense of the word Jewish Supremacists.

Jews are today so over represented, so disproportionately prevalent, in just about every facet of American life, despite composing a very small numerical percentage of our population that I no longer believe, as I once did, that most people aren't aware of it. Sure there are a few, busily engaged in acquiring as much money as possible, or watching American Idol, or engrossed in video games and MTV, that they aren't fully awake, but in my opinion, for the most part anyway, those that deny the reach and omnipresence of Jewish influence in America today are either ignorant, delusional and/or complicit.

One recent phenomenon that finally encouraged me to write, "It's the Jews Stupid," is this incredible short sighted and moronic tendency to compare George Bush to Adolph Hitler, or to bring up George's grandfathers alleged relationship with the Nazi's and to somehow suggest that this alleged relationship proves Bush is himself is a Nazi. This ridiculous theory is advanced by the same folks that suppress the abundance of evidence implicating the Israelis and a complicit and predominantly Jewish media in what happened in NYC and at the Pentagon on 9-11, people like Greg Szymanski, who by the way claims to live in a very small Idaho community known as Spirit Lake, but like his theories, this too is a lie, my mother lives in Spirit lake; and Szymanski doesn't. Szymanski also loves to implicate a so called "Black Pope," in every nefarious incident that has occurred over the last several decades; I can't tell you who or exactly what this "Black Pope," is, as I don't bother to read Szymanski's crap, he's a moron and a crude propagandist, who would like to misdirect his readers attention to ludicrous ideas like Bush is a Nazi and/or a servant of this nebulous Black Pope. I have written Szymanski several times and pointed out to him that "it's the Jews stupid," but he refuses to respond to my missives, preferring instead to continue his pointless and misleading rants. I have since concluded that Szymanski isn't just a fool, he's a hired gun, and agent provocateur, granted, not a very good one, but one nevertheless.

So, some of you might ask, "well how exactly do you know Bush is not a Nazi." For anyone with the shallowest understanding of history as it relates to the Second World War, this isn't much of a surprise, sadly most Americans are more attuned to their feelings of self worth than they are history in general, so they may be more susceptible to believing concepts that are so erroneous that those with a rudimentary knowledge just disregard out of hand. Hitler sought to exclude Jews from German life, especially their representation in government, academics and the German media, which was composed of newspapers, news magazines and radio in those days – their was no television, at least not available to the public – so this wasn't an issue. George Bush has appointed Jews to some of the most sensitive positions in the American government, Michael Chertoff is the Director of Homeland Security, a position that places him in a position to do pretty much as he likes with our National Security apparatus, Chertoff is an ethnic Jew and a dual citizen of the state of Israel. Hitler wouldn't have considered appointing a Jew to such a post period – it wouldn't have happened, primarily because the German people, the Nazi Party and Adolph Hitler were entirely cognizant of the fact that German Jewry had collectively done their best to destroy the German economy and German nation after the First World War. Does this mean that every German Jew participated in this treasonous pursuit, that every German Jew became wealthy at the expense of their non-Jewish German neighbors? Of course not, but like today in America, most Jews actively participated in covering up the crimes of their criminal co-religionists, which makes them complicit to a certain extent. One can see the same phenomenon at work today in America, anytime anyone mentions that Jews are disproportionately represented in the United States government, in the American media, in academics, in the medical profession, in banking, which in fact they are, they are met with a coordinated assault by an incredible number of Jews, most of whom aren't guilty of committing any actual crimes, who seek to silence them with various labels, i.e. anti-Semite, bigot, racist, etc… One hears many excuses for this cohesive support, which only enables the criminals, fear of anti-Semitism, and/or fear of the next pogrom or holocaust. Unfortunately for collective Jewry, this excuse doesn’t wash – what they are doing, and what the Germans knew they were collectively doing in 1933, and what Americans are slowly becoming aware of now, is aiding and abetting their co-religionists to commit crimes that are tantamount to treason. In 1933 the German nation democratically elected a leader that promised them he wouldn’t allow this absolute and empirical reality to continue. George Bush on the other hand chose a Jew named Bernenke to replace another Jew named Alan Greenspan as the head of the Federal Reserve, a position that is without question perhaps one of the most powerful and influential positions in government today. In the words of Joseph Goebbels’ if Hitler were to have done something like that after the German people had suffered through a decade of hyperinflation, and the deprivation so associated, the German people would have “boxed their ears.”[1]

The fact is, George Bush is not a Nazi, he is not in the least sympathetic with Nationalism, let alone National Socialism; he is without a doubt the most Philo-Semitic President that has ever sat in the Oval Office period. Adolph Hitler sought to ostracize Jewish troublemakers; Bush seeks to make them his most influential foreign and domestic policy advisors. As Bush himself would say, “make no mistake,” our commander and chief is not critical of Israel and/or the disproportionate amount of influence Jews in the United States wield; he is their friend, their ally, and in the end, more concerned about their interests than he is in the interests of his own nation. There are those that would seek to convince you and I that Bush is a “Christian fundamentalist,” and it is for this reason that he supports Israel and Jews with such vigor, but this too is a chimera, Bush is an opportunist, not an ideologue, he has no loyalty to anything beyond himself and his own business interests.

Goebbels’ was somewhat of a prophet pariah, he understood organized Jewry like few Americans do today, he understood that their collective calls of anti-Semitism directed at the Nazi leadership and indeed the German people themselves was a technique they had successfully used, even perfected, in order to advance their interests while at the same time suppressing any dissent from the gentile majority. We see this same technique at work today, all around the world, anytime anyone honestly divulges the actions of a Jew in some crime; they are immediately smeared with the label of “anti-Semitism.” This is not a recent phenomenon, it has nothing to do with Zionism, as Noam Chomsky might suggest, it is an ageless technique developed by Jewry over an extended period of time, as evidenced by one entry Goebbels’ made in his diary during the Second World War, more than sixty years ago.

The Jews in England now demand laws to protect them from anti-Semitism. We know these tactics from our own past when we were struggling for power. I didn't help much. We were always able to find loopholes in the law. Besides anti-Semitism cannot be eradicated by law once it has taken root with the people. A law against hating Jews is usually the beginning of the end for the Jews[2]

Goebbels’ also noted in his diary an inevitability that will catch up with Jewry once again, an inevitability that has caught up with them in the past – one they cannot seem to escape entirely, and one that should motivate any sane Jew to seriously reconsider their relationship with the so called Jewish state of Israel and its blatant disregard for what the majority of the people in the world want, and that is to live free of the Jewish yoke, whether that yoke be of an economic nature, and/or one of a socio-political-cultural character. In the following entry Goebbels' notes something that is becoming evident today – many Jews are becoming aware of the fact that non-Jews are beginning to scrutinize some uncomfortable facts that implicate Jews as being behind a great deal of the issues that most effect them – this is getting harder to cover up, people are beginning to notice that Jews are disproportionately represented in the areas of life that the non-Jewish majority is most concerned with, and that is the degeneracy of western culture, the degeneracy of American culture, the degradation of Christian values, the collapse of the American educational system and the rape of our economy. In their haste to cover up their involvement in these areas, Jews are exposing themselves as they never have before, and because of this Americans now know that Jews dominate Hollywood, the media in all its facets, our economy, our judicial process and in many respects our very government. Once again, this is nothing new, Jews had attempted the very same thing in Germany after the First World War and in France, and in Poland, and in Spain – in fact ethnic Jews have been tossed out of more countries, not for their faith as they today allege, but because of their collective behavior, than any other ethnic group in history. Despite what your history professor will tell you about their ejection from Spain under Ferdinand and Isabella, it had nothing to do with the fact that they weren't Catholic and everything to do with their behavior – they intentionally enslaved the Spanish people under their usurious yolk, they absolutely, without any doubt whatsoever ushered in the Moorish invaders from Africa and as a result they unquestionably committed treason, and the Spanish people knew it. It is for these reasons and no others that the Jews were ejected from Spain and you can bet there wasn't a moist eye to be found among the Spanish victims. Bearing this in mind, carefully consider the words of Joseph Goebbels':

The Jews aren't always so clever as they would like themselves to believe. Whenever they are in danger they prove to be the stupidest devils.[3]

Goebbels' was of course correct, contemporaneously and in a modern sense as well, organized Jewry has in fact become desperate, they exposed themselves completely on 9-11, and if the media were in other hands, their Fifth Column would long ago have been neutralized and the war on terror ended. If it were not for the fact that the entire media apparatus was kosher, Americans would know that 150 Israelis were arrested in the United States following 9-11 for espionage and then quietly deported without informing the American public by the Jew and dual Israeli citizen Michael Chertoff, who was at that time Assistant Attorney General under the flunky John Ashcroft. If it weren't for the fact that the media is in a virtual and very Jewish stranglehold, Americans would know that five Israeli's were arrested on 9-11 after they were witnessed filming the impacts of the airliners into the World Trade Centers while laughing, joking and clapping one another on the backs in a congratulatory manner. These Israeli Jews were also deported back to Israel without informing the American people that they had even been arrested, let alone what their behavior was purported to have been. If it weren't for the complicit media and government, not to mention the corrupt judicial system, Americans would be familiar with the empirical fact that on January 2, 2004 an Israeli Jew named Asher Karni was arrested for having sold [past tense] more than sixty nuclear weapon detonators to Pakistan, the world's most unstable Islamic Republic and a country in which "Osama," as in Osama Bin Laden, is the most popular name for a male child. If the American media wasn't under the direct control of Jews, the American people would know that an American Jew named Yehuda Abraham was arrested in 2003 for conspiring to sell Russian made surface to air missiles to undercover FBI agents posing as Al Qaeda operatives with the understanding that these missiles would be used on American civilian airliners in the continental United States.

The fact is, we don't know whether the above named Jews are in fact Zionists, or even sympathetic with the Zionist cause, but we do know they are ethnic Jews and we know their names, identities, and actions are being hidden from the people of the United States, with the express intent of deceiving Americans into believing that Israel is their ally.

It's the Jews stupid!

It doesn't matter whether Jews appear to be leftists like Alan Dershowitz or Noam Chomsky, or whether they appear to be "right wingers," like former leftist David Horowitz, or Michael Savage, or Norman Podhoretz, William Kristol or Charles Krauthammer, they inevitably are intent on advancing what cannot be considered anything other than Jewish interests. Concepts like liberalism and conservatism are nothing more than angles to them to be manipulated and mastered for the advancement of Jewish interests as a collective whole. A perfect example of this incestuous predilection is how Jews on both the right and left look upon the criminal Oligarchs of Russia and their criminal acquisition of Russia's entire infrastructure in the 1990s for pennies on the dollar. The Russian people led by their President, Vladimir Putin, have recently indicted several Jewish Oligarchs for this monumental theft, most of the indicted have escaped to refuse in Israel and/or Britain, nonetheless their assets in Russia have been appropriated, rightfully it might be added, and their ill acquired fortunes have suffered as a result. So what does organized Jewry do? They pull every string they can, they exert their unbelievable collective influence upon various members of Congress in an effort to get them to condemn the Russian government as anti-democratic, they compel President Bush to support the condemnations, they lobby anyone and everyone they can in an effort to enable these Jewish thieves to retain their stolen monies and property. You won't see any articles written by Jews condemning the Oligarch's for stealing billions from the Russian people, but you'll see plenty of articles written by Jews condemning Putin and the Russian people for protesting the fact that they have been ripped off. We don't really know if these Oligarch's are Zionists and/or sympathetic to the Zionist cause. We do however know that they are ethnic Jews and that they quickly became Capitalists, despite having lived in a communist country for the majority of their lives, after the collapse of the USSR. Fortunately we know today that the Oligarch's of Russia were financed by ethnic Jews in America, and that their primary apologists today are the very same American Jews – so once again, despite the smoke and mirrors of the all too predictable boogeyman of Zionism, "it's the Jews stupid," not their latest "ism."

Lenard Lieberman,[4] Vice President of Clear Channel Communications, one of the largest if not the largest corporate owners of radio stations across the United States, launched a billboard advertisement campaign in California a year or so ago, which claimed that Los Angeles was in Mexico, not California. The reaction was predictable, millions of Americans reacted negatively to the billboards, immediately demanding that they be taken down, which predictably led to catcalls of racism, and then the media just as predictably brought forward all kinds of pro-Mexican radicals that claimed California was part of Mexico and those that disputed this claim were racists.

Hispanic front men for Lieberman and spokespeople for Clear Channel insisted that only "racists" wanted the signs taken down and stated against all opposition that the signs would remain up and for about a week they did. Initially the reactionary American population blamed Mexicans and Hispanics, it was only after an extensive Internet investigation that the facts came out - a Jewish vice president of Clear Channel named Lenard Lieberman was the brains behind the advertising campaign and had ordered the signs erected. Once this information was posted on the Internet, the signs immediately came down, overnight in fact. The media dropped the entire matter and not another word about the billboards has since been heard on American airwaves. Lieberman probably isn't a "leftist" radical, considering that he's the vice president of a large American Capitalist corporation, we don't know whether or not he's a Zionist, but we know he's a Jew, and we can see by his surreptitious behavior that he was far more interested in fomenting division than he was in creating unity. The fact is, organized Jewry is the main impetus behind both legal and illegal immigration into western nations – those that dispute this absolute fact are once again, either, stupid, delusional, and/or complicit. Jews love to play all sides, as a matter a fact they are masters at it, by doing so they hope to control the agendas of any organizations that might one day challenge the established kosher order. Remember Cindy Sheehan? Ms. Sheehan is essentially a leftist who got it right when she sent a letter to a major news network stating that her son joined the Army to protect the United States of America, not Israel, her fame grew exponentially just preceding that letter and in it's immediate aftermath – she showed up at Bush's ranch in Texas demanding to see the traitor, all of the networks provided coverage, but someone got to Cindy and convinced her to retract her statement concerning Israel, and as a result she has been marginalized since. Sure the Jewish media throws her a bone every now and again, but she'll never recover the momentum she had in the summer off 2005, she has since been relegated to speaking at "unity," type churches, where the Jews can keep their eyes on her at all times.

The entire immigration fiasco in America today is completely dominated by ethnic Jews, they ensure that no restrictive legislation is made into law and when individuals like the Minutemen form into groups and become a little too popular they start cranking out the media propaganda and the all to common denunciations of bigotry, and/or they get their front men, people like George Bush, to accuse the Minutemen of vigilantism. Fortunately few Americans take that fool seriously any longer – they have basically pegged him for what he is, a damnable traitor. So how do the Jews accomplish all this? Consider the following:

The Jewish-Latino relationship is now viewed as an absolute priority for our [Jewish] community, said American Jewish Committee Washington, DC, area director David Bernstein. "We see them [Hispanics] as increasingly active politically and more and more willing to work with coalition partners in achieving our collective goals." The phenomenon has been emerging in the last five to ten years. Groups such as the American

Jewish Committee and the Jewish Community Council have been forming coalitions with organizations such as the National Council of La Raza and the League of United Latin American Citizens.[5]

No doubt organized Jewry would love to cultivate this relationship, it would be good for Jews albeit devastating for Hispanics. After nearly eighty years of exploitation, the black community has finally managed to semi-extricate itself from the parasitic grip of organized Jewry. If in fact this relationship between Hispanic and Jewish groups develops further there is no doubt whatsoever that the relatively harmonious relationship between Hispanics and whites enjoyed today will end and become just like the seething, resentful, and negative relationship between the American white and black communities. The black community has been so exploited by Jewry over the last eighty years that they may be beyond recovery as a viable group in the United States. This isn't to say that Jews have just focused on African Americans, oh no, they have victimized and stigmatized every black man and woman, and they have done so by convincing these blacks that the Jew is their only ally and friend, they then turn around and use the black race as a scapegoat for Jewish crimes – just as they have successfully done post Katrina, when the heat was on the Israeli's and the Jewish media in regards to the Iraq War, along came Hurricane Katrina, and the displacement of a group of blacks so degenerate and handicapped by being third and fourth generation welfare recipients, that no white person in their right mind would want them as neighbors, yet the Jews came out in force, doing their best to relocate these blacks in the most unlikely of white regions, i.e. Utah, that for months white America had its mind on little else other than the depravity and ignorance of many of these near savages from New Orleans and ways in which to keep them out of their neighborhoods. Result – few were focused on what Israel was doing in Palestine or what was happening in Iraq and Iran.

So how do the Jews exploit their relationship with minorities?

David Horowitz was once a fairly well known Jewish leftist in the 1960s and 1970s. He has since "converted," to neo-conservatism, which isn't that much of an ideological leap believe it or not, the neo-cons are really nothing more than left leaning Trotskyites with an alleged "right wing," foreign policy outlook, which is just another way of saying they support the state of Israel even at the expense of their host country the United States of America. In any case, Horowitz wrote an autobiography a few years ago, in it he tried to explain to his former leftist oriented readers how he came to reject the socialism he once advocated and instead embraced the neo-con [read Jewish Supremacist] agenda. His autobiography is entitled Radical Son, it isn't very good, but fortunately Horowitz admitted to a few things that make writing this paper much easier. Consider the following passage and then bear in mind that organized Jewry has denied in leading role in directing the agenda of radical black organizations.

Talking to Huey [Huey Newton – a well known black radical] as a kind of equal…. emboldened me to raise yet another difficult issue. A strain of anti-Semitism had developed in the Party [The Black panther party] during the years he [Newton] was in prison. Of course, the Panthers were not alone among black radicals in their attacks on Jews. In 1966, Stokely Carmichael and the leaders of the SNCC had expelled whites from the civil rights organization, accusing them of being a fifth column inside the movement. Since Jews were a near majority of the whites in these organizations, and had played a strategic role in organizing and funding the struggle, it was clear to everyone that they were the primary target of the assault. This was underscored by the support that Carmichael and the black left gave to the Arab states during their 1967 attack on Israel. [6]

"Unfortunately most people aren't aware of the fact that Israel preemptively attacked the Arab states on June 5, 1967, not the other way around. This is what I would refer to as "kosher revisionism," and it is quite common in the world today, as a matter a fact, it's the norm. Historical revisionism has developed a bad name primarily because kosher revisionism rules the airwaves, radio and television; ethnic Jews have a near monopoly on the media in all its forms, and for that reason, lies like Horowitz's go unnoticed by most people. Horowitz predictably sets up his "admission," i.e. that Jews were disproportionately represented in the black civil rights movement by first prostrating himself in such a way as to fool the reader into believing that he, Horowitz, was only able to influence Newton, because Newton, the black man in the relationship, felt that Horowitz was an equal. Many people will laugh at the very idea that a Jew would consider any black to be an equal – as a rule, Jews loathe blacks more than they do whites, but they find that exploiting blacks is advantageous to the advancement of their agenda, and it is for this reason, and no other, that they associate with blacks."[7]

Later in his autobiography, Horowitz again reinforces the above lie by reiterating it, but in a slightly different manner, but doing so with the same goal in mind, to convince his reader of a lie, i.e. that the Arabs attacked the Israelis in 1967 and to simultaneously smear Arab/Muslims in general:

I began to review events of the past to which I had paid little attention before, like the expulsion of the Jews from the civil rights movement in 1966. Jews had funded the movement, devised its legal strategies, and provided support for its efforts in the media and in the universities – and wherever else they had power. More than half the freedom riders who had gone to the southern states were Jews, although Jews constituted only 3% of the population. It was an unprecedented show of solidarity from one people to another. Jews had put their resources and lives on the line to support the black struggle for civil rights, and indeed two of their sons – Schwerner and Goodman – had been murdered for their efforts. But even while these tragic events were still fresh, the black leaders of the movement had unceremoniously expelled the Jews from their ranks. When Israel was attacked in 1967 by a coalition of Arab states calling for its annihilation, the same black leaders threw their support to the Arab aggressors, denouncing Zionism as racism.[8]

Once again, the Israeli's preemptively attacked the Arabs on June 5, 1967, not the other way around, Horowitz isn't confused, he knows this, but he is compelled to lie in order to fabricate history – a most common Jewish trait and one they have only been able to get away with because of their strategic stranglehold on the media and the publishing industry.

The fact is, Zionism is racist, it is inherently racist, far more so than anything of the old

Jim Crow variety. Judaism itself is a racist religion, it’s obvious enough, the entire foundation of Judaism rests on the idea that Jews are a “chosen people,” and the term “people” connotes race and “chosen,” connotes exclusivity – put the two together and you inevitably get “racism.” A no-brainer really - but an idea that Jews have successfully kept hidden from the Goyim cattle.

The fact is, the Jews have exploited blacks going all the way back to the early 20th century, they founded, developed and financed the NAACP, a fact that history and political science professors are still too scared to admit openly, but a fact nonetheless.

At this point, let us get serious. Let us reject, at least momentarily, the knee-jerk reaction to dismiss what is written below based upon our emotional response to it. Let us consider carefully the facts, let us then consider what they might mean, and in the end, let us consider what the ultimate ramifications of these facts may be in our not too distant future. When I ask for instance, what group, more so than any other distinguishable group, was responsible for the Bolshevik Revolution, and I then answer that question by saying, “it’s the Jews stupid,” don’t reject it as an arbitrary response; it isn’t arbitrary, it’s an empirical fact, and one that can be easily proven if the reader chooses to cast aside his or her emotional response and to engage in a few hours of research.

What distinct group has been ejected from more counties over the last two millennia than any other group? It’s the Jews stupid.

What distinct group has led more radical subversive movements within their host nations than any other distinguishable group? It’s the Jews stupid.

What group has consistently avoided military service, especially in the front lines, than any other group? It’s the Jews stupid.[9]

What group more so than any other has always had its patriotism questioned? It’s the Jews stupid.

What specific ethnic/religious group more so than any other has consistently sought to ensnare and then exploit native populations under the yolk of usury?

What ethnic/religious group dominates international finance? It’s the Jews stupid.

What ethnic group dominates the media in Europe and North America? It’s the Jews stupid.

What ethnic group dominates Hollywood? It’s the Jews stupid.[10]

What ethnic group has done more to subvert true scientific inquiry in the sciences than any other – imbedding themselves in the disciplines of psychology, sociology and anthropology – and doing so in such a way as to hijack them and completely and totally politicize them? It’s the Jews stupid.[11]

What ethnic group gave us “multiculturalism,” and followed that up with an indoctrination program that reinforced this divisive farce by reaching right into our job place, homes and schools via compulsory “diversity” and “tolerance,” training programs and presentations? It’s the Jews stupid.[12]

Who brought us “Judeo-Christianity,” a concept that erroneously amalgamates two distinctly different and diametrically opposed religious and cultural views? It’s the Jews stupid.[13]

What ethnic group has done more than any other to identify itself as the only real victims of Nazi Germany and the Second World War? It’s the Jews stupid.

What ethnic group has perpetrated one of the greatest frauds on mankind in the form of the so-called “holocaust?” It’s the Jews stupid! [This is an important point – please see associated footnote][14]

What ethnic group dominates the Russian mafia? It’s the Jews stupid.

What ethnic group dominates the pornography industry? It’s the Jews stupid.

What ethnic group is more responsible than any other for the ongoing sex slave trade? It’s the Jews stupid.

Members of what ethnic group intentionally attacked an American ship in 1967 named the USS Liberty, in what amounted to an act of war against the United States of America and then used their co-ethnics in the United States to cover that fact up? It’s the Jews stupid.

Members of what ethnic group sought to bomb American assets in Cairo Egypt in the 1950s and blame it on the Arabs in an attempt to frame them and convince Americans to financially and militarily support the Zionist state? It’s the Jews stupid.[15]

What group more than any other has sought to undermine Christian values and western civilization in an effort to divide and conquer? It’s the Jews stupid.

What ethnic group was overly represented in the junk bond scandals of the 1980s? It’s the Jews stupid.[16]

Members of what ethnic group were deeply involved in the Enron scandal but were able to utilize the Jewish medias influence and access to the American mind in such a way as to nearly eliminate their role? It’s the Jews stupid.[17]

What ethnic group in America has mobilized itself through its organized efforts to force Americans to accept the contuing flood of illegal immigrants from the Third World? It's the Jews stupid. [Most recently manifested by the efforts of the ADL and the SPLC]

This list could go on and on, it would require a tomb the size of Moby Dick to encompass the many crimes ethnic Jews have committed against Gentiles just in the last decade. The point of writing this isn't to convince readers that every Jew is deeply entwined in a plot to subvert Gentile society, but that Judaism is not a peaceful religion that seeks to coexist in harmony with non-Jews, the fact is Judaism is first and foremost a "supremacist" religion that advocates the dominance of non-Jews.

Unless Gentiles become aware of the fact that Zionism is nothing but Jewish Supremacism's latest "ism," preceded in the past by many others, i.e. feminism, socialism, communism, and that these "ism's" are nothing more than tactics used in a grand strategy to weaken our will and western civilization itself, we'll never get to the heart of the problem at hand, we'll continue to fight wars for the Jews, to kill for the Jews, to arrest and incarcerate people for the Jews, to suppress the right to free expression for the Jews, etc… etc… ad infinitum. The time to liberate ourselves is now.

[6] Pg. 227.
[7] Maynard, Curt. "David Horowitz, Jewish Supremacism and the Mechanics of How Jews Exploit Blacks." http://www.pcapostate.blogspot.com/
[8] Horowitz, David. Radical Son. Pg. 275-276.
[9] An excellent book about the reality of so called Jewish patriotism and military service is War, Money and American Memory: Myths of Virtue, Valor and Patriotism, by Richard Earley, available on Amazon.com.
[10] Good books on this subject, Hollywood Babylon and another book entitled An Empire of their Own: How the Jews Invented Hollywood, by a Jew named Neal Gabler.
[11] Excellent examples of this undeniable fact can be found in the trilogy written by evolutionary psychology professor Kevin MacDonald, Separation and its Discontents, Culture of Critique A People That Shall Dwell Alone.
[12] Make no mistake – the entire Multiculturalism farce is as kosher as Gefilte fish on unleavened crackers – according to the Jewish owned Newsweek, the "primer," for

“multiculturalism,” itself can be traced to the Jewess Paula Rothenberg and her “social scientific” monstrosity entitled Racism and Sexism: An Integrated Study.

[13] This author has not been able to locate any written or recorded sources utilizing the term “Judeo-Christianity,” prior to 1940 – the term itself seems to be a modern invention and one forced on Christians via the media and Jewish influence. Abe Foxman, Director of the Anti-Defamation League, a Jewish Supremacist organization, reinforces this fact in his propaganda laced diatribe Never Again, when he reveals on page 146 that he got Jerry Falwell, a well known Christian evangelist to agree to use the term “Judeo-Christian,” rather than the exclusive “Christian,” when referring to the foundation of the United States of America, i.e. This is a Christian Nation.

[14] In the last several years many prominent historical revisionists [holocaust deniers to the Jews – historians by any other name] have been illegally arrested and deported; victims of so called “renditions,” and imprisoned in three alleged “modern democratic” nations, Canada, Germany and Austria. The American public is unaware of this incredible injustice because the Jewish media has embraced a news black out when it comes to these courageous individuals. Now I ask the reader in all seriousness, considering everything happening in the world today, why would a so-called modern democratic nation imprison people for questioning certain aspects of the holocaust? We don’t imprison people for claiming they’ve been abducted by aliens, for stating that the Pope and Opus Dei are behind all the evils in the world, for questioning the veracity of past American Presidents, etc… why are we throwing people that question certain aspects of history as it relates to Jews into prison? Answer: It’s the Jews stupid – The story that we have been thoroughly indoctrinated to believe and to accept on faith with religious fervor is mostly a lie. The Jews and the media would have you believe that so called holocaust deniers deny that the Germans persecuted Jews and/or that the Germans never imprisoned Jews in concentration camps. Surprise, there isn’t a single revisionist that denies these facts – they do however question the near holy number of 6 million and the idea that the Germans systematically gassed Jews in “gas chambers,” in Poland during the Second World War. Did you know that for 45 years a commemorative plaque sat at Auschwitz claiming that 4 millions Jews had died in the camp and that this plaque was changed with absolutely no fanfare in 1990 to another plaque that claims only 1.5 million? FACT: If it hadn’t been for the hard work and dedication of historical revisionists, people like Ernst Zundel, David Irving, Siegfried Verbeke, Manfred Roeder, Bradley Smith, Fred Leuchter and many, many others, that plaque would never have been changed. In the end, only a fool wouldn’t consider the likelihood that the real reason these historians have been jailed is because they have been on the right track all along and there are people out there, predominantly Jews, that do not want others to know what these individuals have to say.

[15] See information on the Lavon Affair – do a google search, there is a great deal of info on this crime, the Israeli’s essentially admit what they did, it’s not a state secret.

[16] Read about Michael Milken and Ivan Boesky, both Jews, and both Junk Bond Kings.

[17] The primary witness to turn states evidence against Ken Lay and Jeffrey Skilling was the Jew Andy Fastow who worked closely with the largest holders of Enron stock, the Jewish Belfer family. For more information on these facts, see Michael Collins Piper’s excellent book, The New Jerusalem.

LITERARY DIRECTORATE

EDITORIAL BOARD

CYRUS ADLER, Ph.D.
(Departments of Post-Biblical Antiquities; the Jews of America.)
President of the American Jewish Historical Society; Librarian, Smithsonian Institution, Washington, D. C.

GOTTHARD DEUTSCH, Ph.D.
(Department of History from 1492 to 1901.)
Professor of Jewish History, Hebrew Union College, Cincinnati, Ohio; Editor of "Deborah."

LOUIS GINZBERG, Ph.D.
(Department of Rabbinical Literature.)
New York; Author of "Die Haggada bei den Kirchenvätern."

President of Central Conference of American Rabbis; Rabbi of Temple Emanu-El, New York.

JACOB VOORSANGER, D.D.,
Rabbi of the Congregation Emanu-El, San Francisco, Cal.; Professor of Semitic Languages and Literatures, University of California, Berkeley, Cal.

EDWARD J. WHEELER, M.A.,
Editor of "The Literary Digest," New York.

FOREIGN BOARD OF CONSULTING EDITORS

ISRAEL ABRAHAMS, M.A.,
Coeditor of the "Jewish Quarterly Review"; Author of "Jewish Life in the Middle Ages," etc.; Senior Tutor in Jews' College, London, England.

W. BACHER, Ph.D.,
Professor in the Jewish Theological Seminary, Budapest, Hungary.

M. BRANN, Ph.D.,
Professor in the Jewish Theological Seminary, Breslau, Germany; Editor of "Monatsschrift für Geschichte und Wissenschaft des Judenthums."

H. BRODY, Ph.D.,
Rabbi, Nachod, Bohemia, Austria; Coeditor of "Zeitschrift für Hebräische Bibliographie."

ABRAHAM DANON,
Principal of the Jewish Theological Seminary, Constantinople, Turkey.

HARTWIG DERENBOURG, Ph.D.,
Professor of Literary Arabic at the Special School of Oriental Languages, Paris, France.

S. M. DUBNOW,
Author of "Istoriya Yevreyev," Odessa, Russia.

MICHAEL FRIEDLÄNDER, Ph.D.,
Principal of Jews' College, London, England; Author of "The Jewish Religion," etc.

IGNAZ GOLDZIHER, Ph.D.,
Professor of Semitic Philology, University of Budapest, Hungary.

M. GÜDEMANN, Ph.D.,
Chief Rabbi of Vienna, Austria.

BARON DAVID GÜNZBURG,
St. Petersburg, Russia.

A. HARKAVY, Ph.D.,
Chief of the Hebrew Department of the Imperial Public Library, St. Petersburg, Russia.

ZADOC KAHN,
Chief Rabbi of France; Honorary President of the Alliance Israélite Universelle; Officer of the Legion of Honor, Paris, France.

M. KAYSERLING, Ph.D.,
Rabbi, Budapest, Hungary; Corresponding Member of the Royal Academy of History, Madrid, Spain.

MORITZ LAZARUS, Ph.D.,
Professor Emeritus of Psychology, University of Berlin; Meran, Austria.

ANATOLE LEROY-BEAULIEU,
Member of the French Institute; Professor at the Free School of Political Science, Paris, France; Author of "Israël chez les Nations."

ISRAEL LÉVI,
Professor in the Jewish Theological Seminary; Editor of "Revue des Études Juives," Paris, France.

EUDE LOLLI, D.D.,
Chief Rabbi of Padua; Professor of Hebrew at the University, Padua, Italy.

IMMANUEL LÖW, Ph.D.,
Chief Rabbi of Szegedin, Hungary; Author of "Die Aramäischen Pflanzennamen."

S. H. MARGULIES, Ph.D.,
Principal of the Jewish Theological Seminary; Chief Rabbi of Florence, Italy.

H. OORT, D.D.,
Professor of Hebrew Language and Archeology at the State University, Leyden, Holland.

ABBÉ PIETRO PERREAU,
Formerly Librarian of the Reale Biblioteca Palatina, Parma, Italy.

MARTIN PHILIPPSON, Ph.D.,
Formerly Professor of History at the Universities of Bonn and Brussels; President of the Deutsch-Jüdische Gemeindebund, Berlin, Germany.

SAMUEL POZNANSKI, Ph.D.,
Rabbi in Warsaw, Russia.

SOLOMON SCHECHTER, M.A., Litt.D.,
Professor of Hebrew, University College, London, England; Reader in Rabbinic, University of Cambridge; Author of "Studies in Judaism."

E. SCHWARZFELD, Ph.D.,
Secretary-General of the Jewish Colonization Association, Paris, France.

LUDWIG STEIN, Ph.D.,
Professor of Philosophy, University of Bern, Switzerland; Editor of "Archiv für Geschichte der Philosophie," etc.

HERMANN L. STRACK, Ph.D.,
Professor of Old Testament Exegesis and Semitic Languages, University of Berlin, Germany.

CHARLES TAYLOR, D.D., LL.D.,
Master of St. John's College, Cambridge, England; Editor of "Sayings of the Jewish Fathers," etc.

PREFACE

OWING to their long history and their wide dispersion, the Jews have been connected with most of the important movements in the history of the human race. The great monotheistic religions are based upon the Jewish Bible; medieval philosophy and science are inseparably associated with the Jews as intermediators; and in modern times there has been hardly a phase of human thought and activity in which the participation of Jews may not be discerned. While they have thus played a prominent part in the development of human thought and social progress throughout the centuries, there has been no faithful record of their multifarious activity. THE JEWISH ENCYCLOPEDIA is intended to supply such a record, utilizing for this purpose all the resources of modern science and scholarship. It endeavors to give, in systematized, comprehensive, and yet succinct form, a full and accurate account of the history and literature, the social and intellectual life, of the Jewish people—of their ethical and religious views, their customs, rites, and traditions in all ages and in all lands. It also offers detailed biographical information concerning representatives of the Jewish race who have achieved distinction in any of the walks of life. It will accordingly cast light upon the successive phases of Judaism, furnish precise information concerning the activities of the Jews in all branches of human endeavor, register their influence upon the manifold development of human intelligence, and describe their mutual relations to surrounding creeds and peoples.

The need of such a work is sufficiently obvious. Jewish history is unique and therefore particularly liable to be misunderstood. The Jews are closely attached to their national traditions, and yet, in their dispersion, are cosmopolitan, both as to their conceptions of world-duty and their participation in the general advancement of mankind. To exhibit both sides of their character has been one of the objects of THE JEWISH ENCYCLOPEDIA.

The history of the Jewish people has an absorbing interest for all who are concerned in the development of humanity. Connected in turn with the principal empires of antiquity, and clinging faithfully to their own ideals, the Jews developed a legal system which proved in course of time their bulwark of safety against the destruction, through external forces, of their national life. The Roman code, in its Christian development, assigned an exceptional position to the Jews; and it becomes one of the most interesting problems for the student of European constitutions to reconcile the status thus allotted to the Jew with the constitutional principles of the various Christian states. The struggle of the Jew to emancipate himself from this peculiar position has made him an efficient ally in the heroic endeavors of modern peoples toward the assertion of human rights.

Throughout all the divergences produced by different social environments and intellectual influences, the Jews have in every generation conserved the twofold character referred to above: as representatives of a nation, they have kept alive their Hebrew traditions; and, as cosmopolitans, they have taken part in the social and intellectual life of almost all cultured nations. In the period when Jewish and Hellenic thought came into mutual contact in Alexandria, they originated new currents of philosophic speculation. They then joined with the Arabs in the molding of the new faith, Islam, and of the entire Arabian-Spanish civilization. In the Europe of the Middle Ages, the process by which the science of Greece reached the schools of Bologna, Paris, and Oxford can be made clear only by taking account of the part played by Jewish translators and teachers. Scholastic philosophy was also influenced by such great medieval Jewish thinkers as Ibn Gabirol and Maimonides, while the epoch-making thought of Spinoza can be understood only by reference to his Jewish predecessors. In modern times the genius of the Jews has asserted its claim to intellectual leadership through men like Mendelssohn, Heine, Lassalle, and Disraeli. The twofold spirit of Judaism is displayed even through the medium of the Yiddish dialect, that modern representative of the Judæo-German of the Middle Ages. Preserved in this dialect, Jewish legends, customs, and superstitions, all of which still retain the traces of their connection with the various lands wherein the Jews have dwelt, serve to elucidate many an obscure feature of general folk-lore and ethnic superstition.

In the development of the Jewish faith and religious literature the same processes of internal growth and of modification through environment have incessantly gone on. The Bible, that perennial source of all great religious movements in western civilization, has been interpreted by the Jews from their own peculiar point of view; but their traditions on the whole represent the spirit of progress rather than the blind worship of the letter. The Biblical characters as they lived in Jewish traditions differed greatly from the presentation in the Scripture record. These traditions are embodied in the Rabbinical literature, with its corresponding Hellenic counterparts, those numerous Apocrypha which form the connecting links between the Old Testament and the New, between the Bible and the Talmud on the one hand and the patristic literature and the Koran on the other. Drawing upon these traditions, the Jews have gradually formulated their interpretation of the Law and an elaborate system of religious belief—in a word, Jewish theology. So, too, the Jewish system of ethics has numerous points of contact with the ethical and philosophical systems of all other peoples.

The Jews have been important factors in commerce through all the ages; the Egypt of the Ptolemies, the Rome of the emperors, the Babylonia of the Sassanid rulers, and the Europe of Charlemagne felt and acknowledged the gain to commerce wrought by their international connections and affiliations. In all the great marts of European commerce they were pioneers of trade until, with the rise of the great merchant-gilds, they were in some degree ousted from this sphere and confined to lower pursuits. It becomes thus a matter of supreme interest to follow the Jews through all their wanderings, to observe how their religious, social, and philanthropic activities were variously developed wherever they dwelt. To give a faithful record of all this abundant and strenuous activity is the proper purpose of a Jewish encyclopedia.

Hitherto the difficulties in the way of such an adequate and impartial presentation have been insuperable. Deep-rooted prejudices have prevented any sympathetic interest in Judaism on the part of Christian theologians, or in Christianity on the part of the rabbis. These theological antipathies have now abated, and both sides are better prepared to receive the truth. It is only within the last half-century, too, that any serious attempts have been made to render accessible the original sources of Jewish history scattered throughout the libraries of Europe. As regards Jewish literature, the works, produced in many ages and languages, exist in so many instances in manuscript-sources not yet investigated, in archives or in *genizot*, that Jewish scholars can hardly be said to command a full knowledge of their own literature. The investigation of the sociological conditions and the anthropology of the Jewish people is even now only in its initial stages.

In all directions, the facts of Jewish theology, history, life, and literature remain in a large measure hidden from the world, even from Jews themselves. With the publication of THE JEWISH ENCYCLOPEDIA a serious attempt is made for the first time to systematize and render generally accessible the knowledge thus far obtained.

That this has now become possible is due to a series of labors carried on throughout the whole of the nineteenth century and representing the efforts of three generations of Jewish scholars, mainly in Germany. An attempt was made, indeed, in the sixteenth century by Azariah de' Rossi toward a critical study of Jewish history and theology. But his work remained without influence until the first half of the nineteenth century, when Krochmal, Rapoport, and Zunz devoted their wide erudition and critical ingenuity to the investigation of the Jewish life and thought of the past. Their efforts were emulated by a number of scholars who have elucidated almost all sides of Jewish activity. The researches of I. M. Jost, H. Graetz, and M. Kayserling, and their followers, have laid a firm foundation for the main outlines of Jewish history, as the labors of Z. Frankel, A. Geiger, and J. Derenbourg paved the way for investigation into the various domains of Jewish literature. The painstaking labors of that Nestor of Jewish bibliography, Moritz Steinschneider—still happily with us—have made it possible to ascertain the full range of Jewish literary activity as recorded both in books and in manuscripts. THE JEWISH ENCYCLOPEDIA now enters upon the field covered by the labors of these and other scholars, too numerous to mention, many of whom have lent their efforts toward its production and have been seconded by eminent coworkers from the ranks of Christian critics.

With the material now available it is possible to present a tolerably full account of Jews and Judaism. At the same time the world's interest in Jews is perhaps keener than ever before. Recent events, to which more direct reference need not be made, have aroused the world's curiosity as to the history and condition of a people which has been able to accomplish so much under such adverse conditions. THE JEWISH ENCYCLOPEDIA aims to satisfy this curiosity. Among the Jews themselves there is an increasing interest in these subjects in the present critical period in their development. Old bonds of tradition are being broken, and the attention of the Jewish people is necessarily brought to bear upon their distinctive position in the modern world, which can be understood only in the light of historical research.

The subject-matter of this ENCYCLOPEDIA naturally falls into three main divisions, which have been subdivided into departments, each under the control of an editor directly responsible for the accuracy and thoroughness of the articles embraced in his department. These are: (1) History, Biography, Sociology, and Folk-lore; (2) Literature, with its departments treating of Biblical, Hellenistic, Talmudical, Rabbinical, Medieval, and Neo-Hebraic Literatures, and including Jurisprudence, Philology, and Bibliography; (3) Theology and Philosophy.

I. HISTORY, BIOGRAPHY, AND SOCIOLOGY.

From the time of Josephus and the author of First Maccabees down to the nineteenth century Judaism did not produce a historian worthy of the name. What medieval times brought forth in this branch of literature were mostly crude chronicles, full of miraculous stories. Nor were the chronicles of the seventeenth and eighteenth centuries much better.

But the interest displayed by Christian scholars of the seventeenth century in Rabbinical literature had the effect of directing attention to the history of the Jews. Jacques Basnage de Beauval, a French Protestant clergyman (1653–1723), has the merit of having done pioneer work with his "Histoire de la Religion des Juifs" (5 vols., Rotterdam, 1707–11).

The pioneer of modern Jewish history is Isaac Marcus Jost (1793–1860). His "Allgemeine Geschichte des Juedischen Volkes," and "Neuere Geschichte der Israeliten," in spite of their shortcomings due to the lack of preparatory studies, were real historiographic achievements, while his "Geschichte des Judenthums und seiner Sekten" remains a standard work to the present day. Next to Jost is to be mentioned Selig (Paulus) Cassel (1821–92), whose article on Jewish history in the "Allgemeine Encyclopädie der Wissenschaften und Künste" of Ersch and Gruber (vol. xxvii.) may justly be called a memorable work. Both of these, however, were overshadowed by H. Graetz (1817–91), whose "Geschichte der Juden," in eleven volumes, although inadequate in many details, owing mainly to the absence of sufficient preparatory investigations, is still the only comprehensive and indispensable work on the subject. Since the appearance of Graetz's history, a great deal of critical research has been carried on by a number of younger scholars, the results of which have been published in monographs and magazines. The labors of Isidore Loeb, D. Kaufmann, and A. Harkavy in this field deserve special mention. THE JEWISH ENCYCLOPEDIA, by stimulating research in detail, will have paved the way for the future writer of a universal Jewish history based on thoroughgoing scientific investigation.

The historical matter in this work is presented according to a system which may be indicated as follows: The history of all communities of any importance is given in detail; this information is summarized in connection with the various divisions of the different countries containing Jewish communities; lastly, a general sketch with cross-references to these subdivisions has been provided for each country. In addition to this, numerous general topics have been dealt with in their relations to the Jews, such as the Papacy, the Crusades, the Inquisition, Protestantism, etc. Strange as it may seem, there is no country that possesses an adequate history of its Jews, though of late years considerable activity has been shown in collecting material for such histories. There exists no comprehensive history of the Jews of Germany, Austria, France, Holland, England, Italy, Poland, or the United States, or even of such political divisions as Bohemia, Moravia, and Galicia, or of congregations of such historic importance as those of Amsterdam, Frankfort-on-the-Main, London, Prague, or Wilna.

Jews in America.

The entire field of the history, sociology, economics, and statistics of the Jews in America has hitherto been left almost uncultivated. There has, for example, been no attempt to present a comprehensive account concerning the foundation of the earliest Jewish communities, either in North or South America or in the West Indies. The developmental stages through which Judaism has passed in America, although of extreme interest, not only in themselves, but as promising to react upon the shaping of Judaism over all the world, have received but little attention. In THE JEWISH ENCYCLOPEDIA the facts concerning Jews and Judaism in the New World are for the first time adequately presented.

There is no section of Jewish history that has been more meagerly treated than that pertaining to the Jews of Russia. Graetz in his work devotes very little space to Russia, Poland, and Lithuania, a defect remedied to some extent in the Hebrew translation of his history, by S. P. Rabbinowitz, with notes by A. Harkavy. In the reform period of Emperor Alexander II. the government archives were partially thrown open, so that scholars like Harkavy, Orshanski, Fuenn, and Bershadski were enabled to furnish valuable material for the early history of the Russian Jews. Dubnow has contributed largely to the history of the Hasidim, the Frankists, and the old Jewish communities. In 1900 the first volume of the "Regesti i Nadpisi" (documents, epitaphs, and extracts from old writers) was published by the Society for the Promotion of Culture among the Jews of Russia; it covers the period from 70 to 1674. The 662 documents collected by Bershadski and published by the same society in 1882, under the title of "Russko-Yevreiski Archiv," contain material relating to the Jews in Lithuania from 1388 to 1569. Very little has been written about the development of the Russian Jews in the second half of the nineteenth century, although many of them have distinguished themselves in the industries and professions, finance, railroad-building, science, literature, and the fine arts. About 1,500 topics dealing with the Jews in Russia will be found included in The Jewish Encyclopedia, the greater part figuring for the first time in an English work, and the information being drawn in large measure from the most recent collections of Russian sources.

Jews in Russia.

Of all branches of the science of Judaism, biography, and especially modern biography, has been most neglected. The whole Jewish biographical literature of the nineteenth century, general and individual, of any scientific value, would form only a very moderate collection. In the great biographical dictionaries of a general character, like those of Bayle, Moreri, Ladvocat, Michaud, and Hoefer, the "Allgemeine Deutsche Biographie," etc., Jews were almost entirely omitted. Only in the last two or three editions of such comprehensive encyclopedias as those of Meyer and of Brockhaus has Jewish biography received some attention, but the natural limitations of these books do not admit of detailed treatment. To a greater degree the want has been supplied by "La Grande Encyclopédie" and the "Dictionary of National Biography." But were one to take all national, local, and professional biographical dictionaries of the world together, one would find in them but a very small proportion of the Jewish biographies that appear in this Jewish Encyclopedia. There are biographical dictionaries of dead and of living divines and benefactors of the various Christian churches, but there is not a single systematically compiled collection of the biographies of the thousands of rabbis and Hebrew scholars, educators, and philanthropists who have worked prominently in the various countries of the world, and have contributed by their deeds to the spiritual and moral uplifting, as well as to the material welfare, of the Jewish people. The Jewish Encyclopedia is an endeavor to supply this deficiency.

While the present work has studiously sought to avoid exaggerating the merits of the more distinguished subjects of its biographical sketches, it has felt bound, on the other hand, to give due prominence to those less known men and women who have played an honorable part in Jewish life, and whose names should be redeemed from undeserved oblivion. The Jewish Encyclopedia will thus offer an alphabetically arranged register, as complete as possible, of all Jews and Jewesses who, however unequal their merits, have a claim to recognition. Under no circumstances, however, have personal or other motives been permitted to lower the standard of inclusion adopted for the Encyclopedia.

A word must be said touching two features pertaining particularly to the biographical department of a Jewish encyclopedia. It is often difficult in the case of writers, artists, and others, to determine positively whether they belong to the Jewish race, owing to the fact that social conditions may have impelled them to conceal their origin. To settle such delicate questions it has frequently been necessary to consult all manner of records, public and private, and even to ask for information from the persons themselves. While every care has been taken to insure accuracy in this regard, it is possible that in a few instances persons have been included who have no claim to a place in a Jewish encyclopedia.

An even more delicate problem that presented itself at the very outset was the attitude to be observed by the Encyclopedia in regard to those Jews who, while born within the Jewish community, have, for one reason or another, abandoned it. As the present work deals with the Jews as a race, it was found impossible to exclude those who were of that race, whatever their religious affiliations may have been. It would be natural to look in a Jewish encyclopedia for such names as Heinrich Heine, Ludwig Börne, Theodor Benfey, Lord Beaconsfield, Emin Pasha: to mention only a few. Even those who have Jewish blood only on one side of their parentage—as Sir John Adolphus, Paul Heyse, and Georg Ebers—have been included.

In treating of those Jews whose activities have lain outside of distinctively Jewish spheres, it has been deemed sufficient to give short sketches of their lives with a simple indication of what their contributions have been to their particular fields of labor. Only occasionally, and for reasons of weight, has a departure been made from this policy. A summary of the contributions thus made to the various sciences will be found under the respective headings.

II. LITERATURE.

How to deal with the vast amount of literary material that offered itself to the pages of a Jewish encyclopedia was a serious problem. While the Old Testament is the foundation of Jewish literature in all its aspects, as well as of Jewish life and thought, information on Biblical subjects is so readily accessible elsewhere that it did not seem desirable to develop the treatment of purely Biblical topics in these pages to the length which would be demanded in a work whose scope was confined to the Bible alone. In particular, it was considered unnecessary to compete with the "Dictionary of the Bible," prepared under the direction of Dr. Hastings, or with the "Encyclopædia Biblica" of Professor Cheyne, both published simultaneously with this ENCYCLOPEDIA. While all sides of Biblical research are represented in these pages, they are treated concisely and, in many cases, with little reference to disputed points. With regard, however, to two special aspects of Biblical subjects, it has seemed desirable to treat the Scriptures on somewhat novel principles. Among Jews, as among Christians, there exists a wide diversity of opinion as to the character of the revelation of the Old Testament. There are those who hold to the literal inspiration, while others reject this view and are of the opinion that the circumstances under which the various texts were produced can be ascertained by what is known as the Higher Criticism. It seemed appropriate in the more important Biblical articles to distinguish sharply between these two points of view, and to give in separate paragraphs the actual data of the Masoretic text and the critical views regarding them. Again, there exists nowhere a full and adequate account of the various rabbinical developments of Bible exegesis—which would be of especial value to the Christian theologian and Bible exegete—and it was evidently desirable in a Jewish encyclopedia to devote considerable attention to this aspect of Biblical knowledge. The plan was adopted of treating the more important Biblical articles under the three heads of (*a*) Biblical Data, giving, without comment or separation of "sources," the statements of the text; (*b*) Rabbinical Literature, giving the interpretation placed upon Biblical facts by the Talmud, Midrash, and later Jewish literature; (*c*) Critical View, stating concisely the opinions held by the so-called Higher Criticism as to the sources and validity of the Biblical statements. As kindred to the rabbinical treatment of Bible traditions, it has been thought well to add occasionally (*d*) a statement of the phases under which they appear in the Koran and traditions of Islam generally.

Bible.

It is here proper to point out that, inasmuch as the treatment of Biblical passages is mainly from the Jewish point of view, the chapter and verse divisions of the Hebrew text have, as a rule, been adhered to in citations, while any discrepancies between them and those of the Authorized Version have been duly noted.

In thus keeping abreast of the times in Biblical matters, THE JEWISH ENCYCLOPEDIA aims to acquaint the student with the results of modern research in many fields that are altogether new and bristling with interesting discoveries. This feature of the work extends over the fields of Assyriology, Egyptology, and archeological investigation in Palestine, the inexhaustible treasures of which are constantly casting unexpected light on every branch of Biblical history and archeology. The soil of Africa has within the last thirty years enriched our knowledge of the life of the Jews of Egypt, and many apocryphal works unearthed there form a valuable link in connecting the Old Testament with the New, and the Biblical with the Rabbinical literature. The nineteenth century witnessed a great advance in the investigation of Hellenistic literature. The forms and syntactical constructions of the Hellenistic dialect have been set forth in dictionaries and grammars, so as greatly to facilitate the study of the documents. Valuable critical and exegetical works have shed light upon such topics as the texts of the Septuagint, of Aquila, and of Theodotion. Two new editions of Josephus have appeared, and the sources of his history have been investigated. The dates and origins of the apocryphal and pseudepigraphic books have been approximately determined. Around Philo of Alexandria, a whole literature has grown up, and the true nature of his thought has been fairly well established. The result has been to determine with some definiteness the relation of the Hellenistic literature to the Jewish and Greek thought of the period, and its position in the general intellectual development of the age which produced Christianity. In these investigations Jewish scholars have taken a distinguished part. It has been the aim of THE JEWISH ENCYCLOPEDIA to present in the most thorough manner the results achieved by critical investigation in the domain of Hellenistic literature. Of all Hellenistic productions of Jewish interest critical accounts and critical discussions are given, and the necessity of apprehending the ideas contained in them as products of their times, and of tracing their origin and development and their influence on contemporary and on later life, has constantly been kept in view. The New Testament, as representing the rise of a new religion, stands in a separate category of its own; yet from one point of view it may be regarded as a Hellenistic work—some of its authors having been Jews who wrote in Greek and more or less under the influence of Greek thought—and therefore its literature properly finds a place in the ENCYCLOPEDIA.

Hellenistic Literature.

The Talmud is a world of its own, awaiting the attention of the modern reader. In its encyclopedic compass it comprises all the variety of thought and opinion, of doctrine and science, accumulated by the Jewish people in the course of more than seven centuries, and formulated for the most part by their teachers. Full of the loftiest spiritual truth and of fantastic imagery, of close and learned legal disquisition and of extravagant exegesis, of earnest doctrine and of minute casuistry, of accurate knowledge and of popular conceptions, it invites the world of to-day to a closer acquaintance with its voluminous contents. THE JEWISH ENCYCLOPEDIA has allotted to the subject of the Talmud an amount of space commensurate with its importance. Besides the rabbinical treatment of Biblical topics referred to, the Talmudic department includes those two great divisions known as the Halakah and the Haggadah, the one representing the development of the law, civil, criminal, and ceremonial; the other, the growth, progressive and reactionary, of the ethical principles of the Torah. The legal topics are treated from a strictly objective point of view, irrespective of their application, or even applicability, to our own days and conditions, but with incidental comparisons with Greek and Roman or with modern law, such as may be of interest to

Talmud.

the student of comparative jurisprudence and of social economy. The Haggadah, on the other hand, attaining its fullest development in its treatment of the Biblical text, is therefore frequently included in the second paragraph of the Biblical articles. While in other directions its utterances bear more directly upon matters of theology, much remains both in legend and in proverbial wisdom which is discussed under the appropriate heads.

The rabbis of Talmudic times—the Tannaim and Amoraim—those innumerable transmitters of tradition and creators of new laws, receive ample treatment in the pages of the ENCYCLOPEDIA. Not a few of them mark epochs in the development and growth of the halakic material, while others are interesting from their personal history or from the representative pictures of their times which their lives and teachings afford. Most of them being at the same time teachers and preachers, their biographies would be incomplete without specimens of their homiletic and ethical utterances. Those familiar with the labyrinthine structure of the Talmudim and Midrashim as far as arrangement of subjects and chronological order are concerned, and with the chaotic state of the text, particularly with regard to proper names, need not be told that the difficulties in identifying men and times are sometimes insurmountable, and much must be left to conjecture, in spite of the efforts made both in early ages and in recent days. The composition not only of well-known haggadic and halakic collections, but also of the single treatises of the Mishnah, will be separately treated. The work of Zunz, Buber, and Epstein in the provinces of Haggadah, and that of Frankel, Brüll, and Weiss in Halakah, have rendered it possible to give a history of Talmudic literature.

Rabbinical Literature.

What the Bible had been for the Talmud, the Talmud itself became for the later Rabbinical literature, which, based on the Talmud, applied itself to the further development of the Halakah and the Haggadah. Although this Rabbinical literature extends over a period of 1,400 years, and represents the only genuinely Jewish writings of that period, it is the least understood, not to say the most misunderstood, department of Jewish literature. The present ENCYCLOPEDIA affords for the first time a survey of the growth of the Halakah and the Haggadah in post-Talmudic times (500–1900). During that period, the civil and religious laws of the Jews, although based upon the Talmud, underwent many a change, while the Haggadah developed new motives and broadened its foundations, until it differed essentially in character from the Haggadah of the Talmudic times. Two new branches were developed: the dispersion of the Jews in this period throughout the civilized world produced the responsa literature; and the exclusion of the German-Polish Jews from all share in general culture produced casuistry. A subject that has received due consideration is the period of the Geonim (500–1000), which, though not spiritually productive, powerfully influenced rabbinical Judaism.

An attempt has been made to fill the hitherto existing gap in literary history in regard to the activity of the Arabic-Spanish school (1000–1500) in the labyrinth of the Talmud, and equal consideration has been bestowed upon the French, German, and Italian Talmudists of the same period, to whom is largely due our knowledge of the Talmud, and through whose initiative the Jewish spirit was diverted to new lines of activity and kept alive, when it was denied every other mode of asserting itself. Adequate attention has been given to the Rabbinical literature of the past four centuries, which have been chiefly characterized by the casuistic works of the German and Polish Talmudists, and the critical treatment of the Talmud in recent times finds full expression in these pages.

Jews have written in almost all languages that have a literature, and the ENCYCLOPEDIA has taken account of this literary activity in its broadest range. The vast majority of productions of Jewish interest are, however, written in Hebrew and the allied tongues, and greater attention has naturally been paid to this section of Jewish literature. While the ENCYCLOPEDIA does not attempt to give a complete bibliography of this extensive subject, it is hoped that there will be found under the various authors' names an account of almost all works of importance written in Hebrew.

History of Literature.

After the destruction of the national life of the Jews, nearly their whole energy was directed toward the inner life and found expression in their literature. Their productiveness in this respect was remarkable, and is testified to by the large collections of Hebrew manuscripts and books which are to be found in private and in public libraries. When printing was invented they eagerly seized upon the new art, as it gave them a further means of spreading within their own ranks a knowledge of their literature. The history of Jewish books and Jewish bookmaking from the technical point of view is one of great interest and has, up to the present time, hardly received systematic treatment.

For the history of their own literature the Jews did little during the Middle Ages, and even when they did work along these lines the motive was in most cases other than purely literary. Such works, for example, as the "Seder Tannaim we-Amoraim," and the well-known "Letters" or "Responsa" by Sherira Gaon on the composition of the Talmudic literature, were not written with the purpose of giving a history of literature, but of proving the validity of tradition.

In modern times Christian scholars were among the first to attempt a comprehensive view of the contents of Jewish literature, though important bio-bibliographical works were compiled by Conforte, Heilprin, and Azulai. Hottinger (died 1667) gave this literature a place in his "Bibliotheca Orientalis," and Otho (1672) sought to describe in the form of an encyclopedia the work and times of the teachers of the Mishnah. The most ambitious work of this kind was the "Bibliotheca Magna Rabbinica" of Bartolocci (died 1687), together with the additions of Imbonati (1694), which was followed up by the colossal work of Johann Christian Wolf (1683–1739). That these attempts failed was due to the fact that the time was not ripe for any such comprehensive presentation, as the preliminary work in detail was still to be done. Order was first wrought in this chaos when the modern spirit of research had engendered what is now known as "the science of Judaism." Zunz's great work, "Die Gottesdienstlichen Vorträge" (1832), was the first attempt to give an accurate account of the development of one branch of this literature, the homiletic. He followed this up with histories of the religious poetry and of the literary productions connected with the Synagogue; and in 1836, a few years after Zunz's first book, a Christian scholar, Franz Delitzsch, in his "Zur Geschichte der Jüdischen Poesie," wrote a history of Jewish poetry which, even at this date, has not been superseded. Steinschneider's remarkable attempt at a comprehensive history of Jewish literature, first published (1850) in Ersch and Gruber's "Allgemeine Encyclopädie der Wissenschaften und Künste," and translated into English (London, 1857) and Hebrew (Warsaw, 1900), has as yet found no imitator, though special departments have received careful treatment at various hands. Neubauer's exhaustive volumes on the history of Jewish literature in France during the fourteenth century have at least placed all the material for that period at our disposal, and Steinschneider's "Hebräische Uebersetzungen des Mittelalters" has brought together a mass of material on the special activity of the Jews in transmitting the science of antiquity to western Europe. In addition to the above publications, attempts have been made at a more comprehensive popular presentation in the compendium of David Cassel (1879), in Karpeles' "Geschichte der Jüdischen Literatur" (1886), and in Winter and Wünsche's "Jüdische Literatur," the last of which is rather a collection of extracts than a history. Making use of all this material, THE JEWISH ENCYCLOPEDIA has endeavored to present a faithful picture of what the Jews have done, not only for their own special literature, but also for the great literatures of the world in the various countries in which they have had their abode. Due attention has also been paid to the varied activity of the Jewish press.

Hebrew Philology.

Hebrew philology possesses peculiar interest. The history of the Hebrew alphabet, in its origin and changes, shows the relation of the Jews in the most ancient times to their Semitic neighbors, while its development follows certain lines of cleavage which indicate actual divisions among the Jewish people. Certain peculiarities of grammar and vocabulary, when traced historically to their source, determine whether the Jews developed their language solely on their own national lines or whether they borrowed from other nations, of their own or of different stock. These points are brought out in the ENCYCLOPEDIA under various general heads. Among the Jews Hebrew philology followed two distinct lines of development. The one was purely from within; for the desire to preserve the text of the Bible intact, for future generations, gave rise to the school of Masoretes, who laid the foundation upon which future scholars built. The other starts from without and is due to the influence of the Arabs, to whom the science of philology was (as Steinschneider has said) what the Talmud was to the Jews. Under this influence and commencing with Saadia, a long line of grammarians and philologists appears, extending not only through Europe but into Africa and even into Persia.

Of course, an encyclopedia like the present can not confine itself to the philological work done by the Jews themselves. The ENCYCLOPEDIA contains articles upon the chief non-Jewish Hebrew philologists, whether they were influenced by Jewish writers as were Reuchlin and his followers, or were not so influenced, as is the case with most of the modern school, Gesenius, Ewald, Stade, and others. This is all the more necessary as during the nineteenth century Jews themselves took but a small part in the philological study of their ancient tongue. The reverse, however, is true of the post-Biblical Hebrew. While in the Middle Ages only one dictionary of the Talmudic language was produced, the "Aruk" of Nathan ben Jehiel, in recent times and upon the basis of this splendid work, a band of Jewish scholars have made this subject peculiarly their own.

Jewish Bibliography.

A great deal of attention is paid in this work to Jewish bibliography. From Bartolocci to Steinschneider and his pupils, there is a vast amount of unclassified bibliographical material. The ENCYCLOPEDIA furnishes, for the first time, the ancient and the modern literature of many thousand topics in alphabetical order; and thus includes, besides complete dictionaries of the Bible, of the Talmud, and of the history and literature of the Jewish people, some approach to a handbook of Hebrew bibliography classified as to subjects, at least. Containing, as it does, however, the contributions of so many collaborators, this work has done its best to introduce some degree of uniformity in the methods of citation employed by the various scholars of different countries.

With regard to proper names, it was found impossible in the present state of Hebrew bibliography to follow a consistent plan; the reader will understand this if he considers the fact that until the eighteenth century the Jews in many countries had no family names. The best-known forms of the names have been selected (to facilitate reference), but in all cases the variant forms have been indicated. It has not been thought wise to follow exclusively either Zedner's system, as shown in his masterly "Catalogue of Hebrew Books in the British Museum," nor that of Steinschneider, in that *magnum opus* of Hebrew bibliography, the "Bodleian Catalogue"; instead, what seemed to be the best features of the entire bibliographical literature have been combined.

Valuable information may be found concerning the most important Jewish libraries (past and present), as well as the Jewish departments of the public libraries of America and of Europe. Summary histories of the chief Jewish presses are introduced, together with technical details of the typographic art as applied to Hebrew. Among the numerous illustrations which enrich this department of the ENCYCLOPEDIA are facsimiles of fragments of the oldest and most interesting Hebrew manuscripts in the world.

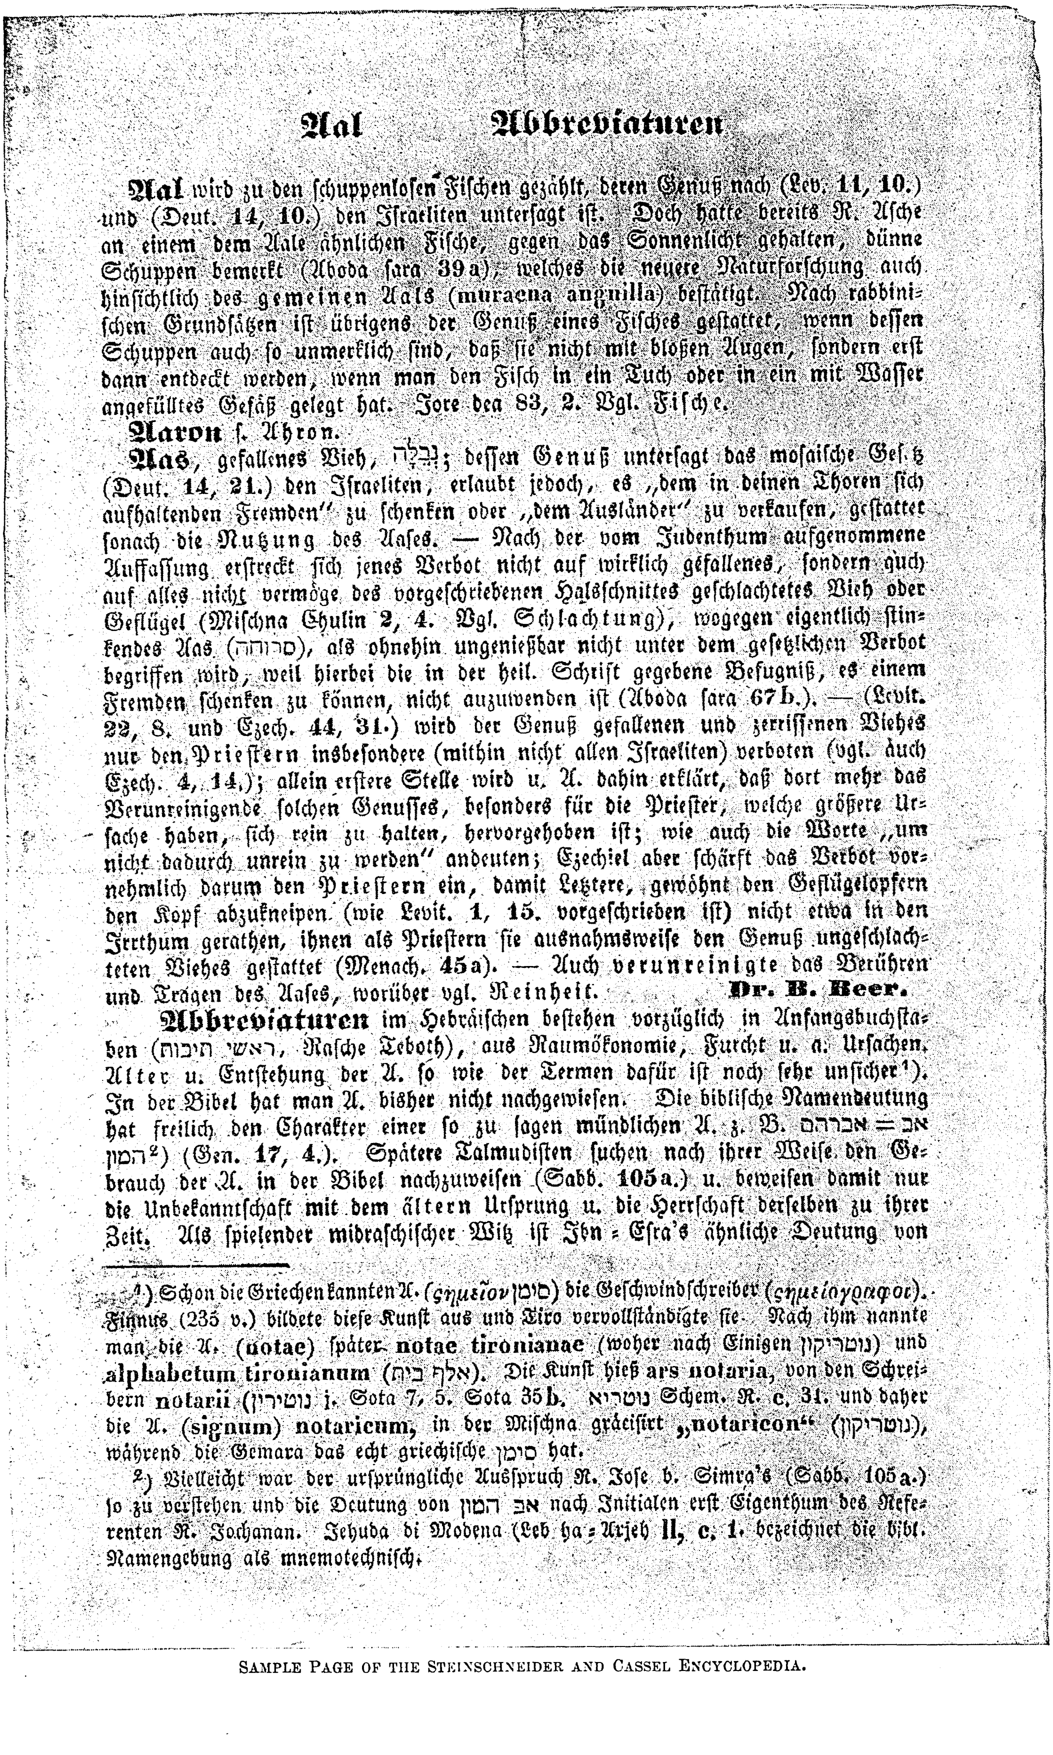
III. THEOLOGY AND PHILOSOPHY.

The broad subject of theology, including the Jewish religious philosophy of the Middle Ages, has never yet received systematic treatment at the hands of Jews. Thus far very little has been done either in the way of expounding from a philosophical point of view the various subjects pertaining to Jewish belief and doctrine, or of presenting them historically in their successive phases as they developed from their origins in Scripture and tradition, and as they were influenced by other creeds and beliefs. Only a few sporadic attempts have been made in our age to bring the religious ideas and moral teachings of Rabbinical Judaism into anything like systematic form. We may instance Zacharias Frankel, Solomon Munk, Leopold Loew, J. Hamburger, S. Schechter, David Kaufmann, M. Lazarus, and S. Bernfeld as having made valuable contributions in this direction. It was only the practical side of religion—the Law in all its ramifications, the rites and observances—which was systematically codified and summarized by the medieval authorities. The doctrinal side of Judaism, with its theological and ethical problems, was never treated with that clearness and thoroughness or with that many-sidedness and objectivity which historical research in our modern sense of the word demands. Even the great philosophers of the Middle Ages who molded Jewish thought for centuries approached their themes only with the view of proving or supporting their own specific doctrines, and omitted all questions that did not come within the scope of their argument. Consequently, many topics had to be formulated for treatment in THE JEWISH ENCYCLOPEDIA, and many of them were suggested by the theological works of non-Jewish writers. Desiring to present both the doctrines and the practises of Judaism in that scientific spirit which seeks nothing but the truth, and this in the light of historical development, THE JEWISH ENCYCLOPEDIA, in its theological department, takes full cognizance of the pre-Talmudic sources, the Hellenistic and New Testament literature, and, in addition to the copious Rabbinical literature, treats of the successive stages of Jewish philosophy and Cabala. The various sects (including the Samaritans and Karaites), rationalism and mysticism, conservative and progressive Judaism, are discussed fully and impartially. The mutual relations of Jewish and non-Jewish creeds and philosophical systems and the attitude of Judaism to the social and ethical problems of the day receive due consideration.

Among the services which THE JEWISH ENCYCLOPEDIA has undertaken to render to the general reader is that of enlightening him with regard to characteristic terms (familiar enough perhaps to the Jew) pertaining to Jewish folk-lore and to ancient and modern customs and superstitions, and (what will be a distinctive feature) of acquainting him with the important parts of the Jewish liturgy, its general history and its music. It is hoped that nothing of interest concerning the character and life of the Jew has been omitted.

Anthropology.

There remains a class of topics relating to the Jews, such as their claims to purity of race, their special aptitudes, their liability to disease, etc., which may be included under the general term of anthropology. Very little research has hitherto been devoted to this subject, and it is in this ENCYCLOPEDIA that, for the first time, the attempt is made to systematize the existing information regarding the anthropometry



Aal wird zu den ſchuppenloſen Fiſchen gezählt, deren Genuß nach (Lev. **11, 10.**) und (Deut. **14, 10.**) den Iſraeliten unterſagt iſt. Doch hatte bereits R. Aſche an einem dem Aale ähnlichen Fiſche, gegen das Sonnenlicht gehalten, dünne Schuppen bemerkt (Aboda ſara **39a**), welches die neuere Naturforſchung auch hinſichtlich des gemeinen Aals (**muraena anguilla**) beſtätigt. Nach rabbiniſchen Grundſätzen iſt übrigens der Genuß eines Fiſches geſtattet, wenn deſſen Schuppen auch ſo unmerklich ſind, daß ſie nicht mit bloßen Augen, ſondern erſt dann entdeckt werden, wenn man den Fiſch in ein Tuch oder in ein mit Waſſer angefülltes Gefäß gelegt hat. Jore dea 83, 2. Vgl. Fiſche.

Aaron ſ. Ahron.

Aas, gefallenes Vieh, נְבֵלָה; deſſen Genuß unterſagt das moſaiſche Geſetz (Deut. **14, 21.**) den Iſraeliten, erlaubt jedoch, es „dem in deinen Thoren ſich aufhaltenden Fremden“ zu ſchenken oder „dem Ausländer“ zu verkaufen, geſtattet ſonach die Nutzung des Aaſes. — Nach der vom Judenthum aufgenommene Auffaſſung erſtreckt ſich jenes Verbot nicht auf wirklich gefallenes, ſondern auch auf alles nicht vermöge des vorgeſchriebenen Halsſchnittes geſchlachtetes Vieh oder Geflügel (Miſchna Chulin **2, 4.** Vgl. Schlachtung), wogegen eigentlich ſtinkendes Aas (סרוחה), als ohnehin ungenießbar nicht unter dem geſetzlichen Verbot begriffen wird, weil hierbei die in der heil. Schrift gegebene Befugniß, es einem Fremden ſchenken zu können, nicht anzuwenden iſt (Aboda ſara **67b.**). — (Levit. **22, 8.** und Ezech. **44, 31.**) wird der Genuß gefallenen und zerriſſenen Viehes nur den Prieſtern insbeſondere (mithin nicht allen Iſraeliten) verboten (vgl. auch Ezech. **4, 14.**); allein erſtere Stelle wird u. A. dahin erklärt, daß dort mehr das Verunreinigende ſolchen Genuſſes, beſonders für die Prieſter, welche größere Urſache haben, ſich rein zu halten, hervorgehoben iſt; wie auch die Worte „um nicht dadurch unrein zu werden“ andeuten; Ezechiel aber ſchärft das Verbot vornehmlich darum den Prieſtern ein, damit Letztere, gewöhnt den Geflügelopfern den Kopf abzukneipen (wie Levit. **1, 15.** vorgeſchrieben iſt) nicht etwa in den Irrthum gerathen, ihnen als Prieſtern ſie ausnahmsweiſe den Genuß ungeſchlachteten Viehes geſtattet (Menach. **45a**). — Auch verunreinigte das Berühren und Tragen des Aaſes, worüber vgl. Reinheit. **Dr. B. Beer.**

Abbreviaturen im Hebräiſchen beſtehen vorzüglich in Anfangsbuchſtaben (ראשי תיבות, Raſche Teboth), aus Raumökonomie, Furcht u. a. Urſachen. Alter u. Entſtehung der A. ſo wie der Termen dafür iſt noch ſehr unſicher[1]). In der Bibel hat man A. bisher nicht nachgewieſen. Die bibliſche Namendeutung hat freilich den Charakter einer ſo zu ſagen mündlichen A. z. B. אברהם = אב המון[2]) (Gen. **17, 4.**). Spätere Talmudiſten ſuchen nach ihrer Weiſe den Gebrauch der A. in der Bibel nachzuweiſen (Sabb. **105a.**) u. beweiſen damit nur die Unbekanntſchaft mit dem ältern Urſprung u. die Herrſchaft derſelben zu ihrer Zeit. Als ſpielender midraſchiſcher Witz iſt Ibn-Eſra's ähnliche Deutung von

---

[1]) Schon die Griechen kannten A. (σημεῖον סימן) die Geſchwindſchreiber (σημειογράφοι). Ennius (235 v.) bildete dieſe Kunſt aus und Tiro vervollſtändigte ſie. Nach ihm nannte man die A. (**notae**) ſpäter **notae tironianae** (woher nach Einigen נוטריקון) und **alphabetum tironianum** (אלף בית). Die Kunſt hieß **ars notaria**, von den Schreibern **notarii** (נוטרין j. Sota 7, 5. Sota 35b. נוטריא Schem. R. c. 31. und daher die A. (**signum**) **notaricum**, in der Miſchna gräciſirt „**notaricon**“ (נוטריקון), während die Gemara das echt griechiſche סימן hat.

[2]) Vielleicht war der urſprüngliche Ausſpruch R. Joſe b. Simra's (Sabb. **105a.**) ſo zu verſtehen und die Deutung von אב המון nach Initialen erſt Eigenthum des Referenten R. Jochanan. Jehuda di Modena (Leb ha-Arjeh **II, c. 1.** bezeichnet die bibl. Namengebung als mnemotechniſch.

and vital statistics of the Jews, and to present a view of their social and economic condition.

Illustrations.

It has been one of the special aims of the Encyclopedia to bring together as full a body of illustrative material as possible. Many topics of a historical or archeological character lend themselves to illustration through the reproduction of the remains of antiquity or of ecclesiastical art. Objects connected with the Jewish synagogue service and Jewish modes of worship will be found fully illustrated. Prominent Jewish personages are portrayed, the chief monuments of Jewish architecture are represented by pictures of such synagogues as are remarkable architecturally or historically, and the department of literature is enriched with illustrations of the externals of book-lore. This feature of the work, which was placed in charge of Mr. Joseph Jacobs, will, it is believed, prove of great educational value in every Jewish household.

Former Attempts.

In determining the plan and proportions of the present undertaking, the Editorial Board has labored under the special difficulties that attach to pioneer work. No successful attempt has heretofore been made to gather under one alphabetical arrangement all the innumerable topics of interest to Jews as Jews. Apart from the Bible, the only department which has as yet been put in encyclopedic form is that of Rabbinic Literature, for which there exist encyclopedias, one—the פחד יצחק (Pahad Yizhak)—compiled by Isaac Lamproni in the seventeenth century in Hebrew, and one prepared in modern times by J. Hamburger, the "Realencyklopädie für Bibel und Talmud," in German. Each of these productions labors under the disadvantage of being the work of one man. Of the more comprehensive encyclopedia planned by Rapoport, ערך מלין ('Erek Millin), only the first letter appeared in 1852. The plan of a publication somewhat on the same lines as the present was drawn up by Steinschneider in conjunction with Cassel as far back as 1844, in the "Literaturblatt des Orients," but the project did not proceed beyond the prospectus (a specimen page from which is shown on the opposite page) and a preliminary list of subjects. Dr. L. Philippson in 1869 and Professor Graetz in 1887 also threw out suggestions for a Jewish encyclopedia, but nothing came of them.

The Present Work.

The present undertaking is the realization of an ideal to which Dr. Isidore Singer has devoted his energies for the last ten years. After several years spent in enlisting the interest of European scholars in the enterprise, he found that it was only in America that he could obtain both that material aid and practical scholarly cooperation necessary to carry out the scheme on the large scale which he had planned. Thanks to the enterprise and liberality of the Funk & Wagnalls Company, which generously seconded the energetic initiative of Dr. Singer, the cooperation of the undersigned staff of editors, together with that of the consulting boards, both American and foreign, was rendered possible. The preliminary work was done in the winter of 1898–99, by Dr. Singer, Professor Gottheil, and Dr. Kohler. These were soon joined by Dr. Cyrus Adler, of Washington, D. C.; Dr. G. Deutsch, of Cincinnati; Dr. Marcus Jastrow and Prof. Morris Jastrow, Jr., of Philadelphia; and Prof. George F. Moore, of Andover. Organization of the work was effected by these gentlemen at meetings held in New York, March 1 and 6, and July 12, 1899, Dr. I. K. Funk, of the Funk & Wagnalls Company, presiding, and the plan of operation submitted by the firm was adopted by them. To these was added later Mr. Joseph Jacobs, of London, as well as Dr. Louis Ginzberg and Dr. F. de Sola Mendes, both of New York city. Professor Moore, having assumed additional duties as president of the Andover Theological Seminary, found himself obliged to withdraw, and Prof. C. H. Toy was elected in his place in January, 1900.

The carrying out of the project on so large a scale presented peculiar difficulties. To reduce the work of nearly 400 contributors, writing in various tongues, to anything like uniformity was itself a task of great magnitude, and necessitated the establishment of a complete bureau of translation and revision. The selection of the topics suitable for insertion in such an encyclopedia involved labor extending over twelve months, and resulted in a trial index of over 25,000 captions. The determination of the appropriate space to which each of these subjects was entitled was no easy task in the absence of any previous attempt in the same direction. The problem of the transliteration of Hebrew and Arabic words has been very perplexing for the members of the Editorial Board. While they would have preferred to adhere strictly to the somewhat elaborate method current among most Semitic scholars, the repellent effect of strange characters, accentual marks, and superscript letters deterred them from using it in a work intended as much for the general public as for scholarly use. There were also typographic difficulties in the way of using the more elaborate scheme. The board trusts that the system pursued here, which is, in the main, that proposed by the Geneva Congress of Orientalists, and adopted by the Royal Asiatic Society of England, the Société Asiatique of Paris, and the American Oriental Society, will suffice to recall to the Jewish scholar the original Hebrew, while indicating to the layman as close an approximation to the proper pronunciation as possible. Even here, however, having to deal with contributions emanating from scholars using different schemes of transliteration, they can not hope to have succeeded altogether in avoiding lack of uniformity. It may perhaps be well to emphasize the fact that names occurring in the Bible have been throughout kept in the form familiar from the King James Version of 1611.

Transliteration.

While acknowledging the possibility—nay, the certainty—of errors and omissions in a work so comprehensive and so full of minute details as the present work is, the editors consider themselves justified in asserting that no pains have been spared to secure accuracy and thoroughness. Each article has been subjected to a most elaborate system of revision and verification, extending in each case to no less than twelve different processes. PROF. WILHELM BACHER, of the Budapest Seminary; REV. DR. F. DE SOLA MENDES, MR. LOUIS HEILPRIN, and other scholars, in addition to the departmental editors, have read through all the proof-sheets with this special end in view.

It remains only to give due acknowledgment to the many institutions and friends, other than contributors, who have rendered services to the ENCYCLOPEDIA. The HON. MAYER SULZBERGER, of Philadelphia, has loaned many valuable and rare works for the purposes of verification and illustration. Much is due to the NEW YORK PUBLIC LIBRARY, particularly to its director, DR. J. S. BILLINGS, to MR. CHARLES BJERREGAARD, chief of the Readers' department, and to MR. A. S. FREIDUS, chief of the Jewish department, for special privileges accorded and assistance rendered; to the UNITED STATES NATIONAL MUSEUM, SMITHSONIAN INSTITUTION, which has placed at the disposal of the ENCYCLOPEDIA photographs of many objects of Jewish worship preserved in the department of Oriental Antiquities; to the COLUMBIA UNIVERSITY LIBRARY; to the American Jewish press for repeated notices; and to the proprietors of the "JEWISH CHRONICLE" (London), for having placed the files of their journal at the disposal of the ENCYCLOPEDIA. M. VIGOUROUX'S "Dictionnaire de la Bible," now in process of publication, has been of especial value in suggesting the latest sources of Biblical illustration. Pictorial material has been loaned by, among others, MR. J. D. EISENSTEIN, MR. FRANK HAES, MR. ARNOLD BRUNNER, PROF. R. GOTTHEIL, and the PALESTINE EXPLORATION FUND, for which the editors and publishers beg to return their acknowledgments.

Acknowledgments.

The Editorial Board desires especially to thank the REV. DR. I. K. FUNK for the unfailing tact and matchless generosity with which he has met all their wishes and smoothed away many difficulties. Pioneer work as this has been, the need of encouragement to perseverance under adverse conditions was repeatedly felt by all concerned, and this encouragement has been continuously extended to us by our respected chief. Our thanks for courteous consideration are also eminently due to MR. A. W. WAGNALLS, vice-president of the FUNK & WAGNALLS COMPANY; to MR. R. J. CUDDIHY, its treasurer and general manager, for his organizing skill; to MR. EDWARD J. WHEELER, literary editor of the Company and member of the American Board of Consulting Editors of this work; and to MR. WILLIAM NEISEL, chief of the manufacturing department, and his assistant, MR. ARCHIBALD REID. MR. HERMAN ROSENTHAL, to whom the important section of the history and literature of the Jews in Russia has been entrusted, has faithfully discharged his difficult task.

We are indebted for much valuable cooperation and watchful care to the restless energy of FRANK H. VIZETELLY, the Secretary of the Editorial Board, to whom was entrusted the general office supervision of this work in all its stages, and whose executive ability, practical knowledge, and experience have been most useful. MR. ISAAC BROYDÉ, by his thorough knowledge of Arabic, has been of the greatest service to the work; while MR. ALBERT PORTER, formerly of "The Forum," as chief of the sub-editorial staff of the ENCYCLOPEDIA, has rendered intelligent and attentive service in the preparation of the copy for the press. MR. MOSES BEER, who has been connected with the work almost from the beginning, has been of great assistance to the office-staff in various departments, and especially in verifying the Hebrew. Hearty thanks are due also to all the members of the office-staff—translators, revisers, proof-readers, and others—for their faithful, painstaking service in their respective departments.

The editors have felt a special sense of responsibility with regard to this work, in which for the first time the claims to recognition of a whole race and its ancient religion are put forth in a form approaching completeness. They have had to consider susceptibilities among Jews and others, and have been especially solicitous that nothing should be set down which could hurt the feelings of the most sensitive. They consider it especially appropriate that a work of this kind should appear in America, where each man's creed is judged by his deeds, without reference to any preconceived opinion. It seemed to them peculiarly appropriate under these circumstances that THE JEWISH ENCYCLOPEDIA should appear under the auspices of a publishing house none of whose members is connected with the history or tenets of the people it is designed to portray. Placing before the reading public of the world the history of the Jew in its fullest scope, with an exhaustiveness which has never been attempted before—without concealing facts or resorting to apology—THE JEWISH ENCYCLOPEDIA hopes to contribute no unimportant share to a just estimate of the Jew.

NEW YORK, *May 1, 1901.*

SYNOPSIS OF THE JEWISH ENCYCLOPEDIA

I. History, Biography, and Sociology.

1. **History of the Jews,** as based on the Biblical accounts and on the Discoveries in Assyria, Babylonia, Egypt, Palestine, and Persia; later phases according to the narratives of Greek and Roman authors; the Talmudic sources; modern local researches; Documents found in archives, etc.

2. **General Historical Movements** influencing Jewish history; such as the Crusades, the Black Death, Persecutions, Expulsions, Blood Accusation, Inquisition, Discovery of America, Reformation, the Emancipation, anti-Semitic and Zionistic movements.

3. **Jewish Settlements and Congregations** in the Old World and the New.

4. **Jewish Societies,** Religious, Literary, Philanthropic, etc., which have become an important feature in the life of the modern Jew: Fraternities and Sisterhoods, Alliance Israélite Universelle, Anglo-Jewish Association, Central Conference of American Rabbis, Deutsch-Israelitischer Gemeindebund, etc.

5. **Documents** having special significance with regard to the Jews and their history; such as decrees, edicts, bulls, etc.

6. **Civilization** (*Culturgeschichte*) **of the Jews,** including Customs, Education, Art. The part taken by the Jews in the development and advancement of civilization, in ancient, medieval, and modern times; in the arts and sciences; in statesmanship and politics, jurisprudence, sociology, and economics.

7. **Historical Geography and Archeology of Palestine** and other countries intimately connected with Jewish history.

8. **Biography of Biblical Characters and Post-Biblical Personages:** Medieval and modern men of eminence; scholars; teachers; theologians; men of letters; artists; statesmen; soldiers; inventors; philanthropists; founders of important branches of commerce and industry.

9. **Distinguished Jewish Families:** Their history and genealogy.

10. **Accounts of Prominent Non-Jews:** Kings, Popes, Statesmen, Men of Letters who have exercised influence upon Jewish history.

11. **Anthropology,** Biostatics, Measurements; Morbidity of Jews with special reference to their liability to, or immunity from, particular diseases; question of purity of race.

12. **Sociology:** Statistics of Jewish communities; occupations of Jews; number of Artisans and Agriculturists; social condition and Criminology.

13. **Folk-lore;** Superstitions; Customs; Folk-Medicine; Legends and Fables.

II. Literature.

1. **The Old Testament:** History of the Canon; Masorah; history of Bible exegesis among Jews and Christians from Talmudical times; translations of the Bible; Bible concordances and dictionaries; Biblical chronology.

2. **Hellenistic Literature:** Apocrypha, Apocalyptic and Pseudepigraphic Literature; New Testament in so far as it concerns Judaism.

3. **Talmud and Midrash:** Critical analysis of each treatise; Talmudical jurisprudence compared with Greek and Roman codes and modern law.

4. **Rabbinical Literature:** Commentaries and supercommentaries of Talmud and Midrash; codes of Law; Responsa, Casuistics.

5. **Literature of the Middle Ages and Modern Times:** Belles-Lettres; secular poetry of the medieval and modern ages; relation of Neo-Hebraic literature to the literature of the world.

6. **Historical and Geographical Literature:** Travels, etc.

7. **Translations** by Jews in the Middle Ages and in recent times.

8. **Dialect-Literature:** Ladino, Judæo-German, and Yiddish.

9. **Periodical Literature;** annuals; quarterlies; monthly, weekly, and daily papers; almanacs.

10. **Hebrew Philology;** history and principles of Hebrew Grammar and Lexicography; prosody.

11. **Hebrew Bibliography;** Paleography; Typography; Catalogues; History of Jewish libraries; History of Hebrew book-trade.

12. **History of Jewish Learning and Education**; the Academies; elementary Schools (*ḥedarim*); History of the Yeshibahs and modern Rabbinical seminaries.

III. Theology and Philosophy.

1. **Doctrines of Judaism** in their development from Biblical times. Angelology; Demonology; Eschatology; Creeds; Attributes of Deity; Free Will and Providence; Problem of Evil; Sin and Atonement, etc.
2. **Relation of Judaism to Christianity,** Islam, and other religions; Conversion and Apostasy; Apologetic and Polemic literature.
3. **Jewish Religious Life** in home and synagogue: Sacrifices; Festivals; Priesthood; Temple; Customs; Ceremonies; Ritual Observances.
4. **Synagogue Liturgy,** Poetry, and Music; History of Reform Movement in Europe and America.
5. **Jewish Sects**: Pharisees; Sadducees; Essenes; Therapeutæ; Samaritans; Karaites; Sabbatarians; Ḥasidim; Frankists; and minor sects; Messianic movements.
6. **Jewish Philosophy**: Alexandrian School; Religious Philosophy in the Middle Ages; Cabala; Systems of Jewish philosophers.
7. **Jewish Ethics** in its historic development; Altruism and Hedonism; Motives and Standard; Ideals; Ethical Wills.
8. **Homiletical Literature** and history of modern pulpit eloquence.

SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES*

A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; *e.g.*, *Moses*, not Mosheh; *Isaac*, not Yiẓḥaḳ; *Saul*, not Sha'ul or Shaül; *Solomon*, not Shelomoh, etc.

2. Names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are always retained and cross-references given, though the topic be treated under the form transliterated according to the system tabulated below.

3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.

4. The following system of transliteration has been used for Hebrew and Aramaic:

א *Not noted at the beginning or the end of a word; otherwise ' or by dieresis; e.g., Me'ir or Meïr.*

ב	*b*	ז	*z*	ל	*l*	פּ	*with dagesh, p*	שׁ	*sh*
ג	*g*	ח	*ḥ*	מ	*m*	פ	*without dagesh, f*	שׂ	*s*
ד	*d*	ט	*ṭ*	נ	*n*	צ	*ẓ*	ת	*t*
ה	*h*	י	*y*	ס	*s*	ק	*ḳ*		
ו	*w*	כ	*k*	ע	'	ר	*r*		

Note: The presence of dagesh lene is not noted except in the case of *pe*. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

◌ָ	*a*	◌ֻ	*u*	◌ַ	*a*	◌ֱ	*e*	וֹ	*o*
◌ֶ	*e*	◌ֵ	*e*	◌ֳ	*o*	◌ִי	*i*		
◌ִ	*i*	◌ְ	*e*	◌ֲ	*a*	וּ	*u*		

Ḳameẓ ḥaṭuf is represented by *o*.

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshanah.*]

B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words except such as have become familiar to English readers in another form, as *Mohammed*, *Koran*, *mosque*, are transliterated according to the following system:

أ	*a*	خ	*ḫ*	ش	*sh*	غ	*gh*	ن	*n*
ب	*b*	د	*d*	ص	*ṣ*	ف	*f*	ه	*h*
ت	*t*	ذ	*d̮*	ض	*ḍ*	ق	*ḳ*	و	*w*
ث	*th*	ر	*r*	ط	*ṭ*	ك	*k*	ي	*y*
ج	*j*	ز	*z*	ظ	*ẓ*	ل	*l*		
ح	*ḥ*	س	*s*	ع	'	م	*m*		

2. Only the three vowels—a, i, u—are represented:

◌َ *a* or *ā* ◌ِ *i* or *ī* ◌ُ *u* or *ū*

No account has been taken of the *imālah; i* has not been written *e*, nor *u* written *o*.

---

* In all other matters of orthography the spelling preferred by the Standard Dictionary has been followed.

3. The Arabic article is invariably written *al;* no account being taken of the assimilation of the *l* to the following letter; *e.g., Abū al-Salt,* not *Abu-l-Salt; Nafīs al-Daulah,* not *Nafīs ad-Daulah.* The article is joined by a hyphen to the following word.

4. At the end of words the feminine termination is written *ah;* but, when followed by a genitive, *at; e.g., Risālah dhāt al-Kursiyy,* but *Hīʾat al-Aflāk.*

5. No account is taken of the overhanging vowels which distinguish the cases; *e.g., ʻAmr,* not *ʻAmru* or *ʻAmrun; Yaʻakūb,* not *Yaʻakūbun;* or in a title, *Kitāb al-amānāt wal-ʻitikādāt.*

C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in another form, as *Czar, Alexander, deciatine, Moscow,* are transliterated according to the following system:

А а	*a*	Н н	*n*	Щ щ	*shch*
Б б	*b*	О о	*o*	Ъ ъ	mute
В в	*v*	П п	*p*	Ы ы	*y*
Г г	*h, v,* or *g*	Р р	*r*	Ь ь	half mute
Д д	*d*	С с	*s*	Ѣ ѣ	*ye*
Е е	*e* and *ye* at the beginning.	Т т	*t*	Э э	*e*
Ж ж	*zh*	У у	*u*	Ю ю	*yu*
З з	*z*	Ф ф	*f*	Я я	*ya*
И и	*i*	Х х	*kh*	Ѳ ѳ	*F*
К к	*k*	Ц ц	*tz*	Ѵ ѵ	*œ*
Л л	*l*	Ч ч	*ch*	Й й	*i*
М м	*m*	Ш ш	*sh*		

Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; *e.g.,* Moses Nigrin under *Nigrin;* Moses Zacuto under *Zacuto;* Moses Rieti under *Rieti;* all the Ḳimḥis (or Ḳamḥis) under *Ḳimḥi;* Israel ben Joseph Drohobiczer under *Drohobiczer.* Cross-references are freely made from any other form to the most specific one; *e.g.,* to Moses *Vidal* from Moses *Narboni;* to Solomon Nathan *Vidal* from Menahem *Meiri;* to Samuel *Kansi* from Samuel Astruc *Dascola;* to Jedaiah *Penini,* from both *Bedersi* and *En Bonet;* to *John* of Avignon from Moses de *Roquemaure.*

2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; *e.g., Johanan* ha-Sandlar; *Samuel* ha-Nagid; *Judah* ha-Ḥasid; *Gershom* of Metz, *Isaac* of Corbeil.

3. Names containing the word *d', de, da, di,* or *van, von, y,* are arranged under the letter of the name following this word; *e.g.,* de Pomis under *Pomis,* de Barrios under *Barrios,* Jacob d'Illescas under *Illescas.*

4. In arranging the alphabetical order of personal names the words *ben, da, de, di, ibn,* of,* have not been taken into account. These names thus follow the order of the next succeeding capital letter:

Abraham of Augsburg
Abraham of Avila
Abraham ben Azriel
Abraham de Balmes
Abraham ben Baruch
Abraham of Beja
Abraham ben Benjamin Aaron
Abraham ben Benjamin Ze'eb
Abraham Benveniste

5. In order to facilitate reference, complete groups of all persons bearing such common names as Aaron, Abraham, Jacob, are given in small type in a group immediately under the first key-word.

---

* When Ibn has come to be a specific part of a name, as Ibn Ezra, such name is treated in its alphabetical place under "I."

THE

JEWISH ENCYCLOPEDIA

A

AACH: A small town in the circle of Constance, Baden, Germany, at one time belonging to the landgraviate of Nellenburg. The first mention of Jews in Aach is found in a document of the year 1518, in which the Jews of Geisingen are accused of having murdered a Christian child. In another document, of the year 1522, reference is made to a debt due to a Jewish tradesman of Aach from an inhabitant of Beuren. In the archives of Carlsruhe there are three documents dealing especially with the Jews of Aach during the last half of the sixteenth century. Every ten years the Jews of Nellenburg were required to renew their permits of residence in the landgraviate. The first document shows that between the years 1560 and 1570 only five Jewish families received such permits; and it is expressly stated that they were then entitled to all the rights enjoyed by the other citizens of Aach; but no Jew was allowed to harbor more than five strangers in his house. The arrival of any Jewish visitor had to be announced to the *Landvogt* and burgomaster; but no such stranger was allowed to trade with the people of Aach. The second document is an edict of Emperor Ferdinand I., dated Aug. 1, 1559, which deals with the laws regarding usury. The third document, dated at Innsbruck, Oct. 10, 1583, renews the right of residence for six Jewish families of Aach. The provisions of this act are much more severe than those included in the document relating to the period between the years 1560 and 1570, referred to above. The renewal of residence was granted for five years only; Jews were forbidden to deal in agricultural products, and they were no longer allowed to chant in the synagogue. This difference in the treatment of the Jews of Aach was due to the attitude of Emperor Rudolph II. The landgraviate of Nellenburg was sold in 1645 to Austria, and has belonged to Baden since 1810.

G.

AACHEN. See AIX-LA-CHAPELLE.

AARGAU: A canton in northern Switzerland, formerly the only one in which Jews were permitted to live. The two townships Endingen and Lengnau, situated in the district of Baden and about three miles apart, formed for several centuries the Swiss ghetto. In the seventeenth century, or probably at an earlier period, when the Jews were banished from the confederation, several Jewish families were collected here under special protection as "Schirm- und Schutzjuden." They were, however, forbidden to buy land or to own houses, and they were not permitted to live under the same roof with Christians.

Renewals of Charter.

The gulf separating them from the Christians was further widened in 1671, when a special oath was formulated for all Jews who appeared in the court of justice (see OATH, JEWS'). The Jews were also heavily taxed. The authorities, who renewed their charter every sixteen years, received pay for protection. The provost and the district clerk and his secretary received "recognition money" and "settlement dues"; and whenever the Jews passed through a locality in the canton they paid a polltax. In 1712, when the Jews at Lengnau were pillaged by the country people, the former had their charter renewed for sixteen years, and again, at its recurrent expiration, in 1728, 1744, and 1760—on the last occasion even in spite of the subprovost's urgent demands that they be banished.

Emancipation Movement.

The renewal of the charter to the Jews in 1760 was granted only upon the express condition that "they should not multiply nor allow marriages between poor persons, and that all brides from without should bring with them a dowry of at least 500 gulden"; but there was the further restriction that "they could neither acquire houses, nor practise usury, nor buy estates, nor discount notes, without the permission of the authorities." In 1792 a condition was added forbidding Christian and Jew to live under the same roof; but this was the last time that the "Hebrews," as the Swiss were accustomed to call the Jews, had to renew the charter. Influenced by the results of the Revolution in France, several broad-minded Swiss statesmen gave their attention to the improvement of the precarious position of the Jews, who had increased from thirty-five to one hundred and forty-seven families during the interval between the years 1702-92. In the year 1799 all special tolls and imposts were abolished, and in 1802 the polltax was also abrogated. On Sept. 21 of the same year, during the French occupation, a riot broke out at Endingen and Lengnau; the Jews' dwellings were sacked, and they lost nearly all their possessions in spite of General Ney's attempts to protect them. Yet this check could not stem the tide of Jewish emancipation. By a law of May 5, 1809, the right of citizenship was granted to Jews, and they were permitted to engage in trade and agriculture. The right of settlement, however, still remained restricted to Endingen and Lengnau until May 7, 1846, when they were allowed to settle in any portion of the canton of Aargau. Ten years later (Sept. 24, 1856) the federal council voted them equal political rights with other Swiss citizens in that canton, as well as entire freedom of commerce; but the opposition of the Christian population prevented the decision from being generally carried out.

Enfranchisement Considered.

In 1860 the government of Aargau seriously considered a bill granting full enfranchisement to the Jews, the intention being to give them suffrage in all communal and cantonal rights, and to constitute the communities of Endingen and Lengnau autonomous villages. This bill was strenuously opposed by the Christian population, and led to serious disorders which threatened Jewish property. Notwithstanding the violent opposition of the Ultramontane party through its press, the government bill was carried May 15, 1862, by a vote of 113 to 2. This law should have become operative on July 1 of that year; but the dissatisfaction having become general throughout the canton, the law was repealed by a referendum. Jewish emancipation now became a federal affair, and was submitted for decision to the federal council. The federal authorities in July, 1863, granted the Swiss Jews the fullest rights of citizens, a result due largely to the efforts of the Swiss Jewish "Kulturverein" (Culture Society), founded in 1862 and dissolved after an existence of twenty years. Full civil equality was obtained only when they received the formal rights of citizenship, which had long been withheld from them in their own communities of Endingen and Lengnau. A resolution of the "Grosse Rath" of Aargau, May 15, 1877, granted citizens' rights to the members of the Jewish communities of those places, giving them charters under the names of New Endingen and New Lengnau. The prohibition against the Jewish mode of slaughtering, which by a plebiscitum became the law of the canton (see Switzerland), bore especially hard on the Jewish communities of Aargau.

Religious and General Progress.

The civil, intellectual, and religious life of the Jews in Aargau differed little from that in other countries. For a long time the Swiss Jews were not allowed to bury their dead in Swiss soil. Their burial-place was an island in the Rhine near Coblenz (Switzerland), which is still called Judenäule, or Jews' Isle, bought for that purpose from the community of Waldshut, in Baden. It was only about the middle of the eighteenth century that they received permission to acquire a joint cemetery situated between Endingen and Lengnau, which has been in use ever since. The first synagogue was erected at Lengnau in 1755, it being the first on Swiss soil after the general expulsion; and nine years later the congregation of Endingen had the satisfaction of assembling in their own house of worship. After a lapse of ninety years beautiful synagogues were erected in both communities. In 1810 considerable funds were collected for the maintenance of communal schools, which were put on an equal footing with those of the Christians in 1835 and subsidized by the government.

Dissensions.

Originally one rabbi served both communities. The first one mentioned Loeb Pinschow, is buried with his wife on Jews' Isle. He was succeeded by Jacob ben Isserle Schvaich. Toward the end of the eighteenth century Raphael Ris, surnamed Raphael Hagenthal, was appointed rabbi of the two communities. He died in 1818, and was succeeded by Isaac Luntschütz, surnamed Isaac of Westhofen, who held the office but one year. His successor was Raphael Ris' son, Abraham Ris, previously rabbi at Mühringen. After a lapse of three years a conflict arose between the two communities, which was settled by the government's appointing Abraham Ris rabbi for Endingen only and Wolf Dreifus for Lengnau. The subsequent appointment of Leopold Wyler as rabbi of Endingen gave rise to grave dissensions in the community, which culminated in his retirement from office. The government issued a decree in 1853 regulating the appointment and the duties of the rabbis, and in 1854 Julius Fürst was elected rabbi of Endingen, but resigned three years later. After the death of Dreifus the two communities reunited; and at the close of 1861 the government appointed M. Kayserling to the rabbinical office, which he held until 1870.

Besides that of Endingen and Lengnau, there exists in the canton Aargau a Jewish community at Baden with about 2,000 persons, who have a rabbi and a school. A few families live at Aarau and Bremgarten. In 1875 there were 1,368 Jews at Aargau (Engelbert). Since the right of free movement has been accorded to them, Jews have settled in several cantons of the Swiss Confederation.

M. K.

AARON.—Biblical Data: One of two brothers who play a unique part in the history of the Hebrew people. He was the elder son of Amram and Jochebed of the tribe of Levi; Moses, the other son, being three years younger, and Miriam, their sister, several years older (Ex. ii. 4). Aaron was the great-grandson of Levi (Ex. vi. 16–20) and represented the priestly functions of his tribe. While Moses was receiving his education at the Egyptian court and during his exile among the Midianites, Aaron and his sister remained with their kinsmen in the eastern border-land of Egypt. Here he gained a name for eloquent and persuasive speech; so that when the time came for the demand upon Pharaoh to release Israel from captivity, Aaron became his brother's *nabi*, or spokesman, to his own people (Ex. iv. 16) and, after their unwillingness to hear, to Pharaoh himself (Ex. vii. 9).

His Function.

Aaron's function included the duties of speaker and implied personal dealings with the court on behalf of Moses, who was always the central moving figure. The part played by Aaron in the events that preceded the Exodus was, therefore, ministerial, and not directive. He shared the miraculous powers of Moses, and performed "signs" before his people which impressed them with a belief in the reality of the divine mission of the brothers (Ex. iv. 15, 16). At the command of Moses he stretched out his rod in order to bring on the first three plagues (Ex. vii. 19, viii. 1, 12). In the infliction of the remaining plagues he appears to have acted merely as the attendant of Moses, whose outstretched rod drew the divine wrath upon Pharaoh and his subjects (Ex. ix. 23, x. 13, 22). The potency of Aaron's rod had already been demonstrated by its victory over the rods of the Egyptian magicians, which it swallowed after all the rods alike had been turned into serpents (Ex. vii. 9 *et seq.*). During the journey in the wilderness Aaron is not always prominent or active; and he sometimes appears guilty of rebellious or treasonable conduct.

At the battle with Amalek he is chosen with Hur to support the hand of Moses that held the "rod of God" (Ex. xvii. 9 *et seq.*). When the revelation was given to Moses at Sinai, he headed the elders of Israel who accompanied Moses on the way to the summit. Joshua, however, was admitted with his leader to the very presence of the Lord, while Aaron and Hur remained below to look after the people (Ex. xxiv. 9–14). It was during the prolonged absence of Moses that Aaron yielded to the clamors of the people, and made a golden calf as a visible image of the divinity who had delivered them from Egypt (Ex. xxxii. 1–6). At the intercession of Moses, Aaron was saved from the plague which smote the people (Deut. ix. 20; Ex. xxxii. 35), although it was to Aaron's tribe of Levi that the work of punitive vengeance was committed (Ex. xxxii. 26 *et seq.*).

Becomes Priest of Israel.

At the time when the tribe of Levi was set apart for the priestly service, Aaron was anointed and consecrated to the priesthood, arrayed in the robes of his office, and instructed in its manifold duties (Ex. xxviii. and xxix.). On the very day of his consecration his sons, Nadab and Abihu, were consumed by fire from the Lord for having offered incense in an unlawful manner (Lev. x.). This stroke Aaron bore in silence.

From the time of the sojourn at Sinai, where he became the anointed priest of Israel, Aaron ceased to be the minister of Moses, his place being taken by Joshua. He is mentioned in association with Miriam in a jealous complaint against the exclusive claims of Moses as the Lord's prophet. The presumption of the murmurers was rebuked, and Miriam was smitten with leprosy. Aaron entreated Moses to intercede for her, at the same time confessing the sin and folly that prompted the uprising. Aaron himself was not struck with the plague on account of sacerdotal immunity; and Miriam, after seven days' quarantine, was healed and restored to favor (Num. xii.). It is noteworthy that the prophet Micah (vi. 4) mentions Moses, Aaron, and Miriam as the leaders of Israel after the Exodus (a judgment wholly in accord with the tenor of the narratives). In the present instance it is made clear by the express words of the oracle (Num. xii. 6–8) that Moses was unique among men as the one with whom the Lord spoke face to face. The failure to recognize or concede this prerogative of their brother was the sin of Miriam and Aaron. The validity of the exclusive priesthood of the family of Aaron was attested after the ill-fated rebellion of Korah, who was a first cousin of Aaron.

Rebellion of Korah.

When the earth had opened and swallowed up the leaders of the insurgents (Num. xvi. 25–35), Eleazar, the son of Aaron, was commissioned to take charge of the censers of the dead priests. And when the plague had broken out among the people who had sympathized with the rebels, Aaron, at the command of Moses, took his censer and stood between the living and the dead till the plague was stayed (Num. xvii. 1–15, xvi. 36–50, A.V.). Another memorable transaction followed. Each of the tribal princes of Israel took a rod and wrote his name upon it, and the twelve rods were laid up over night in the tent of meeting. On the morrow Aaron's rod was found to have budded and blossomed and borne ripe almonds (Num. xvii. 8; see Aaron's Rod). The miracle proved merely the prerogative of the tribe of Levi; but now a formal distinction was made in perpetuity between the family of Aaron and the other Levites. While all the Levites (and only Levites) were to be devoted to sacred services, the special charge of the sanctuary and the altar was committed to the Aaronites alone (Num. xviii. 1–7). The scene of this enactment is unknown, nor is the time mentioned.

Aaron, like Moses, was not permitted to enter Canaan with the successful invaders. The reason alleged is that the two brothers showed impatience at Meribah (Kadesh) in the last year of the desert pilgrimage (Num. xx. 12, 13), when they, or rather Moses, brought water out of a rock to quench the thirst of the people. The action was construed as displaying a want of deference to the Lord, since they had been commanded to speak to the rock, whereas Moses struck it with the wonder-working rod (Num. xx. 7–11).

Death.

Of the death of Aaron we have two accounts. The principal one gives a detailed statement to the effect that, soon after the above incident, Aaron, with his son Eleazar and Moses, ascended Mount Hor. There Moses stripped him (Aaron) of his priestly garments, and transferred them to Eleazar. Aaron died on the summit of the mountain, and the people mourned for him thirty days (Num. xx. 22–29; compare xxxiii. 38, 39). The other account is found in Deut. x. 6, where Moses is reported as saying that Aaron died at Mosera and was buried there. Mosera is not on Mount Hor, since the itinerary in Num. xxxiii. 31–37 records seven stages between Moseroth (Mosera) and Mount Hor.

J. F. McC.

——In Apocryphal and Rabbinical Literature:

Typical Signification.

The older prophets and prophetical writers beheld in their priests the representatives of a religious form inferior to the prophetic truth; men without the spirit of God and lacking the will-power requisite to resist the multitude in its idolatrous proclivities. Thus Aaron, the typical priest, ranks far below Moses: he is but his mouthpiece, and the executor of the will of God revealed through Moses, although it is pointed out (Sifra, Wa-yiḳra, i.) that it is said fifteen times in the Pentateuch that "the Lord spoke to Moses *and* Aaron." Under the influence of the priesthood which shaped the destinies of the nation under Persian rule, a different ideal of the priest was formed, as is learned from Mal. ii. 4–7; and the prevailing tendency was to place Aaron on a footing equal with Moses. "At times Aaron, and at other times Moses, is mentioned first in Scripture—this is to show that they were of equal rank," says Mekilta בא, 1; and Ecclesiasticus (Sirach), xlv. 6–24, expressly infers this when introducing in his record of renowned men the glowing description of Aaron's ministration. According to Tan. (ed. Buber, ii. 12), Aaron's activity as a prophet began earlier than that of Moses. The writer of the Testaments of the Patriarchs, however, hesitates to rank Moses the faithful, "him that speaks with God as with a father," as equal with Aaron (Testament of Levi, viii. 17). The rabbis are still more emphatic in their praise of Aaron's virtues.

Moses and Aaron Compared.

Thus Hillel, who in Herod's time saw before him mainly a degenerate class of priests, selfish and quarrelsome, held Aaron of old up as a mirror, saying: "Be of the disciples of Aaron, loving peace and pursuing peace; love your fellow creatures and draw them nigh unto the Law!" (Abot, i. 12). This is further illustrated by the tradition preserved in Abot de-R. N. xii. Sanh. 6*b*, and elsewhere, according to which Aaron was an ideal priest of the people, far more beloved for his kindly ways than was Moses. While Moses was stern and uncompromising, brook-ing no wrong, Aaron went about as peacemaker, reconciling man and wife when he saw them estranged, or a man with his neighbor when they quarreled, and winning evil-doers back into the right way by his friendly intercourse. The mourning of the people at Aaron's death was greater, therefore, than at that of Moses; for whereas, when Aaron died the whole house of Israel wept, including the women (Num. xx. 29), Moses was bewailed by "the sons of Israel" only (Deut. xxxiv. 8). Even in the making of the Golden Calf the rabbis find extenuating circumstances for Aaron (Sanh. 7*a*). His fortitude and silent submission to the will of God on the loss of his two sons are referred to as an excellent example to men how to glorify God in the midst of great affliction (Zeb. 115*b*; Josephus, "Ant." iii. 8, § 7). Especially significant are the words represented as being spoken by God after the princes of the Twelve Tribes had brought their dedication offerings into the newly reared Tabernacle: "Say to thy brother Aaron: Greater than the gifts of the princes is thy gift; for thou art called upon to kindle the light, and, while the sacrifices shall last only as long as the Temple lasts, thy light of the Law shall last forever" (Tan., ed. Buber, בהעלתך, 6).

Death of Aaron.

In fulfilment of the promise of peaceful life, symbolized by the pouring of oil upon his head (Lev. R. x., Midr. Teh. cxxxiii. 1), Aaron's death, as described in the Haggadah, was of a wonderful tranquillity. Accompanied by Moses, his brother, and by Eleazar, his son, Aaron went to the summit of Mount Hor, where the rock suddenly opened before him and a beautiful cave lit by a lamp presented itself to his view. "Take off thy priestly raiment and place it upon thy son Eleazar!" said Moses; "and then follow me." Aaron did as commanded; and they entered the cave, where was prepared a bed around which angels stood. "Go lie down upon thy bed, my brother," Moses continued; and Aaron obeyed without a murmur. Then his soul departed as if by a kiss from God. The cave closed behind Moses as he left; and he went down the hill with Eleazar, with garments rent, and crying: "Alas, Aaron, my brother! thou, the pillar of supplication of Israel!" When the Israelites cried in bewilderment, "Where is Aaron?" angels were seen carrying Aaron's bier through the air. A voice was then heard saying: "The law of truth was in his mouth, and iniquity was not found on his lips: he walked with me in righteousness, and brought many back from sin" (Mal. ii. 6, 7). He died, according to Seder 'Olam R. ix., R. H. 2, 3*a*, and Josephus, "Ant." iv. 4, § 7, on the first of Ab. Josephus says also that "he died while the multitude looked upon him." The pillar of cloud which proceeded in front of Israel's camp disappeared at Aaron's death (see Seder 'Olam, ix. and R. H. 2*b*–3*a*). The seeming contradiction between Num. xx. 22 *et seq.* and Deut. x. 6 is solved by the rabbis in the following manner: Aaron's death on Mount Hor was marked by the defeat of the people in a war with the king of Arad, in consequence of which the Israelites fled, marching seven stations backward to Mosera, where they performed the rites of mourning for Aaron; wherefore it is said: "There [at Mosera] died Aaron." See Mek., Beshallaḥ, Wayassa', i.; Tan., Ḥuḳḳat, 18; Yer. Soṭah, i. 17*c*, and Targ. Yer. Num. and Deut. on the above-mentioned passages.

The rabbis also dwell with special laudation on the brotherly sentiment which united Aaron and Moses. When the latter was appointed ruler and Aaron high priest, neither betrayed any jealousy; instead they rejoiced in one another's greatness. When Moses at first declined to go to Pharaoh, saying: "O my Lord, send, I pray thee, by the hand of him whom thou wilt send" (Ex. iv. 13), he was unwilling to deprive Aaron, his brother, of the high position the latter had held for so many years; but the Lord reassured him, saying: "Behold, when he seeth thee, he will be glad in his heart" (Ex. iv. 14). Indeed, Aaron was to find his reward, says Simon ben Yoḥai; for that heart which had leaped with joy over his younger brother's rise to glory greater than his was decorated with the Urim and Thummim, which were to "be upon Aaron's heart when he goeth in before the Lord" (Cant. R. i. 10). Moses and Aaron met in gladness of heart, kissing each other as true brothers (Ex. iv. 27; compare Song of Songs, viii. 1), and of them it is written: "Behold how good and how pleasant [it is] for brethren to dwell together in unity!" (Ps. cxxxiii. 1). Of them it is said (Ps. lxxxv. 10): "Mercy and truth are met together; righteousness and peace have kissed [each other]"; for Moses stood for righteousness, according to Deut. xxxiii. 21, and Aaron for peace, according to Mal. ii. 6. Again, mercy was personified in Aaron, according to Deut. xxxiii. 8, and truth in Moses, according to Num. xii. 7 (Tan., Shemot, ed. Buber, 24–26).

When Moses poured the oil of anointment upon the head of Aaron, Aaron modestly shrank back and said: "Who knows whether I have not cast some blemish upon this sacred oil so as to forfeit this high office." Then the Holy Spirit spake the words: "Behold the precious ointment upon the head, that ran down upon the beard of Aaron, that even went down to the skirts of his garment, is as pure as the dew of Hermon" (Ps. cxxxiii. 2, 3, *Heb.*; Sifra, Shemini, Milluim; Tan., Korah, ed. Buber, 14).

——**Critical View:** It has always been found difficult to construct a complete and consistent biographical story from the Biblical details as outlined above. According to most modern critics, the difficulties arise from the fact that these details come from different sources, and that the sources themselves are of different dates and represent separate stages in the development of the Hebrew religion and ritual. The Jahvistic document (usually cited as J) and the Elohistic (E) are held to have proceeded from the ninth or eighth century B.C.; while the Deuteronomic (D) reflects the time of Josiah, and the priestly document (P) the periods of the Exile and the Return. The genealogy (Ex. vi.) belongs to the priestly source (distinguished as P), while the details are about evenly divided between P and J (Jahvist) and E (Elohist) narratives, and one account of Aaron's death appears in the Deuteronomic source. It is found that what concerns Aaron's consecration to the priesthood and the acts of himself and his family in that office, as well as his relations to the tribe of Levi, proceed from the priestly source (P). This embraces most of what is said on these topics in Exodus (xxv.–xl.), Leviticus, and Numbers. Now it is claimed that for historical purposes a sharp dividing-line must be drawn between P (which has for its aim to describe the rise and progress of the Aaronic priesthood) and the earlier documents. The explanation of the distinction takes account of the fact that Moses and Aaron represent the genius and the mission of Israel as no other men do; the one being the great lawgiver and prophet, the other the first and typical high priest. Together they thus represent the moral and religious functions which Israel had to fulfil. With this idea in mind, the later Biblical writers treated the character and work of the two men representatively, so that they present not only a historical, but an idealized, Moses and Aaron. It is, moreover, significant that, leaving P aside, a fairly consistent biography may be made out, and this must be adhered to in the main; for P throughout is constructive and idealistic, using its narrative to indicate how the postexilian priestly system must have grown up to its ideal completeness in the course of Israel's history. Much has been theorized by some critics, tending to show that Aaron the priest was a figment devised to give validity to the sacerdotal order. Even, however, if some interpolations in the documents earlier than P, due to priestly hands, be assumed, there remains a substantial historical basis of fact for the career of Aaron as the assistant and spokesman of Moses, as the deputy of his brother during the desert wanderings, and as the chief priest of his people. Among other considerations, a guaranty for the soundness of the tradition in the record of personal actions is afforded by the fact that what is disadvantageous to Aaron is told as well as what is favorable, and that he is shown, especially in the affair of the calf-worship, to have been influenced by the moral and spiritual limitations of his age and environment. See also PRIESTS, PRIESTHOOD, etc.

J. F. McC.

AARON'S ROD.—Biblical Data: A rod which, in the hands of Aaron, the high priest, was endowed with miraculous power during the several plagues that preceded the Exodus. In this function the rod of Moses was equally potent. Upon two occasions, however, the singular virtue of spontaneous power, when not in the grasp of its possessor, was exhibited by Aaron's Rod. At one time it swallowed the rods of the Egyptian magicians, and at another it blossomed and bore fruit in the Tabernacle, as an evidence of the exclusive right to the priesthood of the tribe of Levi (see AARON). In commemoration of this decision it was commanded that the rod be put again "before the testimony" (Num. xvii. 10). A later tradition asserts (Heb. ix. 4) that the rod was kept in the Ark of the Covenant. The main fact, however, is thus confirmed, that a rod was preserved in the Tabernacle as a relic of the institution of the Aaronic priesthood.

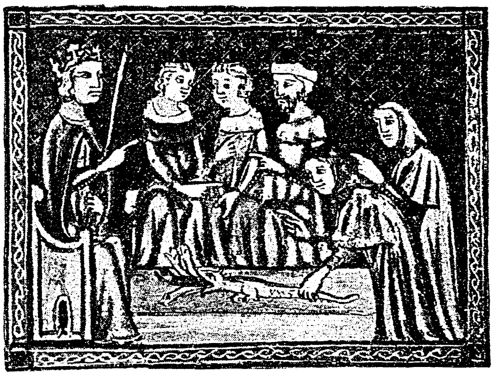
J. F. McC.

——In Rabbinical Literature: The Bible ascribes similar miraculous powers to the Rod of Aaron and to the staff of Moses (compare, for example, Ex. iv. 2 *et seq.* and vii. 9). The Haggadah goes a step further, and entirely identifies the Rod of Aaron with that of Moses. Thus the Midrash Yelamdenu (Yalḳ. on Ps. cx. § 869) states that

> "the staff with which Jacob crossed the Jordan is identical with that which Judah gave to his daughter-in-law, Tamar (Gen. xxxii. 10, xxxviii. 18). It is likewise the holy rod with which Moses worked (Ex. iv. 20, 21), with which Aaron performed wonders before Pharaoh (Ex. vii. 10), and with which, finally, David slew the giant Goliath (I Sam. xvii. 40). David left it to his descendants, and the Davidic kings used it as a scepter until the destruction of the Temple, when it miraculously disappeared (נגנז). When the Messiah comes it will be given to him for a scepter in token of his authority over the heathen."

That so wonderful a rod should bear external signs of its importance is easily to be understood. It was made of sapphire, weighed forty seahs (a seah=10.70 pounds), and bore the inscription דצ"ך עד"ש באח"ב, which is composed of the initials of the Hebrew names of the Ten Plagues (Tan., Waëra 8, ed. Buber).

Legend has still more to say concerning this rod. God created it in the twilight of the sixth day of Creation (Ab. v. 9, and Mek., Beshallaḥ, ed. Weiss, iv. 60), and delivered it to Adam when the latter was driven from paradise. After it had passed through the hands of Shem, Enoch, Abraham, Isaac, and Jacob successively, it came into the possession of Joseph. On Joseph's death the Egyptian nobles stole some of his belongings, and, among them, Jethro appropriated the staff. Jethro planted the staff in his garden, when its marvelous virtue was revealed by the fact that nobody could withdraw it from the ground; even to touch it was fraught with danger to life. This was because the Ineffable Name of God was engraved upon it. When Moses entered Jethro's household he read the Name, and by means of it was able to draw up the rod, for which service Zipporah, Jethro's daughter, was given to him in marriage. Her father had sworn that she should become the wife of the man who should be able to master the miraculous rod and of no other (Pirḳe R. El. 40; Sefer ha-Yashar; Yalḳ. Ex. 168, end). It must, however, be remarked that the Mishnah (Ab. v. 9) as yet knew nothing of the miraculous creation of Aaron's Rod, which is first mentioned by the Mekilta (*l. c.*) and Sifre on Deut. (Ber. xxxiii. 21; ed. Friedmann, p. 355). This supposed fact of the supernatural origin of the rod explains the statement in the New Testament (Heb. ix. 4) and Tosef., Yoma, iii. 7 (it is to be interpreted thus according to B. B. 14*a*), that Aaron's Rod, together with its blossoms and fruit, was preserved in the Ark. King Josiah, who foresaw the impending national catastrophe, concealed the Ark and its contents (Tosef., Soṭah, 13*a*); and their whereabouts will remain unknown until, in the Messianic age, the prophet Elijah shall reveal them (Mek. *l. c.*). A later Midrash (Num. R. xviii. end) confuses the legends of the rod that blossomed with those of the rod that worked miracles, thus giving us contradictory statements. There exists a legend that Moses split a tree trunk into twelve portions, and gave one portion to each tribe. When the Rod of Aaron produced blossoms, the Israelites could not but acknowledge the significance of the token. The account of the blossoming of Aaron's Rod contained in Clement's first letter to the Corinthians (ep. 43) is quite in haggadic-midrashic style, and must probably be ascribed to Jewish or, more strictly speaking, Jewish-Hellenistic sources. According to that account, Moses placed upon each of the twelve staffs the corresponding seal of the head of a tribe. The doors of



Aaron's Rod. (From the Serajevo Haggadah.)

Haggadic Modification.

the sanctuary were similarly sealed, to prevent any one from having access to the rods at night. This legend of the rod as given by the Syrian Solomon in his "Book of the Bee" ("Anecdota Oxoniensia, Semitic Series," vol. i. part ii.) has Christian characteristics. According to it the staff is a fragment of the Tree of Knowledge, and was successively in the possession of Shem, of the three Patriarchs, and of Judah, just as in the Jewish legend. From Judah it descended to Pharez, ancestor of David and of the Messiah. After Pharez's death an angel carried it to the mountains of Moab and buried it there, where the pious Jethro found it. When Moses, at Jethro's request, went in search of it, the rod was brought to him by an angel. With this staff Aaron and Moses performed all the miracles related in Scripture, noteworthy among which was the swallowing up of the wonder-working rods of the Egyptian Posdi. Joshua received it from Moses and made use of it in his wars (Josh. viii. 18); and Joshua, in turn, delivered it to Phinehas, who buried it in Jerusalem. There it remained hidden until the birth of Jesus, when the place of its concealment was revealed to Joseph, who took it with him on the journey to Egypt. Judas Iscariot stole it from James, brother of Jesus, who had received it from Joseph. At Jesus' crucifixion the Jews had no wood for the transverse beam of the cross, so Judas produced the staff for that purpose ("Book of the Bee," Syr. ed., pp. 50–53; Eng. ed., pp. 50–52). This typological explanation of Moses' rod as the cross is not a novel one. Origen on Exodus (chap. vii.) says: "This rod of Moses, with which he subdued the Egyptians, is the symbol of the cross of Jesus, who conquered the world." Christian legend has preserved the Jewish accounts of the rod of the Messiah and made concrete fact of the idea. Other Western legends concerning the connection of the cross and the rod may be found in Seymour, "The Cross," 1898, p. 83.

Christian Modifications.

The rod is likewise glorified in Mohammedan legend, which, as is usually the case with the Biblical accounts of the Mohammedans, is plainly derived from Jewish sources. The following passage will serve as an illustration:

> "Moses flung his staff upon the ground, and instantly it was changed into a serpent as huge as the largest camel. It glared at Pharaoh with fire-darting eyes, and lifted his throne to the ceiling. Opening its jaws, it cried aloud, 'If it pleased Allah, I could not only swallow up the throne with thee and all that are here present, but even thy palace and all that it contains, without any one perceiving the slightest change in me'" (G. Weil, "Biblische Legenden der Muselmänner," p. 140, Frankfort-on-the-Main, 1845).

L. G.

AARON'S TOMB: The burial-place of Aaron, which, according to Num. xx. 23–28, was Mount Hor, on the edge of the land of Edom. A later tradition, evidently of Mohammedan origin, refers to this hill as the one near Petra, called the Hill of Aaron. On its summit Aaron's tomb is still pointed out. This identification, however, does not agree with the itinerary of the Hebrews from Kadesh, as given in Num. xxxiii. 37, 38. G. B. L.

AARON: An amora mentioned twice in the Babylonian Talmud (B. K. 109*b*, Men. 74*b*). In both places he is represented as furnishing Rabina, head of the rabbinical academy at Sura from 488 to 499 and one of the editors of the Babylonian Talmud, with information concerning the Baraitot (tannaitic traditions not embodied in the Mishnah) of which the latter was ignorant. L. G.

AARON ABAYOB. See ABIOB, AARON.

AARON ABBA HA-LEVI BEN JOHANAN: A prominent rabbi; born about the close of the sixteenth century; died in Lemberg, June 18, 1643. He was president of a rabbinical college in Lemberg. His decisions are found in the responsa of Abraham Rapoport, Joel Särkes, and Meir Lublin; the last-named especially speaks very highly of him. While he hardly presents an individual type, it may be stated that in one case he condemns rigorism in the Law.

D.

AARON ABRAHAM BEN BARUCH SIMEON HA-LEVI: A cabalist, born in the first quarter of the sixteenth century. He published a small cabalistic work, "Iggeret ha-Ṭe'amim" (Letter on the Accents), about the middle of the century, in which each accent and its specific name are explained as containing references to both the Ten Sefirot and the people of Israel. Upon this work Shabbethai Sheftel ben Akiba Hurwitz, cabalist and physician at Prague, wrote in 1612 a voluminous commentary, "Shefa' Ṭal," asserting in the introduction (p. 13) that R. Aaron was one of the greatest masters of the Cabala, and that his work contained the most profound secrets which he (Hurwitz) wished to disclose. But in reality it contains only cabalistic trifles which attempt to show that the solution of the mystery of the Ten Sefirot is indicated in the names of the accents (*ṭe'amim*).

Aaron Abraham b. Baruch is not identical with AARON OF CARDENA.

AARON BEN ASHER OF KARLIN (Rabbi Aaron II. of Karlin): One of the most famous rabbis of the ḤASIDIM in northwestern Russia; born in 1802; died June 23, 1872. He had an immense number of followers, and many thousands of them used to visit him annually, about the time of the Jewish New Year, as is the custom among that sect. Notwithstanding his severity of manner and the not infrequent rudeness of his behavior, he was highly esteemed by his adherents. He "reigned" in Karlin, near Pinsk, in the government of Minsk, in succession to his father and his grandfather, Aaron ben Jacob; but a few years before his death he had a quarrel with a rich family of Karlin and removed from there to Stolin, a town several miles distant. Considering the amount of business that the yearly influx of strangers brought to the city where he resided, his removal was regarded as a misfortune for Karlin. He died, aged seventy years and seventeen days, in Malinovka, near Dubno, in Volhynia, while on a journey to the wedding of his granddaughter, and was succeeded by his son, **Asher of Stolin,** whose chief claim to distinction is that he spent most of his time at the *miḳwah* (bath). Asher died in Drohobycz about one year after the death of his father, and was succeeded by his five-year-old son, the so-called Yenuḳa (Baby) of Stolin, against whose rabbinate (in the Ḥasidic sense) Schatzkes—or, according to others, Judah Löb Levin (called Yehallel of Kiev)—under the pseudonym "Ḥad min Ḥabraya" (One of the students), wrote a well-known satire in "Ha-Shaḥar" (vi. 25-44). Aaron is the author of "Bet Aharon" (Aaron's House; Brody, 1875), which contains his cabalistic and ethical expositions of the Pentateuch. It also contains all the extant writings of his grandfather, of his father, and of his son.

AARON THE BABYLONIAN. See Aaron ben Samuel ha-Nasi.

AARON, BARNEY: English pugilist, nicknamed "The Star of the East"; born in London, November 21, 1800, at Duke's Place, Aldgate; died in Whitechapel, 1850. His career as a pugilist extended over fifteen years. When but nineteen years old he met and defeated in turn William Connelly (1819), Manny Lyons, Ely Bendon, and Samuel Belasco. He also opposed Angel Hyams and Tom Collins in interrupted contests. In 1823 he met Ned Stockman (May 6), whom he defeated after a battle of forty rounds; Tom Lenney (August 5 and November 11), and Frank Redmond (December 30). The next year he beat Peter Warren (April 6), but two months later was defeated after fifty-seven rounds by Arthur Matthewson (June 21). He fought Dick Hares (March 21, 1826), who, after forty-three rounds, claimed the fight on a foul blow, which was disallowed, the contest being awarded to Aaron. The latter met Dick Curtis at Andover, England (February 27, 1827), and after fighting fifty minutes knocked him out by a blow on the throat. Aaron again fought Frank Redmond, on October 23, and defeated him in forty-two rounds. Among other combatants whom Aaron met and fought with varying success were Marsh Bateman (July 4, 1828), Harry Jones (November 21), Jem Raines (May 26, 1829), and Tom Smith (April 1, 1834). See Pugilism.

AARON BEN BENJAMIN PORGES. See Porges, Aaron ben Benjamin.

AARON BEN BENJAMIN WOLF: Rabbi at Berlin and also at Frankfort-on-the-Oder; born about 1670; died in Frankfort-on-the-Oder, July 25, 1721. His father, Isaac Benjamin Wolf ben Eliezer Liebman, author of "Naḥlat Binyamin" (Amsterdam, 1682), rabbi in the mark of Brandenburg, was the brother of the court Jew Jost Liebman, who played a prominent part in the congregation of Berlin in the earliest period of its history. Aaron married Resel, the daughter of his uncle, who founded for him a Talmudical school and supported not only Aaron but also his disciples. In 1697, when the declining health of Shemariah, then rabbi of Berlin, necessitated the appointment of a successor, Aaron was made rabbi of the mark, and in 1709 was appointed by King Frederick I. to the office of chief rabbi of Berlin, with jurisdiction over all the Jews living in the mark. But with the death of King Frederick I. conditions changed. Esther, the widow of Jost Liebman, fell into disfavor with Frederick William I., her property was confiscated, and she died of a broken heart in 1714. These reverses made it impossible for Aaron to maintain his students; and the factions in the congregation of Berlin caused him constant anxiety, especially since he had always sided with his wife's family, which was very unpopular with the community. He was finally forced to leave Berlin and went to Frankfort-on-the-Oder, where he officiated as rabbi until his death. He left some works, though none has been printed. He wrote several approbations (*haskamot*) to books, published in Berlin, notably that to the first edition of Samuel ben Meir's commentary on the Pentateuch (1705), the manuscript of which was in the possession of David Oppenheimer, to whom he was related by marriage. His approbation of Nehemiah Ḥayyun's cabalistic work, "'Oz le-Elohim" (1712), caused him great annoyance, because of the charges of heresy brought against the work, which he, like David Oppenheimer, had indorsed without reading. In Berlin his brother-in-law Michael Ḥasid succeeded him.

D.

AARON BERECHIAH BEN MOSES BEN NEHEMIAH OF MODENA: Italian cabalist, who died in 1639. He was a pupil of Rabbi Hillel of Modena (surnamed Ḥasid we-Ḳaddosh, that is, "The Pious and Holy") and of Rabbi Menahem Azariah of Fano. At the request of the Ḥebrah Ḳaddisha (Burial Society) at Mantua he instituted rites for them. He is the author of "Ma'abar Yabboḳ," which contains dissertations on פרישות (separation), טהרות (purity), and קדושה (holiness). Added to these are prayers to be offered for the sick and the dead, as well as rules for their treatment. To avert possible criticism for failing to discuss these themes philosophically, he makes use of the statement of Isaac Arama in his book "'Aḳedat Yiẓḥaḳ" (chap. xxv.): "Reason must surrender some of its rights to the divine revelations which are superior to it." Other works written by him are: (1) Ashmoret ha-Boḳer" (The Watches of the Morning), prayers to be said in the early morning, arranged for the society called "Me'ire ha-Shaḥar" (Awakeners of the Morning), and therefore also published under this name. (2) A commentary on "Tiḳḳune ha-Zohar." (3) "Me'il Ẓedaḳah" (The Cloak of Righteousness), on worship and study, published at Mantua in 1767, together with (4) "Bigde Ḳodesh" (Garments of Holiness), on the same subject. (5) "Ḥibbur be-Ḳabbalah," a work on the Cabala, consisting of four volumes: (*a*) "Shemen Mishḥat Ḳodesh" (The Oil of Holy Anointment), on the principles of the Cabala according to Moses Cordovero and Isaac Luria; (*b*) "Shemen Zait Zak" (The Pure Oil of the Olive), public addresses on the same subject; (*c*) "Shetil Poreaḥ" (The Blossoming Plant), on the mysterious meaning of prayers and ceremonies: (*d*) "Imre Shefer" (Words of Beauty), and miscellaneous matter; this whole work was seen in manuscript by Azulai at Modena, and is found in parts in some libraries. (6) "Magen Aharon" (Shield of Aaron), containing a compendium of Luria's works. This fertile writer is said to have been, like Joseph Caro, in constant communion with a spirit called the Maggid.

J. L. S.

AARON THE BOOKSELLER: Italian dealer in Hebrew and other ancient manuscripts; flourished at the beginning of the fourteenth century. He spent seven years in Toledo, searching successfully for Arabic- and Hebrew books, and was able to circulate among the young students of Perugia a catalogue of eighty Hebrew and Arabic manuscripts.

Immanuel de Romi and his friends, on one occasion, took advantage of Aaron's absence from home, broke open his book-cases, hastily copied some manuscripts, and Immanuel added insult to the harm done by writing, in the form of a letter, a bitter satire on Aaron.

Bibliography: Immanuel, *Maḥberot*, viii. 45*b*–47, 1st ed.; Vogelstein and Rieger, *Gesch. d. Juden in Rom*, i. 330.

L. G.

AARON OF CANTERBURY: English exegete, mentioned in "Minḥat Yehudah" (The Offering of Judah) by Judah ben Eliezer on Deut. xxvi. 2, in association with Rashi and R. Jacob of Orleans, and thus, seemingly, of the twelfth century. But a passage in the Close Roll of 1242 refers the decision in a divorce case to three "magistri," Mosse of London, Aaron of Canterbury, and Jacob of Oxford, and makes it probable that the Aaron mentioned in "Minḥat Yehudah" was of the thirteenth century and acted as an ecclesiastical assessor, or dayyan, in London about 1242. If so, his name was Aaron fil (son of) Samson.

J.

AARON OF CARDENA: A cabalist, about whose life little is known. He wrote a book containing "profound secrets" under the title of "Ḳarnayim" (Rays)—see Hab. iii. 4. The work was erroneously ascribed to Isaac b. Abraham b. David, surnamed "the Blind," which fact shows the esteem in which it was held and also the age in which it was written. The author refers at the close of chap. iii. and at the beginning of chaps. v. and vii. to two of his other works, "Kitro Yeshu'ah" (His Crown is Salvation—compare Ps. xxxiii. 16) and "Peraḥ Ẓiẓ" (The Blossom of the Priestly Diadem—compare Num. xvii. 23), the titles of which seem to refer to his name, Aaron, as priest. The work "Ḳarnayim" was first published at Zolkiew, in 1709, together with a commentary, "Dan Yadin," by R. Simon b. Pesaḥ of Astropol, and additions by his nephew, under the title of "Liḳḳuṭe Shoshanim." In 1805 it was republished at Jitomir together with the commentary "Parashat Eliezer," by Eliezer Fishel, grandson of R. Isaac of Cracow, and in 1835 it was again published at Leghorn together with the commentary "Ḳeren Zebi" and another work, "Peraḥ Shoshan," by Samuel b. Joseph Shamama.

Regarding another work, "Iggeret ha-Ṭe'amim," ascribed to our author, see Aaron Abraham b. Baruch Simon.

AARON CHORIN. See Chorin, Aaron.

AARON CUPINO or **KUPINO:** Talmudist and head of a *yeshibah* at Constantinople; flourished about the close of the seventeenth century. He was a pupil of Ḥayyim Shabbethai at Salonica, whence he afterward moved to Constantinople. Here he founded a Talmudic school, from which were graduated several pupils who afterward acquired notable reputations, among whom were Aaron ben Isaac Sason and Isaac Raphael Alfandari. Aaron Cupino maintained a scholarly correspondence with R. Benveniste (1601–76), the author of the "Keneset ha-Gedolah," and with several other scholars.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 312, p. 147.

L. G.

AARON BEN DAVID COHEN OF RAGUSA: Rabbi in Ragusa; born about 1580. His maternal grandfather was Solomon Oheb, also rabbi in the same city. Aaron studied in his native city and later in Venice, whence he returned to occupy a pulpit in Ragusa. In 1623 he was imprisoned as a supposed accomplice of Isaac Jeshurun, who had been falsely accused of ritual murder. Rabbi Aaron's sermons, "Zeḳan Aharon" (Aaron's Beard), together with his grandfather's sermons, "Shemen ha-Ṭob" (The Good Oil), and the history of Isaac Jeshurun's martyrdom, were published at Venice in 1657, after his death.

Aaron's account of the alleged ritual murder, together with documents from the Ragusa archives, were published in 1882.

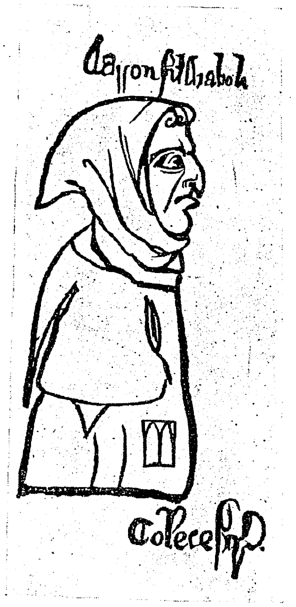
Bibliography: Jellinek, *Literaturblatt des Orients*, vii. 252; Michael, *Or ha-Ḥayyim*, No. 282; Rahmer's *Literaturblatt*, 1883.

D.

AARON BEN DAVID ḤAYYUN. See Ḥayyun, Aaron ben David.

"AARON, SON OF THE DEVIL": The name given to a portrait or caricature of an English Jew of the year 1277, drawn on a forest-roll of the county of Essex, in connection with a number of fines imposed on some Jews and Christians who pursued a doe that had escaped from the hounds near the city of Colchester. This was an offense against the forest laws of the time, and a fine had to be paid by a Jew who had evaded arrest and who, when he returned, was probably the subject of the caricature.

This caricature is the earliest dated portrait of a Jew, and shows marked Jewish traits. The Jew wears a cowl, a sign that he had no outdoor work to perform and that he belonged to the professional classes; on his upper garments is fixed the English form of a Jewish badge, which was in the shape of the two tables of the Law, in saffron taffeta, six fingerbreadths long and three broad. This differs from all the other forms of the badge, which was generally in the shape of a quoit.



"Aaron, Son of the Devil."

AARON IBN EL-BARGARDI. See Bargardi, Aaron ibn el-.

AARON BEN ELIEZER: German Talmudist, who flourished in the thirteenth century. That he was considered a great man at that time is proved by the actions of his contemporary, R. Meir ben Baruch of Rothenberg, acknowledged to be the greatest rabbinical authority of that age. Of R. Aaron the latter modestly remarks, in one of his responsa (ed. Prague, p. 246), "I must be brief, the matter being under consideration by great men; namely, by the high court of R. Aaron." Abigdor ha-Kohen, chief rabbi of Austria, who kept up a regular correspondence with him, referred to him with great respect, calling him "my teacher." He appears to be identical with that R. Aaron of whom it is said in "Or Zaru'a" (p. 103*b*), "Now everything depends on R. Aaron, the only man who combines scholarship, ripe experience, and authority in one; he is called upon to fight for God and His law, and we are ready to follow him."

Bibliography: Michael, *Or ha-Ḥayyim*, Nos. 10, 275; *Ha-Eshkol* (Hebrew Encyclopedia), i. 454.

L. G.

AARON BEN ELIEZER (called **Saggi Nehor**—euphemism for "The Blind"): A liturgical poet, who lived in Safed from the year 1545. He was the author of a collection of poems and prayers printed at Mantua in 1561, entitled "Sefer ha-Miẓnefet" (The Book of the Miter). His booklet treats chiefly of the glories of Palestine, for love of which land he had left his home; and it includes a number of poems upon the thirteen articles of the Jewish creed. This Aaron is probably the same as the one honorably mentioned by a writer of 1500–35 given in Luncz, "Jerusalem Yearbook," iii. 98, 104, Hebrew part.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 308, and Dukes in *Orient*, 1844, p. 453.

L. G.

AARON BEN ELIEZER LIPMAN: Rabbi of the town of Zempelburg, West Prussia, formerly included in the kingdom of Poland; flourished toward the middle of the seventeenth century. He was an intimate friend of Shabbethai Hurwitz, rabbi of Prague. His work, "Ḳorban Aharon" (The Offering of Aaron), was first published at Amsterdam, in 1646, and has gone through several editions. It summarizes in alphabetical order the decisions which R. Moses Isserles (RMA) has laid down in his ritualistic work, "Torat Ḥaṭat." Aaron is also known as the author of an acrostic meditation (*teḥinnah*), beginning "Elohai dalfah 'eni" (My eye droppeth tears, O my God!).

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 536; Steinschneider, *Cat. Bodl.* No. 4354.

P. B.

AARON BEN ELIJAH, THE YOUNGER, of Nicomedia: Karaite theologian, born in Cairo about 1300; died in Constantinople in 1369. To distinguish him from Aaron ben Joseph, the elder Karaite theologian of Constantinople, he was called Aaron the Younger, or the Later. Aaron ben Elijah lived for a long time in Nicomedia, Asia Minor (hence his agnomen, "Nicomedi"), but spent the closing years of his life in Constantinople, at that time the center of Karaite learning. Of his character little is known. The Karaites claim for him a rank equal to that of Maimonides in rabbinical Judaism. In point of fact, he seems to have made it the ambition of his life to rival the famous Rabbi Moses of Cairo, defending at the same time the doctrines of his own sect against Maimonides' attacks. For this purpose he studied carefully the entire philosophical literature of the Moslems and Jews, familiarizing himself with the rabbinical writings as well as with all the works of his Karaite predecessors. Thus prepared, he took as a model Maimonides' "Moreh Nebukim," and, imitating it both in plan and style—betraying also at times an almost slavish dependence upon it in matters of detail—he wrote his philosophical work "'Eẓ ha-Ḥayyim" (The Tree of Life), which he finished in the year 1346. In 1354, while in Constantinople, he composed his work "Gan Eden" (The Garden of Eden), on the Biblical commandments, and finally, in the year 1362, he wrote "Keter Torah" (The Crown of the Law), a comprehensive commentary on the Pentateuch.

Aaron was not of the same profound and independent cast of mind as Maimonides, for whom he entertained great esteem even when opposing him, but was a versatile compiler and eclectic philosopher rather than an original thinker. Still he was eminently successful in his masterly efforts to restore to the Karaites some of the prestige and self-respect which had shown signs of decline ever since Saadia of Fayoum had begun his systematic warfare against them. He, like his predecessor, Aaron the Elder, effected a healthy regeneration of Karaite theology, a fact which the partiality of Grätz, the historian, failed to appreciate (see "Gesch. d. Juden," vi. 375, 376). Nor, in fact, can an impartial judgment deny him the merit of having often criticized Maimonides quite justly, and of having advanced sounder, because less rationalistic, theological views.

Aaron's Philosophy.

Like Maimonides and all other Judæo-Arabic students of philosophy, Aaron stands under the dominating influence of Aristotelianism. There is, however, a distinction between Aaron and Maimonides. The latter, in his "Moreh Nebukim," i. 71, disagrees with the Motazilites, or liberal Moslem theologians, regarding their system of the Kalam theology, because, in order to harmonize revelation with philosophy—especially on the question of creation—the Motazilites combine atomism with the theories of Aristotle, while Maimonides defends the dogma of the creation against the Stagirite, himself making use of that philosopher's own arguments. Aaron is opposed to Aristotelianism, and, like the rest of the Karaite theologians, adheres to the liberal system of the Motazilites; herein differing from Aaron ben Joseph, who frequently sides with the rabbinists against the Karaite traditions. Accordingly, at the very beginning of his book, "'Eẓ ha-Ḥayyim," he declares that the theology of the Kalam is the natural religion arrived at by Abraham through meditation and systematized by the Mosaic Law; while Greek philosophy, adopted by Christianity because of its hostility to Judaism, is a heterogeneous foreign product and obnoxious to the development of the Torah in its purity. He further declares the restoration and clearer presentation of the Kalam to be the object of his work.

Of the one hundred and fourteen chapters which the book contains the first fifteen are devoted to the doctrine concerning God's existence, His incorporeality, and the creation of the world, the heavenly spheres being considered, as in the "Moreh," as ruled by separate intelligences or angels. All these doctrines are shown to be logical deductions and therefore prior to his "'Eẓ ha-Ḥayyim" revelation, which is only the confirmation of truth otherwise known.

In the succeeding forty-seven chapters, the Biblical anthropomorphic expressions (see Anthropomorphism) are explained as figurative expressions of the divine energies and activities, the words of Maimonides being at times literally reiterated or epitomized, though Aaron claims that Maimonides merely followed Judah Hadassi, whose work, "Ha-Eshkol," appeared twenty-nine years before the "Yad ha-Ḥazaḳah." To him also, as to Maimonides, the Biblical theophany of Ezekiel ("Merkabah") has a physical meaning, and so has the Tabernacle with its symbolism. In demonstrating the unity of God in the following chapters the author opposes Maimonides and Hadassi, who reject all but the negative attributes; Aaron, however, declares power, knowledge, life, will, and existence to be positive (affirmative) attributes inseparable from His essence and consequently in no way infringing upon His unity. This leads him to an explanation of the usual names of God which denote His activity as distinguished from His specific name, the Tetragrammaton denoting His essence as the author of all existence.

His Views of Divine Providence.

In chapters 78–95 divine providence is then discussed with special reference to the existence of evil in its fourfold nature, physical and psychical, moral and non-moral. This had been a favorite topic of the older Karaite philosophers such as Joseph al-Bazir and Joshua, based upon the Aristotelian view, followed also by Maimonides, that evil is only a defect inherent in matter, and therefore not to be ascribed to God, unless—and this is well brought out by Aaron and his Karaite predecessors—God makes it the means of man's moral improvement. While Maimonides assumes an especial providence of God only for man and not for creatures without reason, Aaron extends divine providence over all beings, God's universal knowledge embracing, according to Karaite theology, also sympathy with all beings. The ruling principle of divine action he takes to be not His wisdom, as does Maimonides, but, with a far deeper theological insight, His justice.

Accentuating the superiority of the moral above the intellectual power, Aaron takes a higher view of the suffering of the righteous than do Maimonides and some of his Karaite predecessors, who speak of *temurah* (the law of compensation for grief, which also rules over animal life); and he postulates, with especial reference to Abraham and Job, goodness as a divine principle underlying all trials imposed upon man for his spiritual benefit. As to the purposes of the world, man can only comprehend his own sublunary world, of which he forms the highest end as God's servant. From chapter 95 to the end of the work, revelation and law, with the soul's perfection, its immortality and future bliss, are the subjects treated. The two trees in paradise are taken as symbols of the higher and the lower spheres of human life, man's fall from the one to the other necessitating the special commandments of God, until finally the Law becomes the means of man's full restoration to his twofold nature. This leads to a discussion of the nature of prophecy in general and of its highest degree attained by Moses; also of the object of the Law and its various commandments given for the purpose of the perfection of the individual as well as of the human race in general.

The Law of Moses was intended for and offered to all nations, and it can never be changed, improved, or (as the rabbanites claim) augmented by an oral law. Essentially different from the attitude of Maimonides, and in fact from that of all Aristotelian thinkers, is Aaron's attitude toward immortality, which he bases chiefly upon moral grounds, the postulate of retribution; but for this very reason his eschatology is rather obscure, being half-rational and half-mystical, a blending of many beliefs. A call to repentance forms the conclusion of his work.

Aaron's Interpretation of the Law.

In his great work on the Commandments, entitled "Gan Eden," consisting of twenty-five sections and one hundred and ninety-four chapters, besides nine smaller juridical articles, which became of paramount importance to the Karaites, Aaron follows a system of rationalism similar to the one expounded by Maimonides in his "Moreh Nebuḳim," whereas the Karaites prefer to compare it with the "Yad ha-Ḥazaḳah." He starts with the principle enunciated in the "'Eẓ ha-Ḥayyim," that the inculcation of the belief in God's unity, and especially in His government of the world, is the main purpose of every single precept of the Law; wherefore it is our duty to search after the object of each commandment. The Sabbath day has for its special object the inculcation of the belief in the divine creation and guidance of the world, while other festivals are intended to counteract the influences of paganism and fatalism. Two treatises of this work have appeared as separate books: one comprising five sections and twenty-two chapters on *sheḥitah* (the law for the slaughtering of animals); another, "Ẓofnat Pa'aneaḥ" (Discloser of Secrets), comprising eight chapters on incestuous marriages. The whole work is the best and most comprehensive exposition of the Karaite system of the Law, and presents the opinions of all Aaron's predecessors with impartial and frank criticism. It is chiefly owing to this work that he exerts a great influence upon the Karaites.

Aaron's third work, "Keter Torah" (the Crown of the Law), is composed after the manner of Ibn Ezra's commentary on the Pentateuch. Like his other works, it also contains a review of the philosophical and exegetical interpretations by all his predecessors, with a fair criticism of the same, and helps to supplement and elucidate his ritual work. Of special interest is his preface, in which are stated the main differences between the rabbanites and Karaites in regard to Biblical exegesis.

Editions of Aaron's Works.

The "'Eẓ ha-Ḥayyim," of which many manuscripts exist in Leyden, Munich, Vienna, and Leipsic, was first published, with a large commentary ("Or ha-Ḥayyim") by Luzki, in Koslov, 1835. A critical edition, with valuable information and a summary of the one hundred and fourteen chapters in Hebrew by Caleb Afandopulo, and one in German by the editor, Franz Delitzsch, appeared in Leipsic, 1841. Of the "Keter Torah" there is extant a Koslov edition (1866), besides manuscripts in the Bodleian Library, Oxford, in Vienna, and in Leipsic; while the "Gan Eden" exists in manuscript only, in Leyden and Leipsic. Portions of the latter have been published by Schuparth, Trigland, Danz, and Lanzhausen.

K.

AARON EZEKIEL ḤARIF (more fully **AARON JACOB BEN EZEKIEL ḤARIF**): Hungarian scholar; died at Nikolsburg, April 10, 1670. As successor to Gerson Ashkenazi he held the post of rabbi in Nikolsburg at the same time that he was chief rabbi of the province of Moravia. The epithet "Ḥarif" (The Keen Thinker) was also bestowed upon four of his ancestors, Ezekiel, Jacob, Ezekiel, and Isaac. Possibly he attained to the title by personal merit; for an inscription on his tombstone compares his death to the loss of the Ark of the Covenant.

A. F.-G.

AARON FRANCO PINHERO. See PINHERO, AARON FRANCO.

AARON BEN GERSHON ABULRABI OF CATANIA (called also **Aldabi** or **Alrabi**): Sicilian scholar, cabalist, and astrologer; flourished between 1400 and 1450. He was a son-in-law of Don Moses Gabbai, an exile from Majorca. Aaron was the youngest of five brothers, all rabbinic scholars; the others were Shallum, Baruch, Moses, and Isaac. He studied in Treviso, Italy, and was familiar with the scientific and philosophic literature of his age; he was a good grammarian, and well acquainted with the Arabic language. Like his father, he believed in astrology, and loved to observe the horoscope. He was also an adept in the Cabala, though at times his critical spirit came in conflict with its doctrines. On his travels he visited Turkey, Egypt, Palestine, Damascus, and Kaffa in the Crimea. In Jerusalem he had many disputations with the Karaites, to which his commentary on the Pentateuch refers with evident pride, as having vindicated the cause of rabbinical theology. While in Rome he was admitted to the presence of Pope Martin V., who was surrounded by his cardinals. Martin V. was kindly disposed toward the Jews, and often discussed religious questions with them in a friendly manner. On this occasion he propounded to Aaron a number of very pointed questions concerning Biblical and Talmudical passages. Among other things he asked if the use of the cherubim in the Holy of Holies was not rather antagonistic to the Second Commandment, which prohibits idolatry. Aaron in his commentary refers several times to this discussion and to the answers he gave.

As Writer and Bible Commentator.

Coming often in contact with learned Christians, Aaron had many occasions to defend Judaism against the polemics of the Church, on the one hand, and the attacks of the Karaites on the other. It was this unceasing conflict that induced him to write a book, called "Maṭṭeh Aharon" (The Staff of Aaron), in defense of the Law and tradition. Keenly observant, and of an independent and critical spirit, he judged persons and opinions freely and openly. He excels as a writer and as a Bible commentator, and often upbraids the Jews of his native land for their ignorance and hollow pretensions, at the same time pointing with admiration to the numerous Jews of high breeding he has met on his travels. Following the principle of a rational Biblical exegesis, he does not hesitate occasionally to refute haggadic traditions which seem to conflict with reason and common sense; and at times, like Ibn Ezra and Samuel ben Meir, he even states his disagreement with halakic interpretation. He was fully conversant with the views of the Karaites and Samaritans and eager, in his explanation of the Bible, to refute now Christian and now Mohammedan doctrines. He boldly exposes errors wherever he finds them, claiming "that it is more honorable for the wise to commit an error than knowingly to misrepresent the truth."

Nor does he shrink from pointing out the blemishes he finds in the character of the Patriarchs. Being guided solely by a love of truth, he, as a matter of course, does not spare such great Bible commentators as Rashi and Naḥmanides. For the former Aaron entertained a very high regard; of the latter he frequently says, "With due deference to his honor, he misunderstood the Talmud" (see his commentary upon Gen. xxvii. 22; Ex. xxiii. 11, xxv. 9). Like Samuel ben Meir and Maimonides, he explains the law, "Thou shalt not seethe a kid in its mother's milk" (Ex. xxiii. 19), as a warning against a certain idolatrous practise. Notwithstanding his liberal mind and his keen investigating spirit, he was held in high esteem by his contemporaries, as may be seen from David Abi Zimra's mention of him as "Aaron our Rabbi" in No. 10 of his responsa, where he commends him for his liberty of thought. He was a devoted Jew, who deeply deplored the political and social condition of the Jews of his time, and all the more fervently gave expression to his hope for the speedy advent of the Messiah. For his cabalistic views he quotes Recanate and Joseph Sar Shalom, but not the Zohar.

Aaron's Works.

Aaron states that he wrote a Hebrew grammar entitled "Ha-Meyasher" (The Leveler of the Road); "Maṭṭeh Aharon," referred to above, a cabalistic or metaphysical work; "Nezer ha-Ḳodesh" (The Crown of Holiness); "Peraḥ ha-Elohut" (The Blossoming of the Godhead), probably of a similar character, and "Sefer ha-Nefesh" (The Book of the Soul). All of these works are known only through his own quotations in his supercommentary on Rashi. This work, published from an incomplete manuscript, together with another supercommentary on Rashi by Samuel Almosnino, by Moses Albelda, and by Jacob Canizal, is one of the earliest books printed at Constantinople, and is therefore very rare. According to his own testimony, it was written in the year 1420 (as Perles has shown); but he intended to compose, or, as Perles thinks, actually did compose, a larger commentary on the Pentateuch. Perles has furnished ample proof that Aaron Aldabi—or, as he called himself, Aaron Alrabi—was a man of great originality and merit, and it is to be hoped that his lost works will be discovered, and that editions of his commentary, based on clear manuscripts existing in Oxford and elsewhere, will fully vindicate his character, though Graetz and Karpeles, in their histories, have attacked him.

J. H. Schorr, in "Zion," 1840, first called attention to Abulrabi, erroneously calling him Aaron ben Mose Alrabi; but, owing to a misunderstanding of his remarks, he ascribes to him the strange assertion that Moses translated the Pentateuch from the Arabic into Hebrew—a misunderstanding repeated by Grätz, "Gesch. d. Juden" (third edition), viii. 250, and by Karpelès, "Gesch. der Jüdischen Literatur," p. 771—whereas the author, in his commentary upon Gen. xviii. 5, referring to the rabbinical Haggadah that the angels who came to Abraham appeared as Arabs, says that they spoke in Arabic, and that Moses rendered their words in Hebrew—a remark which he repeats in his comments upon Gen. xxiv. 23 and Ex. ii. 10. Zunz, "Z. G.," pp. 518–520, and Steinschneider, "Cat. Bodl.," call him Alrabi. Aaron's true name, however, is given in the acrostic written by him at the end of his published commentary.

AARON HAMON. See HAMON, AARON.

AARON (BEN ABRAHAM BEN SAMUEL) IBN ḤAYYIM: Moroccan Biblical and Talmudic commentator; flourished at the beginning of the seventeenth century at Fez; died at Jerusalem in 1632. He was a member of the bet din, or court of justice, of Fez, and removed to Venice about 1608, to print his voluminous manuscripts. From Venice he went to Jerusalem, where he spent the last years of his life. Aaron published: (1) "Leb

Aharon" (Aaron's Heart), commentaries on Joshua and Judges in a double form, one containing simple explanations of words (*peshat*), the other being of a homiletic character (*derush*); (2) "Ḳorban Aharon" (Aaron's Offering), a commentary on the Sifra; (3) "Middot Aharon" (Aaron's Rules), an important treatise on the thirteen hermeneutic rules, perhaps the only adequate treatment of this difficult subject in existence. All three were published at Venice in 1609, and went through a second edition at Dessau in 1742. Aaron's responsa were published in Mordecai ha-Levi's "Darke No'am," Venice, 1697. While at Venice, Aaron lectured in several of the congregations; and when the news of his death reached that city the famous preachers Azariah Figo ("Binah la-'Ittim," lxxii.) and Judah Aryeh of Modena delivered eulogistic addresses concerning him.

AARON BEN ḤAYYIM ABRAHAM HA-KOHEN PERAḤYAH. See Peraḥyah, Aaron ben Ḥayyim Abraham ha-Kohen.

AARON BEN ḤAYYIM HA-KOHEN (called **The Saint**): Nephew of Simeon of Coucy-le-Château and of Jacob of Corbeil; flourished about 1200. In 1227, after having compared all the copies of the French Maḥzor he could obtain, he wrote the Maḥzor, Code Uri, No. 225, to which he added a commentary consisting chiefly of compilations of written and traditional explanations from his uncle Ephraim ben Menahem, and from Shemaiah bar Isaac, Moses ben Kalonymus ha-Zaḳen, and Meshullam bar Simson ("Cat. Bodl. Hebr. MSS." No. 1206). Neubauer thinks that MS. No. 1209 in the same collection is a shorter form of the same compilation. Aaron seems to have known some Arabic, and quotes French and German words.

AARON BEN ISAAC SASON: Author and Talmudist; born in Constantinople in 1629. He was a grandson of Aaron ben Joseph Sason, an eminent Talmudist, and cousin of Ḥayyim Benveniste, the famous scholar. Aaron Cupino, rabbi of Constantinople, was his teacher in Talmudic lore, and was so successful that at the age of twenty his pupil engaged in Talmudic controversies with Moses Benveniste, who thought them worthy of publication. The great Palestinian Pilpulist, Judah Rozanes, referred with respect to an unpublished work, "Hen Yeshallaḥ," by R. Aaron. Whether the work "Sefat Emet" should be credited to R. Aaron or to his grandfather, Aaron ben Joseph, is uncertain. The latter is more probably its author. Shabbethai Bass, the only writer who mentions that particular book, in his "Sifte Yeshenim," throws no light on this question, merely mentioning that it is by Aaron Sason. See Aaron ben Joseph Sason.

L. G.

AARON, ISRAEL: American rabbi; born at Lancaster, Pa., Nov. 20, 1859. His father was a native of Hesse-Darmstadt, where he served many years in the army, holding several minor military offices. After leaving the High School Israel, Aaron entered the Hebrew Union College at Cincinnati. From 1883 to 1887 he was rabbi at Fort Wayne, Ind., and since 1887 has been at Buffalo, N. Y. He has written on "The Relation of the Jews and Arabs to the Renaissance," and "The Megillah of Saragossa," in the "Menorah"; also translations of Franz Delitzsch's "Colors in the Talmud" and J. Stern's "Woman's Place in the Talmud."

AARON BEN ISRAEL BRODA. See Broda, Aaron ben Israel.

AARON BEN JACOB BEN DAVID HA-KOHEN: French ritualist; one of a family of scholars living at Narbonne, France (not Lunel, as Conforte and others say), who was a sufferer by the expulsion of the Jews in 1306. He emigrated to Majorca, and there, some time before 1327, composed a ritual work of great merit bearing the title "Orḥot Ḥayyim" (The Paths of Life). The first part deals chiefly with the laws concerning the daily prayers, the Sabbath, and the festivals, and was published in Florence in 1752; the second, and larger, part is now being edited by M. Schlesinger. The work is rather a compilation of Talmudic laws and discussions than an original system, and was conceived on a plan similar to Jacob ben Asher's great code, the "Arba'ah Ṭurim," which appeared soon afterward and superseded it as a ritual guide on account of its more practical character. The "Orḥot Ḥayyim," however, contains some ethical and doctrinal chapters which are not found in Jacob ben Asher's code. Aaron ha-Kohen was especially fond of mystic lore and of rabbinical discussion. A less strict legalist than his more famous contemporary, his "Orḥot Ḥayyim" is of greater value to the student of literature than to one who seeks practical decisions.

An abridgment of the work, under the name of "Kol Bo" (All Is in It), a thesaurus, compiled most probably by Shemariah ben Simḥah, a German scholar (according to others by Joseph ben Tobiah of Provence), came into common use, replacing the original work.

AARON BEN JACOB HA-LEVI HOROWITZ. See Horowitz, Aaron ben Jacob ha-Levi.

AARON BEN JACOB OF KARLIN: Known among the Ḥasidim as Rabbi Aaron the Great, or simply as the "Preacher" or "Censor"; born in 1738; died 1771. He was one of the early great rabbis of the sect who helped the rapid spread of Ḥasidism in eastern Europe, and was distinguished for the fiery eloquence of his exhortations. He died one year before his master, the great Rabbi Baer of Mezhirich, and was succeeded by his son, Asher of Karlin (I.). Aaron is the author of the Sabbath hymn which begins יה אכסוף נעם שבת and is still a part of the liturgy of the Ḥasidim. His ethical will (*ẓewaah*) and some collectanea are printed in the work of his grandson, Aaron ben Asher of Karlin.

AARON JAROSLAW. See Jaroslaw, Aaron.

AARON JEITELES. See Jeiteles, Aaron.

AARON OF JERUSALEM (called also **Abul-Faraj Harun ben Alfarez, the Grammarian of Jerusalem**): Karaite of the eleventh century. He was acknowledged by the Rabbanites as one of the principal representatives of Karaitic learning and as a great authority on grammar and exegesis. He is quoted by Abraham ibn Ezra in the preface to his "Moznayim" as "the sage of Jerusalem, not known to me by name, who wrote eight books on grammar, as precious as sapphire." Moses ibn Ezra refers to him as "the sage of Jerusalem who wrote the 'Mushtamil,'" and also quotes him as "Sheik Abulfaraj of Jerusalem, who is no adherent of our religious community." Judah ibn Balaam likewise mentions "the grammarian of the Holy City"; and Abulwalid in his "Riḳmah" relates that Jacob de Leon brought him from Jerusalem "the copy of a book by an author who lived there, but whose name he refrains from mentioning," because, as Bacher surmises, he was a Karaite. Little was known of Aaron until Neubauer discovered, among the manuscript collection of Firkovitch in St. Petersburg, important fragments in Arabic of the "Mushtamil" (The Comprehensive), a Hebrew grammar consisting of eight books. Bacher, while studying these fragments, succeeded in rediscovering the unknown grammarian. S. Poznanski published some valuable specimens of Aaron's work; and, following a suggestion of Harkavy, he threw new light on the author and some other works of his—namely, the "Kitab al-Kaphi," a commentary on the Pentateuch, often quoted by Karaite writers, and a lexicographical work bearing the title "Sharḥ Alalfaẓ," a part of which is extant in the British Museum.

G.

AARON BEN JOSEPH HA-LEVI (abbreviated **RAH** = **R**abbi **A**aron **H**a-Levi): Talmudist and critic; a direct descendant of Zerahiah ha-Levi, and probably, like him, a native of Gerona, Spain; flourished at the end of the thirteenth century; died before 1303. About the middle of the thirteenth century he studied under Naḥmanides, at Gerona, where he also met, as a fellow pupil, Solomon ben Adret, who later came to be his opponent. Aaron especially mentions among his teachers his brother Phinehas (who migrated later to Canet near Perpignan, after which place he is surnamed), and his nephew Isaac, the son of his brother Benveniste. His life appears to have been spent in Spain. In 1285 he was rabbi in Saragossa, where he was so highly respected that Nissim ben Reuben, in 1350, did not dare to annul a decision given by Aaron to a community in that city, even though he considered it illegal (Isaac ben Sheshet, responsa, No. 390). About 1291 Aaron lived for a short time in Toledo. The assertion of some modern historians that, when advanced in age, he emigrated to Provence, is based on a misunderstanding of Meiri (see below), where the correct reading is והן instead of והוא, and מרביצי תורה instead of מרביץ תורה (see Neubauer's edition, p. 230).

According to Isaac de Lattes, Aaron wrote commentaries on most of the treatises in the Talmud, of which but few exist to-day; namely, those on the treatises Beẓah and Ketubot, also commentaries on the Halakot of Alfasi, of which the portions on Berakot and Ta'anit have been published by S. and N. Bamberger (Mentz, 1874) under the title "Peḳudat ha-Lewiyim." He wrote also several compendiums of laws concerning the precepts of various rituals. The "Precepts Concerning Wine," which is added to the work "'Abodat ha-Kodesh" by his opponent, Solomon ben Adret (Venice, 1602), is the only one published; another part is in manuscript in the Bodleian Library. His pupil Yom-Ṭob Ashbili (that is, of Seville) has preserved, in his novellæ ("Ḥiddushim") to the Talmud, many of the explanations of Aaron. The reputation of Aaron as a high Talmudic authority did not arise from any of the above works, which were not widely published, but from his "Bedeḳ ha-

Bayit" (Breaches of the House), a criticism of the great work, "Torat ha-Bayit" (The Precept of the House), written by Solomon ben Adret.

Several times during his rabbinical career Aaron came into conflict on important points with Solomon ben Adret, the leading spirit of the Spanish Jews. On one occasion they failed to agree in the decision of a subject submitted to them, and neither being willing to acknowledge the superiority of the other, they were obliged to refer the case to the French authorities.

No sooner had Adret published his important work, "Torat ha-Bayit," than Aaron submitted it to a severe but just criticism. It reflects great credit upon Aaron that he treated his opponent with the greatest deference, never allowing himself to descend to personalities. The same thing can not be said of Adret's counter-criticism, "Mishmeret ha-Bayit" (Defense of the House), which is written in an acrimonious, not to say malicious, tone: that may perhaps be the reason that Adret published it anonymously, for it was only in later years that he acknowledged his authorship. These two distinguished pupils of Naḥmanides differed also in many other points. While Adret inclined to mysticism, Aaron treated important dogmatical questions in a fashion which was distasteful to the orthodox, as, for instance, his opinion on resurrection. Without denying resurrection, he maintained that the body would have to undergo certain changes until it acquired an ethereal nature which would permit it to appear before God and to look upon the glory of heaven. Aaron was at first credited with the authorship of the "Sefer ha-Ḥinnuk"—an error corrected by Rosin ("Ein Compendium der Jüdischen Gesetzeskunde," 1871, pp. 131–134). See Aaron ha-Levi of Barcelona.

AARON BEN JOSEPH, THE KARAITE (called **the Elder** to distinguish him from Aaron ben Elijah of Nicomedia, the Younger): Eminent teacher, philosopher, physician, and liturgical poet in Constantinople; born in Sulchat, Crimea, about 1260; died about 1320. He took a prominent part in the regeneration of Karaism by the help of philosophical elements borrowed from Rabbanite literature. When only nineteen years of age he had mastered the theological knowledge of his time to such a degree that he was elected the spiritual head of the Karaite community of his native town, and in that capacity he engaged the Rabbanite teachers in a public dispute to determine the correct time for the new moon. He then journeyed through many lands and diligently studied the works of Ibn Ezra, Maimonides, Naḥmanides, and Rashi. Being, as he said, eager to arrive at "the truth without bias and prejudice, and free from partizan spirit," he determined to accept the results of his investigation, even if they conflicted with Karaite teachings and traditions. In this spirit of fairness he wrote, in 1294, while following the profession of a physician in Constantinople, the work which established his fame and influence despite his Rabbanite proclivities. This work was the "Mibḥar" (The Choice), a commentary on the Pentateuch, written in the terse, concise, and often obscure style and after the critical method of Ibn Ezra, and this became to the later generation of Karaite teachers a source of instruction in religious philosophy, in exegesis, and in practical theology, that is, the observance of the Law.

His Theology.

Like Ibn Ezra, he presents his theology not in systematic and coherent form, but in observations made throughout the book, in connection with the various portions of the Torah. Unlike Ibn Ezra, however, he avoids references to hidden mysteries of the Biblical text, insisting always on its plain meaning or its possible figurative significance. For the latter he especially uses the commentary of Naḥmanides, whose pupil he is erroneously said to have been. Like Judah Hadassi and Maimonides, he accentuates the spirituality of God; but, unlike these, he assumes certain attributes of God to be inseparable from His essence, but to be taken rather as human forms of speech. In connection with this he dwells especially on the will of God, by which the world was created, and by which the celestial bodies are moved and governed. Angels are to him intelligences emanating from the divine intellect, not created beings; and the existence of demons he rejects as an absurdity. God's saying, "Let us make man!" he explains as signifying the cooperation of the spiritual with the sensuous in the creation and evolution of man; and when God is described as giving names to things, the meaning is that He prompts man to do so. Still, he opposes that rationalism which dissolves miracles into natural occurrences. Prophecy he explains as a psychological, not a physical, process, manifested in different forms; either the inner eye or ear perceiving the object in a vision or dream, or, the truth being on a higher plane, communicated intuitively. Only Moses received the divine revelation directly and clearly without any mind-obscuring vision. Abraham's call to sacrifice his son he takes to be a mere vision. Aaron is very outspoken on the subject of man's free will, opposing emphatically the notion held by Ibn Ezra and others, that human destiny or disposition is influenced by the planets. The expression, that God hardened the heart of Pharaoh, he so interprets as not to contravene the principle of free will.

The most important of the Commandments Aaron declares, against older Karaite teachers and in accordance with the Rabbanites, to be the first of the Ten Words, which makes of the knowledge of God a positive command, as this alone gives to the observance of all the other laws its inner value and its life-consecrating character. Often, in the interpretation of the Law or in regard to its spirit, as in regard to the law of retaliation, "eye for eye and tooth for tooth," he sides with the Rabbanites. Everywhere he shows himself to be of sound, independent judgment. He virtually accepts the principle of tradition, rejecting it only when it conflicts with the letter of Scripture. His conception of the human soul is peculiar and probably influenced by his medical studies: it seems to him in its various functions dependent upon the brain, the blood, and the spinal cord or marrow; whereas otherwise he claims full independence for the immortal spirit. Here his physiology and theology do not harmonize.

Aaron ben Joseph achieved more permanent results for the Karaites by his liturgical work than by his commentary. It was his "Seder Tefillot" (Book of Prayers and Hymns) that was adopted by most of the Karaite congregations as the standard prayer-book, and that probably earned for him the epithet

His Liturgical and Other Works.

"ha-Ḳadosh" (the Saint). He not only enlarged the older Karaite ritual by his own compositions, many of which are rather mystical in character and not of great literary merit, but he also embodied in this ritual the hymns of Ibn Gabirol, Judah ha-Levi, Ibn Ezra, and other great liturgical poets of the Rabbanites, thus showing his broadness of mind as well as his fine judgment and taste. He also composed a didactic poem, presenting in brief rimes for popular instruction and education the contents and spiritual lessons of each weekly portion of the Pentateuch. He wrote, besides, brief commentaries on the earlier Prophets; on the later Prophets, of which only that on Isaiah has been preserved; and on the Hagiographa, of which the one on Job is mentioned in his Pentateuch commentary, and the one on the Psalms has been preserved only in part. He wrote, also, a grammar under the title of "Kelil Yofi" (Diadem of Beauty), a compilation from older works, with his own additions, among which was a chapter on Bible exegesis; but he left it unfinished. It was completed by Isaac Tishbi and published at Constantinople, in 1581, and at Koslov, in 1847.

Aaron ben Joseph's "Mibḥar" (existing in Leyden, London, Paris, and elsewhere in manuscript) was published with a commentary by Joseph Solomon ben Moses Yerushalmi, at Koslov, in 1835. For other commentaries see Tishbi, Elijah Rabbani ben Judah, Kalai, Samuel ben Joseph, and Luzki, Mordecai ben Nissan. His commentary on the earlier prophets and Isaiah, chaps. i.–lix., was edited under the title "Mibḥar Yesharim," by Abraham Firkovitch, who completed the commentary on Isaiah, at Koslov, 1835; better manuscripts are in Leyden. Aaron ben Joseph's commentary on the Psalms exists in Leyden in manuscript only and is incomplete. His liturgy, "Seder Tefillot," appeared first in Venice (D. Bomberg), 1525–29; then in Kale, 1734 and 1805; and in Koslov, 1836.

Jüdischen Literatur*, 1895, p. 57.

K.

AARON BEN JOSEPH SASON: Talmudic author; born toward the middle of the sixteenth century, probably at Salonica, where he received his rabbinical education under the supervision of Mordecai Matalon, an eminent scholar. During the last decades of the sixteenth century Aaron ben Joseph engaged in teaching, and some of his pupils ranked among the eminent rabbis of Turkey. With these, as well as with his colleagues, he maintained a lively correspondence on Talmudic questions, the summary of which (232 responsa) was published at Venice in 1625 under the title "Torat Emet" (Law of Truth). In the introduction to this work he mentions his commentaries on "Yad ha-Ḥazaḳah" of Maimonides and on the "Ṭur" of Jacob ben Asher, as well as his treatises on various halakic subjects, which do not appear to have been published, and which are perhaps altogether lost. It seems probable that the work "Sefat Emet" (Lip of Truth), which, according to the testimony of Shabbethai Bass, contains scholia to the Talmud and to the Tosafot, was written by Aaron ben Joseph and not by his grandson, Aaron ben Isaac Sason. This probability is supported to some extent by the title, "Sefat Emet," which corresponds with the title of his collection of responsa, as well as by the above cited statement in his introduction to "Torat Emet," that he had written scholia to the Talmud.

AARON KUPINO. See Aaron Cupino.

AARON LEVI. See Montezino, Antonio.

AARON HA-LEVI OF BARCELONA: Spanish Talmudist of the end of the thirteenth century; author of the first book of religious instruction among the Jews of the Middle Ages. Though his work the "Sefer ha-Ḥinnuk" (Book of Education) was well known, having been repeatedly commented on and republished in more than a dozen editions, it was reserved for Rosin to discover anything accurate concerning the personality of the author. The book itself is anonymous; and the statement by Gedaliah ibn Yaḥyah (dating from the middle of the sixteenth century), that its author was the celebrated Talmudist Aaron ben Joseph ha-Levi, has been generally accepted. It is now, however, certain that the author was a Spanish instructor of youth, of modest position, one who had contented himself with but the faintest allusion to his own identity in symbolically applying to himself the verse Mal. ii. 5, at the end of the prefatory letter to the book; in an old Midrash (Sifra, Shemini, ed. Weiss, i. 45*d*) this verse is referred to Aaron. He lays no claim to original research. The book was simply intended to impart to Jewish youth a knowledge of the Law, and to present in simple form the principles of Judaism to the unlearned layman. The writer seems to have had this lay-public always before him; and his work is in this respect different from that of his predecessors, Maimonides, Naḥmanides, and Moses of Coucy, from whose works he liberally draws.

The "Ḥinnuk."

The "Ḥinnuk" is an enumeration of the six hundred and thirteen affirmative and negative precepts of the Mosaic Law, arranged in the order of the weekly lessons (*parashot*), with their ethical and halakic aspects, based upon rabbinical tradition of the Talmudic and post-Talmudic periods, for which latter feature he relies upon Alfasi, Maimonides, and Naḥmanides as main authorities. His chief and original merit is displayed in the ingenuity and religious fervor with which he dwells upon the ethical side of the Law, avoiding most admirably all abstruse philosophical and mystical theories, such as are only too abundant in his guides, Maimonides and Naḥmanides. The following are some specimens of his method. Upon the precept concerning the treading ox (Deut. xxv. 4) the "Ḥinnuk" remarks:

> "It is the duty of man to accustom himself to show kindness, compassion, and consideration to his fellow creatures. When we therefore treat considerately even the animals given for our use, and withdraw not from them some of the fruits of what their labor obtains for us, we educate our soul thereby to be all the kinder to our fellow men, and accustom ourselves not to withhold from them what is their due, but to allow them to enjoy with us the result of that to which they have contributed" (par. 601).

Some of his explanations of purely ritual ordinances betray likewise a deep religious sentiment. Thus, he says, the counting (see 'Omer) of the seven weeks between Passover and Pentecost (Lev. xxiii. 15) is intended to cause us to meditate upon the real and deeper meaning of both those festivals. Israel's redemption from Egypt was only the beginning of true freedom for the nation; its full measure was not attained until the Revelation was given, which event is commemorated by the latter festival. On that day Israel may be truly said to have become a free people; therefore let the true Israelite reverentially and lovingly count the very days intervening between the date that brought him bodily liberty and that which perfected it by adding spiritual enfranchisement. Even in the citation of rabbinical traditions and amplifications of the Law, the author displays rare judgment and proper feeling, thus completely justifying the popularity which this book has for centuries enjoyed.

The author's enumeration of the fundamental doctrines (*'iḳḳarim*) of Judaism is noteworthy; namely, "the eternity, omnipotence, unity, and omniscience of God; creation of the world by God; rewards and punishments for human actions; and the truth of Jewish tradition" (introduction to the "Ḥinnuk"). Compared with the familiar principles of faith as enumerated by Maimonides, one is struck by the fact that the "Ḥinnuk," representing the official orthodoxy of the time, mentions neither the unchangeableness of the Law nor resurrection. This is owing undoubtedly to the aversion of rabbinical Judaism to the Maimonidean attempt to set up dogmas.

The "Ḥinnuk" has been translated into Spanish and Latin; the former version seems to have been in existence about a hundred years ago, but has entirely disappeared. An abbreviation of the Latin translation was published by J. H. Hottinger under the title "Juris Hebræorum Leges 261 . . . Ductu R. Levi Barcelonitæ," Zurich, 1656, and a French extract under the title, "Instruction Religieuse et Morale," by E. Halévy.

L. G.

AARON HA-LEVI BEN MOSES OF STAROSELYE: A Talmudic scholar and cabalist of note, who flourished in Poland during the latter part of the eighteenth century and the early part of the nineteenth. He was one of the most enthusiastic and steadfast disciples of the cabalist Senior Salman, rabbi of Lozhne and Lody, and studied under him until he had acquired a full knowledge of his mystic lore. He urged Salman to publish his work, "Tanya" (Slavita, 1796); and when the latter was imprisoned by a royal decree in 1798, Aaron traveled from town to town to collect money from his master's followers, to ransom him, or at least to bribe the jailer and the prison warders to allow them to see Salman. After the latter's death in 1812, Aaron took up his residence as rabbi at Staroselye, and many flocked to him to have the Law explained in accordance with the teachings of his master. These formed a school known as the Ḥasidim of Staroselye. Aaron was the author of "Sha'are 'Abodah" (The Gates of Worship), Shklov, 1820–21, a work which is also known by the name "'Abodat ha-Benonim" (The Worship of the Humble). It is divided into five sections: the first on the unity of God; the second on the union of souls; the third on divine service; the fourth on the Law and the Commandments; and the fifth on repentance. He also wrote "'Abodat ha-Lewi," Lemberg, 1861, a commentary on the Pentateuch. All of Aaron's teachings are based on the oral traditions of Salman and on his work, "Tanya."

J. L. S.

AARON HA-LEVI OETTINGEN (איטינגא): Galician rabbi; born about the beginning of the seventeenth century; died in Lemberg about 1670. He was one of a prominent family of rabbis, and officiated for the congregations of Javorov and Rzeszow. His father, Ḥayyim Judah Loeb ben Eliezer, was rabbi of Lemberg, as was also his father-in-law, Ḥayyim Cohen Rapoport, author of responsa, ultimately published at Lemberg, 1861. Aaron strongly opposed the Ḥasidism which arose in Galicia, and especially attacked Elimelech of Lezaysk, the author of "No'am Elimelech" (compare "Torat ha-Ḳenaot," p. 26). His approbations are found in various works of that period.

A. B. D.

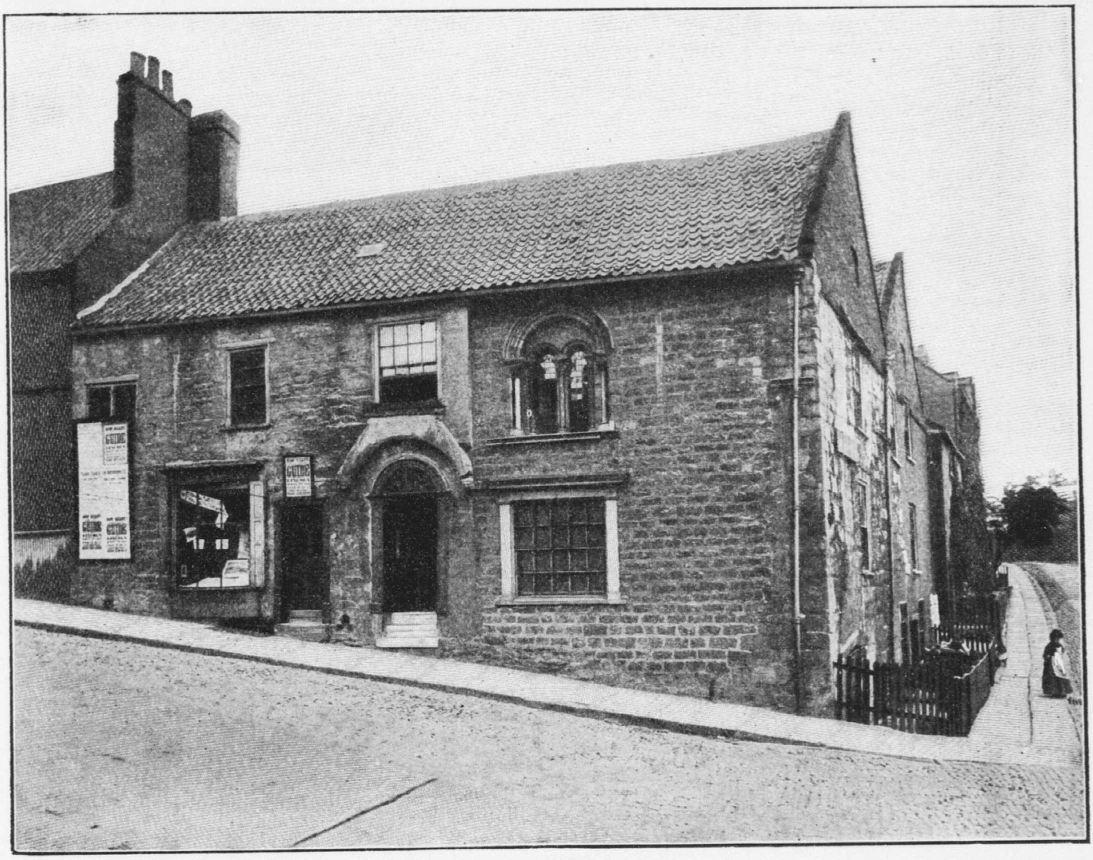
AARON OF LINCOLN: English financier; born at Lincoln, England, about 1125; died 1186. He is first mentioned in the English pipe-roll of 1166 as creditor of King Henry II. for sums amounting to £616 12*s.* 8*d.* (about $3,083, the equivalent of $100,000 of the present day) in nine of the English counties (Jacobs, "Jews of Angevin England," p. 43). He conducted his business through agents (M. D. Davis, "Sheṭaroth," pp. 287, 288, No. 148; Jacobs, *l.c.*, p. 277), and sometimes in conjunction with Isaac, fil Joce; by these methods building up what was practically a great banking association that spread throughout England. He made a specialty of lending money for the purpose of building abbeys and monasteries. Among those built were the Abbey of St. Albans ("Gesta St. Albani," ed. Riley, p. 193), Lincoln Minster (Giraldus Cambrensis, "Opera," ed. Dymock, vii. 36), Peterborough Cathedral ("Benedict Abbas," ed. Stubbs, i. 106), and no less than nine Cistercian abbeys ("Memorials of Fountains Abbey," ii. 18). They were all founded between 1140 and 1152, and at Aaron's death remained indebted to him in no less a sum than 6,400 marks (£4,800 or $24,000, probably equal to $750,000 at the present day). Some of these debts may, however, have been incurred by the abbeys in order to acquire lands pledged to Aaron. Thus the abbot of Meaux took over from Aaron lands pledged to the latter in the sum of 1,800 marks (£1,200 or $6,000, equal to $180,000 at the present day); Aaron at the same time promising to commute the debt for a new one of only 1,260 marks, which was paid off by the abbey. After Aaron's death the original deed for 1,800 marks was brought to light, and the king's treasury demanded from the abbey the missing 540 marks ("Chron. de Melsa," i. 173 *et seq.*). This incident indicates how, on the one hand, Aaron's activity enabled the abbeys to get possession of the lands belonging to the smaller barons, and, on the other, how his death brought the abbeys into the king's power.

His Transactions.

Aaron not only advanced money on land, but also on corn (Jacobs, *l.c.*, p. 66), armor (Giraldus Cambrensis, "De Instructione Principum," ed. Brewer, p. 45), and houses ("Rotulus Cartarum," i. 55*b*; Jacobs, *l.c.*, p. 60), and in this way acquired an interest in properties scattered through the eastern and southern counties of England. When he died, in 1186, Henry II. seized his property as the escheat of a Jewish usurer (see USURY), and the English crown thus became universal heir to his estate. The actual cash treasure accumulated by Aaron was sent over to France to assist Henry in his war with Philip Augustus, but the vessel containing it went down on the voyage between Shoreham and Dieppe ("Benedict Abbas," ed. Stubbs, ii. 5). However, the indebtedness of the smaller barons and knights still remained, and fell into the hands of the king to the amount of £15,000 ($75,000, probably equal to $2,500,000 at the present day), owed by some four hundred and thirty persons distributed over the English counties in the following proportions (Jacobs, *l.c.*, pp. 142, 143):

Berkshire	1	Hereford	5	Shropshire	3
Buckingham	4	Lincoln	186	Sussex	1
Cambridge	1	London and Middlesex	40	Warwick and Worcester	21
Cumberland	6	Norfolk	35	Wiltshire	3
Gloucester	2	Northampton	28	Yorkshire	80
Hampshire	7	Oxford	7		

So large was the amount that a separate division of the exchequer was constituted, entitled "Aaron's Exchequer" (Madox, "History of the Exchequer," folio ed., p. 745), and was continued till at least 1201, that is, fifteen years later, for on the pipe-roll of that year most of the debts to Aaron (about £7,500) are recorded as still outstanding to the king, showing that only half the debts had been paid over by that time, though, on the death of Aaron, the payment of interest ceased automatically, since the king, as a Christian, could not accept usury.



"Aaron's House" at Lincoln.
(From a photograph.)

The house of Aaron of Lincoln still stands, and is probably the oldest private stone dwelling in England the date of which can be fixed with precision (before 1186). It is on the right-hand side of the Steep Hill of Lincoln, on the way up toward the cathedral, and is figured in Jacobs, *l.c.*, opposite p. 91, and in "Tr. Jew. Hist. Soc. Eng.," iii., opposite p. 181 (where accurate details are given). Originally the house had no windows on the ground floor—an omission probably intended to increase the facilities for protection or defense.

Aaron's significance is due to the fact that his career illustrates the manner in which the medieval Jewish communities could be organized into a banking association reaching throughout an entire country; while the ultimate fate of the wealth thus acquired shows that, in the last resort, the state was the arch-usurer and obtained the chief benefit from Jewish usury.

J.

AARON MARKOVICH OF WILNA: Agent (court Jew) of King Ladislaus IV. of Poland in the seventeenth century. The only known document in which his name occurs is a letter, dated January 11, 1638, in the official correspondence between the Russian and Polish courts in the reign of Mikhail Feodorovich, the first Russian ruler of the Romanof dynasty. In it Ladislaus asks of the czar permission for Aaron Markovich, "the king's agent," to visit Moscow for the purpose of purchasing (with the privilege of exemption from custom duties) certain utensils for the royal household; also that he be allowed to take with him, for sale, some "precious goods." This request, together with the fact that Ladislaus was not very favorably disposed toward the Jews (see Ladislaus), is evidence of the influential standing of Aaron with the Polish king. The czar did not grant the request, a fact probably due to the strained relations of the two courts at the time.

H. R.

AARON BEN MEIR OF BREST: Lithuanian rabbi; born about the beginning of the eighteenth century at Brest-Litovsk (בריסק), Russia; died there Nov. 3, 1777. He was a descendant of the family of Katzenellenbogen-Padua, and received his Talmudical instruction from Eliezer ben Eliezer Kolir, a well-known Pilpulist and the author of a number of rabbinical works. Aaron carried the Pilpul method to its extreme limits, and was the author of "Minḥat Aharon" (Aaron's Offering, Novydvor, 1792), a work containing glosses on the Talmudic treatise Sanhedrin, and a masterpiece of rabbinical dialectics (Pilpul). At the end of the work is an appendix, called "Minḥah Belulah," which contains responsa and commentaries on Talmudic topics. Some of his responsa may be found in the "Meḳor Mayim Ḥayyim" (Sudilkov, 1836), a work by his grandson, Jacob Meir of Padua. Aaron's father was one of the leaders (*allufim*) of the Jewish community of Brest-Litovsk; and his signature is attached to a letter sent in 1752 by that community to Jonathan Eybeschütz assuring him of their support in his dispute with Emden.

Bibliography: Eisenstadt Wiener, *Da'at Ḳedoshim*, pp. 124–125, St. Petersburg, 1897–98; Feinstein, *'Ir Tehillah*, p. 33, Warsaw, 1886; Benjacob, *Oẓar ha-Sefarim*, p. 340.

L. G.—D.

AARON BEN MENAHEM MENDEL: Russian rabbi, who flourished at the beginning of the nineteenth century. He wrote "Seyag la-Torah" (Fence to the Law), which was printed at Lemberg in 1810. This work contains references to all the passages of the Babylonian Talmud quoted in the Tosafot, but is a plagiarism from a similar work by Mordecai Jaffe.

Bibliography: Fürst, *Bibl. Jud.* i. 25; Benjacob, *Oẓar ha-Sefarim*, p. 419.

L. G.

AARON BEN MESHULLAM BEN JACOB OF LUNEL: Ritualist; flourished about the end of the twelfth century and the beginning of the thirteenth; died about 1210 (according to "Shebeṭ Yehudah"). He was one of the five sons of Meshullam ben Jacob and seems to have written a book on Dinim, from which the author of the "Sefer Asufot" (MS. in the Montefiore College Library; see Gaster, "Judith Montefiore College Report, 1893," pp. 33 *et seq.*) quotes several passages. His decisions and interpretations are also referred to in the "Sefer ha-Hashlamah" of his nephew, Rabbi Meshullam (for example, in his notes on Baba Ḳamma, end of chap. x.; Baba Meẓi'a, beginning of chap. vii.), who calls him "ḥakam" for his general knowledge.

Judah ibn Tibbon, in his ethical will (ed. H. Edelman, in "The Path of Good Men"), recommends his son Samuel to seek in all things the advice of Rabbis Aaron and Asher, these being trusted friends; and he refers to Aaron's skill in computation of the calendar and in other branches of rabbinic knowledge. In the literary controversy about certain theories and decisions of Maimonides, carried on at the time by the Maimonists and Antimaimonists, Rabbi Aaron sided with the former.

Rabbi Meir ha-Levi Abulafia (רמ״ה), the leader of the Antimaimonists, informed Rabbi Aaron of the criticisms of Abba Mari on the works of Maimonides. The reply of R. Aaron ("Responsa of Maimonides," ed. A. Lichtenberg, part iii. 11 *et seq.*), in defense of Maimonides, is distinguished by its elegance of style, its appropriate use of Biblical and Talmudic phrases, and its skill in literary criticism. After a long panegyric on the greatness of Maimonides, R. Aaron places him above ordinary criticism. He says that if Abba Mari discovered in the works of Maimonides passages that appeared strange and unintelligible, he should have expressed his doubts in moderate terms, like a disciple who seeks information, and not like a master who corrects his pupil. Rabbi Aaron only discusses one topic of the controversy, namely, Maimonides' interpretation of the principle of resurrection.

M. F.

AARON BEN MORDECAI OF RÖDELHEIM (near Frankfort-on-the-Main): Translator, who flourished early in the eighteenth century. He translated the two Targums on Esther into Judæo-German in the early years of the eighteenth century; and the first edition, bearing the title "Meẓaḥ Aharon," appeared at Frankfort-on-the-Main in 1718. It has since been reprinted (Steinschneider, "Cat. Bodl." col. 724).

L. G.

AARON BEN MOSES BEN ASHER (commonly called **Ben Asher**; Arabic, **Abu Said**): A distinguished Masorite who flourished in Tiberias in the first half of the tenth century. He was descended from a family of Masorites which can be traced back through six generations to Asher the Elder, who flourished in the last half of the eighth century. While merely the names of elder critics have been preserved, that of Aaron ben Moses is the first that appears in the full light of history, and with him the Masora may, in a certain sense, be considered as closed. He wrote a manuscript of the Old Testament and marked it with vowel-signs and accents. He spent many years of study in preparing this codex, and revised it several times. It became the standard for all later generations; and with a few exceptions (where it follows his contemporary rival, Ben Naphtali) the present Masoretic text is based on his work. The belief that this codex has been preserved in a synagogue at Aleppo is unfounded, and the opinion that Aaron ben Asher was a Karaite is untenable. He wrote short treatises on Masoretic and grammatical subjects, which occur in several manuscripts under various titles. The title "Diḳduḳe ha-Ṭe'amim" (Grammatical Rules of the Accents), under which S. Baer and H. L. Strack published them (Leipsic, 1879), was probably that selected by the author himself. He also compiled a list of eighty homonyms, "Shemonim Zugim," which was afterward incorporated in the "Masora Finalis," *s.v.* א, and in the "Oklah we-Oklah" (אכלה ואכלה). Aaron ben Moses may be regarded as the connecting link between the Masorites and the grammarians.

AARON BEN MOSES MEIR PERLS. See PERLS, AARON BEN MOSES MEIR.

AARON MOSES BEN MORDECAI: One of the few cabalistic writers of recent times in East Prussia: author of a work, "Nishmat Shelomoh Mordecai" (The Soul of Solomon Mordecai; Johannisberg, 1852), so called in remembrance of his son, who died in early childhood. On the title-page the statement is made that the work is a commentary on M. Ḥ. Luzzatto's "Ḥoḳer u-Meḳubbal"; indeed the text of this treatise is printed in the volume. Aaron used the name of Luzzatto merely to give greater vogue to his own book, because of the waning influence of the Cabala in Poland at the time. In reality, Aaron's work is a commentary on the "'Eẓ Ḥayyim" of Ḥayyim Vital, the arch-apostle of the cabalistic school of Luria. Aaron Moses states (*l.c.* p. 46*a*) that he was the author also of a commentary on the Midrash Tanḥuma, entitled "Zebed Ṭob" (A Goodly Gift). This has not been printed.

BIBLIOGRAPHY: Benjacob, *Oẓar ha-Sefarim*, pp. 405 and 151, where the last work is wrongly ascribed to Dob Baer of Slonim.

AARON BEN MOSES TEOMIM: Rabbinical scholar; born about 1630, probably in Prague, where the Teomim-Fränkel family, from Vienna, had settled; died in Chmelnik, Poland, July 8, 1690. In 1670 he was called as rabbi to Worms, where he succeeded Samson Bacharach. Prior to this he had been a preacher at Prague. In a serious illness which overcame him on Passover evening, 1675, he vowed he would write a commentary on the Haggadah if he should be restored to health. On his recovery he published this commentary under the title "Maṭṭeh Aharon" (Aaron's Rod), Frankfort-on-the-Main, 1678. Another work, "Bigde Aharon" (Aaron's Vestments), homilies on the Pentateuch, was published after the author's death at Frankfort-on-the-Main, 1710. His "Glosses on Shulḥan 'Aruk, Ḥoshen Mishpaṭ" remained in manuscript. Responsa of his are found in the collections of Jair Ḥayyim Bacharach, "Ḥawwot Yair," and in those of Eliakim Goetz b. Meir of Hildesheim, "Eben ha-Shoham." In 1677 Aaron received a call to Lissa in Poland, which he declined; but in 1690 he accepted a call to the rabbinical seat of Cracow. He was there but three months when a Polish nobleman, probably in order to blackmail the congregation, ordered his arrest in Chmelnik, whither he had gone to attend the congregational Meeting of the Four Lands (ARBA' ARAẒOT). On Sabbath, July 8, 1690, he was arrested, placed on horseback, and hurried to prison. He fell off the horse several times and was as often remounted. Before the jail was reached he had died of fright and ill-treatment. He was buried at Pintchov.

As a character and as a rabbinical scholar, Aaron Teomim did not rise above the level of his contemporaries. In his rabbinical works, Teomim is a typical Pilpulist. His scholastic discourses are in accordance with the vogue of that age. That his theories, as exhibited in his treatment of the Haggadah, were appreciated by his contemporaries, is proved by the fact that his Haggadah was reprinted three times: at Amsterdam, in 1695; at Frankfort-on-the-Main, in 1710; at Amsterdam, in 1712.

A severe criticism which Jair Ḥayyim Bacharach wrote under the title "Maṭṭeh Aharon," and which he did not dare to publish, was certainly not free from personal motives. Bacharach, the son and grandson of former rabbis of Worms, living in that city after he had lost his position in Coblenz, had hoped to succeed his father; and he wished to show that the congregation had not chosen a better man. Bacharach's interesting criticism was published by Jellinek in the first volume of "Bikkurim," a periodical edited by Naphtali Keller.

AARON OF NEUSTADT (surnamed **BLUMLEIN**): Talmudist who with Shallum and Jaekel of Vienna formed a triumvirate of Talmudic scholars in Austria at the end of the fourteenth and beginning of the fifteenth century; uncle and chief instructor of Isserlein, who frequently alludes in his works to the decisions and opinions of his teacher. Jacob Mölln (Maharil) also refers to him and his colleagues. Aaron suffered the death of a martyr, at Vienna, on March 13, 1421. He wrote a digest, "Hilkot Niddah," which is mentioned by Isserlein. A collection of sermons by Aaron is now known only through three citations in the works of Jacob Mölln and of Isserlein.

AARON BEN PEREZ OF AVIGNON: French rabbi and scholar; born about the middle of the thirteenth century; died in the first quarter of the fourteenth century. He was one of the leading scholars of Argentière, Languedoc, France. With other influential members of the congregation of Argentière, he signed an address to Solomon ben Adret during the great anti-Maimonist controversy of 1303-05. The address, with the signatures, can be found in Abba Mari Don Astruc's "Minḥat Ḳenaot," p. 47. This appeal was intended to encourage Abba Mari in his efforts to stem the tide of false doctrines rapidly spreading among the younger scholars.

A. B. D.

AARON OF PINSK: Rabbi in Kretingen, in the government of Kovno, and afterward in Pinsk, where he died in 1841. He wrote "Tosafot Aharon," in which he attempted to solve the questions of the Tosafists in various Talmudic treatises, notably in Zera'im, Mo'ed, and Niddah. The book, which contains also scholastic and cabalistic discourses, was printed in 1858.

Bibliography: Walden, *Shem ha-Gedolim he-Ḥadash*, p. 19, No. 122, Warsaw, 1879; Benjacob, *Oẓar ha-Sefarim*, p. 626.

D.

AARON SABAONI (הסבעוני): Editor of Moses Albaz's cabalistic ritual, "Hekal ha-Ḳodesh," to which he added notes, and which was printed in Amsterdam, 1653. It is conjectured that he was named after the city of Sabbionetta; but in the seventeenth century he resided in Sale, and, with Jacob Sasportas, participated in the condemnation of the followers of Shabbethai Ẓebi for refusing to keep the four chief fast-days, on the ground that the Messiah had already arrived.

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 136.

A. B. D.

AARON BEN SAMUEL: Hebrew author; born about 1620; flourished in Germany during the latter half of the seventeenth century. He published his "Bet Aharon" (Aaron's House) at Frankfort-on-the-Oder in 1690, being at that time of advanced age. This work, which received the approval of the greatest rabbinic authorities of the time, gives the places in the Talmud, the Midrashim, the Zohar, and many other rabbinic and cabalistic works where each verse of the Bible is either cited or explained.

Although Aaron owes much to his predecessors (Aaron of Pesaro, Jacob Sasportas, Manasseh ben Israel, and others), his work, because of its completeness, is a monument of remarkable industry and wide reading. In the introduction he states that he spent ten long years at the work, although assisted by several scholars who lived with him for this purpose. In this introduction Aaron mentions three of his other works, which, however, seem to have been lost: (1) "Sissera Torah," a midrashic commentary on Judges, iv. v.; (2) "Ḥibbur Masora," a midrashic commentary on the Masora, of which he gives several specimens; and (3) "Shaloaḥ Manot," a short commentary on the treatise Megillah.

At the request of his wife, Aaron translated into Judæo-German the Midrash on the death of Moses, "Peṭirat Mosheh Shem 'Olam," Frankfort-on-the-Oder, 1693. This book was very popular with the Jewish women of Poland and Russia, and has gone through many editions. Aaron must have reached a very great age; for in 1701 he published a commentary on "Pereḳ Shirah," which is appended to a prayer-book printed that year in Berlin (see Steinschneider, "Cat. Bodl." Nos. 4000 and 4380).

L. G.

AARON BEN SAMUEL: A simple farmer of Hergershausen (Hessen), who was the first person in Germany to attempt, at the beginning of the eighteenth century, to bring about the use of the vernacular in lieu of the Hebrew in the daily prayers. His "Liebliche Tefilah, oder Greftige Artznei vor Guf un Neshamah" (A Lovely Prayer, or a Tonic for Body and Soul), Frankfort-on-the-Main, 1709, though not the first Judæo-German adaptation of the prayer-book, was original in that it sought to give a literary form to the vernacular version, by amplifying considerably the original text of the prayers. The object of the writer is clearly expressed in the introduction to the book, namely, to bring about the substitution of this Judæo-German version for the Hebrew text in those spheres in which the "Holy Language" was no longer understood. Aaron's attempt failed; for the orthodox Jews protested so vigorously against the innovation that the rabbis throughout the Palatinate placed the book under the ban. And so quickly and so well was the order of the rabbis obeyed, that not a copy of the "Liebliche Tefilah" could be found till about 1830, when large numbers of the work were discovered in the synagogue lofts of Hessen.

J. L. S.

AARON BEN SAMUEL HA-NASI (called also **Abu Aaron ben Samuel ha-Nasi of Babylonia**): A personage who was considered until recently a fictitious creation of the Traditionists (Zunz)—those who, in their desire to find teachers and originators for everything, invented him in order to announce him as the father of prayer-interpretation and mysticism. But the publication of the "Chronicle of Ahimaaz" (written in 1054), by Neubauer, has demonstrated that Aaron is not altogether a creature of the imagination. It is true that legend has far more than history to say about him, and that only the barest outlines of his real career are accessible. Aaron was the son of a high dignitary in Babylonia, a certain Samuel, who, according to R. Eliezer of Worms, was a *nasi* (prince). In the "Chronicle of Ahimaaz" Aaron is said to have been a member of the house of Joab, which means that he was the son of an ab bet din, or chief of the court of justice; since in Jewish legend (Yer. Mak. ii. 31*a*; Tan., Mas'ey, 12) Joab is referred to as the chief justice in the reign of David. Disagreements between father and son, about the middle of the ninth century, caused Aaron to leave home. He traveled through Palestine to Italy, and landing at Gaeta went to Benevento. He did not stay there long, but went to Oria, in southern Italy, the center of Jewish life in Italy at that time. In that place he associated with the learned brothers, Shephatiah and Hananeel, sons of Amittai, under whose fostering influence he taught successfully—a vocation for which his profound knowledge of the Law, acquired in Babylonia, seemed especially to fit him. Aaron's activity bore fruit not only in Italy, but also beyond the borders of that country. Among his pupils were numbered Moses ben Ḳalonymus of Lucca, who, under one of Charlemagne's successors, went to the land of the Franks (Mentz), and there became the spiritual head of the Jews in that country. In spite of his success as a teacher in Italy, Aaron was seized by a secret longing for home; and seeing that the seed which he had carefully sown was bearing fruit, he considered himself entitled to return quietly to the land of his fathers. He embarked at Bari, to the great sorrow of his pupils and friends, among the latter being the ruler of the town, who tried to detain him by force. Nothing further is known of him. The cabalists considered him as one of the chief pillars of their mysticism, ascribing to him the cabalistic works, "Niḳḳud" and "Pardes"; but see Botarel's commentary on Sefer Yeẓirah, i. 1, 5; ii. 4, and Moses Cordovero in his "Pardes Rimonim." That he is considered to be identical with "Aaron the Babylonian" appears from the fact that Botarel (*l.c.* iv. 2) describes the latter as making use of the ineffable name of God in working the most wonderful miracles in exactly the same way as Aaron ben Samuel is said, in the "Chronicle of Ahimaaz," to have done. Graetz's identification of this Aaron with the Aaron who was a candidate for the gaonate in 814—according to Isaac Halevi even earlier—is impossible upon chronological grounds. Aaron's activity in Italy is placed by the "Chronicle" half a century later than this date; in 870 he was still in Italy.

AARON IBN SARGADO: Gaon in Pumbedita and a son of Joseph ha-Kohen. According to the chronicle of Sherira, Sargado officiated from 943 to 960: others declare he died in 942. He was successor to the gaon Hananiah, the father of Sherira. Not of a family of scholars, but an extremely wealthy merchant, he was elevated to the gaonate (presidency of a rabbinical academy) through the influence of his family. Caleb ibn Sargado, the determined opponent of Saadia, who spent 60,000 zuzim ($9,000) in order to bring about the deposition of the gaon of Sura, was probably identical with Aaron, as Harkavy has shown (see "Seder 'Olam Zuṭṭa" in "Anecdota Oxoniensia," ii. 83). Four of Sargado's legal decisions on religious problems are preserved, and are printed in the collection, "Ḥemdah Genuza," Nos. 37–40. One of these, it appears, was the answer to an inquiry from Kairouan. Like his opponent Saadia, Aaron was a Bible commentator, and parts of his commentary are extant in St. Petersburg. Abraham ibn Ezra quotes some of his philosophical sayings.

AARON SELIG BEN MOSES OF ZOLKIEV: Author; flourished in the seventeenth century. He wrote "'Amude Sheba'" (Seven Pillars) containing: (1) Commentaries and glosses on the old and the new Zohar, explaining the foreign words therein; (2) treatises not included in the old Zohar; (3) references where commentaries on the treatises of the old and the new Zohar can be found; (4) similar indications of the book "Tiḳḳunim"; (5) remarks on the style of the Zohar. The work was published at Cracow in 1637.

Rabbinical Career.

AARON WORMS: Chief rabbi of Metz and Talmudist; son of Abraham Aberle; born July 7, 1754, at Geislautern, a small village near Saarbrück (not at Kaiserslautern, as some writers assert); died at Metz, May 2, 1836. He came of a family of rabbis, and was destined for a rabbinical career. He received his early education from his father, Abraham Aberle, and afterward was sent to Metz, the nearest city having a rabbinical college. This institution was directed by Chief Rabbi Loeb Günzburg, with whom Aaron gained such high favor that at the early age of fifteen he was allowed to deliver a lecture on a halakic subject in the synagogue of Metz. Through Günzburg's instrumentality he was appointed in 1777 to the rabbinate of Kriechingen in German Lorraine. Having lived in that town for seven years, he returned to Metz, where, after the death of Loeb Günzburg (June 23, 1785), Aaron was chosen principal of the rabbinical college. For many years he officiated as associate rabbi and deputy chief rabbi, and on June 12, 1832, was unanimously elected chief rabbi. The government confirmed his election, although he had not mastered the French language, as required by the law regulating the appointment of rabbis. Four years later he died, revered and beloved by both the orthodox and the progressive Jews. Aaron was so conservative in his views that even in his practical life he did not acquire a thorough knowledge of the language of his country, and still regarded the Zohar as a sacred book and as the composition of Simeon ben Yoḥai. Nevertheless, he gave expression to opinions that in some measure prepared the way for Jewish reforms.

Attitude Toward the French Revolution.

So greatly was he influenced by the French Revolution that he even dressed himself in the uniform of the National Guard and, to accord with military regulation, removed his beard. Aaron fully realized that the Jews, in receiving rights, had also duties to fulfil; and in a sermon preached during the Revolutionary period, he strongly rebuked the Jews for their aversion to handicrafts, and, as an example for them, apprenticed his son Elijah to an artisan. As a member of the Great Sanhedrin convened by Napoleon, he delivered an impressive address on the "Relations of the Jews to Non-Jews according to Rabbinic Law," in which he demonstrated that the Talmudic opinions concerning the heathen should not be used as guides in the regulation of practical life under the conditions that existed then. Again, in purely Jewish affairs, in questions concerning rites and ceremonies, he showed himself remarkably broad-minded. Upon the occasion of his taking the oath as chief rabbi, administered by the government officials, his hat was handed him to cover himself. He refused it with a smile, saying: "God does not wish to impose upon us the duty of approaching Him bareheaded; but if we do so voluntarily, so much the better!" (compare Lev. R. xxvii. 6). This can not be regarded simply as a *bon mot*; for he did not hesitate publicly to declare himself in accord with the reform tendencies which were then beginning to force their way into the Synagogue.

Reform Tendencies.

Aaron was perhaps the only conservative rabbi of that period who expressed the opinion that it was better to pray in the vernacular than to mutter Hebrew prayers without understanding their meaning. On this ground he refused to join the agitation against the reforms of the Hamburg Temple. His insight into the necessity of a reform in divine service is further shown by his protest against the custom of interrupting the ritual prayers by the insertion of *piyutim*, of whose authors he often spoke derisively. Such a man could not be a friend of superstitious customs, and he made a vigorous stand against them. He looked also with a critical eye upon other customs which he would not regard as obligatory on the mere ground of usage, and more than once he remarked, with an undertone of bitterness, that Moses Isserles (RMA, רמ"א) desired to force all Jewry under the yoke of Polish customs; but he saw no reason why German and French Jews should yield.

Aaron was the author of "Meore Or" (Flashes of Light), Metz, 1789–1830. This work, published anonymously (the author modestly limiting himself to a mere suggestion of his name), is unique of its kind. It contains critical remarks as well as comments on most of the treatises of the Talmud and on a considerable part of the "Shulḥan 'Aruk, Oraḥ Ḥayyim," which exhibit a thoroughly scientific spirit as well as an extraordinary acumen. A Christian admirer of Aaron justly said that half of that work would be sufficient to open the gates of any European academy to its author. In addition to this, Aaron published short notes on the Maḥzor and the Passover Haggadah (Metz editions). With the exception of a Bible commentary which has not been published, Aaron's other numerous manuscripts were destroyed in compliance with his wishes as expressed in his will.

AARON OF YORK (Fil Josce): Jewish financier and chief rabbi of England; born in York before 1190; died after 1253. He was probably the son of Josce of York, the leading figure in the York massacre of 1190. Aaron appears to have obtained some of his father's money and commercial connection, for he was appointed presbyter, or chief rabbi, of the Jews of England in 1237, in succession to Josce of London. This would imply that he was very wealthy, as only the wealthiest of the Jews obtained this position. He did not hold the office more than a year, as he was succeeded in 1237 by Elyas of London (Prynne, "Short Demurrer," ii. 38). In 1236 Aaron agreed to pay to King Henry III. of England 100 marks a year to be free of all taxes (Tovey, "Anglia Judaica," Oxford, 1738, p. 108). Notwithstanding this, in 1273 he was mulcted in 4,000 marks of silver and four of gold (Matthew Paris, "Chronica Majora," iv. 260). This was not an unusual occurrence; for in 1250 he was fined 14,000 marks of silver and ten of gold, for the use of the queen, on the charge of having falsified a deed. On this occasion he told Matthew Paris himself that he had paid the king altogether no less a sum than 30,000 marks in silver and 200 in gold (*ibid.* v. 136). There are still in existence a number of Hebrew *shetaroth* dealing with Aaron's transactions, one of them entirely in his own handwriting.

AARON ZALAHA. See Zalaha, Aaron.

AARON BEN ZERAH: French Jew, who suffered martyrdom at Estella in Navarre, March 5, 1328. Banished from his original home in 1306 by order of King Philip the Fair, of France, who confiscated his property, he sought refuge at Estella, where, after a residence of twenty years, he, his wife, and several of his sons were slaughtered by the Christians. The horrors of that event are described in "Zedah la-Derek," a work written by Aaron's son Menahem, who escaped death.

Bibliography: Grätz, *Gesch. d. Juden*, 2d ed., vii. 312.

L. G.

AARON BEN-ZION IBN ALAMANI: Dayyan, or judge, and prominent Jew of Alexandria in the twelfth century. His family name probably means *al-Umani*, or "the man of Oman" (Judah ha-Levi, "Diwan," ed. Harkavy, p. 180; Steinschneider, "Jew. Quart. Rev." xi. 486). His father, whose name was Joshua, was, it seems, a physician of some repute. It was at Aaron's house that Judah ha-Levi lived while in Alexandria; and the poet is extravagant in the praise of his friend, who, to judge from the titles given him, must have been a man of importance. Two of Ha-Levi's poems are addressed to Aaron: one of them he sent with a letter in rimed prose, which letter is included in the "Diwan." Ha-Levi also mentions Aaron in a letter which he sent from Damietta to Samuel Nagid.

AARONITES (AARONIDES). See COHEN, PRIEST.

AARONSBURG: A post village situated in Haines township, Center county, Pennsylvania, founded by AARON LEVY in 1786, and named for him. In June, 1779, Aaron Levy bought of a Mr. Wetzel a tract in Center county known as the Alexander Grant warranty. Upon this he laid out and planned the town of Aaronsburg, the town plan being recorded at Sunbury on October 4, 1786. A plot of ground known as Aaron's Square was reserved by the founder for public uses, and one of the streets was named Rachel's Way in honor of his wife. On November 16, 1789, Levy gave to the trustees of the Salem Evangelical Church a lot upon which to erect a church and schoolhouse. Aaronsburg is the first town in Pennsylvania (and probably in the United States) that was laid out by and named after a Jew.

A. S. W. R.

AB: The Babylonian name adopted by the Jews for the fifth month of the year, corresponding to part of the modern July and part of August. It always consists of thirty days. The first day of Ab is, according to rabbinical tradition ("Seder 'Olam R." ix.; R. H. 2*b*, 3*a*) and Josephus ("Ant." iv. 4, § 7), the anniversary of the death of Aaron. Concerning the fast on the Ninth and the feast on the Fifteenth, see AB, FIFTEENTH OF, and AB, NINTH OF. The Eighteenth of Ab was once a fast-day because on that day the western light (*ner ma'arabi*; compare Tosef., Soṭah, xiii. 7) of the Temple candelabrum went out in the days of King Ahaz (possibly a reference to one of the Maccabean dynasty). See CALENDAR.

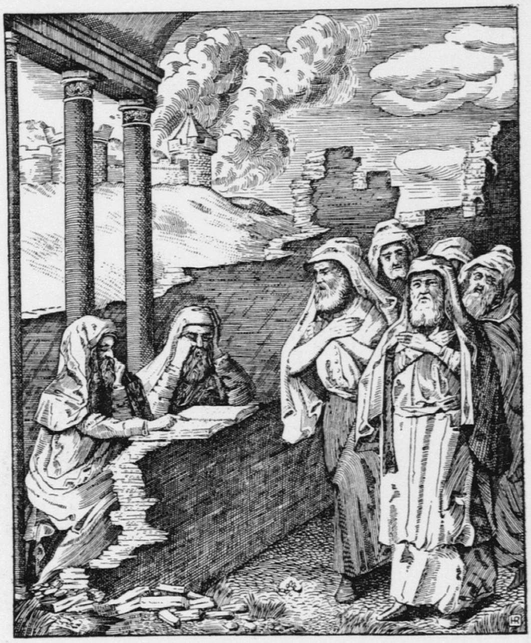
K.

The Fall of Jerusalem.

AB, NINTH DAY OF: Day set aside by tradition for fasting and mourning, to commemorate the destruction of Jerusalem and the Temple by the Chaldeans (586 B.C.) and by the Romans (70); a movable fast falling approximately in the beginning of August of the Gregorian calendar. In II Kings, xxv. 8, 9 it is stated that the Temple was burned on the seventh day of the fifth month; in Jer. xxxix. 8 no exact date is given; while in Jer. lii. 12 the tenth day of the fifth month is assigned as the date. In connection with the fall of Jerusalem three other fast-days were established at the same time as the Ninth Day of Ab: these were the Tenth of Tebet, when the siege began; the Seventeenth of Tammuz, when the first breach was made in the wall; and the Third of Tishri, the day when GEDALIAH was assassinated (II Kings, xxv. 25; Jer. xli. 2). From Zech. vii. 5, viii. 19 it appears that after the erection of the Second Temple the custom of keeping these fast-days was discontinued. Since the destruction of Jerusalem and of the Second Temple by the Romans, the four fast-days have again been observed. It has indeed been suggested that the sacredness of the day is due to its being the anniversary of the fall of Bethar at the end of the Bar Kokba war, thus making it a national rather than a religious ceremony.

Waning Significance.

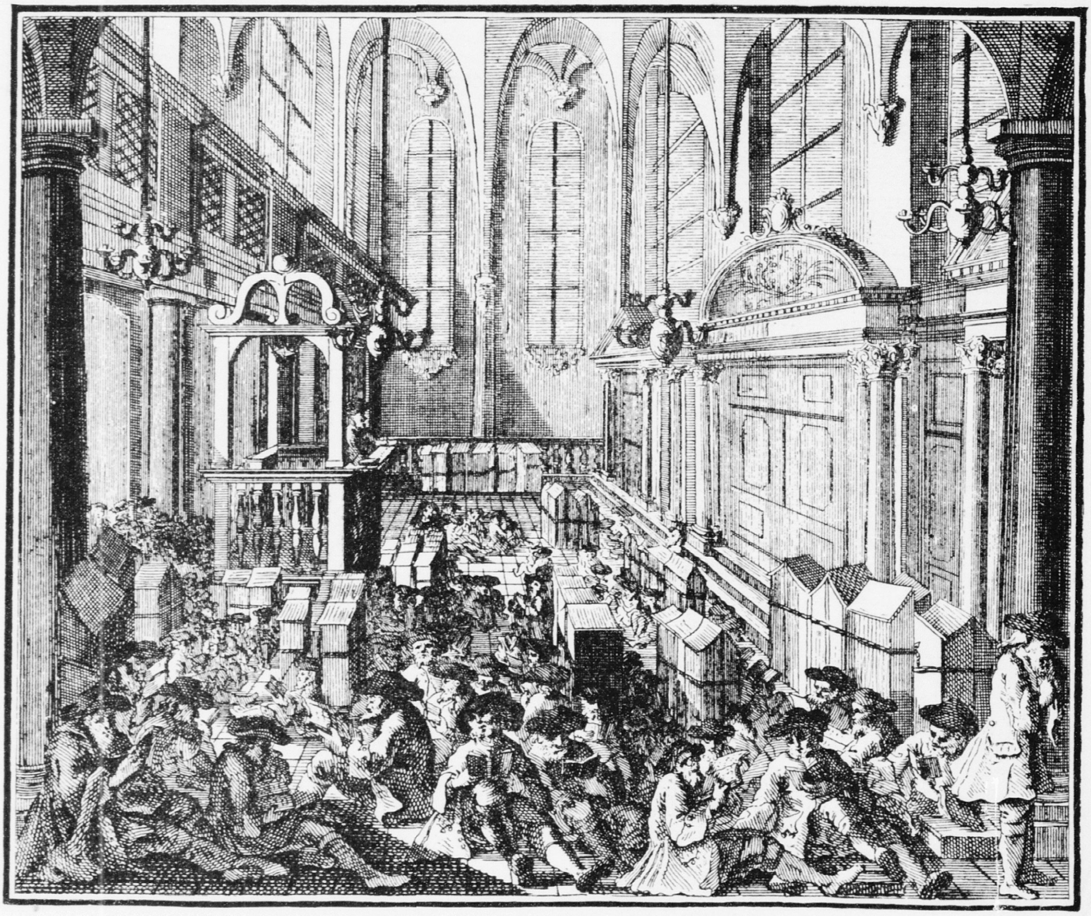
In the long period which is reflected in Talmudic literature the observance of the Ninth Day of Ab assumed a character of constantly growing sadness and asceticism. Still it seems that, about the end of the second century or at the beginning of the third, the celebration of the day had lost much of its gloom. Judah ha-Nasi was in favor of abolishing it altogether or, according to another version, of lessening its severity when the feast has been postponed from Saturday to Sunday (Meg. 5*b*). A tendency to a less ascetic construction is also noticeable in the Talmudic explanation of Zech. viii. 19—namely, that the four fast-days would become feast-days during times of peace; on which Rashi remarks: "Peace means when the oppression of the Jews on account of their religion shall have ceased" (R. H. 18*b*). The growing strictness in the observance of mourning customs in connection with the Ninth Day of Ab is especially marked in post-Talmudic times, and particularly in the darkest period of Jewish life, from the fifteenth century to the eighteenth.



Ninth Day of Ab.
(From Kirchner, "Jüdisches Ceremonial.")

In the Middle Ages.

Maimonides (twelfth century), in his code, says that the restrictions as to the eating of meat and the drinking of wine refer only to the last meal before fasting on the Eighth Day of Ab, if taken after noon, but before noon anything may be eaten (Ta'anit, v. 8). R. Moses of Coucy (thirteenth century) claims that it is the universal custom to refrain from meat and wine during the whole day preceding the Ninth of Ab ("Semag, Hilkot Tish'ah be-Ab," p. 249*b*, ed. Venice). R. Joseph Caro (sixteenth century) says some are accustomed to abstain from meat and wine from the beginning of the week in which the Ninth Day of Ab falls; and still others abstain throughout the three weeks from the Seventeenth of Tammuz ("Shulḥan 'Aruk, Oraḥ Ḥayyim," § 551). The same gradual extension can be traced in the abstention from marrying at this season (*ib.* § 551, 2d annotation by R. Moses Isserles) and in other signs of mourning. So R. Moses of Coucy says that some do not use the phylacteries on the Ninth Day of Ab ("Semag," p. 249*c*), a custom which later was universally observed. In this manner all customs originally designated as marks of unusual piety finally became the rule for all. Shabbethai Ẓebi abolished the Ninth of Ab in view of the same rabbinical legend [and the women in the East anoint themselves in the afternoon, because the Messiah is to be born on this day—L. G.].



Synagogue Service on the Ninth Day of Ab.

(From Bodenschatz, "Kirchliche Verfassung.")

Growth of Commemorative Hymns.

In the liturgy the Book of Lamentations was, through many centuries, recited at the initiatory evening service. "The sorrow for departed glory would probably have been satisfied with these Biblical chapters if new sufferings had not constantly caused the production of fresh plaints" (Zunz, "Ritus," p. 88). Finally, the collection of plaintive songs (Ḳinot) for the day was expanded into an entire volume. Some of these songs are of superior poetic beauty and full of the finest religious sentiment; especially the ode to Zion by Judah ha-Levi. The best of the *ḳinot* were translated by Mrs. H. Lucas in "Jew. Quart. Rev." v. 652, and were reprinted in "The Jewish Year," p. 129; also by Edward G. King in "Jew. Quart. Rev." vii. 464.

As long as the Jews were everywhere regarded as strangers and treated as such, the rights of citizenship being denied them, it was but natural that the Ninth Day of Ab should be observed as a day of deep mourning, and that the season leading up to it should be full of gloom. But even then confidence in the help of God and in the final victory of justice and truth was never lost; and the Sabbath immediately following this day was called "Sabbath of Comfort" (Shabbat Naḥmu), because the comforting message from Isa. xl., beginning with the words "Naḥmu, naḥmu," etc. (Comfort ye, comfort ye, etc.), was then read in the synagogues.

Reform View.

The attitude of modern reformed Judaism toward the Ninth Day of Ab and the event it commemorates is thus expressed by one of its leaders, David Einhorn:

> "Reformed Judaism beholds in the cessation of the sacrificial service the termination of a special nationality and the scattering of the Jews among all nations the fundamental conditions for the fulfilment of their mission among mankind. Only after the destruction of Jerusalem was it possible for Israel to become a kingdom of priests and a holy nation; a conception which even in the Talmud is intimated in the saying, 'On the day of the destruction of the Temple the Messiah was born'" ("Ner Tamid," p. 100).

M. L.

[According to rabbinical tradition (Ta'anit, 29*a*), the real destruction under both Nebuchadnezzar and Titus took place on the Tenth of Ab, the fire-brands having been thrown in the evening before. Josephus ("B. J." vi. 4, § 5) says: "God had doomed the Temple to the fire, according to the destiny of the ages, on that same fatal day, the tenth day of the month Lous (Ab), on which it was formerly burned by the king of Babylon." R. Johanan, the amora of the third century, says (*l.c.*), "If I had been living at the time, I would have instituted the fast on the Tenth rather than on the Ninth of Ab." Indeed, the Karaites celebrate the Tenth of Ab as a fast-day. From the remark of R. Eliezer ben Zadok (Meg. Ta'anit, v. and Bab. Ta'anit, 12*a*) it appears, moreover, that the Ninth of Ab was celebrated as a fast-day before the destruction of the Second Temple. At any rate, the day was marked still more as the day of national gloom in the war of Bar Kokba, when the fall of the fortress of Bethar, in 135, sealed the fate of the Jewish nation forever. The Mishnah (Ta'anit, iv. 4) speaks of five national misfortunes that occurred on the Ninth of Ab, the first one being that night "when the Israelites were doomed to stay in the wilderness" for forty years (Num. xiv. 1 *et seq.*), the second and third the destruction of Jerusalem under Nebuchadnezzar and Titus, the fourth the fall of Bethar, and the fifth misfortune was the drawing of the plow over the Holy City and the Temple a year later, in order to turn the place into a Roman colony (compare Jerome, Zech. viii. 11). Henceforth the Ninth of Ab was like the Day of Atonement, the national fast-day "beginning with the evening before, no enjoyment whatever, whether in the way of eating and drinking or of bathing and anointing, being permitted from evening to evening. Even the study of the Law was to be confined to matters of a sad character (Ta'anit, 30*a*), nor should any work be done on that day." "He who does work on the Ninth of Ab," says Akiba, "will see no blessing in it" (Ta'anit, 30*b*). As an especially noticeable sign of mourning, people were to go about without sandals or shoes. In the course of time the pious Jews would not wear the phylacteries, at least not the one on the head, or the *ṭallit*—some only not during the morning service (see "Yad ha-Ḥazaḳah Hilkot Ta'aniot," v. 11; "Hagahot Maimuni" of Meir of Rothenburg; "Semag," "Roḳeaḥ," and others quoted in "Bet Yosef Ṭur Oraḥ Ḥayyim," 555)—these being regarded as ornaments. In Jerusalem the people recite in the synagogue morning and evening *Haazinu* (Deut. xxxii.) to the Ekah melody, and, after the evening service, the lights are extinguished and the oldest man addresses the assembly in the Spanish language, closing with words of comfort, after which the lights are rekindled. The scroll of the Law as well as the holy shrine is draped in black, and the people have their heads strewn with ashes. In the afternoon the people visit the Wall of Wailing. K.]

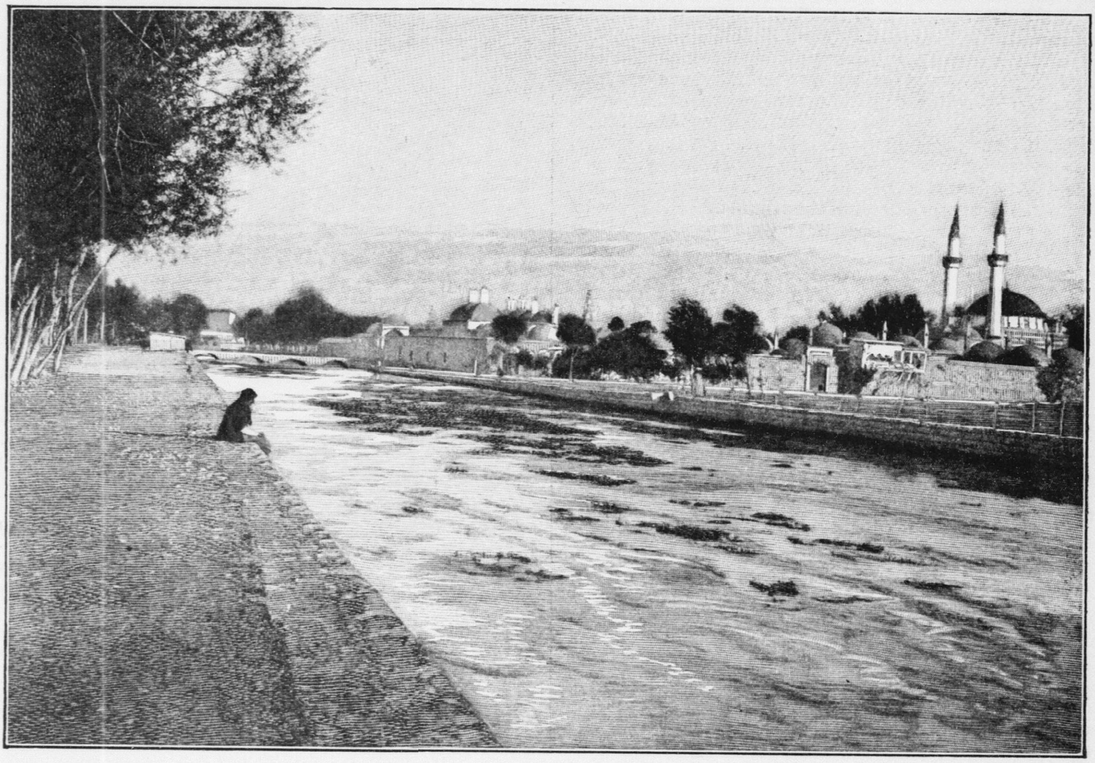
The Ninth Day of Ab.
(Woodcut from Amsterdam "Minhagim," 1768.)

AB, FIFTEENTH DAY OF: Popular festival in Judea during the time of the Second Temple, corresponding approximately to the fifteenth day of August. According to a tradition preserved in the Mishnah (Ta'anit, iv. 9, 10; Gem. pp. 26, 31), on that day, as well as on the Day of Atonement, the maidens of Jerusalem, rich and poor, without exception, dressed in white, went out to dance in the vineyards with the young men, asking them to make their choice of a partner for life. The fair ones sang: "Young men, turn your eyes to beauty; for woman stands for beauty." The patricians' daughters sang: "Young men, turn your eyes to noble parentage; for woman is the preserver of family pride." Those possessing neither beauty nor noble birth sang: "Grace is beautiful and beauty is vain; but a woman that feareth the Lord, she shall be praised." Of the many reasons given in the Talmud for the celebration of this day, that attested by the oldest authority, R. Eliezer ben Hyrcanus of the first century (Megillat Ta'anit, v.) is that



Abana River at Damascus.
(From a photograph by Bonfils.)

it was the great day of wood-offering, when both priests and people brought kindling-wood in large quantities to the altar, for use in the burning of sacrifices during the whole year. This day being Midsummer Day, when the solar heat reached its climax, the people stopped hewing wood in the forest, probably until the Fifteenth Day of Shebaṭ (February), the so-called New-year's Day of the trees (see R. H. i. 1), because the new sap of spring entered vegetation on that day.

Various reasons are given in the Talmud for this celebration. One is that the tribes were allowed to intermarry (Num. xxxvi.) on that day; another, that the interdict on the tribe of Benjamin was removed on that day (Judges, xxi. 15 *et seq.*); again another, that the death penalty following the bad report of the spies (Num. xv. 32) had ceased; or that the interference with the pilgrimage to Jerusalem at the festal season by Jeroboam I. (I Kings, xii. 32) was removed by Hosea on that day. Others, by a strange anachronism, maintain that those slain on the battle-field in the war of Bar Kokba received the customary burial rites on this day. The actual explanation is given in Meg. Ta'anit, v. and Mishnah, iv. 5, according to which nine families of Judah brought at certain times during the year the wood for the burning of the sacrifices on the altar, in accordance with Neh. x. 34; on the Fifteenth Day of Ab, however, all the people, the priests as well as the Levites, took part in the wood-offering.

Josephus ("B. J." ii. 17, § 6) also mentions this festival, and calls it the Feast of Xylophory ("Wood-bearing"), but places it on the Fourteenth of Ab (Lous), saying that "it was the custom for every one to bring wood for the altar on that day so that there should never be any lack of fuel for the eternal fire." Zipser suggested that the day, called also the Day of the Breaking of the Ax, was celebrated by bonfires in the same fashion that the Syrians, according to Lucian, celebrated Midsummer Day ("De Syria Dea"). The festival had a purely secular character, like the Fifteenth Day of Shebaṭ (February), the one being an ancient midwinter, the other a midsummer, festival of pagan origin; while the various explanations and stories given in Megillat Ta'anit and the Talmud show that in the course of time the main reason was forgotten. Compare the St. Valentine's Day celebrations and the bonfires on the hills among the various nations in connection with marriage, and the St. John's Day festivities, in Mannhardt's "Baumkultus," pp. 449–552.

K.

ABADDON ("Realm of Destruction"): In rabbinic and New Testament literature, the second department of Gehenna, the nether world; almost synonymous with Sheol (Midr. Konen; compare Joshua ben Levi in 'Er. 19*a*). In Rev. ix. 11 Abaddon is personified as the Angel of Hell: "And they had a king over them, which is the angel of the bottomless pit, whose name in the Hebrew tongue is Abaddon, but in the Greek tongue hath his name Apollyon." In the Old Testament, however, the word is peculiar to

the "Wisdom" literature, being found in Job, xxviii. 22, xxvi. 6, xxxi. 12; Prov. xv. 11; Ps. lxxxviii. 12. In Prov. xxvii. 20 the Hebrew text has Abaddoh, but the marginal reading has Abaddon.
G. B. L.—K.

ABADIA, JUAN DE LA: A Marano of the fifteenth century. He engaged in a project to subvert the Inquisition in Aragon; failing in this, he joined in a plot to assassinate the inquisitor Pedro Arbues, who was killed on September 15, 1485. Juan was apprehended, and, according to Graetz, committed suicide in prison. Kayserling states that his attempt at suicide was unsuccessful, and that he was drawn, quartered, and consigned to the flames.

Bibliography: Kayserling, *Christopher Columbus and the Participation of the Jews*, etc., pp. 36, 37; Graetz, *History of the Jews*, iv. 329-331.
A.

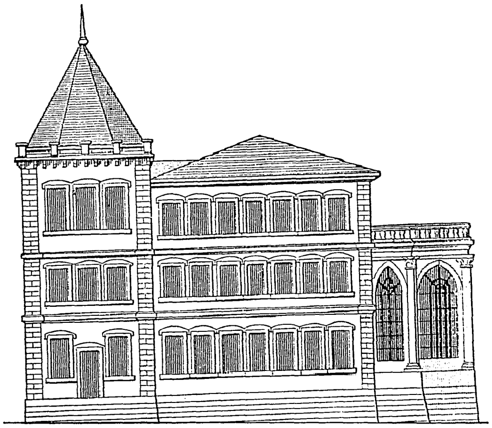
ABADIAS: Son of Jezelus, one of the sons of Joab, found in the list of those who returned with Ezra (I Esd. viii. 35). In the corresponding list of Ezra, viii. 9, he is called Obadiah, the son of Jehiel.
G. B. L.

ABAGTHA: A chamberlain of Ahasuerus (Esth. i. 10). The name is probably of Persian origin.
G. B. L.

ABANA: A river rising in the Anti-Libanus, flowing through Damascus, and disappearing in the Meadow lakes. Reference to it is found only once in the Bible (II Kings, v. 12), in the exclamation of Naaman, "Are not Abana and Pharpar, rivers of Damascus, better than all the waters of Israel?" At the present time it is known as Nahr Barada (see Amana). The proper reading of the name is probably "Amana," as given in the *ḳeri* of II Kings, v. 12. See illustration on opposite page. G. B. L.

ABARBANEL. See Abravanel.

ABARBANEL LIBRARY IN JERUSALEM (מדרש אברבנל): A collection of books intended for a national Jewish library; founded by Dr. Joseph Chazanowicz, one of the Zionist leaders in Russia, who devoted almost the whole of his income to the collection of Hebrew books. In 1900 the library contained more than 15,000 volumes, nearly all of which had been sent from Byelostok, where Dr. Chazanowicz was a practising physician. A movement was on foot in 1900 to build a modern fire-proof library building in which to house the collection, which has become a center for the diffusion of knowledge in the Holy City. Ephraim Cohen was director of the library in 1899.



Elevation of Abarbanel Library.

G.

ABARIM ("The Parts Beyond"; that is, beyond the Jordan).—**Biblical Data:** A term applied to the edge of the Moabite plateau. From its most prominent headland, Mount Nebo, the western part of Judea was plainly visible (Jer. xxii. 20; Num. xxvii. 12, xxiii. 47; Deut. xxxii. 49, and see Ezek. xlix. 11, revised text, "S. B. O. T."). G. B. L.

——**In Rabbinical Literature:** The Midrash remarks that this mountain has four names: Abarim, Hor, Nebo, and the Heights of Pisgah. This is accounted for by the fact that the mountain was situated on the frontiers of four adjoining kingdoms. Since all were proud to have a share in Palestine, each regarded the mountain as belonging to itself and gave it a suitable name (Sifre, Deut. xxxvii; 76*b*, ed. Friedmann). L. G.

ABAYE (called also **Abayi, Abaya, Abbaye**): Babylonian amora; born about the close of the third century; died 339 (see Academies in Babylonia). His father, Kaylil, was the brother of Rabbah bar Naḥmani, a teacher at the Academy of Pumbedita. Abaye's real name was Naḥmani, after his grandfather; but being left an orphan at an early age, he was adopted by his uncle, Rabbah bar Naḥmani, who nicknamed him Abaye ("Little Father"), to avoid confusion with his grandfather of the same name, and thenceforth he was known as Abaye, without any other title. It is a curious fact that he perpetuated the memory of his foster-mother, probably a slave in Rabbah's household, by mentioning her name in many popular recipes and dietetic precepts, some of which seem to be based on superstitious notions. He introduced each recipe with the phrase, "My mother told me." Abaye's teachers were his uncle Rabbah and Joseph bar Ḥama, both of whom successively became presidents of the Pumbedita Academy. When Joseph died (333), this dignity was conferred upon Abaye, who retained it until his death some five years later. Rabbah trained him in the application of the dialectic method to halakic problems, and Joseph, with his stores of traditional lore, taught him to appreciate the value of positive knowledge.

Superior as Abaye no doubt was in his dialectic analysis of halakic sentences, he was, nevertheless, surpassed in this regard by Raba, with whom he had been closely associated from early youth. To the disputations between these amoraim we owe the development of the dialectic method in the treatment of halakic traditions. Their debates are known as the "Hawayot de-Abaye we-Raba" (Debates of Abaye and Raba), the subjects of which were then considered such essential elements of Talmudic knowledge that by an anachronism they were thought to be known to Johanan ben Zakkai, who lived some centuries before (Suk. 28*a*). Their halakic controversies are scattered throughout the Babylonian Talmud. With the exception of six of his decisions, the opinions of Raba were always accepted as final. Abaye was never so happy as when one of his disciples had completed the study of a Mishnah treatise. On such occasions he always gave a feast to his pupils (Shab. 118*b*), though his circumstances were needy, and wine never appeared upon his table. His peace-loving disposition and his sincere piety are well exhibited in his maxims (Ber. 17*a*), among which occur the following: "Be mild in speech; suppress your wrath; and maintain good-will in intercourse with your relatives as well as with others, even with strangers in the market-place."

Abaye urged his disciples to conduct themselves in such a way as to lead others to the love of God (Yoma, 86*a*). In Biblical exegesis he was one of the first to draw a distinct line between the evident meaning of the text (*peshat*) and the sense ascribed to it by midrashic interpretation. He formulated the following rule, of great importance in Talmudic exegesis (Sanh. 34*a*): "One Bible verse can be referred to different subjects, but several different Bible verses can not refer to one and the same subject." He defended the Apocryphal book Ecclesiasticus against his teacher Joseph. By quoting from it a number of edifying passages he showed that it did not belong to the heretical books which are forbidden, and even compelled his teacher to admit that quotations might with advantage be taken from it for homiletical purposes (Sanh. 100*b*). Possessing an extensive knowledge of tradition, Abaye became a most eager disciple of Dimi, the Palestinian amora, who had brought to Babylonia a perfect treasury of interpretations by Palestinian amoraim. Abaye considered Dimi, as a representative of the Palestinian school, a qualified Bible exegete, and used to ask him how this or that Bible verse was explained in "the West," or Palestine. Of his own interpretations of Biblical passages only a few, of a haggadic nature, are preserved; but he often supplements, elucidates, or corrects the opinions of older authorities.

W. B.

ABBA (אבא; 'Αββᾶ).—**In Theology:** The Aramaic word for "Father," "my Father," which, together with the Greek equivalent, occurs three times in the New Testament. It is an invocation to God, expressive of a close personal or filial relation of the speaker to God. It is found in Mark, xiv. 36, the parallel passage, Matt. xxvi. 39, having only the Greek words "my Father." Paul, in Rom. viii. 15 and Gal. iv. 6, shows that, in admitting proselytes to membership in the new faith, they were declared to be the children of God while addressing Him as "Abba, Father." But there is nothing specially Christian about this. It was the formula for addressing God most familiar to Jewish saints of the New Testament times:

> "To Ḥanan, the grandson of Onias, the children came during a great drought, crying, 'Abba [Father], give us rain!' whereupon the saint prayed: 'O Ruler of the world, for the sake of these little ones who can not discriminate between the Abba [the Father] who giveth rain and the Abba [the father] who can only pray for, but can not give, rain, hear my prayer!'—and behold rain came" (Ta'anit, 23*b*).

Of Onias, the grandfather of Ḥanan, we read (Ta'anit, 23*a*) that he prayed to God, saying: "Lord, I am as a son in Thy house, and by Thy great name I beseech Thee, nor will I leave this spot until Thou hast shown mercy to Thy children and granted my request." Then Simon ben Sheṭaḥ, the leader of the Pharisees, said to Onias:

> "I would excommunicate thee for thine irreverent mode of prayer, were it not that before God thou art a privileged son, who sayeth to his father, 'Abba, do this and do that for me,' and the father granteth him whatever he wisheth."

Thus, in Tanna debe Eliyahu R. ix. Elijah addresses the Lord as "My Father in heaven." Compare the expression "My Father in heaven" in a Midrash of the Hadrianic time, Mek., Yithro, 6, and elsewhere. Likewise in Mishnah, v. 1, Bab. Gem. 30*b*, Ber. v. 1: "The ancient Ḥasidim spent an hour in silent meditation before the prayer so as to put their hearts in the right relation to their Father in heaven." Almost the same expression is found in the Apostolic Constitutions, vii. 24:

Father in Prayer.

> "Pray thrice a day, preparing yourselves beforehand, so as to be worthy of being called the children of the Father, lest when you call Him 'Father' unworthily, you be reproached by Him, as Israel, His first-born son, was told, 'If then I be a father, where is mine honor? and if I be a master, where is my fear?' (Mal. i. 6.)"

For the appellation "Father" as it occurs in the Bible with special reference to Israel (Deut. xxxii. 6; Isa. lxiii. 6, lxiv. 7; Jer. iii. 4; Mal. i. 6, ii. 10), see FATHERHOOD OF GOD. For the universal Fatherhood of God, compare Wisdom, ii. 13; Ecclesiasticus, iv. 10; I John, iii. 2; Abot, iii. 28 [18]; Abot, v. 30; Sifre, Deut. 96, 1; Yoma, viii. 9; Tosef., Peah, iv. 21; see also ABINU MALKENU, and Dalman, "Die Worte Jesu," i. 156.

Father in the Apocrypha.

God is called "Father" by Josephus ("Ant." ii. 6, § 8; iv. 8, § 24); "the Father of the whole human race" by Philo ("Sacrifice of Abel," 18, and elsewhere; see Drummond, "Philo," ii. 63; Test. Patriarchs, Judah, 24; Wisdom, xii. 3; Sirach, xxvi. 1 and li. 10; and Tobit, xiii. 4). Still, as is shown by Dalman ("Die Worte Jesu," i. 150–155), the fatherly relation of God to man was only gradually recognized and expressed by the worshiper. In the Book of Wisdom, ii. 16 (compare ii. 13, 18), it is the righteous man only who claims that God is his Father and he His child; or it is the priest, whose holy ministration entitles him to the privilege of addressing God as "Father" (Test. Patriarchs, Levi, xvii. 18). Therefore it became customary to speak of God in connection with worship as the Father of the worshiper (see Tosef., Sanh. vii. 9), "Israelites lift up their eyes to their Father in heaven" (Midr. Teh. cxxi. 1), "Israel was shielded under the wings of his Father in heaven" (Mek., Amalek, i.; R. H. iii. 8). In the first century Joḥanan ben Zakkai referred to "the altar as establishing peace between Israel and his Father in heaven" (Tosef., B. Ḳ. vii. 6, 7); also, when referring to the mysteries of God, he said: "Blessed be the God of Israel for this son of Abraham, who has penetrated into the glories of our Father" (Tosef., Ḥag. ii. 2).

Subsequently Akiba, comforting his people in the misery after the destruction of the Temple, says: "Happy are ye, O Israel, your Fountain of Purification is your Father in heaven" (Yoma, *l.c.*). Likewise Simon ben Yoḥai calls God "the Father in heaven" (Sifre, Deut. xlviii.).

The paternal relation of God, while chiefly applied to Israel as the correct worshipers of God, was also applied to individuals who maintained this spiritual relationship (Soṭah, ix. 15; Ab. v. 20; Mek., Yithro, 6.; Midr. Teh. ix. 4; Ps. xii. 5, xciv. 2, cxxiii. 1). Wherefore the very invocation, "Abinu Malkenu!" (Our Father, our King!), uttered by a devout worshiper, was regarded by the people as endowed with special efficacy. The opinion expressed by Weber ("see Altsynagogale Theologie," p. 150) and others, that Jesus was the first to invoke God by the name of Father, does not rest on a solid foundation, and has already been refuted by Dalman.

K.

ABBA.—As a Prænomen: A word signifying "father," used as a masculine name as early as the time of the Tannaites (see Peah, ii. 6; Yeb. 15*a*; see following article). The name was particularly common among the Amoraim of Palestine and Babylonia. In the latter country Abba, by fusion with the initial R of the title Rab, became Rabba or Raba. In Palestine this was shortened to Ba and Va. For the probable meaning of the name see "Revue des Études Juives," xxxvi. 104. As an inseparable element in names we find Abba, especially in the time of the Tannaites. This word, originally an address of esteem or affection, was closely prefixed to the name proper; for instance, Abba Jose, Abba Saul. The more prominent of those bearing the name of Abba are treated below.
W. B.

ABBA: 1. A brother of Rabban Gamaliel, probably Gamaliel II.; perhaps identical with Abba, a contemporary of Johanan ben Zakkai, mentioned in Peah, ii. 6. Besides Gamaliel's daughter, Abba had at the same time another wife; and when Abba died childless, Gamaliel married his widow, in accordance with the law of levirate marriage (Yeb. 15*a*). Abba's polygamy is the only instance known among the authorities of the Talmudic period. The assertion that he was a member of the Sanhedrin at Jabneh (Chajes, "Rev. Ét. Juives," xxxix. 40 *et seq.*) is based on an impossible conjecture in Tosefta, Sanh. viii. 1.
L. G.

2. A Palestinian amora of Babylonian birth who flourished in the third and fourth centuries. He was a pupil of Huna and Judah, the Babylonian masters, and settled in Palestine, where he achieved a high reputation. In the Babylonian schools Abba is always meant when reference is made to "our teacher in the land of Israel" (Sanh. 17*b*). He was wealthy and had a peculiar method of dispensing charity in secret (Ket. 67*b*). He is important as a halakist. As a haggadist he selected chiefly psalm verses for his texts.

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 517-525.
W. B.

ABBA BAR ABBA: A Babylonian amora of the second and third centuries, distinguished for piety, benevolence, and learning. He is known chiefly through his son Mar Samuel, principal of the Academy of Nehardea, and is nearly always referred to as "Samuel's father." Abba traveled to Palestine, where he entered into relations with R. Judah I., the patriarch, with whose pupil Levi bar Sisi he was on terms of intimate friendship. When Levi died Abba delivered the funeral oration and glorified the memory of his friend.

W. B.

ABBA B. ABINA: An amora who flourished in the third century. He was a native of Babylonia and a pupil of Rab. He emigrated to Palestine, where he became well known in tradition, particularly through his various haggadic sayings. The confession which he composed for the Day of Atonement deserves special mention. It reads:

> "My God, I have sinned and done wicked things. I have persisted in my bad disposition and followed its direction. What I have done I will do no more. Be it Thy will, O Everlasting God, that Thou mayest blot out my iniquities, forgive all my transgressions, and pardon all my sins" (Yer. Yoma, end 45*a*).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 526, 527; Heilprin, *Seder ha-Dorot*, ii. 15.
W. B.

ABBA OF ACRE (Acco): A Palestinian amora who flourished at the end of the third century. He was greatly respected by Abbahu and praised as an example of modesty (Soṭah, 40*a*).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 526.
W. B.

ABBA ARIKA (usually called **RAB**): Celebrated Babylonian amora and founder of the Academy of Sura; flourished in third century; died at Sura in 247. His surname, "Arika" (Aramaic, אריכא; Hebrew, ארך; English, "Long"—that is, "Tall"; it occurs only once—Ḥul. 137*b*), he owed to his height, which, according to a reliable record, exceeded that of his contemporaries. Others, reading "Areka," consider it an honorary title, "Lecturer" (Weiss, "Dor," iii. 147; Jastrow, "Dict." *s.v.*). In the traditional literature he is referred to almost exclusively as Rab the Master (both his contemporaries and posterity recognizing in him a master), just as his teacher, Judah I., was known simply as Rabbi. He is called Rabbi Abba only in the tannaitic literature (for instance, Tosefta, Beẓah, i. 7), where a number of his sayings are preserved. He occupies a middle position between the Tannaim and the Amoraim, and is accorded the right, rarely conceded to one who is only an amora, of disputing the opinion of a tanna (B. B. 42*a* and elsewhere).

Rab was a descendant of a distinguished Babylonian family which claimed to trace its origin to Shimei, brother of King David (Sanh. 5*a*; Ket. 62*b*). His father, Aibo, was a brother of Ḥiyya, who lived in Palestine, and was a highly esteemed scholar in the collegiate circle of the patriarch Judah I. From his associations in the house of his uncle, and later as his uncle's disciple and as a member of the academy at Sepphoris, Rab acquired such an extraordinary knowledge of traditional lore as to make him its foremost exponent in his native land. While Judah I. was still living, Rab, having been duly ordained as teacher—though not without certain restrictions (Sanh. *l.c.*)—returned to Babylonia, where he at once began a career that was destined to mark an epoch in the development of Babylonian Judaism.

Beginning of the Talmudic Age.

In the annals of the Babylonian schools the year of his arrival is recorded as the starting-point in the chronology of the Talmudic age. It was the 530th year of the Seleucidan and the 219th year of the common era. As the scene of his activity, Rab first chose Nehardea, where the exilarch appointed him *agoranomos*, or market-master, and Rabbi Shela made him lecturer (amora) of his college (Yer. B. B.v. 15*a*; Yoma, 20*b*). Thence he removed to Sura, on the Euphrates, where he established a school of his own, which soon became the intellectual center of the Babylonian Jews. As a renowned teacher of the Law and with hosts of disciples, who came from all sections of the Jewish world, Rab lived and worked in Sura until his death. Samuel, another disciple of Judah I., at the same time brought to the academy at Nehardea a high degree of prosperity; in fact, it was at the school of Rab that Jewish learning in Babylonia found its permanent home and center. Rab's activity made Babylonia independent of Palestine, and gave it that predominant position which it was destined to occupy for several centuries.

The method of treatment of the traditional material to which the Talmud owes its origin was established in Babylonia by Rab. That method takes the Mishnah of Judah ha-Nasi as a text or foundation, adding to it the other tannaitic traditions, and deriving from all of them the theoretical explana-

Rab as Teacher.

tions and practical applications of the religious Law. The legal and ritual opinions recorded in Rab's name and his disputes with Samuel constitute the main body of the Babylonian Talmud. His numerous disciples—some of whom were very influential and who, for the most part, were also disciples of Samuel—amplified and, in their capacity as instructors and by their discussions, continued the work of Rab. In the Babylonian schools Rab was rightly referred to as "our great master." Rab also exercised a great influence for good upon the moral and religious conditions of his native land, not only indirectly through his disciples, but directly by reason of the strictness with which he repressed abuses in matters of marriage and divorce, and denounced ignorance and negligence in matters of ritual observance.

Ethical Teaching.

Rab, says tradition, found an open, neglected field and fenced it in (Ḥul. 110*a*). Especial attention was given by him to the liturgy of the Synagogue. He is reputed to be the author of one of the finest compositions in the Hebrew prayer-book, the Musaf service of the New Year. In this noble prayer are evinced profound religious feeling and exalted thought, as well as ability to use the Hebrew language in a natural, expressive, and classical manner (Yer. R. H. i. 57*a*). The many homiletic and ethical (haggadistic) sayings recorded of him show similar ability. As a haggadist Rab is surpassed by none of the Babylonian Amoraim. He is the only one of the Babylonian teachers whose haggadistic utterances approach in number and contents those of the Palestinian haggadists. The Palestinian Talmud has preserved a large number of his halakic and haggadistic utterances; and the Palestinian Midrashim also contain many of his Haggadot. Rab delivered homiletic discourses, both in the college (*bet ha-midrash*) and in the synagogues. He especially loved to treat in his homilies of the events and personages of Biblical history; and many beautiful and genuinely poetic embellishments of the Biblical record, which have become common possession of the Haggadah, are his creations. His Haggadah is particularly rich in thoughts concerning the moral life and the relations of human beings to one another. A few of these utterances may be quoted here:

> "The commandments of the Torah were only given to purify men's morals" (Gen. R. xliv.). "Whatever may not properly be done in public is forbidden even in the most secret chamber" (Shab. 64*b*). "It is well that people busy themselves with the study of the Law and the performance of charitable deeds, even when not entirely disinterested; for the habit of right-doing will finally make the intention pure" (Pes. 50*b*). "Man will be called to account for having deprived himself of the good things which the world offered" (Yer. Ḳid. end). "Whosoever hath not pity upon his fellow man is no child of Abraham" (Beẓah, 32*b*). "It is better to cast oneself into a fiery furnace than publicly to put to shame one's fellow creature" (B. M. 59*a*). "One should never betroth himself to a woman without having seen her; one might subsequently discover in her a blemish because of which one might loathe her and thus transgress the commandment: 'Thou shalt love thy neighbor as thyself'" (Ḳid. 41*a*). "A father should never prefer one child above another; the example of Joseph shows what evil results may follow therefrom" (Shab. 10*b*).

Reproves Extreme Asceticism.

Rab loved the Book of Ecclesiasticus (Sirach), and warned his disciple Hamnuna against unjustifiable asceticism by quoting advice contained therein — that, considering the transitoriness of human life ('Er. 54*a*), one should not despise the good things of this world. To the celestial joys of the future he was accustomed to refer in the following poetic words:

> "There is naught on earth to compare with the future life. In the world to come there shall be neither eating nor drinking, neither trading nor toil, neither hatred nor envy; but the righteous shall sit with crowns upon their heads, and rejoice in the radiance of the Divine Presence" (Ber. 17*a*).

Rab also devoted much attention to mystical and transcendental speculations which the rabbis connect with the Biblical account of creation (Gen. i., Ma'aseh Bereshit), the vision of the mysterious chariot of God (Ezek. i., Ma'aseh Merkabah), and the Divine Name. Many of his important utterances testify to his tendency in this direction (Ḥag. 12*a*, Ḳid. 71*a*).

Status in Life.

Concerning the social position and the personal history of Rab we are not informed. That he was rich seems probable; for he appears to have occupied himself for a time with commerce and afterward with agriculture (Ḥul. 105*a*). That he was highly respected by the Gentiles as well as by the Jews of Babylonia is proved by the friendship which existed between him and the last Parthian king, Artaban ('Ab. Zarah, 10*b*). He was deeply affected by the death of Artaban (226) and the downfall of the Arsacidan dynasty, and does not appear to have sought the friendship of Ardeshir, founder of the Sassanian dynasty, although Samuel of Nehardea probably did so. Rab became closely related, through the marriage of one of his daughters, to the family of the exilarch. Her sons, Mar Ukba and Nehemiah, were considered types of the highest aristocracy. Rab had many sons, several of whom are mentioned in the Talmud, the most distinguished being the eldest, Ḥiyya. The latter did not, however, succeed his father as head of the academy: this post fell to Rab's disciple Huna. Two of his grandsons occupied in succession the office of exilarch (*resh galuta*, Ḥul. 92*a*).

Rab died at an advanced age, deeply mourned by numerous disciples and the entire Babylonian Jewry, which he had raised from comparative insignificance to the leading position in Judaism (Shab. 110*a*, M. Ḳ. 24*a*).

W. B.

ABBA BAR BENJAMIN BAR ḤIYYA, (called also **Abba b. Minyomi** or **Minyomin b. Ḥiyya**): A Palestinian scholar of the third and fourth centuries, contemporary of R. Abbahu. While the country of his birth can not be named with certainty, he was probably born in Babylonia; for he is found there (Ḥul. 80*a*) seeking halakic information from Rab Huna b. Ḥiyya, the son-in-law of R. Jeremiah b. Abba, who lived in Babylonia (Bek. 31*a*) and who was probably the brother of Benjamin b. Ḥiyya, the father of Abba and disciple of Rab Ḥisda, who also lived in Babylonia. Hence, it may be assumed that Abba b. Benjamin was a native of the same country and that he removed to Palestine, where he established himself at Arbela. Here R. Abbahu once visited him (Yer. Shebi'it, vi. 36*d*). In the Palestinian Talmud he is always referred to as Abba b. Benjamin. Twice (Yer. Ber. v. 9*d*, and Yer. Giṭ. v. 47*b*) he is quoted by the name of Abaye b. B.; this, however, is the result of a clerical error, as clearly appears from the reading of the manuscript Syrileio (Yer. Ber. *ad loc.*) and of the parallel passages in the Babylonian Talmud (R. H. 35*a*; Soṭah, 38*b*). In the latter Talmud he is sometimes quoted by the appellation of

b. Benjamin, and sometimes as b. Minyomi or Minyomin (a dialectic form of Benjamin). Hence he should not be confounded with the Abba bar Minyomi who is identical with Abba b. Martha. The Babylonian Talmud, in quoting him, generally adds to his name that of his grandsire Ḥiyya (Ḥul. 80*a*; Yeb. 122*b*), and he may also be recognized by the character of the traditions cited in his behalf, which usually refer to Baraitot.

Bibliography: Heilprin, *Seder ha-Dorot*, ii. 17; Bacher, *Ag. Pal. Amor.* i. 117.

S. M.

ABBA B. BIZNA: A Palestinian amora of the fourth century, who is occasionally mentioned as a haggadist, and as having handed down certain halakic opinions (Yer. B. Ḳ. v. 5*a*).

Bibliography: Heilprin, *Seder ha-Dorot*, ii. 17; Bacher, *Ag. Pal. Amor.* iii. 647.

W. B.

ABBA BUMSLA (BEN SOLOMON). See Bumsla, Abba (Bunzlau, Bohemia).

ABBA OF CARTHAGE: A Palestinian amora, who flourished at the end of the third century. His birthplace was Carthage, and it is incorrect to refer his surname to Cartagena in Spain or to a town of Armenia. He is frequently mentioned in the Jerusalem Talmud and in the haggadic traditions.

Bibliography: Frankel, *Mebo*, p. 66*a*; Bacher, *Ag. Pal. Amor.* ii. 218.

W. B.

ABBA COHEN OF BARDELA: A scholar of the last tannaitic generation (about the beginning of the third century). The few Halakot emanating from him refer to the rabbinical civil law. In Biblical homiletics several of his expositions have been preserved (Sifre, Deut. 2; Gen. R. 23, 76, 93). The last-mentioned passage runs as follows: "Wo to mankind, because of the day of judgment; wo, because of the day of trial! Balaam, the wisest among the Gentiles, was confounded at the reproof of his ass (Num. xxii. 30). Joseph, one of the youngest of Jacob's sons, silenced his elder brethren (Gen. xlv. 3). How will man be able to endure the judgment of the omniscient Lord?" (B. M. 10*a*; Yer. Giṭ. viii. 49*c*; Yer. B. M. i. 7*d*; Yer. B. B. viii. 16*b*).

ABBA DORESH (or **HA-DORESH**; that is, "The Interpreter of Scripture"): A tanna, whose period can not be determined. Two of his interpretations have been preserved in Sifre, Deut. 308 and 352, and refer to Deut. xxxii. 5 and xxxiii. 11, respectively (see also Ex. R. 42).

Bibliography: Bacher, *Ag. Tan.* ii. 547.

W. B.

ABBA (RABBA) BAR DUDAI: Head of the Academy of Pumbedita from 772 till about 780. Sherira Gaon adds to Abba's name the words "our grandfather," which, however, are not meant to indicate that Dudai was an immediate ancestor of Sherira. A copyist's attempt to change the rare name "Dudai" into "Judai" adds to the confusion; for Judai Gaon, the actual grandfather of Sherira, lived a full century later than Dudai.

Bibliography: *First Letter of Sherira Gaon*, in Neubauer's *Mediæval Jew. Chron.* i. 36.

ABBA GLUSK LECZEKA: A poem by Adalbert von Chamisso, published in 1832. It relates the story of one Abba, who, at the age of sixty, attracted by the fame of Moses Mendelssohn, went to Berlin to acquire secular knowledge. In his native town, Glusk, Abba was persecuted by the fanatical representatives of the orthodox Jewish community for his liberal views. He had to leave the town, and traveled from place to place as a wandering preacher (*maggid*). When he came to Wilna, he had thirteen works ready for publication, but on account of their radical tendencies they were burned in the courtyard of the synagogue. Probably he himself would have fared badly had not a rabbi come to his assistance. In an article published in "Ha-Karmel," 1872, No. 5, where a Hebrew translation of Chamisso's poem is given, it is stated that Joshua Selig Saikind in his childhood witnessed the burning of the "Glusker maggid's" books, and that Elijah, the gaon of Wilna, saved him from the mob. Kayserling thinks that Abba Glusk Leczeka is a poetical presentation of Solomon Maimon's real adventures, but S. Stanislavski (in "Voskhod," 1887, No. 12) contends that he is the Glusker Maggid.

Bibliography: Chamisso's *Werke*, ed. Max Koch, pp. 271-278; *Ha-Karmel*, 1872, No. 5, pp. 234 *et seq.*; Kayserling, *Moses Mendelssohn*, p. 431, Leipsic, 1888.

H. R.

ABBA GORION OF SIDON: A tanna, who flourished in the second century. He handed down to posterity a saying of Abba Saul (Mishnah, Ḳid. iv. 14, Yerushalmi version) and one of Rabban Gamaliel II. That of Gamaliel, quoted in the introduction to Esther R., forms the beginning to a Midrash on the Book of Esther, for which reason the latter is called Midrash Abba Gorion (see Midrash).

ABBA ḤANIN and his son, **ABBA JOSE.** See Ḥanin, Abba, and Jose, Abba.

ABBA BAR ḤIYYA B. ABBA: A Palestinian amora, who flourished at the beginning of the fourth century. He was the son of Ḥiyya bar Abba, the well-known pupil of Johanan, and transmitted to his generation the sayings of Johanan, which in their turn had been delivered to him by his father (Yer. Soṭah, ix. 24*c*). He was on terms of intimate friendship with Zeira (Ḥul. 86*b*).

Bibliography: Frankel, *Mebo*, p. 57*a*; Bacher, *Ag. Pal. Amor.* iii. 648.

W. B.

ABBA HOSHAYA (called also **Oshaya, Yeshaya**) **OF TURYA**, or **TRAYA**: A Palestinian wool-washer of the third century, of whose scholarly attainments, if he had any, nothing is recorded, but whose piety and honesty afforded the haggadists opportunities for legends and religious speculations. He is said to have been born on the day of a certain Rabbi Abun's death; and, with reference to this circumstance, R. Abba b. Kahana observes: "What particular wisdom is shown in Solomon's saying (Eccl. i. 5), 'The sun rises, and the sun sets.' Do we not see the alternation of light and darkness daily? The saying refers to a peculiarity in the history of Israel; namely, that there is never a vacancy in the line of pious men: the sun of one saint rises before the sun of another sets. Thus . . . before Rabbi Abun died, Abba Hoshaya had been born" (Gen. R. lviii. 2; Eccl. R. i. 5. Compare Zunz, "G. V.," 2d ed., 185; "Bet Talmud," iv. 12-14). It is related that Abba Hoshaya once found some jewels which a Roman princess had lost. He brought them to her, but she would not accept them, remarking that she did not value them much, and that they belonged to him by right (compare B. M. 28*b*). Abba replied that the Jewish Law orders the restoration to its owner of anything found; whereupon the princess exclaimed, "Praised be the God of the Jews!" (Yer. B. M. ii. 8*c*; compare "Pene Mosheh.") Therefore, at his funeral, the Scriptural verse (Cant. viii. 7), "If a man would give all the substance of his house for love, it would utterly be contemned," was applied to Abba Hoshaya's love of God (Lev. R. 30, Cant. R. to *l.c.*, where "Rabbi" is to be corrected into Abba; Tosef., B. Ḳ. xi. 14; Yer. B. Ḳ. x. 7*c*).

ABBA HUNA HA-KOHEN. See HUNA, ABBA, HA-KOHEN.

ABBA or **RABA (RABBAH) BAR JEREMIAH:** A Babylonian amora of the third century, the son of Jeremiah b. Abba and a pupil of Rab. He lived at Sura and transmitted to his generation the sayings of Rab and Samuel. One of his sayings, several of which are preserved in Palestinian sources, may be here quoted. Prov. ix. 1–3: "Wisdom hath builded her house," etc., refers to the Messianic age. The "house" is the newly erected Temple at Jerusalem; the "seven pillars" are the seven years following the defeat of Gog and Magog, which are indicated in Ezek. xxxix. 9; the "feast" is that described in Ezek. xxxix. 17; and the verse, "She hath sent forth her maidens," etc., means: "The Lord sent forth the prophet Ezekiel with the message to the birds and beasts" (Lev. R. xi.).

ABBA JUDAN (or **JUDAH**): A philanthropist who lived in Antioch in the early part of the second century. As an example of his generosity, it is recorded that once he sold half of his property, already considerably reduced by the demands of charity, to avoid turning away empty-handed Rabbis Eliezer, Joshua, and Akiba, who were collecting donations for educational purposes. The record adds that the blessings conferred upon him by these rabbis bore fruit, for shortly afterward, by a happy accident, he discovered a treasure (Yer. Hor. iii. 48*a*, Lev. R. v. 4). His name was not permitted to fall into oblivion, and for centuries later the name "Abba Judan" seems to have been applied in Palestine to every unusually benevolent man (Lev. R. *l.c.*, Deut. R. iv. 8). It is thus the Jewish parallel to the name Mæcenas which is still applied, two thousand years after the life of its original bearer, to every great patron of art.

L. G.

ABBA ḲOLON: A mythical Roman mentioned in a Talmudic legend concerning the foundation of Rome, which, according to the Haggadah, was a result of the impious conduct of the Jewish kings. According to the legend, the first settlers of Rome found that their huts collapsed as soon as built, whereupon Abba Ḳolon said to them, "Unless you mix water from the Euphrates with your mortar, nothing that you build will stand." Then he offered to supply such water, and for this purpose journeyed through the East as a cooper, and returned with water from the Euphrates in wine-casks. The builders mixed this water with the mortar and built new huts that did not collapse. Hence the proverb, "A city without Abba Ḳolon is not worthy of the name." The newly built city was therefore called "Babylonian Rome" (Cant. R. i. 6).

Probably this legend was intended to show the dependence of the Roman empire upon the natural resources of the East; but it contains a number of points that still remain unexplained. The above-mentioned Roman, or, more properly, Greco-Roman, proverb is just as obscure as the name "Abba Ḳolon," which, originating in some classic word, was distorted by the Jews into "a father of a colony," not without the mental reservation that "Ḳolon" is the Aramaic equivalent of "shame." An attempt has been made to identify the name with that of Deucalion (Krauss, "Lehnwörter," ii. *s.v.*), to which it bears no philological or historical relation. The most probable identification is that by Brüll, who refers to a legend in John Malalas' "Chronicles," p. 301, of a magician named Ablaccon, under the emperor Tiberius. This Ablaccon protected the city of Antioch, by the aid of a rampart of stone, against the overflow of the mountain streams.

ABBA BEN MARI. See RABBA BEN MARI.

ABBA MARI BEN ELIGDOR (called also **Senior Astruc de Noves** or **de Negre**, נגרי, his family name): A distinguished Talmudist, an eminent philosopher, and an able physicist and astronomer; flourished in the fourteenth century in Salonica. In 1335 he was already very old (Samuel of Marseilles, in "Écrivains Juifs," p. 562, according to which the note in "Rev. Ét. Juives," ix. 59, must be corrected). Of the many writings of Abba Mari, who, according to his contemporary, Isaac de Lattes, wrote commentaries on the Pentateuch, Job, parts of the Talmud, and Pirḳe de-Rabbi Eliezer, as well as works on physics, logic, and metaphysics, merely fragments are extant, and these in manuscript only. His commentary on Job is found in several European libraries; it is not a commentary in an exegetical or historical sense, but is full of philosophical disquisitions upon the Biblical theodicy. The existence of Job is doubted by Abba Mari, as by some of the Talmudic rabbis (B. B. 15*a*). He says that, at any rate, the book bearing his name was not written by Job, as some authorities in the Talmud admit, but by Moses. Job's four friends represent in their personalities four different views of evil in the world. Eliphaz, representative of tradition, denies altogether the reality of evil, in agreement with Deut. xxxii. 4. Bildad, on the other hand, does not deny its reality, but holds, as if he had been the loyal disciple of the old rabbis and Motazilites, that God allows the just to suffer here in order to reward them the more in the future life. Zophar, too, considers evil a reality; with the Ascharites, with whom many rabbis agree, he insists on man's ignorance of the divine will, which finite man ought not to investigate. Elihu is of the same opinion as Eliphaz, but with the difference that what Eliphaz accepts as a matter of faith, Elihu demonstrates philosophically. It can thus be seen that Abba Mari was a loyal student of Maimonides, and that, like him, he considered revelation and true philosophy as identical. Whether a philosophical and allegorical commentary on the Song of Songs, in manuscript in the Cambridge and Oxford libraries and ascribed to him, is really his, or should be credited to Moses of Narbonne, with whom Abba Mari is elsewhere confounded, is uncertain. The same doubt holds concerning the Hebrew translation of Gazzali's "Tendencies of Philosophers," which is ascribed to Abba Mari, but possibly also belongs to the aforesaid Moses. But there is no reason for Steinschneider's doubt concerning a Munich manuscript, containing the introduction to the first book of Euclid, with the superscription, "Written by Abba Mari, philosopher and teacher of truth"; it certainly belongs to our Abba Mari, and the words *Abba Mari* are not to be translated "My Lord and Father," for these two words would otherwise have their proper place at the beginning and not at the end of the sentence. Abba Mari also wrote "Refutations," in which he assailed Joseph Caspi's "Book of Secrets." This book, with the exception of a few quotations from it in other writers, has disappeared.

L. G.

ABBA MARI BEN ISAAC OF ST. GILLES: Flourished about the middle of the twelfth century, and lived at St. Gilles, near Lunel, in Languedoc. According to Benjamin of Tudela, who visited the Jewish community of that place, Abba Mari held the office of *bailli* (magistrate) about 1165, having been appointed by Raymond V., who was friendly to the Jews. The monarch made St. Gilles the second capital of his country. That a Jew was in those times chosen to so high an office is a fact of some importance, as it goes far to show the position which the Jews occupied in southern France previous to the war with the Albigenses. The war lasted until 1229. Some scholars pretend to see in this Abba Mari the father of Isaac ben Abba Mari, the author of the "'Iṭṭur." In this work Isaac refers to his father as a prominent Talmudist, from which circumstance it is inferred that the subject of this sketch was not only a high official but also a Talmudic scholar—a deduction which has been completely set aside by Gross.

ABBA MARI BEN JOSEPH IBN CASPI. See Caspi, Abba Mari ben Joseph ibn.

Defender of Law and Tradition.

ABBA MARI BEN MOSES BEN JOSEPH DON ASTRUC (En Astruc) OF LUNEL (Graetz and others have, incorrectly, **En Duran**): Leader of the opposition to the rationalism of the Maimonists in the Montpellier controversy of 1303–1306; born at Lunel—hence his name, Yarḥi (from Yeraḥ = Moon = Lune). He was a descendant of Meshullam ben Jacob of Lunel, one of whose five sons was Joseph, the grandfather of Abba Mari, who, like his son Moses, the father of Abba Mari, was highly respected for both his rabbinical learning and his general erudition. Abba Mari moved to Montpellier, where, to his chagrin, he found the study of rabbinical lore greatly neglected by the young, who devoted all of their time and zeal to science and philosophy. The rationalistic method pursued by the new school of Maimonists (including Levi ben Abraham ben Ḥayyim of Villefranche, near the town of Perpignan, and Jacob Anatoli) especially provoked his indignation; for the sermons preached and the works published by them seemed to resolve the entire Scriptures into allegory and threatened to undermine the Jewish faith and the observance of the Law and tradition. He was not without some philosophical training. He mentions even with reverence the name of Maimonides, whose work he possessed and studied; but he was more inclined toward the mysticism of Naḥmanides. Above all, he was a thorough believer in revelation and in a divine providence, and was a sincere, law-observing follower of rabbinical Judaism. He would not allow Aristotle, "the searcher after God among the heathen," to be ranked with Moses.

Opponent of Rationalism.

Abba Mari possessed considerable Talmudic knowledge and some poetical talent; but his zeal for the Law made him an agitator and a persecutor of all the advocates of liberal thought. Being himself without sufficient authority, he appealed in a number of letters, afterward published under the title of "Minḥat Ḳenaot" (Jealousy Offering), to Solomon ben Adret of Barcelona, the most influential rabbi of the time, to use his powerful authority to check the source of evil by hurling his anathema against both the study of philosophy and the allegorical interpretations of the Bible, which did away with all belief in miracles. Ben Adret, while reluctant to interfere in the affairs of other congregations, was in perfect accord with Abba Mari as to the danger of the new rationalistic systems, and advised him to organize the conservative forces in defense of the Law. Abba Mari, through Ben Adret's aid, obtained allies eager to take up his cause, among whom were Don Bonafoux Vidal of Barcelona and his brother, Don Crescas Vidal, then in Perpignan. The proposition of the latter to prohibit, under penalty of excommunication, the study of philosophy and any of the sciences except medicine, by one under thirty years of age, met with the approval of Ben Adret. Accordingly, Ben Adret addressed to the congregation of Montpellier a letter, signed by fifteen other rabbis, proposing to issue a decree pronouncing the anathema against all those who should pursue the study of philosophy and science before due maturity in age and in rabbinical knowledge. On a Sabbath in September, 1304, the letter was to be read before the congregation, when Jacob Mahir Don Profiat Tibbon, the renowned astronomical and mathematical writer, entered his protest against such unlawful interference by the Barcelona rabbis, and a schism ensued. Twenty-eight members signed Abba Mari's letter of approval; the others, under Tibbon's leadership, addressed another letter to Ben Adret, rebuking him and his colleagues for condemning a whole community without knowledge of the local conditions. Finally, the agitation for and against the liberal ideas brought about a schism in the entire Jewish population in southern France and Spain.

Encouraged, however, by letters signed by the rabbis of Argentière and Lunel, and particularly by the support of Ḳalonymus ben Todros, the nasi of Narbonne, and of the eminent Talmudist Asheri of Toledo, Ben Adret issued a decree, signed by thirty-three rabbis of Barcelona, excommunicating those who should, within the next fifty years, study physics or metaphysics before their thirtieth year of age (basing his action on the principle laid down by Maimonides, "Moreh," i. 34), and had the order promulgated in the synagogue on Sabbath, July 26, 1305. When this heresy-decree, to be made effective, was forwarded to other congregations for approval, the friends of liberal thought, under the leadership of the Tibbonites, issued a counter-ban, and the conflict threatened to assume a serious character, as blind party zeal (this time on the liberal side) did not shrink from asking the civil powers to intervene. But an unlooked-for calamity brought the warfare to an end. The expulsion of the Jews from France by Philip IV. ("the Fair"), in 1306, caused the Jews of Montpellier to take refuge, partly in Provence, partly in Perpignan and partly in Majorca. Consequently, Abba Mari removed first to Arles, and, within the same year, to Perpignan, where he finally settled and disappeared from public view. There he published his correspondence with Ben Adret and his colleagues. K.

His Works.

Abba Mari collected the correspondence and added to each letter a few explanatory notes. Of this collection, called "Minḥat Ḳenaot," there are several manuscript copies extant; namely, at Oxford (Neubauer, "Cat. Bodl. Hebr. MSS.", Nos. 2182 and 2221); Paris, Bibl. Nat. No. 976; Günzburg Libr., St. Petersburg; Parma; Ramsgate Montefiore College Library (formerly Halberstam, No. 192); and Turin. Some of these (Oxford, No. 2221, and Paris, Bibl. Nat.) are mere fragments. The printed edition (Presburg, 1838), prepared by M. L. Bislichis, contains: (1) Preface; (2) a treatise of eighteen chapters on the incorporeality of God; (3) correspondence; (4) a treatise, called "Sefer ha-Yarḥi," included also in letter 58; (5) a defense of "The Guide" and its author by Shem-Ṭob Palquera (Grätz, "Gesch. d. Juden," vii. 173). As the three cardinal doctrines of Judaism, Abba Mari accentuates: (1) That of the recognition of God's existence and of His absolute sovereignty, eternity, unity, and incorporeality, as taught in revelation, especially in the Decalogue; (2) that of the world's creation by Him out of nothing, as evidenced particularly by the Sabbath; (3) that of the special providence of God, as manifested in the Biblical miracles. In the preface, Abba Mari explains his object in collecting the correspondence; and in the treatise which follows he shows that the study of philosophy, useful in itself as a help toward the acquisition of the knowledge of God, requires great caution, lest we be misled by the Aristotelian philosophy or its false interpretation, as regards the principles of *creatio ex nihilo* and divine individual providence, השגחה פרטית. The manuscripts include twelve letters which are not included in the printed edition of "Minḥat Ḳenaot."

Contents of the Minḥat Ḳenaot.

The correspondence refers mainly to the proposed restriction of the study of the Aristotelian philosophy. Casually, other theological questions are discussed. For example, letters Nos. 1, 5, 8 contain a discussion on the question, whether the use of a piece of metal with the figure of a lion, as a talisman, is permitted by Jewish law for medicinal purposes, or is prohibited as idolatrous. In letter No. 131, Abba Mari mourns the death of Ben Adret, and in letter No. 132 he sends words of sympathy to the congregation of Perpignan, on the death of Don Solomon Vidal and Rabbi Meshullam. Letter 33 contains the statement of Abba Mari that two letters which he desired to insert could not be discovered by him. MS. Ramsgate, No. 52, has the same statement, but also the two letters missing in the printed copies. In the "Sefer ha-Yarḥi" Abba Mari refers to the great caution shown by the rabbis of old as regards the teaching of the mysteries of philosophy, and recommended by men like the Hai Gaon, Maimonides, and Ḳimḥi. A responsum of Abba Mari on a ritual question is contained in MS. Ramsgate, No. 136; and Zunz ("Literaturgesch. der Synag. Poesie der Juden," p. 498) mentions a *ḳinah* composed by Abba Mari.

The "Minḥat Ḳenaot" is instructive reading for the historian because it throws much light upon the deeper problems which agitated Judaism, the question of the relation of religion to the philosophy of the age, which neither the zeal of the fanatic nor the bold attitude of the liberal-minded could solve in any fixed dogmatic form or by any anathema, as the independent spirit of the congregations refused to accord to the rabbis the power possessed by the Church of dictating to the people what they should believe or respect. At the close of the work are added several eulogies written by Abba Mari on Ben Adret (who died 1310), and on Don Vidal, Solomon of Perpignan, and Don Bonet Crescas of Lunel.

M. F.—K.

ABBA B. MARTHA (identical with **ABBA B. MINYOMI**, and generally quoted with both appellations; very rarely as **Abba b. Martha** alone, or **Abba b. Minyomi** alone; Beẓah, 22*a*; Giṭ. 29*b*): A Babylonian scholar of the end of the third century and beginning of the fourth. He seems to have been in poor circumstances. Once he incurred a debt to the *resh galuta* (exilarch), which he could not repay, and only by disguising himself did he at the time escape arrest for it (Yeb. 120*a*). Later he was apprehended and sorely pressed for payment; but when the exilarch discovered that his debtor was a rabbinical scholar, he released him (Shab. 121*b*). His mother, Martha, seems to have been in easy circumstances; for, when Abba was bitten by a rabid dog and, in accordance with contemporary therapeutics, was obliged to drink through a tube of copper (compare Brecher, "Das Transcendentale im Talmud," p. 219, note), Martha substituted one of gold (Yoma, 84*a*). Notwithstanding his pecuniary straits, Abba did not take advantage of the Biblical and Talmudic law (Mishnah, Sheb. x. 1), according to which the Sabbatical year cancels all debts. He once owed some money to Rabbah, and paid it in the year of release, using the form of a donation (Giṭ. 37*b*). S. M.

ABBA BAR MEMEL: A Palestinian amora, who lived toward the end of the third century. He belonged to the circle of Ammi at Tiberias, and enjoyed the reputation of a great halakist. In three propositions he limited and rendered practically harmless the application of the Gezerah Shawah, the second of the thirteen hermeneutic rules of R. Ismael, which otherwise might easily have led to arbitrary ritual decisions (Yer. Pes. vi. 33*a*). His proposed reforms were never carried into practise, no other amora having joined him to form a valid legislative body (Yer. M. Ḳ. ii. 81*b*). Among his haggadic passages the most significant is one on the names of God (Ex. R. iii.):

> "God spake to Moses: 'Thou desirest to know My name, I AM THAT I AM (Ex. iii. 14). That is, I am called according to my revealed activities. When I am judging mankind, I am called *Elohim*; when I am going out to war against the wicked, I am called *Zebaot*; when I am holding judgment in suspense over the sins of men, I am called *El Shaddai*; when showing mercy to the world, I am called YHWH, because this name denotes the quality of mercy in God' (Ex. xxxiv. 6)."

W. B.

ABBA NASIA (נשיא), **JOSEPH:** Chief justice in Majorca, 1405; died, 1439.

Bibliography: Zunz, *Zur Gesch. und Literatur*, p. 517.

G.

ABBA BAR PAPPAI (or **PAPA**): A Palestinian amora, of the fourth century who died 375. As the second link in the transmission by tradition of

Levi's haggadic sayings, he is generally mentioned together with Joshua of Siknin, who was the first link (Yer. Ber. iv. 7*b*; Yer. Bik. ii. 64*c*; Yer. Yoma, iv. 41*b*). He addressed halakic questions to Jose and Mani the son of Jonah, who in turn placed halakic problems before him (Yer. Shab. iii. 5*d*).

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 650, 651; Frankel, *Mebo*, p. 58*a*.

W. B.

ABBA SAKḲARA (or **SIḲRA** *): Insurrectionary leader; lived in the first century in Palestine. According to Talmudic accounts (Giṭ. 56*a*), he took a very prominent part in the uprising against Rome in 70, being then at the head of the Zealots at Jerusalem. He was the nephew of Johanan ben Zakkai, at that time leader of the Peace party. After the Zealots had destroyed all storehouses, thus causing a famine in the besieged city, Johanan ben Zakkai invited Abba to an interview and asked him: "Why do you act in such a manner? Will you kill us by famine?" Abba replied: "What shall I do? If I tell them anything of the kind, they will slay me." Thereupon Johanan said to him: "Try and invent for me some possibility of escape so that I may be able to save something out of the general wreck." Abba complied with the request; and the Talmud gives a full account of the device by which he enabled his uncle to flee to the Romans.

The historical character of this account is not beyond doubt, and it is especially surprising that Josephus knows nothing of Abba as leader of the Zealots. The fact that Josephus does not mention him, can not, however, be accepted as a sufficient proof against the Talmudic account, for he ignores also Johanan ben Zakkai, one of the most important and influential men at the time of the destruction of the Second Temple. Purely personal motives may have actuated the vainglorious historian to ignore both uncle and nephew. There exists, however, a Midrash which tends to show that there is at least a grain of truth in his account. In Eccl. R. vii. 11 it is related: "There was at Jerusalem a certain Ben Baṭiaḥ, a nephew of Johanan ben Zakkai, who was in charge of the storehouses, which he destroyed by fire" (see also Kelim, xvii. 12; Tosef., Kelim, vii. 2, and the article Ben Baṭiaḥ).

This account is quite independent of that in the Talmud, since they differ not only with regard to the names, but also materially; for, whereas the Talmudic account states that Johanan escaped from Jerusalem by the aid of his nephew, it is related in the Midrash that he barely escaped death at the hands of his nephew. It might, therefore, be assumed that there existed a third and older source from which both the Talmudic and midrashic accounts were derived, and also that the traditions thus handed down underwent some change in the course of transmission.

Bibliography: Rapoport, *'Erek Millin*, pp. 1-2, 257; Derenbourg, *Essai*, p. 280; *Lam. R.*, ed. Buber, p. 66. All three hold that "Abba Saḳḳara" of the *Bab. Talmud* is a misinterpretation of the Palestinian "Rosh Kisrin" or "Rosh Sikrin" (Head of the Sicarii). But Abba can not be used in this sense in Aramaic. Besides, the *Bab. Talmud* itself renders "Rosh Sikrin" with "Resh Baryone."

L. G.

ABBA SAUL BEN BOTNIT. See Saul, Abba b. Botnit.

ABBA SAUL. See Saul, Abba.

ABBA OF SIDON: A Palestinian amora of the latter part of the third century or the early part of the fourth. He is mentioned only once, as a transmitter of a haggadic saying of Samuel b. Naḥman (Midr. Sam. xxiii.; Eccl. R. vii. 1).

W. B.

ABBA THE SURGEON (UMANA): Mentioned in the Talmud as an example of genuine Jewish piety and benevolence (Ta'anit, 21*b et seq.*). Although dependent upon his earnings, he was so unselfish and considerate that, in order to avoid embarrassing the poor among his patients, he would never accept pay directly from any one, but instead attached to a certain part of his house a box in which each might place what he pleased. Abba's confidence in humanity was once tested by two young disciples in a remarkable manner. Having lodged with him one night, in the morning they took the mattresses upon which they had slept and offered them to him for sale at his own price. He recognized his own property, but, rather than abash the young men by reclaiming it, he excused their peculiar conduct in his mind on the plea that they certainly must need the money for a benevolent object. When the joke was explained to him, he refused to take back the amount paid, on the ground that, in his heart, he had dedicated it to a charitable purpose. Of Abba the legend is told (Talmud, *l.c.*) that he daily received greetings from heaven, whereas Abaye, 280-339, the greatest Talmudic authority of that age, was deemed worthy of divine notice once a week only.

L. G.

ABBA (BA) BAR ZABDAI: A Palestinian amora, who flourished in the third century. He studied in Babylonia, attending the lectures of Rab and Huna, and subsequently settled at Tiberias, where he occupied a respected position by the side of Ammi and Assi. Mention is made of his custom of saying his prayers in a loud voice (Yer. Ber. iv. 7*a*). Of his haggadic productions there exists, among others, a sermon for a public fast-day, on Lam. iii. 41 (Yer. Ta'anit, ii. 65*a*), from which the following may be quoted: "Is it, then, possible to 'lift up our heart with our hands'? This verse is intended to advise us 'to put our heart — our bad inclinations — in our hands,' in order to remove them, and then to turn to God in heaven. As long as a man holds an unclean reptile in his hand, he may bathe in all the waters of creation, but he can not become clean: let him throw it away and he is purified."

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 533, 535; Frankel, *Mebo*, pp. 66*a*, 67.

W. B.

ABBA BAR ZEBINA (or **ZEMINA**): A Palestinian amora of the fourth century. He was a pupil of R. Zeira, in whose name he transmitted many sayings. He was employed in Rome as a tailor in the house of a Gentile who, under the threat of death, tried to force him to break the dietary laws. Abba, however, steadfastly refused to yield to this, and showed so much courage that the Roman admiringly exclaimed: "If you had eaten, I should have killed you. If you be a Jew, be a Jew; if a heathen, a heathen!" (Yer. Sheb. iv. 35*a et seq.*).

Tanḥuma b. Abba relates another anecdote concerning a pious tailor at Rome (Gen. R. xi.), who bought the most expensive fish; this anecdote may refer to our Abba bar Zebina (but see Shab. 119*a*, where the same story is told of Joseph, "the reverer of the Sabbath").

---

* With regard to the appellation Saḳḳara, which means "the dyer," it may be remarked that both the first edition and the Benveniste edition of the Talmud have the word without ׳ (*yod*), which seems to forbid the reading "Sikra" and the connecting of this name with the revolutionary party name of the Sicarii (see Sicarii).

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 651, 652; Frankel, *Mebo*, pp. 56*a*, 57.

W. B.

ABBAHU: A celebrated Palestinian amora of the third amoraic generation (about 279–320), sometimes cited as R. Abbahu of Cæsarea (Ḳisrin). His rabbinic education was acquired mainly at Tiberias, in the academy presided over by R. Johanan, with whom his relations were almost those of a son (Yer. Ber. ii. 4*b*; Giṭ. 44*b*; B. B. 39*a*). He frequently made pilgrimages to Tiberias, even after he had become well known as rector of the Cæsarean Academy (Yer. Shab. viii. 11*a*; Yer. Pes. x. 37*c*). He was an authority on weights and measures (Yer. Ter. v. 43*c*). He learned Greek in order to become useful to his people, then under the Roman proconsuls, that language having become, to a considerable extent, the rival of the Hebrew even in prayer (Yer. Soṭah, vii. 21*b*); and, in spite of the bitter protest of Simon b. Abba, he also taught his daughters Greek (Yer. Shab. vi. 7*d*; Yer. Soṭah, ix. 24*c*; Sanh. 14*a*). Indeed, it was said of Abbahu that he was a living illustration of the maxim (Eccl. vii. 18; compare Targum), "It is good that thou shouldest take hold of this [the study of the Law]; yea, also from that [other branches of knowledge] withdraw not thine hand: for he that feareth God shall come forth of them all" (Eccl. R. to vii. 18).

Knowledge of Greek Literature.

Being wise, handsome, and wealthy (B. M. 84*a*; Yer. B. M. iv. 9*d*), Abbahu became not only popular with his coreligionists, but also influential with the proconsular government (Ḥag. 14*a*; Ket. 17*a*). On one occasion, when his senior colleagues, Ḥiyya b. Abba, Ammi, and Assi, had punished a certain woman, and feared the wrath of the proconsul, Abbahu was deputed to intercede for them. He had, however, anticipated the rabbis' request, and wrote them that he had appeased the informers but not the accuser. The witty enigmatic letter describing this incident, preserved in the Talmud (Yer. Meg. iii. 74*a*), is in the main pure Hebrew, and even includes Hebrew translations of Greek proper names, to avoid the danger of possible exposure should the letter have fallen into the hands of enemies and informers (compare 'Er. 53*b*). After his ordination he declined a teacher's position, recommending in his stead a more needy friend, R. Abba of Acre (Acco), as worthier than himself (Soṭah, 40*a*). He thereby illustrated his own doctrine that it is a divine virtue to sympathize with a friend in his troubles as well as to partake of his joys (Tan., Wa-yesheb, ed. Buber, 16). Later he assumed the office of rector in Cæsarea, the former seat of R. Hoshaya I., and established himself at the so-called Kenishta Maradta (Insurrectionary Synagogue; Yer. Naz. vii. 56*a*; Yer. Sanh. i. 18*a*; compare Josephus, "B. J." ii. 14, § 5; Jastrow, "Dict." p. 838), whence some of the most prominent teachers of the next generation issued. He did not, however, confine his activity to Cæsarea, where he originated several ritualistic rules (Yer. Dem. ii. 23*a*, R. H. 34*a*), one of which—that regulating the sounding of the *shofar*—has since been universally adopted, and is referred to by medieval Jewish casuists as "Takkanat R. Abbahu" (the Enactment of R. Abbahu; compare "Maḥazor Vitry," Berlin, 1893, p. 355). He also visited and taught in many other Jewish towns (Yer. Ber. viii. 12*a*; Yer. Shab. iii. 5*c*).

Rector in Cæsarea.

While on these journeys, Abbahu gathered so many Halakot that scholars turned to him for information on mooted questions (Yer. Shab. viii. 11*a*; Yer. Yeb. i. 2*d*). In the course of these travels he made a point of complying with all local enactments, even where such compliance laid him open to the charge of inconsistency (Yer. Ber. viii. 12*a*; Yer. Beẓah, i. 60*d*). On the other hand, where circumstances required it, he did not spare even the princes of his people (Yer. 'Ab. Zarah, i. 39*b*). Where, however, the rigorous exposition of laws worked hardship on the masses, he did not scruple to modify the decisions of his colleagues for the benefit of the community (Shab. 134*b*; Yer. Shab. xvii. 16*b*; Yer. M. Ḳ. i. 80*b*). As for himself, he was very strict in the observance of the laws. On one occasion he ordered some Samaritan wine, but subsequently learning that there were no longer any strict observers of the dietary laws among the Samaritans, with the assistance of his colleagues, Ḥiyya b. Abba, Ammi, and Assi, he investigated the report, and, ascertaining it to be well founded, did not hesitate to declare the Samaritans, for all ritualistic purposes, Gentiles (Yer. 'Ab. Zarah, v. 44*d*; Ḥul. 6*a*).

R. Abbahu's chief characteristic seems to have been modesty. While lecturing in different towns, he met R. Ḥiyya b. Abba, who was lecturing on intricate halakic themes. As Abbahu delivered popular sermons, the masses naturally crowded to hear him, and deserted the halakist. At this apparent slight, R. Ḥiyya manifested chagrin, and R. Abbahu hastened to comfort him by comparing himself to the pedler of glittering fineries that always attracted the eyes of the masses, while his rival was a trader in precious stones, the virtues and values of which were appreciated only by the connoisseur. This speech not having the desired effect, R. Abbahu showed special respect for his slighted colleague by following him for the remainder of that day. "What," said Abbahu, "is my modesty as compared with that of R. Abba of Acre (Acco), who does not even remonstrate with his interpreter for interpolating his own comments in the lecturer's expositions." When his wife reported to him that his interpreter's wife had boasted of her own husband's greatness, R. Abbahu simply said, "What difference does it make which of us is really the greater, so long as through both of us heaven is glorified?" (Soṭah, 40*a*). His principle of life he expressed in the maxim, "Let man ever be of the persecuted, and not of the persecutors; for there are none among the birds more persecuted than turtle-doves and pigeons, and the Scriptures declare them worthy of the altar" (B. Ḳ. 93*a*).

Abbahu and Ḥiyya b. Abba.

R. Abbahu, though eminent as a halakist, was more distinguished as a haggadist and controversialist. He had many interesting disputes with the Christians of his day (Shab. 152*b*; Sanh. 39*a*; 'Ab. Zarah, 4*a*). Sometimes these disputes were of a jocular nature. Thus, a heretic bearing the name of Sason (=Joy) once remarked to him, "In the next world your people will have to draw water for me: for thus it is written in the Bible (Isa. xii. 3), 'With joy shall ye draw water.'" To this R. Abbahu replied, "Had the Bible said 'for joy' [*le-sason*], it would mean as thou sayest; but since it says 'with joy' [*be-sason*], it means that we shall make bottles of thy hide and fill them with water" (Suk. 48*b*). These controversies, though forced on him, provoked resentment; and it is even related that his physician, Jacob the Schismatic (*Minaah*), was slowly poisoning him, but R. Ammi and R. Assi discovered the crime in time ('Ab Zarah, 28*a*).

Abbahu had two sons, Zeira and Ḥanina. Some writers ascribe to him a third son, Ȧbimi (Bacher, "Ag. Pal. Amor."). Abbahu sent Ḥanina to the academy at Tiberias, where he himself had studied; but the lad occupied himself with the burial of the dead, and on hearing of this, the father sent him a reproachful message in this laconic style: "Is it because there are no graves in Cæsarea (compare Ex. xiv. 11) that I have sent thee off to Tiberias? Study must precede practise" (Yer. Pes. iii. 30*b*). Abbahu left behind him a number of disciples, the most prominent among whom were the leaders of the fourth amoraic generation, R. Jonah and R. Jose. At Abbahu's death the mourning was so great that it was said, "Even the statues of Cæsarea shed tears" (M. Ḳ. 25*b*; Yer. 'Ab. Zarah, iii. 42*c*).

There are several other Abbahus mentioned in the Talmudim and Midrashim, prominent among whom is Abbahu (Abuha, Aibut) b. Ihi (Ittai), a Babylonian halakist, contemporary of Samuel and Anan ('Er. 74*a*), and brother of Minyamin (Benjamin) b. Ihi. While this Abbahu repeatedly applied to Samuel for information, Samuel in return learned many Halakot from him (Naz. 24*b*; B. M. 14*a*, 75*a*; see Benjamin b. Ihi).

S. M.

["When does your Messiah come?" a Christian (Minaah) once asked Abbahu in a tone of mockery; whereupon he replied: "When you will be wrapped in darkness, for it says, 'Behold, darkness shall cover the earth, and gross darkness the nations; then shall the Lord rise upon thee and His glory shall be seen on thee' [Isa. lx. 2]," (Sanh. 99*a*). A Christian came to Abbahu with the quibbling question: "How could your God in His priestly holiness bury Moses without providing for purificatory rites, yet oceans are declared insufficient?" (Isa. xl. 12). "Why," said Abbahu, "does it not say, 'The Lord cometh with fire'?" (Isa. lxvi. 15). "Fire is the true element of purification, according to Num. xxi. 23," was his answer (Sanh. 39*a*). Another question of the same character: "Why the boastful claim: 'What nation on earth is like Thy people Israel' (II Sam. vii. 23), since we read, 'All the nations are as nothing before Him'?" (Isa. xl. 17), to which Abbahu replied: "Do we not read of Israel, he 'shall not be reckoned among the nations'?" (Num. xxiii. 9, Sanh. as above). Abbahu made a notable exception with reference to the Tosefta's statement that the Gilionim (Evangels) and other books of the Minæans are not to be saved from a conflagration on Sabbath (Shab. 116*a*); "the books of those at Abidan may be saved." Of special historical interest is the observation of Abbahu in regard to the benediction "Baruk Shem Kebod Malkuto" (Blessed be the Name of His glorious Kingdom) after the "Shema' Yisrael," that in Palestine, where the Christians look for points of controversy, the words should be recited aloud (lest the Jews be accused of tampering with the unity of God proclaimed in the Shema'), whereas in the Babylonian city of Nehardea, where there are no Christians, the words are recited with a low voice (Pes. 56*a*). Preaching directly against the Christian dogma, Abbahu says: "A king of flesh and blood may have a father, a brother, or a son to share in or dispute his sovereignty, but the Lord saith, 'I am the Lord thy God! I am the first; that is, I have no father, and I am the last: that is, I have no brother, and besides me there is no God; that is, I have no son'" (Isa. xliv. 6; Ex. R. 29). His comment on Num. xxiii. 19 has a still more polemical tone: "God is not a man that he should lie; neither the son of man, that he should repent. If a man say, 'I am God,' he lieth, and if he say, 'I am the son of man,' he will have to repent, and if he say, 'I shall go up to heaven,' he will not do it, nor achieve what he promises" (Yer. Ta'anit, ii. 65*b*).

Some of his controversies on Christian theological subjects, as on Adam (Yalḳ., Gen. 47), on Enoch (Gen. R. 25), and on the resurrection (Shab. 152*b*), are less clear and direct (see Bacher, "Ag. Pal. Amor." ii. 97, 115-118).

K.]

ABBAS: This name does not appear in the long lists of Jewish names in pre-Islamic Arabia, nor does it occur among the Jews in general until the twelfth century. This shows that there is not much evidence to support the theory that the name was used as an Arabic equivalent of Judah ("Lion"). The correct meaning of Abbas is "man of stern countenance," the term "lion" being merely secondary.

Bibliography: Steinschneider, *Jew. Quart. Rev.* xi. 332.

ABBAS (ABAS), AARON: Editor and printer at Amsterdam, at the beginning of the eighteenth century. He was the publisher of two works: (1) Aaron Peraḥyah's responsa, known under the name of "Peraḥ Maṭṭeh Aharon" (Amsterdam, 1703), the title-page of which is adorned with artistic woodcuts representing scenes from the life of the high priest Aaron. The book contains, in the nature of a preface, a dedicatory epistle, by Azriel ha-Kohen Peraḥyah, addressed to Isaac Emanuel Belmonte and Solomon Curiel. (2) The Talmudic treatise Ḥagigah (Amsterdam, 1706), which seems to have formed part of an attempted complete edition of the Babylonian Talmud by various editors. See Abbas, Raphael ben Joshua.

ABBAS, JOSEPH: Copyist of "MS. Kauffmann," No. 45; lived at the end of the seventeenth century.

H. Hir.

ABBAS, JUDAH IBN, OF FEZ: A poet, and author of the *piyyuṭ* "'Et Sha'are Raẓon." He was the first Jew known by the name of Abbas: died at Mosul in 1163. His Arabic name was Abu al-Baga ibn Abbas al-Maghribi. Alḥarizi (Taḥkemoni, Mak. iii.) states that Judah left the Maghreb and went to the East, where he lived now in Bagdad, and now in Aleppo, and that he had a son who was refractory. Judah is evidently identical with the father of Samuel, who became a convert to Islam, and who speaks of his father as Judah b. Abun. The latter is mentioned in the "Poetics" of Moses ibn Ezra. He is said to have been a friend of Judah ha-Levi. The collector of Ha-Levi's "Diwan" has preserved one of the poems of Judah which called forth an answer from Ha-Levi.

ABBAS, JUDAH B. SAMUEL BEN: A Spaniard of the thirteenth century. This form of his name is authenticated in the headings of his two works in "MS. Loewe," viii.; namely, (*a*) "Minḥat Yehudah," a fragment of two leaves only, also styled "Mekor Ḥayyim" (Source of Life). Under the latter title the work is quoted in (*b*) "Yair Netib," also styled "Shebet Yehudah." Judah affirms that he composed this work at the age of twenty. It is of a moral and religious character. The fifteenth chapter contains a complete system of studies arranged according to pedagogical principles. It has been translated from the Bodleian manuscript by M. Güdemann, "Jüd. Unterrichtswesen," i. 147. Commencing with the reading and interpretation of the Bible, he would have the child study, in regular order, morals, medicine, arithmetic, logic, physics, and, as the very last subject, metaphysics.

ABBAS, MOSES: A name borne by several persons of whom the following three are mentioned in Zunz ("Literaturgesch." p. 342): **1.** Moses Abbas flourished about 1400 and carried on a correspondence with the Provençal poet Solomon Bonfed, who dedicated several poems to him. Isaac ben Sheshet mentions him as the pupil of Ḥisdai ben Solomon. **2.** Moses ben Jacob Abbas of Tyre, physician and poet; flourished in the second half of the sixteenth century. About 1578 he addressed a poem to the poet Saadia Longo in Salonica. **3.** Moses Judah Abbas, of Hebron; lived about 1660.

Bibl.* xiv. 79; De Rossi, *Dizionario Storico* (German ed.), p. 1.

H. H.

ABBAS, MOSES JUDAH: A Hebrew poet; lived about the middle of the seventeenth century at Rosetta, in Egypt. He was a descendant of the Abbas family, whose poetic bent continued to manifest itself even when the neo-Hebrew poetry was on the decline. Moses Judah Abbas ben Meir (this is his full name according to Pollak) was also eminent as a Talmudist. He left a commentary on the Talmudic treatises Kallah, Soferim, and Semaḥot, which were in the possession of Azulai, and several responsa, which still exist in manuscript in the Bodleian collection.

L. G.

ABBAS (ABAS), RAPHAEL BEN JOSHUA: Printer and editor at Amsterdam; contemporary, and undoubtedly a relative, of Aaron Abbas. He supplemented the work of Aaron Abbas by publishing the other book of Aaron Peraḥyah, "Pirḳe Kehunah" (Amsterdam, 1709). He is probably identical with the Raphael b. Joshua de Palacios (whose name Steinschneider transcribes "di Palasios"), coeditor with Samuel ben Solomon Marques (Steinschneider, "Marches," "Markis") of the treatise 'Erubin (Amsterdam, printing-office of Immanuel Benveniste, 1716). This edition bears the stamp of approval of the censor Marcus Marinus.

W. M.

ABBAS (ABAS, ABATZ), SAMUEL B. ISAAC: Rabbi in the latter half of the seventeenth century at Amsterdam, where his death occurred about 1693. He translated into Portuguese, from the Hebrew version of Ibn Tibbon, Baḥya's "Ḥobot ha-Lebabot" (Amsterdam, 1670), which gave to this widely circulated work a decided accession of popularity among the Sephardic communities of western Europe. This translation, apart from the language, does not differ greatly from the Judæo-Spanish and Spanish versions existing at the time of its appearance.

Abbas was the possessor of a valuable collection of books in Hebrew, Spanish, Portuguese, and Latin. A thirty-page catalogue of the collection, printed in Amsterdam, appeared in the year of his death.

W. M.

ABBAS, SAMUEL ABU NASR IBN: A son of Judah ibn Abbas of Fez; lived in the twelfth century. Joseph Sambari and the "Yuḥasin" call him Samuel ben Azariah ("Rev. Ét. Juives," iv. 188, v. 52), which Steinschneider believes to be a mistake originating in his Arabic name, "Abu Nasr." Abbas studied philosophy, mathematics, and medicine; and for purposes of study he traveled in Irak, Syria, Azerbaijan, and Kohistan. In the city of Maragha he claimed to have had two visions (on the 9th of Zul-Hijjah, 558 = November 8, 1163, though this date seems to be too late), in which Mohammed appeared to him. He thereupon embraced Islam, taking the name of Samau'al Yaḥya al-Maghrabi. He composed a polemical treatise, "Ifham al-Yahud" (Confutation of the Jews), called also "Kitab-al-nakd wal-ibram" (Hirschfeld, "Das Buch al-Chazari," p. v.). In this work he points out that from time to time the abrogation of the Law is necessary and that, in fact, it has often occurred in Judaism. He tries to prove the prophetic character of Jesus and of Mohammed; claiming that the first of these is referred to in Gen. xlix. 10, and the latter in Gen. xvii. 2 (במאד מאד has numerically the same value as מחמד Mohammed). He affirms that the Jews of his time possess the Torah of Ezra and not that of Moses, and that too many laws have been added by the sages of the Mishnah and the Gemara.

Kaufmann has shown that Abraham ibn Daud, in 1161, knew of this treatise ("Rev. Ét. Juives," x. 251), and Maimonides seems to refer to it in his "Iggeret Teman"; but otherwise it exercised no influence on Jewish literature ("Z.D.M.G." xlii. 530). For reference to less known philosophical works of Abbas, see Steinschneider, "Hebr. Bibl." xix. 35, "Cat. Bodl." col. 2442. Upon the basis of his "Ifham al-Yahud" there was compiled in the fifteenth century the celebrated antijewish writing called "Epistola Samuelis Maroccani," which is said to have been translated from the Arabic by Alfonsus Bonihominis. Including the first edition of 1475, this tract went through at least nine editions in Latin, five in German, and one in Italian. In the Escurial there exists a Spanish translation in manuscript (see Jacobs, "Sources," No. 1267; compare Kayserling, in "Jew. Quart. Rev." viii. 497; Steinschneider has called attention to this in his "Cat. Bodl." col. 2438). A Russian version was issued in 1855 by the Kiev Pecherskaya Lavra (Monastery). An English version appeared at York in 1649 under the title of "The Blessed Jew of Morocco; or, the black Moor Made white." There exists also, in manuscript, a "Disputatio Abutalib Saraceni et Samuelis Judæi," consisting of seven epistles, translated from Arabic into Latin by Alfonsus Bonihominis. Its connection with the subject of this article has not yet been ascertained.

ABBAS, YOM-ṬOB BEN JONAH: Mentioned in the responsa of Judah ben Asher (fols. 30 and 35).
H. H.

ABBASI or **(IBN ABBASI), JACOB BEN MOSES IBN** (erroneously, **'Aksa**)**:** Translator and scholar, who flourished in the second half of the thirteenth century at Huesca, Spain. His father, Moses ibn Abbasi the Martyr (the son signs himself בהה"ק, which can only mean בן הרב הקדש), was surnamed Bedersi, which might indicate that the Abbasi family came from Béziers, in southern France. Jacob translated (about 1298) Maimonides' commentary on Seder Nashim, from the Arabic into Hebrew. He prefixed to the translation a philosophical disquisition on Eccl. vii. 22, in which he makes a clear distinction between worldly knowledge, which is bounded by the limitation of human understanding, and the knowledge of things Jewish; meaning by this the study of the Law, which is open to everybody. The Law, it is true, has its own mysteries, which can be understood by a few only of the elect, who are versed in the Cabala. But the real Torah consists only of the Law together with its elucidation in Talmudic literature; and this every mortal can comprehend. A translator of Maimonides, a student of the "Moreh Nebukim," a scholar familiar with the works of Plato and Aristotle, and, finally, an admirer of the mystics as well as a strict Talmudist, Abbasi is a fair illustration of the spirit which pervaded the Spanish Jews at the end of the thirteenth century. As a rabbinical authority, Maimonides was unreservedly acknowledged by the Spanish Jews, but as a philosopher he was pushed into the background by the triumphant march of mysticism. The Arabic original not being accessible, it is impossible to judge of Abbasi's powers as a translator. His Hebrew seems to be weak, but it is clear; and, unlike the translators of the other parts of the Mishnah commentary of Maimonides, Abbasi left no Arabic word untranslated. From his scholarly correspondence with Solomon ben Adret, the greatest Talmudic authority of the time, it appears that Abbasi possessed a fair Talmudic knowledge. One of Adret's letters, a commendation of his literary activity, was reproduced by Abbasi in the preface to his translation.

ABBASI (ABBAS), MOSES: Disciple of Rabbi Ḥasdai ben Solomon of Valencia and Tudela (1378). He corresponded with Isaac ben Sheshet and the poet Solomon da Piera (see Steinschneider, "Hebr. Bibl." xiv. 79).
M. K.

ABBASSID CALIFS: The position of the Jews during the five centuries of the domination of the Abbassid Califs (750–1258) differed from that under their predecessors, the Ommiads, as the Abbassids were troubled by no fears that Jewish influence would check the spread of Islam. The foundation of Bagdad by Al-Mansur (the second Abbassid Calif) brought the seat of Moslem government in close proximity to the two centers of Jewish spiritual life, Sura and Pumbedita. Contrary to the policy of the earlier califs, who removed the Jews to the extreme borders of the empire, Bagdad was allowed to retain a Jewish community.

It is not to be inferred that under the Abbassids the Jews enjoyed continual peace. They suffered not only from the incessant civil wars and revolutions, but ancient and forgotten restrictions and humiliations were occasionally renewed. Harun-al-Raschid (786–809) revived Omar's regulation ordering non-Moslems to wear distinguishing marks on their clothing (see Badge), and forbidding them to ride horses. Although these regulations fell into disuse under the next califs, they were renewed with great vigor under the reactionary Al-Mutawakkil (850), who caused many synagogues to be converted into mosques, and levied tithes on the houses of non-Moslems. Yet under Al-Mutadhid (892–902) many Jews were employed in the service of the state.

The decline of the temporal power of the califs, which occurred before the end of the tenth century, could not fail to affect the fate of the Jews in the eastern portions of the empire, because the viziers, and afterward the sultans, were too much occupied with other cares to trouble themselves about the Jews (see Crusades). Bagdad, especially, suffered heavily; yet in the middle of the twelfth century its Jewish community numbered one thousand families, while that of Mosul was even larger. The calif Mohammed al-Muktafi (1136–60) made Bagdad the seat of the exilarch, who became the recognized head of nearly all the Jews of the Abbassid empire. This favorable state of things was due mainly to the tolerant reign of the Seljuk sultans, especially Zengi, Nur-ed-Din, and Saladin (see also Alroy).

ABBAYE: An amora. See Abaye.

ABBAYE OF CONSTANTINOPLE: Talmudic scholar of the sixteenth century. He carried on a learned correspondence with Samuel di Medina (מהרשד"ם), rabbi of Salonica, who refers to him as the "greatest of our teachers." He wrote also a preface to Moses Nagara's "Leḳaḥ Ṭob," Constantinople, 1574.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 20.

M. B.

AB BET DIN ("Father of the court of justice"): **1.** Title, according to some scholars, of the judge next in authority to the *nasi* (prince or president), and who would, accordingly, be vice-president of the Sanhedrin. On the disputed question of the relation of the Ab bet din to the nasi, see Nasi. **2.** In recent times, the title of the chief assessor at the rabbinical court.
K.

ABBREVIATIONS: The oldest term for abbreviation, נוֹטָרִיקוֹן = *νοταρικόν*, is found in tannaitic literature as early as 150 B.C. (Krauss, "Lehnwörter," ii. *s.v.*; Bacher, "Die Älteste Terminologie"). Authorities of the third century use also the term סִימָן (later סִמָּן) = *σημεῖον* (according to Krauss, "Lehnwörter," and אָלֶף בֵּית, Yoma, 37*b*; Giṭ. 60*a*), and, for a certain kind of abbreviation, סֵרוּגִין (Yoma, 38*a*; Giṭ. *ib.*). In the fourth century is met the expression רָאשֵׁי אוֹתִיּוֹת (Tan. Ex., ed. Buber, fol. 54*a*), a term which must have been in common use, since the Maghrebi Arabic *ruus ḥuruf* is borrowed from it. In later literature the common expression is רָאשֵׁי תֵבוֹת (heads of words), first found in the Masora, and, for another kind, סוֹפֵי תֵבוֹת (ends of words) (Frensdorff, "Die Masora Magna," glossary). Elias Levita, the first writer on the subject, refers to Abbreviations as הַקְּצָרִים וְהַנִּשְׁבָּרִים וְהַמִּלּוֹת בְּנוֹטָרִיקוֹן

Terminology.

וּבְרָאשֵׁי תֵבוֹת (שברי לוחות, מסורת המסורת) וּבְדֶרֶךְ רְמִיזָה וְקְרִיצָה קָמִין תֵּבָה פְּרוּצָה contractions and fragments, the words being in Abbreviations and initials, in the manner of suggestions and contractions (as a broken word). Joseph Ḳalman (מבוא המסורה, iii.) calls them מִלּוֹת מְגֻזָּרוֹת קְצָרוֹת וכו. Compare the Arabic *ḥarf muḳtiah.* Among the cabalists a certain kind of abbreviation or combination of letters is called צֵרוּף or צֵרוּף אוֹתִיוֹת. The verb צֵרֵף is already found in the Talmud (Ber. 55*a*) and in the ספר יצירה (ii. 2 *et passim*). Later writers use for צֵרוּף the term גִּלְגּוּל (S. Donnolo) or גַּלְגַּל (A. Abulafia). For the verbs צֵרֵף or גִּלְגֵּל one finds also זִוֵּג (Naḥmanides' commentary to ס׳ יצירה, *ib.*) and חִבֵּר (J. S. del Medigo, מכתב אחוז), and the nouns זִוּוּג and חִבּוּר also occur. The terms *νοταρικόν* = *notaricum*, and *σημεῖον* originally denoted shorthand signs, but among the Jews they received the meaning "Abbreviations." For the doubtful expressions גיגנטון or גיגנוטון and גלבורי, see Krauss, "Lehnwörter," and Jastrow, "Dict."

Origin.

Abbreviations really begin with the development of the Hebrew alphabet out of ideographic pictures. Hence, they must date from the earliest times. The modern letters were originally signs or symbols. After the symbols had become letters, representing not only concepts, but sounds, the names were, nevertheless, retained and transferred to the corresponding sounds. The time when that transfer took place is unknown; but it may be assumed that even for some time later ideograms for well-known words were still used. By analogy with those ideograms the use of conventional signs for frequently recurring words probably came into vogue, and this was the beginning of Abbreviations (compare Perles, "Analekten," p. 10). Abbreviations are found in Punic, Assyrian, and Minean inscriptions, and also in an Aramaic inscription of the year 526 B.C. (compare Perles, *op. cit.*). At first but few in number, lack of space, economy of writing material, a desire for secrecy, religious scruples, and the convenience of the writer multiplied their number to the extent found to-day.

Thus, on the Maccabean coins are found the Abbreviations א for "first year": שׁב, שׁג, שׁד for שנת ב, שנת ג, שנת ד "second, third, fourth year"; הי for היהודים "the Jews"; יש or ישר for ישראל "Israel"; לחר for לחרות "of freedom," produced for lack of space (Théodore Reinach, "Monnaies Juives," p. 44). The abbreviation ר׳ for רבי or רבן, common in the Mishnah, is due to the convenience of the writer. The abbreviation יי or ה׳ for יהוה is due to religious scruples. The numerous Abbreviations found in the Masora are due to lack of space, scarcity of writing material, and the convenience of the scribe. Some scholars, being unused to writing, signed sigla for their names (Giṭ. 36*a*). In times of religious persecution certain sacred objects were marked with sigla (Ma'as. Sh. iv. 11).

Graphic Representation.

On the Maccabean coins there is no sign to denote abbreviation. This may be due to lack of space. However, such a practise is met with much later; compare the Bible fragments published by Neubauer ("Jew. Quart. Rev." vii. 363) and סלקא דעתך סד (Lowe, "A Fragment of the Talmud Bab. Pesaḥim," fol. 8*a*, col. 1, l. 5). The Punic inscription ("Corpus Inscrip. Semit." i. No. 170) omits after the abbreviated word the dot otherwise found at the end of every word written out in full. A similar mode of marking Abbreviations might have existed also among the Jews. In medieval writings Abbreviations marked by various signs are found. Thus, in the "Talmudical Fragments," published by Schechter and Singer (Cambridge, 1896), one and three dots are found: הקבּה = הקדוש ברוך הוא (p. 28, l. 17), יייי = יהוה (p. 27, ll. 23, 24), יי אלהינו יי אחד = יהוה אלהינו יהוה אחד (p. 28, l. 17), א̇ ד̇ ה̇ת̇ת̇פ̇ג̇ לעולם = 4883 A.M. (p. 26, l. 24). In the Talmudical fragment published by Lowe (Cambridge, 1879) are seen the single dot, the double dot, and the single line slanting in two directions, while the double slanting line is used for a full stop: שהחיו̇ וקיימ̇ והי̇ = שהחיינו וקיימנו והגיענו (fol. 1*a*, col. 2, l. 8); אומ׳ אקבוצ̇ = אומר אשר קדשנו במצותיו (l. 9); אעפ̇ = אף על פי (fol. 1*b*, col. 1, l. 19); ר̇ = רבי (fol. 8*b*, col. 2, ll. 19, 21, 29); אמ̇ = אמר להו (fol. 2*a*, col. 2, l. 19); בדיקה״ מתני״ ובה̇ אומ̇ = בדיקה: מתניתא: ובית הילל אימרים (fol. 2*b*, col. 2, l. 6). In the manuscript fragment published by C. Levias in the "Am. Jour. Semit. Lang." xv. there are, besides the dot, the horizontal line and the semicircle: אׂהי, אׂים = אלהי, אלהים (p. 162). In the Arabic period is found the Arabic sign ~ (Steinschneider, "Gab es Eine Hebräische Kurzschrift?" p. 6). With the abbreviated name of God sometimes there occurs a broken line z or ȝ (Perles, "Analekten," p. 26, note 1; Greenburg, "The Haggadah According to the Rite of Yemen," p. 1; Kohut, "Aboo Manzûr al-Dhamâri," p. 15). In addition to the sign above the abbreviated word, the last remaining letter is at times not written out in full; for example, אקבוּ̇ = אקבוצ (Lowe, "A Fragment of the Talmud," fol. 1*a*, col. 1, l. 21), דא̇ = דא (fol. 7*b*, col. 1, l. 1). In modern times two signs only are used—the single and the double slanting lines. The single line is used at the end of an abbreviated single word; for example, ר׳ = רַבִּי or וגומ׳ = וְגוֹמֵר. The double line is used between the letters of an abbreviation of two or more words; for example, ק״ו = קַל וָחֹמֶר or הקב״ה = הַקָּדוֹשׁ בָּרוּךְ הוּא.

Methods.

Words are abbreviated in various ways. Distinction must be made chiefly between the abbreviation of a single word and that of more than one. Single words may be abbreviated in the following ways:

(1) תֵּבוֹת מְגֻזָּרוֹת: When a single word consists of only two letters it is very rarely abbreviated; for example, א׳ = אֵל, ב׳ = בֵּן. When it consists of more than two letters, one or more of the final letters are dropped: for example, וגו׳ or וגומ׳ = וְגוֹמֵר; בק׳ = בְּקִצּוּר; מ׳ or מתני׳ = מַתְנִיתָא; פ׳ = פָּרָשַׁת or פֶּרֶק; מס׳ = מַסֶּכֶת or מָסֹרֶת. Words beginning with a preposition or conjunction or verbs in the imperfect can not be abbreviated to one letter: for example, ככ׳ = כַּכָּתוּב, דכת׳ = דִּכְתִיב; שנ׳ = שֶׁנֶּאֱמַר; ית׳ = יִתְבָּרַךְ; יתע׳ = יִתְעַלֶּה. Compound names are treated sometimes as two words, and so abbreviated: for example, נ״נ = נְבוּכַדְנֶאצַּר; פ״ב = פעטערסבורג; ש״מ = שורמאן.

(2) תֵּבוֹת נִשְׁבָּרוֹת: The middle of a word is omitted, both ends remaining: for example, אהי = אֱלֹהַי ("Am. Jour. Semit. Lang." xv. 162); אֱלֹהִים ȝ אים (in the same place); אינו = אֱלֹהֵינוּ ("Jew. Quart. Rev." xi. 646); אא = אֶלָּא (in the same place). This mode of abbreviation is very rare.

(3) אֶמְצָעֵי תֵבוֹת: A middle letter stands for the whole word. Of this kind only one example is known, namely, ה׳ = יהוה (compare Perles, *op. cit.* p. 16).

(4) סוֹפֵי תֵבוֹת: The beginning of the word is omitted; for example, ים = אֱלֹהִים ("Am. Jour. Semit. Lang." xv. 162), ן׳ = אבן or בן before family names; especially common in the Arabic period, but affected also by some modern writers.

(5) The name of God is now usually written י״י; but in antiquity it was written in a great many ways, too many to record here (see TETRAGRAMMATON).

When there are two or more words, the following modes of abbreviation prevail:

(6) רָאשֵׁי תֵּבוֹת: (*a*) The initial letter of every word, whether it be a radical or a formative element or an inseparable particle, is retained—the rest is omitted; for example, עָלָיו = ע"ה ; אַבְרָהָם אָבִינוּ, אִי אֶפְשָׁר = א"א הַשָּׁלוֹם ; קַל וָחֹמֶר = ק"ו. It is to be noticed, however, that, if the first word of the combination begins with an inseparable particle, such particle is not counted; for example, וּבע"פ ; הָאֵין סוֹף = הא"ס ; אֲבָל תּוֹסִיף = אב"ת שֶׁאֵינוֹ יוֹדֵעַ לִשְׁאוֹל = שאי"ל ; וּבְעַל פֶּה =. An exception to this rule is the article in combination beginning with הָרַב רַב; for example, = הרשטב"א ; הָרַב רַבֵּנוּ נִסִּים = הר"ן הָרַב רַב שֵׁם טוֹב בַּר אַבְרָהָם, and הַשֵּׁם יִתְבָּרַךְ = הי"ת, but more usually written השי"ת.

(*b*) Two letters are retained of one or several words; for example, אֱלֹהֵי = אא"ב ; אִגֶּרֶת בִּקֹּרֶת = אג"ב אָסוּר בִּנְעִילַת הַסַּנְדָּל = אבנה"ס ; אָדָם הָרִאשׁוֹן = אדה"ר ; אֲבוֹתֵינוּ בּוֹרֵא עִשְׂבֵי בְשָׂמִים = בעש"ב.

(*c*) When the first or last word of the combination is short, it is sometimes retained in the abbreviation entire; for example, שְׁוָא נָח = שנ"ח ; אַף עַל פִּי = אעפ"י ; אֲבִי הָעֶזְרִי = אבי"ה ; שְׁוָא נָע = שנ"ע.

(*d*) When an abbreviation is formed of a larger complex of words the resulting lengthy abbreviation is rarely written in one group (for example, וּלְהַשּׁוֹמֵעַ יִנְעָם וְתָבוֹא עָלָיו בִּרְכַּת טוֹב = ולהשיותעב"ט), but is frequently broken up into two or more groups; for example, אא"א ואא"ה ; אֵין אוֹמְרִין אֶל אֶרֶךְ אַפַּיִם = א"א אא"א = א"א מ"פ בב"ח ; אֶחָד אִסּוּר אֲכִילָה וְאֶחָד אִסּוּר הֲנָאָה = אֵין אָדָם מֵעֵז פָּנָיו בִּפְנֵי בַּעַל חוֹבוֹ. This splitting up into groups is at times guided by no principle (for example, הַגָּאוֹן אַב בֵּית דִּין דְּפֹה הַקְּהִלָּה = הגאב"ד דפה"ק), but more frequently the tendency is apparent to form such groups as would make sense when read as entire words, or would represent a series of numbers, or would give a certain assonance; for instance, בִּרְכַּת הַטּוֹב וְהַמֵּטִיב = בה"ט וה"מ gives the words בֵּין כָּךְ וּבֵין כָּךְ = בכ"ו ב"כ ; בַּהַט וָהֵם gives the words בָּכוּ בָךְ; זָכוֹר אֶת בּוֹרַאֲךָ וְהַצְנֵעַ לֶכֶת בְּיִרְאַת אֱלֹהִים = זא"ב ולבי"א gives the words עַז כַּנָּמֵר = ע"כ וק"כ ר"כ וג"כ ; זְאֵב וְלָבִיא וְקַל כַּנֶּשֶׁר רָץ כַּצְּבִי וְגִבּוֹר כָּאֲרִי yields an assonance when pronounced עַכ וְקַכ רַכ וְגַכ (compare *Pronunciation*, below); כֻּלָּם אֲהוּבִים כֻּלָּם בְּרוּרִים כֻּלָּם גִּבּוֹרִים = כ"א כ"ב כ"ג gives the serial numbers 21, 22, 23.

(*e*) In longer groups, particles and sometimes one or more whole words may be left unrepresented; for example, דָּנִיֵּאל = דחמ"ע ; בְּנוּקְבָּא [דְ]תְהוֹם רַבָּא = בנת"ר דָּם צְפַרְדֵּעַ = דצ"ך עד"ש באח"ב ; חֲנַנְיָה מִישָׁאֵל [וַ]עֲזַרְיָה = ימש"ק ; כִּנִּים עָרֹב דֶּבֶר שְׁחִין בָּרָד אַרְבֶּה חֹשֶׁךְ [מַכַּת] בְּכוֹרוֹת גְּזֵרָה לִגְזֵרָה = גזל"ג ל"א ; יְשַׁעְיָה מִשְׁלֵי שִׁיר [הַשִּׁירִים] קֹהֶלֶת יוֹם [טוֹב] = ילי"צ ; הַמַּבְדִּיל [בֵּין] קֹדֶשׁ לְחוֹל = המק"ל ; לָא [גְּזוֹרִינָן] בא אקבוץ ; גְּמָרָא פֵּרוּשׁ תּוֹסָפוֹת [תַּחְתּוֹנִים] = גפ"ת ; ליפמאן צונץ בָּרוּךְ אַתָּה [אֲדֹנָי אֱלֹהֵינוּ מֶלֶךְ הָעוֹלָם] אֲשֶׁר קִדְּשָׁנוּ בְּמִצְוֹתָיו וְצִוָּנוּ = (Lowe, "A Fragment of the Talmud," fol. 1*a*, col. 1, l. 21).

(*f*) A species of Abbreviations consists in the use of the letters with numerical value. Such use goes back to antiquity, and was already known to the authors of the Biblical books (compare Holzinger to Gen. xiv. 14, and Bertholet to Ezek. iv. 5, in Marti's "Kurzer Hand-Kommentar zum Alten Testament"). On this use is also based the hermeneutic rule of GEMATRIA. These letters with numerical value may be written by themselves, as, ש"י = 310: תרי"ג = 613; or together, with the Abbreviations of words, as. שְׁתַּיִם שֶׁהֵן = בש"ד ; בְּשִׁבְעִים לָשׁוֹן = בע"ל ; עֶשֶׂר סְפִירוֹת = י"ס אַרְבַּע. It is further to be noticed that in modern times the use of י"ה, י"ו for 15, 16 is avoided (such groups being part of the divine name) and ט"ו ט"ז substituted in their stead. In some cases the numeral י"ח is written ח"י and pronounced חַי with allusion to the meaning "alive," "living," which the word has in Hebrew.

(*g*) סוֹפֵי תֵבוֹת: Sometimes the final letters of several words are combined into a group. This, where the initials make no sense, is done for mnemotechnic purposes; for example, [הוֹשַׁעְנָא]רַבָּ[א][ט']בְּאָב = אברה"ם [יוֹם]כִּפּוּר[רֹאשׁ]הַשָּׁנָה פּוּרִים].

(*h*) סֵרוּגִין: When quoting Scriptural passages, on account of religious scruples, only the first word is written out in full, the rest being given in Abbreviations. This mode is especially common among Karaitic authors (compare "Jew. Quart. Rev." vii. 363).

(*i*) צֵרוּף: The mystic combination of letters, to which dynamic powers were attributed, dates from the early GNOSIS, and was very common in the Middle Ages. This kind of abbreviation does not properly belong to our subject. On the origin of such צֵרוּפִים, compare Grätz, "Gnosticismus im Judenthum," p. 106, and כרם חמד, viii. 90; see also the articles CABALA and NOTARIKON.

Pronunciation.

(1) Owing to the fact that Abbreviations were frequently formed into groups which, when read as a word, gave a meaning and were used as a help to the memory in oral study, all kinds of Abbreviations, even such as have no meaning when taken as words, came in later times to be pronounced with supplied vowels; for example, עַמְלֵ"ק (B. B. 46*b*), עֲבוּ"ם (לוח אחיאסף, vii. 96), יַ"שׁ (*ib.* 98). This is especially common with names of authors and books; for example, רַשִׁ"י, רִיבַ"שׁ, הָרַמְבַּ"ן, רַמְבַּ"ם, שְׁלָ"ה, מַהַרְשָׁ"א; Equally frequent is such pronunciation of numbers, especially of more than two places; for example, שְׁסַ"ה, רְמַ"ח, תַּרְיַ"ג.

(2) Such pronounced Abbreviations are accepted in modern literature as real words, and even form derivatives. They are used both in prose and in poetry, and the abbreviation signs are not always written—a source of perplexity to the uninitiated. Compare הַשַּׁ"צִיּוּת, "the heresy of Shabbethai Ẓebi," from ש"צ, the initials of that name (Gottlober, "Toledot ha-Ḳabbalah," p. 11); שִׁיר לִפַּקִ"י, "a poem the numerical value of whose letters in every line is equivalent to the date of the year in which it was composed" (הכוכבים, p. 30, note):

618 = עִם הַלְּפָקִים כֹּה אֲרִיבָה,
618 = וְלָאֵלֶּה כִּגְמוּל יָדָם לָהֶם אָשִׁיבָה,
618 = וּבְלִפַּק, אוֹי! הַיּוֹם בְּזָדוֹן אֲזַמֵּרָה!
618 = מַה לָּכֶם לִפְקֵי עַמִּי הֹגֶה יְגִיעַ הֶבֶל?

(Gottlober, "Toledot ha-Ḳabbalah," p. 31). This poem yields the לִפְרָט קָטָן = לפ"ק, "the date of the year with the omission of the thousands." Hence, 618 = 5618 A.M. = 1858 B.C. (see also "Luaḥ Aḥiasaf," ii. 31; Dolitzky, "Shire Menahem," p. 105).

Uses.

Abbreviations may be divided into general and special. To the latter class belong discretionary Abbreviations formed for special cases or by certain authors; while the general Abbreviations, through their connection with the history of culture and of literature, have become monuments of ideas and of sentiments, and have come to possess historic significance (compare Zunz, "Z. G." p. 450). The oldest regular uses of Abbreviations as found in the Talmud are:

(1) The abbreviation of the name of God (see § (5), above).

(2) As mnemonic signs, for a help to the memory in oral study. This latter kind of abbreviation was especially called סִימָן (see *Terminology*, above). Instead of these סימנים representing words, they sometimes represent numbers (Mishnah, Men. xi. 4; see also R. Judah in Pesaḥ Haggadah and Sifre, כי תבא, 301). For the mnemonic signs of the Talmud, compare D. Pardo, "La-Menaẓeaḥ le-David," Salonica, 1765 or 1795; Pinner's introduction to his German translation of Berakot, p. 22; J. Brüll, "Doresh le-Zion" (Mnemotechnik of the Talmud), Vienna, 1864; F. Lebrecht in "Hebr. Bibl." vii. 99–102; also Rapoport in "Kerem Ḥemed," vi. 252.

Especially numerous is this kind of Abbreviations in the Masoras and in grammatical literature. On the mnemonic signs in the Masoras, compare Frensdorff's glossary in his "Die Masora Magna"; on some of the mnemonic signs in grammar compare D. Rosin in "Jew. Quart. Rev." vi. 475–501. A complete list, both of Masoretical and grammatical mnemonic signs, will be found in the appendix to the writer's "Dictionary of Philological Terminology in Hebrew and Aramaic," now in preparation. Mnemonic signs are also commonly used in calendars.

(3) In vituperative language Abbreviations are used for the purpose of euphemy (compare Meg. 25*b*; ג"ש = גייופא שייטא or שטייא "the lewd woman").

In later literature we find the frequent and habitual use of Abbreviations in the following cases:

(4) In the standing formulas for blessing, wishing, praying, and imprecation, and in standing phrases concluding a composition, which formulas frequently consist of Biblical verses or phrases. This kind of sigla, having developed different characteristics according to various times and countries, since it was employed in epigraphs, documents, on tombstones, etc., has become an important part of Hebrew paleography. On this see Zunz, *l.c.*; Steinschneider in the "Jahresberichte der Geschichtswissenschaft," i. 43, ii. 59, v. 36; and the same, "Zur Literatur der Hebräischen Paläographie" in "Centralblatt für Bibliothekswissenschaft," 1887, pp. 158 *et seq.*

(5) In the quotation of names and titles of authors and especially in the books or treatises and chapters of the Talmud titles. The titles of Hebrew books are, in a sense, proper names, usually consisting of a Biblical phrase of two words, whose initial letters are used in quoting them, even without mention of the author (see Titles).

The names of authors consist mainly of their first names with the addition of בֶּן "son of," followed by the name of their father. In the Middle Ages it became the custom to add to the name of every author the title רַבִּי, abbreviated to ר', and from this have arisen Abbreviations of the names of famous and popular authors; as רַמְבַּ"ם Moses Maimonides, רַשִׁ"י Solomon ben Isaac, etc. In some cases real family names have grown out of such or similar Abbreviations, especially in more modern times when the Jews were required by the various states to adopt them. Thus, the name "Brill" or "Brüll" is ברי"ל Ben Rabbi Judah Loeb ha-Levi; "Katz" is כ"ץ = כֹּהֵן צֶדֶק; "Sack" is ז"ק = זֶרַע קֹדֶשׁ; "Segal" is סג"ל = סְגַן לְוִיָּה.

In Germany and in France it was customary in the Middle Ages to abbreviate names so as to form a word denoting some personal quality; as, רא"ש "head" for רַבֵּנוּ אָשֵׁר. Lack of knowledge in such matters has produced some very ridiculous misunderstandings. A list of such names is given by Steinschneider in the introduction to his "Catalogus Librorum Hebræorum in Bibliotheca Bodleiana" and in his "Hebräische Bibliographie," xvi. 6, xxi. 103. On the titles of Hebrew books compare Schechter, "Studies in Judaism," pp. 328–342.

(6) In the technical expressions of various disciplines Abbreviations are frequently used according to the needs of the particular subject. They are, however, invariably made on one or other of the principles indicated above.

Bibliography: The older literature on Abbreviations will be found enumerated in Wolf, *Bibl. Hebr.* ii. 574–590, iv. 250–267; H. J. Köcher, *Nova Bibl. Hebr.* ii. 136 *et seq.*, Jena, 1782; Zunz, *Z. G.* p. 448; Steinschneider, *Gab es Eine Hebr. Kurzschrift?* p. 8 (this is a reprint from *Archiv für Stenographie*, 1887, Nos. 466 and 467); P. Perreau, *1700 Abbreviature e Sigle Ebraiche, Chaldaiche, Rabbiniche, Talmudiche . . . Autografia Edizione di 60 Esemplari*, Parma, 1882, augmented under the title *Oceano delle Abbreviature e Sigle Ebraiche*, 1883, *Autogr. 2a Edizione di 60 Esemplari Notevolmente Accresciuta*; and an appendix to this, *Appendice all' Oceano delle Abbreviature*, 1884, *Autogr. Ed. di 60 Esemplari* (an exhaustive review of the last two works was published by D. Kaufmann in the *Göttinger Gelehrte Anzeigen*, 1884, pp. 749–755); Joseph Ezekiel, כתנת יוסף *A Handbook of Hebrew Abbreviations with their Explanations in Hebrew and English*, etc., Bombay, 1887; Philip Lederer, *Hebräische und Chaldäische Abbreviaturen . . . ins Deutsche Übersetzt und Erläutert*, Frankfort-on-the-Main, 1894; G. H. Händler, ערכי הנוטריקון *Lexikon der Abbreviaturen. Anhang zum Aramäisch-Neuhebräischen Wörterbuch von Gustaf H. Dalman*, Frankfort-on-the-Main, 1897 (of which the author is now preparing a revised, separate edition); A. Bernstein, *Sefer Roshe Tebot*, London, 1896.

C. L.

——**In Biblical Manuscripts:** The fragments of two Bible manuscripts of Egyptian origin, which were discovered by Neubauer and deciphered by Friedländer, show a manner of writing in an abbreviated form hitherto unknown; another example was exhibited at the Oriental Congress at Rome, October, 1899, by Dr. C. D. Ginsburg. Only the first word of each verse is written out in full; of the remaining words only one letter (not necessarily the initial letter) is given. This method of abbreviation seems to be what the Talmud designates by the term סֵרוּגִין (Yoma, 38*a*; Giṭ. 60*a*; according to the interpretation of Rashi). Abbreviations of the ordinary character are rarely found in Bible manuscripts. There are none, of course, in the Scrolls. In view of the Abbreviations to be found on Jewish coins (ה' for היהודים, etc.), the question arises whether words were abbreviated in pre-Masoretic Bible manuscripts. As positive information is obviously wanting, recourse must be had to conjecture, on the basis of variants gleaned from the ancient versions (particularly from the Septuagint) or of evident errors in the Masoretic text, which are satisfactorily explained if it is assumed that Abbreviations were customary in the manuscripts antedating the Septuagint. Thus, when the Septuagint has in Jonah, i. 9, in the place of עברי "the servant of the Lord" (that is, עֶבֶד יְהוָֹה), it may be assumed that the י was taken by the translator as an abbreviation of the divine name. In Isa. xlii. 2 ישא may originally have been an abbreviated יִשְׁאַג. In his brilliant dissertation ("Analekten zur Textkritik des Alten Testaments"; see chap. i. Munich, 1895) F. Perles makes an extensive use of the assumed pre-Masoretic habit of abbreviating words. He even interprets the accentual signs פְּסִק and מַקֵּף (see Accents in Hebrew) in I Sam. ix. 12 (where he reads with Lagarde לִפְנֵיכֶם הָרֹאֶה, in the place of our לְפָנֶיךָ מַהֵר), and in Ps. lxxxix. 51 (where כְּלִמַּת should replace the meaningless כָּל) as remnants of the signs of abbreviation customary in rabbinical writings. While some of the emendations proposed by Perles and his predecessors are ingenious and plausible, the thesis that words were abbreviated in pre-Masoretic Bible manuscripts may perhaps still be said to be unproved. The omission of parts of words may not be due to a fixed habit of abbreviating, but may have been resorted to only sporadically; for example, at the end of a line; and, in some cases, lacunæ, which were not treated as such by copyists, should perhaps appear. It is certainly hazardous to ascribe so early a date to the rabbinic signs of abbreviation.

M. L. M.

ABD=("Servant"): An Arabic word that forms the first part of many compound proper names of Jews of Arabic-speaking countries. The name following it is invariably that of a deity, and is either (1) the proper name of a god, as in early times, or (2) an adjective expressing some attribute of God which is thus used as a synonym of the Deity. The former usage was current among the early Semites, as is shown by the existence of such names among the preislamitic Arabs as *Abd-Uzza* or *Abd-Shams* ("-of the Sun-god"); among the Phenicians, as *Abd-Eshmun*; among the Arameans, as *Abd-Hadad*, and even among the Hebrews, in the form *Abdel* (Obadiah). With the growth of monotheism among the Jews and later among the Mohammedans, it became customary to substitute for the name of the idol that of God or an adjective signifying one of His attributes, as *Abd-ul-Aziz* ("Slave of the Mighty"). This difference in formation enables the student of history and literature to distinguish the dates of persons bearing the names.

L. G.

ABDA ("Servant of the Lord"): **1.** The father of Adoniram, the superintendent of the tax levied by Solomon (I Kings, iv. 6). **2.** A Levite residing in Jerusalem (Neh. xi. 17), called Obadiah in the corresponding list of I Chron. ix. 16.

Bibliography: Renan, in *Rev. Ét. Juives*, 1882, v. 165.

G. B. L.

ABD-AL-DAIM: Son of Abd-al-Aziz, son of Muhasan ha-Israeli, physician and descendant of a line of Jewish physicians. Abd-al-Daim flourished about 1300, and on August 30, 1316, he completed an Arabic work entitled "The Two Sciences," in two parts, one on physics, the other on metaphysics. It is arranged as a series of questions and answers. The manuscript of the work is in the Bodleian Library in Oxford.

K.

ABD-AL-MALIK: Ommiad calif who ruled at Damascus 685 to 705, and who, unlike his predecessors, was not very religious, but showed a certain tolerance toward the Jews, who hitherto had been roughly handled. Abd-al-Malik, indeed, employed as minister a Jew named Someir.

On the accession of the Ommiad dynasty, in 661, a marked change took place in the policy of the califs, religious interests being superseded by a policy calculated to perpetuate the dynasty. In Abd-al-Malik's time Damascus displaced Medina as the seat of the califate, and this event was regarded as evidence that the spread of the Moslem faith was no longer to be the sole care of the princes of the ruling house. Close upon this and other innovations followed the splitting up of Islam into various sects, which broadened the religious horizon and brought to the Jews in Mohammedan countries a period of comparative peace.

H. Hir.

ABDALLAH: As a Jewish name the Arabic equivalent of the Hebrew Obadiah and similar names. Its first appearance among the Jews was not due to religious motives. The name Abdallah was common in Arabic before the rise of Islam, and if it be found—though not very frequently—among Jews, it has been, like many other pure Arabic names, only adopted by them. The first Jew of this name is not Abdallah ibn Salam, as Steinschneider assumes ("Jew. Quart. Rev." xi. 335), for he was called Abdallah only on being converted to Islam. On the other hand, we find Abdallah ben Dheif, of the Banu Ḳainuḳa'a, and Abdallah ibn Saura, the rabbi of the Banu Tha'laba ibn Fityaun. For the other and very rare instances see Steinschneider's article referred to above.

H. Hir.

ABDALLAH IBN SABA: A Jew of Yemen, Arabia, of the seventh century, who settled in Medina and embraced Islam. Having adversely criticized Calif Othman's administration, he was banished from the town. Thence he went to Egypt, where he founded an antiothmanian sect, to promote the interests of Ali. On account of his learning he obtained great influence there, and formulated the doctrine that, just as every prophet had an assistant who afterward succeeded him, Mohammed's vizier was Ali, who had therefore been kept out of the califate by deceit. Othman had no legal claim whatever to the califate; and the general dissatisfaction with his government greatly contributed to the spread of Abdallah's teachings. Tradition relates that when Ali had assumed power, Abdallah ascribed divine honors to him by addressing him with the words, "Thou art Thou!" Thereupon Ali banished him to Madain. After Ali's assassination Abdallah is said to have taught that Ali was not dead but alive, and had never been killed; that a part of the Deity was hidden in him; and that after a certain time he would return to fill the earth with justice. Till then the divine character of Ali was to remain hidden in the imams, who temporarily filled his place. It is easy to see that the whole idea rests on that of the Messiah in combination with the legend of Elijah the prophet. The attribution of divine honors to Ali was probably but a later development, and was fostered by the circumstance that in the Koran Allah is often styled "Al-Ali" (The Most High).

ABDALLAH IBN SALAM: Jewish convert to Islam in the time of Mohammed; died 663. According to the Moslems, he was one of the most important Jewish personages in the history of Mohammed's career at Medina, owing to the fact that he was converted to Islam. His reputation among believers is so great that the standard works on Moslem tradition have special chapters devoted to the "High Qualities of Abdallah ibn Salam." Indeed, he is the prototype of Jewish converts to Islam, of whom there existed a small number during Mohammed's lifetime. He belonged to the tribe of the Banu Ḳainuḳa'a. His name was Al-Husain, and he claimed to be a descendant of Joseph. After his conversion he assumed the name of Abdallah ibn Salam. There are several more or less fanciful stories about his conversion, all of which are unreliable, because they describe him as a Moslem soon after Mohammed entered Medina, whereas he was not converted till eight years later, or two years before Mohammed's death.

The share which even modern scholars believe Abdallah to have had in the production of the Medinian part of the Koran is, therefore, illusory, because at this period the work was, in the main, completed. Abdallah was, however, able to provide Mohammed during this period with information from Jewish sources, which subsequently reappeared in the form of sayings attributed to Mohammed. Therefore he may be regarded as one of the fathers of the Hadith, and especially of several important legends which tend to glorify Mohammed's youth.

To Abdallah is ascribed a small pseudonymous catechism (printed in Cairo) styled "Queries by Abdallah ibn Salam," containing questions he is said to have addressed to Mohammed. Abdallah left two sons, Mohammed and Yusuf.

H. Hir.

ABDALLAH IBN SAURA: One of those whom Moslem traditionists number among Mohammed's opponents in Medina. He was the rabbi of the Banu Tha'laba ibn Fityaun, and, according to several traditions, one of the most learned of Medinian rabbis. Whenever Mohammed entered into theological discussions, Abdallah ibn Saura was put forward by his coreligionists, and is said to have caused the revelation of sura ii. 129 by summoning Mohammed to embrace Judaism. Abdallah's refusal to adopt Islam is alleged to have led to the revelation of sura iv. 50. On one occasion Mohammed inquired of him whether there was not a law in the Torah with respect to adultery. Thereupon Abdallah acknowledged Mohammed to be a prophet, but afterward withdrew his confession. Later traditions give several other details, which are, however, unreliable.

H. Hir.

ABDALLAH IBN UBAIY: A chief of the Arab tribe Banu al-Khazraj at Medina and a powerful opponent of Mohammed, who had undermined Abdallah's influence in that city. He was the head of the party that Mohammed called "Hanifa." Being an ally of the Banu Ḳainuḳa'a and jealous of Mohammed's growing power, he succeeded in preventing their slaughter after they had surrendered. He also encouraged the Banu al-Nadhir to resist Mohammed, but failed to come to their aid when they were attacked. When Mohammed mobilized the Moslem forces for the expedition against Syria in 630, Abdallah, with his Jewish allies who had remained in Medina, formed a separate camp, which, however, did not join the main army. His disappearance was a death-blow to the party which still showed opposition to Mohammed, and also caused the final expulsion of the Jews who had been allowed to stay in Medina.

ABDAN or **ABIDAN** (contraction of **ABBA YUDAN**): A Palestinian scholar of the first amoraic generation, who lived about the beginning of the third century. As a disciple and clerk (amora) of Rabbi (Judah I.) he seems at times to have been too officious in his bearing toward the members of the rabbinical college. Thus, when R. Ishmael ben Yose, who was very corpulent, seemed to be forcing his way into the college in a manner contrary to the college rules, Abdan exclaimed, "Who is he that strides over the heads of the holy people?" When the innocent man replied, "It is I, Ishmael ben Yose, who am come to learn the Law from Rabbi," Abdan retorted, "Art thou worthy to learn from Rabbi?" Piqued by this insolence, Ishmael asked, "Was Moses worthy to learn from the Almighty?" Thereupon Abdan inquired, "And art thou Moses?" To which Ishmael made the reply, "And is thy master the Almighty?"

On that very occasion, however, after Rabbi had entered the college hall, an opportunity presented itself for Ishmael to prove himself an expert in halakic knowledge, while Abdan, who, coming back from an errand, attempted to force his way through the assembled crowd, was ordered by Rabbi to remain at the door. Legend adds that Abdan was severely punished for his arrogance. He himself was visited with an attack of eczema, and two of his sons were drowned. His memory, however, was revered as that of a good man, for R. Naḥman b. Isaac, in referring to this legend, thanked God for abasing Abdan in this world and not reserving his punishment for the world to come.

S. M.

ABDEEL or **ABRIEL** ("Servant of God"): Father of Shelemiah, who was one of the men ordered by King Jehoiakim to capture Jeremiah and his scribe Baruch (Jer. xxxvi. 26). The Septuagint omits the name.

G. B. L.

ABDI: **1.** Son of Malluch, a Levite descended from Merari (I Chron. vi. 44). **2.** Father of Kish, a Levite, also of the family of Merari, but living in the time of Hezekiah (II Chron. xxix. 12). **3.** One of the sons of Bene Elam who had "taken strange wives" (Ezra, x. 26; I Esd. ix. 27).

G. B. L.

ABDI HEBA: A king of Jerusalem about 1400 B.C., whose name (read by some, **Ebed Ṭob**) is recorded in the El-Amarna Tablets. From the letters sent by Abdi Heba to the Pharaoh of Egypt it appears that the former owed his kingship not to royal parentage, but to the direct favor and appointment of Pharaoh. Abdi Heba had the misfortune to be king when the whole country was in fear of conquest by the Habiri (Letter 179), and he asks repeatedly for an army (Letters 179–183) or, at least, an officer to command (Letter 182). As the result of a conspiracy false charges are made against Abdi Heba, who defends himself (Letter 179). The outcome is not known.

G. B. L.

ABDIAS: Obadiah, the prophet (IV Esd. i. 39).

G. B. L.

ABDIEL ("Servant of God"): Son of Guni, of the tribe of Gad (I Chron. v. 15).

G. B. L.

ABDIMA (called also **Abdimi, Abudma, Abudmi,** all equivalent to **Ebdimus = Eudemus**—compare Jastrow, "Dict." p. 3; and in the Babylonian Talmud frequently contracted to **Dimi**): Name of several Palestinian amoraim, known also in Babylonia. One of them is mentioned in the

Palestinian Talmud simply as R. Abdimi or R. Abudmi, without any cognomen. He flourished in the fourth century, contemporaneously with R. Jose II., who survived him, and with R. Eliezer II. See Yer. Er. x. 26*a*; Yer. B. B. ix. 16*d*; doubtful, Yer. Ket. xi. 34*b*.

The Palestinian Talmud and the midrashic literature mention several more amoraim by the name of Abdima or one of its variants, some of whom will be found under DIMI. S. M.

Abdima (Dimi) of Ḥaifa: A Palestinian amora of the third generation (third and fourth centuries). He was a recognized authority in halakic matters, prominent contemporaries as well as successors citing his views in support of their own; nor was he less distinguished in the field of the Haggadah. According to him, this rule of etiquette should be observed: When a scholar (*ḥakam*) passes to take his seat at college, one should rise in his honor within a distance of four cubits, and remain standing till he has passed to a like distance. In honor of a vice-president of the Sanhedrin (*ab bet din*), one should rise as soon as one perceives him coming, and remain standing until he has passed to a distance of four cubits; but when the president of the Sanhedrin (*nasi*) passes, one should rise as soon as one observes him approaching, and remain standing long enough for him to reach his place and be seated; for thus the Bible (Ex. xxxiii. 8) says, "All the people stood up . . . and looked after Moses, until he was gone into the tent" (Ḳid. 33*b*). Commenting on Eccl. xii. 7, "And the spirit shall return to God who gave it," the famous haggadist, R. Samuel b. Naḥman, remarks that R. Abdima of Ḥaifa thus illustrates this passage: "A priest who belonged to the order known as Ḥaberim [see HABER], the members of which were very strict in all observances of Levitical cleanliness, entrusted a sacred loaf of *terumah* to one less strict ('Am ha-Areẓ), saying, 'Behold, I am clean, and my house is clean, and my utensils are clean, and this loaf is clean: if thou wilt return it to me in the condition in which I hand it to thee, well and good; if not, I shall burn it in thy presence.' Thus says the Holy One—blessed be He!—to man, 'Behold, I am pure, and My mansion is pure, and My ministers are pure, and the soul which I give into thy keeping is pure: if thou wilt return it to Me as I give it to thee, it shall be well; otherwise, I shall burn it in thy presence'" (Eccl. R. *ad loc.*). One of Abdima's aphorisms is: "With the destruction of the First Temple the gift of prophecy was taken from the prophets and bestowed upon the learned" (B. B. 12*a*). Another: "Before man eats and drinks he has two hearts; after he eats and drinks he has but one" (B.B. 12*b*; Yalḳ., Job, § 906).

S. M.

Abdima (Dimi) bar Hamar (sometimes with the addition **b. Ḥasa**): A Palestinian who immigrated into Babylonia; senior contemporary of Raba and Joseph, of the fourth century. His name is connected with but a small number of Halakot, and only few of his Haggadot are preserved. Commenting on the words of Moses (Deut. xxx. 11-13), "This commandment is not in the heaven. . . Neither is it beyond the sea," he observes: "And were it even so: were the Law in heaven, it would be man's duty to ascend to obtain it; were it beyond the seas, he would be obliged to cross them in quest of it" ('Er. 55*a*). In using Biblical texts for homiletic purposes he follows the usual method of straining the text, or playing upon similarities of expression or even of sound; for example, the Biblical statement (Ex. xix. 17), "They stood at the base (*betaḥtit*) of the mount," he construes as implying that "the Holy One—blessed be He!—had bent the mountain over the Israelites, saying to them, 'If you accept the Law it will be well; otherwise here will be your grave'" (Shab. 88*a*; 'Ab. Zarah, 2*b*). Elsewhere he is reported as interpreting the term "Taanath" in the passage (Josh. xvi. 6), "And the border went about eastward unto Taanath-shiloh," as if it were related to *taaniyah* (sorrow) or to *anaḥ* (to sigh); and, therefore, he understands by Taanath-shiloh the spot at the sight of which man is reminded of the sacrificial rites once practised in Shiloh, and sighs at their discontinuance (Zeb. 118*a et seq.*; compare "Diḳduḳe Soferim," *l.c.*, and Yalḳ., Deut. § 881). In Yer. Meg. i. 72*d* a different interpretation of the same text, but also taking Taanath in the sense of sorrow, is reported in the name of R. Abdima of Sepphoris. S. M.

Abdima b. Hamdure or **Hamdude:** An amora of the third century. He is probably identical with (Mar) Bar Hamdure, the disciple of Samuel (Shab. 107*b*; compare "Diḳduḳe Soferim," *ad loc.* 125*a*; Yoma, 87*b*; Suk. 20*a*; Men. 38*b*). S. M.

Abdima Naḥota: A Palestinian amora of the fourth century; contemporary of the Babylonian amoraim Rab Ḥisda and Rab Joseph. He was senior to R. Assi II., who delivered halakic decisions in his name. Like Abin III., he was wont to travel and to disseminate traditions among the academies of his native country and of Babylonia; hence his surname Naḥota, which means one who is wont to go down to Babylonia. See DIMI.

ABDON: **1.** One of the last of the Ephraimite judges; a son of Hillel of Pirathon. He aided in restoring order in central Israel after the disastrous feud with Jephtha and the Gileadites (Judges, xii. 13-15). **2.** A family of the tribe of Benjamin (I Chron. viii. 23). **3.** A Gibeonite family (I Chron. viii. 30, ix. 36). **4.** A court official in the days of Josiah (II Chron. xxxiv. 20). In II Kings, xxii. 12, his name is given as Achbor. J. F. McC.

ABDON: A city in the domain of Asher, given to the Levites, Bene Gershon (Josh. xxi. 30, and in the corresponding list of I Chron. vi. 74). Identified by Guérin with Abdeh, to the north of Acre.

G. B. L.

ABDON, MOSES BEN REUBEN: Rabbi at Rome in 1543, and a member of the communal board of administrators (stewards of the ghetto) up to the year 1564. In 1558 he, with other prominent Jews of Rome, guaranteed to refund to Elijah Corcos the sum of 1,000 scudi (about $970), which the latter had paid to the papal authorities of Rome as a fine inflicted upon the Jewish community for their failure to burn certain Hebrew books.

Reuben Abdon, his son, was steward after him, from 1576 to 1584.

A **Samuel b. Moses Abdon** is also mentioned in 1507.

W. M.

ABDUCTION ("Genebat Ish, Genebat Nefesh" = Theft of Man, Theft of Soul): Talmudic jurisprudence bases the decree prohibiting this offense upon the eighth of the Ten Commandments, which it interprets as meaning "Thou shalt not steal [a human being]." The rabbis argue that the unlawful abstraction of chattels is forbidden by the injunction, "Ye shall not steal" (Lev. xix. 11), which stands in juxtaposition to the prohibitions of embezzling, lying, and defrauding—all offenses against property; while the context in the Decalogue, standing in juxtaposition to the crime of homicide, refers to heinous crimes against persons: therefore the prohibition "Thou shalt not steal" applies exclusively to the unlawful seizure or stealing of a person (Sanh. 86*a*). This prohibition, however, sets forth neither the particulars that constitute the crime nor the penalty incurred by its commission; the rabbis, therefore, adduce the following Scriptural passages: "And he that stealeth a man, and selleth him, or if he be found in his hand, he shall surely be put to death" (Ex. xxi. 16), and, "If a man be found stealing any of his brethren of the children of Israel, and maketh merchandise of him, or selleth him: then that thief shall die" (Deut. xxiv. 7). From these decrees the Talmud deduces the following rules regarding (1) the malefactor, (2) the victim, (3) the crime, and (4) the penalty:

Rabbinical Presentation.

Malefactor and Victim.

(1) To be amenable to the law for the crime of Abduction the malefactor, like the perpetrator of any other crime, must be a person—man or woman—of the legal age of responsibility, and of sound mental condition; and since the Hebrew commonwealth was based on the principles of national unity and equality, the Israelite, the Levite and the priest, the free-born and the slave, were alike answerable for the crime. Even the high priest could be called upon by a competent tribunal of seventy-five judges to defend himself in case of his infraction of the laws; and, down to the change of dynasties in the Maccabean epoch, royalty itself was subject to the judiciary (see S. Mendelsohn, "Criminal Jurisprudence," §§ 38, 45-50).

(2) The victim of the crime must be a person, male or female, child or adult, who is free-born or made free. If the victim be a slave, or even "half a slave"—which might happen in the case of a person formerly owned by two partners, but emancipated by one of them (Giṭ. 42*a*)—no conviction for Abduction can follow, since, in the eyes of rabbinic law, "the slave has no brotherhood" (עבד אין לו אחוה—Sanh. 86*a*), and, consequently, there is no "stealing any of his *brethren* of the children of Israel." Nor is the offender, if found guilty of stealing such a being, obliged to pay the double fine which the Bible (Ex. xxii. 3) imposes upon convicted thieves; the slave, in Talmudic law, being placed in the same category with immovable property which can not be taken away by theft (Mishnah, B. M. iv. 9, Gem. *ib.* 56*b*).

Crime and Punishment.

Conditions of Crime.

(3) To constitute the crime itself there must be (*a*) actual Abduction of the victim, (*b*) detention by the criminal, (*c*) enslavement, and (*d*) selling. (*a*) The Abduction must be complete; the victim must be removed from his home and from his family. If the victim be subjected to all the indignities forming constituent parts of the crime, while he still remains on his own premises the perpetrator of the indignities can not be convicted of Abduction. Also, where the victim is naturally or habitually under the offender's care—as when the victim is the offender's child, or ward, or pupil—the law will not convict of Abduction; for the law (Ex. xxi. 16) says, "If he be found in his hand," and thereon Talmudic law bases the conclusion that the words "If he be found" exclude him who is habitually found there, that is, in the offender's power (Sanh. 86*a*). (*b*) Detention as a constituent of Abduction must actually take place on the abductor's premises. If the victim be detained anywhere else, though by and under the abductor's authority, the condition is not fulfilled: "And he [the abducted] had been found in his [the abductor's] hand," which means within the abductor's own domains. (*c*) Enslavement must be accompanied by consciousness on the part of the victim. Hence, if the victim be in a state of unconsciousness—as in a profound sleep—at the inception of the crime, and remain in such state throughout the process of the crime and until its accomplishment, the crime is incomplete; there being in the eyes of the law no actual enslavement, since there could be no coercion at any stage of the whole procedure. If, however, the victim awake before he is sold, even though he has failed to realize his degradation up to the last act, the condition will be considered as fully complied with and the crime as complete (Maimonides, "Genebah," ix. 2 *et seq.*). To constitute enslavement the service imposed may be trivial. Thus, when the offender merely leans on the victim, or uses him as a screen against a draft, and that even while the subject is asleep, it will be sufficient evidence of enslavement. (*d*) By selling him the Talmud implies the sale of the victim as bondmen are sold (Lev. xxv. 42); that is, the whole person is conveyed. Therefore, if the victim be a pregnant woman, and be sold with the stipulation that only her prospective offspring shall become the property of her purchaser—although rabbinic law considers the embryo as part of its mother (עובר ירך אמו הוא—Sanh. 80*b*)—this will not constitute selling in the meaning of the law. Nor does the sale of part of the victim's person complete the crime. Thus, if he be sold with the proviso that he be half a slave only (that half of his time shall belong to his purchaser, and he shall be free to dispose of the other half at his own pleasure), even this will not constitute the selling required in Abduction; for, from the Biblical expression, "or selleth him," the rabbis deduce the legal maxim, "If he sell him, but not half of him" (Mek., Mishpaṭim Neziḳin, § 5). The sale must

also constitute a transfer of the victim to strangers. If he be sold to his own kin, though all other conditions exist, the crime is incomplete, there being no separation from "his brethren" (Sanh. 85*a*).

These four conditions must follow one another in the order here designated. Where a single condition is lacking, or where the sequence is changed, there can be no conviction.

Each step in the crime must be attested by at least two qualified persons; the rabbinic legal maxim in this respect being, "Wherever the Bible says, 'One is found,' it means by witnesses." And it matters not whether one set of witnesses is able to testify to the whole aggregation of circumstances, or each circumstance be witnessed by a different set, so long as the details in the case are corroborated by the testimony of qualified eye-witnesses.

(4) When a legal number of qualified eye-witnesses testify to all the various steps in the case, and the culprit and the victim are of legal capacity, and no mitigating circumstances are presented by the defense, then the court—which, as in all capital cases, must consist of twenty-three qualified members—shall adjudge the culprit guilty of Abduction, the penalty for which is death by strangulation. See Mishnah Sanh. x. (xi.); Gem. *ib.* 85*b* and 86; Mek., Mishpaṭim Neziḳin, § 5· Sifre, Deut. 273; Maimonides, "Genebah," ix. 1-6; "Semag," Prohibition, 154.

S. M.

ABD-UL-ḤAMID II.: Thirty-fourth Ottoman sultan; born Sept. 22, 1842; succeeded his brother, Murad V., Aug. 31, 1876. The Turkish Jews rightly regard his reign as the inauguration and guaranty of their prosperous condition in the Turkish empire. Abd-ul-Ḥamid always showed the greatest solicitude for their welfare; and he was the first Turkish sovereign to grant them equality before the law with their Mohammedan fellow citizens. On ascending the throne he ordered the payment of regular salaries to the chief rabbis of Turkey—giving them by that means the position of officials of state—and initiated the practise of sending to the chief rabbi of Constantinople every Passover the sum of 8,000 francs for distribution among the poor Jewish families of the Turkish capital. When, in 1881, the Cretan government refused to allow Jews to take part in the municipal elections, Abd-ul-Ḥamid annulled the elections and sharply admonished the authorities for their infringement of the rights of the Jews. When, by the terrible conflagration that occurred in the Jewish quarter, Haskeni, in 1882, six thousand Jewish families of Constantinople were left without shelter, Abd-ul-Ḥamid did everything in his power to relieve their distress. In 1883, when the sultan conferred the order of the Osmanie on the chief rabbi of Constantinople, Moses Levy, he expressed his sympathy for the Jews and his reprobation of the persecutions endured by them in many European countries. "As for me," he said, "I am very much satisfied with the Jewish officials for their activity and zeal; and I will in the future increase their number." As a result of this promise the entry of Jews to official life in Turkey is now less difficult than formerly. The Council of State includes one Jewish member, Behar Effendi Ashkenazi; in the diplomatic service there are about fifteen Jewish chancellors, consuls, and vice-consuls, representing Turkey abroad; at home a few Jews are at the head of provincial governments; while several have been honored with the title of pasha—a title that until lately was never bestowed upon Jews. Quite recently the sultan showed his kindly feelings toward his Hebrew subjects by permitting persecuted Rumanian Jews to settle in Asia Minor, granting them land and pecuniary aid.

ABD-UL-MALIK. See Abd al-Malik.

ABD-UL-MEJID: Sultan of Turkey, 1839-61. If the Jews of Turkey owe their deliverance from the unremitting outrages and excesses of the janizaries to Sultan Mahmoud II., they are equally indebted to Abd-ul-Mejid for their recent political standing. In fact, as *rayas*, or subjects, the Israelites now enjoy all the privileges and liberties conceded to the Christians by the "Ottoman Charters," known under the names of "Hatti-Sherif of Gul-Hane" (Nov. 3, 1839) and "Hatti-Humayoun" (read at the Sublime Porte on Feb. 18, 1856), the former of which was confirmed by the grand viziers Riza Pasha (1843) and Reschid Pasha (1846). Since the promulgation of the first of these charters the testimony of Jews has been accepted in the courts of law; torture has been abolished; the Jews are no longer subjected to wilful confiscations, and those persons against whom they have cause for complaint are punished, if convicted, without regard to their rank or their dignity. The second charter, which in a measure was promised to Albert Cohn at the audience accorded him by the sultan on Aug. 20, 1854, besides reassuring the Jews of their right to personal liberty and the security of their possessions, contains the following new dispositions in their favor: In common with all other subjects, they receive equality before the law as well as in taxation; admission to public offices and to military service; religious liberty and unrestricted public instruction; revision of privileges and immunities of non-Mussulman communities; a guaranty of their immunities and of purely spiritual privileges; just representation of their communities in provincial and common councils and in the supreme courts of justice; and, lastly, the confirmation of the civil jurisdiction exercised in certain cases by the Council of Patriarchs in non-Mussulman communities.

It should be added that, owing to the difficulties in the application of a reform in the military service, the clause referring to this service was revoked.

Provisionally the system of replacement or substitution, which still exists, was admitted. Instead of the old *kharadj* (poll-tax), which took the place of military service, the *bedel y askeryeh* (exemption tax) was substituted, from which only the non-Mohammedan inhabitants of Constantinople were exempt. Acceding to the request presented by the ambassadors of the European powers and by Nathaniel de Rothschild, concerning the charge of ritual murder pending against the Jews of Damascus and the island of Rhodes, the sultan exhibited his regard for justice by issuing a firman, July 27, 1840, whereby he ordered a revision of the latter of these trials. This revision established the innocence of the accused. Moreover, at the instance of Moses Montefiore, who was received in audience Oct. 28, 1840, another firman was promulgated wherein the sultan, besides renewing to the Jews equality of rights and privileges, declared "that a thorough examination of the religious books of the Hebrews has demonstrated the absolute prohibition of the use of either human or animal blood in any of their religious rites. It follows from this defense that the charges against them and their religion are calumnies" (Nov. 6, 1840).

Justice was also accorded (May 11, 1860) to those Jews accused of having pillaged the Christian quarters in Damascus during the Maronite massacre perpetrated by the Druses and Mussulmans. Fuad Pasha dismissed these charges, and completely rehabilitated the Jews in public opinion.

Besides the improvement in the general condition of the Jews, this monarch's appreciation of his Jewish subjects is signalized by the appointment of Dr. Spitzer, a Jew, as his private physician, and the allowance, in 1856, of a monthly pension to the family of Carmona. This family, descended from the celebrated Chelibi Behar, who had been assassinated and whose fortune had been confiscated under the preceding government, had, through the intervention of the Board of Deputies of British Jews of London, obtained a firman to that effect. Several Jews were decorated during Abd-ul-Mejid's reign.

ABD-UL-MESIH. See Asher ben Levi.

ABEDNEGO (Aramaic, **Abed Nego;** עבד נגו, Dan. i. 7, ii. 49, iii. 12 *et seq.*; once ע׳ נגוא, iii. 29): The name given to Azariah, one of Daniel's three companions at the court of Nebuchadnezzar. The name is evidently a corruption of Abed Nebo (עבד נבו), "Servant of [the Babylonian god] Nebo," a name found (written in both the cuneiform and the Aramaic characters) in an inscription of the seventh century B.C. (Rawlinson, "Inscriptions of Western Asia," iii. 46, col. i. 81 *et seq.*), and in certain early Syriac documents (see Payne-Smith, "Thesaurus"). It is probable that the substitution of Nego (so also all the old versions) for Nebo was intentional, the purpose being to disfigure, or to get rid of, the name of the heathen deity (see Kohler in "Zeitschrift für Assyriologie," iv. 49). Similarly, the name Barnabas appears to be a slightly disguised form of Barnebo (בר נבו), "Son of Nebo" (see Barnabas). T.

ABEL (הבל).—**Biblical Data:** The younger brother of Cain and the second son of Adam and Eve. He was the first shepherd, while Cain was a tiller of the soil. The writer of Gen. iv. tells us that when the brothers came as a matter of course to present their offerings to God, the sacrifice of Abel—the firstlings of his flock—was preferred to that of Cain, who gave of the fruits of the earth. The acceptance of Abel's offering aroused the jealousy of Cain, who, in spite of the warnings of God, wreaked his vengeance upon the favorite by murdering him.

J. F. McC.

——**In Hellenistic and Rabbinical Literature:** Abel was regarded as the first innocent victim of the power of evil, represented by Cain; the first martyr-saint, with the title the Just. In Enoch, xxii. 7 the soul of Abel is the chief of the martyr-souls in Sheol, crying to God for vengeance until the seed of Cain shall be destroyed from the earth. In the vision of the bulls and lambs (Enoch, lxxxv. 3-6) Abel, whose death is deeply mourned by Eve, is the red bull pursued by Cain, the black bull. In the Testament of Abraham (recension *A*, chap. xiii., and recension *B*, chap. xi.) Abel is described as the judge of the souls:

> "an awful man sitting upon the throne to judge all creatures, and examining the righteous and the sinners. He being the first to die as martyr, God brought him hither [to the place of judgment in the nether world] to give judgment, while Enoch, the heavenly scribe, stands at his side writing down the sin and the righteousness of each. For God said: I shall not judge you, but each man shall be judged by man. Being descendants of the first man, they shall be judged by his son until the great and glorious appearance of the Lord, when they will be judged by the twelve tribes [judges] of Israel [compare Matt. xix. 28], and then the last judgment by the Lord Himself shall be perfect and unchangeable."

Josephus ("Ant." i. 2, § 1) calls Abel "a lover of righteousness, excellent in virtue, and a believer in God's omnipresence; Cain altogether wicked, greedy, and wholly intent upon 'getting' [קבל]."

According to the Ethiopic Book of Adam and Eve (ii. 1–15) and the Syrian Cave of Treasures, both works of half-Jewish, half-pagan (Egyptian) character (see Gelzer, "Julius Africanus," ii. 272 *et seq.*), the body of Abel the Just, after many days of mourning, was placed in the Cave of Treasures. Before this cave, Adam and Eve and their descendants offered their prayers; and "by the blood of Abel the Just" Seth and his descendants adjured their children not to mingle with the seed of the unrighteous.

It is, therefore, an awful curse hurled against the Pharisees when Jesus is represented as saying: "Upon you may all the righteous blood shed upon the earth come, from the blood of the righteous Abel [compare Epistle to the Hebrews, xi. 4, and I John, iii. 12] unto the blood of Zechariah, son of Berechiah, whom ye slew between the sanctuary and the altar" (Matt. xxiii. 35). From Josephus ("B. J." iv. 5, § 4) it appears that this murder took place thirty-four years after the death of Jesus.

Abel, according to Midrash, protested against Cain's denial of a divine judgment and of a future retribution, and declared for the existence of a divine judgment and a judge, a future world with reward for the righteous and punishment for the wicked. "With the first produce of the field the Lord blessed all the saints from Abel until now," says Issachar (Test. Patriarchs, p. 5). According to Pirḳe de-R. Eliezer (chap. xxi.), Abel's dog watched by his corpse to keep off the beasts of prey; and while Adam and Eve were sitting there, weeping and mourning, a raven came and buried a bird in the sand. Thereupon Adam said, "Let us do the same"; and he dug up the earth and buried his son.

Regarding the mourning over Abel, compare the Book of Jubilees, iv. 7, with the strange interpretation of Abel as "Mourning" (as if the name were written אבל). Compare Philo, "De Migratione Abraham," xiii., and Josephus, "Ant." i. 2, § 1. K.

God's favorable attitude toward Abel's sacrifice (Gen. iv. 4) is shown in the fact that it was consumed by fire from heaven. This is a haggadic idea known to Theodotion, accepted by the Christians, and found in the works of many Church Fathers, such as Cyril of Alexandria, Jerome, Ephraem Syrus, and Aphraates. In midrashic literature, however, it is found only in later works (Midrash Zuṭṭa, p. 35, ed. Buber, Berlin, 1899).

Woman was at the bottom of the strife between the first brothers. Each of the sons of Adam had a twin-sister whom he was to marry. As Abel's twin-sister was the more beautiful, Cain wished to have her for his wife, and sought to get rid of Abel (Pirḳe R. Eliezer, xxi.; Gen. R. xxii. 7, according to Ginzberg's emendation; Epiphanius, "De Hæresi," xl. 5, "Schatzhöhle," ed. Bezold, p. 34; compare, too, "The Book of the Bee," ed. Budge, pp. 26, 27).

Abel, stronger than Cain, overcame him in a struggle between them, but mercifully spared his life. Cain, however, took Abel unawares and, overpowering him, killed him with a stone (Gen. R. xxii. 18)—some say with a cane, or even that he choked him with his fingers (compare Ginzberg, cited below, pp. 229, 230, 298, 299).

The place where Abel was killed remained desolate forever, never producing vegetation (Midrash Canticles, ed. Shechter; "Jew. Quart. Rev.," 1894–95, vii. 160. Jerome, "Commentary on Ezekiel," xxvii.

18, supported by Jewish tradition, held it to be Damascus (Heb. דמשק: דם blood; שק drink). According to another version, the earth refused to take up Abel's blood (Apocalypsis Mosis, xl.).

Since man had no knowledge of burial, Abel's corpse remained unburied for some time. At God's command, two turtle-doves flew down; one died; the other dug a hollow place and moved the dead one into it. Thereupon Adam and Eve did likewise to Abel's body (Tan., Bereshit, § 10; Pirḳe R. Eliezer, xxi., see also Gen. R. *l.c.*; compare "Denkschrift d. Wiener Akademie," xx. 52, and Ginzberg, *l.c.* 295).

L. G.

——**In Mohammedan Legend:** The story of Cain and Abel is thus told in the Koran (sura v. 30 *et seq.*): "Recite to them the story of the two sons of Adam: Truly, when they offered an offering and it was accepted from one of them, and was not accepted from the other, that one [Cain] said, 'I will surely kill thee.' He [Abel] said, 'God only accepts from those who fear. If thou dost stretch forth to me thine hand to kill me, I will not stretch forth mine hand to kill thee; verily, I fear God, the Lord of the worlds; verily, I wish that thou mayest draw upon thee my sin and thy sin, and be of the fellows of the fire; for that is the reward of the unjust.' But his soul allowed him to slay his brother, and he slew him, and in the morning he was of those who perish. And God sent a crow to scratch in the earth and show him how he might hide his brother's shame; he said, 'Alas for me! Am I too helpless to become like this crow and hide my brother's shame?' And in the morning he was of those that did repent" (compare Pirḳe R. El. xxi).

No further mention is made of Abel; and the absence of his name here causes the commentator Baidawi and the historian Tabari to say that the two mentioned here were not sons of Adam, but "children of Adam" or merely descendants. The Arabic historians (Ya'ḳubi, Tabari, Ibn al-Athir, etc.) call Abel "Habil"; and, following Jewish tradition, they say that to each one of the brothers a sister or sisters were born. Adam wished that each should marry the sister of the other; but Cain's sister was the handsomer of the two and had been born in paradise; while Abel and his sister had been begotten outside of the garden. Adam suggested that the question should be settled by each one bringing an offering. Abel brought of the best of his flock, but Cain of the worst of the products of the ground. Fire fell from heaven, and consumed only the offering of Abel. The sister of Abel is called Kelimia; that of Cain, Lubda (compare Lebuda and Kelimat in the Syriac "Schatzhöhle," ed. Bezold, trans., p. 8; and in the "Book of the Bee," ed. Budge, trans., p. 25; in the Ethiopic Midrash the names are Aklemia and Lubuwa; see Malan, "Book of Adam and Eve," pp. 93, 104). According to ananother tradition, Adam's height shrank considerably through grief at the death of Abel.

G.

——**Critical View:** The Biblical account of Abel comes from one writer (J) only, and is so brief and fragmentary that much is left to speculation when we try to get the original form of the story. The name itself can not be satisfactorily explained, as it is only clear that the narrative comes from a very old tradition. The Assyrian word for son is *ḥablu*, and the derivation from a Babylonian source seems to be quite probable (Stade's "Zeitschrift," 1884, p. 250). The story is intended to set forth: First, the superiority of the pastoral over the agricultural occupation. This prejudice naturally inhered in the nomadic life. The fact confirms the antiquity of the original story. Secondly, it emphasizes the peculiar value of the choicest animal sacrifices as developed later in the ritual system. Thirdly, it shows how deep-seated was the jealousy and rivalry between people of different occupations, who in ancient times formed separate communities and were continually at war. Fourthly, there also lurks in the story a consciousness that certain people are more pleasing to God than others, and that the difference is, in part at least, connected with modes of worship and sacrifice. Neither Abel nor Cain is referred to in later Old Testament books. The New Testament has several references. J. F. McC.

ABEL ("Meadow"): Prefixed to six names of places, cognate with the Assyrian *abalu* (to be full, fruitful), and its probable derivatives *ablutum* (fulness) and *ublu* (vermin); Delitzsch, "Assyrisches Handw." p. 7. J. D. P.

ABEL-BETH-MAACHAH (**R. V., Maacah**): A place-name occurring six times in the Old Testament. The question whether Abel was one place and Beth-maachah another, or whether Abel-beth-maachah must be regarded as a single locality, is open to doubt. The name occurs in various forms: (II Sam. xx. 15, A. V.) "in Abel of Beth-maachah"; (I Kings, xv. 20, A. V.) "Abel-beth-maachah." In II Sam. xx. 14, however, we find (A. V.) "to Abel and to Beth-maachah," with which should be compared the Greek versions in II Sam. xx. 14 and II Kings, xv. 29. Owing to this apparent separation of the two names, it is possible that Abel and Beth-maachah may have been different places, especially as the name Abel occurs alone, undoubtedly used for the same town, in II Sam. xx. 18 (A. V. and R. V., "Abel"). These slight discrepancies are perhaps to be explained by the supposition that Abel was the chief, possibly the only, town of Maachah or Beth-maachah, a small Syrian state. It is important to note that the parallel passage to I Kings, xv. 20—that is, II Chron. xvi. 4—gives the place-name as ABEL-MAIM, "Abel of the waters" (so also both versions), which would agree well with the modern Christian village Abil, or Abil-el-Ḳamḥ ("of the wheat"—owing to the fertile soil). This settlement is situated in a well-watered district on the chief highway between BANIAS and the coast, on a lofty hill near the NAHR-BAREIGHIT. This place is probably identical with (A)-bi-il, mentioned in a mutilated passage in the inscriptions of Tiglath-pileser III., among other cities conquered by that king (II Kings, xv. 29). J. D. P.

The confusion of the ancient name Abel, meaning "Meadow," with the Abel of later date, meaning "Mourning," gave rise to the legend recorded in the Book of Enoch, xiii. Enoch sat down at the water of Dan to the south of Mount Hermon, and there read the petition of the fallen angels until he fell asleep. "And when I awoke I came to them and saw them sitting together weeping at Abel-maim [Ethiopic, "Ublesjael"], which is between Lebanon and Serion [Ethiopic, "Seneser"]." K.

ABEL-CHERAMIM (so in R. V.: but "plain of the vineyards" in A. V.): Mentioned only in Judges, xi. 33 (a Deuteronomistic document) as the place where Jephthah paused in his pursuit and slaughter of the Ammonites. According to Eusebius and Jerome ("Onomastica Sacra," ed. Lagarde, 2d ed., 96, 10; 225, 5) it was situated six or seven Roman miles from Philadelphia (Rabbath-Ammon) 'but it is not possible to define the exact modern site. In the time of Eusebius, the place was still noted for its vineyards. J. D. P.

ABEL-MAIM ("Meadow of the Waters"): A tract in Upper Galilee, now known as Abil-el-Ḳamḥ, taken by the Syrians under Ben-hadad (II Chron. xvi. 4). In the corresponding list of I Kings, xv. 20 it figures as Abel-beth-maachah, which town was taken by the Assyrians 732 B.C. (II Kings, xv. 29). G. B. L.

ABEL-MEHOLAH ("Dance-Meadow"): The name occurs three times in the Old Testament: (1) In Judges, vii. 22 it is stated that Gideon followed the Midianites as far as the "lip" of Abel-meholah under (*i.e.*, near) Tabbath. It has been conjectured that this "lip" is the bank marking the edge of the Jordan valley. (2) In I Kings, xix. 16 it is mentioned as the home of Elisha. (3) In I Kings, iv. 12 it appears as one of the limits of the province assigned to Baana, the son of Ahilud, one of Solomon's officers. It is highly probable also that Barzillai the Meholathite (I Sam. xviii. 19, II Sam. xxi. 8) was a native of Abel-meholah (see Barzillai). Eusebius and Jerome ("Onomastica Sacra," ed. Lagarde, 97, 11; 227, 35) state that Abelmaul (or 'Αβελμαελαί) was situated ten Roman miles south of Beth-shean (Scythopolis), in the territory of Issachar, and that it was inhabited in their time. This Maelai was situated where the Wadi-al-Maliḥ enters the Jordan valley (see also Testaments of Patriarchs, Levi, chap. ii.). J. D. P.

ABEL-MIZRAIM: Occurs only in Genesis (l. 11). It is interpreted by Septuagint, Vulgate, and the Peshito (followed by A. V.) as "Mourning of the Egyptians," or "of Egypt"; and there can be no doubt that it was intended to suggest a connection with Abel. The narrative states that Joseph, attended by a great company (ver. 9), took his father's body out of Egypt, and at the first village across the Canaanitish border held the customary funeral rites, peculiar to Syria even at the present time. In Genesis (l. 10) the locality is called "the threshing-floor of Atad" (= "buckthorn" or "bramble"; compare Assyrian *etidu* = buckthorn, *rhamnus*, Linn.), and its situation is given as being "beyond Jordan." This expression, "beyond Jordan," repeated in verse 11, seems very strange, as it implies that the mourning party went around the north end of the Dead Sea. On this account, Cheyne (in "Ency. Bibl." i. 7, 8) suggests, with some reason, that the original reading was Siḥor, a branch of the Nile, which is mentioned (Josh. xiii. 3) as marking the Egyptian-Canaanitish frontier. This would place Abel-mizraim in Canaan just over the Egyptian border, where one would naturally expect to find it.

From the analogy of such names as Abel-meholah, Abel-shittim, etc., it seems clear that Abel here has no connection with אבל, "to mourn," but simply means "meadow of Egypt" (compare Winckler in "Altorientalische Forschungen" p. 34, who thinks that Mizraim here is a later change from an original "Muṣri," in northern Arabia). J. D. P.

——**In Rabbinical Literature:** The rabbis say that both names, signifying respectively "The Mourning of Egypt" and "The Thorn Threshing-floor," are derived from the mourning over Jacob. According to the rabbinical account the sons of Jacob had scarcely crossed the frontier at Abel-mizraim with the body of their father, when their cousins, the sons of Ishmael, Esau, and Keturah, appeared in large numbers against them, believing that the Egyptians, of whom there were many in the procession, intended to invade Palestine. But when they perceived Jacob's bier, and Joseph's crown carried behind it in state, the thirty-six princes among them sent their crowns also, to be carried in the funeral procession. Hence the name "Thorn Threshing-floor"; for Abel-mizraim was so encircled by a row of crowns as to remind one of a threshing-floor, which is usually surrounded by a hedge of thorns (Soṭah, 13*a*; Tan., Wa-yeḥi, 18, ed. Buber, i. 222, and the parallels there cited). L. G.

ABEL-SHITTIM ("Acacia Meadow"): Found only in Num. xxxiii. 49; but Ha-Shittim ("The Acacias"), evidently the same place, is mentioned in Num. xxv. 1, Josh. iii. 1, and Micah, vi. 5. It is clear from these passages that this locality was a town, or perhaps a district, of Moab, which was the final headquarters of Joshua before he crossed the Jordan. Josephus ("Ant." iv. 8, § 1; v. 1, § 1) states that there was in his time a town, Abila, full of palm-trees, at a distance of sixty stadia (seven and one-half Roman miles) from the Jordan, and describes it as the spot where Moses delivered the exhortations of Deuteronomy. Robertson Smith may be right in identifying it with the modern Khirbet-el-Kefrein (Cheyne, "Ency. Bibl."), where ruins still exist. There is to this day an acacia grove not far from the place, although the palms mentioned by Josephus are no longer there. In I Sam vi. 18, the words "even unto the great stone of Abel" can contain no allusion to our Abel-shittim. The acacia (*shiṭṭah*), an Egyptian loan-word (Tristram, "Natural History of the Bible," p. 390), is the *Spina Egyptiaca* of the ancients and the *Mimosa Nilotica* of Linnæus. See Acacia. J. D. P.

ABEL, SOLOMON BEN ḲALMAN HA-LEVI: Russian educator and ethical writer; born March 11, 1857, at Novomyesto-Sugint (Neustadt), district of Rossieny, government of Kovno, Russia; died at Telsh, government of Kovno, Oct. 12, 1886. His success as a teacher at the Yeshibah of Telsh led to its being placed in the highest rank of the educational institutions of Lithuania. Abel is generally known by his posthumous work "Bet Shelomoh" (The House of Solomon), published at Wilna, 1893, a most characteristic product of modern Hebrew literature, showing exceptional nobility of tone in its application of rabbinic ideas to the current affairs of everyday life and business. It gives a full compendium of the rabbinical jurisprudence dealing with business and inheritance, though incidentally it contains the rules concerning the Sabbatical and Jubilee years, as also of almsgiving (*ẓedaḳah*), and it is distinguished from other works dealing with the same or similar topics by the excellence of its style, which is in a pure Neo-Hebraic, recalling in many respects that of Maimonides' "Yad ha-Ḥazaḳah," and by no means in the usual crabbed style of later Talmudic authors. It was especially designed by its author for popular use, though it has every mark of having been written by a thorough student and scholar of Talmudic law. The writer especially emphasizes the ethical side of his subject, as is shown by the following remark about taking interest from non-Jews:

> "The Torah did not forbid taking interest from non-Jews, for commerce entails such; but that the passage can not be construed as favoring usury may be seen from the fact that, according to the Talmud, viands otherwise permitted to Jews may not be eaten if they excite disgust. Thus, continued Abel, how much less is it permissible to do things which excite moral disgust, such as usury and the like, when the welfare of our soul must be of at least as much importance to us as the health of our body?"

Personally Abel was distinguished by his power of attracting young people by his modesty, kindliness, and enthusiasm for knowledge, which caused him never to pass a day without study. He was a student of political economy and wrote polemics against anarchism and socialism.

L. G.

ABELARD, PETER: French scholastic, philosopher, and theologian—the boldest thinker of the twelfth century; born 1079 in a small village near Nantes, France; died 1142 at the priory of St. Marcel near Châlons-sur-Saône. Abelard was one of the most acute, most rationalistic, and most contentious of the Christian theologians of the Middle Ages. Just as he was reaching the height of his fame as a theological teacher, he became involved in a love affair with Heloisa, the niece of Canon Fulbert, whom he secretly married; she, however, steadfastly refused to allow him to wreck his career by owning her as his wife. Her relatives wreaked their vengeance on him by emasculating him. The rest of his life was spent in monasteries, where, with broken spirit, he labored diligently to the end, being greatly hampered by the necessity of maintaining an orthodox position.

Abelard lacked the courage of a martyr, and, though radically opposed to the dominant Catholicism of the age, weakly yielded to ecclesiastical authority. There is no evidence of his acquaintance with medieval Jewish philosophy, which had then begun to influence Christian thought. He pictures Heloisa, his pupil and wife, as learned in Hebrew; and he must have had some acquaintance with the language, for he complains of its neglect by his contemporaries, though there is little evidence in his writings of its effective use. His "Colloquy between a Philosopher, a Jew, and a Christian" is intended as an apology for Christianity. The philosopher, a deist who finds "natural law" a sufficient explanation of the universe and a sufficient basis for correct living, argues with the Jew, seeking to prove to him that his religion is a failure, inasmuch as the promised rewards of the Old Testament are all temporal and carnal and, with the fall of the Jewish nation, have become impossible of attainment. The Jews, trusting in fallacious promises, despised and persecuted, are the most miserable of men.

The defense of Judaism by its representative is a vindication of the Old Testament from the charge of materialism and carnality, and an effort to show that, even in those troublous times, it was worth while to be a Jew. Abelard shows plainly that he strongly disapproved the oppressive measures that had limited the activity of the Jews to mercantile pursuits and money-lending; and he considered that these restrictions either superinduced or exaggerated the characteristics which made the Jews odious. Abelard earnestly desired toleration for himself, and there is reason to believe that he would have rejoiced in universal toleration. He went even so far as to say that the Jews had done less wrong by killing Jesus than if they had shown him mercy against their convictions ("Opera," ed. Migne, p. 659).

BIBLIOGRAPHY: Güdemann, *Gesch. des Erziehungswesens und der Cultur der Juden in Frankreich und Deutschland*, pp. 17, 18, note; Abelard's *Dialogus inter Philosophum, Judæum, et Christianum* is given in his *Opera*, ed. Migne, cols. 1611–1685, 1855; a Hebrew translation of a Russian biographical sketch of Abelard is found in S. Schreider's *Toledot Anshe ha-Shem*, 1873, pp. 5–15.

ABELE, ABRAHAM COHEN, OF KALISZ. See ABRAHAM ABELE GUMBINER.

ABELE ZION ("Mourners for Zion"): According to Jost and others, those Karaites who, after the capture of Jerusalem by the Crusaders, left the Holy City, and settling in Constantinople adopted this name in memory of their beloved former home. This is denied by Frankl (in "Monatsschrift," 1882, p. 74), who refers to Benjamin of Tudela's description (ed. Asher, p. 70) of the Abele Zion and Abele Yerushalayim ("Mourners for Zion and Jerusalem") in southern Arabia, who dress in black, live in caves, keep fasts during the week-days, and abstain from meat and wine, continually praying for the return of Israel, and bearing the name of Rechabites. Zunz, in his notes to Benjamin of Tudela, sides with Jost, although the Abele Zion mentioned by Benjamin on p. 111 are German Jews wearing black clothes in memory of Jerusalem. Hadassi, quoted by Frankl (*ibid.*), called himself "Ha-Abel" (the Mourner), not, as Jost and Fürst assert, because his father was a Jerusalem refugee, but from profound grief over Israel's exile, to which he often gives expression in the "Eshkol." The name "Abele Bet ha-'Olamim" (Mourners for the Eternal House) in the "Chronicle of Ahimaaz," ed. Neubauer, is rather an argument against the Crusader theory.

K.

ABELES, MARCUS: Physician and instructor (privat-docent) at the University of Vienna; born at Nedraschitz, Bohemia, in 1837; died at Vienna, Dec. 31, 1894. Having completed a classical course at Prague he was matriculated at the Vienna University in 1858, and was graduated from there in 1863 with the degree of M.D. Abeles did not at once become a practitioner, but continued his technical training at the Allgemeines Krankenhaus ("General Hospital") of Vienna. At the conclusion of his studies he left Europe and settled in Cairo, Egypt, where he soon gained a high reputation and commanded a large practise, besides occupying the position of director of the European Hospital there. His professional career in Egypt terminated in Alexandria, to which city he removed on being delegated by the Austrian government to the International Sanitary Commission.

In 1870 Abeles returned to Europe and settled in Carlsbad, practising with great success there during the summer months, and devoting the rest of his time to scientific research in Vienna. The results of his careful investigations became the property of the public when in 1884, upon the recommendation of the medical faculty of the University of Vienna, Abeles was invited to deliver to the students of his alma mater a course of lectures on internal pathology. In the same year he was appointed privat-docent at the university, which position he held till his death.

Abeles was a knight of the Imperial Austrian Order of Francis Joseph, and of the Order of the Italian Crown. His numerous essays treat chiefly of diabetes, and have been published in the "Jahrbücher der Kaiserlich Königlichen Gesellschaft der Aerzte," "Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften," "Wiener Medicinische Wochenschrift," "Zeitschrift für Physiologische Chemie," "Centralblatt für die Medicinische Wissenschaft," etc.

BIBLIOGRAPHY: *Jahrbuch der Wiener Universität*, 1893–94; Eisenberg, *Das Geistige Wien*, ii. 751.

A. S. C.

ABELES, SIMON: A supposed martyr of the Roman Catholic Church in Prague. According to the report of the Jesuit John Eder, he was killed by his father, Lazarus Abeles, March 21, 1694, because he persisted in his desire to embrace the Christian religion. The father, who was thrown into prison, strangled himself with his *tefillin*. Söbl, or Levy Kurtzhandl, was imprisoned as an alleged accomplice, and put to death with horrible tortures. The body of Simon was buried in the Teyn Church of Prague with great pomp and with the honors due a martyr. The report of the Jesuit is naturally one-sided, full of miracles and many improbabilities. An impartial investigation of the sources is still lacking.

Bibliography: Eder, *Mannhafte Beständigkeit des Zwölfjährigen Knaben Simons Abeles*, Prague, 1694—extracts from this work are found in Gustav Freytag's *Bilder aus der Deutschen Vergangenheit*; *Allg. Zeit. d. Jud.* 1841, pp. 514 *et seq.*, evidently from the same source.

D.

ABELITES (called also **Abelonii** or **Abelonitæ**): A North-African Christian sect, probably of gnostic antecedents, limited to a few small communities in the neighborhood of Hippo in the time of Augustine, late in the fourth or early in the fifth century. Doubtless the name refers to the son of Adam, who was supposed to have died childless. The recorded tenets of the sect were the following: (1) They contracted matrimony, yet abstained from connubial intercourse. (2) They regarded the procreation of children as unlawful, but sought to perpetuate their society by adopting for each husband and wife a male and a female child, who should inherit their property and adopt their continent form of married life. In case one of the children died, another was adopted in its stead. As they possessed considerable means, they found little difficulty in securing the needful children. The remnant of the party was destroyed under the emperor Arcadius in 407. In addition to the notice by Augustine ("De Hæresibus Liber," p. 87), they are mentioned in the anonymous work, "Prædestinatus," i. 87. Some have supposed that their founder was a certain Abel of the immediately preceding time; but there are no facts to support this theory. Others have connected the Abelites with the Essenes or Therapeutæ.

A. H. N.

ABELMAN, ILIA SOLOMONOVICH: A Russian astronomer; born at Dünaburg, now Dvinsk, in 1866; died at Wilna, December 29, 1898. His early education was received at the gymnasium of Riga, whence he graduated in 1887, gaining the gold medal. He proceeded to the University of Moscow, and, after graduating in astronomy and geodesy, took a year's course (1892–93) at the University of Berlin. He afterward worked in the observatories of Pulkovo and St. Petersburg. In 1887, while at the Riga gymnasium, he published "Sbornik Algebraicheskikh Zadach." His treatise "O Padayushchikh Zvyezdakh" was adopted by the University of Moscow as a text-book for young astronomers. Another of his works, "O Dvizhenii Nyekotorykh Meteornykh Potokov," was published in 1898 by the Imperial Russian Astronomical Society of St. Petersburg, of which he was a member. Abelman also published a series of articles on astronomy in the "Russkiya Vyedomosti," in "Novosti," in "Astronomische Nachrichten," and in some other German periodicals.

Bibliography: *Achiassaf*, 1899; *Voskhod*, Jan. 10, 1899.

H. R.

ABELSON, JUDAH BEN ISAAC: A merchant, who devoted the greater part of his time to study; lived toward the end of the eighteenth century at Sherwenty, in Lithuania. His devotion to the study of the Talmud was so intense that, according to his grandson, the rabbi of Kamienetz, for twenty years he did not remove his clothes for sleep.

Abelson wrote a methodology of the Mishnah and introductions to the Order of Ḳodashim and Ṭeharot under the title, "Zikron Yehudah" (Judah's Memorial). Only certain parts of the latter work have been published, the introduction to Ṭeharot, under the sub-title "Pitḥe Ṭeharot" (Gates of Purity), Wilna, 1851, and some contributions to a system of the Mishnah and Halakah under the title, "Huḳaḳ le-Zeker" (Engraved for Remembrance), Wilna, 1860.

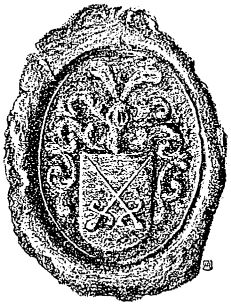
ABENATAR MELO, DAVID. See Melo, David Abenatar.

ABENDANA (אבן דנה): The name of a number of Spanish- and Portuguese-Jewish (Sephardic) families in Amsterdam and London. The first person to assume it was the Marano **Francisco Nuñez Pereyra,** who fled from Spain through dread of the Inquisition at the beginning of the seventeenth century and settled in Amsterdam, where he married his cousin Justa Pereyra. The children born of this marriage died, and, their death being attributed by his wife to the fact that he had not been received into the Covenant of Abraham, they separated until that rite was performed. He took the name David Abendana, and was one of the founders of the first synagogue in Amsterdam. He died Feb. 14, 1625. He left two sons, **Manuel** and **Abraham.** Manuel was ḥakam of the Amsterdam congregation and died June 15, 1667, having contributed much to the spiritual edification of his brethren. Besides those mentioned below, the names of other members of the Abendana family will be found in the lists at the end of D. H. de Castro, "De Synagogue de Portugeesch-Israelietisch Gemeente te Amsterdam, 1875." There is a modern Spanish name "Abendanu" ("Jew. Quart. Rev." x. 520).



Seal of the Abendana Family.

(From the Archives of the Amsterdam Portuguese Congregation.)

Aaron ben Samuel Costa Abendana: A proofreader in Amsterdam about 1726–30.

Abraham di Costa Abendana: A member of the Talmudic academy 'Eẓ Ḥayyim in Amsterdam in 1751.

Daniel Abendana: A brother of Jacob and Isaac Abendana, and author of an apologetic work dedicated to Isaac Levi Ximenes, bearing the title, "Respuesta á las Proposiciones de uno que Siendo de la Nacion Judaica por se Mostrar tan Católico Cristiano" (Manuscript in the Stadtbibliothek at Hamburg).

Isaac Ḥayyim de Brito Abendana: Ḥakam of the Portuguese community in Amsterdam, where he died at the great age of one hundred years, April 5, 1760. He published "Sermão Exhortatoria," Amsterdam, 1753. He was at the head of the Talmudical academy 'Eẓ Ḥayyim, known in Spanish as Árbol de las Vidas. Assisted by his colleagues, Solomon Ayllon and Daniel Israel Athias, and by his successors, Solomon Salem and David Cohen d'Azevedo, he took part in the preparation of a collection of rabbinical decisions, which appeared in nine volumes published in Amsterdam in 1732 and 1733, under the title "Peri 'Eẓ Ḥayyim" (Fruits of the Tree of Life).

M. K.

ABENDANA, ISAAC: Teacher of Hebrew at Oxford University. Born about the middle of the seventeenth century; died about 1710. He was a brother of the celebrated Jacob Abendana, the distinguished Spanish physician and ḥakam. Having lived at Hamburg and Leyden, where he studied medicine, he settled in England, and there became professor of Hebrew at Oxford University. Previously to this he had been at Cambridge, where it appears from the books of the senior bursar of Trinity College that one "Abendana the Jew" (presumably Isaac) received from the college £6 (about $30) per annum during the years 1664–66. He taught Hebrew and Rabbinic to any one who might engage to pay for his services, but he was not in any sense the incumbent of a chair at the university. The retaining fees paid by Trinity College and the payments from private pupils do not appear to have provided sufficient funds for him, as in 1671 he made a Latin translation of the whole Mishnah, which he sold to the university; and apparently when this work was finished he left Cambridge for Oxford. There he stood in high favor with the president of Hertford College, to whom he dedicated the Jewish calendars published in 1695, 1696, and later. Besides these calendars and the Latin translation of the Mishnah (which manuscript is in the Cambridge Library and consists of six large quarto volumes), Abendana wrote a comprehensive work entitled "Discourses on the Ecclesiastical and Civil Polity of the Jews" (1706). This work is an elaboration of the essays already commenced in the calendars. Like his brother, he entered into correspondence with several of the Christian savants of his time; and there are extant two letters addressed to Buxtorf the younger, in Hebrew and Latin respectively.

G. L.

ABENDANA, JACOB: Ḥakam of London; born 1630; died Sept. 12, 1695. He was the oldest son of Joseph Abendana, and attended the rabbinical academy De los Pintos in Rotterdam. In 1655 he accepted a call as ḥakam to Amsterdam. In the same year, on May 3, he delivered a memorial address in honor of the Maranos Nuñez and Almeyda Bernal, who had suffered martyrdom at the stake in Cordova. A few years later he published, in connection with his brother Isaac, the Bible commentary "Miklal Yofi" of Solomon ben Melek, together with his own additions known as "Leḳeṭ Shikḥah" (Gleanings). The work was published by subscription at Amsterdam in 1660, and a second edition in 1685.

The Abendanas were the first Jewish authors to compel approbation from contemporary Christian scholars, such as Johann Buxtorf in Basel, Johann Coccejus and Jacob Golius in Leyden, and others. In Leyden, whither Jacob Abendana had gone to obtain subscribers, he met Professor Anton Hulsius, whom he assisted very materially in his Oriental studies, and who endeavored to convert Jacob to Christianity. They maintained an epistolary dispute concerning the meaning of Haggai, ii. 9, which correspondence lasted from Sept. 24, 1659, to June 16, 1660, and was published by Hulsius in 1669. The attempt to convert him induced Abendana to translate the "Cuzari" of Judah ha-Levi into Spanish. This translation is highly prized for the care with which it was made. In 1675 Jacob delivered an address at the dedication of the great new synagogue at Amsterdam. He was called to London to succeed Ḥakam Joshua da Silva in 1680, and there he is said to have completed the translation of the Mishnah into Spanish. He died without issue in London, Sept. 12, 1695, and was interred in the Portuguese burial-ground at Mile End. His published works are: "Cuzari, Libro de Grande Sciencia y Mucha Doctrina. . . . Traduzido, . . . del Ebrayco en Español, Comentado por el H. H. R. Yahacob Abendana" (Cuzari, a Book of Great Wisdom and Plentiful Doctrine, Translated from the Hebrew into Spanish, and Explained by the Ḥakam Jacob Abendana), Amsterdam, 1663; "Sermon en Memoria di Abraham Nuñ. Bernal in Elogios que Zelosos Dedicaron en d . . . la Memoria. . . ."

ABENDANA, JOSEPH: A refugee from the rage of the Spanish Inquisition who settled in Hamburg; he was related to the ḥakam of that name. A relative, **Mordecai Abendana,** was prominent among the founders of the Hamburg Bank, in 1620. Jacob and Isaac, the sons of Joseph Abendana, who were born in Spain (not in Hamburg, as some assert), devoted themselves to learned pursuits. M. K.

ABEN-EZRA. See Judah and Moses ibn Ezra.

ABENGDOR (Abigdor, Abengedor) ḲANAH. See Ḳara, Abigdor.

ABENHEIM, JOSEPH: Violinist and orchestra leader; born at Worms in 1804; died Jan. 18, 1891, at Stuttgart. He received his first musical instruction from Schlösser, and in his early youth joined an orchestra at Mannheim. In 1825 he became a member of the royal orchestras at Stuttgart, playing both at the palace and at the theater. After a sojourn in Paris, and some further study under Reicha, Abenheim returned to Stuttgart, where he often replaced the official leader Lindpaintner. In 1854 he was put at the head of the orchestra. It was he who directed the so-called vaudeville performance given by members of the royal family and the nobility.

Abenheim composed many songs and pieces, among which were two "Nocturnes," "Polonaise," "Songs without Words," a hymn, "Der Deutsche Rhein"; also several overtures and ballets, as well as the music for the drama "Hariadan," which was produced at Stuttgart in 1842. Very few of his compositions have, however, been published.

ABERLE, RAB. See Abraham of Hamburg.

ABERLES, ISAAC B. ABRAHAM COHEN ẒEDEḲ OF CRACOW: Author of "Sefer Toledot Yiẓḥaḳ" (The Generation of Isaac), homilies on the Pentateuch, only the first part of which was published by his son Solomon, at Frankfort-on-the-Oder, in 1691 (see Benjacob, "Oẓar ha-Sefarim," p. 620).

K.

ABETMENT: The legal term for encouraging, aiding, or instigating an illegal act. The abettor may take no part in the actual commission of the offense and yet be liable for the thought or intention involved in his relations to the actual offender. In capital, or even corporal, punishment Talmudic jurisprudence takes no cognizance of thoughts or words (Sanh. 63*a*). To be liable to capital punishment by Talmudic law, one must be the principal actor in the crime. Hence, when one counsels, commands, or procures another to perpetrate a capital crime, that other, and not the instigator, incurs the death penalty for the commission of the crime (Ḳid. 43*a*). For, although the abettor is morally as guilty as the principal, the law will take cognizance of the principal only, it being an axiom in Talmudic jurisprudence that "One can not be an agent in an illegal act" (*ib.* 42*b*, and elsewhere).

In Homicide.

Again: *A* is provided with a shield against deadly arrows when *B* shoots at him; but, as the arrow darts from the bow, *C* deprives him of the shield, and *A* is killed. Though *C* personally aids in the killing, neither *B* nor *C* can be capitally punished, the latter not having fired the missile which was the direct cause of *A's* death (Sanh. 77*b*; Maimonides, "Hilkot Roẓeaḥ," iii. 11). But even where one is a principal in the crime, but does not accomplish it by himself—as, for instance, being one of several persons who simultaneously fire deadly missiles at a man and kill him—no capital punishment can legally be visited on the participant. From the Biblical passage (Lev. xxiv. 17, *Heb.*), literally translated, "If a *man* slayeth the *whole* life of a man he shall surely be put to death," the rabbis deduce the judicial maxim, "One person must slay the whole being" (Sifra, Emor, chap. xx.; Sanh. 78*a*); and since in the case before us no one has fulfilled this condition, no capital punishment can be inflicted on any single one of the parties to the crime (Sanh. *l.c.*).

Capital Crimes.

As in homicide, so in all capital crimes Talmudic jurisprudence does not convict more than one person of a crime which can be accomplished by a single person. There is, however, this difference: In all other cases of capital crime, when the slightest requirement for conviction has not been fully complied with, the accused is declared "not guilty before the human tribunal," and is liberated. But in cases of bloodshed the law is more rigorous: whoever wilfully occasions unlawful loss of life is prevented from repeating the crime by being deprived of his liberty: the abettor in murder is imprisoned (Sanh. 81*b*; Maimonides, "Hilkot Roẓeaḥ," ii. 5, iv. 8). A notable exception to these rules is the case of the instigator to idolatry. The Jewish commonwealth was a theocracy, a politico-religious state ruled by God; hence, idolatry among the Jews was an offense against the state, and any attempt to incite people to apostasy was, in the eyes of the Jewish law, an attempt to overthrow the state; it was high treason against the Divine King. Therefore, even though there was no bodily action on the part of the instigator, and even when his efforts did not succeed in leading any one astray, he was capitally punished (Sanh. 61*a*; Maimonides, "Hilkot 'Ab. Zarah," v. 2). And his punishment was the same—death by stoning—whether he was simply a *mesit*, trying to seduce an individual, or a *maddiaḥ*, endeavoring to mislead a community (Mishnah, Sanh. vii. 4).

Penal Offenses.

The juridical maxim, "One can not be an agent in an illegal act," for "where the orders of the master conflict with those of the servant, whose orders must be obeyed?" (B. Ḳ. 56*a*, Sanh. 29*a*) is applied by the rabbis to penal offenses as well as to capital crimes. Hence, when one suborns witnesses to defeat justice in a civil cause, and the witnesses are found guilty of testifying falsely, they, and not the suborner, are liable for the losses of the injured party. The suborner in such cases is declared "exempt from punishment at the instance of the human tribunal, but guilty before the court of heaven." In a case of mayhem involving damages and amercements, where, for instance, *A* procures *B* to commit an assault on *C*, not only will the court condemn *B* to pay all amercements accruing from the assault, but even if *A* had, prior to the assault, made himself responsible to his accomplice for all damages resulting therefrom, he is not bound to keep his promise. Moreover, where at his own solicitation *A* has a mutilation inflicted on himself by *B*, assuring *B* beforehand that no damages will be claimed, *A* has the legal right to claim, and *B* will be required by law to pay (B. Ḳ. 93*a*; see Rashi, *ad loc.*, and Maimonides, "Hilkot Ḥobel u-Mazziḳ," v. 11). In all these cases, the instrument of the offense has his option to do or not to do the bidding of the abettor: "If he so chooses, he obeys, and if he chooses otherwise, he obeys not" (B. M. 10*b*); and where there is option there can not be said to exist any agency, since the order of the master must supersede that of the servant. On the other hand, where the abettor has a legal right to command and to exact obedience, he will be held responsible for the misdeeds of his instrument. Thus, according to the Bible (Ex. xxii. 7), as interpreted by rabbinic law (Mishnah, B. M. vii. 8; Gem. *ib.* 93*a*, 94*b*), the gratuitous bailee, if he has taken only ordinary care of the deposit, is not responsible for it even when lost by theft. Now *A*, being such a gratuitous bailee, orders his slave to abstract the deposit: when the plot is discovered, *A* is held responsible for the slave's deed, and is subjected to the laws concerning convicted thieves. In this case the slave was obliged to comply with the command of his master; therefore his act is considered to be the act of his abettor, or as the Talmud (*ib.* 96*a*) expresses it, "The hand of the slave is like the hand of his master" (*ib.* 10*b*, 44*a*; "Shulḥan 'Aruk, Ḥoshen Mishpaṭ," § 292, 5, § 348, 8, Hagahot).

Civil Causes.

It is a principle in Talmudic jurisprudence, "One must not save himself at the expense of another" (B. Ḳ. 60*b* *et al.*). Accordingly, when one's premises are invaded by unlawful tax-gatherers, and he informs them of the whereabouts of another's property which he holds in bailment, his responsibility will depend on his circumstances. If he be known to be wealthy, the court will assume that the alien tax-gatherers were attracted by his goods; therefore, his pointing out the goods of another will be considered as an effort to save his own at the expense of another's, and he will be required to pay to the injured party compensatory damages. When, on the contrary, there is no reason for such an assumption, he being known to be a poor man, then the court will assume that the deposit was the attraction, and he will not be required to make good its loss. Again, when a place is invaded by pillagers, and one citizen points out to them the property of another, the informer's responsibility for the property carried off will depend on the presence or absence of duress. If force be used to compel him to reveal the hiding-place of the property, he will not be held responsible; but where no force is used on him, and he voluntarily exposes to the pillagers another's property, the court will adjudge him responsible for its loss. And even where force is used, the court will clear him only when his Abetment is confined to the bare pointing out; but where he personally hands over the property to the pillagers, he will be held responsible to its rightful owner. In case a man be expressly required to surrender his own property, and he reveals the whereabouts of his neighbor's, in addition to his own, after physical force had been exercised on him to wrest from him the disclosure regarding his own, even though he personally lays no hands on his neighbor's property he will still be required by law to make good his neighbor's losses (Mishnah, B. Ḳ. x. 5; Gem. *ib.* 116*b*–117*b*; Maimonides, "Hilkot Ḥobel," viii. 1–8; "Shulḥan 'Aruk, Ḥoshen Mishpaṭ," § 388, 2–8, "Semag," § 70).

Ritual Matters.

The Bible says, "And if any one of the common people sin through ignorance, when he doeth any one of the prohibitions," etc. (Lev. iv. 27, *Heb.*). From this the rabbis deduce the following two legal maxims with regard to ceremonial sins: "When one person commits a ceremonial sin, he is guilty; when two persons commit it, they are not guilty"; and the one is guilty "when he does the whole, but not when he does a part only" (Shab. 3*a*, Yer. *ib.* i. 2*c*). A third legal maxim reads: "Abetment has no reality"; that is, is not considered (Shab. 93*a*). Now, if on a Sabbath day one transfers an inanimate object from private premises to the public thoroughfare, or *vice versa*, he is guilty of a violation of the Sabbath, and if the deed was the result of ignorance of the sanctity of the day, he is obliged to make a sin-offering (Mishnah, Shab. i. 1); but if two able-bodied men transfer an object which each of them could manage by himself, neither incurs guilt; each of them having perpetrated but half of the transgression. Only when the performance of the task requires the services of both does the Law declare both guilty. And when one of the two persons is able to accomplish the task by himself, while the other is not, the weaker accomplice goes free; his Abetment does not constitute a punishable act, inasmuch as the other could accomplish the task without his assistance, while he could not do so without the assistance of the other (Mishnah, Shab. x. 5; Gem. 92*a*). The following is an exception to these rules: In case an Israelite has the corners of his hair cut away (compare Lev. xix. 27), both the barber, if he also is an Israelite, and the one whose hair is cut are punishable. In this case, while the subject of the transgression does virtually nothing, as he merely offers himself to the barber's shears, he is nevertheless amenable for Abetment (Sifra, Ḳedoshim, chap. vi.; Naz. 57*b*; Tos. *ib.* *s.v.* "R. Adda").

Physical or Moral Guilt.

Finally, it should be stated that in rabbinic law, in all the cases cited and in all similar ones, the abettor is held not guilty before the human tribunal, but guilty before the tribunal of heaven (Ḳid. 42*b*; B. Ḳ. 56*a* *et al.*); in other words, the perpetrator is not guilty legally, but is guilty morally. The same is the case with any one in whose power it is to prevent the violation of any law, but who fails to exert his influence in that direction. On this head the Talmud says: "Whosoever has it in his power to prevent a transgression by his household, and does not prevent it, is answerable for his household; if he has like power over a community, he is answerable for the community; and where his power extends over the whole world, he is answerable for the whole world" (Shab. 54*b*). Elsewhere the Talmud construes the Biblical saying (Lev. xxvi. 37) literally, "And they shall stumble, a man over his brother," as "They shall stumble, a man on account of the sins of his brother"; and the rabbis add: "This proves that all men are morally responsible for one another" (Sanh. 27*b*). On the other hand, where merit is concerned, rabbinic ethics teaches: "He who induces others to do a good deed stands in the sight of heaven higher than the one that does the deed" (B. B. 9*a*; Num. R. chap. xiii.; see also ACCESSORIES).

S. M.

ABI AND AB IN PROPER NAMES (אבי, אב): *Abi* and *Ab* are used both as the first element, as in Abijah, Abishur, Abinoam, Abner, and as the second element, as in Eliab, Joab, and Ahab. Their exact meaning is still under dispute. Each of the foregoing proper names may be a sentence; for example, Abinoam="Father is pleasantness"; or it may be only a phrase, as "Father of pleasantness." Further, the *i* in *Abi* may be either the connecting vowel or the pronominal suffix (first person). The weight of authority favors the sentence form. Opinions differ as to the phrase form: but it is safe to say that the forms with the connecting vowel and with the suffix have been confused, so that the translation will depend largely on the other element in the name (Gray, "Hebrew Proper Names," pp. 22–34, 75–86; see also NAMES). G. B. L.

ABI AYUB. See SOLOMON BEN ALMUALLEM.

ABI SAHULA. See ISAAC BEN SOLOMON IBN ABU SAHULA.

ABI ZIMRA (זמרא, זמרה; or perhaps **Zamiro**—זמירו): A family which can be traced from the thirteenth to the sixteenth century, of which the following were the more important: **Judah ben Ephraim,** 1245–1330: **Moses ben Judah;** his son, **Ephraim ben Moses,** 1470; ABRAHAM BEN MEIR, 1492; **David ben Solomon,** first half of the sixteenth century; **Isaac Mandil,** second half of the sixteenth century.

BIBLIOGRAPHY: Zunz, *Z. G.* p. 424; Steinschneider, in *Jew. Quart. Rev.* x. 528; idem, *Cat. Bodl.* No. 4850.

G.

ABI ZIMRA, ABRAHAM BEN MEIR: Flourished in Malaga, and seems to have left his home in 1492, going to Oran, and dwelling later in Tlemçen. He enjoyed quite a reputation as a poet, but very few of his writings have been preserved. His composition נפשי למתי תסכלי דרך ("My soul, how long wilt thou err in thy way?"), an address to his soul to appease its longing for truth and eternity, written in 1493, in Oran, deserves special mention.

BIBLIOGRAPHY: Zunz, *Z. G.* p. 424; idem, *Literaturgesch.* p. 528.

H. B.

ABI ZIMRA, DAVID BEN SOLOMON, known as **RADBAZ** (רדב"ז). See DAVID BEN SOLOMON ABI ZIMRA.

ABIAH. See ABIJAH.

ABIASAPH. See EBIASAPH.

ABIATHAR ("Father of Plenty").—**Biblical Data:** A son of Ahimelech or Ahijah (*melech* and *yah* apparently interchanging; compare I Sam. xiv. 3, xxii. 9); the chief priest of the sanctuary at Nob. He alone escaped from the massacre of his family by Saul (I Sam. xxii. 20) and found a refuge with David. By means of the priestly ephod which he brought with him, he was able officially to ascertain the will of YHWH (I Sam. xxiii. 9, xxx. 7). Having shared David's hardships, he also profited by the exaltation of David to the kingship. At the time of Absalom's rebellion Abiathar remained loyal to his old patron (II Sam. xv. 24–36); but later, like Joab, he espoused the cause of Adonijah rather than that of Solomon. On this account he and his family were banished to their estate at Anathoth, and their priestly rights and duties in connection with the Temple were transferred to the rival house of Zadok (I Kings, ii. 26–33). C. F. K.

——**In Rabbinical Literature:** The rescue of the chief priest Abiathar, in the massacre of the priests of Nob ordered by Saul, was fortunate for the house of David; for if he had lost his life, David's descendants would through divine retaliation have been entirely wiped out of existence at the hands of Athaliah (Sanh. 95*b*). It was David's acts that had really brought about the death of the priests, and to make amends he appointed Abiathar high priest. Abiathar retained the office until he was deserted by the Holy Spirit, without which the high priest could not successfully consult the Urim and Thummim. When David, on his flight from Absalom, recognized this loss in Abiathar, he felt compelled to put Zadok in his place. See Seder 'Olam R. xiv.; Yoma, 73*b*; Soṭah, 48*b*; Ber. 4*a* (Rashi); Sanh. 21*a*. Compare also Ginzberg, "Haggada bei den Kirchenvätern," i., on II Sam. xv. 24, 25. L. G.

ABIATHAR: A Palestinian amora, the contemporary of R. Judah (217–299) and of his successor, R. Ḥisda, the head of the Sura Academy, with both of whom Abiathar maintained a correspondence. The great number of Babylonian students who thronged to the Palestinian schools aroused his displeasure and induced him to remonstrate in a letter to Judah, the head of the Babylonian Jews (Giṭ. 6*b*). The reason of his displeasure was that the Babylonian students generally married before graduating (Ḳid. 29*b*, where Rashi's opinion is preferable to that of the Tosafot), and when they left for Palestine their wives and children became a burden on the community. He quoted in this connection Joel, iv. 3 (iii. 3, A. V.), and harsh as the parallel may seem, it is not unjustified (Giṭ. 6*b*). Thereupon R. Judah declared the emigration from Babylonia to Palestine to be a religious offense, but his denunciations were of no avail (Ket. 111*a*). Abiathar's letter to R. Ḥisda, the successor of R. Judah (Giṭ. *l.c.*), shows that the close connection between the Babylonian students and Palestinian teachers did not end with the declaration of R. Judah. Abiathar was revered as a model of piety and holiness, and the Babylonians believed that he was in spiritual communication with the prophet Elijah (see Giṭ. *l.c.* In the Midrash he is mentioned in Gen. R. lxxxviii. 2. Concerning his Haggadah, see Bacher, "Ag. Pal. Amor." iii. 563, 564). L. G.

ABIATHAR IBN CRESCAS HA-KOHEN. See CRESCAS, ABIATHAR IBN.

ABIATHAR, JOSEPH BEN ISAAC. See ABITUR, JOSEPH BEN ISAAC.

ABIATHAR HA-KOHEN OF CAIRO: *Nagid* (chief) of the Egyptian Jews, which office he inherited from his ancestors. He flourished at the end of the eleventh century and is known to have died before 1112. He took a prominent part in the Messianic movement of the year 1096, which assumed significant proportions. The first Crusade for the possession of the Holy Land was then in progress, and was considered by the Jews of that day as the harbinger of a new era. The Jewish community of Nablus, in Palestine, indeed, addressed a formal letter to Rabbi Abiathar, asking for positive information concerning the matter. The answer, together with the inquiry, was sent to Constantinople, the center of the Messianic agitation of the time. Abiathar's reply favored the movement, and, therefore contributed still more to the excitement among the Jews in the Mohammedan countries, which was further increased by the fact that his missive, through the indifference of the messenger, was not delivered into the hands of those to whom it was directed.

Abiathar had a son, Elijah, for whom the "Mushtamil" of Abu al-Faraj Harun was copied in 1112. His grandfather, Abiathar Cohen-Ẓedeḳ, met Hai Gaon in Jerusalem, according to the author of the "Sefer Ḥasidim," ed. Wistinetzki, p. 169.

L. G.

ABIATHAR HA-KOHEN OF SARAGOSSA: Founder of a widespread noble Spanish family that flourished in the fifteenth century. He had two daughters, Esther and Leah. Don Alphonso of Aragon, an illegitimate son of King John of Aragon, fell in love with Esther, who is said to have been very beautiful. After she had been baptized he married her, and of this marriage there were three sons and one daughter. The eldest son, John of Aragon, became count of Ribagorza and married a daughter of Lopez de Guerrea, the sole heiress to the large estates of her father. Alphonso, the second son, entered the Church, and in a short time became bishop of Tortosa and, under Ferdinand the Catholic, archbishop of Tarragona. The third son, Fernando, became commander of the Order of San Juan. Esther's granddaughter, Juana of Aragon, married Don Francisco de la Cavallesía, grandson of the Jew Bonafos. Leah married the Marano Martin Sanchez (see "Revista de España," xviii. 548). M. K.

ABIB ("Ears of Grain"): Name of the first month of the Hebrew year (Ex. xii. 2; compare xiii. 4), corresponding to the Babylonian and postexilian Hebrew Nisan. According to the Babylonian system, which probably prevailed in Palestine, it began in ordinary years in the last third of March, but in every third or intercalary year a month later (see CALENDAR). J. F. McC.

ABIBAS (literally, "Beloved," *i.e.*, "Ḥabib"): A mythical son of R. Gamaliel, the teacher of Paul, concerning whom a Christian legend existed that he and his father were baptized by John and Peter. Lucianus, bishop of Jerusalem in the year 415, wrote that Gamaliel appeared to him in a vision and revealed the fact that the body of Abibas lay exposed to the sun and rain, awaiting decent burial; that the body was recovered and properly buried. Thereafter the ashes of Abibas were used as remedial agencies in disease, and they are said to have effected miraculous cures.

K.

ABICHT, JOHANN GEORG: Christian Hebraist; born 1672 at Königsee, in the principality of Schwarzburg-Rudolstadt; died 1740. He studied first at Jena and afterward at Leipsic. On the completion of his university course he became instructor in Oriental languages at the University of Jena (1702). In 1707 he went to Danzig, where he became rector of the gymnasium, holding simultaneously the pastorate at the Church of the Holy Trinity. In 1729 he was called to Wittenberg to fill the offices of general superintendent and chief professor of theology at the university, as well as that of pastor at the city church.

Abicht excelled in Oriental languages and Hebrew archeology. His scholarly interests embraced both the history and the literature of the Jews. The rabbinic commentaries, in particular, claimed his attention; and he showed his partiality for them by translating selections into Latin. These translations, among which may be mentioned selections from the commentaries of Rashi, Abravanel, and Ibn Ezra, which appeared under the title "Selecta Rabbinica" (Leipsic, 1703), and a rendering of Isaiah di Trani's commentary upon the Book of Joshua, form but part of his publications. In the "Selecta Rabbinica" are contained, also, fragments from the theology of Maimonides; while under the title "Porta Accentuum" he produced in a Latin garb Moses Naḳdan's book on Hebrew accentuation, "Sha'ar ha-Neginot" (Leipsic, 1715). He also wrote in Latin a dissertation on "Sefer ha-Yashar" (Leipsic, 1732), an anonymous work on Jewish history. Among his numerous productions his "Methodus Linguæ Sanctæ" (Leipsic, 1718) is the one most generally known.

H. G. E.

ABIDA or **ABIDAH** ("Father Knoweth"): A son of Midian, and grandson of Abraham and Keturah (Gen. xxv. 4, and in the genealogical list in I Chron. i. 33). G. B. L.

ABIDAN ("Father is Judge"): A son of Gideoni, chief of the tribe of Benjamin after the Exodus (Num. i. 11, ii. 22, vii. 60, 65, x. 24). G. B. L.

ABIEL ("Father is God"): **1.** Father of Kish and Ner, and grandfather of Saul (I Sam. ix. 1, xiv. 51). Another account makes him the great-grandfather of Saul; Ner, by that account, being the father, instead of the brother, of Kish. The mistake is probably due to an error of the scribe (I Chron. viii. 33, ix. 39). **2.** One of the "thirty men" of David (I Chron. xi. 32). In the list given in II Sam. xxiii. 31, Abiel is called Abi-Albon, which Budde, "S. B. O. T." p. 80, reads Abi-Baal.

G. B. L.

ABIEZER ("Father is Help"): **1.** A clan of Manasseh, the most important member of which was Gideon, in whose time the seat of the clan was at Ophrah on the western side of the Jordan (Josh. xvii. 2; Judges, vi. 11, 24, 34, viii. 2; I Chron. vii. 18; Num. xxvi. 30 has Jeezer). **Abiezrite** is the Gentile name, and is found in Judges, vi. 11, 24, viii. 32; Num. xxvi. 30 has Jeezerite. **2.** Abiezer the Anethothite, one of the "thirty men" of David, and commanding officer of 24,000 men in the ninth month (II Sam. xxiii. 27; I Chron. xi. 28, xxvii. 12).

G. B. L.

ABIEZER, JUDAH BEN ISAAC, of Tiktin: A Jewish author of the nineteenth century. He resided in Jerusalem and wrote "Mishmeret ha-Berit" (The Charge of the Covenant), a defense of Judaism against the irreligious, published in Jerusalem, 1846; "Sha'are Ẓedeḳ" (The Gates of Justice), upon the prerogatives of the Holy Land and upon the sufferings of Jerusalem and of Safed in this century (Jerusalem, 1848); "Meḳor ha-Berakah" (The Source of Blessing), being the first part of a work in three volumes, called "Berakah Meshuleshet" (The Threefold Benediction), upon the Talmudical treatise Berakot (Lemberg, 1851). He is considered a great authority among rabbinical writers, and his work, "Sha'are Ẓedeḳ," is full of interesting details concerning Palestine. [A copy with his autograph in the New York Public Library shows that his second name was Judah, though this is not mentioned in the title-pages of his works or in bibliographies. H. R.]

BIBLIOGRAPHY: Fuenn, *Keneset Yisrael*, p. 6, Warsaw, 1886; *Ha-Eshkol* (encyclopedia), p. 111, Warsaw, 1887.

D. G.

ABIGAIL ("Father is Joy"): **1.** A daughter of Jesse and sister of David, who married Jether the Ishmaelite, and became the mother of Amasa (I Chron. ii. 16, 17). In II Sam. xvii. 25 she is again mentioned as the mother of Amasa, but is called Abigail the daughter of Nahash, and her husband is called Ithra the Israelite. This version of her husband's name is probably nearer the truth. For the rabbinical view see B. B. 17, and Targ. II Chron. ii. 17, after Yebamot, 77*a*.

2. Biblical Data: The prudent and beautiful wife of Nabal, a prosperous but avaricious Calebite noble of the town of Carmel in southern Judah (I Sam. xxv. 3). When Nabal refused to pay David compensation for his protection, Abigail on her own initiative met the outlaw prince with gifts and a conciliatory address, thereby winning his favor and delivering her husband from the threatened attack on his life. Nabal died soon after, and Abigail became the wife of David, bringing to him her wealth and sharing with him his trying experiences as a vassal of the king of Gath (I Sam. xxvii. 3, xxx. 5). While he was king at Hebron, she bore him a son, Chileab, or Daniel, who appears, however, to have died before reaching manhood (I Sam. xxv. 42; II Sam. iii. 3). C. F. K.

——**In Rabbinical Literature:** The Haggadah regards Abigail as one of the most remarkable women in Jewish history. She was one of the four great beauties, the other three being Sarah, Rahab, and Esther (Meg. 15*a*). Her charm was irresistible to all who gazed on her. David, who first beheld her while she was still the wife of Nabal, almost fell a victim to her charms and was only restrained by Abigail's moral strength and dignity (Meg. *l.c.*). She was also a prophetess: in saying to David, "This shall be no grief unto thee" (I Sam. xxv. 31), Abigail foreshadowed that another woman (Bathsheba) would one day play a disastrous rôle in his life. With all her superior qualities Abigail was not free from feminine coquetry; for when she begged David for mercy toward her husband, she added the seemingly insignificant words: "then remember thine handmaid" (*ib.*). It is for this conduct, unbecoming in a married woman, as the Haggadah observes, that, in the following verse, Abigail is written without the letter "yodh" (thus, "Abagal"), to intimate that Abigail had shown herself unworthy of the letter with which the name of God begins (Midr. Sam. xxiii.; see Meg. 14*a*, 15*b*; Midr. Teh. to Ps. liii.; compare also Sanh. ii. 4). L. G.

ABIGDOR: A prænomen, as well as a family name, which first appeared in the Middle Ages and which is still in use. In Russia it is pronounced "Vigder." It is supposed to be the Biblical אבי גדר ("Father of Gedor": I Chron. iv. 18); though some scholars have connected it with the Latin "Victor." The reason for the frequent use of the name is that, according to the passage in Chronicles, "Abigdor" was one of the appellations of Moses (see Lev. R. in the beginning of the first chapter). Compare AVIGDOR; see NAMES. G.

ABIGDOR, ABRAHAM (called also **Bonet ben Meshullam ben Solomon**): A physician, philosopher, and translator; born in Provence, probably at Arles, in 1350. He should not be confounded with Maestro Abraham Abigdor, who in 1386 was the proprietor of a house at Arles ("Monatsschrift," 1880, pp. 410, 411). Abraham Abigdor devoted his early life to the study of medicine and philosophy. At the age of seventeen (1367) he wrote "Sefer Segullat Melakim" (Royal Treasure), a work on logic in rimed prose—in the main a Hebrew imitation of the "Tendencies of the Philosophers," by Ghazali, but of independent value in the more purely logical portions of the book. Afterward he went to Montpellier to study medicine and to be instructed, as he himself writes, by Christian scholars. He translated the following Latin works into Hebrew: (1) Under the title, "Mebo bi-Melakah" (Introduction to the Practise of Medicine), the treatise on *materia medica* of the chancellor or dean of the faculty, Bernard Alberti, which treatise is based on book iv. of the "Canon of Avicenna." According to Steinschneider ("Hebr. Uebers." p. 777), the original Latin has been printed under the title "Gentilis de Fulgineo." (2) The "Medicationis Parabolæ" of Arnauld de Villeneuve (1378). (3) Under the title, "Sefer Mebo ha-Ne'arim" (Introduction for the Young), the elementary treatise on fevers, by Gerard de Solo (1379). (4) "Megillah," the treatise of Arnauld de Villeneuve on "Digestive and Purgative Medicines" (1381). (5) "Almanzuri," the abridged commentary of Gerard de Solo on the ninth book of Razi's "Ad Almansorem." The translation is greatly abbreviated, but remarks of his own, derived from personal experience, are added. (6) "Tratato" or "Higgayon," from the "Tractatus Summularum," a treatise on logic, by Pierre d'Espagne. (7) Explanations of the middle commentary of Averroes (Ibn Roshd) on the first three parts of the "Organon": the "Isagoge," the "Categories," and the "Interpretation." This is derived not only from Arabic but also from Latin sources.

In 1399 Abigdor assisted his son Solomon, then only fifteen years of age, in the translation of the Latin treatise, "De Judiciis Astronomiæ," or "Capitula Astrologiæ," of Arnauld de Villeneuve into Hebrew, under the title "Panim ba-Mishpaṭ." See ABIGDOR, SOLOMON.

S. K.

ABIGDOR COHEN: Italian rabbi, distinguished for learning and wealth, who lived in Ferrara about the middle of the fifteenth century. Joseph Kolon, the most important Talmudist of Italy at that time, speaks of him in terms of the highest respect. It can not be said with certainty that he is the author of the Vatican manuscript "Sha'are ha-Musar" (Gates of Moral Law), as Michael asserts. The name of the person to whom this manuscript is ascribed was borne by a number of medieval rabbis, and it is more probable that Abigdor Cohen of Vienna is the author; for he was held in especial honor in Rome, as may be inferred from almost every page of the "Shibbole ha-Leḳeṭ."

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 12.

L. G.

ABIGDOR BEN ELIJAH HA-KOHEN (called also **Abigdor Cohen Ẓedeḳ**): The earliest of the great Talmudists of Austria; flourished about the middle of the thirteenth century. He was the pupil of R. Simḥa of Speyer (who flourished about 1220), but he knew also R. Joel ha-Levi of Bonn (who flourished about 1175). Abigdor lived in Vienna, and from there administered the religious affairs of the Jewish population of Austria. Of his writings we possess only a commentary on the Pentateuch and the five Megillot, which still exist in manuscript. From various sources we know that he also wrote Tosafot to the treatise Ketubot. The most prominent scholars of Germany often applied to him for advice on difficult ritualistic problems, theoretical or practical, and attached great importance to his decisions. He had also distinguished pupils, among whom was the eminent Rabbi Meir of Rothenburg.

ABIGDOR DE FANO. See Fano, Abigdor de.

ABIGDOR ḤAYYIM. See Ḥayyim, Abigdor.

ABIGDOR BEN ISAAC: A French rabbinic scholar; lived during the second half of the thirteenth century. He is probably identical with the "Abigdor the Frenchman" mentioned in old manuscripts, who wrote a commentary on the Maḥzor. From a note in manuscript (Munich, No. 92), "Abigdor the Frenchman" appears to have been an adherent of the Cabala. It is possible that the rabbis Isaac and Abigdor of Béziers, whom Naḥmanides mentions in his letter to the Jewish community of that town, are "Abigdor the Frenchman" and his father Isaac. On the other hand, it seems improbable that Abigdor ben Isaac is identical with Abigdor mentioned in "The Mordecai." The latter is no doubt the Austrian Talmudist Abigdor ha-Kohen, who lived not long before and in the same region as Mordecai.

ABIGDOR BEN HA-KANAH. See Kanah.

ABIGDOR ḲARA. See Ḳara, Abigdor.

ABIGDOR BEN MENAHEM: German Talmudist; lived at the beginning of the fifteenth century. The Bodleian collection of manuscripts contains responsa by him. Abigdor ben Menahem, to judge from the place assigned to him in the collection, seems to have been a contemporary of R. Jacob Mölln (died 1427) and of R. Jacob Weil (1410). It is certain, however, that he was not living at the time when the responsa were collected, seeing that the collector puts after Abigdor's name the memorial formula זק"ן שמ"י (that is, *Zikron ḳedushato neẓaḥ, shalom mishkabo yihyeh* = The memory of the holy be everlasting; may he rest in peace).

A. B. D.

ABIGDOR BEN SIMḤA (called also **Abigdor Levi**; *nom de plume*, אל"ם=אביגדור לוי מגלוגא): A German author, who was born in Glogau in the second quarter of the eighteenth century. After having been a tutor for some time in Berlin, he removed to Prague in 1768, and there followed the same vocation. Early in 1773, while traveling through Saxony, he was arrested on a false charge, and lingered in the prison of Pirna without an examination for ten months. During his confinement he pursued his studies in the Bible, the Talmud, and medieval Hebrew philosophy without interruption. At last he found an opportunity to send a letter in Hebrew describing his predicament to Moses Mendelssohn. Mendelssohn's reply, dated January 13, 1774, was written in German, and, as anticipated, was opened and read by the authorities. When they saw that the Hebrew scholar whom they held in custody was a friend of Mendelssohn, they cleared him of all suspicion and set him at liberty. Through the aid of Isaac Dessau and his relative, R. Hirschel Levin (Ẓebi Hirsch) of Berlin, he was enabled to return to Prague.

The first work Abigdor published was an elementary Hebrew grammar entitled "Dabar Ṭob" (A Good Thing), with a table of conjugations, to which he added Moses ibn Ḥabib's "Marpe Lashon," Prague, 1783. In 1792 he edited the first series of letters which Mendelssohn had addressed to him (אגרות רמ"ד), and in 1797 supplemented it with a second series. This supplement forms the appendix to his poem, "Ḥotem Toknit" (The Perfect Seal), on which he prided himself very much. It is a didactic poem, and aims at proving that the teachings of the Bible surpass all the systems of philosophy ever invented, from Socrates to Kant. It does not, however, deserve the name of poetry: it is nothing but a string of feeble arguments couched in obscure language. The commentary which the author found necessary to supply does not make the poem more intelligible; nor does the acrostic, which gives the name and place of birth of the author, and the date of composition, relieve the poem of its glaring faults—lack of imagination and appropriate diction. In 1802 Abigdor edited the Pentateuch with the commentary of Mendelssohn and an introduction of his own. The last of his literary efforts was a poem embodied in S. W. Büchner's "Ẓaḥot ha-Meliẓah," Berlin, 1810.

I. D.

ABIGDOR B. SIMON COSTELLEZ or **KOSTELIZ.** See Kosteliz (Costellez), Abigdor b. Simon.

ABIGDOR, SOLOMON BEN ABRAHAM: A Hebrew translator; born in Provence in 1384. Assisted by his father, Abraham Bonet ben Meshullam, he, at the early age of fifteen years, translated Arnauld de Villeneuve's work, "De Judiciis Astronomiæ," from Latin into Hebrew under the title "Panim ba-Mishpaṭ" (Methods of Judgment). This translation still exists in manuscript. In 1399 he also translated Sacrobosco's "Sphæra Mundi" (On the Astronomy of the Spheres), under the title "Mareh ha-Ofanim" (The Indicator of the Spheres). The last-mentioned work was printed in Abraham bar Ḥiyya's "Ẓurat ha-Areẓ" (Offenbach, 1720), with notes by Mattathiah Delacret, Manoah Hendel, and others.

Bibliography: Steinschneider, *Cat. Bodl.* col. 2254; idem, *Hebr. Uebers.* pp. 643, 782.

L. G.

ABIGDOR ZUVIDAL: Italian rabbi of German descent, who flourished in the sixteenth century; died Nov. 13, 1601. David de Pomis, in the preface to his dictionary, "Ẓemaḥ David," states that Abigdor was of German descent. It was at the request of Abigdor and some of his friends that Judah Moscata was prompted to write his commentary on the "Cuzari." Abigdor was a disciple of Samuel

Judah Katzenellenbogen, and subsequently became his assistant in the rabbinical college of Venice. He participated in the controversy on the *miḳweh* (ritual bath) of Rovigo, on which several books were published ("Milḥamot Adonai," Venice, 1601), and his name is mentioned with respect even by his opponents. His disciple, Jacob ben Elhanan Heilprin, author of the responsa "Naḥlat Ya'aḳob," Padua, 1623, testifies to the high standing of Abigdor in the rabbinical world of his age. His eulogy was pronounced by Leon Modena in "Midbar Yehudah," No. 71, where a copy of the inscription on his tombstone is also to be found.

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 15.

D.

ABIḤAIL ("Father is Might"): **1.** The father of Zuriel, a Levite of the family of Merari (Num. iii. 35). **2.** Wife of Abishur (I Chron. ii. 29). **3.** Son of Huri, a Gadite resident in Gilead (I Chron. v. 14). **4.** Wife of Rehoboam and daughter of Eliab, the brother of David (II Chron. xi. 18). **5.** The father of Esther (Esth. ii. 15, ix. 29). In the two last-named passages the Septuagint reading gives Aminadab.

G. B. L.

ABIHU ("He is Father").—**Biblical Data:** He is mentioned in Ex. xxiv. 1, 9, where he and his brother are classed with Moses and Aaron as the leaders or chiefs of the "elders" of Israel, who go up into the mount to eat the covenant meal with YHWH.

In other passages Abihu is designated as the second son of Aaron and Elisheba (Ex. vi. 23), and with his father and brothers is consecrated to the priesthood (Ex. xxviii. 1). With Nadab he is put to death for offering strange fire to YHWH (Lev. x. 1; Num. iii. 2, 4, xxvi. 60, 61). Elsewhere in the Old Testament he is only mentioned in I Chron. vi. 3 and II Chron. xxiv. 1, 2.

G. A. B.

——**In Rabbinical Literature:** The haggadic representation of the death of Nadab and Abihu (Lev. x. 1–6) is wholly an idealization of the Biblical narrative. Despite the fact that the latter ascribes the death of the sons of Aaron to an offense committed by them, an old Midrash applies the verse in Ecclesiastes (vii. 15), "There is a righteous man that perisheth in his righteousness," to Nadab and Abihu, who, it is said, brought an incense-offering into the sanctuary in order to honor God, and while doing so were consumed by fire (Yalḳ. on Eccl. *l.c.* § 976; so also Jerome, in his commentary *ad loc.*). In accordance with this, the Midrash places the time of the offering of Nadab and Abihu before the fall of the heavenly fire, and indeed to bring down the fire was the very purpose that Nadab and Abihu had in mind (Sifra, Shemini Milluim, ed. Weiss, p. 44*b*; somewhat differently Ephraem Syrus; compare Gerson, in "Monatsschrift," 1868, xvii. 102).

The words in Lev. x. 2, "they died before God," are used because the death of the children of pious parents during their lifetime affects God closely (Lev. R. xx. 10). Moreover, since the death of the pious has an expiatory effect (*l.c.*), the Biblical account of their death is read on the Day of Atonement.

In order that the death of Nadab and Abihu may not appear entirely unjustifiable, the Haggadah seeks to reconcile God's justice with the blamelessness of pious men (Tan., Aḥre, 6, ed. Buber, 7): they died in an attempt to put off corporeality.

Philo testifies to the great age of this Haggadah when, in his customary allegorization of Biblical material, he says: "Nadab and Abihu, who approached God and gave up mortal life in order to receive immortality, were naked; that is, they broke every bond connecting them with mortal needs and passions" ("De Allegoriis Legum," ii. 15, ed. Cohn and Wendland, p. 101). The reference to nakedness is made clear by a Midrash, which remarks that the transgression of the sons of Aaron lay in the fact that they performed their duties מחוסרי בגדים without the prescribed apparel of the priests, which they forgot in their ecstasy. They were not necessarily naked, however, as Philo has it. According to another view, the sons of Aaron were killed by fire from God; their bodies and clothes were not consumed, the marvelous fire taking only their breath from them (Sifra, *l.c.*, ed. Weiss, p. 45*b*; Sanh. 52*a*). Eliezer b. Hyrcanus and Akiba find them blameworthy only in so far that they ventured upon so important an act without consulting Moses. R. Ishmael holds the view that they did not bring their sacrifice at the right time (Sifra, *l.c.*, ed. Weiss, 45*b*, and Aḥre, beginning; Yoma, 53*a*; 'Er. 63*a*). The latter explanation made its way into the Peshito, which adds to "strange fire" (אש זרה) the words "not at the right time." Originally, the addition was, of course, an explanatory gloss, which in course of time came to be embodied in the text. Following the trend of R. Eliezer's ideas, the later Haggadah attaches blame to the sons of Aaron because of their too great self-esteem. They remained unmarried, because they did not regard any woman as good enough for them. They even considered themselves more important than Moses and Aaron, and secretly longed for the time when they should stand at the head of the people (Pesiḳ., ed. Buber, pp. 172*b et seq.*; Tan., ed. Buber, *l.c.*, where the parallels are given in notes).

The endeavor of the old Haggadah to interpret the fault of the sons of Aaron as a trivial offense had, however, an effect contrary to that anticipated. When, at a subsequent period, the varying opinions were all accepted as correct, the sons of Aaron, instead of being represented as models of virtue, came to be invested with many mischievous traits (see Pesiḳ. and Tan. *l.c.*; especially the opinions of Levi and Bar Ḳappara, which are shared by the Church father Ephraem Syrus, as shown in "Monatsschrift," *l.c.*).

L. G.

——**Critical View:** The death of Nadab and Abihu probably represents the memory of some calamity to a portion of the priesthood, which, in the contest for the establishment of the Levitical law, was a warning to all who might violate that law.

G. A. B.

ABIHUD ("Father is Majesty"): A grandson of Benjamin, mentioned in the genealogical list of I Chron. viii. 3.

G. B. L.

ABIJAH or **ABIAH** (uncontracted, **ABIYAHU** = "My father is YHWH"): Name of several Old Testament personages, of whom the following are the most notable:

1.—Biblical Data: Son of Samuel, who, with his elder brother Joel, judged Israel in Beersheba. Their inefficiency and venality were the ostensible reasons that induced the elders of Israel to petition Samuel to appoint a king over them (I Sam. iii. 1–5).

J. F. McC.

——**In Rabbinical Literature:** Some rabbis endeavor to exculpate Abiah and his brother in part from the charges against them referred to in I Sam. viii. 2, 3. By Akiba and his disciples it is maintained that the offense of the sons of Samuel consisted in the inconsiderate and proud manner with which they appropriated what was theirs by right, or in exacting more than was their due. Others go so far as to declare that their sole offense consisted in the fact that, unlike their father, they did not travel about the country in order to ascertain its condition, but established themselves in one place, surrounded themselves by a royal court, and left the people to be exploited by officials (Shab. 56*a*). Others, again, assert that Joel and Abiah were originally wicked, but that they improved to such a degree that they were found worthy of prophecy (Ruth R. on ii. 1). On the other hand, Pseudo-Jerome, in his "Commentary on Chronicles" (vi. 14), undoubtedly following Jewish tradition, declares that Abiah, the judge, was the only sinner, but that his brother was blameworthy because he had not endeavored to turn Abiah to better ways. See JOEL, SON OF SAMUEL.

BIBLIOGRAPHY: Rahmer, *Ein Lateinischer Kommentar zu den Büchern der Chronik*, pp. 29-31, Thorn, 1866.

L. G.

2.—Biblical Data: Son of Jeroboam I., king of northern Israel, whose story is told in I Kings, xiv. 1–18. He having fallen sick, his mother went in disguise to the prophet Ahijah to inquire as to the prospects of her son's recovery. Ahijah, recognizing her, informed her that the child would die, and at the same time, predicted the calamities that were to befall the kingdom. The narrative in the accepted text associates all national disasters with the religious apostasy of Jeroboam. The Septuagint (Vatican and Lucian) has a briefer narrative; and critics have pointed out that this simpler, and presumably earlier, form of the story deals with a stage in Jeroboam's life antecedent to his public career, to which it makes no reference whatever (see H. Winckler, "Alttestamentliche Untersuchungen," pp. 12 *et seq.*).

J. F. McC.

——**In Rabbinical Literature:** The passage, I Kings, xiv. 13, in which there is a reference to "some good thing [found in him] toward the Lord God of Israel," is interpreted (M. K. 28*b*) as an allusion to Abijah's courageous and pious act in removing the sentinels placed by his father on the frontier between Israel and Judah to prevent pilgrimages to Jerusalem. Some assert that he himself undertook a pilgrimage.

L. G.

3.—Biblical Data: The second king of Judah, son of Rehoboam. His reign lasted three years (B.C. 918–915). From the account in I Kings, xv. 1–8 (where he is called Abijam), it would appear that he was a wicked ruler, "who walked in all the sins of his father," and that it was only for the sake of David, his ancestor, that the royal line was continued in him. "God gave him a lamp in Jerusalem to set up his son after him, and to establish Jerusalem: because David did that which was right in the sight of the Lord and turned not aside from anything that he commanded him all the days of his life, save only in the matter of Uriah the Hittite." The only other matter there touched upon is his relations with the northern kingdom, as to which it is merely said that there was constant war between him and Jeroboam I. In II Chron. xiii. much is said of Abijah, and all of it with direct or implied approbation. Indeed, no two accounts of the same person could be more contradictory. In I Kings, xv. 2, his mother is said to have been Maachah, daughter of Abishalom; this is confirmed by II Chron. xi. 20 in its account of the reign of Rehoboam. But in II Chron. xiii. 2 she is called "Michaiah, the daughter of Uriel of Gibeah" (see Targ. Chron. for the rabbinical view). The chronicler records an address by Abijah to Jeroboam before a battle with that monarch, congratulating the people of Judah upon their devotion to YHWH, and dealing minutely with the matters of worship and ritual in which they were superior to the people of the Ten Tribes, against whom the judgment of YHWH is invoked (II Chron. xiii. 4–12). The chronicler also gives a detailed account of this battle, in which Judah was victorious. We are warned by the case of Uzziah (Azariah) not to hastily infer from the silence of the Book of Kings with regard to events narrated in Chronicles that such events are unhistorical. There was doubtless a continuation under Abijah of the state of feud that had prevailed from the beginning of the schism; and the tradition of a signal victory gained by Abijah over Jeroboam must have had a well-grounded basis. But the details given in Chronicles are impossible. The number of men engaged in battle is greater than the whole adult male population of the kingdoms at any epoch, and much greater than that of any armies that ever faced one another during the world's history. As a result of his defeat, Jeroboam is said to have lost Bethel and two other districts with their towns. This was at best but a temporary gain for Judah. The chronicler adds that Abijah waxed mighty and married fourteen wives, and begat twenty and two sons and sixteen daughters (II Chron. xiii. 21). The context implies that this occurred after Abijah's accession and during his reign of three years. The account is closed with the statement that these and other facts are to be found in the Midrash of the prophet Iddo.

J. F. McC.

——**In Rabbinical Literature:** Although Abijah took up God's cause against Jeroboam, the idolatrous king of Israel, he was not permitted to enjoy the fruits of his victory over the latter for any considerable time, dying as he did shortly after his campaign (Josephus, "Ant." viii. 11, § 3). The rabbis recount many transgressions committed by Abijah against his fellow men, which resulted in drawing God's vengeance upon him more speedily than upon Jeroboam's idolatries. Thus it is stated that he mutilated the corpses of Jeroboam's soldiers, and even would not permit them to be interred until they had arrived at a state of putrefaction. Nor did Abijah show himself zealous in God's cause after all; for when, by the conquest of Bethel (II Chron. xiii. 19), the golden calves came into his possession, he did not destroy them as the law (Deut. vii. 25) enjoined. The rabbis also point out that it was improper for Abijah to accuse the whole of Israel of idolatry and to proclaim the appointment of Jeroboam as king to have been the work of "vain men, the children of Belial" (II Chron. xiii. 7), since in point of fact it was the prophet Ahijah, the Shilonite, who made him king (I Kings, xi. 37). For these reasons Abijah's reign was a short one.

L. G.

4.—Biblical Data: Mother of Hezekiah, king of Judah. II Chron. xxix. 1.

——**In Rabbinical Literature:** Abi saved the life of her son Hezekiah, whom her godless husband, Ahaz, had designed as an offering to Moloch. By anointing him with the blood of the salamander, she enabled him to pass through the fire of Moloch unscathed (Sanh. 63*b*).

L. G.

ABILA. See ABILENE.

ABILENE: A small district of Syria on the eastern slope of Anti-Libanus. It was so called from the town of Abila, on the northern declivity of Mt.

Hermon, about eighteen miles northwest of Damascus. The district was given as a tetrarchy to Lysanias by the emperor Tiberius about 26 B.C. (see Luke, iii. 1), and was bestowed upon Herod Agrippa by Claudius about 41 (Josephus, "Ant." xix. 51). Abila, called "Abila of Lysanias," to distinguish it from other places of the same name, was thought to be the burial-place of Abel, owing to the similarity of the names. J. F. McC.

ABILENE: A village situated northwest of Sepphoris (Neubauer, "Géographie du Talmud," p. 259). According to Grätz ("Gesch. d. Jud." 2d ed., ii. 257), a district of Perea (Lev. R. xvii.; Pesiḳ. Wa-yehi, 66*a*). G. B. L.

ABIMAEL: Son of Joktan (Gen. x. 28); found also in the corresponding genealogical list of Shem's descendants in I Chron. i. 22. G. B. L.

ABIMELECH ("My Father is King," or "My Father is Melech," probably the name of a deity): **1.** Son of Gideon (surnamed Jerubbaal), the great "judge" of Israel. By virtue of his father's dictatorship or semiroyalty, he claimed to rule over Ephraim. He was, however, merely the son of Gideon's concubine; and to make good his claim he resorted to force. Aided by his mother's relatives, he put to death all of his half-brothers except the youngest, Jotham, and ruled three years in Shechem. His adherents were mostly of the old Canaanitish race, to which his mother probably belonged. The Israelitish party rebelled and gained control in Shechem. After prolonged strife, Abimelech took the city by assault. While besieging the neighboring stronghold, Thebez, he was struck on the head with a millstone thrown by a woman. Conscious that he was mortally wounded, he commanded his armor-bearer to kill him at once with his sword. As a result of his death, Shechem and its environs were made permanently Israelitish. J. F. McC.

2. King of Gath, mentioned in the superscription to Ps. xxxiv. In I Sam. xxi. 20 he is called Achish.

3.—Biblical Data: King of Gerar, with whom both Abraham and Isaac came into close connection. The stories that are told in both cases are very much alike in all details, which induces the Bible critics to believe that there is really only one (Gen. xx., xxi., xxvi. 1-17). G. B. L.

——**In Rabbinical Literature:** One of the few pious persons among the heathens whose name became the typical appellation for the rare class of pagans designated as pious by the rabbis (Midr. Teh. xxxiv.). He was endowed with the gift of prophecy (Gen. R. lii.). His attempted seizure of Sarah (Gen. xx.) is explained by the fact that he was childless, and that he hoped, through his marriage with a pious woman like Sarah, to be blessed with offspring. When, therefore, Michael, Abraham's guardian angel, descended from heaven and wanted to kill Abimelech with his sword, the latter could plead in his defense that he was ignorant of the criminal character of his deed and had acted with good intentions (Pirḳe R. El. xxvi.). But as Abraham was really in part to blame for the conduct of Abimelech toward him, Abimelech's curse, "May this one that will be thine have a covering on his eyes" (haggadic translation of הנה הוא לך כסות עינים, Gen. xx. 16), took effect and resulted in Isaac's blindness in his old age (Meg. 15*a*).

Another occasion on which Abraham's conduct toward Abimelech incurs the reproach of the Haggadah is that of the consummation of the league of friendship between them, which was to continue in effect for four generations.

God said to Abraham: "Thou hast given seven lambs to Abimelech in concluding the league of friendship with him; by thy life, for seven generations shall I retard the joy of thy offspring; from Abraham unto Moses. Thou hast given him seven lambs; by thy life, seven righteous of thy race shall the Philistines [descendants of Abimelech] slay: Hophni, Phinehas, Samson, Saul, and his three sons. Thou hast given him seven lambs; by thy life, seven sacred possessions of thy people will his children destroy: the tabernacle, the sacred objects in Gilgal, Nob, Gibeon, and Shiloh, and the two temples. Thou hast given him seven lambs; seven months shall the holy Ark of the covenant abide in the land of the Philistines" (Gen. R. liv. 4; Midr. Sam. xii. 1; Yalḳ. § 103 on I Sam. vi. 1).

On the other hand, a very unfavorable picture is drawn by the Haggadah of the treatment of Isaac by Abimelech, wherein the latter allowed himself to be misguided by his envy. Among the inhabitants of Gerar the saying went, "I would rather possess the dung of Isaac's stables than the gold and silver of Abimelech." This exasperated Abimelech to such an extent that he sought to engage Isaac in a quarrel by declaring that the latter owed his wealth to the Philistines, to whom it rightfully belonged. In punishment for this, Abimelech, like Job, was visited by disease, and his house was robbed by thieves (Gen. R. lxiv. 7). L. G.

4. A priest mentioned in I Chron. xviii. 16, where he is erroneously described as the son of Abiathar, whose father he was. Elsewhere he is called Ahimelech. G. B. L.

ABIMI (a contraction of **ABBA-IMMI** or **ABBA-AMMI**): The name of several Amoraim, distinguished for proficiency in the Halakah. The most prominent of these are the following: **1.** A Babylonian halakist of the third century, always quoted without cognomen. Most of his doctrines have been transmitted through Rab Ḥisda, to whom, however, in later years he turned for information on some Baraitot which he had forgotten (Men. 7*a*; 'Ar. 22*a*). Rab Judah b. Ezekiel, the founder of the Pumbedita Academy, also reported Halakot in his name ('Er. 24*a*; Ḥul. 48*a*). Abimi has the tradition that, after the completion of the First Temple, the Mosaic Tabernacle, together with all its boards, hooks, bolts, pillars, and thresholds, was secreted in the subterranean chambers beneath the Temple (Soṭah, 9*a*; Suk. 16*b*; Giṭ. 79*a*; B. Ḳ. 13*b*; Sanh. 15*a* and 81*b*; Zeb. 26*a*; Men. 77*b*; 'Ar. 5*b*).

2. A Babylonian amora of the fourth century, disciple of Rabbah b. Naḥmani. He and his brother 'Efa (Ḥefa) are cited as "the ingenious scholars of Pumbedita" (Sanh. 17*b*). In the Palestinian Talmud he is designated as Abimi, the brother of Ḥefa (Yer. Ned. ii. 37*b*; Yer. Shebu. iii. 34*d*); but the Babylonian Talmud (Sanh. *l.c.*) gives Rabba as the name of his father (see, however, Bunk in "Rev. Ét. Juives," 1898, pp. 191-197). According to Ḳid. 39*a*, Abimi and his brother attempted to abrogate the Biblical law concerning uncircumcised fruit (Lev. xix. 23) for Babylon. S. M.

ABIMI B. ABBAHU: A scholar of the third century. Abimi's native country and parentage are doubtful. He is always cited as Abimi, the son of R. Abbahu; he was as fond of quoting Baraitot as was R. Abbahu of Cæsarea of collecting them; and once he applied to a R. Abbahu for legal advice (Ket. 85*a*). These circumstances point to Palestine as his native country and to R. Abbahu of Cæsarea as his father; hence Bacher ("Ag. Pal. Amor." ii. 101) so describes him. On the other hand, it is a remarkable fact that his name does not appear in the Palestinian Talmud, and that even where the latter quotes Abbahu as illustrating filial piety, the filial piety of Abimi, praised by his father in the Babylonian Talmud, is not mentioned. Moreover, Abimi never refers to Abbahu, and settles debts in Babylonia through Ḥama b. Rabbah b. Abuha (Ket. *l.c.*), who never was in Palestine. Frankel (Mebo, p. 60*a*), holding the two names Abbahu and Abuha to be identical, believes Abimi to have been a Babylonian, and a brother of Rabbah b. Abuha. Abimi is often mentioned as reporting Baraitot. One of these, treating of the honor due to parents, says: "One man feeds his father on pheasants and yet tires him of this world; while another yokes his father to the treadmill and yet prepares him for the enjoyments of the world to come" (Ḳid. 31*a*). Elsewhere this paradox is thus explained: The first case is that of one who was in the habit of furnishing his father with stuffed birds, and who, when the father once inquired, "Son, whence dost thou get all this?" replied, "Old man, eat and be silent as dogs do." The second is the case of one who was engaged in turning a millstone when his father was drafted to do public service. The son exchanged places with his father, remarking that he was more able to bear the abuses incident to such service than was his aged father (Yer. Peah, i. 15*c*; Yer. Ḳid. i. 61*c*.; compare Rashi to Babli Ḳid. *l.c.*). Abimi himself was cited by his own father as an example of filial piety. Though blessed with five learned sons, all of whom had been found worthy of ordination, he would not permit them to take his place in waiting on their grandfather. Once his father called for water to drink. Abimi hastened to bring it, and, finding his father asleep, remained reverently standing over him until he awoke. It is said that Abimi then and there conceived an ingenious explanation of the Seventy-ninth Psalm (see Lam. R. on iv. 11; Midr. Teh. *l.c.*). According to another Baraita cited by Abimi, the Messianic epoch of Israel will extend over a period of seven thousand years: for the Scripture says (Isa. lxii. 5), "As the bridegroom rejoiceth over the bride, so shall thy God rejoice over thee"; and as the bridal feast lasts seven days, and the Lord's day is equal to a thousand of man's years, it follows that the bridal feast between the Lord and Israel is to continue for seven thousand years (Sanh. 99*a*, Rashi *ad loc.*; see Shab. 119*b*; Ket. 85*a*; Shebu. 42*a*; 'Ab. Zarah, 34*b*; Ḥul. 63*b*). S. M.

ABIMI OF HAGRONIA (possibly **Agranum**; see Neubauer, "Géographie du Talmud," p. 347): A Babylonian amora of the fourth century, disciple of Raba b. Joseph and teacher of Rab Mordecai, the colleague of Rab Ashi. One of his aphorisms reads: "For the man whom women have slain there is no law and no judge" (B. M. 97*a*); that is, where a man suffers injury through his own weakness, he can not invoke the protection of the law (see Yeb. 64*b*; B. M. 77*b*; B. B. 174*b*; Mak. 13*b*). S. M.

ABIN R. (called also **Abun, Abuna, Bun, Rabin,** variant forms of the same name of Talmudic authorities and used promiscuously): Rabin is a contraction of R. Abin, and appears more frequently in the Babylonian than in the Palestinian Talmud. R. Abin and R. Abun, on the contrary, occur in the latter more frequently than in the former; while the abbreviated form, Bun, is peculiar to the Palestinian Talmud. Among the twoscore or more of amoraim cited in rabbinic literature by one or the other form of the name, the most prominent are the following:

1. A teacher of the second amoraic generation, some of whose halakic deliverances are preserved in the Palestinian Talmud through R. Eleazar ben Pedat (Yer. Ta'anit, i. 64*c et passim*). He is probably identical with Rabin Saba (R. Abin the Elder) of the Babylonian Talmud, who sat at the feet of Rab, and with the one who is said to have died about the time his son of like name was born (compare 3 below).

2. A Palestinian amora, junior contemporary of the preceding (Yer. Sheḳ. iv. 48*c*). He is mentioned, together with R. Measha and R. Jeremiah, as carrying on a halakic controversy with R. Abbahu II., R. Ḥanina ben Papa, and R. Isaac Nappaḥa (the Smith). R. Abbahu calls all of the opposition "youngsters"; he nevertheless manifests special regard for the intelligence of R. Abin, to whose approval he refers with satisfaction (B. B. 142*b*). The same compliment is paid to R. Abin by R. Zeira (Niddah, 42*a*).

3. An amora of the fourth and fifth generations, very frequently mentioned in both Talmuds and in contemporary rabbinic literature. Born in Palestine, where he was educated under R. Jeremiah (Shab. 63*b et passim*), Babylonian academies could nevertheless claim him as their disciple; for he frequently traveled between the two countries, from each of which he conveyed halakic decisions and exegetical remarks of his predecessors and contemporaries. Occasionally he transmitted to Babylon by letter Palestinian decisions (Ket. 49*b*; Niddah, 68*a*); but generally he delivered them orally, for he considered it one of the great distinctions of the Jewish nation that most of its laws were unwritten (Yer. Peah, ii. 17*a*). But, whether written or oral, his communications were treated with great respect, the most prominent Babylonian teachers of the fourth generation, Abaye and Raba, placing more reliance upon them than upon those of other learned rivals. R. Abin knew neither of his parents; his father having died shortly before, and his mother soon after his birth (Yer. Peah, i. 15*c*; compare Gen. R. lviii.). As his children died at an early age (Pes. 70*b*; Ḥul. 110*a*), there were no natural ties to bind him to his native country; and when, in the reign of Constantius, persecutions of the Jews occurred in Palestine, R. Abin, with a considerable number of scholars, deserted his native land and settled in Babylonia (Ḥul. 101*b*; compare Graetz, "History of the Jews," ii. 567). In his old age, however, he returned to Palestine, where he died, and where R. Mana ordered general mourning for his death (Yer. M. Ḳ. iii. 83*b*, top).

The following may serve as specimens of Abin's homiletic observations:

> Referring to Ps. xv. 4, "He that sweareth to his own hurt, and changeth not," R. Abin says: "That is, he who reduces his purse to the extent of self-deprivation, in order to do a good deed" (Midr. Teh. *ad loc.*).
>
> "Great is the power of the benevolent: they need not seek protection under the shadow of the wings of the earth or of any heavenly beings, but can take refuge under the shadow of the Holy One, blessed be He! Thus it is written (Ps. xxvi. 7), 'How excellent is Thy loving kindness, O God! therefore the children of men [practising it] take refuge under the shadow of Thy wings'" (Pesiḳ. xvi. 124*a*; compare Ruth R. to ii. 12).

S. M.

ABIN or **ABUN**: An eminent cabalist of Le Mans (about 1040), a descendant of R. Simon of Le Mans, and grandfather of R. Simon the Great, the contemporary of R. Gershom ben Judah of Metz.

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 25 and note; Zunz, *Z. G.* p. 565, reads *Abun*, as does also Gross, *Gallia Judaica*, p. 363.

K.

ABIN BEN ADDA: A Babylonian amora of the fourth century, disciple of Rab Judah ben Ezekiel and senior contemporary of Raba ben Joseph. Although no original thinker, he served the cause of both the Halakah and the Haggadah, by storing up in his mind and transmitting decisions and observations of his eminent predecessors, particularly those of R. Isaac. Among these is the following:

> "Whence do we learn that the Holy One—blessed be He!—is with those assembled in synagogues? It is said (Ps. lxxxii. 1), 'God standeth in the congregation of God' [A.V. "the mighty"]. And whence do we learn that, when ten persons are engaged in prayer, the Divine Presence [Shekinah] is with them? It is said, 'God standeth in the congregation of God' [*edah* signifying in rabbinic lore an assembly of ten persons]. And whence do we learn that the Divine Presence is with three persons sitting in judgment? It is said (Ps. *l.c.*), 'He judgeth among the judges' [A.V. "gods"]. And whence do we know that, when only two persons are engaged in the study of the Torah, the Divine Presence is with them? It is said (Mal. iii. 16), 'Then they that feared the Lord spake often one to another; and the Lord hearkened and heard it.' And whence do we learn that, even when a single individual occupies himself with the study of the Torah, the Divine Presence is with him? It is said (Ex. xx. 24), 'Wherever I cause my name to be remembered, there will I come to thee and bless thee'" (Ber. 6*a*).

S. M.

ABIN, BENEDICT. See Ahin, Bendich.

ABIN B. RAB ḤISDA (**Ḥasdi**): A Palestinian amora, a disciple of R. Johanan (Giṭ. 5*b*). In addition to some halakic opinions, a few exegetical remarks by him are preserved in the midrashic literature, from which it appears that he was a linguist and tried to define the meaning of Hebrew Biblical words by reference to cognate languages (Tan. Ki Tissa, ed. Buber; Pesiḳ. R. x.; Cant. R. to vii. 3 and 9). S. M.

ABIN B. ḤIYYA: A Palestinian amora of the fourth generation, and a colleague of R. Jeremiah. His teachers, R. Zeira I. and R. Hila, were among the greatest authorities of the third generation, and his younger contemporaries recognized him as an authority in halakic matters. After a short life of diligent study and earnest teaching he died, mourned by his contemporaries; and R. Zeira II. thus applied to him and illustrated the Scriptural passage (Eccl. v. 12):

> "The sleep of a laboring man is sweet, whether he eat little or much." "A king had hired many laborers, among whom there was one who accomplished more than was expected of him. The king, noticing this, often invited the man to accompany him on his leisurely walks. When the time came to pay the laborers, this one received as much as any of the rest; and when the laborers complained of partiality, the king replied, 'This man has accomplished in a couple of hours more than you have in a whole day.' So, R. Bun accomplished in the eight and twenty years which he devoted to the study of the Law what no other distinguished scholar could accomplish in a century" (Eccl. R. to v. 11).

S. M.

ABIN B. KAHANA: A Palestinian amora, one of the teachers of R. Abun ben Ḥiyya (Tem. 20*b*), and junior colleague of R. Hoshaya II. (Yer. Ter. viii. 45*c*). R. Jonah, of the fourth amoraic generation, transmits a halakic discussion in his name (Yer. Hor. ii. 46*d*). S. M.

ABIN HA-LEVI: A Palestinian amora of the second half of the fourth century, distinguished as an original haggadist. In the midrashic literature the title Berabbi is often appended to his name (Tan., ed. Buber, Wa-yera, 46; Ḥayye, 2; Wa-yishlaḥ, 21 *et passim*). The following maxim, which tradition ascribes to him, may here be quoted:

> "Him who forces the hour, the hour will force aside.
> Make way for the hour, and the hour will make way for thee."
> (Ber. 64*a*.)

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 357-432.

S. M.

ABIN NAGGARA: ("The Carpenter"): A Babylonian amora of the second and third generations. A carpenter by trade, he devoted his nights to study; and Rab Huna I., noticing the constant light in Abin's home, foretold that learned sons would issue from that house. His prediction was verified. Ḥiyya bar Abin and R. Iddi bar Abin were sons of Abin Naggara (Shab. 23*b*).

S. M.

ABIN B. NAḤMAN: A beloved disciple of R. Judah ben Ezekiel (B. M. 107*a*). He is mentioned as a transmitter of Baraitot (Yeb. 84*b*; B. B. 94*b*).

S. M.

ABIN BEN TANḤUM BAR ṬERIFON: A Palestinian scholar who, by a curious calculation, tries to prove that the Biblical saying, "That soul shall be cut off from his people" (Gen. xvii. 14), signifies a premature death before the expiration of the fiftieth year of age (Yer. Bik. ii. 64*c*).

S. M.

ABINA (called also **Abuna** or **Buna**): An amora of the third and fourth centuries, always cited without any cognomen. He was a Babylonian by birth, a disciple of Rab Huna I., and befriended by Geniba (Giṭ. 65*b*; Yer. Giṭ. vi. 48*a*), in whose name he reports a Halakah (Ḥul. 50*b*). Most of his knowledge, however, he seems to have acquired from R. Jeremiah b. Abba, who is likewise often cited in the Palestinian Talmud without patronymic (compare Shab. 12*b*; Yer. Shab. i. 3*b*); for it is in R. Jeremiah's name that he most frequently transmits decisions (Shab. 137*b*; Yer. Shab. xix. 17*b*). In Babylonia he had halakic controversies with Rab Ḥisda and Rab Sheshet (Ket. 24*b*, 43*a*); but in his later years he migrated to Palestine, where R. Zeira I. (Zera) and R. Jacob b. Aḥa became his friends. They and other amoraim of the third generation frequently reported Halakot they had learned from him (Yer. Pes. v. 32*c*; Yer. 'Er. iv. 21*d*; Yer. Yeb. iii. 4*c*; Yer. Ket. xiii. 36*a*; Yer. Shebu. vi. 37*a*). The rabbinic rule on the pronunciation of the Tetragrammaton (written YHWH and pronounced Adonai; see Adonai and Tetragrammaton) he bases on the passage in Ex. iii. 15, "This is my name forever, and this is my memorial unto all generations," applying the first to the written form (*ketib*), and the second to the reading (*ḳeri*) (Pes. 50*a*, Ḳid. 71*a*). A heretic once remarked to R. Abina (a variant reading attributes it to Abbahu): "It is written (II Sam. vii. 23), 'What one nation is like thy people, even like Israel,' an only nation on earth? Wherein consists your distinction? Ye also are included among us; for the Bible says (Isa. xl. 17), 'All nations before him are as nothing.'" To this R. Abina replied: "By one of your own people it has been established concerning us, as it is written (Num. xxiii. 9), 'He [Israel] shall not be reckoned among the nations'" (Sanh. 39*a*). The assumption that there were two scholars of the name of Abina unaccompanied by a cognomen has resulted from confounding R. Jeremiah b. Abba, when cited without his patronymic, with a later amora.

A R. Abuna Zeira (the younger) is mentioned in connection with his enforced violation of the Sabbath as a consequence of religious persecutions (Yer. Sheb. iv. 35*a*), but nothing more is known of him.

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 539, 540.

S. M.

ABINADAB ("Father is Generous"): **1.** A resident of Kirjath-jearim, who kept the Ark of the Covenant in his house during the twenty years immediately following its restoration by the Philistines (I Sam. vii. 1; I Chron. xiii. 7). In II Sam. vi. 3, 4, Gibeah is given as his home. **2.** The second son of Jesse (I Sam. xvi. 8; I Chron. ii. 13). He was one of the three sons of Jesse who followed Saul to fight the Philistines in the valley of Elah (I Sam. xvii. 13). **3.** A son of Saul (I Chron. viii. 33), who was killed in the battle of Gilboa while fighting against the Philistines (I Sam. xxxi. 2; I Chron. x. 2). He is also mentioned in the genealogical list of Benjamites living in Gibeon (I Chron. ix. 39). See also BEN ABINADAB. G. B. L.

ABINOAM ("Father is Delight" or "Father of Delight"; Ab may be the name of the Deity): Father of Barak; is mentioned in Judges, iv. 6, 12, v. 1, 12. In all the Greek versions the name is transliterated Abineem, except in the Alexandrine codex (Judges, iv. 12), where it is given as Iabin. This is a name similar in construction to Ahinoam and Elnaam, and may be rendered "My father is delight." The suffix *i* with "Ab" is not the sign of the ancient construct or genitive, but is the possessive ending of the first person. Cheyne ("Ency. Bibl." p. 19) understands *Abi* in Abinoam as referring to the Divine Father, and renders the name "The (Divine) Father is pleasantness"; but this is doubtful.

BIBLIOGRAPHY: Gray, *Hebrew Proper Names*, pp. 80 *et seq.*, where an excellent discussion of compounds with *ab* and *abi* may be found.

J. D. P.

ABINU MALKENU (אבינו מלכנו Our Father! Our King!): The initial words and name of a portion of the liturgy recited with special solemnity on the Penitential Days from New Year to the Day of Atonement inclusive. In the ancient liturgy the two invocations, "Our Father" and "Our King," found separately in the Bible (Isa. lxiii. 16, lxiv. 8: "Our Father!" also in the Itala version of Tobit, xiii. 4, and Isa. xxxiii. 22: "Our King"), are either placed together in corresponding sentences, as in the Eighteen Benedictions, the fifth and the ninth, "Forgive us, Our Father, for we have sinned! Pardon us, Our King, for we have transgressed!" or simply combined as in the prayer known as "Ahabah Rabbah" and in the Musaf of the Festivals: "Our Father! Our King! Reveal the glory of Thy kingdom to us speedily!" This combination became a standing formula, like "Our Father in Heaven!" or "Our God in Heaven!" particularly in penitential prayers. During a great drought the usual fast-day was held, and the Twenty-four Benedictions prescribed for such occasions were recited by Eliezer ben Hyrcanus, yet without avail; but no sooner did Akiba step forth and recite the prayer, "Our Father! Our King! Thou art our Father! Our Father! Our King! We have no King besides Thee! Our Father! Our King! We have sinned before Thee! Our Father! Our King! Have mercy upon us! Our Father! Our King! Act unto us for Thy name's sake!" than rain came (Ta'anit, 25*b*, according to the better version in Jacob ibn Ḥabib's "'En Ya'aḳob"). This story by no means implies, as has been assumed by many writers, that Akiba was the first to recite the "Abinu Malkenu," as quite the contrary is the case. That word of defiance to the worldly rulers, "We have no King but Thee!" originated in circles of which Akiba was only a late though a faithful follower. Of how many verses the original "Abinu Malkenu" prayer consisted it is difficult to tell. In our printed Talmud two verses only are mentioned in the story of Akiba: Alfasi has three. In all probability there was at first no fixed number or order, the arrangement being left entirely to the one who offered the prayer on the occasion.

The introduction of the "Abinu Malkenu" in the liturgy of the Penitential Days naturally led to certain changes and to a more or less fixed system. The confession of sin received the first place, and prayers for the New Year, for an inscription in the Book of Life, and (with a view to the Day of Atonement) for an inscription in the Book of Pardon and Forgiveness suggested themselves. Still, there remained a wide divergence in the various liturgies. According to one tradition ("Tanya," p. 74) the "Abinu Malkenu" consisted originally of nineteen verses, corresponding with the Nineteen Benedictions of the augmented "Shemoneh 'Esreh." There is, indeed, a relation between some of the verses of the "Abinu" and some of the Benedictions. "Our Father! Our King! bring us back to Thee in repentance!" corresponds with the fifth section of the "Shemoneh 'Esreh"; "Pardon our sins!" "Forgive our Transgressions!" with the sixth; "Send Healing!" with the eighth; "Inscribe us in the Book of Sustenance!" with the ninth; "Destroy the devices of our enemies!" "Let salvation sprout forth!" "Lift the horn of Israel!" and "Lift the horn of Thine anointed!" correspond with the tenth, twelfth, fourteenth, and fifteenth Benedictions respectively; "Hear our voice!" "Receive our prayer!" with the sixteenth; but the rest show no connection with the other ten Benedictions. Nor, in fact, are the nineteen verses singled out in "Tanya" found in Amram Gaon's text of the "Abinu Malkenu."

From Amram Gaon we learn that the "Abinu Malkenu," in the time of the Geonim, was regarded as an institution of the ancients, to be recited on the Ten Penitential Days. Jacob Asheri ("Ṭur," i. 602) writes that Amram Gaon's "Abinu Malkenu" contained twenty-two verses (this is probably the meaning of the words, "after the order of the Alphabet," which Zunz took too literally), and that it became a German custom to recite them both morning and evening after the "Shemoneh 'Esreh" during the Ten Penitential Days (whereas in Spain they were for some time recited only on New-year's Day and the Day of Atonement). In the "Seder Rab Amram" the number of verses has increased to twenty-five, in the Sephardic liturgy to twenty-nine, in the German to thirty-eight, in the Polish to forty-four, and in the Salonican to fifty-three. In the course of time the more rigidly pious also recited the "Abinu Malkenu" throughout the year, omitting it on Sabbaths and holy days, when penitential prayers were not in order. In the Reform Ritual the "Abinu Malkenu" is employed only on the solemn New-year's Day and the Day of Atonement. The traditional melody renders the recitation of the "Abinu Malkenu" by the reader (cantor) and the response by the congregation especially impressive (Zunz, "Ritus," pp. 118–120). K.

H. G. E.

ABIRAM ("My Father is the High One"): **1.—Biblical Data:** Son of Eliab, one of the conspirators against Moses (Num. xvi. 1; Ps. cvi. 17). Deut. xi. 6 places him in the tribe of Reuben. G. B. L.

——**In Rabbinical Literature:** Abiram—who obtained his name from the fact that he fled from God—belonged, together with his friend Dathan, to the quarrelsome and seditious personages in Egypt and in the wilderness who sought, on every occasion, to place difficulties in the way of Moses. Being identified with the two Israelites at strife who were the cause of Moses' flight from Egypt (Ex. ii. 13–15), the two were thus regarded as having interfered with him at the beginning of his career. Later, as punishment for their wickedness, they became poor and were degraded in rank; yet they did not cease their hostility to Moses, and opposed his first endeavor to deliver Israel. It was Abiram and Dathan who were the immediate cause of the bitter reproaches made to Moses and Aaron recounted in Ex. v. 20, 21. When, despite this, the exodus from Egypt took place, Dathan and Abiram tried to induce the people at the Red Sea to return (Ex. xiv. 11, 12); and in the failure of this attempt, they made an effort, through disregard of Moses' commands, to incite the people against their leader—Ex. xvi. 20 being applied to them—until they thought they had a following sufficiently numerous to risk the great rebellion under Korah. On this occasion, also, Dathan and Abiram were conspicuous for their wickedness. Not only were they among Korah's chief supporters, but they were impertinent and insulting in their speech to Moses, who, in his modesty and love of peace, went to them himself in order to dissuade them from their pernicious designs (Sanh. 109*b*; 'Ab. Zarah, 5*a*; Ex. R. i.; Num. R. xviii. 4). L. G.

2. The first-born son of Hiel, who died at the refounding of Jericho by his father (I Kings, xvi. 34; compare Josh. vi. 26). Perhaps he was immured, according to the well-known superstitious practise.

G. B. L.

ABISHAG.—Biblical Data: A beautiful Shunammite, brought by the servants of David to his harem to minister to the aged king in the hope of reviving his failing powers (I Kings, i. 1–5). After the accession of Solomon, Adonijah, his elder brother, sought through Bathsheba to secure Abishag as his wife. Solomon, interpreting this request for the wife of the late king as evidence of a plot on the part of Adonijah to strengthen his claim to the throne (since according to archaic law, a man's concubines became the inheritance of his heir), put his rival to death (I Kings, ii. 12–24). C. F. K.

——**In Rabbinical Literature:** Abishag, the Shunammite, though only half as beautiful as Sarah, merited the rank of queen on account of her beauty (Sanh. 39*b*). David did not marry her, since he had already the allotted number of eighteen wives (see Sanh. ii. 3, 21*a*), and he preferred to renounce the lovely virgin rather than send away one of his wedded wives (*ib.* 22*a*). Although Abishag never became David's wife, yet, since by virtue of her personal service she belonged to the royal household, it was treasonable on the part of Adonijah to petition Solomon to grant him the Shunammite as his wife. It was not fitting for a subject to appropriate things or persons that belonged to royalty (*ibid.*). L. G.

ABISHAI or **ABSHAI.—Biblical Data:** A son of David's sister Zeruiah. Abishai ranked as a general in command second only to his brother Joab (II Sam. x. 10, 14, xviii. 2, 5, 12). By saving David's life (II Sam. xxi. 17) and by the slaughter of three hundred warriors (II Sam. xxiii. 18), he secured a prominent place among the king's bodyguard. He was as relentless and cruel toward his foes as he was loyal to his family and king. David's moderation alone restrained him from slaying Saul as he lay asleep in his camp (I Sam. xxvi. 7–9). With Joab, Abishai treacherously murdered Abner in revenge for the death of their brother Asahel (II Sam. iii. 27, 30). He was a good example of those soldiers of fortune whose courage and blind devotion made David master of the Canaanitish kingdom. In the margin of I Chron. ii. 16 he is called "Abshai." C. F. K.

——**In Rabbinical Literature:** The rescue of David by Abishai, as narrated in II Sam. xxi. 16, 17, is elaborated by the Haggadah in the following manner:

David, on a hunting expedition, is enticed over the Philistine frontier by Satan in the form of a stag; he is then seized by Ishbi, the brother of Goliath, who intends to put him to death. David's distress, however, is revealed in a miraculous manner to Abishai—according to some, by the sudden turning of the water in which he is bathing to a blood-red color; according to others, through a sign given by a dove, the symbol of Israel (Ps. lxviii. 14). Abishai immediately sets off toward David, when, by another miracle, he is brought thither in the space of a moment (the Haggadah uses the phrase "*ḳefiẓat derek*"—jumping of the road—in this instance as well as in the wondrous journeys of several other pious men). On his arrival Abishai first encounters Orpah, the giant's mother, and, when he becomes aware of her evil intent toward him, slays her. Ishbi, on catching sight of Abishai, forces his spear into the ground, point upward, and seizing David in his hands, raises him on high in order to dash him upon the point. Thereupon Abishai utters the ineffable name of God, and therewith arrests David's descent midway. Both David and Abishai then pray to God for help; and as the latter again pronounces God's name, David falls to the ground unhurt. Both are immediately attacked by the enraged giant, who would soon have overcome them, but for the shock he experiences when Abishai informs him of his mother's death. This paralyzes him to such an extent that David and Abishai find no difficulty in slaying him (Sanh. 95*a*; compare also Jellinek, "B. H." iv. 140-141).

As with all other Biblical heroes, the Haggadah is inclined to see in Abishai also a man of spiritual prominence. The phrase used in II Sam. xxiv. 16, רב עתה ("it is enough now"), is translated by the Haggadists, "take the greatest (*rab*) among them now," a command to the destroying angel; the reference being to Abishai, whose demise was regarded as more important than that of the seventy thousand of the people, or even than that of the majority of the Sanhedrin (Ber. 62*b*; Midr. Sam. xxxi. end; Midr. Teh. xvii. 12; Pirḳe R. El. xliii.). L. G.

ABISHALOM. See Absalom.

ABISHUA ("Father is Riches"): **1.** Son of Phinehas and great-grandson of Aaron, the high priest, ancestor of Ezra (Ezra vii. 5). Found also in the genealogy of Aaron and the high priests succeeding him (I Chron. vi. 4, 5, 50). **2.** A grandson of Benjamin (I Chron. viii. 4). G. B. L.

ABISHUR ("Father is a Wall"): A Jerahmeelite, son of Shammai (I Chron. ii. 28, 29).

ABITAL: A wife of David, who bore to him, during his residence at Hebron, his fifth son, Shephatiah (II Sam. iii. 4, I Chron. iii. 3). C. F. K.

ABITUB ("Father is Good"): A Benjamite (I Chron. viii. 11).

ABITUR, JOSEPH BEN ISAAC BEN STANS IBN: Talmudist and liturgical poet, who, according to statements made by Moses ben Ezra, and according to one of Abitur's own acrostic poems, was born in Merida about the beginning of the tenth century. He died in Damascus about the year 970. The word Abitur is most probably derivable from the Arabic *Abi Thor*; yet it also appears in a variety of shapes, such as היתום and אליתום, which Meiri distorts into אביתום ן". The name Stans also occurs in different forms. It is found in the older authorities and in Moses ben Ezra's "Kitab al-Muḥadarah" as שנטאס, and is also written שטנאס, סטאנס, סאטנס. The identification of Abitur with Jose ben Jose, a poet earlier than Saadia, has long been recognized as erroneous.

Contest with Ḥanok.

From Merida, Abitur went to Cordova, which was destined to become his dwelling-place, where he sat at the feet of Rabbi Moses, "the prisoner of Bari," and became one of his most distinguished pupils. Upon Rabbi Moses' death, the congregation elected his son, Rabbi Ḥanok, as his successor; but Abitur, who had a following, though a smaller one, also aspired to the position. In the struggle which ensued the calif Al-Ḥakim favored Ḥanok, who, in order to silence and intimidate his opponents, excommunicated them. A further attempt to secure the calif's favor resulted in an intimation to Abitur that it was advisable that he should leave the country. Embittered by these experiences and by the burden of excommunication, Abitur went abroad to seek repose and, if possible, consolation and vindication; but nowhere did he seem to find favor: Rabbi Samuel Cohen of Fez would not even see him. In a letter written in Aramaic the homeless wanderer in vain set forth that the sentence of excommunication was both unjust and illegal: Samuel was not to be moved. Even the gaon then in office at Babylon—the tradition that it was Rab Hai is chronologically impossible—considered that Rabbi Ḥanok's sentence must be respected, and accordingly denied Abitur an interview. Abitur's last effort having failed, he lost all hope of obtaining the position at Cordova; but this harsh treatment served only to make him more resigned to his fate. At this time, however, a change took place in his prospects; for a certain silk manufacturer of Cordova, Jacob ibn Gau, a friend and former patron of the exile, was appointed supreme head of the Jewish communities from "Segelmesa unto the Douro." He hastened to depose Ḥanok and to cause the heads of the congregation to invite Abitur to return and become the rabbi of Cordova. But Abitur declined the invitation and vigorously condemned the wrong intended to Ḥanok, "a man whose equal could not be found from Sepharad [Spain] to Babylonia."

Abitur's Literary Work.

Unfortunately, very few of the literary productions of Abitur have been preserved, owing in some degree, no doubt, to the sentence of excommunication under which he suffered. There is a tradition recorded by Abraham ibn Daud that he translated into Arabic part of the six Orders of the Mishnah for the library of the calif Al-Ḥakim, a lover of culture. The few responsa which have been preserved show us that Abitur was considered by his contemporaries an authority in Talmudic law. His diction is tinged with Aramaic, of which language he seems to have been very fond; for example, his commentary on the Psalms is full of Aramaisms. Of this commentary only a few fragments are known, and these resemble the Midrash in style.

But it was in the field of poetry that Abitur especially distinguished himself. Alḥarizi relates that Abitur was the first in Spain to compose a Ma'amad. There exist a few fragments of it, to which the printed 'Abodah (poem on the sacrificial service for the Day of Atonement) belongs. In contents, the poem resembles other piyuṭim or liturgical poems. After an introduction declaring the praise of God, the poet rehearses, in the 'Abodah proper, the Biblical history from the Creation down to Aaron, and adds a description of the sacrificial services in the Temple on the Day of Atonement, according to the descriptions of the Bible and the Talmud. The distinguishing features of Abitur's 'Abodah—features in which he far excels other poets—are the skilfully involved form and the manifold rimes and acrostics which he employs. The poem consists of twenty-three strophes, each of four stanzas; each stanza of two halves, again divided into halves: the strophe thus contains eight verses, and each stanza four half-verses, which rime on the plan *a—c*, *b—d*. The strophes may properly be said to proceed in alphabetical order, since each strophe with its eight verses or lines begins with one of the twenty-two letters (see the strophe printed below, which begins with Aleph), while the last strophe (the twenty-third) contains the author's name, given acrostically. This system is further complicated by the internal arrangement of the verses, their words, and the system of rimes. As to the former, the first, third, and fifth verses contain the strophe-letter twice; that is, initially in its first two words; whereas in the second, fourth, sixth, and seventh, the strophe-letter appears only once, initially. The letter of the next strophe is indicated initially in the second word of the seventh verse and in the first word of the eighth. The rime is set by the second word of the first half-verse (*a*), for the ending of the second half-verse (*b*), and the end of the stanza (*d*), while the riming of the third half-verse (*c*) is left open. Thus the second word of each stanza rimes with the last word of the same and with the first word of the next stanza.

The climax of the whole system is reached in the manipulation of the fourth half-verse of every stanza, which not only rimes but consists of a Biblical quotation of the required number of feet. The whole 'Abodah (omitting the introduction) is preceded by two verses, which are constructed on the same plan. In illustration of the foregoing description the opening of the 'Abodah is here presented:

1 א֯להים א֯ל — בך יצדקו צדוק ‖ כל זרע ישראל
2 א֯ז בטרם חוג ורוק ‖ ומעולם ועד עולם אתה — א֯ל.

* * *

1 א֯ל א֯חד — גדול ורב ‖ ארוממנו בלי פחד
2 א֯ף ממזרח וממערב ‖ ה" אחד ושמו — א֯חד.

3 א֯חד א֯להים — מיוחד בפי כל ‖ בורא ארקים וגבוהים
4 א֯פס זולתו כל יכול ‖ מלך כל הארץ — א֯להים.

5 א֯להים א֯ומר — יחודו מפי לא אכרית ‖ איחדנו בלי ממר
6 א֯רץ וערץ ערבית ושחרית ‖ יום ליום יביע — א֯ומר.

7 א֯ומר ב֯דעת אז מלל ‖ בשומו אדני מטבעת
8 ב֯שלשה עולם שכלל ‖ בחכמה ובתבונה — וב֯דעת.

All these self-imposed shackles of the rime are borne by the poet with the greatest ease: all difficulties are admirably surmounted. Novel word-formations and comparatively few instances of harshness of expression are peculiarities inherent in the piyuṭic style, and are not the results of any straining after artificial form.

Strange, often interesting, expressions are found in the less artificial poems of Abitur, and indeed even in his prose commentary on the Psalms. Of other pieces by Abitur, the introduction to the prayer ברוך שאמר in the morning service for the Atonement Day is most notable; it begins ברוך אשר אשש. This poem, which is also a fragment of the "Ma'amad," was made the subject of a commentary by Simon ben Ẓemaḥ Duran, written for a pupil, David ben Samuel Ḥalajo. Besides the "Ma'amad," Abitur composed a large number of piyuṭim for Sabbaths, New-year's Day, and the three Festivals, a lengthy set of Hosh'anot for the Tabernacles festival, as well as propitiatory prayers (*seliḥot*) for the days of penitence. His productions are embodied in the Provençal, Catalonian, African, and many other liturgies.

The poem אשר אשש, wrongfully ascribed to Isaac ben Giat, is printed with Duran's commentary in Goldberg's חפש מטמונים, pp. 85–92.

H. B.

ABIUD: Son of Zerubbabel, from whom was descended Joseph, the husband of Mary, the mother of Jesus (Matt. i. 13). He is omitted from the list of Zerubbabel's sons given in I Chron. iii. 19, 20.

G. B. L.

ABLAT: A Gentile sage and astrologer in Babylonia. The close friendship which existed between him and Mar Samuel (died 254) shows that the legal restrictions of their religion did not prevent the Babylonian Jews from social communication with their heathen neighbors. An anecdote given in 'Ab. Zarah (30*a*) illustrates the kind consideration and courtesy which prevailed on both sides. Ablat was a guest in the house of Mar Samuel on an occasion when wine was usually served. The rabbinic law forbids Jews to use wine that has come in contact with idolaters. Knowing this, Ablat declined to take his wine before Mar Samuel, whom he called "the wisest of the Jews." But Mar Samuel, anticipating this very difficulty, had met it by ordering mulled wine, which was not under the ban; and he thus overcame a restriction that practically prevented his friend from partaking of his hospitality (Shab. 129*a*).

Ablat enjoyed great popularity among the Jews, as is shown by the fact that the Jerusalem Talmud (Shab. iii. 6*a*) cites a question respecting a rabbinical precept put by him to a Jewish scholar and the latter's answer.

L. G.

ABLITAS, EZMEL (SAMUEL) DE: Son of Don Juceph; born in the village of Ablitas, near Tudela, from which place he derived his name; died in 1342. He was known as "the rich Jew of Ablitas." He had business relations with the King of Navarre and Aragon. The King of Aragon and the nobles of Navarre borrowed from him large sums, which they failed to repay. On this account Ablitas was unable to fulfil his obligations to the state. After his death his grandson, Don Ezmel de Ablitas, and a Christian citizen of Tudela were made administrators of his estate and obliged under oath to deliver his whole property, consisting of furniture, money, gold and silver vessels, vases, carvings, and the like, his whole fortune, both personal and real, being confiscated in 1343 by the Queen of Navarre. How large a sum must have come to the treasury by this confiscation can be seen from the record of documents published by Jacobs—a single indebtedness from the king of £53,000 is cited (see "Jew. Quart. Rev." viii. 487). Of his sons two are mentioned, **Funes** and **Judah.** The latter name is found in a document at Pamplona (Jacobs, "Sources of History of Jews in Spain," xxxviii. 85). **Don Solomon de Ablitas,** under Carlos II. of Navarre, was *administrador de los bienes de su consejero* (administrator of the property of his counselor), 1362–67. An **Esezkiel de Ablitas** (1422) is mentioned in Jacobs' "Sources."

ABLUTION: For the purpose of actual or ritual purification, ablutions or washings form an important feature of the Jewish religious ceremonial. Judaism is in thorough accord with the proverb, "Cleanliness is next to godliness" (see Mishnah, Soṭah, ix. 15): indeed, it goes further; for it holds practically that cleanliness is godliness itself. There are three kinds of Ablution recognized in Biblical and rabbinical law: (1) Washing of the hands, (2) washing of the hands and feet, and (3) immersion of the whole body in water.

Modern Practise.

The ritual washing of the hands is not explicitly prescribed by the Bible, but is inferred by the rabbis (Ḥul. 106*a*) from the passage, Lev. xv. 11, in which it is stated that if a person afflicted with an unclean issue have not washed (or bathed) his hands his touch contaminates. The passage, Ps. xxvi. 6, "I will wash mine hands in innocency: so will I compass thine altar, O Lord," also warrants the inference that Ablution of the hands is requisite before performing any holy act. This particular form of Ablution is the one which has survived most completely and is most practised by Jews. Before any meal of which bread forms a part, the hands must be solemnly washed and the appropriate benediction recited. Before prayer, too, the hands must be washed; also after any unclean bodily function or after contact with an unclean object. The precepts concerning the carrying out of the ritual washing of the hands are contained in the rabbinical code "Shulḥan 'Aruk, Oraḥ Ḥayyim," §§ 117–165. The chief rules are these: The water must be in a state of natural purity, not discolored or defiled by the admixture of any foreign substance; it must not have been previously used for any purpose, and must be poured out by human act, the mere natural flow of water not sufficing. If a hydrant or stationary receptacle is used, the cock must be opened separately for each hand. This precept, that the water must be poured out by human act, is based on the fact that Scripture describes the pouring of water upon the hands as performed by one person for another, and considers it an appropriate act for the disciple to do for his master. The pouring on of water was a sign of discipleship. Thus, Scripture says of Elisha that he poured water (יצק מים) upon the hands of Elijah, meaning that he was his disciple. The hands may also be purified by immersion; but in that case the same rules must be observed as in the case of immersion of the entire body in a regular ritual bath, or *mikweh*. If water is not obtainable, the hands should be rubbed with some dry, clean substance, such as cloth. The hands must also be washed after eating. The Ablution before grace is known technically as *mayim rishonim* (first waters), and the subsequent Ablution as *mayim aḥaronim* (last waters). The latter Ablution is by no means generally observed.

Ancient and Modern Temple Service.

Washing of the hands and feet is only prescribed by the Mosaic Law for those desiring to perform priestly functions. Scripture states that whenever Moses or Aaron or any of the subordinate priests desired to enter the sanctuary (Tabernacle) or approach the altar, they were bound to wash their hands and feet from the laver which stood between the Tabernacle and the altar (Ex. xxx. 19, xl. 31). This rule was, of course, also observed in the Temple at Jerusalem.

Immersion of the Whole Body.

The washing of the whole body is the form of Ablution most frequently ordained in Scripture, and for the greatest number of causes. According to rabbinical interpretation, this is only valid when performed by immersion, either in a natural fountain or stream or in a properly constructed mikweh, or ritual bath, containing at least forty *seahs* (about one hundred and twenty gallons) of water (see Baths). The following are the cases in which the Mosaic Law requires immersion of the whole body, the object being either purification or consecration: (*a*) No leper or unclean person of the seed of Aaron could eat of holy flesh until he had washed his whole body in water (Lev. xxii. 4–6). (*b*) When a leper was healed of his leprosy, he shaved off his hair, offered up the prescribed sacrifices, washed his clothing, bathed his person in water, and became clean (Lev. xiv. 8, 9). (*c*) Any person who came into contact with the body of, or with articles of furniture used by, a person having an unclean issue (זב), or with any article used by him, was obliged to wash both his body and his garments, and was unclean for a whole day (Lev. xv. 5–10). (*d*) On the Day of Atonement the high priest, after sending off the scapegoat (see Azazel), was obliged to wash his whole body in water in a holy place. The same duty devolved upon the man who took away the goat and upon him who burned the ox and the goat of the sin-offering; and they were also required to wash their garments (Lev. xvi. 24, 26, 28). According to the Talmud, on the Day of Atonement the high priest immersed his whole person five times and washed his hands and feet ten times (Mishnah, Yoma, iii. 3). (*e*) A sufferer from an unclean issue to be clean required immersion of the whole person (Lev. xv. 16, 18). (*f*) Whoever touched a menstruous woman, or any article used by her, required immersion of the whole person (Lev. xv. 19–27). (*g*) A native Israelite or a proselyte eating unclean flesh of a beast which had died of itself, or had been torn, became thereby unclean for a day, and was obliged to wash his whole body (Lev. xvii. 15). (*h*) The priest who tended the red heifer, itself intended as a rite of purification, became unclean for a day and was obliged to wash his whole body (Num. xix. 7, 8). (*i*) Whoever came into contact with a corpse or a grave was unclean for seven days. On the third and seventh days he was sprinkled with water in which ashes from the burnt carcass of the red heifer had been dissolved. On the seventh day he washed his whole body and his garments in water and became clean (Num. xix. 19). (*j*) Among the ceremonies at the installation of priests was the washing of the whole body (Ex. xxix. 4, xl. 12). (*k*) The Levites were purified by having water of the sin-offering sprinkled upon them (Num. viii. 15). (*l*) A menstruous woman requires immersion, as is shown by II Sam. xi. 2, 4, and the rabbinical interpretation of Num. xxxi. 23. Most of the above purifications, with the exception of the last, are in abeyance at the present time, it being impossible, in the judgment of rabbinical authorities, to observe them properly in the dispersion. The immersions for the sake of ritual purity at the festivals are, however, still observed by the pious. The Karaites follow all the laws of purity. The numerous sects of the Ḥasidim are especially scrupulous in their ablutions. A Gentile wishing to become a proselyte must also immerse his whole body. This ceremony is, no doubt, historically allied to Baptism, which is thought by modern authorities to have originated among the Essenes, who were very scrupulous respecting ablutions, and in the observance of the rules of purity (see Lustration; Sprinkling).

The only priestly function still observed among Jews as a part of the public worship is the blessing of the people. On festivals and holy days, the descendants of Aaron pronounce upon the congregation the threefold benediction (Num. vi. 24–26). On this occasion the Levites pour out the water for the priests at the washing of hands, which takes place previous to the benediction, and for which a special pitcher and basin, both usually of silver, are used. Levites, in consequence, often have on their tombstones lavers as heraldic symbols of their Levitic descent.

B. D.

——**Historical Presentation:** The rite of Ablution forms part of the system of purification practised at all times and in all lands by such as strive for holiness or for a communion with the Deity. It may have a twofold object: (1) the cleansing of the body from impurity, first in a physical sense, and then on a higher stage in a symbolical sense, and (2) the preparing of the body for a higher degree of holiness. Persons were not allowed to enter a holy place or to approach the Deity with sacrifice or prayer without having first performed the rite of Ablution or, as it is also called, sanctification (Ex. xix. 10; I Sam. xvi. 5; II Chron. xxix. 5; and Josephus, "Ant." xiv. 11, § 5, where we are told that the whole people purified themselves for the approaching festival; compare Ta'anit, 19*b*–20*a*). The priests were especially enjoined to wash their hands and feet before entering the sanctuary or before officiating at the altar (Ex. xxx. 19 *et seq.*). Similarly the priests in Egypt had to wash themselves twice every day and twice every night in cold—probably identical with living or flowing—water (Herod. ii. 37); and the Greeks, we learn from Hesiod ("Opera et Dies," verse 722), were warned "never with un-washed hands to pour out the black wine at morn to Zeus or the other immortals" (compare Homer, "Iliad," vi. 266; "Odyssey," iv. 759). It is partly in view of this almost universal practise that the Psalmist says: "I will wash mine hands in innocency: so will I compass thine altar" (Ps. xxvi. 6), or "Verily I have cleansed my heart in vain, and washed my hands in innocency" (Ps. lxxiii. 13); partly also in view of an especial rite prescribed (Deut. xxi. 6) in the case of the commission of a murder by an unknown person, when the elders of the nearest city had to wash their hands over the blood of an expiatory heifer (parallels to which have been found in Vergil, "Æneid," ii. 217, and scholiast on Sophocles' "Ajax," 664, in i. 80 of the London edition, 1758). "Clean hands" became synonymous with hands free from guilt (see Ps. xviii. 20, xxiv. 4; Job, ix. 30).

Following the custom of the priests, the pious Israelite bathed, or at least washed his hands, every morning before prayer. Thus the God-fearing Jews are represented in Sibylline Books, iii. 591–593 as "such who, rising from their bed early in the morning, wash their hands in water to lift them ever pure to heaven in prayer." The same is related of Judith (Judith, xii. 7), and of the seventy-two elders who are said to have translated the Scriptures for Ptolemy we are told, in the Letter of Aristeas, 305, that, in accordance with Jewish custom, they washed their hands in the sea every morning before offering their prayers. For this reason it became "a tradition of the fathers to build houses of worship near the water" (see the decree of Halicarnassus in Josephus, "Ant." xiv. 10, § 23; and Acts of the Apostles, xvi. 13).

So fixed became this custom of washing the hands before divine service that the Christian Church adopted the Jewish custom of providing the worshipers with fountains or basins of water (see Eusebius, "Hist. Eccl." x. 4, 40), exactly as the Temple, or Tabernacle, had the laver, or the molten sea, for the use of the priests (Ex. xxx. 18; II Chron. iv. 2, 6). The rabbis instituted a special benediction to be recited every morning: "Blessed be Thou O Lord, King of the Universe, who hast sanctified us by Thy laws and commanded us to wash the hands" (Ber. 60*b*). Some erroneously derive the term used for washing, "*neṭilat yadayim*" (lifting up of the hands) from *natla* = Greek *ἀντλίον* (B. B. 58*b*; see S. Fränkel, "Aramäische Fremdwörter im Arabischen," p. 65), the name for the jar of water used (Ḥul. 107*a*); others, from the prescribed manner of pouring the water upon the uplifted hands until it reached up to the wrist (*pereḳ*)—Yad. ii. 3; Tosef., Yad. ii. 2; Soṭah, 4*b*—but it seems rather to be taken from Ps. cxxxiv. 2, "Lift up your hands in the sanctuary, and bless the Lord!" referred in Targ. Yer. to the officiating priests. The Apostolic Constitutions, viii. 32, also have the rule, "Let all the faithful, whether men or women, when they rise from sleep, before they go to work, pray, after having washed themselves" (*νιψάμενοι* = "washed their hands").

Ablution among Mohammedans.

Among the Mohammedans the ablution preparatory to prayer, called *ważû*, becomes far more burdensome because it is required five times a day—before each of the stated prayers, before touching the holy Koran, and after every ritual defilement; and the washing of each hand and part of the face is accompanied by prayer: "O believers, when ye prepare yourselves for prayer wash your faces and hands up to the elbows, and wipe your heads and your feet to the ankles" (Koran, sura v. 8). In all the principal mosques there are tanks or wells, which supply water for the rites of Ablution (T. P. Hughes, "Dictionary of Islam" *s.v.* "Ablution").

With the Jews, Ablution was also required before each meal, inasmuch as the participation in the meal by the members of the Pharisean brotherhood was to assume the same character as the sacrificial or sacred meal, of which the priest could partake only after having undergone the rite of Ablution; and the name of God had to be pronounced over it, as was done over the sacrifice (I Sam. ix. 13, xvi. 5). According to rabbinical tradition, King Solomon, the builder of the Temple with its molten sea, instituted the practise (Shab. 14*b*; 'Er. 21*b*). The twofold injunction, "Sanctify yourselves and be ye holy" (Lev. xx. 7), was interpreted as commanding a twofold Ablution, the second being in preparation for the grace after meals (Ber. 53*b*; see 43*b*, 46*b*). Edersheim ("Life of Jesus," ii. 11) erroneously identifies the *mayim rishonim* and *mayim aḥaronim* with the *rishonot* and *sheniyot* of Yadayim, and says: "The 'first waters' were poured upon the uplifted hands to remove the defilement, and if the water did not reach up to the wrist the hands were not clean; while the 'second waters' were to wash away the water that had absorbed the defilement. These pourings preceded the grace before meals; and to this reference is made in Mark, vii. 3: 'The Pharisees and all the Jews eat not except they wash their hands to the wrist'" (*πυγμῇ*; A. V. 'often' reads as if = *πυκνὰ*). In the Mishnaic time only the ablution after the meal is spoken of by the Hillelites and Shammaites (Ber. iii. 1). The washing of the hands *after* the meal—originally a sanctification before saying grace—soon fell into desuetude. In vain the Amoraim contended that this duty was superior to the ablution preceding the meal (Yoma, 83*b*; Ḥul. 106*a*). Later rationalists explained the custom away, as having arisen from the danger of wiping the eyes with fingers on which the salt of Sodom, used in the food, might have remained, and therefore declared it antiquated (Tosef., Ber. 53*b*; Alfasi, Ber. 48*b*; "Shulḥan 'Aruk, Oraḥ Ḥayyim," § 181, 10).

In the Mishnaic Time.

Akiba, when in prison, deprived himself of the water given him to quench his thirst rather than neglect the rite of Ablution ('Er. 21*b*); and according to the Mishnah the people at large might only in extreme cases, as on a battle-field, dispense with the rite ('Er. i. 10, p. 17*a*). According to one of the Amoraim, the eating of bread with unwashed and undried hands is eating unclean bread, or is tantamount to committing an act of unchastity; according to others it leads to sudden destruction or poverty (Soṭah, 4*b*; Shab. 62*b*). Still Rab says (Ḥul. 106*b*), "One may perform the rite of Ablution in the morning and take care that it should apply to the meals of the whole day." Anomalous as this teaching of an amora may seem, it was probably the same for which Eleazar b. Ḥanok was long before excommunicated, as undermining the authority of the elders (see 'Eduy. v. 6). A similar opposition was shown by Simeon the Essene (ha-Zenu'a = "the Saint"), Tosef., Kelim, B. Ḳ. i. 6, who entered the holy place without having washed his hands and feet, claiming a greater degree of holiness for himself than the high priest because of his ascetic life.

This seems to cast new light on the attitude of Jesus toward the rabbinical law of Ablution. According to Matt. xv. 1–20 and Mark, vii. 1–23, Pharisees and scribes that had come from Jerusalem had seen some of the disciples eat their bread with profane (*ḥullin*), that is, unwashed, hands: for, says Mark, the Pharisees and all the Jews, unless they wash their hands up to the wrist (see Edersheim, *l.c.*), eat not, holding fast to the tradition of the elders; and when they come from the market-place, except they have first sprinkled themselves, they eat not. The Pharisees and the scribes ask Jesus: "Why walk not thy disciples according to the traditions of the elders, but eat their bread with profane hands?" And he answers them: "Well did Isaiah prophesy of you Pharisees (hypocrites), 'This people draw nigh with their mouth, and with their lips they honor me; but their heart is far from me and their fear of me is a precept of men learned by rote' (Isa. xxix. 13, Masoretic text). Ye leave the commandment of God and hold fast to the tradition of men" (compare the rabbinical phrase העמידו דיניהם על דין תורה, B. M. 30*b*). What follows in Mark, or precedes in Matthew, has no bearing on the question of Ablution and is the outcome of Pauline antinomianism. Another record is that of Luke, xi. 37-41: "Now as he spake, a Pharisee asked him to breakfast with him, and he went in and sat down to meat. And as the Pharisee saw this he marveled that he had not bathed [ἐβαπτίσθη] before breakfasting. And Jesus said unto him: 'Now ye Pharisees cleanse the outside of the cup and of the platter, but your inward part is full of extortion and wickedness. Ye foolish ones, did not He that made the outside make the inside also? However, give the things that are within over to righteousness [צדקה, not alms], and behold all things are clean unto you.'"

In the course of time it became customary to pour water three times upon the hands to cleanse them from impurity; and in a Baraita (Shab. 109*a*) the opinion is expressed by R. Nathan, that the spirit of impurity, resting upon man during the night, will not leave him until he has poured water three times upon his hands. The cabalists go still further, and maintain that man incurs the penalty of death if he walks a distance of four yards from his bed without Ablution (Meir ibn Gabbai in his "Tola'at Ya'akob"; see "Shulḥan 'Aruk, Oraḥ Ḥayyim," iv. 1, 2, and Magen Abraham). So too a passage in the Zohar ("Wayishlaḥ," p. 387) says: "Whosoever sleepeth at night in his bed tasteth of death, for his soul leaveth him for the nonce. Being thus bereft of its soul, an unclean spirit possesseth his body and defileth it. Wherefore I say, let no man pass his [unwashed] hand over his eyes in the morning, by reason of the unclean spirit which resteth on it." The hygienic intent of these prescriptions is manifest. K.

ABNER: Cabalist and teacher of Isaac of Acco (Acre) about 1150, mentioned by Isaac as a great authority in mystic philosophy.

K.

ABNER or **ABINER** ("My Father is Ner").—**Biblical Data:** According to I Chron. viii. 29-33, and Josephus ("Ant." vi. 6, § 3), an uncle of Saul; while I Sam. xiv. 51 and Josephus ("Ant." vi. 6, § 6) seem to show that he was Saul's cousin. The latter view is regarded as the more probable, although it involves a slight emendation of the Masoretic text in I Sam. xiv. 51 (read "sons" of Abiel instead of "son"). Abner was Saul's captain of the host (I Sam. xiv. 50, xvii. 55). After the fatal battle at Mt. Gilboa, Abner kept all the tribes except Judah faithful to Ishbosheth, now in refuge at Mahanaim. The disastrous battle at the pool of Gibeon (II Sam. ii. 8-30) sealed the fate of Saul's kingdom. Abner, smarting under a malign charge of Ishbosheth (II Sam. iii. 7-11), privately turned over his allegiance and influence with the tribes to David (II Sam. iii. 12-21). Joab, David's captain of the host, through jealousy and out of vengeance for Asahel's death (II Sam. ii. 19-23), treacherously slew Abner (II Sam. iii. 27-30), who was buried, amid royal mourning, in Hebron (II Sam. iii. 33-38). According to a Jewish tradition, Abner was the son of the Witch of En-dor. I. M. P.

——**In Rabbinical Literature:** Son of the Witch of En-dor (Pirke R. El. xxxiii.), and the hero par excellence in the Haggadah (Yalḳ., Jer. 285; Eccl. R. on ix. 11; Ḳid. 49*b*). Conscious of his extraordinary strength, he exclaimed: "If I could only catch hold of the earth, I could shake it" (Yalḳ. *l.c.*)—a saying which parallels the famous utterance of Archimedes, "Had I a fulcrum, I could move the world." According to the Midrash (Eccl. R. *l.c.*) it would have been easier to move a wall six yards thick than one of the feet of Abner, who could hold the Israelitish army between his knees. Yet when his time came (נפלה שעתו), Joab smote him. But even in his dying hour, Abner seized his foe like a ball of thread, threatening to crush him. Then the Israelites came and pleaded for Joab's life, saying: "If thou killest him we shall be orphaned, and our women and all our belongings will become a prey to the Philistines." Abner answered: "What can I do? He has extinguished my light" (has wounded me fatally). The Israelites replied: "Entrust thy cause to the true judge [God]." Then Abner released his hold upon Joab and fell dead to the ground (Yalḳ. *l.c.*).

His One Sin.

The rabbis agree that Abner deserved this violent death, though opinions differ concerning the exact nature of the sin that entailed so dire a punishment on one who was, on the whole, considered a "righteous man" (Gen. R. lxxxii. 4). Some reproach him that he did not use his influence with Saul to prevent him from murdering the priests of Nob (Yer. Peah, i. 16*a*; Lev. R. xxvi. 2; Sanh. 20*a*)—convinced as he was of the innocence of the priests and of the propriety of their conduct toward David, Abner holding that as leader of the army David was privileged to avail himself of the Urim and Thummim (I Sam. xxii. 9-19). Instead of contenting himself with passive resistance to Saul's command to murder the priests (Yalḳ., Sam. 131), Abner ought to have tried to restrain the king. Others maintain that Abner did make such an attempt, but in vain, and that his one sin consisted in that he delayed the beginning of David's reign over Israel by fighting him after Saul's death for two years and a half (Sanh. *l.c.*). Others, again, while excusing him for this—in view of a tradition founded on Gen. xlix. 27, according to which there were to be two kings of the house of Benjamin—blame Abner for having prevented a reconciliation between Saul and David on the occasion when the latter, in holding up the skirt of Saul's robe (I Sam. xxiv. 11), showed how unfounded was the king's mistrust of him. Saul was inclined to be pacified; but Abner, representing to him that David might have found the piece of the garment anywhere—possibly caught on a thorn—prevented the reconciliation (Yer. Peah, *l.c.*, Lev. R. *l.c.*, and elsewhere). Moreover, it was wrong in Abner to permit Israelitish youths to kill one another for sport (II Sam. ii. 14-16). No reproach, however, attaches to him for the death of Asahel, since Abner killed him in self-defense (Sanh. 49*a*).

It is characteristic of the rabbinical view of the Bible narratives that Abner, the warrior pure and simple, is styled "Lion of the Law" (Yer. Peah, *l.c.*), and that even a specimen is given of a halakic discussion between him and Doeg as to whether the law in Deut. xxiii. 3 excluded Ammonite and Moabite women from the Jewish community as well as men. Doeg was of the opinion that David, being descended from the Moabitess Ruth, was not fit to wear the crown, nor even to be considered a true Israelite; while Abner maintained that the law affected only the male line of descent. When Doeg's dialectics proved more than a match for those of Abner, the latter went to the prophet Samuel, who not only supported Abner in his view, but utterly refuted Doeg's assertions (Midr. Sam. xxii.; Yeb. 76*b et seq.*).

One of the most prominent families (Ẓiẓit ha-Kesat) in Jerusalem in the middle of the first century of the common era claimed descent from Abner (Gen. R. xcviii.). L. G.

ABNER OF BURGOS (called also **Alfonso of Valladolid** and **Alfonso of Burgos**): A Jewish convert to Christianity and polemical writer against his former religion; born 1270; died 1348, or a little later (Grätz). As a student he acquired a certain mastery in Biblical and Talmudical studies, to which he added an intimate acquaintance with Peripatetic philosophy and even with astrology. He was graduated as a physician at the age of twenty-five, but throughout a long life he seems to have found the struggle for existence a hard one. Not being of those contented ones who, as Moses Narboni says in his "Maamar ha-Behirah" (Essay on the Freedom of the Will; quoted by Grätz, p. 488), are satisfied with a peck of locust-beans from one Friday to another, he resolved to embrace Christianity though at the advanced age of sixty, according to Paulus de Santa Maria ("Scrutinium Scripturarum"); according to other writers he took this step soon after he was graduated in medicine. The only point certain from the statements of his contemporaries is that he was converted, not from spiritual conviction, but for the sake of temporal advantage. Something of the apostate's pricking conscience seems to have remained with him, however, although he was immediately rewarded with a lucrative sacristan's post in the prominent Metropolitan Church in Valladolid (whence he took the name of Alfonso of Valladolid). In an essay entitled "Iggeret ha-Gezerah" (Epistle on Fate), he sought to disclaim responsibility for his act of apostasy by setting up the remarkable plea that man's actions are ruled and compelled by planetary influence, and that therefore there can be no option or free will for mortals. Both his conversion and this defense aroused general and fervent protests from his quondam Jewish friends, protests marked by great bitterness. Isaac Pulgar, to whom Abner had dared to send a copy of his attempted justification, returned it with a biting satire referring to the Biblical test of the adulterous woman (Num. v. 11–30). Deeply stirred by the wordy war ensuing, Abner was not slow to make his vindictiveness felt, and in a direction where it would most keenly be experienced. He presented charges before the just and energetic Alfonso XI., king of Castile, accusing his former brethren of using a prayer-formula in their ritual which blasphemed the Christian God and cursed all Christians. The prayer referred to was a formula that had been used only in olden Roman times, when the early Jewish converts to Christianity persistently molested the Jews. The king ordered a public investigation at Valladolid, in which the representatives of the Jewish community were confronted with Abner. The conclusion was announced in the shape of a royal edict forbidding the use of the formula in question (February, 1336); a barren victory on both sides, for the Jews had no idea of ever using it, and Abner of course failed to prove that they had. Undaunted, he then prosecuted his literary activity against his brethren with unabated virulence until his death. He accuses them, for instance, of constantly warring among themselves and splitting into hostile religious schisms; in support of this statement he adduces an alleged list of the "sects" prevailing among them, in which he gravely enumerates Sadducees, Samaritans, and other extinct divisions as if they were still extant. He makes two "sects" of Pharisees and Rabbinites, says that cabalists believe in a tenfold God, and speaks of a brand-new "sect" believing in a dual Deity, God and Meṭaṭron.

The following is a list of Abner's writings: (1) A supercommentary on Ibn Ezra's commentary on the Decalogue, written before his apostasy. (2) "Moreh Ẓedeḳ" (The Teacher of Righteousness), also in a Spanish version, "El Mostrador de Justicia," a dialogue containing ten chapters of discussions between a religious teacher (Abner?) and a Jewish controversialist. The Spanish manuscript is in the Bibliothèque Nationale at Paris (Kayserling). (3) "Teshubot 'al-Sefer Milḥamot Adonai le-Ḳimḥi" (Reply to Kimḥi's book on the "Wars of the Lord"). This too was translated into Spanish, by request of the Infanta Doña Blanca, prioress of a convent in Burgos, under the similar title "Los Batallos de Dios." (4) "La Concordia de las Leyes," an attempt to provide Old Testament foundations for Christian dogmas. (5) "Libro de las Tres Gracias," manuscript in the Madrid National Library (Kayserling). (6) "Minḥat Ḳenaot" (The Offering of Jealousy), with other works, in defense of astrology against Pulgar's attacks; not extant. (7) Three "Letters" against Judaism, and "A Reply to the Replies." (8) "Iggeret ha-Gezerah" (Epistle on Fate). It is also practically certain that he was the translator into Latin of the "Letter of Samuel ibn Abbas," though the name is generally given as Alfonsus Bonihominis.

ABNIMUS HAGARDI. See Œnomaos of Gadara.

ABO: Capital of the government of Abo-Björneborg in Finland, Russia, situated near the entrance of the Auraioki river into the Gulf of Bothnia.

Formerly no Jews were permitted to live in Abo, owing to the Swedish law of 1782, which excluded them from all Finland (see Finland). When this region was annexed to Russia, a ukase was issued (March 29, 1858) by which Jews who had served in the army there received the right to settle in that province. The same privileges were granted to their widows and children. Soon after the publication of this ukase the Jews began to settle in Abo. In 1883 the local merchants and artisans applied to the senate to withdraw all privileges from the Jews, including even the right of settlement in Abo. On June 27, 1883, a mob invaded the synagogue of Abo during the service and tried to cause a disturbance. The police quickly restored order. Thereupon a commission was appointed to regulate the Jewish question in Finland. Jews were subsequently permitted to settle in Abo, but their permits had to be renewed each year. Of the population of Abo, which, in 1898, aggregated 34,339 persons, only 220 were Jews, the remainder comprising 19,000 Finns and 13,000 Swedes.

H. R.

ABOAB (also written **Abohab, Abuab, Aboaf, Abof,** and **Abohaf**; אבוהב, also אבוהאב, "Jew. Quart. Rev." x. 130; אבאיוב, *ibid.* xi. 527): The name of an ancient and widely distributed Spanish family, among whose members were many most able scholars. The family can be authentically traced to the thirteenth century, and representatives thereof are to be found in Holland, Italy, Turkey, Africa, and America. Some branches of this family, in which the names Abraham, Isaac, Jacob, Joseph, and Samuel frequently occur, can be followed genealogically. Through marriage, and by following the Spanish custom of joining together the paternal and maternal names, there arose the families of Aboab y Cardoso, Aboab y Lopez, Aboab y Brandaõ, Aboab y Coronel, Aboab y Osorio, Aboab de Paz, etc. (Kayserling, "Bibl. Esp.-Port. Jud." pp. 2 *et seq.*; "Jew. Quart. Rev." x. 130; "Rev. Ét. Juives," xxv. 203, where further data will be found; and see also the lists at the end of D. H. de Castro's "De Synagogue van de Portugeesch Israelietisch Gemeente te Amsterdam," which contain a number of additional names).

1. Abraham Aboab (probably identical with Abuhafa Ham in Jacobs, "Sources," p. 19) is the oldest Aboab known to us. He lived at Pelof, Aragon. He received in 1263 from the king Don Jaime a tower called Altea, with the surrounding dairy farms and all rights and privileges of ownership. **2.** Another **Abraham,** a learned contemporary of JUDAH BEN ASHER, lived in 1340 at Toledo. He was the son of ISAAC ABOAB, the author of the "Menorat ha-Maor." **3.** Among the earliest Spanish emigrants to Amsterdam were **Abraham,** and his son Jacob, who died in 1604. **4.** The son of the latter, **Abraham,** was, in 1639, hazan of the congregation Bet Jacob in Amsterdam. **5.** Another **Abraham,** who lived in 1655, was a proof-reader and publisher at Venice. **6.** Philanthropist of the first half of the seventeenth century. A profoundly religious man, devoted to the study of Hebrew literature. About the year 1627 he established at Hamburg a synagogue called Keter Torah, as well as Jewish schools in Palestine, Mantua, and other places. He was widely known and honored on account of his extraordinary benevolence. The last years of his life were passed at Verona, Italy, where his favorite son, SAMUEL ABOAB, was rabbi, and there he died at a very old age, in March, 1642. The preacher Azariah Figo delivered his funeral discourse, which is printed in Figo's "Collection of Sermons" (No.77). **7.** Son of SAMUEL ABOAB; was rabbi in Venice and died there in the same year as his father, 1694.

Abraham ben Jacob Aboab: A grandson of Samuel; a learned and benevolent man. He died in Salonica in the middle of the eighteenth century.

Daniel Zemaḥ Aboab: Was a physician in Amsterdam. In 1668 he married Rebecca, the daughter of Jacob Lopez.

David Aboab: 1. In Amsterdam, was the author of a work completed in 1685 (but never printed), entitled "Catalogo de Diferentes Remedios para Diversas Sortes de Achaques, Achados por Experiencia Haverem Sido Bonos" (Catalogue of Diverse Remedies for Various Ailments, Found by Experience to Have Been Good). **2.** Gave in Venice a rabbinical decision concerning the singing of the priestly benediction, in response to a question of Nehemiah ben Baruch, rabbi in Ferrara.

Elijah Aboab: 1. Established the first synagogue in Hamburg in 1625. **2.** Another **Elijah** was a publisher of Hebrew books in Amsterdam about 1645.

Immanuel Aboab: Portuguese scholar; a great-grandson of Isaac Aboab (died 1493); was born in Oporto, Portugal, about 1555; died at Venice in 1628. He early became an orphan and was reared by his grandfather Abraham Aboab. He emigrated to Italy, and after living some time at Pisa he removed to Corfu, where he became acquainted with Horazio del Monte, a nephew of the duke of Urbino. In Reggio he became acquainted with Menahem Azaria de Fano; thence he went to Spoleto and elsewhere in Italy, and finally settled at Venice. Here he had occasion, in 1603, to defend his coreligionists, in the presence of an exalted commission, against malicious accusations, and he proved with ease that the Jews had never lacked the courage and devotion to make the greatest sacrifices on behalf of the country that protected them in their rights and which they could truly call "fatherland." Aboab had the intention of going to Palestine and publishing there his works, "The Kingdom of the Intellect" and "The Foundations of Truth," which he had written in defense of the Talmud. He was the author of a defense of the traditional law and of a chronological list of that law's exponents. He worked at this treatise, which was much prized by the pious, for ten years, and completed it in 1625. It was published by his heirs at Amsterdam, in 1629 (2d ed., *ibid.*, 1727), under the title, "Nomologia o Discursos Legales, Compuestos por el Virtuoso Hakam Rabi Imanuel Aboab de Buena Memoria." A manuscript of this work exists in the library of the Historical Academy in Madrid.

M. K.

Isaac Aboab: Author of "Menorat ha-Maor"; lived in Spain about 1300. As shown by Zunz ("Ritus," pp. 204–210), he is not to be confounded with ISAAC ABOAB, rabbi of Castile, the supercommentator of Naḥmanides, who died in 1493 (see following article).

He was a man of affairs, who, toward the close of his life, devoted much time to literary work and to preaching, as he found, he complained, that great Talmudic scholars and important seats of learning were rare. In his time the Jews for whom he wrote still understood and spoke Arabic. He belonged to a period of intellectual decline when men took naturally to eclecticism. He combined extensive rabbinical knowledge with philosophical erudition, and was fond of mystic interpretation of the Mosaic laws and ceremonies. He quoted Aristotle and Plato, though only from secondary sources, and endeavored to illustrate passages from the Talmud and the midrashic literature, with which he was especially familiar, by utterances taken from the philosophical, the ethical, and the mystic literature of his time. His chief aim was the popularization of knowledge and the elevation of the masses.

Aboab wrote three books. The first, on Jewish rites, under the title of "Aron ha-'Edut" (The Ark of the Testimony), was divided, after the manner of the Decalogue, into ten sections, each again subdivided into chapters and paragraphs. The various ritual laws were therein traced to their Talmudic sources, and the decisions of the Geonim and later interpretations added. His second book, on the prayers and benedictions, was called "Shulḥan ha-Panim" (Table of the Showbread), and was divided into twelve sections, symbolizing the twelve loaves of the showbread in the Tabernacle; both works unfortunately are lost.

His third book has survived, and has won considerable fame for the author, though in his humility he assures his readers that he composed it chiefly for his own use as a public speaker. But besides this it has contributed probably more than any other medieval book to the popularization of rabbinical lore and to the religious edification and elevation of the masses. It belongs to that class of ethical works which sprang up in the thirteenth century in a time of reaction against the one-sided manner in which the Talmudic studies had been previously pursued.

"These Talmudists," he says in the preface, "consider it their duty to propose difficult questions and answer them in a witty and subtle manner, but leave unnoticed the precious pearls that lie upon the bed of the Talmudic ocean, the haggadic passages so rich in beauty and sweetness."

He conceived, therefore, the plan of grouping together the rich material stored up in the vast treasure-house of the Haggadah from the religious and ethical point of view, and of presenting it in a book which he called "Menorat ha-Maor" (The Candlestick of Light; compare Num. iv. 9), intending by it to illumine the minds and the hearts of his coreligionists. With reference to the seven-armed candlestick in the Tabernacle (Ex. xxv. 31; Num. viii. 2), he divided the book into seven sections, each of which bears the title of "Ner," or "Lamp," subdivided into separate parts and chapters. It can hardly be said that the division of the matter treated is very logical and systematic, nor indeed does the work lay any claim to originality; but in presenting the beautiful moral and religious truths of Judaism in homely form, Aboab supplied to the average reader a great need of the time. Its skilful arrangement of the various Biblical and rabbinical topics and its warm tone of deep earnestness and sincerity could not fail to appeal to the popular heart. And as in the course of time the sermon, then still in use among the Spanish Jews, ceased to be a part of the divine service because the preacher had to give way to the ḥazan, or precentor, the "Menorat ha-Maor" became a substitute for the living voice of the preacher. It was translated into Spanish and read to attentive assemblies of the people, particularly to those not versed in the Law. It thus became the household book of the medieval Jews. It was published with a Spanish translation (Leghorn, 1657), with a Hebrew commentary and a Judæo-German translation by Moses Frankfurter (Amsterdam, 1701), with a modern German translation by Fürstenthal and Behrend (Krotoschin, 1844–46). It was translated also into Yiddish, Wilna, 1880. The book must not be confused with a work of the same name by Israel Alnaqua.

Bibliography: Zunz, *Ritus*, pp. 204-210; *Menorat ha-Maor*, introduction by Behrend, Krotoschin, 1844; see also Brüll's *Jahrb.* ii. 166, where attention is called to a passage in Aboab on the holiness of the marital relations. *Menorat ha-Maor*, §§ 181-186, taken almost literally from Naḥmanides' *Iggeret ha-Kodesh*. Against the charge of plagiarism, see Steinschneider, *Hebr. Bibl.* 1876, p. 89.

S. B.—K.

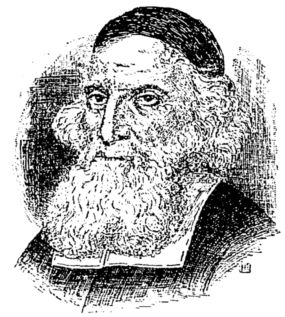
Isaac Aboab: Spanish Bible commentator; presumably a descendant of preceding; born at Toledo in 1433; died in January, 1493. He was the pupil and successor of Isaac Campanton, and was called "the last gaon of Castile." After Ferdinand and Isabella issued the decree of expulsion in 1492, he with thirty others of the most respected Jews of the land went to Lisbon in order to negotiate with King John II. of Portugal for the reception of his banished coreligionists. He and his companions were allowed to settle under favorable conditions in Porto. He died a few months after the expulsion. His disciple, the chronicler and mathematician Abraham Zacuto, delivered his funeral address. Many of Aboab's disciples attained to great distinction. Of his works the following have appeared in print: "Nehar Pishon," a collection of sermons, Constantinople, 1538; "A Supercommentary to Naḥmanides' Pentateuch-Commentary," Constantinople, 1525; Venice, 1548, etc. A supercommentary to the commentary of Rashi on the Pentateuch and a number of rabbinical decisions exist in manuscript.

Isaac Aboab: Son of Mattathiah; a contemporary of Isaac da Fonseca Aboab and often confounded with him. He was born in Amsterdam, and became ḥakam of the Portuguese congregation there; he was a friend of the learned Surenhuysius (Bloch, "Oest. Wochenschrift," 1899, No. 48, p. 902). He died about 1720 at Amsterdam. He wrote a book of exhortation and admonition for his son, which appeared at Amsterdam, in 1687, under the title "Exortação Paraque os Tementes do Senhor na Observança dos Preceitos de sua S. Ley." A number of his works exist in manuscript, among them a genealogy of the Aboab family and a "Comedia de la Vida y Successos de Josseph."

Bibliography: Kayserling, *Bibl. Esp.-Port. Jud.* pp. 3, 4.

M. K.

Isaac da Fonseca Aboab: Ḥakam at Amsterdam; born at Castrodaire, Portugal, in 1605; died on April 4, 1693, aged eighty-eight; was the son of David Aboab and Isabel da Fonseca, who was in her fifty-first year at the time of his birth. In order to be distinguished from Isaac de Mattathiah Aboab, he added his mother's name to his own.



Isaac da Fonseca Aboab.

(From the portrait in the Archives of the Amsterdam Portuguese Congregation.)

In fear of danger from the Inquisition, David fled with his family to St. Jean de Luz, a small town on the Franco-Spanish frontier. Here he appears to have died, and his widow, Isabel, not yet feeling herself safe, emigrated in 1612 with her son to Amsterdam, where relatives of her husband had already settled. Here Isaac studied under the direction of the ḥakam Isaac Uzziel and made such progress that in 1619 he already held a public office. When twenty-one years of age he became ḥakam of the community. When the three congregations of Amsterdam were united in 1639, Aboab was confirmed in his post; but his position can not have been very remunerative, for in 1642 he accepted a call to Pernambuco, Brazil, at that time in the hands of the Dutch. Here, however, he could not permanently remain. In 1649, war broke out between the Dutch and the Portuguese regarding the possession of Brazil, in which the former were victorious. All the Jews were obliged to leave the country. Aboab returned to Amsterdam. Such was the esteem in which he was held, that he was reappointed ḥakam. His duties were to preach three times monthly and to give instruction at the Talmud Torah, as well as at the Yeshibah, or Talmudic Academy, established by the rich brothers De Pinto, of which latter institution he was the head. Aboab was an able preacher, an excellent Hebrew poet—as can be seen from his occasional poems—and was also acquainted with the natural sciences. He was inclined to the Cabala, and translated into Hebrew the Spanish works of Alonso de Herrera on the Cabala. In his old age he was a secret adherent of Shabbethai Ẓebi. For more than half a century Aboab presided over the community and did much to promote its welfare. He gave the first impulse to the building of the great synagogue. He had an extensive library, a catalogue of which was printed in 1693. Aboab was the first Jewish author in America. Of his works the following have appeared: "Parafrasis Comentada sobre el Pentateuco," Amsterdam, 1681; "Sermão en Memoria de Abraham Nuñez Bernal"; "Sermão Funebre en Memoria de Dr. Joseph Bueno," Amsterdam, 1669; "Sermão no Alegre Estreamente e Publica Celebridade da Esnoga," Amsterdam, 1675; "Sermão . . . por Hatan

Torah Sr. Yahacob Israel Henriques," Amsterdam, 1678. He wrote in Hebrew, under the title זכר עשיתי לנפלאות אל, an account of the war between the Portuguese and the Dutch in Brazil, and of the sufferings of the Jews there. This work has been partially published in the "Publications Am. Jew. Hist. Soc." No. 5, 129 *et seq.*

Bibliography: Kayserling, *Bibl. Esp.-Port. Jud.* pp. 4, 5; *Publications of the Am. Jew. Hist. Soc.* iii. 14-20, 103 *et seq.*, v. 125-136; Grätz, *Gesch. d. Juden*, x. *passim*; De Castro, who gives the epitaphs of Aboab and his wives, in *Keur van Grafsteenen*, pp. 67 *et seq.*

M. K.

Isaac Ẓemaḥ Aboab: A physician, like his brother Daniel, at Amsterdam. He was a friend of Benedict de Castro, physician in ordinary to Queen Christina of Sweden, and of Benjamin Musaphia in Hamburg. An **Isaac Aboab** is mentioned as living in Barbados in 1680 ("Publications Am. Jew. Hist. Soc." i. 105).

Jacob Aboab: **1.** Rabbi at Venice; was the son and successor of Samuel Aboab. He died after 1727 at Venice. He edited and published, at the expense of his wealthy elder brother, David Aboab, the rabbinical decisions of his father, and provided the book with a detailed biography of its author. He paid especial attention to Biblical antiquities and natural science. He conducted an active literary correspondence with Theophil Unger, a pastor at Herrenlaurnschütz, who was an enthusiastic collector of Hebrew manuscripts. These letters are preserved in the City Library of Hamburg (No. 335, 3). Christian Wolf mentions this Aboab in his "Bibl. Hebr." in sixty places. Aboab also maintained, from 1682 to 1692, a scientific correspondence with the learned imperial councilor Job Ludolf, at Frankfort-on-the-Main. These letters are preserved in the Frankfort City Library. He wrote a number of rabbinical decisions, which are preserved in the works of others; for instance, in the "Paḥad Yiẓḥaḳ" of Isaac Lampronti. **2.** A physician at Mecca at 1626. **3.** Another **Jacob Aboab** was one of the earliest Jewish immigrants to New York, where he arrived in 1654, probably from Holland ("Publications Am. Jew. Hist. Soc." ii. 77, vi. 83). **4.** Son of a Hebrew proof-reader, Abraham Aboab; was a printer at Venice, 1669–82. **5.** Son of Benjamin Aboab, lived about 1675 in Amsterdam and was renowned for his keen intellect. **6.** Son of Isaac Aboab, "the last gaon of Castile"; published the religious discourses of his father in 1538.

Joseph Aboab: Son of Samuel; was for some time rabbi at Venice. He was the author of rabbinical decisions, as yet not printed. He emigrated to Palestine and died at Hebron.

Judah Aboab: A grandson of Isaac Aboab, the "last gaon"; was a dayyan (*juez*) at Alcazarquivir in Africa. He had many disciples, among them David Fayon, who provided Immanuel Aboab with much information concerning the expulsion of the Jews from Spain and Portugal ("Nomologii," 302).

Mattathiah Aboab: Represented the congregation Bet Jacob in Amsterdam, in 1639. His son Moses was later president of the united Portuguese community.

Letters of denization were granted in New York (June 25, 1684) to a **Moses Aboab** ("Publications of the Am. Jew. Hist. Soc." vi. 104).

Raphael Aboab: Emigrated in 1669 to Surinam.

Samuel Aboab: Son of Abraham; was a very prominent rabbi of the seventeenth century. He was born at Venice in 1610; died there Aug. 22, 1694. He very early began the study of rabbinical literature. When thirteen years of age, he became the pupil of the learned David Franco. From him Aboab received the intellectual tendency which he followed all his life. When eighteen years of age, he married the portionless daughter of Franco, named Mazzal-Ṭob, a proceeding unusual at that time. He was first appointed rabbi in Verona, whither his father and brothers soon followed him. Here he gained such a reputation for learning that disciples from far and near sought him, and the rabbis of Italy turned to him with difficult religious questions. He became known by the name RaSHA (רש"א), a word formed from the initial letters of his Hebrew name. Aboab was not only profoundly learned in all Jewish science, but also acquainted with secular learning and a master of several languages. He understood Latin and German, spoke Italian, and read and wrote Spanish. He was rigid, even ascetic, in his piety; fasted much, studied the Law day and night, and ate no meat on week-days. He was extremely modest and charitable, supported his disciples, and visited the poor in their dwellings. In 1650 he was called to Venice as rabbi. There he became involved in the controversy concerning Shabbethai Ẓebi and his representative or apostle, Nathan of Gaza. The latter confessed to Aboab, as president of the rabbinical tribunal (bet din) of Venice, that his (Nathan of Gaza's) prophecies concerning the Messianic character of Shabbethai Ẓebi were mere deceptions. In advanced age Aboab became the victim of many misfortunes. Domestic troubles and severe illness afflicted him, and in his eightieth year he was compelled to leave Venice and his family, and to wander from place to place. It was only shortly before his death that he received permission from the doge and the senate of Venice to return to the city and to reassume his office, which in his absence had been conducted by his son Joseph, who resembled him in piety and modesty. Before his death he called together his four sons, Abraham, David, Jacob, and Joseph, and besought them never to pronounce carelessly the name of God, to be scrupulously honest in all their dealings, never to calumniate, never to give any one a contemptuous appellation or nickname, but to care for the education of the young, and to attend synagogue daily. Of his works there have appeared: "Debar Shemuel" (Word of Samuel), a collection of rabbinical decisions (Venice, 1702); and, anonymously, "Sefer ha-Zikronot," a treatise on ethical conduct (Venice, 1650). Rabbi Joshua Joseph ben David, of Venice, composed an elegy upon his death, printed in the collection of poems "Kos Tanḥumim" (Venice, 1707).

M. K.

'ABODAH ("Divine Service"): Originally the benediction recited during the morning sacrifice while the Temple still existed, and afterward the benediction containing the prayer for the restoration of the Temple sacrifice, recited also as part of the morning and evening prayer (Mid. v. 10). 'Abodah was the regular name for the divine service in the Temple, and people took an oath by the 'Abodah as they did by the Temple itself, or as is done to-day by the Bible (Levy, "Neuhebr. Wörterb." *s.v.*).

K.

'ABODAH OF THE DAY OF ATONEMENT: An essential part of the Musaf service of that day, based upon the detailed account given in the Mishnah Yoma of the sacrificial service performed by the high priest in the Temple at Jerusalem. The basis for this elaborate function is found in Lev. xvi. Originally this part of the service seems to have consisted only in the recital of the Mishnah treatise, Yoma. Gradually it was further elaborated, and became the most solemn and impressive portion of the Atonement service.

The ritual in the order (Maḥzor) most universally used begins with a beautiful prayer for the synagogue reader, followed by a cursory review of the Biblical history from Adam down to Aaron. Then the whole Temple service is minutely described: the preparation of the high priest during seven days preceding the festival, the appointment of a substitute to meet the emergency of the high priest's becoming disqualified, the preparation of the holy vessels, the offering of the regular morning sacrifice, the baths and ablutions of the high priest, and his different changes of garments.

Laying his hands upon the head of a young bullock, his own sin-offering, the high priest made confession for himself in these words:

> "O Lord, I have sinned, I have trespassed, I have done wrong before Thee, I and my house. O Lord, grant atonement for the sins, trespasses, and wrongs which I have committed before Thee, I and my house, as it is written in the Torah of Thy servant Moses, 'For on this day he shall atone for you to cleanse you from all your sins before the Lord' [Lev. xvi. 30]."

Description of Temple Service.

He then proceeded to the eastern part of the court, where he found two goats and drew lots for them, selecting one for God and one for Azazel. On the head of the latter he tied a red woolen thread, and then, returning to his bullock, laid his hands upon its head and made the second confession, including therein the children of Aaron, that is, the whole priestly tribe. Then he killed the bullock, received the blood in the sprinkling bowl, and had it stirred lest it should coagulate while he performed the fumigation. He next took burning coals from the altar, put them into a golden censer, and after having provided himself with two handfuls of incense, he entered through the veil into the Holy of Holies. Between the two staves of the ark (or on the stone which took its place) he deposited the censer and cast the incense upon the coals. And when the whole place was filled with a cloud of smoke, he left it and, walking backward, took the blood from the person who had stirred it, entered with it into the Holy of Holies, and sprinkled with the blood once upward and seven times downward, counting the numbers in the prescribed manner. Then he returned, slaughtered the goat, and, with its blood, received in another bowl, sprinkled as before. After having once more sprinkled with the blood of the bullock, he poured the two bowls of blood together and purified the golden altar by putting the mingled blood round the horns, and sprinkling it seven times. Thereupon he went to the living goat and over its head he made confession of the people's sins, inserting in the formula recited before, "Thy people, the house of Israel."

In all the three confessions he pronounced the distinctive name of God (the Shem ha-meforash). And the priests and the people who were in the court, when they heard the holy name of God coming from the high priest's mouth, bent their knees, fell down and worshiped, and exclaimed, "Blessed be the name of His glorious kingdom forevermore." Then the scapegoat was led away into the wilderness and put to death by being thrown down a rocky precipice. The high priest sacrificed the pieces of the other goat and the bullock, read the lesson of the day from the Scriptures, and put on his gold-embroidered garments. Thereupon he offered up a ram for himself and one for the people, put on his linen garments, and brought the censer from the Holy of Holies. Then he took off his linen garments, which were put away forever, and, clothed in the gold-embroidered garments, offered the daily evening sacrifice and the incense and lighted the candles.

During the long and elaborate service he bathed five times and washed his hands and feet ten times. With joy and exultation he was then accompanied home by his friends, to whom he gave a feast, because he had left the sanctuary unharmed.

The so-called prayer of the high priest after the completion of the service is then recited. Now follows a glowing description—after Ecclesiasticus (Sirach), 46 *et seq.*—of the beauty of the appearance of the high priest, and those are pronounced happy who had seen all the old glory, while the misfortune is deplored of the living who are deprived of Temple, altar, and priest, and have constantly to submit to new and intolerable sufferings. The service closes in the ancient ritual with ardent prayers for the reestablishment of the pristine conditions and the magnificent ritual. In the reform ritual expression is given to the view of an atonement for mankind by the sacrifice which Israel, as the martyr priest, is destined to bring. M. LAN.

'ABODAH, MUSIC OF: By its liturgical position, the "'Abodah" stands out as the central point of the services on the Day of Atonement. The confession of sin being the most essential and characteristic element in those services, a peculiar importance and solemnity attach to that form of the confession introduced in the "'Abodah" which is couched in the very words uttered by the high priest—according to the record of the Mishnah (Yoma, iii. 8, iv. 2, vi. 2.)—when laying his hands upon the head of the scapegoat. In sympathy with the exhortation of Hosea, xiv. 2, the pious Jew would at any time devoutly read of the Atonement, as of other sacrifices, that he might mentally, at least, go through the "order of the service." But on the "great fast" itself his devotions would arouse poignant grief that, "because of abundant iniquities," he was not privileged to be present in the great Temple at Jerusalem to behold those solemn rites of which he read. Accordingly, the recital of the "'Abodah" is followed by a long series of piyuṭim giving utterance to this grief, in such expressions as: "Happy the eye which beheld all this; only to hear of it wringeth our heart."

Expression of Emotion.

Among the northern Jews it was the function of the ḥazan not merely to lead the liturgical song of the congregation, but rather, by his singing, to interpret and elucidate the liturgy to the congregation. Even in medieval times the cantors were inspired by a subconscious sentiment of this kind, to voice in the "'Abodah" all of Israel's longing for rest and liberty; and at times they would approach to the expression of sublimest emotion. Whenever the contrast between the servitude they knew and the glory they read of was more than usually keen, a particular intensity was lent to the Atonement liturgy; and there developed, probably before the modern period, a rhapsody replete with inarticulate vocalization; although its lines were distinct enough for successive generations of ḥazanim so to utilize the traditional matter that, in the rendering of the "'Abodah," the climax of the cantor's art was reached. These main lines, through their parallel employment in the "Ḳedushah," have remained distinct under the growth of improvised cadences.

Some such adornments were, no doubt, but an echo of the unending scale-passages and sequences of rapid figures so common in both vocal and instrumental music two centuries ago. But so far

Ornamental Phrases. from all being derived thence, it must be remembered that many of the ornamental phrases in general vogue closely resemble what is to be noticed in the performances of Arab musicians, and others recall the melismatic chant so frequent in the graduals of the medieval church. Had not the original Oriental elements in the synagogical intonations and the contemporary example of earlier European neighbors alike fostered such vocal embroidery, the ornamentation of the seventeenth century would have been rigidly excluded as *ḥuḳḳat ha-goyim* ("Gentile usage").

The experiment has been tried in Berlin and elsewhere of omitting such ornamental phrases, especially those termed "pneuma," to which no words are sung, and of rendering only what seemed to the musical analyst to be the essential sections of such

rhapsodical intonations. But this residuum, besides appearing cold and unmoving, in its brevity and its overfrequent repetition, to those who were not familiar with the traditional rendering, revealed plainly to those who had previously listened to the fervor and rich variation of the melismatic chant the total loss of intensity in its lack of the vocal passages between the words. Lewandowski's artistic treatment of the central melody of the "'Abodah," in which he relegates to the organ accompaniment the ornamental passages between the notes on which the words themselves are sung, was rightly enough conceived. But the experiment was not a success; and no transcription that fails to provide such a rhapsody with some representation of this customary elaboration can hope to do justice to the effect of the traditional rendering.

In the German and Polish rituals the verses of Meshullam ben Kalonymus are divided off into sections of irregular length at the six points where a quotation from the Scripture or the Talmud occurs. The quotations וכך היה אומר ("Thus did he say") —containing the confession of sin, first of the high priest personally, then of the Aaronites, then of all Israel—and וכך היה מונה ("Thus did he count")—where Aaron counts the sprinklings on the altar—are chanted responsively, each phrase by cantor and congregation in rotation. Compositions of the modern masters have largely taken the place of the old plain-song chant, itself mainly a rising modulation and then a falling tone.

Phases of the Music.

But the Talmudic passage commencing והכהנים ("Now the priests"), which occurs after each confession, and describes the scene when the Tetragrammaton was pronounced, reverses this order. It is first uttered by the congregation (usually led by some individual), who prostrate themselves when reciting the words describing that action. Then comes the turn of the ḥazan, who intones the passage given above. In this transcription the opportunity is afforded by the repetition of the melody to present both the chief forms of ornamental development, the first being rather German, the other rather Polish, in tradition. It will be noticed that the cantor commences calmly to intone the words of the Mishnah in the major mode, but that the mystic solemnity of the scene in the Temple court soon overcomes his imagination, and he breaks away into the weird strenuousness of the Oriental chromatic scale (Ḥazanut, Niggun) at the thought of the Divine Presence. He attempts a return to the calmness of the original key, but the thoughts conjured up by the words again overwhelm his intention, and drive him on to an ecstatic climax.

F. L. C.

'ABODAH ZARAH (עבודה זרה, "Idolatrous Worship"): The name of one of the treatises of the Mishnah, of the Tosefta, and of the Babylonian and the Palestinian Talmud, belonging to the Order Neziḳin. It is divided into five chapters. As indicated by the name, it treats of the laws regulating the conduct of the Jews toward idolatry and idolaters. These laws are based principally on the legislation of the Pentateuch, which proscribed idolatry in all its forms and manifestations, and even interdicted such close association with the heathen nations in Palestine as might mislead the Israelites to participate in their idolatrous worship.

Although, after their return from the Babylonian exile, the Jews appeared to have been radically cured of idolatry, there was danger of a relapse in the period preceding the Maccabees, and still more in the period of the Roman conquest. The religious authorities, therefore, found it necessary to renew with increased rigor the Biblical injunctions against idolatry and against social intercourse with the worshipers of idols. A codification of the rabbinical laws on this subject is presented in the treatise of the Mishnah and the Tosefta bearing the name of 'Abodah Zarah, while the Gemara (or Talmud) referring to that Mishnah contains the comments and discussions of the Palestinian and the Babylonian rabbis (Amoraim) on these laws.

The numerous provisions of the rabbinical laws embodied in the Mishnah of 'Abodah Zarah may be divided into the two following classes: (1) Provisions for guarding against the least appearance of favoring idolatry, directly or indirectly, and for preventing the danger of coming in contact with it. (2) Provisions for guarding against the immoral practises prevailing among the heathen.

Restrictions in Intercourse with the Heathen.

The first of the two classes may be illustrated by the following examples: It is forbidden to have any business dealings with the heathen during three days before their principal public festivals, such as the calends of January, the Saturnalia, etc. If, however, a heathen celebrate a private festival, it is forbidden to deal with him on that day only (Mishnah, 'Ab. Zarah, i. 1–3). In cities in which idolatrous fairs are held stores which are festooned with laurels must not be visited, as the sales in such stores are generally for the benefit of the idolatrous temples (i. 4). It is not allowed to sell to a heathen any object for the use of idolatry or to rent to him a house in which to place his idols. Objects that in any way may be connected with idolatry are forbidden to be sold (i. 5, 8, 9). Wine belonging to a heathen, who may have poured out some of it as a libation, is not only forbidden to be used, but even any indirect benefit derived from this wine is prohibited (ii. 3). No one may sit in the shade of a tree that has been planted for idolatrous purposes, nor make any use of the wood taken from such a tree; even the bread baked in an oven that has been heated by such wood is not to be used (iii. 7–9).

The following examples will illustrate the other class of prohibitions against corruption by immoral practises: The barbarous gladiatorial shows, especially the public fights with wild beasts, wherein the heathen, particularly the Romans, delighted, were regarded as so inhuman that no Jew was permitted to sell for such a purpose bears, lions, or even any instrument of cruelty, or to erect for such use buildings in which blood was to be shed or cruelty practised (i. 7). On account of the depravity among the heathen, a Jew must not entrust his animal to their care. A Jewish woman must not be in the company of a heathen, as he is under suspicion of sexual immorality; neither must a Jew remain in a lonesome place with heathen, lest he be assassinated by them (ii. 1). That such suspicions of the moral character of the heathen were not unfounded is evident from the contemporaneous classical literature describing the moral corruption prevailing in Rome and in the chief cities of Asia under the emperors in the first centuries of the common era.

Reasons for Existence of Idols.

Interspersed among the above-mentioned laws, contained in the Mishnah treatise of 'Abodah Zarah, are also some characteristic narratives in reference to idols and idolatry. Of these the following is of special interest: The Jewish elders in the city of Rome were once asked by a heathen, "If your God is displeased with idols, why does He not destroy them?" The answer was, "Because among the worshiped objects are also the sun, the moon, and the stars, which are necessary for the world. Should God destroy the world on account of the fools that worship those celestial bodies?" "But," rejoined the questioner, "why then does your God not destroy those worshiped objects which are not absolutely needed for the existence of the world?" And the elders replied, "This would merely confirm the heathen the more in their false belief that the sun, the moon, and the stars must be worshiped as deities, since they can not be destroyed" (iv. 7). In the Tosefta the answer of the elders closes with the remark, "The world goes its natural course, undisturbed by the foolish acts of man; but God will call the wicked to account for their folly" (vii. 7).

The Gemara (Talmud Babli and Yerushalmi), elaborately commenting on the Mishnah treatise of 'Abodah Zarah, discusses the reasons and the applications of the various laws contained therein, and abounds in ethical sentences and exegetical remarks. Moreover, it contains numerous historical and ethnographical records, and especially many statements and legends which throw much light on the customs of the heathen world. Both the Mishnah and the Gemara show a remarkable familiarity with heathen, especially Roman and Greek, life, and are a storehouse of archeology yet to be explored. There is a history of some Jewish martyrs during the Hadrianic persecutions contained in folio 18 of the Babylonian Talmud.

ABOMINATION: Rendering in the English versions of different Biblical terms denoting that which is loathed or detested on religious grounds and which, therefore, is utterly offensive to the Deity. These terms differ greatly in the degree of the abhorrence implied and should be distinguished in translation, as follows:

(1) תועבה (*to'ebah*): Abomination of the highest degree: originally that which offends the religious sense of a people. Thus (Gen. xliii. 32): "The Egyptians might not eat bread with the Hebrews; for that is an abomination unto the Egyptians." The reason is that the Hebrews, as foreigners, were considered an inferior caste. According to Herodotus, ii. 41, no Egyptian would kiss a Greek on the mouth, or use his dish, or even taste meat cut with a carving-knife belonging to a Greek. But especially as shepherds the Hebrews were "an abomination unto the Egyptians" (Gen. xlvi. 34). The eating of unclean animals is a religious offense called to'ebah: "Thou shalt not eat any abominable thing" (Deut. xiv. 3). This is the introduction to the laws prohibiting the use of unclean animals (see Clean and Unclean Animals). Still more offensive to the God of Israel is the practise of idolatry. The idol itself is called an Abomination: "for it is an abomination to the Lord thy God. Neither shalt thou bring an abomination into thine house and thus become a thing set apart [tabooed=*ḥerem*] like unto it; thou shalt utterly detest it and utterly abhor it, for it is a thing set apart [tabooed]" (Deut. vii. 25, 26, *Heb.*): "Cursed be the man that maketh a graven or molten image, an abomination unto the Lord" (Deut. xxvii. 15). Often the word to'ebah is used for idol or heathen deity; for instance, in Isa. xliv. 19; Deut. xxxii. 16; II Kings, xxiii. 13, and especially Ex. viii. 22 (26, A. V.), it is to be taken in this sense. When Pharaoh had told the Israelites to offer sacrifices to their God in Egypt, Moses replied: "How may we sacrifice the abomination of the Egyptians [that is, the kind of animals worshiped by them] before their eyes, and they not stone us?" (see Ibn Ezra, *ad loc.*).

All idolatrous practise is an Abomination because of its defiling character: "Every abomination to the Lord which he hateth have they done unto their gods" (Deut. xii. 31; compare Deut. xiii. 15, xvii. 4, xx. 18). Also magic and divination are an Abomination (Deut. xviii. 12). Sexual transgression is particularly denounced as an Abomination (to'ebah) (Deut. xxii. 5, xxiii. 19 [18, A. V.], xxiv. 4); especially incest and unnatural offenses (Lev. xviii. and xx.): "For all these abominations have the men of the land done who were before you, and the land became defiled; lest the land vomit you out also when ye defile it" (Lev. xviii. 27, 28, *Heb.*; compare also Ezek. viii. 15 and elsewhere).

But the word to'ebah also assumes a higher *spiritual* meaning and is applied also to moral iniquities: "Thou shalt not have in thine house divers measures, a great and a small. . . For all that do such things, and all that do unrighteously, are an abomination unto the Lord thy God" (Deut. xxv. 14–16). In the same strain we are taught that "lying lips" (Prov. xii. 22), "the perverse" (*ib.* iii. 32, R. V.), the "proud in heart" (*ib.* xvi. 5), "the way of the wicked" (*ib.* xv. 9), "thoughts of evil" (*ib.* xv. 26, *Heb.*), and "he that justifieth the wicked and he that condemneth the righteous" (*ib.* xvii. 15) are an Abomination. "These six things doth the Lord hate, yea, seven things are an abomination to him: haughty eyes; a lying tongue; hands that shed innocent blood; a heart that deviseth wicked imaginations; feet that be swift in running to mischief; a false witness that uttereth lies, and he that soweth discord among brethren" (*ib.* vi. 16–19, *Heb.*). In another direction the prohibition of an abominable thing is given an ethical meaning: "Thou shalt not sacrifice unto the Lord thy God an ox or a sheep wherein is a blemish, for that is an abomination unto the Lord thy God" (Deut. xvii. 1, *Heb.*). Here the physical character of the sacrifice is offensive. But prophet and sage declare that any sacrifice without purity of motive is an Abomination: "Bring no more an oblation of falsehood—an incense of abomination it is to me" (Isa. i. 13, *Heb.*; compare Jer. vii. 10). "The sacrifice of the wicked" (Prov. xv. 8, xxi. 27) and the prayer of "him that turneth his ear from hearing the law" (Prov. xxviii. 9, *Heb.*) are an Abomination.

(2) שקץ (*sheḳeẓ*) or שקוץ (*shiḳḳuẓ*): Expresses detestation, or a detestable thing of a somewhat less degree of horror or religious awe; also rendered "Abomination" in the Authorized Version of the Bible. It is applied to prohibited animals (Lev. xi. 10–13, 20, 23, 41, 42; Isa. lxvi. 17; Ezek. viii. 10): "Ye shall not make yourselves abominable" (Lev. xi. 43). But it is also used for that which should be held as detestable; often parallel to or together with to'ebah and applied to idols and idolatrous practises (Deut. xxix. 17; Hosea, ix. 10; Jer. iv. 1, xiii. 27, xvi. 18; Ezek. xi. 18–21, xx. 7, 8). See especially Milcom, "the detestable thing of the Ammonites," the god of the Ammonites (I Kings, xi. 5), used exactly as to'ebah in the passages referred to above (see also Abomination of Desolation).

(3) פגול (*piggul*): Unclean, putrid; used only for sacrificial flesh that has become stale and tainted (Lev. vii. 18, xix. 7; Ezek. iv. 14; Isa. lxv. 4); compare *leḥem megoal*, "the loathsome bread," from *gaal*, "to loathe" (Mal. i. 7). For the later rabbinic conception of piggul, see Sacrifice. H. P. M.

ABOMINATION OF DESOLATION: An expression occurring in Matt. xxiv. 15 and Mark, xiii. 14 (A. V.), where the Greek text has *τὸ βδέλυγμα τῆς ἐρημώσεως*. The Greek itself, however, is referable to a Hebrew expression, שִׁקּוּץ מְשֹׁמֵם, found in Dan. ix. 27 (where the ם of שקוצים has been added, through a copyist's error, from the מ of the ensuing word); in Dan. xi. 31, and in Dan. xii. 11 (with omission of the prefixed מ).

The context of these passages leaves no room for doubt as to what was intended by this somewhat odd expression; namely, the transformation, by Antiochus Epiphanes, of the sacred Temple at Jerusalem into a heathen one. In both Biblical and rabbinical Hebrew abomination is a familiar term for an idol (I Kings, xi. 5; II Kings, xxiii. 13; Sifra, Ḳedoshim, beginning, and Mekilta, Mishpatim, xx. ed. Weiss, 107), and therefore may well have the same application in Daniel, which should accordingly be rendered, in agreement with Ezra, ix. 3, 4, "motionless abomination" or, also, "appalling abomination." The suggestion of many scholars—Hoffmann, Nestle, Bevan, and others—that שקוץ שמם, as a designation for Jupiter is simply an intentional perversion of his usual appellation "Baal Shamem" (בעל שמם, "lord of heaven") is quite plausible, as is attested by the perversion of "Beelzebub" into "Βεελζεβούλ" (Greek version) in Mark, iii. 22, as well as the express injunction found in Tosef., 'Ab. Zarah, vi. (vii) and Babli 'Ab. Zarah, 46*a*, that the names of idols may be pronounced only in a distorted or abbreviated form (see the examples quoted there). Though the expression "Abomination of Desolation" is accordingly recognized in the light of this interpretation as a mistranslation of the phrase used in Daniel, there is no doubt that in the circles directly influenced by the Book of Daniel—the same circles that originated the apocalyptic literature—the expression was employed to designate an important eschatological conception. For it is only in an eschatological sense that the expression can be adequately explained in the New Testament passages above mentioned.

According to most modern commentators, these passages are a Jewish apocalypse, somewhat tinged with Christianity, intended to prophesy the end of time, when the Antichrist, as the Abomination of Desolation, shall be enthroned as a ruler in God's Temple. The closely related "smaller Apocalypse" in II Thess. ii. 1-12 is a conclusive justification of this view; for it shows that neither the Romans (as Weiss in his commentary, *ad loc.*, holds), nor the Zealots (Bleek, "Synoptische Erklärung," and others), nor Caligula with his self-deification (Spitta, in his "Offenbarung Johannis") can be intended.

——**In Rabbinical Literature:** The rabbis as a whole consider that the expression שקוץ שמם refers to the desecration of the Temple by the erection of a Zeus statue in its sacred precincts by Antiochus Epiphanes (see Apostemos). Some rabbis, however, see in it an allusion to Manasseh, who, as related in II Chron. xxxiii. 7, set up "a carved image . . . in the house of God" (Yer. Ta'anit, iv. 68*a*, and Rashi on the passage in Babli, *ibid.* 28*b*). The Haggadah narrates that two statues were erected, one of which fell over upon the other and broke off its hand. Upon the severed hand the following inscription was found engraved: "I sought to destroy God's house, but Thou didst lend Thy hand to its protection" (Ta'anit, 28*b et seq.*; compare Rabbinovicz, "Variæ Lectiones," on the passage for variant readings).

Juden*, iv. note 15; Chajes, *Markus-Studien*, p. 72.

L. G.

ABOT ("The Fathers") or **PIRḲE ABOT** ("Chapters of the Fathers"): The name of a small but highly valuable treatise of the Mishnah containing the oldest collection of ethical maxims and aphorisms of rabbinical sages. It is the last of the nine treatises belonging to Neziḳin, the fourth section of the Mishnah collection. The word "Abot" in the title of this treatise is used in the sense of chief authorities whose favorite sayings are quoted in this work. On account of the preeminently ethical character of its contents, the treatise is commonly designated as "The Ethics of the Fathers." It is divided into five chapters, which are subdivided into paragraphs. The first chapter opens by stating the continuity of tradition from Moses to the Men of the Great Synod, and from these down to the principal teachers of the Mishnah. The object of this historical statement was evidently to give the ethical teachings collected in this treatise more weight and authority by linking them through the chain of tradition to the Law of Moses proclaimed on Sinai. At first the treatise comprised only the chain of tradition down to the school of Johanan ben Zakkai, but it was gradually enlarged and interpolated (see Hoffman, "Die Erste Mishnah," p. 26, and "Seder Neziḳin," p. 20, Berlin, 1898).

The first four chapters of Pirḳe Abot contain sentences of sixty distinguished teachers who flourished during a period covering about four hundred and fifty years that extends from the time of Simon the Just to the close of the compilation of the Mishnah. Every teacher is credited with one, and some of them with several sayings. The sentence thus ascribed to a certain teacher is generally one which was habitually in his mouth as his favorite maxim, or one which is a condensed summary of his experience and wisdom. Like the Biblical proverbs, these rabbinical sentences are generally brief and concise in style, each conveying some important truth or precept. Some of them are like precious stones of many facets; for instance, Hillel's sentence: "If I do not care for myself, who will care for me? and if I care only for myself, what am I? and if not now, when?" (i. 14); which sentence reminds us of the duties of self-preservation and self-cultivation, and at the same time warns against selfishness and against procrastination. Some of the sentences are either a condensation or an amplification of Scriptural teachings. Thus, the Biblical laws of justice and love toward fellow men are summarized in the sentences: "Thy neighbor's property should be precious to thee as is thine own" (ii. 12); "Let thy neighbor's honor be as dear to thee as thine own" (ii. 10); "Meet every man with kindness and friendliness" (i. 15, iii. 12). In some instances the rabbis gave a new setting to a Biblical maxim. Thus, the Biblical teaching "A good name is better than precious ointment" (Eccl. vii. 1) is beautifully set in the rabbinical sentence: "There are three crowns, the crown of learning, the crown of priesthood, and the crown of royalty; but the crown of a good name excelleth them all" (iv. 13). In some of the sentences we find single pearls of Biblical wisdom gracefully applied to practical life, as in the following sentence of Ben Zoma (iv. 1):

Amplification of Biblical Passages.

> "Who is wise? He who learns from everybody, as is said (Ps. cxix. 99, *Heb.*): 'From all who could teach me have I obtained instruction.' Who is a hero? He who suppresses his passion, as it is said (Prov. xv. 32, *Heb.*): 'He that ruleth his spirit is better than he that taketh a city.' Who is rich? He who is satisfied with his lot, as it is said (Ps. cxxviii. 2, *Heb.*): 'When thou eatest the labor of thine hands, thou shalt be happy, and it is well with thee.' Who is honorable? He who honors his fellow men, as it is said (I Sam. ii. 30, *Heb.*): 'Those that honor me I will honor'" [implying that in honoring the creature you honor the Creator].

The fifth chapter differs in form and in contents from the preceding four chapters, and was evidently an additional collection made by another compiler. With the exception of the last four paragraphs, the sentences of this chapter are not quoted in the name of their authors, but are given anonymously. They contain historical, legendary, and ethical aphorisms, arranged, in the main, according to certain numerals, especially the numbers ten, seven, four, and three, as:

> "By ten divine words the world was created," etc. (v. 1). "Seven are the characteristics of the wise and seven of the uncultured," etc. (v. 7). "There are four kinds of dispositions among men," etc. (v. 10). "He who possesseth the following three virtues is of the disciples of Abraham," etc. (v. 19).

Although ethics is not treated in Pirḳe Abot in a coherent system, but given in single pithy sentences coming from the mouths of various teachers who belong to different periods, still these rabbinical sentences, if properly arranged, present an almost complete code of human duties. They are, besides, replete with wise observations, practical rules of life, and also with some purely religious aphorisms concerning prayer, repentance, and the future life.

The treatise Abot holds the same place in the rabbinical literature as does the Book of Proverbs in the Bible. A celebrated Babylonian teacher of the fifth century properly remarked: "He who wants to become truly pious and virtuous, let him study and practise the teachings of Abot" (B. Ḳ. 30*a*). The high estimation in which this little treatise is held in Judaism is evident from the fact that it was embodied in the old prayer-book as a part of the liturgy for the Saturday afternoon service during the summer months. In that prayer-book, the five chapters of Abot are increased by a sixth chapter containing rabbinical sentences collected in a Baraita (extraneous Mishnah), called "Ḳinyan Torah" (Acquisition of the Law). Through this liturgical use the treatise Abot became the most popular of all rabbinical writings, and in this way its ethical contents exercised the most beneficial influence on the Jewish masses.

There is no Gemara on Abot, as the nature of the contents of this treatise admitted of no discussions; but see ABOT DE-RABBI NATHAN.

BIBLIOGRAPHY: (1) *Editions:* The treatise *Abot* is printed in all editions of the *Talmud* and in those of the *Mishnah*, as well as in numerous separate editions. An edition of the Hebrew text, accompanied with useful literary notes in German, was published by Prof. Hermann L. Strack, Leipsic, 1882.

(2) *Commentaries:* Besides the general commentaries on all parts of the *Mishnah* there are numerous Hebrew commentaries exclusively on *Pirḳe Abot*. A collective commentary under the title of *Midrash Shemuel* was published by Samuel da Uceda (Venice, 1579), and has since passed through seven editions. Valuable comments on the first three chapters of *Abot* are published in Abraham Geiger's *Nachgelassene Schriften*, iv. 281-344. The value of *Abot* from a historical point of view was investigated by Z. Frankel, in his article *Ueber den Lapidarstyl der Talmudischen Historik*, in *Monatsschrift*, 1852, pp. 203 *et seq.*, 403 *et seq.*

(3) *Translations:* Latin translations of *Abot* were published, one by Sebastian Münster, the celebrated disciple of Reuchlin, Basel, *sine anno*, and one by Paulus Fagius, Isny, 1541. It has since been translated into almost all modern languages. As to English translations, special mention may be made, on account of its valuable notes, of Charles Taylor's *Sayings of the Jewish Fathers*, 2d ed., Cambridge, 1899. For a full list of translations see Bischoff, *Kritische Geschichte der Talmud-Uebersetzungen*, § 56.

(4) *Homiletical Works on Abot* in modern languages: Lazarus Adler, *Sprüche der Väter*, Fürth, 1851; W. Aloys Meisel, *Homilien über die Sprüche der Väter*, Stettin, 1855; Alexander Kohut, *The Ethics of the Fathers*, translated from the German by Max Cohen, New York, 1885.

ABOT DE-RABBI NATHAN (אבות דר' נתן): A work which in the form now extant contains a mixture of Mishnah and Midrash, and may be designated as a homiletical exposition of the Mishnaic treatise Pirḳe Abot, having for its foundation an older recension of the treatise. Touching its original form, its age, and its dependence on earlier or later recensions of the Mishnah, there are many opinions, all of which are ably discussed in Schechter's introduction. There are two recensions of this work, one of which is usually printed with the Babylonian Talmud in the appendix to the ninth volume, containing also the so-called Minor Treatises, and another which, until recently, existed in manuscript only. In 1887 Solomon Schechter published the two recensions in parallel columns, contributing to the edition a critical introduction and valuable notes. In order to distinguish the two recensions, the one which is printed with the Talmud may be called *A*; and the other, *B*. The former is divided into forty-one chapters, and the latter into forty-eight. Schechter has proved that recension *B* is cited only by Spanish authors. Rashi knows of recension *A* only.

In contents the two recensions differ from each other considerably, although the method is the same in both. The separate sentences of the Mishnah Abot are generally taken as texts, which are either briefly explained—the ethical lessons contained therein being supported by reference to Biblical passages—or fully illustrated by narratives and legends. Sometimes long digressions are made by introducing subjects which are connected only loosely with the text. This method may be illustrated by the following example: Commenting on the sentence of Simon the Just, in Pirḳe Abot, i. 2, which designates charity as one of the three pillars on which the world rests, the Abot de-Rabbi Nathan (recension *A*) reads as follows:

> "How [does the world rest] on charity? Behold, the prophet (Hosea, vi. 6) said in the name of the Lord, 'I desired charity [mercy], and not sacrifice.' The world was created only by charity [mercy], as is said (Ps. lxxxix. 3), 'Mercy shall be built up for ever' (or, as the rabbis translate this passage, 'The world is built on mercy'). Rabbi Johanan ben Zakkai, accompanied by R. Joshua, once passed Jerusalem [after its fall]. While looking upon the city and the ruins of the Temple, R. Joshua exclaimed, 'Wo unto us, that the holy place is destroyed which atoned for our sins!' R. Johanan replied, 'My son, do not grieve on this account, for we have another atonement for our sins; it is charity, as is said, I desired charity, and not sacrifice" (ch. iv.).

The chapters of the two recensions of Abot de-Rabbi Nathan correspond with those of the Mishnah Abot as follows: Chaps. i. to xi. of recension *A* and chaps. i. to xxiii. of recension *B* correspond with chap. i. 1-11 in Pirḳe Abot; chaps. xii. to xix. of *A* and chaps. xxiv. to xxix. of *B* correspond with chap. i. 12-18 and the whole of chap. ii. in Pirḳe Abot; chaps. xx. to xxx. of *A* and chaps. xxx. to xxxv. of *B* correspond with chaps. iii. and iv. in Pirḳe Abot; chaps. xxxi. to xli. of *A* and chaps. xxxvi. to xlviii. of *B* correspond with chap. v. in Pirḳe Abot.

Rabbi Nathan, whose name appears in the title of the work under treatment, can not possibly have been its only author, since he flourished about the middle of the second century, or a generation prior to the author of the Mishnah. Besides, several authorities are quoted who flourished a long time after R. Nathan; for instance, Rabbi Joshua ben Levi. The designation "De-Rabbi Nathan" may perhaps be explained by the circumstance that R. Nathan is one of the first authorities mentioned in the opening chapter of the work. Perhaps the school of the tannaite R. Nathan originated the work. It is also called Tosefta to Abot (see Horowitz, "Uralte Tosef-tas," i. 6, Frankfort-on-the-Main, 1889; Brüll's "Jahrbücher," ix. 139 *et seq.*). The two recensions of the work in their present shape evidently have different authors; but who they were can not be ascertained. Probably they belonged to the period of the Geonim, between the eighth and ninth centuries.

ABRABALIA,* **JOSEPH** and **MOSES**: Spanish statesmen who flourished in Aragon in the latter half of the thirteenth century. Joseph was minister of finance to King Pedro III. (1276–85). Solomon ben Adret refers to Joseph and Moses as the "two great princes." The incident which brought them into notice is connected with the history of one of those informers from whom medieval Jews suffered so much and on whom Jewish law was so severe.

---

* Kaufmann thinks it possible that this name is derived from Ibn Albalia; Steinschneider, however, thinks that it is not an Arabic name (*Jew. Quart. Rev.* x. 130). Don Samuel Abrabalia was a member of a deputation sent in 1418 to Pope Martin V. (Grätz, *Gesch. d. Juden*, 3d ed., pp. 60, 128). A Solomon Abrabalia is mentioned as a printer living in Salonica in the year 1520 (Steinschneider, *Cat. Bodl.* No. 9076). G.

About the close of the reign of King James I. of Aragon (1213–76) there appeared at Barcelona an informer, favored by the authorities, who became a source of danger to the Jews of Aragon. Pedro III., on ascending the throne, summoned the representatives of the Jewish communities into his presence to answer certain charges. Knowing that these could emanate only from the informer of Barcelona, the Jews entreated him to withdraw his charges, at least on this occasion; but the renegade refused to be turned aside from his purpose. At this moment Joseph Abrabalia interceded with the king, exposing the evil designs of the informer and requesting his punishment. Joseph's intercession met with entire success. Pedro III. caused the informer to be seized and delivered over to the Jews. Jonah of Gerona (Geronda), and later also Solomon ben Adret, investigated the case. They condemned him, though with reluctance, and the man was executed by the state authorities about 1281. It seems that this drastic measure, which was prompted chiefly by Joseph, did not meet with unanimous approval, and three years after the latter's death many gave vent to their resentment. This bitter feeling caused the leading men of Gerona (Geronda) to ask Solomon ben Adret to revise the whole case. Adret unreservedly approved of the action of Joseph, and in order fully to appease the agitated communities, he also laid the matter before Meir of Rothenburg, who fully concurred in his decision. These responsa make it possible to ascertain the date of Joseph's death, on which the authorities are greatly at variance. Steinschneider, Zunz, and H. Brody place it in 1324, which is quite impossible, as Adret, who died not later than 1310, mentions Joseph Abrabalia with the memorial formula נ"ע. D. Kaufmann places the date of death at 1283, which is more in accordance with Adret's statements. A Moses Abrabalia is also mentioned in the responsa of Isaac ben Sheshet, though it is doubtful whether he is to be identified with Moses Abrabalia, the brother of Joseph.

Bibliography: D. Kaufmann, in *Jew. Quart. Rev.* viii. 222 *et seq.*, where the responsa referred to are reproduced.

ABRABANEL. See Abravanel.

ABRABANEL DORMIDO, DAVID (MANUEL MARTINEZ). See Dormido, David Abravanel.

ABRACADABRA: Magic word or formula used in incantations, especially against intermittent fever or inflammation, the patient wearing an amulet upon his neck, with the following inscription:

A B R A C A D A B R A
A B R A C A D A B R
A B R A C A D A B
A B R A C A D A
A B R A C A D
A B R A C A
A B R A C
A B R A
A B R
A B
A

The underlying idea was to force the spirit of the disease gradually to relinquish its hold upon the patient. It is first mentioned by Serenus Sammonicus, physician to the emperor Caracalla, whose work, "De Medicina Præcepta," was admired by the emperors Geta and Alexander Severus. He prescribes that the word be written in the form of an inverted cone, the whole word being written out at first, then with one letter less on each line until one letter stands alone (see King, "Gnostics and Their Remains," p. 317). The explanation that it is a corruption of *Ha-Bracha* and *Dobar* hardly deserves consideration. The Jewish Cabala probably had nothing to do with it. But it finds a striking parallel in Pesaḥim, 112*a*, which recommends the same means of gradually reducing the power of disease by an incantation formula which subdues the invoked spirit of the disease. The person who is in danger of becoming a victim of the spirit Shabriri ("Blindness") is told to say: "My mother hath told me to beware of

S H A B R I R I
A B R I R I
R I R I
R I R
R I."

It is, therefore, probable that the word was originally the name of a demon which is no longer recognizable. It has been the subject of the following stanza (King, *l.c.*):

> "Thou shalt on paper write the spell divine,
> Abracadabra called, in many a line;
> Each under each in even order place,
> But the last letter in each line efface.
> As by degrees the elements grow few
> Still take away, but fix the residue,
> Till at the last one letter stands alone
> And the whole dwindles to a tapering cone.
> Tie this about the neck with flaxen string;
> Mighty the good 'twill to the patient bring.
> Its wondrous potency shall guard his head,
> And drive disease and death far from his bed."

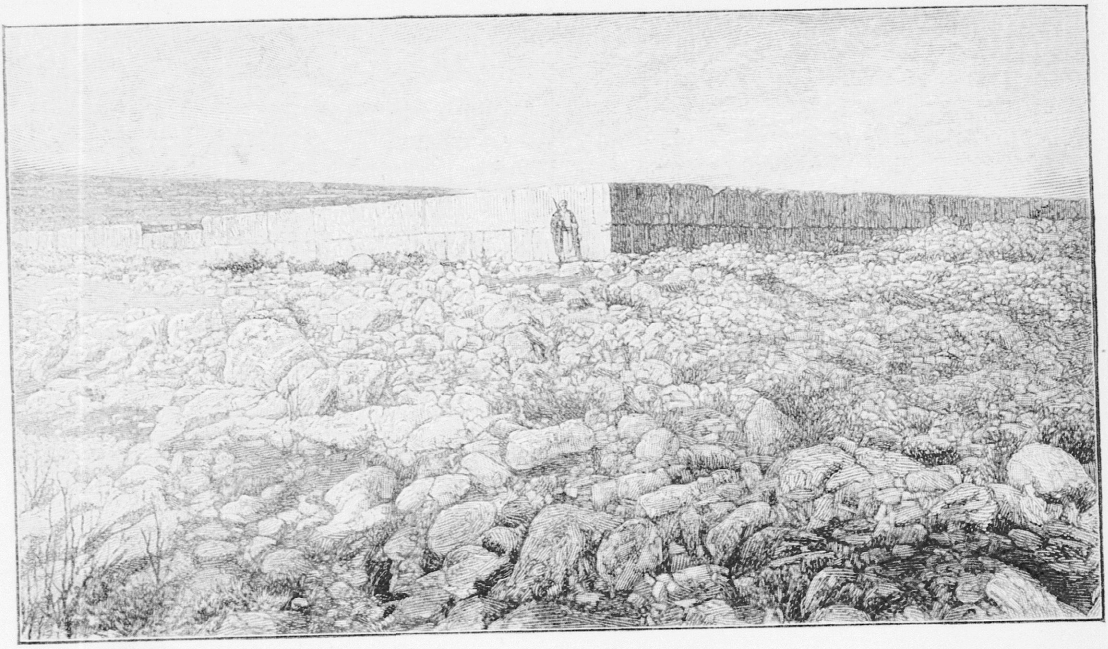
K.

ABRAHAM.—Biblical Data: According to the Bible, Abraham (or Abram) was the father of the Hebrews. The Biblical account of the life of Abram is found in Gen. xi. 26 to xxv. 10. According to this narrative, he was the son of Terah and was born at Ur of the Chaldees. Terah, with Abram, Sarai (Abram's wife), and Lot (Abram's nephew), left Ur to go to the land of Canaan; but they tarried at Haran, where Terah died (Gen. xi. 26–32). There the Lord appeared to Abram in the first of a series of visions, and bade him leave the country with his family, promising to make of him a great nation (*ib.* xii. 1–3), a promise that was renewed on several occasions. Accordingly, Abram with Sarai and Lot started for Canaan; and at the site of Sichem (or Shechem) the Lord promised the land as an inheritance to the patriarch's seed. After sojourning for a while between Beth-el and Hai (or Ai), Abram, on account of a famine, went to Egypt. Here, to guard against Pharaoh's jealousy, he passed Sarai off as his sister. Pharaoh took her into the royal household, but, discovering the deception, released her and sent Abram and his family away (*ib.* xii. 9–20). Abram returned northward to his former place of sojourn between Beth-el and Hai. There his shepherds quarreled with those of Lot, and the uncle and nephew separated, Lot going east to Sodom, while Abram remained in Canaan (*ib.* xiii. 1–12). Again the Lord appeared to the patriarch, and promised him an abundant progeny which should inherit the land of Canaan (*ib.* xiii. 14–17).

Birth and Wanderings.

Abram now removed to Mamre (*ib.* xiii. 18) in

Hebron, whence he made a successful expedition against Chedorlaomer, king of Elam, and his confederate kings, from whom he rescued Lot, whom Chedorlaomer had captured in the course of an attack upon Sodom and Gomorrah. On his return from this expedition, Abram was blessed by Melchizedek, king of Salem, and refused to retain the recaptured booty offered him by the king of Sodom (*ib.* xiv.).



TRADITIONAL HOUSE OF ABRAHAM.

(From a photograph reproduced by permission of the Palestine Exploration Fund.)

Once more the Lord appeared to Abram with a promise of abundant offspring, at the same time foretelling their captivity for four hundred years in a strange land and their subsequent inheritance of the land between "the river of Egypt" and the Euphrates. "And he believed in the Lord; and he counted it to him for righteousness" (*ib.* xv. 6). Sarai had hitherto been barren. She now gave Abram her handmaid Hagar, an Egyptian, as wife; and the latter bore a son, Ishmael, Abram being at the time eighty-six years old (*ib.* xvi.). Again the Lord appeared to the patriarch with the promise of a numerous posterity. At the same time, in token of the promise, Abram's name was changed to Abraham ("Father of Many Nations"), and that of Sarai to Sarah ("Princess"). The Lord also instituted the "covenant of circumcision," and promised that Sarah should bear a son, Isaac, with whom he would establish it. Abraham thereupon circumcised himself and Ishmael (*ib.* xvii. 1–21). Soon after, three angels in human guise were hospitably entertained by Abraham in Mamre, where the Lord again foretold Isaac's birth, and when Sarah doubted the promise, the Lord himself appeared and renewed it (*ib.* xviii. 1–15).

Birth of Ishmael.

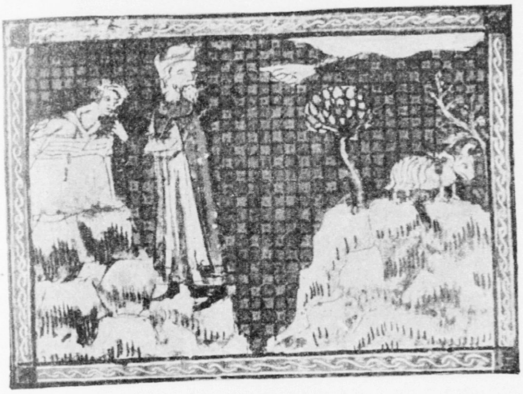
In recognition of Abraham's piety the Lord now acquainted him with His intention to destroy Sodom and Gomorrah on account of their wickedness; but, after several appeals from Abraham, He promised that Sodom should be spared if ten righteous men could be found therein (*ib.* xviii. 17–32). The cities were destroyed; but Lot and his family, who had been warned, fled from Sodom before its destruction. Abraham now journeyed to Gerar, between Kadesh and Shur, and for the second time passed Sarah off as his sister. Abimelech, king of Gerar, took her into his house; but, on being rebuked by God, released her precisely as Pharaoh had done (*ib.* xx.).

At the appointed time Isaac was born, Abraham being a hundred years old. Soon after, Ishmael, Hagar's son, was seen "mocking" by Sarah, and at her solicitation he and his mother were banished. Hagar was comforted in the wilderness by an angel of God (*ib.* xxi. 1–12). Abraham was now a powerful man; and at the solicitation of Abimelech, king of Gerar, he made a covenant with that monarch at Beer-sheba in the land of the Philistines. At Beer-sheba Abraham sojourned many days (*ib.* xxi. 22–34).

Birth and Sacrifice of Isaac.

The greatest trial of the patriarch's life came when God bade him offer up his only son as a burnt offering. Without a moment's hesitation Abraham took Isaac and proceeded to the land of Moriah, where he was just about to sacrifice him, when an angel of the Lord restrained him, once more delivering the prophecy that the patriarch's seed should be "as the stars of the heaven, and as the sand which is upon the seashore," and that in them all the nations of the earth should be blessed. Instead of Isaac a ram caught in a thicket was sacrificed (*ib.* xxii. 1–18). Abraham returned to Beer-sheba, and was sojourning there when Sarah died at Kirjath-arba (also called Hebron and Mamre), at the age of one hundred and twenty-seven (*ib.* xxiii. 1, 2). Abraham went to Mamre and bought the cave of Machpelah as a burial-place; and there he buried Sarah (*ib.* xxiii. 3–20).

Isaac was now thirty-six years old, and Abraham sent Eliezer, his servant, to bring a wife for him from among Abraham's own people. Eliezer journeyed to Nahor, and returned with Rebekah, Abraham's grandniece, whom Isaac married (*ib.* xxiv.). Abraham now married again, taking as his wife Keturah, by whom he had several children. Before his death he "gave all that he had" to Isaac, and sent the sons of his concubines away after bestowing some gifts upon them (*ib.* xxv. 1–6). Abraham died at the age of one hundred and seventy-five years; and Isaac and Ishmael buried him beside Sarah in the cave of Machpelah (*ib.* xxv. 7–9). C. J. M.



Abraham and Isaac.
(From the Sarajevo Haggadah.)

Prototype of the Jewish Race.

—**In Apocryphal and Rabbinical Literature:** In the Old Testament Abraham presents the type of a simple Bedouin sheik who wanders from place to place in search of pasture for his herds, a kind-hearted, righteous, and God-fearing man whom God chose on account of his faithful and righteous character to be the father of a nation peculiarly favored by Him in the possession of the coveted land of Canaan. Once he is spoken of as a "prophet" (Gen. xx. 7). Incidentally we learn that his father, Terah, was an idolater, like the rest of the Chaldeans (Josh. xxiv. 2); but how Abraham became a worshiper of the Lord, or why God singled him out and led him forth to Canaan, is left to surmise. No sooner, however, did the Jewish people come into closer contact with nations of higher culture, especially with the Greeks in Alexandria, than the figure of Abraham became the prototype of a nation sent forth to proclaim the monotheistic faith to the world while wandering from land to land. Accordingly, the divine promise (Gen. xii. 3, xxii. 18) is understood to mean: ". . . in thee [instead of "with thee"] shall all the families of the earth be blessed" (see LXX. *ad loc.*).

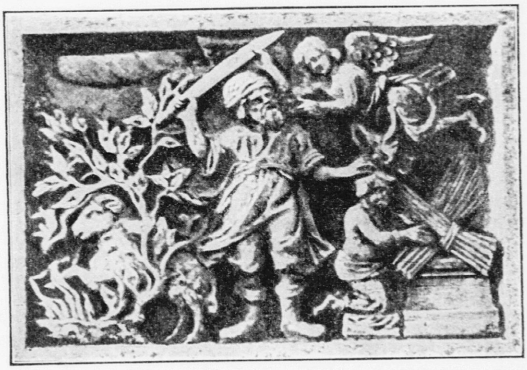
Propagator of the Knowledge of God.

In the third and second centuries B.C., Alexandrine Jews, writing under the name of Hecatæus and Berosus, and Samaritans, like Eupolemus, composed works on Jewish history, from which Josephus ("Ant." i. 7, § 8) gives the following: Abraham, endowed with great sagacity, with a higher knowledge of God and greater virtues than all the rest, was determined to change the erroneous opinions of men. He was the first who had the courage to proclaim God as the sole Creator of the universe, to whose will all the heavenly bodies are subject, for they by their motions show their dependence on Him. His opposition to astrology provoked the wrath of the Chaldeans, and he had to leave their country and go to Canaan. Afterward, when he came to Egypt, he entered into disputes with all the priests and the wise men, and won their admiration and, in many cases, their assent to his higher views. He imparted to them the knowledge of arithmetic and astronomy, which sciences came to Egypt from Chaldea only in the days of Abraham. Abraham's revolt from Chaldean astrology is spoken of in Philo ("On Abraham," xvii.), in connection with Gen. xv. 5 (compare Gen. R. xliv.).

Opposes Idolatry.

Concerning his religious awakening in his father's house, the Book of Jubilees, written probably in the time of John Hyrcanus, relates (xi.) that, in order not to participate in the idolatry practised in connection with astrology by the whole house of Nahor, Abraham, when he was fourteen years of age, left his father, and prayed to God to save him from the errors of men. Abraham became an inventor of better modes of agriculture, showing the people how to save the seeds in the field from the ravens that devoured them. He then tried to persuade his father to renounce idol-worship, but Terah was afraid of the people and told him to keep silent. Finally, when Abraham met with the opposition of his brothers also, he arose one night and set fire to the house in which the idols were kept. In an attempt to save these, his brother Haran was burned to death.

When, in the night of the new moon of Tishri (the New-year), Abraham was watching the stars to forecast the year's fertility, the revelation came to him that, in view of God's omnipotent will, all astrological predictions were valueless, and, after fervent prayer, he received word from God to leave the Chaldeans and set out on his mission to bless the nations by teaching them the higher truths. An angel of God taught him Hebrew, the language of revelation, by which he was enabled to decipher all the secrets of the ancient books (see Gen. R. xlii). Leaving his brother Nahor with his father, Abraham went to the Holy Land and observed there all the festivals and new moons (afterward prescribed to the Israelites, but already written on the heavenly tablets revealed to Enoch), besides many other customs observed by the priesthood of the second century B.C.



Abraham and Isaac.
(From a tombstone in the graveyard of the Amsterdam Portuguese Congregation.)

According to one opinion, Abraham attained the true knowledge of God when he was three years old; according to others, at ten; and again a more sober opinion claims that he was forty-eight years old (Gen. R. xxx).

In his warfare against the hosts of Amraphel and other kings, Abraham cast dust upon them, and it turned into swords and lances, and the stubble turned into bows and arrows (according to Isa. xli. 2). Og, the giant king of Bashan, was the one "that escaped" (*ha-palit*), and brought him the news of the capture of Lot. Og was of the remnant of the giants that lived before the Flood (Deut. iii. 11). He cast a lustful eye upon Sarah, and hoped to see Abraham killed in the war in order that he might take her to wife.

His Birth.

Far more explicit is the story of Abraham's life in his Chaldean home as told by the Palestinian rabbis of the second century, and afterward further developed under the influence of Babylonian folk-lore. He was born in Kuta, another name for Ur of the Chaldees (B. B. 91*a*). On the night when he was born, Terah's friends, among whom were councilors and soothsayers of Nimrod, were feasting in his house, and on leaving late at night they observed a star which swallowed up four other stars from the four sides of the heavens. They forthwith hastened to Nimrod and said: "Of a certainty a lad has been born who is destined to conquer this world and the next; now, then, give to his parents as large a sum of money as they wish for the child, and then kill him." But Terah, who was present, said: "Your advice reminds me of the mule to whom a man said, 'I will give thee a house full of barley if thou wilt allow me to cut off thy head,' whereupon the mule replied: 'Fool that thou art, of what use will the barley be to me if thou cuttest off my head?' Thus I say to you: if you slay the son, who will inherit the money you give to the parents?" Then the rest of the councilors said: "From thy words we perceive that a son has been born to thee." "Yes," said Terah, "a son has been born to me, but he is dead." Terah then went home and hid his son in a cave for three years. When, on coming out of the cave, Abraham saw the sun rising in all his glory in the east, he said to himself: "Surely this is the Lord of the universe, and Him I will worship." But the evening came, and lo! the sun set and night befell him, and seeing the moon with her silver radiance, he said, "This, then, is the Lord of the world, and all the stars are His servants; to Him I will kneel." The following morning, when moon and stars had disappeared and the sun had risen anew, Abraham said: "Now I know that neither the one nor the other is the Lord of the world, but He who controls both as His servants is the Creator and Ruler of the whole world." Forthwith Abraham asked his father: "Who created heaven and earth?" Terah, pointing to one of his idols, replied: "This great image is our god." "Then let me bring a sacrifice to him!" said Abraham, and he ordered a cake of fine flour to be baked, and offered it to the idol, and when the idol did not eat it, he ordered a still finer meal-offering to be prepared, and offered it to the idol. But the idol did neither eat nor answer when addressed by him, and so Abraham grew angry and, kindling a fire, burned them all. When Terah, on coming home, found his idols burnt, he went to Abraham and said: "Who has burned my gods?" Abraham replied: "The large one quarreled with the little ones and burned them in his anger." "Fool that thou art, how canst thou say that he who can not see nor hear nor walk should have done this?" Then Abraham said: "How then canst thou forsake the living God and serve gods that neither see nor hear?"

Breaks Idols.

According to Gen. R. xxxviii. and Tanna debe Eliyahu, ii. 25 (probably a portion of Pirke R. El.), Terah was a manufacturer of idols and had them for sale. One day when Terah was absent and Abraham was left to take charge of the shop, an old, yet vigorous, man came in to buy an idol. Abraham handed him the one on top, and he gave him the price asked. "How old art thou?" Abraham asked. "Seventy years," was the answer. "Thou fool," continued Abraham, "how canst thou adore a god so much younger than thou? Thou wert born seventy years ago and this god was made yesterday." The buyer threw away his idol and received his money back. The other sons of Terah complained to their father that Abraham did not know how to sell the idols, and so Abraham was told to attend to the idols as priest. One day a woman brought a meal-offering for the idols, and, as they would not eat, he exclaimed: "A mouth have they but speak not, eyes but see not, ears but hear not, hands but handle not. May their makers be like them, and all who trust in them" (Ps. cxv. 5–8, *Heb.*), and he broke them to pieces and burned them. Abraham was brought before Nimrod, who said: "Knowest thou not that I am god and ruler of the world? Why hast thou destroyed my images?" Then Abraham said: "If thou art god and ruler of the world, why dost thou not cause the sun to rise in the west and set in the east? If thou art god and ruler of the world, tell me all that I have now at heart, and what I shall do in the future." Nimrod was dumfounded, and Abraham continued: "Thou art the son of Cush, a mortal like him. Thou couldst not save thy father from death, nor wilt thou thyself escape it." According to Gen. R. xxxviii, Nimrod said: "Worship the fire!" "Why not water that quenches the fire?" asked Abraham. "Very well, worship the water!" "Why not the clouds which swallow the water?" "So be it; worship the clouds!" Then Abraham said: "Rather let me adore the wind which blows the clouds about!" "So be it; pray to the wind!" "But," said Abraham, "man can stand up against the wind or shield himself behind the walls of his house." "Then adore me!" said Nimrod. Thereupon Nimrod (Amraphel; see Pesik. R. § 33, 'Er. 53*a*) ordered Abraham to be cast into a furnace. He had a pile of wood five yards in circumference set on fire, and Abraham was cast into it. But God Himself went down from heaven to rescue him. Wherefore the Lord appeared to him later, saying: "I am the Lord who brought thee out of the fire of the Chaldeans" (*Ur Kasdim*, Gen. xv. 7). The legend betrays Persian influence (compare the Zoroaster legend in Windischmann, "Zoroastrische Studien," pp. 307–313). Regarding the cave in which Abraham dwelt, see *ib.* p. 113; compare also B. B. 10*a*. The dialogue with Nimrod, pointing from fire, water, the cloud, wind, and man to God, has its parallel in Hindu legend (see Benfey, "Pantschatantra," i. 376).

Abraham is thereupon commissioned by God to propagate His truth throughout the world, and he wins many souls for Him: while he wins the men, Sarah, his wife, converts the women. In this manner "they made souls in Haran" (Gen. xii. 5, *Heb.*). He awakens the heathen from slumber and brings them under the wings of God. He is the father of the proselytes (Gen. R. xliii; Mek., Mishpaṭim, § 18).

As a Philanthropist.

Henceforth he was to become "like a stream of blessing to purify and regenerate the pagan world." Of the manner in which he converted the heathen it is related that he had a palatial mansion built near the oak-tree of Mamre or at Beer-sheba on the crossing of the roads, wherein all kinds of victuals and wine were spread on the table for the passers-by, who came through the doors kept open on all sides; and when they, after having partaken of the meal, were about to offer their thanks to him before going on their way, he pointed to God above, whose steward he was and to whom alone they owed thanks. Thus, by his love for man, he taught people how to worship God. Abraham's Oak, in connection with which the Midrash (to Gen. xxi. 33) relates these things, is mentioned also by Jerome (quoted in Uhlman's "Liebesthätigkeit," p. 321). This philanthropic virtue of Abraham is specifically dwelt upon in the Testament of Abraham.

Prophetic Vision.

His prophetic vision (Gen. xv.) furnished especially grateful material to apocalyptic writers, who beheld foreshadowed in the four different animals used for the covenant sacrifice the "four kingdoms" of the Book of Daniel (see also the Midrashim and Targums and Pirḳe R. El. xxviii; compare Apocalypse of Abraham, ix.).

Regarding Abraham's relation to Melchizedek, who taught him new lessons in philanthropy, see Melchizedek. Whereas the Bible speaks of only one trial that Abraham had to undergo to give proof of his faith in and fear of God (the offering of his son Isaac, Gen. xxii.), the rabbis (Ab. v. 4; Ab. R. N. xxxiii. [B. xxxvi.]; and Pirḳe R. El. xxvi. *et seq.*; compare also Book of Jubilees, xvii. 17, and xix. 5) mention ten trials of his faith, the offering of his son forming the culmination. Yet this was sufficient reason for Satan, or Masṭemah, as the Book of Jubilees calls him, to put all possible obstacles in his way.

Supreme Test of Faith.

When Abraham finally held the knife over his beloved son, Isaac seemed doomed, and the angels of heaven shed tears which fell upon Isaac's eyes, causing him blindness in later life. But their prayer was heard. The Lord sent Michael the archangel to tell Abraham not to sacrifice his son, and the dew of life was poured on Isaac to revive him. The ram to be offered in his place had stood there ready, prepared from the beginning of creation (Ab. v. 6). Abraham had given proof that he served God not only from fear, but also out of love, and the promise was given that, whenever the 'Aḳedah chapter was read on the New-year's day, on which occasion the ram's horn is always blown, the descendants of Abraham should be redeemed from the power of Satan, of sin, and of oppression, owing to the merit of him whose ashes lay before God as though he had been sacrificed and consumed (Pesiḳ. R. § 40 and elsewhere).

According to the Book of Jubilees (xx.-xxii.), Abraham appointed Jacob, in the presence of Rebekah, heir of his divine blessings. Jacob remained with him to the very last, receiving his instructions and his blessings. But while the same source informs us that he ordered all his children and grand-children to avoid magic, idolatry, and all kinds of impurity, and to walk in the path of righteousness, Jeremiah bar Abba (in Sanh. 91*a*) tells us that he bequeathed the knowledge of magic to the sons of his wife, Keturah.

Abraham's Death.

About his death rabbinical tradition has preserved only one statement—that the Angel of Death had no power over him (B. B. 17*a*). There is nevertheless a beautiful description of his glorious end in the Testament of Abraham (see Abraham, Testament of). The same work gives a touching picture of his love for man, while Ab. R. N. (xxxiii.) offers illustrations of his spirit of righteousness and equity. Abba Arika (Rab) even professed to know how the men of Abraham's time expressed their grief at his bier: "Alas for the ship that hath lost its captain! Alas for humanity that hath lost its leader!" (B. B. 91*a*, *b*.)

Besides the discovery of astronomy, we find ascribed to Abraham the invention of the alphabet, the knowledge of magic, and of all secret lore ('Ab. Zarah, 14*b*; Eusebius, "Præp. Ev."; D'Herbelot, "Bibliothèque Orientale," *s.v.* "Abraham"; "Sefer Yeẓirah," toward the end). All this is based on Gen. R. to Gen. xv. 5: "God lifted him above the vault of heaven to cause him to see all the mysteries of life." It is related (Tosef., Ḳid., at end) that he wore a pearl or precious stone of magic power on his neck, wherewith he healed the sick; and that all the secrets of the Law were disclosed to him, while he observed even the most minute provisions of the rabbis (Mishnah Ḳid., at end; Gen. R. lxiv.). Even in physical size he towered above the rest of men, according to Gen. R. xlix. and Soferim, xxi. 9.

True Type of Humanity.

There is a deep undercurrent of his true humanity in all the legends about Abraham. "Until Abraham's time the Lord was known only as the God of heaven. When He appeared to Abraham, He became the God of the earth as well as of heaven, for He brought Him nigh to man" (Midr. R. to Gen. xxiv. 3). Abraham, called "the One" (Isa. li. 2, *Heb.*, and Ezek. xxxiii.), rendered the whole human family one (Gen. R. xxxix) Whosoever has a benign eye, a simple heart, and a humble spirit, or who is humble and pious, is a disciple of Abraham (Ab. v. 29, and Ber. 6*b*), and he who lacks kindness of heart is no true son of Abraham (Beẓah, 32*a*). But it is particularly Abraham, the man of faith, the "friend of God" (Isa. xli. 8), upon whom are founded alike the Synagogue (see Pes. 117*b*; Mek., Beshallaḥ, § 3; I Macc. ii. 52; Philo, "Who is the Heir?" xviii.-xix.), the Church (see Rom. iv. 1; Gal. iii. 6; James, ii. 23), and the Mosque (Koran, sura iii. 58-60). "Abraham was not a Jew nor a Christian, but a believer in one God [a Moslem], a hater of idolatry, a man of perfect faith" (*ib.* suras ii. 118, iv. 124, vi. 162, xvi. 121). When God said, "Let there be light!" He had Abraham in view (Gen. R. ii.).

Many Arabic legends concerning Abraham based on the Koran found their way back to Jewish works (see Jellinek, "B. H." i. 25, and introduction, xv.).

——**In Mohammedan Legend:** Of all the Biblical personages mentioned in the Koran, Abraham is undoubtedly the most important. As is the case with all the Biblical material contained in the Koran, its source must be looked for not in any written documents, but in the stories, more or less tinged by midrashic additions, which Mohammed heard from his Jewish or Christian teachers and friends. Care must also be taken to distinguish the various periods in the preaching of the Arabian prophet; for in these matters Mohammed lived from hand to mouth, and his views as to the importance of Biblical personages varied with changing circumstances and changing needs. In his early preachings Mohammed shows very little knowledge of the patriarch. The only mention of him during the early Meccan period is found in sura lxxxvii. 19 (compare sura liii. 37), where Mohammed makes a passing reference to the "Suḥuf Ibrahim" (the Rolls of Abraham); these can not have reference, as Sprenger thinks ("Leben u. Lehre Mohammeds," ii. 348, 363 *et seq.*), to any real apocryphal books, but merely to a reminiscence of what Mohammed had heard about the mention of Abraham in the sacred books of the Jews and Christians (Kuenen, "National and Universal Religions," p. 297, note 1, and pp. 317–323, New York, 1882). Similarly in sura liii. 37—a passage certainly not older than the end of the first Meccan period (Nöldeke, "Gesch. des Korans," p. 79)—he speaks of Abraham as of one that had fulfilled his word, giving as his reference the same Rolls of Abraham (Hirschfeld, "Beiträge zur Erklärung des Korans," p. 12; compare Gen. xxii. 16). To this later Meccan period may also belong what Mohammed has to say of Abraham as one who was oppressed for preaching the true religion and for championing his God. This part of Abraham's career appealed very strongly to Mohammed; for he saw in it a certain prototype of his own early and severe struggles with the patricians of his native city. As Mohammed is the last of the prophets, so Abraham is among the first. Abraham is evidently—though this is not directly stated—one of the seven bearers of Maṭani, the messages repeated from out of the heavenly book (sura xv. 87; compare xxxix. 24). The other six are the prophets of Ad, Thamud, and Midian, and Noah, Lot, and Moses. Abraham is a righteous man (צדיק) and prophet (sura xix. 42).

"Great, Greater, Greatest."

In the later suras Mohammed seems to have learned more about Abraham. In sura vi. 75 he relates how the prophet came to worship God by watching physical phenomena: "Thus did we show Abraham the kingdom of heaven and of the earth, that he should be of those who are sure. And when the night overshadowed him he saw a star and said, 'This is my Lord'; but when it set he said, 'I love not those that set.' And when he saw the moon beginning to rise he said, 'This is my Lord'; but when it set he said, 'If my Lord guides me not I shall surely be of the people who err.' And when he saw the sun beginning to rise he said, 'This is my Lord, this is the greatest of all'; but when it set he said, 'O my people, verily, I am clear of what ye associate with God; verily, I have turned my face to Him who created the heaven and the earth.'"

The name of Abraham's father is said to have been Azar, though some of the later Arab writers give the name correctly as Teraḥ. Others claim that Azar was his real name, while Teraḥ was his surname (Nawawi, "Biographical Dict. of Illustrious Men," p. 128; but see Jawaliḳi, "Al-Mu'arrab," ed. Sachau, p. 21; "Z. D. M. G." xxxiii. 214). Still a third class of authorities say that Azar means either "the old man" or "the perverse one." Modern scholars have suggested that the word is a mistake for האזרחי (B. B. 15*a*; see Pautz, "Mohammed's Lehre von der Offenbarung," p. 242). This Azar was a great worshiper of idols, and Abraham had hard work in dissuading him from worshiping them. The story is told in sura xxi. 53 *et seq.*: "And we gave Abraham a right direction before; for about him we knew. When he said to his father and to his people, 'What are these images to which ye pay devotion?' said they, 'We found our fathers serving them.' Said he, 'Both ye and your fathers have been in obvious error.' They said, 'Dost thou come to us with the truth, or art thou of those that sport?' He said, 'Nay, but your Lord is Lord of the heavens and of the earth, which He created; and I am of those who testify to this, and, by God, I will plot against your idols after ye have turned and shown me your backs.' So he brake them all in pieces, except a large one that haply they might refer it to [lay the blame upon] him. Said they, 'Who has done this with our gods? Verily, he is of the wrong-doers.' They said, 'We heard a youth speak of them, who is called Abraham.' Said they, 'Then bring him before the eyes of men; haply they will bear witness.' Said they, 'Was it thou who did this to our gods, O Abraham?' Said he, 'Nay, it was this largest of them; but ask them if they can speak. . . .' Said they, 'Burn him and help your gods if ye are going to do so.' We said, 'O fire! be thou cool and a safety for Abraham.'" In suras xxvii. and xxxix. Mohammed returns to this story, and adds the account of the messengers that came to Abraham, of the promise of a son named Isaac, and of the coming destruction of Sodom and Gomorrah. "We turned these cities upside down and rained on them stones of baked clay" (compare sura li. 34). The destruction of the two cities served Mohammed as a warning, taken from history, which he desired to impress upon his opponents in Mecca.

The '*Aḳedah*, or sacrifice of Isaac, is mentioned in several places in the Koran. The following account is found in sura xxxvii. 100 *et seq.*: "And when he reached the age to work with him he said: 'O my boy! verily I have seen in a dream that I should sacrifice thee; look, then, that thou seest right.' Said he, 'O my sire! do what thou art bidden; thou wilt find me, if it please God, one of the patient.' And when they were resigned and Abraham had thrown him down upon his forehead, we called to him, 'O Abraham! thou hast verified the vision; verily, thus do we reward those who do good. This is surely an obvious trial.' And we rewarded him with a mighty victim."

Prominence Given to Abraham.

Mohammed, however, went further than this, and, in order to strengthen his position against his Jewish opponents in Medina, made out of Abraham the most prominent figure in premohammedan religious history. He alleges that Abraham was the real founder of the religion that he himself was preaching; that Islam was merely a restatement of the old religion of Abraham and not a new faith now preached for the first time. Abraham is the "friend of God" (sura iv. 124), an appellation that the followers of Islam now usually apply to him, and on account of which to-day the city of Hebron is called Al-Halil (compare Isa. xli. 8; Ab. R. N. 61*a*). He is also said to have been an imam, or religious leader (compare suras ii. 118, xvi. 121), and perhaps also a "ḥanif"; "he was not one of the idolaters. . . . [God] chose him, and He guided him unto the right way. . . . Then we inspired thee, Follow the faith of Abraham, a ḥanif, for he was not of the idolaters." The exact meaning of "ḥanif" is uncertain; but it seems in general to designate a man who searched after the truth and despised idolatry (Kuenen, *l.c.* note 2, pp. 323–326; Wellhausen, "Skizzen," iii. 207).

Characteristic is the following saying: "Abraham was not a Jew nor yet a Christian, but he was a ḥanif resigned, and not of the idolaters. Verily, the people most worthy of Abraham are those that follow him and his prophets, and those that believe" (sura iii. 60). With the same theological intent Mohammed makes various references to the *Millat Ibrahim* ("Religion of Abraham") as the one he desires his people to follow (suras xvi. 124, ii. 124, xxii. 77).

During the latest period of Mohammed's activity in Medina he became still bolder, and, in developing his theory in regard to Abraham, left entirely the beaten track of Jewish and Christian Midrash. It had become necessary for him to break entirely with the Jews, who refused to acknowledge him as prophet. The *ḳiblah*, or direction of prayer, was still toward Jerusalem. As the Jews had refused to follow Mohammed it was necessary to dissociate his religion from theirs, and to turn the faces and thoughts of his followers from Jerusalem to Mecca. In order that the change might be effected with as little friction as possible, Mohammed connected Mecca and its holy house, the Kaaba, with the history of Abraham, the real founder of his Islam. It is here that Ishmael comes for the first time prominently forward. In one of the latest suras (ii. 118 *et seq.*) a passage reads: "And when we made the house a place of resort unto men, and a sanctuary, and (said) take the station of Abraham for a place of prayer; and covenanted with Abraham and Ishmael, saying, 'Do ye two cleanse my house for those who make the circuit, for those who pay devotions there, for those who bow down, and for those, too, who adore. . . .' And when Abraham raised up the foundations of the house with Ishmael, 'Lord, receive it from us. Verily, Thou art hearing and Thou dost know. Lord, and make us, too, resigned unto Thee and of our seed also a nation resigned unto Thee, and show us our rites, and turn toward us; verily, Thou art easy to be turned and merciful. Lord, and send them an apostle from amongst themselves, to read to them Thy signs and teach them the Book and wisdom, and to purify them; verily, Thou art the mighty and the wise'" (compare suras iii. 90-93, xxii. 27-31).

There is no local tradition connecting Abraham with Mecca; and we are forced to put this down as a pure invention on the part of the prophet, based on political as well as on theological reasons. According to Shahrastani (Arabic text, p. 430), this Kaaba was the reproduction of the one in heaven. The "Makam Ibrahim," or Station of Abraham, is still pointed out within the sacred enclosure at Mecca; and the footsteps of the patriarch are believed by the worshipers still to be there (Snouck Hurgronje, "Het Mekkaansche Feest," p. 40; Mekka, i. 11).

Mohammedan Midrash on Abraham.

The stories in regard to Abraham, told in a few words in the Koran, naturally form the basis for further midrashic expansion among the Arabs. The likeness of the history of Abraham to certain features in the life of their own prophet made him a favorite subject in the hands of commentators and historians. Mohammedan writers had two sources from which they drew their knowledge of the Bible and of its midrashic interpretation: verbal information from the *akhbar* ("rabbis"), and a study of the text of the Bible itself, and occasionally of comments upon it. The former source was undoubtedly the more prolific of the two. The material is to be found in the standard commentators on the Koran—Zamakhshari, Baidawi, Tabari; but more have been incorporated in the works of Arabic historians, who commenced their histories with the earliest accounts of man, and were thus bound to have a more or less close acquaintance with the Taurat (Torah) and the Midrash upon it. Some of the historians are quite exact, as Ibn Ḳutaibah, and the first philosopher of history, Ibn Khaldun; others, however, are less critical, as Tabari, Masudi, Ḥamza, Biruni, Maḳrizi, Ibn al-Athir, Abu al-Fida (compare Goldziher, "Über Mohammedanische Polemik gegen die Ahl al-Kitab," in "Z.D.M.G." xxxii. 357). They have much to say about the trials that Abraham underwent in fighting idolatry. They dilate upon the great furnace that Nimrod had built in Kutha for this purpose, and how the furnace was changed into a garden. A Kurd named Hayun, Haizar, or Haizan, is said to have advised Nimrod to have Abraham burnt. Abraham's father is said to have been a carver of images; and Abraham, in selling his father's wares, attempted to convert the people by crying out, "Who wishes to buy that which neither hurts nor betters?" Large midrashic additions are made in order to bring Nimrod into connection with Abraham. It is said that the stargazers warned him that a boy would be born that would in the future break all the idols; that Nimrod gave orders to put to death all children born; but that when Abraham was born his mother hid him in a cave in which, during a few days, he grew to man's estate, and thus foiled the purpose of the king.

The incongruity of Mohammed's connecting Abraham with the building of the Kaaba was evidently clearly felt, and it is therefore added that his going to Mecca was due to the rupture between Sarah and Hagar. God told Abraham to take the bondmaid and her child, Ishmael, into Arabia; and it was at the Zemzem well within the sacred enclosure that the water rose up which slaked the thirst of the boy. On two occasions Abraham is said to have paid a visit to Ishmael's house in his absence; and, by the answers which each wife gave to her father-in-law, Abraham advises his son, in the one case, to send his first wife away, and in the other to keep his second wife. In the building of the Kaaba, Abraham was assisted by the Shekinah (שכינה); others say by a cloud or by the angel Gabriel. Abraham acted as muezzin, delivered all the necessary prayers, and made the various circuits demanded by the later ritual. It was he also who first threw stones at Iblis (the devil) in the valley of Mina, a procedure which still forms part of the ceremonies connected with the *ḥajj*. It is natural that in these later accretions Ishmael should take the place of Isaac. Some authors even state that it was Ishmael who was to have been offered up; and that he therefore bears the name Al-Dhabiḥ ("Slaughtered One"). The place of the 'Aḳedah is also transferred to Mina, near Mecca. The ram offered up in lieu of the son is said to have been the same as the one offered by Abel. The slaughtering of Isaac is dwelt upon at length, as well as the firmness of Abraham in resisting the enticement of Iblis, who placed himself directly in his path. This is said to have been one of the trials (sura ii. 118) which Abraham underwent. Arabic commentators, however, speak of three trials only, and not of ten, as does the Jewish Haggadah.

Many of the religious observances that are now found in Islam are referred to Abraham; parallels to which, as far as the institution of certain prayers is concerned, can be found in rabbinical literature.

Abraham is often called by Arabic authors the "father of hospitality"; and long accounts are given of the visit of the angels. He is also said to have been the first whose hair grew white. Of his death an Arabic Midrash has the following: When God wished to take the soul of Abraham He sent the Angel of Death to him in the form of a decrepit old man. Abraham was at table with some guests, when he saw an old man walking in the heat of the sun. He sent an ass to carry the man to his tent. The old man, however, had hardly sufficient strength to put the food set before him to his mouth; and even then he had the greatest difficulty in swallowing it. Now, a long time before this, Abraham had asked God not to take away his soul until he (Abraham) should make the request. When he saw the actions of this old man he asked him what ailed him. "It is the result of old age, O Abraham!" he answered. "How old are you, then?" asked Abraham. The old man gave his age as two years more than that of Abraham, upon which the patriarch exclaimed, "In two years' time I shall be like him! O God! take me to Thyself." The old man, who was no other than the Angel of Death, then took away Abraham's soul.

Rabbinical midrashic parallels can easily be found to most of the legends referred to above: a large number are given in Grünbaum ("Neue Beiträge zur Semitischen Sagenkunde"). It is of interest to observe that these Mohammedan additions have also, in some cases, found their way into Jewish literature. They are met with in works that have been written under Arabic influence in one form or another. Abraham's visit to Ishmael is found in the Pirke R. El. xxx. and in the "Sefer ha-Yashar." In the "Shebeṭ Musar" of Elijah ha-Kohen there is an appendix entitled "Tale of That Which Happened to Our Father Abraham in Connection with Nimrod." Elijah lived in Smyrna at the beginning of the eighteenth century, which fact will explain the Arabic influence.

G.

——**Critical View:**

Etymology.

The original and proper form of this name seems to be either "Abram" or "Abiram" (I Kings, xvi. 34; Deut. xi. 6), with the meaning, "my Father [or my God] is exalted." The form "Abraham" yields no sense in Hebrew, and is probably only a graphic variation of "Abram," the *h* being simply a letter, indicating a preceding vowel, *a*; but popular tradition explains it "father of a multitude" (*ab hamon*), given as a new name on the occasion of a turning-point in the patriarch's career (Gen. xvii. 5). The name is personal, not tribal; it appears as a personal name in Babylonia in the time of Apil-Sin (about 2320 B.C.; Meissner, "Beiträge zum Altbabylonischen Privatrecht," No. 111), and is not employed in the Old Testament in an ethnical sense (for example, it is not so employed in Micah, vii. 20, nor in Isa. xli. 8).

National Significance.

In the earlier so-called Jahvistic narrative, Abraham embodies particularly the conception of Israel's title to the land of Canaan. He comes from the East to Canaan, receives the promise of the land, separates from Lot (Moab and Ammon), from Ishmael (Arabian tribes), and from the sons of Keturah (other Arabian tribes), thus eliminating any possible future contention as to the title to the country. A continuous process of selection and exclusion is here exemplified, the result of which is to identify Abraham with Canaan; such was the popular conception of him as late as the time of Ezekiel (Ezek. xxxiii. 24). In the narrative which the critics regard as postexilian, or the Priestly Code, Abraham further represents the formal covenant of God (El Shaddai) with the nation, sealed by the rite of circumcision (Covenant). He stands, in a word, for the premosaic religious constitution of the people.

Character.

Abraham's singularly majestic and attractive personality, as it appears in Genesis, is in this view the outcome of generations of thought. Each age contributed to the portrait of what it held to be purest and noblest and worthiest of the first forefather. The result is a figure, solitary, calm, strong, resting unswervingly on God, and moving unscathed among men. Later he was thought of as "the friend of God" (Isa. xli. 8). Paul calls him the father of all who believe (Rom. iv.). Mohammed takes him as the representative of the absolute primitive religion, from which Judaism and Christianity have diverged, and to which Islam has returned. The character shows, however, a commingling of high and low. There are generosity (Gen. xiii.), bravery (Gen. xiv.), a fine sense of justice (Gen. xviii.). But tradition, in order to bring out God's special care of the hero, twice makes him guilty of falsehood (Gen. xii., xx.); this last fact throws light on the ethical ideas of the eighth century.

Relation to History.

Is there any historical kernel embedded in the narrative? Obviously it contains much legendary matter. The stories of Lot, Hagar, and Keturah are ethnological myths; the theophanies and the story of the destruction of the cities are legends; circumcision was not adopted by the Israelites in the way here represented; and the story of the attempted sacrifice of Isaac is a product of the regal period. Abraham's kinsfolk (Gen. xxii. 20-24) are personifications of tribes, and his predecessors and successors, from Noah to Jacob, are mythical or legendary. What is to be said of the much debated fourteenth chapter? First, it must be divided into two parts: the history of the Elamite invasion, and Abraham's connection with it. The first part may be historical, but it no more follows that the second part is historical than the reality of the miraculous rôle assigned to Moses follows from the reality of the Exodus. On the contrary, the mention of Salem and of tithes points to a postexilian origin for the paragraph. The invasion may be historical—כדרלעמר (Chedorlaomer) and אריוך (Arioch) are Elamite, and a march from Babylonia to Canaan is conceivable—but no mention of it has been found in inscriptions, and it is not easy to reconcile it with known facts. If אמרפל (Amraphel) be Hammurabi, Abraham's date is about 2300 B.C.

The biography of Abraham in Genesis is probably to be regarded as legendary; it has grown up around sacred places, ideas, and institutions. Yet there can be little doubt that the name involves some historical fact, and that this fact has to do with tribal migration: the name, though personal, not tribal, may represent a migration. By reason of the paucity of information the whole question is obscure, and any conclusions must be largely conjectural.

The text represents Abraham as coming to Canaan from the Tigris-Euphrates valley. A migration of Hebrew ancestors from that region is not necessary for the explanation of what we know of Hebrew history. But weight must be attached to the well-formed and persistent tradition, and a migration of this sort, as the Tell-el-Amarna inscriptions indicate, must be regarded as possible. If a motive for the movement be sought, it may be found in the wars which were constantly going on between the thickly settled and feebly organized inhabitants of the valley between the rivers. Distinct indications of an Abrahamic migration from Babylonia are found by some scholars in the similarity between Babylonian and Hebrew institutions (as the Sabbath) and myths (Creation, Flood, etc.); by others this similarity is referred to Canaanite intermediation, or to later borrowing from Assyria or Babylonia.

The supposed relation of the names "Sin" (the wilderness) and "Sinai" (the mountain, and a Canaanite tribe) to the Babylonian moon-god, Sin, is doubtful. The migrating tribes would speak Babylonian or Aramaic, but would speedily become absorbed in their new surroundings and adopt the language of the region. If such a body settled in northern Arabia, this might account for the connection of Abraham with Hagar and Keturah. The Hebrew tribes proper, coming to dwell in that region, may have found his name as that of a local hero, and may gradually have adopted it. But of the condition of things in Canaan from 2300 to 2000 B.C. nothing is known, and between Abraham and Moses there is almost an absolute blank in the history.

T.

ABRAHAM, APOCALYPSE OF: An apocryphon that has been preserved in Old Slavonic literature. Its title does not fully explain its contents, for about one-third of it might more appropriately be called "The Legend of Abraham," as this contains an account of Abraham's conversion from idolatry to monotheism quite apart from the Apocalypse which follows.

Abraham the Iconoclast.

Abraham, the son of the idol-maker TERAH (Gen. R. xxxviii. 13), was, like his father, a thoroughgoing idolater, being chiefly devoted to the worship of the stone idol called Merumat ("Eben Marumah," stone of deceit and corruption). But on a journey to a place near Fandana (Padan-aram), some of his idols were smashed, and having long felt misgivings as to their power, he became convinced of the unreality of such deities. Henceforth he fearlessly propagated this new truth, defending it even against his own father, whom he in vain endeavored to convert. He threw the wooden idol Barisat—בר אשת(א) ("Son of the Fire")—into the flames, and when remonstrated with declared that it must have thrown itself in, in order to hurry the boiling of the food (compare a similar anecdote related of Abraham in Gen. R. xxxviii. 13). But not even this argument influenced his father; and his more elaborate ones in favor of monotheism, which almost to the very letter are identical with those found in the Midrash (Gen. R. *l.c.*), also proved futile. Finally God told Abraham to leave his father's house, which, no sooner had he done, than it was consumed by fire, as was also his father. The Biblical "Ur of the Chaldees" (Gen. xi. 31, xv. 7) is here interpreted as the fire of the Chaldees, and later in fuller detail in the Book of Jubilees, and still more fully in the Midrash, Gen. R., and in Pes. 118*a*. In the last passage the account of the death of Haran and of the miraculous escape of Abraham from the fire of the Chaldees is based on a combination of this Apocalypse with the Book of Jubilees.

Date of Its Composition.

The relative age of these works can be determined by comparing the legend of Abraham as contained in the Apocalypse with those in the Talmud and in the Book of Jubilees. The legend of the raven in the Book of Jubilees (xi. 18) and the account of the conversion of Abraham in his boyhood are still unknown to the Apocalypse, while the legend of the fire of the Chaldees is found there still in its incipient stage. The mockery of the idol Barisat is more extended in the Midrash than in the Apocalypse; also the condemnation of Terah as an idolater, as related in the Apocalypse, discloses the older Haggadah (Gen. R. xxxix. 7), whereas the Book of Jubilees presents the later one (compare Gen. R. xxx. 4, xxxix. 7, where Terah is treated quite mildly). As the Book of Jubilees can not have been written later than 70 (see JUBILEES, BOOK OF), the date of the composition should be set before the middle of the first century.

Its Original Language.

It is by no means difficult to ascertain with some degree of certainty the language in which this legend was originally written. The sarcastic names given to the idols presuppose a familiarity with a Semitic dialect which a Greco-Jewish writer would scarcely have expected of his readers. It is not certain whether the book was written in Hebrew or Aramaic. The frequent phrase, "And I said, Behold me," suggests the Hebrew idiom הנני, while the expression "silver" for "money" is common to both languages.

Abraham and the Angels.

The second part of the book, the main Apocalypse, is a commentary on Gen. xv., which is not only interpreted by the Haggadah as a revelation of the future destinies of Israel up to their final redemption (Gen. R. xliv. 15), but also as implying the fact that "God lifted Abraham above the firmament" and told him to "look down upon the world beneath." The Apocalypse relates minutely the circumstances under which this ascension, mentioned in the Midrash, took place. According to this, Abraham's sacrifice of the animals (Gen. xv.) took place, by God's command, on the holy Mount Horeb, whither Abraham was led by the angel יהואל (Yahoel) after a journey of forty days. The angel introduces himself to Abraham, the "friend of God" (Book of Jubilees, 19; Men. 53*b*), as a being possessed of the power of the Ineffable Name שם הויה (Name of the Existing), a quality assigned elsewhere by the rabbis to METAṬRON, "whose name is like unto that of God Himself" (Sanh. 38*b*). This also explains why, in the Apocalypse, the name Yahoel is evidently a substitute for the Ineffable Name (יהוה), of which even the writing out in full was forbidden. Yahoel is also the heavenly choirmaster, who teaches the angels their hymn (שירה), a function which, according to Yalḳuṭ, i. § 133, is assigned to Michael. Similarly, the control over "the threats and attacks of the reptiles" ascribed here to Yahoel is assigned to Michael (see Schwab, "Vocabulaire," p. 283). Even Michael's chief task of protecting and watching over Israel (Dan. xii. 1) is assumed by Yahoel, who says to Abraham: "I am . . . with the generation prepared from of old to come from thee, and with me is Michael." These are the oldest instances of the gradual transformation of Michael, originally the guardian angel of Israel, into Metaṭron—that is, unto the one who concentrates in himself all that is great, a development in Jewish angelology of the greatest influence upon the Christian doctrine of the Logos (see ABRAHAM, TESTAMENT OF). Under the guidance of Yahoel, and assisted by many other angels, Abraham offers up his sacrifice (Gen. xv.), but not without being disturbed by Azazel, the fallen archangel and seducer of mankind, as he is characterized in the Apocalypse (in agreement with the Midr. Abkir, Yalḳ., Gen., § 44). In the form of an unclean bird he swoops down "upon the carcasses" (Gen. xv. 11), and, speaking with a human voice, tries to persuade Abraham to leave the holy place. But Abraham was not the man to be seduced by Satan (Sanh. 89*b*). Yahoel spoke to Azazel, saying: "Listen, thou [evil] adviser, leave this man alone, thou canst not lead him astray; thou canst not tempt the righteous." According to Baba Batra, 17*a*, Abraham was one of the three righteous ones, over whom Satan (יצר הרע the Evil Spirit) had no power. Yahoel then adds that the celestial garments which Satan had worn now belong to Abraham; which is also expressed in Pirḳe de-Rabbi Eliezer, xx. and in Targum Yer. Gen. iii. 21, where it is said that the garments of light (כתנות אור for כתנות עור, Gen. R. xx. 29) of the first two human beings were made out of the skin of the primeval serpent. The Apocalypse understands Azazel's sin to have consisted in "scattering the secrets of heaven upon earth" (compare Book of Enoch, viii. 1) and in devising rebellion against the Mighty One (אביר); compare also Gen. R. xix. and Pirḳe R. El. xiii.

Abraham's Ascension.

After this interview with Satan, Abraham, borne by a dove (compare Matt. iii. 16), ascended to heaven, the splendor and glory of which are described at great length, and particularly the rivalry of the living creatures about the heavenly throne (חיות הכסא; see Tan., ed. Buber; Gen. x.). He also saw there the angels that are born daily, and disappear as soon as they have sung their hymn (Gen. R. lxxviii. 1.) He repeats the prayer spoken for him by the angel, especially the following passage: "Thou, O Light, didst shine before the primeval morning [the Slavonic text has "morning-light," a mistranslation of the original אור ראשון or נהורא קדמייא] upon Thy creatures, to cause the day to illumine the earth by the light of Thy countenance," which is also found in the ritual. This view rests upon an ancient conception known to the students of the Merkabah mysteries, and is rendered in Gen. R. iii. 4: "God wrapped Himself in a garment of light, with which He illuminated the earth from one end to the other."

Ascending higher, Abraham reaches the seventh heaven, where he sees the throne, but he does not see God, as He is invisible. Here he is shown by God everything that exists in the heavens: the angels, the celestial bodies, also the earth, and everything that is moving upon it. He sees, in addition, the Leviathan and its possessions in the nethermost waters (compare Cant. R. on i. 4), and the world founded upon its fins (compare Pirḳe R. El. ix.). Furthermore, he sees the rivers and their origin, and paradise (Syriac Apoc. of Baruch, iv. 4). The fall of mankind is explained to him, just as in the Slavonic Book of Baruch and Pirḳe R. El. xxi. Adam and Eve are led to commit (sexual) sin by Azazel (Satana-El in the Book of Baruch; Sama-El in Pirḳe R. El.) through his causing them to eat from the forbidden fruit, a grape from the vine (compare Slavonic Book of Baruch and Ber. 40*a*). God informs Abraham that, notwithstanding *yeẓer ha-ra'* ("the lustful desire"), and זוהמא של נחש ("the pollution of the serpent"), with which man from that time has been possessed, he has a free will of his own and may choose to abstain from sin. Abraham then obtains an insight into the future of both individuals and nations, and especially is he forewarned of the sufferings of the people of Israel and their final redemption in the Messianic time. The destruction of the Temple, which sorely grieves Abraham, is declared by God to be a necessary punishment for the sins of the people of Israel; and, as in Pirḳe R. El. xxviii., a time is hinted for the end of their sufferings under the four empires. The description of the period preceding the Messianic time is the only part containing Christian interpolations, which are easily separated from the main part, all of which has a decidedly Jewish character. This is evidenced by the mention of the ten plagues which shall befall the heathen nations, a constantly recurring feature in the description of the Messianic time (see Tan., ed. Buber, ii. 30; Ex. R. ix. 13), and by the concluding part of the Apocalypse, which contains the prophecy of the gathering of Israel in the Promised Land, to be ushered in by a trumpet-blast from God (Jellinek, "B. H." vi. 58), and by the judgment to be passed upon the heathen and the wicked.

Date of Composition.

Concerning the date of the composition of the Apocalypse proper, it clearly can not have been written before the destruction of the First Temple, as it contains Abraham's lamentations over that catastrophe. The emphasis laid on the freedom of will, notwithstanding the fall of man, presupposes a knowledge of the Christian doctrine of sin, against which this passage seems to be directed. But this very opposition to the Christian dogma shows that at the time the Apocalypse was written Christianity was not far removed from Judaism, at least not in Palestine, where, since he used a Semitic language, the author must have lived. The last decades of the first century appear to be the period in which the Apocalypse was written. This remark, however, applies to the main part of the book, and not to its Christian and Gnostic interpolations. In connection with these must be considered the statement found in the Apocalypse that Azazel, who is described as being endowed with twelve wings (which description coincides exactly with that given in the Haggadah, Pirḳe R. El. xiii.), shares with God the power over Israel. This is, no doubt, the Gnostic doctrine of the God of the Jews as Kakodaimon; and in this connection Irenæus may be quoted, who says of the Ophitic Gnostics ("Contra Ἔλεγχος," i. 30, 9), "et projectibilem serpentem duo habere nomina, Michael et Samael, dicunt" (and they called the wretched serpent two names, Michael and Samael). Thus, in the mind of these Gnostics, Samael (נחש עקלתון "the entwined serpent") and Michael were fused into one being. Therefore, it is quite probable that certain parts of the heretical Apocalypse of Abraham, which was in circulation among the Gnostics (Epiphanius, *Πανάριον* 39, 5), were incorporated in the present text. Subtracting, then, the first part, which does not belong to the Apocalypse, and the Gnostic and Christian interpolations, only about three hundred lines remain, and this number would exactly correspond with the number which, according to the stichometry of Nicephorus, the Apocalypse of Abraham contained. Outside of this, no trace of the Apocalypse is found in ancient writings. The quotation by Origen ("In Lucam," hom. 35) from an apocalypse of Abraham certainly does not refer to the present text. Compare also AZAZEL and ABRAHAM, TESTAMENT OF.

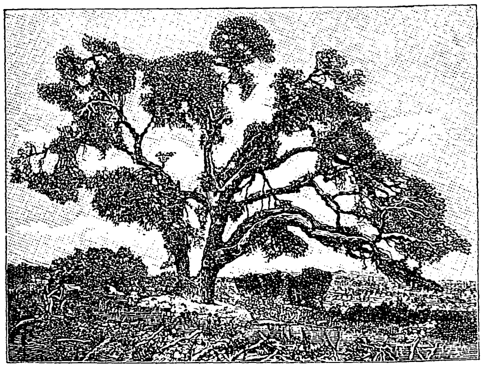
L. G.

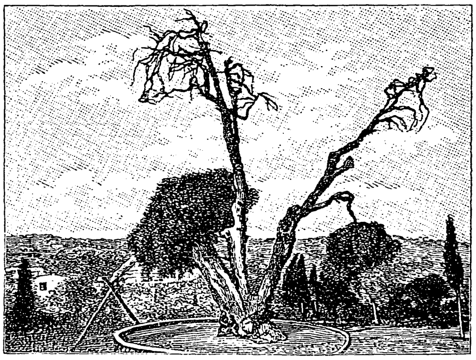
ABRAHAM'S BOSOM: In the New Testament and in Jewish writings a term signifying the abode of bliss in the other world. According to IV Macc. xiii. 17, the righteous who die for their faith are received by Abraham, Isaac, and Jacob in paradise (compare Matt. viii. 11: "Many shall come from the east and the west and sit down with Abraham, Isaac, and Jacob in the kingdom of heaven"). In Ḳid. 72*b*, Adda bar Ahaba, a rabbi of the third century, is said to be "sitting in the bosom of Abraham," which means that he has entered paradise. With this should be compared the statement of R. Levi (Gen. R. xlviii.): "In the world to come Abraham sits at the gate of Gehenna, permitting none to enter who bears the seal of the covenant" (see CIRCUMCISION).

In the Hellenistic Testament of Abraham it is Adam, the representative of humanity, who sits at the gate of hell and paradise; the Jewish view of later times placed Abraham, the progenitor of Israel, in Adam's place. This was also the view of the New Testament writers as presented in Luke, xvi. 19–31, the story of Lazarus and the rich man. Lazarus, the beggar, died and was carried by the angels into Abraham's Bosom; the rich man died and was put into Gehenna, where he saw Lazarus in the Bosom of Abraham, full of joy, whereas he suffered great torment. Thereat he cried: "Father Abraham, have mercy on me!" and finally he asked Abraham to send Lazarus to his father's house to admonish his five brothers to lead lives characterized by repentance, in order not to meet the same fate as his own. Whereupon Abraham said: "They have the law of Moses and the teachings of the prophets; let them be mindful of these, and they will enter paradise as well as Lazarus." On Lazarus (Eliezer) and Abraham see Geiger's "Jüdische Zeitschrift für Wissenschaft und Leben," vii. 200. It is plain that Abraham is here viewed as the warden of paradise, like Michael in Jewish and St. Peter in Christian folk-lore ("Texts and Studies," v. 55, 69, Cambridge). Of Abraham as attorney pleading for Israel, R. Jonathan also speaks (Shab. 89*b*). K.

ABRAHAM'S OAK: A famous and venerable oak (*Quercus pseudo-coccifera*) which still stands at Mamre, half an hour's journey west of Hebron, and is surrounded by a wall over which it projects. Josephus probably refers to it ("Ant." i. 10, § 4), or a predecessor on the same spot, when he mentions that Abraham dwelt by an "ogygian" (prehistoric) tree. According to tradition, it was opposite this oak that Abraham's tent was pitched at the time that the angels came to him and promised him a son and heir; also when he was negotiating with Ephron the Hittite for the cave of Machpelah (Gen. xviii. and xxiii.). Some have connected the oak with an earlier stage of tree-worship. In Jerome's time, fairs were held under it. During the Crusades Abraham's Oak was visited frequently by the pilgrims; and it became customary to hold the Feast of the Trinity under its shadow, connecting the subject of the feast with the three angels of the Biblical narrative. The inventive traveler Odoricus (1286–1331) connects the oak with the legend of the Cross ("Itinerarium," chap. xlvi.). Josippon states that it lasted until the days of the Emperor Theodosius, when it withered. Its wood was used for medicinal purposes, the belief being that such a use prevented any illness up to the day of death (Chronicle of Jerahmeel, pp. lxxi. and 78).



Abraham's Oak in 1847.



Abraham's Oak as it appeared in 1897.

Near the oak in former times, on its north side, stood a terebinth, which, according to Josephus ("B. J." iv. 9, § 7), had existed since the beginning of the world. It was under this tree that, in Hadrian's time, the great sales of Jewish slaves, numbering, it is said, no less than 135,000, took place.

Abraham's Oak has become considerably weakened in recent years, as is shown by the accompanying illustrations, taken in the years 1847 and 1897 respectively. In 1852 a large branch was broken off by lightning; and the wood from it formed eight camel-loads.

F. H. K.—J.

ABRAHAM, TESTAMENT OF: An apocryphal book, published for the first time by Montague Rhodes James, in two different recensions, in Robinson's "Texts and Studies," ii. No. 2 (Cambridge, 1892), and translated from the Greek original by W. A. Craigie in the "Ante-Nicene Library," ix. 182–201. Ethiopic, Slavonic, and Rumanian versions also have been found, and some of them published.

Recent Discovery of Book.

The book contains the story of the death of Abraham, told in exactly the same form as that in which the death of Moses is described by the ancient Haggadah; with the view of portraying in poetic style the pious man, on the one hand, struggling against the fate of mortality, and yet, on the other, enjoying, while still in mortal garb, the privilege of surveying the whole world with the eyes of an immortal being (see MOSES, ASCENSION OF, and ABRAHAM, APOCALYPSE OF). Abraham, the model of a beneficent, hospitable, and just man, having reached the full measure of life, God sends Michael, his chief general (compare Slavonic Book of Enoch, xx. 6, and Buber's "Midrash Agadah," p. 162, interpreting Josh. v. 14), to prepare him for the approaching end. The archangel appears as a common traveler to Abraham in the field, and is received with customary hospitality and invited to Abraham's house. On their way home, Abraham, who understands the language of trees) as did Johanan ben Zakkai, Sukka, 28*a*), hears the huge tamarisk-tree with its three hundred and thirty-one branches (= אש״ל; Gen. xxi. 33) singing a song which seems to be the foreboding of some misfortune (Zohar, Wayera, Gen. xviii. 1, end). Tears spring to his eyes as he washes the feet of the archangel; and Michael weeps also, his tears turning into pearls which Abraham catches quickly, hiding them under his cloak. Michael, before sitting down at the table, departs for a few moments, as it is sunset, the time when the ministering angels sing the praise of the Lord in heaven, and Michael, their chief, must lead them (Yalk., Gen. § 133). But, in addition to this, Michael shrinks from bringing the tidings of approaching death to Abraham, whose equal for goodness of heart is not to be found in the world. When God reassures him by the promise that He will send a prophetic dream to Isaac, announcing to him the death of his father, another difficulty presents itself in reentering Abraham's house: How can he, a celestial being, partake of the meal spread before him? God tells him to sit down at the table, and that He will send over him "a devouring spirit that shall eat up everything out of his hands and mouth." Compare Justin Martyr, "Dial. cum Tryph." lvii., where the eating of the angels is compared with the eating of fire, a view which differs from the Docetic one, which regards the eating of the angels as merely apparent, not real (Tobit, xii. 19; Josephus, "Ant." i. 11, § 2; Philo, "De Abrahamo," § 23, ed. Mangey, ii. 18; B. M. 86*b*; Gen. R. xlviii. 14, and most of the Church Fathers), and differs also from the ingenuous one in the Targum on Gen. xviii. 8, and Tanna debe Eliyahu R. 12.

Immediately after midnight (the time of divine favor, Ber. 3*b*) Isaac dreams of his father's death. Having related the dream to Abraham, son and father begin to weep, thus rousing Sarah, who recognizes Michael as one of the three angels (Gen. xviii. 1–10). According to recension *A*, Michael had been the speaker of the three; while, according to recension *B*, he had gone to rescue Lot (see Gen. R. l. 2, and B. M. 86*b*). Abraham confirms Sarah's observation; saying that, when washing Michael's feet, he saw that the stranger was one of the angels ("for their feet were straight feet; and the sole of their foot like the sole of a calf's foot," Ezek. i. 7; compare Gen. R. lxv. 21). Michael had also appeared to Isaac, in his dream, as a man of gigantic size, shining more than seven suns (see Isa. xxx. 26), or, according to *B*, "like the father of light" (see also Apoc. Mosis, § 36: "father of lights"). He introduces himself to Abraham as the archangel who stands before the face of the Lord (Sar ha-Panim, "Prince of the Presence," is Michael's original title before he is transformed into the Meṭaṭron—Tanḥuma, Genesis, ed. Buber, p. 17, and Slavonic Book of Enoch, xxii. 6), and reveals to him the meaning of the dream. But Abraham refuses to give him his soul. Michael returns to the Lord, who orders him to plead with Abraham, and to tell him that all the descendants of Adam and Eve must die, but that, as an especial token of divine favor, he will be transferred to a better world without pain or the pangs of death.

Abraham's Visit to Heaven.

Finally Abraham yields; but at the same time he requests Michael to intercede with the Lord and to ask that he (Abraham) may be permitted to see the whole world created by one word (the "ten creative words"—Ab. v. 1—is a later rabbinical view; see Mek., Shirah, x., ed. Weiss, 52*b*, end) before his death. The Lord consents, and orders Michael to take a cloud of light, '*anan kabod* (the rabbinical '*amuda de-nura*, Ket. 17*a*, 62*b*), and angels of the chariot (*merkabah*), and to place Abraham in the chariot of the cherubim and to carry him (compare II Kings, ii. 11, and Tanna debe Eliyahu R. v.) to heaven, whence he would be able to survey the whole universe. His ride begins with the Great Sea (mistranslated in the Apocr. "ocean"; but compare Slavonic Book of Enoch, iii. 3, and "the waters above the firmament," Gen. i. 6). While surveying all the world with its joys and woes, its beautiful and evil things, he is filled with indignation at the sight of the awful crimes committed; and he asks the archangel to smite all malefactors with instant death—which he did. But a voice resounds from heaven, crying: "O Archangel Michael, order the chariot to stop, and turn Abraham away, lest, seeing that all live in wickedness, he destroy all creation. For behold Abraham, not having sinned himself, has no pity for sinners; but I, who made the world, take no delight in destroying any, but await the death of the sinner, that he may be converted and live." Michael directs the heavenly chariot eastward toward paradise (B. B. 84*a*; Ethiopic Book of Enoch, xxxii.; and Slavonic Book of Enoch, xlii. 3), near which Gehenna lies, separated only by a handbreadth (Yalk., Eccl. § 976). At this point an interesting picture of the Judgment of the Souls is presented: Two gates, one narrow and one wide, lead into heaven; and before them sits upon a golden throne a man whose appearance is terrible like that of the Lord. It is Adam, the image of the Lord (B. B. 58*a*); and all the souls pass by him—the just through the narrow gate and the wicked through the wide gate, each by his own merit or demerit, but none encumbered by Adam's sin (Tan., Num., ed. Buber, p. 124; Zohar, Gen. vii. 6). Abraham is allowed to watch the procedure of judgment within the wide gate. He sees the scourging angels called *malake ḥabbalah* (Eccl. R. iv. 3), *malake saṭan* (Tosef., Shab. xvii. 3), "fierce of appearance, pitiless of mind, lashing the souls with fiery tongues." On a table is spread a book ten cubits in breadth and five cubits in thickness (a combination of Ezekiel, ii. 9, and Zechariah, v. 1, 2; see 'Erubin, 21*a*), in which all the good and all the bad actions of man are recorded by two angels. As to the many parallels in the apocryphal literature, compare Harnack's notes to his edition of "Hermæ Pastor" i. 3, § 2, and Baraita, R. H. 16*b*; also Slavonic Book of Enoch, xix. 5. While the two angels officiate temporarily as recorders during the judgment (Ḥag. 16*a*), the permanent recorder is Enoch (see Book of Enoch and Targ. Yer. Gen. v. 24), "the teacher of heaven and earth, the scribe of righteousness." But the actions of the man are also weighed in the scales, to find out whether the good outweigh the bad, enabling the soul to enter paradise, or whether the bad prevail, resulting in the consignment of the soul to Gehenna. In case, however, his good and evil deeds are equal in weight, the soul has to undergo the process of purification by fire, remaining in an intermediate state (Benoni) corresponding to the purgatory of the Church (compare Tosef., Sanh. xiii. 3; 'Er. 19*a*; Ḥag. 27*a*; Origen, in Psalm xxxvii. hom. 3; Ambrose, *enarratio* in Psalm xxxvii. No. 26). But the weighing of the sins is also done for the purpose of ascertaining their quality, since there are light and heavy ones, sins such as adultery being compensated for only by many good actions (R. H. 17*a*). The name of the weighing angel is very significant—Dokiel (compare Isa. xl. 15, 21, "by the dust [דק] in the balance"; see Jerome on this passage), while the angel who probes the soul is called Puriel, from the Greek word for fire, *πῦρ*. This apocrypha contains an utterance of God which is peculiar to it: "I shall not judge man [see Gen. vi. 3]; therefore shall Abel, the first man born of woman, be judge."

Abraham is then represented in a touching way as pitying a soul that is just being weighed, and that lacks but one meritorious act to outbalance its evil doings. He intercedes on its behalf; the angels join in; and the soul is at last admitted into paradise. The merit of the pious helping the sinner is often mentioned in rabbinical and apocryphal literature (compare Slavonic Book of Enoch, vii. 4, and Apoc. Mosis, 33; Soṭah, 10*b*). Abraham now reproaches himself for having previously caused the death of the malefactors by his excessive zeal, but is assured by God that "an uncommon mode of death works pardon for all sins," and that, consequently, his act was beneficial (compare Sanh. 43*b*).

Abraham Refuses to Yield His Soul.

Abraham, having seen the entire world above and below, is carried back to his own house by the archangel, who for the third time is commanded by God to take Abraham's soul; but (as is the case with Moses in the legend) Abraham persistently refuses to surrender it to him. Michael returns to the Lord, saying: "I care not to lay hand upon Abraham, who was Thy friend from the beginning and has none like him on earth, not even Job, the marvelous man"; meaning that Abraham had learned to worship the One God as a child of three (or thirteen) years (see Abraham, where the different traditions of the rabbis are given), whereas Job became a worshiper of the Lord only when he was king (see Job, Testament of). Furthermore, Abraham worshiped God from love, while Job only feared the Lord (compare Mishnah Soṭah, v. 5 [27*b*]).

Another plan for obtaining the soul of Abraham is resorted to. Death (Azazel), the angel of the dauntless countenance and of the pitiless look, who spares neither young nor old, is commanded to appear in the guise of a bright and beautiful angel before Abraham. This disguise is considered necessary lest Abraham, as Moses did after him, might drive Death off at once by using the power of the Holy Name (שם המפורש), but when the angel tells him that he, "the bitter cup of death" (Samael), has come to take his soul, Abraham refuses to go with him. The Angel of Death thereupon arouses Abraham's curiosity by saying that the form in which he appears is not his real one; the very sight of which would, by its terrors, bring death to the sinner. Abraham naturally expresses the wish to see him in his true form, and the angel then appears with his seven serpent-heads and fourteen faces; and the very sight kills seven thousand male and female slaves of Abraham's household, Abraham himself becoming sick unto death (compare M. Ḳ. 28*a*, concerning the "terrors of the Angel of Death," and the description in 'Ab. Zarah, 20*b* of his face full of many terrible eyes and of the bitter cup of poison which he carries with him to cast into the mouths of mortals as they open them at the ghastly sight, so as to kill them; see also Jellinek, "B. H." i. 150). Abraham restores the lives of the seven thousand slaves by his prayer, and then causes the Angel of Death to explain to him all the terrible faces which he has shown to him, as well as the seventy-two kinds of death, timely and untimely, that men may meet.[*]

God Takes Abraham's Soul.

Abraham, however, does not fully recover from the shock; and God (according to recension *B*, which is here more consistent than *A*) removes his soul "as in a dream"—for which the more poetic expression of the rabbis is "by a kiss" (B. B. 17*a*). Then Michael, the heavenly caretaker of souls (Apoc. Mosis, ed. Tischendorf, 20*f*, and "Peṭirat Mosheh"), with a host of angels, comes and wraps Abraham in heaven-spun linen and anoints him with paradisiacal incense (comp. Adam, Book of), and after the lapse of three days they bury him under the tree of Mamre (compare Gen. R. c.). Then, amid hymns and praises of the saints, they carry his soul up to heaven, and having prostrated himself before God the Father, Abraham, the friend of God, is brought into paradise to the pavilions of the righteous (compare B. B. 75*b*: "The Lord shall build pavilions for the righteous ones, for each according to his merit," "where there is neither trouble nor grief nor anything but peace and rejoicing and life unending"—Ber. 17*a*).

Jewish Origin of the Book.

The above description of the contents of the apocrypha, with the numerous parallels given from rabbinical literature, which extend to the smallest detail, leaves not the least room for doubt as to its Jewish origin. In fact, apart from some late Christological additions made in a few manuscripts by copyists, there is not a single Christian interpolation found in the whole book. In claiming a Christian origin for the Testament of Abraham, James erroneously points (p. 50) to Luke, i. 19, where the position of chief angel that stands "in the presence of God" is intentionally assigned to Gabriel; while ancient Jewish angelology ascribes it to Michael, the heavenly chieftain of Israel. Neither is the idea of the "two ways" and the "two gates" taken from Matt. vii. 13. Aside from the fact that the "Two Ways" is originally a Jewish work (see Didache), the conception is known to Johanan b. Zakkai (Ber. 28*b*), and is found also in the Greek allegorical work, "Tabula Cebetis," by the Theban philosopher Cebes, a pupil of Socrates. Dr. James has failed to observe that Luke, xxii. 30, presents the Christianized view of the Jewish doctrine concerning "the future judgment of the world by the twelve tribes of Israel," referred to in chap. xiii. of the Testament of Abraham, and also expressed in Yalḳ., Dan. § 1065, thus: "In the time to come the Lord will sit in judgment, and the great of Israel will sit on thrones prepared by the angels and judge the heathen nations alongside of the Lord." Luke, as a Pauline writer, transformed the twelve tribal representative judges of Israel into the twelve tribes of Israel being judged. The very spirit of this passage is decidedly non-Christian. It does not contain so much as an allusion to the Messiah as the judge. The very belief in a personal Messiah seems to be unknown; nor is Adam's fall anywhere referred to in chap. xi. *A*, or viii. *B*, where there was ample occasion for mentioning it. Death does not show any relation to Satan. All these facts, together with the view of the world's creation by one word instead of ten words (see Ginzberg, "Die Haggada bei den Kirchenvätern" in "Monatsschrift," 1899, p. 410), point to a very early date for the Testament of Abraham. But there are also clear indications of the existence of a Hebrew original; as, for example, the name of the angel Dokiel (chap. xiii. *A*) ; the allusion to the names Azazel, עז פנים and Samael, סמא דמותא ("Poison of Death") ; and particularly the misunderstanding of the Greek translator (chap. viii. *B*), who mistook the heavenly "Great Sea" (ים הגדול) for "the ocean beneath," which is the usual neo-Hebrew designation for "ocean." The expression "thrice holy" (chap. xx.) has nothing to do with the Christian Trinity, as Dr. James thinks (p. 50), but is the translation of the rabbinical term, *shillush ḳedushah*, for the angelic song (Isa. vi. 3, Tanna debe Eliyahu R. vi.).

---

[*] This number seventy-two has nothing to do with the seventy-two nations (M. R. James), but is the same as the seventy-two plagues which visit the body of Adam in consequence of his sin in paradise (Vita Adæ et Evæ, 34), and is found in Tanna debe Eliyahu R. v. and originally as a rabbinical tradition of Akabia b. Mehalalel (Sifra, Tazri'a, 2).

Whether the author of the book was a Pharisee or, as Kohler asserts, an Essene, can not be determined here, though it is significant that the Law is not once mentioned. The view of retribution, as presented in the Testament, certainly precludes Sadducean authorship. As regards the two recensions, *A* and *B*, neither is probably a faithful translation of the Hebrew original: and the reconstruction, here attempted for the first time, depends sometimes upon one and sometimes upon the other.

L. G.

ABRAHAM, TOWER OF: Often mentioned in the Book of Jubilees as a mansion of great importance, said to have been built on the height of Hebron by Abraham, who bequeathed it to Jacob, his grandson (xxii. 24; xxix. 16, 19; xxxvi. 12-20; xxxvii. 14; xxxviii. 4, 8).

A midrashic fragment at the close of Masseket Soferim IX. mentions an iron citadel built by Abraham, of such a height that the sun's rays could not penetrate it: it received its light from a disk made of precious stones. Abraham gave it to the sons of Keturah, and when at the last days sun and moon shall pale before the full light of God's glory, this tower will be opened in order to shelter God's own.

Bibliography: J. Müller, *Masseket Soferim*, 1878, p. 301.

ABRAHAM ABELE BEN ABRAHAM SOLOMON: Known as Abele Posveller (from Poswol in the government of Kovno); acting rabbi of Wilna; died July 29, 1836. He was considered one of the leading Talmudists of his age. Although he has left no independent literary work, he contributed to the rabbinical compositions of many of his contemporaries. Among these were the novellæ of Ẓebi Hirsch Katzenellenbogen, "Netibot 'Olam" (Wilna, 1822); the responsa of Simon of Slonim, "Minḥah Belulah" (Wilna, 1832); the novellæ of Dob Baer Ḳadisch, "Yehegeh Ḥokmah" (Wilna, 1836); and the responsa of Samuel of Byelostok, "Bigde Yesha'" (Wilna, 1844). Solomon ben Judah Loeb of Wilna pronounced a eulogy on him, which was published under the title "'Emeḳ ha-Bakah" (Vale of Tears), Wilna, 1836. With Akiba Eger and Moses Sofer he exercised a powerful influence on the religious practises of the Russian Jews. He was distinguished as the only conservative rabbi of his time who gave his approbation to a work by I. B. Levinsohn, "Te'udah be-Yisrael," which initiated the Haskalah movement in Russia. His charity and kindness became proverbial at Wilna.

Bibliography: Fuenn, *Keneset Yisrael*, p. 9, Warsaw, 1886; idem, *Ḳiryah Neemanah*, pp. 244-246.

L. G.—D.

ABRAHAM ABELE GOMBINER: Polish Talmudist; born about 1635 at Gombin, in Russian Poland; died at Kalisz about 1683. He was a son of Ḥayyim ha-Levi, who was killed by the Cossacks in 1655. Abraham was one of the most eminent Talmudists of his time; a fact clearly shown by his commentary on the "Shulḥan 'Aruk, Oraḥ Ḥayyim," entitled "Magen Abraham" (Shield of Abraham), written by him at the age of thirty, and which was published in 1692 at Dyhernfurth. This work has exercised a remarkable influence on the religious practises of the Jews, and still continues to do so. German and Polish Jews generally were guided by its decisions; consequently the work was frequently commented upon by the later rabbis. Besides this book, he wrote the "Zayit Ra'anan" (Green Olive Tree), Dessau, 1704, containing cabalistic and pilpulistic dissertations, to which he appended a part of his Pentateuchal commentary, "Shemen Sason" (Oil of Gladness), printed as far as the weekly portion Ḥayye Sarah, and a commentary on the Order Neziḳin of the Tosefta, Amsterdam, 1732. In addition, he wrote a commentary on the "Shulḥan 'Aruk, Eben ha-'Ezer," with a special essay on the correct spelling of Jewish names in official documents, and scholia to the treatises Zebaḥim and Menaḥot. Neither of these works is now extant. He also attempted to write *piyuṭim*; but the result showed that he lacked all poetic instinct. Abraham spent nearly all his life at Kalisz, Poland, where he held the position of assistant rabbi, or dayyan. His last wish was that his name and the titles of his works should be his only epitaph.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 94; Landshuth, *'Ammude ha-'Abodah*, p. 2; *Ha-Shaḥar*, ix. 16; Freudenthal, *Aus der Heimath Mendelssohn's*, p. 20.

L. G.

ABRAHAM ABELE BEN JEREMIAH: Interpreter of the Masora; flourished in the middle of the eighteenth century at Kalwaria, in the government of Suwalki, Russian Poland. He wrote "Seder Abraham" (Order of Abraham), Frankfort-on-the-Oder, 1752, containing interpretations of the Masoretic notes on the Pentateuch, arranged in alphabetical order, and he edited and annotated מדבר סין (Frankfort-on the Oder, 1769), a poem made up of all the Hebrew words commencing with the letter Sin (שׂ).

Bibliography: Roest, *Cat. d. Rosenthalschen Bibl.* ii. appendix, No. 960; Zedner, *Cat. Heb. Books Brit. Mus.* p. 18; Benjacob, *Oẓar ha-Sefarim*, p. 409; Fuenn, *Keneset Yisrael*, p. 31.

D.

ABRAHAM ABELE BEN NAPHTALI: Rabbi in Kherson in the first half of the nineteenth century; author of "Bet Abraham" (House of Abraham), Szydlkow, 1837, containing (1) notes on the ritual codes, chiefly excerpted from the literature of the responsa; and (2) various novellæ and homilies and three responsa.

Bibliography: Fuenn, *Keneset Yisrael*, p. 28.

D.

ABRAHAM BEN ABIGDOR: Bohemian rabbi; born in the latter part of the fifteenth century; died at Prague, Oct. 7, 1542. For the last twenty years of his life he was rabbi of Prague, and as such had many pupils, among whom was Abraham Jaffe, father of Mordecai Jaffe. Abraham wrote glosses on the "Ṭur Oraḥ Ḥayyim" of R. Jacob b Asher, some of which were published at Augsburg in the year 1540. They are characterized by clearness and vigor, and are mainly restricted to simple verbal explanations, in opposition to the more elaborate system of the *pilpul*, which was then coming into use in the schools of Poland and Germany. Abraham was trained in secular learning, and legend ascribes to him a knowledge of the "seven sciences." It is probable that Mordecai Jaffe's predilection, both for secular scholarship and for literal explanation (*peshaṭ*), then very rare, was due to the influence of Abraham ben Abigdor, whose pupil, Abraham Jaffe, was Mordecai's father and teacher.

According to David Gans, Abraham also wrote a supercommentary on Rashi. This is probably no longer extant; but a *seliḥah* (penitential prayer), which he wrote on the threatened expulsion of the Jews from Bohemia in 1542, still forms part of the Polish liturgy, and is found in some of the prayer-books of Germany. It is recited on Yom Kippur Ḳaṭan.

ABRAHAM ABOAB. See under Aboab.

ABRAHAM, ABRAHAM: English author and communal worker; died March 31, 1863, at Liverpool. He resided at Liverpool for forty years, during thirty of which he took a leading part in the Jewish affairs of that city; holding various honorary offices in the synagogue, the presidency of the Philanthropic Institution, as well as of the Jewish school. Though actively engaged in commerce, he found leisure for scientific and literary studies.

Abraham is chiefly noteworthy for his efforts toward the introduction of regular vernacular sermons in the synagogue services of England. Through his exertions pulpit instruction was established in 1827 at Liverpool, whence it extended to the provincial synagogues. At a later date it was adopted in London. In 1827 a pulpit was erected in the synagogue at Liverpool. The innovation was hailed with derision, and not until Prof. D. M. Isaacs was formally installed in office was pulpit instruction successful.

Abraham was the author of several publications designed to benefit the young. He translated, from the French, Cahen's "Catéchisme" and Ben Levi's "Matinées du Samedi"; the latter is known under the title of "Moral and Religious Tales for the Young of the Hebrew Faith."

BIBLIOGRAPHY: *Jew. Chron.* April, 1863.

G. L.

ABRAHAM (ABRAM), JACOB: German medalist and lapidary; born at Strelitz in 1723; died at Berlin, June 17, 1800. He learned the art of engraving from a workman in the Polish town of Lissa. For nearly half a century he worked in the royal mints of Stettin (1752), Königsberg (1757), and Berlin. He began his career as a heraldic engraver, and although he could neither design nor model, he brought his art to a surprising state of perfection.

The more noteworthy of his medals are those that commemorate the victories of Frederick the Great during the Seven Years' War, such as the one commemorating the victory at Torgau, in 1760, cut from Ramler's model and Meil s design. In addition may be mentioned the medal containing the effigy of Prince Potemkin and the fortress of Otchakov: "Otschakovia Expugnata"; and that struck in commemoration of the Jubilee festival of the French community in Berlin, June 10, 1772, from the design of D. Chodowiecki. Another of his successful medals was one representing Sigmund van der Heyde, the defender of Kolberg, 1760.

Jacob Abraham was reputed the foremost medalist of his time in Germany, and his three sons, of whom Abraham and Jacob are known, inherited his talent (see Abrahamson, Abraham). The similarity of the names has led to the confusion of father and son by historians.

ABRAHAM ABUSH BEN LEVI HIRSCH KATZENELLENBOGEN. See Katzenellenbogen, Abraham Abush ben Levi Hirsch.

ABRAHAM, ADOLPHE: French colonel; born at Thionville, France, March 21, 1814. When eighteen he enlisted as a volunteer, and was assigned to the 52d Regiment of the line, which started immediately afterward for the siege of Antwerp. He is one of the last survivors of that siege. From the ranks he advanced step by step to the grade of lieutenant, which he attained on April 27, 1846. After the Paris rising of June, 1848, he received the Cross of the Legion of Honor as a reward for organizing and conducting to the front the 2d battalion of the National Guard of the Seine, which captured the Panthéon from the mob. Promoted captain in 1851, he fought through the Crimean war, and took part in the assault on Sebastopol.

During the war against Austria in Italy in 1859 he was present at the battle of Magenta, June 4, and at the capture of the railway-station there, where he was wounded at the side of General Lespinasse. He was appointed major (commandant) at Solferino on the very morning of the battle (June 24). He stormed and captured Casa Nuova and four guns. For this he was mentioned in the "orders of the day" of the 85th Regiment. After having passed three years with the army of occupation in Rome, Abraham asked, in 1866, to be retired on account of ill health. But a life of inactivity weighed upon him, so in 1868 he was entrusted with the reorganization of the Garde Mobile, in the department of the Seine. Recalled to active service in 1870, he was promoted lieutenant-colonel of the 51st Infantry, which at that time formed a part of the army of Paris, and fought in two battles at Champigny, Nov. 30 and Dec. 2.

In the days of the Commune, Abraham rendered efficient service to the national government.

At the request of General Berteaux, in 1875, Colonel Abraham assumed the command of the 19th Infantry (reserve), which he retained till 1879, when, attaining the age limit, he was permanently retired. Colonel Abraham, who received the military medal of Sardinia and the cross of the Order of Pius IX., was created officer of the Legion of Honor in 1864. From Queen Victoria he received the Crimean medal.

Abraham remained steadfast to the Jewish faith, and was elected president of the congregation of Versailles. He discharged the functions of this office till 1891, when he withdrew to Granville. J. B.

ABRAHAM OF ARAGON: A skilful oculist, who flourished in the middle of the thirteenth century. Shortly after the Council of Béziers, in 1246, had forbidden Jewish physicians to practise, Abraham was requested by Alphonse, count of Poitou and Toulouse, and brother of Louis IX. of France, to treat him for an affection of the eye. The count at first implored Abraham's help in vain; for he, being a man of independent spirit, held stoutly to the opinion that even the brother of a king was not exempt from the decree of a council. It was only after the seigneur of Lunel, with the assistance of his Jewish agent, had persistently pleaded with Abraham that the latter consented to cure the count.

ABRAHAM (ASHER JACOB) BEN ARYEH LOEB ḲALMANḲES. See Asher, Jacob Abraham ben Aryeh Loeb Ḳalmanḳes.

ABRAHAM (BEN GEDALIAH) BEN ASHER (= ABA): A commentator; native of Safed, Syria; held rabbinical office at Aleppo in the second half of the sixteenth century. He was a pupil of Joseph Caro (1488–1575), with whom in later years he maintained a learned correspondence. Abraham wrote a commentary on the Midrash Rabbot, entitled אור השכל ("The Light of Reason"), only a part of which—that on Genesis Rabbah—has been published under the subtitle "Ma'adanne Melek" (Royal Delicacies), Venice, 1567, by his brother-in-law, Senior ben Judah Falcon of Venice. The other parts of the commentary are still extant in manuscript, and include also a midrashic commentary attributed to Rashi.

ABRAHAM AUERBACH. See Auerbach, Abraham.

ABRAHAM OF AUGSBURG: Proselyte to Judaism; died a martyr's death Nov. 21, 1265. He seems to have adopted his new faith with such enthusiasm that he publicly assailed Christianity and attacked images of the saints, for which he was sentenced to torture and death. The incident attracted considerable attention, and it forms the subject of elegies by Mordecai ben Hillel (who himself suffered martyrdom in 1298) and by the liturgical poet Moses ben Jacob.

Bibliography: Zunz, *S. P.* pp. 350, 364; S. Kohn, *Mordecai ben Hillel*, pp. 46–49 and appendix I.; Perles, in *Monatsschrift*, 1873, pp. 513, 514; Salfeld, *Martyrologium des Nürnberger Memorbuches*, pp. 22, 149, 150.

L. G.

ABRAHAM OF AVILA: A pseudo-Messiah and wonder-worker, who lived at the end of the thirteenth century. There seems to be some doubt concerning the name of this man, though the facts are well attested by Solomon ben Adret and the apostate Abner of Burgos. The mystic propaganda carried on in Spain by Abraham Abulafia influenced at least two men to turn to their own advantage the credulous excitability of the people. Nothing is known of the private life of this pseudo-Messiah other than that he was an ignorant man, unable either to read or to write, and that he made the acquaintance of Abulafia in Messina. He claimed that by the intervention of an angel he had written a voluminous work, פלאות החכמה ("Wonders of Wisdom"), and a commentary upon it.

Abraham came to the community of Avila, Spain, with a forged letter from David Ashkenazi, calling first upon Solomon ben Adret. In perplexity the community turned to Adret, the greatest rabbinical authority of that day, for advice as to the attitude to be maintained toward the new prophet. Adret, without directly condemning him, expressed strong doubts as to his prophetic gifts. Prophecy, he said, did not rest upon an ignorant man, nor was it a time for prophetic inspiration; furthermore, the prophetic gift was given by God in Palestine exclusively. For these reasons Adret urged care and further investigation into the reputed miracles. The community took him at his word, and awaited with curiosity the last day of the fourth month of the year 1295—the day on which the Messianic time was to begin. The people assembled in the synagogue in the white burial garments used on the Day of Atonement; and the story goes that on these garments small crosses appeared. Such an impression was made upon Abner of Burgos by this "miracle," that it helped toward his conversion about twenty-five years later.

Bibliography: Solomon ben Adret, *Responsa*, No. 548, which has been wrongly taken by Landauer and Jellinek to refer to Abulafia (Steinschneider, *Jew. Lit.* p. 308, § 47). From the responsum in question it is impossible to tell whether the name of the false prophet was Nissim ben Abraham, as Perles (*Salomo ben Adereth*, p. 5) supposes, or whether Nissim was the bearer of a letter to Adret on the subject, as Kaufmann, in *Rev. Ét. Juives*, xxxvi. 288, thinks. For Alfonso (Abner) of Burgos, see *Rev. Ét. Juives*, xviii. 57, 58; compare also Grätz, *Gesch. der Juden*, 2d ed., vii. 318–321; *Monatsschrift*, 1887, p. 557.

G.

ABRAHAM BEN AZRIEL OF BOHEMIA: A Bohemian Talmudist and grammarian, who flourished in the first half of the thirteenth century and probably lived at Prague. Among his works, yet unpublished, is a commentary on the Maḥzor, entitled "Arugat ha-Bosem" (Bed of Spices), probably the most ancient Jewish literary effort in any Slavonic country. In this Abraham shows himself to have been a faithful follower of the scholars of northern France, who, uninfluenced by Arabo-Spanish philosophy, devoted their attention solely to the Bible and the Talmud. As a Talmudist Abraham exhibited a strong tendency to casuistry, while as a Bible exegete he was simple and sound, working chiefly after the method of RaSHBaM, whose commentary he often quotes. It is not certain that he enjoyed actual personal intercourse with his French brethren; he may have been influenced only by their literary productions.

The explanation of many obscure Hebrew words by their Bohemian equivalents in Abraham's work shows that the Jews of Bohemia at that time made use of the vernacular; and some of the Bohemian expressions there adduced are among the oldest in the language.

Bibliography: Berliner's *Magazin*, i, 2, 3; Perles, in *Monatsschrift*, 1877, pp. 360-373; Kaufmann, *ibid.* 1882, pp. 316-324, 360-370, 410-422; 1886, pp. 129 *et seq.*

ABRAHAM BALI BEN JACOB. See Bali, Abraham.

ABRAHAM DE BALMES (or **DE PALMIS**) **BEN MEIR:** Italian physician and translator of the early sixteenth century; born at Lecce, in the old kingdom of Naples; died at Venice, 1523. A short time before his death he was physician in ordinary to the cardinal Dominico Grimani at Padua. See Steinschneider, "Hebr. Bibl." xxi. 7 and 67; "Hebr. Uebers." p. 62; Perles, "Beiträge," pp. 193, 197, etc. Through his Latin translations of many Hebrew works on philosophy and astronomy he attained a great reputation in the Christian world. He dedicated to Cardinal Grimani two of these translations: (1) of an astronomical work in Arabic by Ibn al-Heitham (died 1038), which had been translated into Hebrew by Jacob ben Machir, in 1372, under the title "Liber de Mundo"; (2) of the "Farewell Letter" of the Arabic philosopher Ibn Baga (Avempace), which he translated from the Hebrew under the title "Epistolæ Expeditionis" (MS. Vat. No. 3897. The dedication is published in "Revue des Études Juives," v. 145). In Padua Abraham delivered philosophical addresses to Christian audiences. He also compiled a Hebrew grammar, in which he attempted to treat philosophically the construction of the Hebrew language and to refute the opinions of the eminent grammarian David Ḳimḥi. In this work Abraham was the first to treat the syntax (which he called in Hebrew *harkabah*) as a special part of the grammar. The book was published, with a Latin translation and a supplementary treatise on the Hebrew accents, under the title "Miḳneh Abram," by Maestro (Calo) Ḳalonymos ben David, a well-known translator. Grätz ("Gesch. der Juden," ix. 215) suggests, without evidence, that the printer Daniel Bomberg (who is supposed to have learned Hebrew from Balmes) translated this grammar. At his death, honors were paid to his memory by his Christian pupils.

Bibliography: Steinschneider, *Cat. Bodl.* col. 667; idem, *Hebr. Uebers.* §§ 206, 348, 581; idem, *Bibliographisches Handbuch*, No. 164, Leipsic, 1859; T. Willesz's dissertation, Budapest, 1895.

H. M.

ABRAHAM BEN BARUCH: Writer on ritual; brother of Meir of Rothenburg; lived in southern Germany about the end of the thirteenth century. He wrote "Sefer Sinai" (The Book of Sinai), a collection of legal and ritualistic decisions, compiled from different rabbinical authorities. The work is still extant in manuscript at Wittenberg. According to the copyist, the word סיני was chosen by the author as the title on account of its having the numerical value of ענוה ("humility"); but it is really one less; the copyist evidently counted the word itself as an additional unit. Abraham is mentioned by his contemporary R. Mordecai b. Hillel Ashkenazi, the author of the "Mordecai" (on Giṭ. § 404).

Bibliography: Michael, *Or ha-Ḥayyim*, No. 68; Zunz, *Z. G.* p. 162; Benjacob, *Oẓar ha-Sefarim*, p. 419.

M. B.

ABRAHAM BEN BARUCH MIZRAḤI. See Mizraḥi, Abraham ben Baruch.

ABRAHAM OF BEJA: A learned Jew who lived in Alemtejo, Portugal, during the latter half of the fifteenth century. Being an extensive traveler, he knew many languages, and for that reason King John II. ordered him to accompany Joseph Zapateiro of Lamego upon the latter's expedition to discover Covilham, who had himself been sent in search of the mythical Christian king, Prester John. They discovered Covilham in Lower Egypt, and brought back news of his welfare, together with information that led to the epoch-making voyage of Vasco da Gama.

Bibliography: Grätz, *Gesch. d. Juden*, viii. 380 (in the English translation this name is erroneously given as Abraham de Beya); Kayserling, *Columbus*, pp. 19, 20; Jacobs, *Story of Geographical Discovery*, p. 89.

W. M.

ABRAHAM BENDIG. See Bendig, Abraham.

ABRAHAM BEN BENJAMIN AARON: A Polish Talmudist of the first half of the seventeenth century; died at Brest, Lithuania, in 1642. He was rabbi at Tarnopol in 1636, and officiated in other Polish towns. In the latter year he was called to the rabbinate of Brest, then the largest community in Poland, and remained there till his death. The leading rabbis of that time—Joel Sirkes, Meir Kohen-Ẓedeḳ, and Rabbi Heschel, of Cracow—treat him in their writings with the greatest respect and veneration. Besides his responsa, contained in the works of the above-mentioned rabbis, he also left scholia to the "Ṭur Oraḥ Ḥayyim," which are appended to his father's work.

His father, Benjamin Aaron (died 1620), was the author of "Masat Binyamin," a collection of responsa.

Bibliography: Feinstein, *'Ir Tehillah*, pp. 26, 118, 136, 154, 170, 202, Warsaw, 1886; Michael, *Or ha-Ḥayyim*, No. 64.

L. G.

ABRAHAM BEN BENJAMIN ZE'EB BRISKER: Polish author of the seventeenth century; went to Vienna, and, on the expulsion of the Jews from that city in 1670, went to Brest, Lithuania, where he married a daughter of Elijah Lipschütz. He was the author of "'Asarah Maamarot" (Ten Words), a work treating of the ten divine words which, according to Pirḳe Abot (v. 1), were used in the creation of the world; also of the Decalogue, published in 1680 at Hamburg or Frankfort-on-the-Oder. In 1685 he published "Zera' Abraham" (Abraham's Seed), on the connection of the weekly lessons in their Pentateuchal order. In 1698 he wrote the cabalistic treatise, "Perush 'al 'Eser 'Aṭarot" (Commentary on the Ten Crowns), on the Decalogue, in which Abraham mentions his intention to emigrate to Palestine. The additions to the "Yefeh Mareh" (Fair of Countenance) of Samuel Jaffe (Amsterdam, 1727), attributed to Abraham by Steinschneider ("Cat. Bodl." col. 2427), are not his, but were written by Abraham Hellen, rabbi in Glogau, and author of a commentary on Midrash Rabbah.

Bibliography: Kaufmann, *Die Letzte Vertreibung der Juden aus Wien*, p. 223; Feinstein, *'Ir Tehillah*, pp. 32, 158, 191.

P. B.

ABRAHAM BENVENISTE. See Benveniste, Abraham.

ABRAHAM, BERNARD: French brigadier-general of artillery, retired; born at Nancy, Jan. 12, 1824. His father, who was a member of the Jewish Consistory of Nancy, was known as Moïse, though his name was Moïse Abraham. The sons were all called Moïse, and Édouard, a brother of the general, an artist at Paris, has retained the paternal appellation in the spelling Moyse (Moyse, Édouard). After passing through the Lycée at

Nancy, Abraham entered the École Polytechnique at the age of nineteen, Nov. 1, 1843. Thence he went to the School of Applied Sciences at Metz, from which he was graduated in 1847, after which he served for several years at Strasburg as a lieutenant. He was promoted to the rank of captain in 1854, and served in the Crimea on the staff of General Lebœuf. After the fall of Sebastopol he received the cross of chevalier of the Legion of Honor, as Captain Bernard Moïse. Having returned to France he was detailed in 1856 for service at the ordnance foundry at Strasburg. Two years later he married, and was obliged to assume the name of Abraham, under which he was registered in all the civil documents. In 1859 he took part in the campaign in Italy against Austria. For some time after the convention of Villefranche, Abraham remained in Milan, but subsequently returned to France. On the restoration of peace he was assigned to the department of artillery at Strasburg. He went to Paris, was promoted major, and took part in the Franco-Prussian war of 1870. He was detailed to the army of the Rhine at Metz, and there, after the battle of Gravelotte, was decorated with the cross of an officer of the Legion of Honor. After the war Abraham was appointed secretary of the committee on coast defenses, and became a member of the military commission on railways. He advanced in rank rapidly, reaching the grade of lieutenant-colonel in 1874 and that of colonel in 1877. As the latter he commanded the Seventeenth Infantry, for several years, at La Fère. He was finally made brigadier-general June 2, 1883, and remained in active service till Jan. 12, 1886.

Bernard Abraham.

In 1895 Abraham succeeded Dr. Widal in the Central Consistory of the Israelites of France, and retained the seat for several months. J. W.

ABRAHAM BIBAGO BEN SHEM-ṬOB. See Bibago ben Shem-Ṭob, Abraham.

ABRAHAM OF BOHEMIA: Prefect of the Jews of Great and Little Poland at the beginning of the sixteenth century. In 1512 King Sigismund I. of Poland issued a decree notifying his subjects in Great Poland and Little Poland that he had appointed Abraham, a Jew of Bohemia, prefect over them, and that one of Abraham's duties was to collect all taxes due from them and to deliver the same into the king's treasury ("Acta Tomiciana," iii. No. 252; "Metrika Koronnaya," 1518–20, book No. 33, p. 118). Abraham was recommended to Sigismund by the latter's brother, the king of Hungary and Bohemia, and by Emperor Maximilian of Germany. Both attested his honesty and blameless life. The law courts of Poland had no jurisdiction over Abraham, he being responsible only to the king's own court.

Abraham was one of the many Jews who emigrated from Bohemia to Poland. He was also from time to time counselor for some of the Jewish communities of Poland, as is apparent from the king's order to the Jews of Cracow to pay Abraham 200 florins, promised him as a reward for a defense "against certain accusations." The Polish Jews were not pleased with their new Bohemian prefect, who had become so powerful. The king ordered all the Jews of Poland, and especially the rabbis, to respect the liberties and privileges granted to Abraham, and not to encroach upon them by excommunication or in any other way. For these privileges Abraham paid an annual personal tax of 20 ducats (about $300 or $400, nominal).

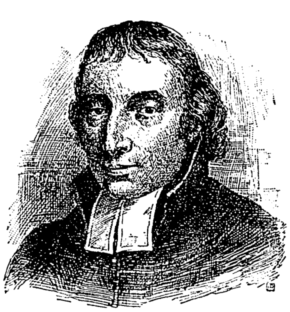
ABRAHAM (VITA) DE COLOGNA: An Italian rabbi, orator, and political leader; born at Mantua, 1755; died at Triest, 1832. While holding the post of rabbi of his native city he was elected a member of the Parliament of the Napoleonic kingdom of Italy, and in 1806 a deputy to the assembly of notables in Paris. Upon the formation of the Sanhedrin in 1807 he was appointed vice-chairman, and in 1808 a member of the French Central Consistory; later also of the Consistory of Turin. Abraham exhibited all the characteristics of men of transition periods: a strong desire for reform, and an indefinite conception of the aims and means necessary to realize that desire. He left a volume of sermons and apologetic essays.



Abraham de Cologna.

ABRAHAM OF COLOGNE (BEN ALEXANDER): German rabbi; flourished about 1240. He was considered the most eminent pupil of Eleazar of Worms. Solomon ben Adret relates ("Teshubot," i. No. 548) that he saw Abraham when he came to the king of Castile, probably Ferdinand II. (the Saint). On this occasion Abraham assumed the name of Nathan to conceal his identity. Adret also claims to have heard from an old man that Abraham of Cologne preached on Num. vii. 1, in the house of Adret's father before a great many eminent rabbis, and displayed much erudition.

Abraham was the author of a small book entitled "Keter Shem-Ṭob" (The Crown of a Good Name), the concluding chapter of which—containing an explanation of the Sefirot, or Ten Mystical Spheres—is ascribed in some manuscripts to Menahem Ashkenazi, another pupil of Eleazar of Worms. Certainly either Abraham of Cologne or Menahem was the first representative of German mysticism to show a familiarity with the doctrine of the Sefirot.

ABRAHAM CONQUE OF HEBRON. See Conque (Cuenqui), Abraham, of Hebron.

ABRAHAM BEN DANIEL: Poet and rabbi; born at Modena in 1511. For several years he was a tutor at Viadana, Modena, Rivarolo, Arezzo, and Forli, and finally he became rabbi at Ferrara. From 1536 to 1552, despite unceasing bodily ailments, he composed over a thousand poetical prayers in various meters and forms, six of them being in the Aramaic language. Several of the poems were written for friends, or suggested by public events, papal oppressions, or prevalent sickness; and one of them is in honor of his cousin Hadassah, whom he married in 1539. A manuscript collection of his prayers in the Bodleian Library, Oxford, bears the title "Sefer ha-Yashar" (The Book of the Righteous).

ABRAHAM IBN DAUD (=DAVID) HA-LEVI; called **Ben Daud** (erroneously **Daur, Dior**); also **RABaD**, from the initials of his name, and **RABaD I** to distinguish him from Abraham ben Isaac of Narbonne (RABaD II.) and Abraham ben David of Posquières (RABaD III.): Spanish astronomer, historian, and philosopher; born at Toledo about 1110; died, according to common report, a martyr about 1180. His mother belonged to a family famed for its learning. His chronicle, a work written in 1161 under the title of "Sefer ha-Ḳabbalah" (Book of Tradition), in which he fiercely attacked the contentions of Karaism and justified rabbinical Judaism by the establishment of a chain of traditions from Moses to his own time, is replete with valuable general information, especially relating to the time of the Geonim and to the history of the Jews in Spain. An astronomical work written by him in 1180 is favorably noticed by Isaac Israeli the Younger ("Yesod 'Olam," iv. 18). His philosophical work, "Al-'akidah al-Rafiyah" (The Sublime Faith), written in 1168, in Arabic, has been preserved in two Hebrew translations: one by Solomon b. Labi, with the title "Emunah Ramah"; the other by Samuel Motot. Labi's translation was retranslated into German and published by Simson Weil.

His Position as Philosopher.

Ibn Daud was by no means an original thinker, nor did he produce a new philosophy; but he was the first to introduce that phase of Jewish philosophy which is generally attributed to Maimonides and which differs from former systems of philosophy mainly in its more thorough systematic form derived from Aristotle. Accordingly, Ḥasdai Crescas mentions Ibn Daud as the only Jewish philosopher among the predecessors of Maimonides ("Or Adonai," chap. i.). But having been completely overshadowed by Maimonides' classical work, the "Moreh Nebukim," Abraham ibn Daud's "Emunah Ramah" (Sublime Faith), a work to which Maimonides himself was indebted for many valuable suggestions, received scant notice from later philosophers.

The only Jewish philosophical works that Ibn Daud had before him, according to his own statement ("Emunah Ramah," p. 2, or in German trans., p. 3), were Saadia's "Emunot we-De'ot," and "The Fountain of Life" by Solomon ibn Gabirol. On the one hand, he fully recognizes the merits of Saadia, although he does not adopt his views on the freedom of the will, notwithstanding that the solution of this problem was to be the chief aim and purpose of his whole system ("Emunah Ramah," p. 98; German trans., p. 125). On the other hand, his attitude toward Gabirol is entirely antagonistic, and even in the preface to his "Emunah Ramah" he pitilessly condemns Gabirol's "Fountain of Life." See Kaufmann, "Studien über Solomon ibn Gabirol," Budapest, 1899.

Being the first strict Aristotelian among the Jews—who considered Aristotle and his Arabic commentators, Alfarabi and Ibn Sina, to be the only true philosophers (*ib.* pp. 23, 50, 62; German trans., pp. 30, 65, 78)—Ibn Daud feels himself provoked to constant opposition by the doctrines of Gabirol, who represents the Neoplatonic philosophy. Impartial enough to accord to childlike faith its full rights, Ibn Daud desires also to defend the rights of reason, and, consequently, resists with the utmost energy any attempt to set bounds to science; regarding this as a culpable encroachment upon the plan of the Divine Ruler, who did not endow man with the faculty of thought without intent.

True philosophy, according to Ibn Daud, does not entice us from religion; it tends rather to strengthen and solidify it. Moreover, it is the duty of every thinking Jew to become acquainted with the harmony existing between the fundamental doctrines of Judaism and those of philosophy, and, wherever they seem to contradict one another, to seek a mode of reconciling them. Ibn Daud insists that, however highly philosophy may be valued, the religion of Judaism is preferable. Knowledge, which had been acquired by philosophers through the evolution of several thousands of years, and after overcoming the gravest errors, had been bestowed upon Judaism from the beginning through revelation (*ib.* p. 62; German trans., p. 79). As to moral truths, it may be even assumed as probable that the philosophers did not attain to them through independent study, but rather under the influence of the doctrines of Holy Scripture (*ib.* p. 101; German trans., p. 130).

Ibn Daud and Aristotle.

It is true that on certain points Ibn Daud could not always avoid conflict with the doctrines of Aristotle: this was especially true in regard to the latter's theory of the Creation. According to Aristotle, all coming into being results from the fusion of matter into a certain form; matter, therefore, is the necessary basis for any genesis; primary matter itself, as the substance common to all things existent, must, therefore, be without beginning and must be eternal. But the acceptance of preexistent and eternal matter can not be reconciled with the Biblical history of creation, which implies a creation out of nothing, and subject to time. From this conflict, which later caused Maimonides to dispute the authority of Aristotle in all matters transcendental, Ibn Daud was not able to extricate himself; and, therefore, he rather tries to glide over the existing difficulties than to solve them. For he represents the course of creation as a series of creative acts; which recalls Gabirol's doctrine concerning the succession of the various substances. But he himself subsequently admits that this was only a hypothesis to satisfy the need of giving an architectonic finish to our notions, intended to mark that gradual process of things which would result, had creation really gone through all the stages of existence, from primary matter, which is imperceptible to us, to all individual things, though some of these stages may be regarded as partly existing only in abstract notions. To concede the possibility of such a gradual process of creation, however, would be, according to Ibn Daud, a contradiction of our conception of God's mode of acting.

As to the doctrine of God, Abraham ibn Daud,

His Doctrine of God.

like Aristotle and his Arabic interpreters, proceeding from the principle of motion, and basing his argument upon the proof of the impossibility of a *regressus in infinitum*, arrives at the conception of a First Cause of all motion, or of a Prime Mover, who Himself, as First Cause, can not have any other cause of motion above Him, and must, therefore, be thought of as motionless. The Prime Mover is God. But this proof of the existence of God leaves still open two important questions relating to the truth of our knowledge of God: one concerning the incorporeality, and the other respecting the unity of God.

As to the incorporeality of God, it follows logically from the notion of infinity which belongs to the First Cause of motion that no corporeal thing can be infinite itself; nor can infinite force be attributed to it. But the Prime Mover is infinite; for, since He Himself is without motion, His force also remains unaffected by the motion of change and transformation. Therefore the Prime Mover—that is, God—can not be corporeal (*ib.* p. 47; German trans., p. 60).

But as a being of necessary existence, God must also be absolutely simple and single; inasmuch as the conception of a plurality in His essence would, at the same time, nullify the notion of the necessity of His existence. For the consolidation of this plurality into a unity must have been effected by another being different from itself; hence the existence of this plural being would be no more necessary, that is, determined by its own essence, but would be dependent upon that other being which brought about the unification (*ib.* p. 49; German trans., p. 63).

From the notion of absolute unity results the conception of the uniqueness of God; for if two beings of this kind could exist, the unity of God would be nullified, since to one, at least, of the units a special character must be attributed so as to distinguish it from the other (*ib.*). With the doctrine of the unity of God is connected the doctrine of the divine attributes, which is preceded in Abraham ibn Daud's system by the doctrine of the negative attributes, already accepted by Baḥya ibn Paḳuda ("Ḥobot ha-Lebabot," i. 10) and by Judah ha-Levi (Cuzari, ii. 2) from the older Arabic theology. According to Ibn Daud, only negative attributes, in the strict and proper sense, can be imputed to God; so that, whatever multiplicity of these negative attributes may be ascribed to Him, no multiplicity in the essence of God can result. Certainly this is equivalent to a renunciation of a positive conception of the Divine Being; for negative statements may suffice to prevent erroneous ideas, but a positive knowledge can never be obtained through them alone (*ib.* p. 5; German trans., p. 65). Indeed, our whole knowledge of God is limited to two certainties, (1) that He exists and (2) that His essence is incomprehensible (*ib.* p. 56; German trans., p. 71). In addition to the negative attributes, only relative attributes can be predicated of God; for even these latter, how many soever may be assumed, since they do not apply to the essence of God but only to His relation to the world, produce no modification in the notion of the unity of the Divine Being (*ib.* p. 54; German trans., p. 69).

From the speculative doctrines of faith, the truth of which can be proved only by reasoning, are to be distinguished the historical dogmas whose authenticity is based principally upon divine revelation, or, to speak more exactly, upon the historical tradition of such a revelation (*ib.* p. 69; German trans., p. 87). The tradition concerning an event that is reported to have taken place publicly before a great body of men, which originated, so to say, under the control of public opinion, without having been disputed by contemporaries, and has descended with an uninterrupted continuity, possesses an argumentativeness which can not be controverted even by the professional logician (*ib.* pp. 78, 81; German trans., pp. 98, 103). The trustworthiness of historical tradition forms a presumption in favor of the truth of prophecy. In the true sense of the word, according to the axioms established above for the reliability of historical tradition, there can be only assertion of real prophecy when the divine revelations apply to important public matters; while those revelations which pertain to less important matters, or even to the personal affairs of a single individual, can not be classed under this head (*ib.* p. 71; German trans., p. 89). Thus, as Ibn Daud remarks, perhaps with a reference to the miracles attributed to Jesus, the authenticity of the Torah would be in a sorry plight if, instead of being based on miracles of real historic certainty, such as those of Moses, it were supported merely by miracles of such private character as the resurrections effected by Elijah and Elisha (*ib.* p. 80; German trans., p. 101).

His Theory of Prophecy.

Relying upon the doctrines of Alfarabi and of Ibn Sina, Ibn Daud, whom Maimonides follows in many ways in his conception of prophecy, further sets forth that the gift of prophecy must not be considered as a phenomenon, interrupting the continuity of the development of the human mind, but in a certain sense as the final stage of a natural evolution whose lower phases, though they must be distinguished from prophecy proper, are nevertheless connected with the same faculty through a certain identity of nature. And even if the true stage of prophecy is reached, this gift is, nevertheless, still capable of progressive development, although it may exceptionally at once reach the highest perfection in particularly gifted individuals.

The connection between the mind of the prophet and the higher intellects, principally with the Active Intelligence, furnishes a sufficient explanation of the higher cognitive faculty of the prophet, as well as of his power of transcending natural law. Appointed to become an intermediary between God and man, the prophet is elevated almost to the plane of the separated intelligences, or angels (*ib.* p. 73; German trans., p. 91).

On Predestination.

Based upon the philosophical system developed above, and after the exposition of the doctrine of faith, the problem of human free-will and its relation to faith in a divine providence, or predestination, may be regarded as much nearer its solution. The objection that faith in a divine providence is inconsistent with the existence of evil in the world, because God can not be the author of evil and good at the same time, is refuted by the fact that evil has no existence in itself, but is only the natural result of the absence of actual good, and that, consequently, evil needs no creator. The defects and imperfections which appear in this world are in nowise contradictory to the wisdom and goodness of God. The defects appear only to a finite conception which considers things separately and in themselves, and not in their connection with the whole. Viewed from a higher standpoint the imperfections adhering to things or individuals would perhaps, in their relation to the whole, even prove to be perfections and advantages (*ib.* p. 95; German trans., p. 121).

The human free-will as a subjective principle has for its objective correlate the notion of possibility, by which one of two alternatives may occur. This does not cause the divine omniscience to undergo any limitation; unless, misled by common usage, one should designate as "possible" those things whose undetermined state results not from their own essence, but only from our deficient knowledge of the essence. But this kind of possibility, which, indeed, is no possibility at all, must be eliminated from God as quite irreconcilable with His omniscience. In its strict and precise form, the notion of possibility is not at all antagonistic to the omniscience of God; for it is easily conceivable that God from the beginning regulated creation, so that for certain cases both alternatives should be "possible" events; that the Creator, in order to grant to human liberty the opportunity to display its own energy, left the final issue of certain actions undecided even for His own knowledge (*ib.* p. 96; German trans., p. 123).

Human free-will, it is true, suffers a certain limitation through the variety of moral dispositions, partly due to natural causes, to be found in single individuals, as also in entire nations. But man is able to overcome his natural disposition and appetites, and to lift himself to a higher plane of morality, by purifying and ennobling himself (*ib.* p. 97; German trans., p. 124). The Torah, and the study of ethics which forms a part of practical philosophy and is designated, by an expression borrowed from Plato ("Gorgias," 464), as the "doctrine of the healing of souls," are the guiding stars to this exalted plane; but no scientific presentation of practical philosophy approaches in this regard the lofty heights of the Scriptures, wherein are clearly expressed the most sublime moral principles known to philosophers (*ib.* pp. 98, 101; German trans., pp. 126, 130).

The ceremonial laws also serve the purpose of moral education, and are, therefore, in view of their ethical tendency, to be numbered among the moral laws; although when compared with the doctrines of faith and the ethical laws proper, they have only a subordinate importance, as the Holy Scriptures also attribute to the sacrifices a relatively minor importance in comparison with the moral laws (*ib.* p. 102; German trans., p. 131).

ABRAHAM BEN DAVID. See YIẒḤAḲI, ABRAHAM.

ABRAHAM BEN DAVID OF OSTROG (Volhynia): Commentator; flourished about 1500. He wrote כור לזהב ("Furnace for Gold"), a commentary on the Targumim to the Pentateuch. Some also attribute to him a treatise on the thirteen hermeneutical rules of Rabbi Ishmael, published at Canterbury in 1597, by the converted Jew Philip Ferdinand.

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* Nos. 4215, 4216, 5053.

M. L. M.

ABRAHAM BEN DAVID OF POSQUIÈRES (RABaD III. ראב"ד): French Talmudic commentator; born in Provence, France, about 1125; died at Posquières, Nov. 27, 1198. Son-in-law of Abraham ben Isaac Ab-Bet-Din (RABaD II). The teachers under whose guidance he acquired most of his Talmudic learning were Moses ben Joseph (according to Michael, "Or ha-Ḥayyim," p. 24, the latter was the chief teacher of RABaD, but the manuscript note to which Michael refers reads quite differently in Buber's introduction to "Shibbale ha-Leḳeṭ") and Meshullam ben Jacob of Lunel. RABaD (abbreviation for Rabbi Abraham ben David) remained in Lunel after completing his studies, and subsequently became one of the rabbinical authorities of that city. He went to Montpellier, where he remained but a short time, and then removed to Nîmes, where he lived for a considerable period. Moses ben Judah ("Temim De'im," p. 6*b*) refers to the rabbinical school of Nîmes, then under Abraham's direction, as the chief seat of Talmudic learning in Provence.

Persecution.

But the real center of RABaD's activity was Posquières, after which place he is often called. It is difficult to determine when he removed to Posquières; but about 1165 Benjamin of Tudela, at the outset of his travels, called upon him there. This traveler speaks of RABaD's wealth and benevolence. Not only did he erect and keep in repair a large school-building, but he cared for the material welfare of the poor students as well. It was his great wealth which brought him into peril of his life; for, in order to obtain some of it, Elzéar, the lord of Posquières, had him cast into prison, where, like Rabbi Meir of Rothenburg, he might have perished, had not Count Roger II. of Carcassonne, who was friendly to the Jews, intervened, and by virtue of his sovereignty banished the lord of Posquières to Carcassonne. Thereupon Abraham ben David returned to Posquières, where he remained until his death. Among the many learned Talmudists who were his disciples in Posquières were Isaac ha-Kohen of Narbonne, the first commentator upon the Talmud Yerushalmi; Abraham ben Nathan of Lunel, author of "Ha-Manhig"; Meir ben Isaac of Carcassonne, author of the "Sefer ha-'Ezer"; and Asher ben Meshullam of Lunel, author of several rabbinical works. RABaD's influence on Jonathan of Lunel also is evident, though the latter did not attend his lectures.

Literary Works.

Besides being an active teacher, Abraham was a prolific author; for he not only wrote answers to hundreds of learned questions—which responsa are still partially preserved in the collections "Temim De'im," "Orḥot Ḥayyim," and "Shibbale ha-Leḳeṭ"—but he also wrote a commentary on the whole Talmud and compiled several compendiums of rabbinical law. Most of his works are lost; but those which have been preserved, such as the "Sefer Ba'ale ha-Nefesh" (The Book of the Conscientious), a treatise on the laws relating to women, published in 1602, and his commentary on Torat Kohanim, published in 1862 at Vienna, are sufficient evidence of his untiring industry and remarkable intellect. Neither his codifications of law nor his commentaries are true examples of his strength. The title of "Baal Hasagot" (Critic), given him frequently by the rabbis, shows that they realized the direction in which his ability lay. Indeed, critical annotations display his powers at their best, and justify his being ranked with Alfasi, Rashi, and Maimonides.

It may, in addition, be safely asserted that Abraham ben David did even more for the study of the Talmud (which for so many centuries was for the Jews their only intellectual sphere) than the celebrated Spanish scholars. Without accusing Maimonides of intending to supplant the study of the Talmud itself by means of his compendium, the "Yad ha-Ḥazaḳah," it is nevertheless a fact that if Alfasi and Maimonides had not encountered such keen opposition, rabbinical Judaism would have degenerated into an exclusive study of the legal code, which would have been fatal to any original intellectual development in a considerable portion of the Jewish people. This danger was not so imminent for those Jews who lived in lands where Arabian culture ruled: for there the study of the Hebrew language and poetry, and especially of the sciences and philosophy, would always have afforded a wide field for intellectual development. It was, therefore, sufficient that the leading Jewish rabbis domiciled in Moorish countries should devote much attention to furnishing a clew to the labyrinth of the Talmud, intricate and perplexing as the latter had become by the addition of the copious post-Talmudic literature of law and custom. Some sort of guide had become imperatively necessary for the practical application of this voluminous and intricate material. But in Christian countries like France and Germany, where the largest communities of Jews existed, throughout the Middle Ages there was no such outlet for Jewish intellectuality as the culture of literature or of the sciences which existed in Moorish Spain. Their own religious law was the only field open to the intellects of the Jews of Germany and northern France.

Rashi and RABaD.

That the Jewish mind remained fresh and productive, in spite of the restrictions that hampered the people during the Middle Ages, is due mainly to the efforts of such men as Rashi and Abraham ben David, who utilized the Talmud as an arena in which they could exercise their intellect. In his commentary, Rashi furnished a smooth and well-paved road to the Talmud; while RABaD, by his acute criticism, pointed out the way intelligently and with discrimination. This critical tendency is characteristic of all the writings of RABaD. Thus, in his commentary upon Torat Kohanim (pp. 41*a*, 71*b*; compare also Harkavy's "Responsen der Geonim" in "Studien und Mittheilungen," iv. 164), we find the caustic observation that many obscure passages in rabbinical literature owe their obscurity to the fact that occasional explanatory or marginal notes not tending to elucidate the text have been incorporated.

Attitude as a Critic.

The real strength of RABaD is shown by his criticisms of the works of various authors. The tone which he employs is also characteristic of his attitude toward the persons under criticism. He treats Alfasi with the utmost respect, almost with humility, and refers to him as "the sun by whose brilliant rays our eyes are dazzled" ("Temim De'im," p. 22*a*). His language toward Zerahiah ha-Levi is harsh, almost hostile. Though only eighteen years old, this scholar possessed the courage and the ability to write a sharp criticism upon Alfasi, and RABaD refers to him as an immature youth who has the audacity to criticize his teacher. However, in fairness it must be stated that Zerahiah had himself provoked this treatment by sharply criticizing RABaD, and by incorporating into his own work some of RABaD's interpretations without acknowledgment to the author (compare Gross, *l.c.*, 545, and Reifmann, "Toledot," p. 54).

Maimonides and RABaD.

Abraham's criticism of the "Yad ha-Ḥazaḳah" of Maimonides is also very harsh. This, however, was not due to personal feeling, but to radical differences of view in matters of faith between the two greatest Talmudists of the twelfth century. Maimonides' aim was to bring order into the vast labyrinth of the Halakah by presenting final results in a definite, systematic, and methodical manner. But in the opinion of RABaD this very aim was the principal defect of the work. A legal code which did not state the sources and authorities from which its decisions were derived, and offered no proofs of the correctness of its statements, was, in the opinion of Abraham ben David, entirely unreliable, even in the practical religious life, for which purpose Maimonides designed it. Such a code, he considered, could be justified only if written by a man claiming infallibility—by one who could demand that his assertions be accepted without question. If it had been the intention of Maimonides to stem the further development of the study of the Talmud by reducing it to the form of a code, RABaD felt it his duty to oppose such an attempt, as contrary to the free spirit of rabbinical Judaism, which refuses to surrender blindly to authority.

Judaism a Religion of Deed, not of Dogma.

RABaD was thus an opponent to the codification of the Halakah; but he was even more strongly opposed to the construction of a system of dogmas in Judaism, particularly according to the method followed by Maimonides, who often set up the concepts of the Aristotelian philosophy as Jewish theology. Maimonides, for instance, in accordance with his philosophical conviction and in the true spirit of Judaism, declares the incorporeality of God to be a dogma of Judaism, or, as he formulates it, "whosoever conceives God to be a corporeal being is an apostate" ("Yad ha-Ḥazaḳah, Teshubah," iii. 7). In the circles with which RABaD was connected, a certain mystical anthropomorphistic conception of the Deity was usual; and therefore it was but natural that a statement which practically declared his best friends apostates should arouse his resentment. He, therefore, appended to Maimonides' formula this brief but emphatic criticism: "Why does he call such persons apostates? Men better and worthier than he have held this view, for which they believe they have found authority in the Scriptures and in a confusing view of the Haggadah." The phrase concerning the Haggadah shows that RABaD is himself far from advocating the anthropomorphistic view. His opposition to Maimonides' statement of the doctrine of the incorporeality of God is only directed against its being raised into a dogma. Judaism is to Abraham ben David a religion of deed, and not one of dogmas. His attitude toward the teachings of Maimonides in regard to the future life and the eternity of the world is in harmony with this point of view. According to him the opinion of Maimonides on this question was as distinctly heretical as the corporeality of God from the standpoint of Maimonides; yet he has no word of vituperation for its author, but merely contents himself with recording his difference of opinion (*l.c.* viii. 2, 8). Thus, the ultra-conservative Talmudist was broader-minded and more tolerant than the greatest of the medieval Jewish philosophers (compare Smolensky, "'Am 'Olam," chap. 13).

Abraham ben David is particularly severe on the attempts of Maimonides to smuggle in his philosophic views under cover of Talmudic passages. To cite one example: Sorcery, according to both Biblical and rabbinical law, is, under certain conditions, an offense punishable with death. The opinions in the Talmud on the various acts coming under the category of sorcery differ widely, owing, no doubt, to the fact that it was not practicable to look upon every superstitious practise, from which Talmudic Judaism itself was not entirely free, as a heinous offense. Maimonides, who, from the point of view of his philosophy, looks upon sorcery, astrology, augury, and the like as pure absurdities, decides that even the innocent actions which Scripture narrates of Eliezer (Gen. xxiv. 14), and of

Jonathan (I. Sam. xiv. 8-10) are to be considered as falling under the ban. Here RABaD is not content with merely correcting the statement of Maimonides, but he declares that, in his opinion, Maimonides deserves the ban for the calumnious views he expresses concerning these Biblical personages (Yad. 'Akum, xi. 4). This suffices to explain the principle that actuated Abraham ben David in his intense opposition to Maimonides, and particularly to his "Yad ha-Ḥazaḳah," which David himself designates as a great achievement (Kilayim, vi. 2). However, his criticisms are not merely bitter, but wonderfully skilful. They are seldom more than a few lines long; yet the defenders of Maimonides have written without success page after page of laborious reasoning in support of their master. Abraham's remarkable command of the entire Talmudic literature, his extraordinary acuteness of intellect, and his phenomenal critical powers are shown at their best in this criticism of "Yad ha-Ḥazaḳah"; and, as he wrote it only a few years before his death, and at an advanced age, it is all the more noteworthy.

The cabalists look upon Abraham ben David as one of the fathers of their system, and this is true to the extent that he was inclined to mysticism, which led him to follow an ascetic mode of life and gained for him the title of "the pious." He frequently spoke of "the holy spirit (or Elijah) disclosing to him God's secrets in his studies" (see his note to "Yad ha-Ḥazaḳah," Lulab, viii. 5; Bet ha-Beḥirah, vi. 11), great mysteries known only to the initated ("Yesode ha-Torah," i. 10). It may be asserted with confidence that RABaD was not an enemy to secular science, as many deem him. His works prove that he was a close student of Hebrew philology; and the fact that he encouraged the translation of Baḥya's "Ḥobot ha-Lebabot" (compare Gross, *l.c.* 1874, p. 165) proves that he was not hostile to philosophy. This philosophic work argues strongly against the anthropomorphistic conception of the Deity; and the favor with which Abraham ben David looked upon it is sufficient ground on which to acquit him of the charge of having held anthropomorphistic views. Moreover, his works show acquaintance with philosophy; for instance, his remark on "Hilkot Teshubah," v., end, is a literal quotation from Honein b. Isaac's "Musre ha-Philosophim," pp. 11, 12—or Loewenthal, p. 39, below—which is extant only in Alḥarizi's translation.

L. G.

ABRAHAM BEN DAVID PROVENÇAL: Italian Talmudist of the sixteenth century. He was a member of an illustrious family of Italian rabbis who came originally from Provence in the south of France. Abraham officiated as rabbi in Casale-Monferrato and in Mantua, Italy. Besides being a learned Talmudist, he possessed a thorough knowledge of Latin and philosophy. He taught Abraham Portaleone, and was a friend of Azariah dei Rossi, who refers to him as a storehouse of science. According to Michael ("Or ha-Ḥayyim." p. 31) he was still living in 1608. He wrote a preface to Elijah di Vidas' cabalistic work, "Reshit Ḥokmah," Venice, 1593.

D.

ABRAHAM DOB BAER BEN DAVID OF OVRUCH: Rabbi of Jitomir, Russia, about 1840. His Talmudic studies were pursued under Mordecai, rabbi of Chernobyl and a disciple of Israel Ba'al Shem (Besht). He wrote homilies upon the Pentateuch, called "Bet Ḥayyim" (House of Life) which treat the Scripture text according to the fourfold method of interpretation known as פרד"ס, that is, *perush* ("literal explanation"), *remez* ("allegorical"), *derush* ("homiletical"), *sod* ("mystical"). The work also contains inquiries concerning points of rabbinical law and responsa. The closing years of his life were passed at Safed, Palestine.

BIBLIOGRAPHY: Zedner, *Cat. Hebr. Books Brit. Mus.* p. 31.

S.

ABRAHAM DOB BAER BEN SOLOMON: Rabbi in Orsha in the latter half of the eighteenth century. He wrote באר אברהם ("Abraham's Well"), containing Glosses on the First Part of the Code Shulḥan 'Aruk, Yoreh De'ah, Shklov, 1783. D.

ABRAHAM BEN ELIEZER: Commentator (probably a contemporary of ELIJAH MIZRAḤI); lived in the fifteenth and sixteenth centuries, probably at Constantinople. He wrote a supercommentary on Rashi's Bible Commentary. Only a small fragment of it, covering the weekly portion "Mas'ey," has been published in Jacob Canizal's collectanea, a very rare collection of supercommentaries on Rashi (Steinschneider, "Cat. Bodl." No. 5515). Abraham died in 1525, at a very old age.

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, Nos. 47, 281.

L. G.

ABRAHAM BEN ELIEZER HA-KOHEN: Polish *darshan*, or preacher; flourished in the seventeenth and eighteenth centuries. He was the great-grandson of Issachar Baer, surnamed Baerman Ashkenazi, the commentator of the Rabbot. At Amsterdam, in 1673, he edited his grandfather's work, "Mareh Kohen," to which he added an introduction. Subsequently he was stricken with blindness. Forty years later, being then well advanced in years, he published his own work, "Ori we-Yish'i" (Berlin, 1714), containing a selection of his sermons, treating of repentance, prayer, and charity. The title of his work, "My Light and My Salvation," was suggested by the facts that he had regained his sight, and that he had had a fortunate escape from a dangerous fire.

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 50.

L. G.

ABRAHAM BEN ELIEZER HA-LEVI: German Talmudist; flourished in the second half of the thirteenth century. Probably he was a pupil of R. Meir of Rothenburg (died 1293), to whom he applied for decisions in difficult ritualistic cases. He also maintained a learned correspondence with his relative, Asher ben Jehiel (born 1250; died 1327), also a pupil of R. Meir, and did not interrupt it even when Asher emigrated to Spain in 1302.

ABRAHAM BEN ELIEZER HA-LEVI BERUKIM: A cabalistic writer; born before 1540; lived for a long time in Jerusalem, and died at an advanced age in 1600. A pupil of Moses Cordovero and Isaac Luria (died 1572), and a man of great piety and sincerity, Abraham, by his earnestness, won many people to a scrupulously religious life. His chief aim was to see the Sabbath observed as strictly as possible and to warn Israelites against its desecration. To this end he urged them to begin its celebration before sunset, and therefrom derived his title "Berukim" (The Sayer of Benedictions). His chief work is "Tiḳḳune Shabbat" (Ordinances of the Sabbath), cabalistic dissertations on the Sabbath, published together with "Ḳiẓẓur Menorat ha-Maor," Amsterdam, 1663, and "Reshit Ḥokmah ha-Ḳaẓer," Verona, 1600.

Other works written by him, but not published, are: (1) "Gale Razyya" (Revealer of Mysteries), on the transmigration of souls; (2) "Ẓirufim" (Alphabetical Combinations and Gematria); (3) "Ha-Beriah" (On Creation), two volumes on the Cabala of Isaac Ashkenazi (see Oppenheimer, "Catal." fol. 886; quarto 930, 1033, 1036, 1056). According to Azulai ("Shem ha-Gedolim") he actually saw the Shekinah, or glorious presence of God, at the Wall of Wailing ("Kotel Ma'arabi") of the Temple ruins.

Michael ascribes to him also the authorship of "Mashre Ḳiṭrin" (Untier of Knots), an apocalyptic work on the Messianic time. Michael also attributes to him the commentary on the Prophecy of Naḥman Ḳaṭofa; a journal of his wanderings as exile—"Sefer Migroshaw"; another cabalistic work, "Masoret ha-Ḥokmah"; a work on the duty of surrendering life during persecutions ("Megillat Amraphel"); "Ohel Mo'ed," on the Ten Sefirot; and "Sefer Zikkaron," a supercommentary to Rashi, but these are really the works of Abraham ha-Levi the Elder (ha-Zaḳen).

Bibliography: Benjacob, *Oẓar ha-Sefarim*, p. 670; Michael, *Or ha-Ḥayyim*, No. 153, who believes this Abraham to be identical with Abraham ha-Zaḳen.

ABRAHAM BEN ELIJAH. See Pikes, Abraham.

ABRAHAM BEN ELIJAH BRODA. See Broda, Abraham ben Elijah.

ABRAHAM BEN ELIJAH HA-KOHEN: German ritualist; flourished in the fifteenth century. His epitome of the precepts governing prohibited articles of food was printed for the first time in 1599, as an appendix to the Basel edition of Isaac Düren's "Sha'are Dura." The author did not address himself to scholars, but to the masses, whom he desired to instruct in a concise manner on the subject of forbidden food. A letter to the community of Halberstadt, which is inserted as an introduction to his epitome (p. 84), is an appeal to the members of that community to circulate the booklet among the people of the neighboring communities and to explain it in German to those who do not understand Hebrew.

Identical with this Abraham seems to be Abraham Cohen-Ẓedeḳ, who, according to a note in the responsa (No. 88) of Solomon Luria (died 1573), had put the Passover *dinim* into rime, in order to afford useful entertainment to those people who, according to ancient custom, spent the larger portion of the first two nights of the Passover in joyous devotions.

It is quite possible that he composed the above halakic poem at the request of the community of Halberstadt. The opinion of Michael, that this Abraham ben Elijah ha-Kohen is identical with the one mentioned by Maharil (R. Jacob ben Moses Mölln), must be rejected on chronological grounds; for this Abraham flourished later than Maharil, as may be seen from Luria (*l.c.*). Abraham ben Elijah ha-Kohen left some responsa in manuscript, which are now in the Bodleian Library, Oxford, England ("Cat. Bodl. Hebr. MSS." No. 820), and which furnish, at least approximately, the date of his life. The period of his activity could not have extended much beyond the year 1470.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 42; Zunz, *Z. G.* i. 161, 194; Neubauer, *Cat. Bodl. Hebr. MSS.* No. 820.

L. G.

ABRAHAM BEN ELIJAH OF WILNA: Russian Talmudist and author; born in Wilna about 1750; died there Dec. 14, 1808. The son of Elijah, the gaon of Wilna, a prominent Talmudist, he was educated under the supervision of his father, who was opposed to the fanciful mysticism of the Ḥasidim, as well as to the dry scholasticism which so absolutely dominated the rabbis of Poland at that time as to prevent the growth of all scientific interests. According to the custom of the time, he married at the age of twelve years, but continued his studies in the Talmudic colleges in other cities, and after a few years returned home, where he finished his studies under his father. It was due to his father's influence that he developed a literary activity of a far more scientific character than was usually found at that age or in that country. Especially interested in the history of the old homiletical literature, he edited the "Midrash Agadat Bereshit," with a number of other mostly pseudepigraphic works of similar character (Wilna, 1802), adding valuable notes. The best part of this edition is the preface, in which, for the first time so far as we know, an attempt was made to give a complete history of the midrashic literature. A plagiarist, Jacob ben Naphtali Herz, of Brody, reprinted this edition with the preface (Zolkiev, 1804), but was careful to omit the name of Elijah Gaon wherever the son had mentioned him. He omitted, also, on the title-page the mention of Abraham of Wilna's edition, referring only to the one which had been printed in Venice in 1618. Zunz, not knowing the real author, gave credit for the work to the plagiarist (Zunz, "G. V.," 2d ed. p. 268), and so did Zunz's critic, Getzel of Brody (ס' ראביה, p. 4, Budapest, 1837).

This introduction was only part of his greater work, "Rab Po'alim" (From Many Works), published by Simon Chones, Warsaw, 1894. This book is an alphabetical index of all Midrashim known to the author. It seems that Abraham of Wilna believed literally in the statement that the eighty concubines of King Solomon (Cant. R. vi. 8) meant eighty Midrashim. This is at least testified to by Samuel Luria in a letter to Simon Chones ("Rab Po'alim," p. 9). The book, however, contains over one hundred and twenty midrashic works. While Abraham of Wilna shows greater interest in literature and literary questions than is found among his contemporaries, he has no idea of the meaning of literary criticism. He ascribes the Zohar to Simeon ben Yoḥai, in spite of the many proofs against its authenticity produced by various writers since the time of Abraham Zacuto. He makes, however, the admission that the book was preserved for several generations by oral tradition. So he considered the Pirḳe R. Eliezer (a fanciful Midrash written about the middle of the ninth century) to be written by R. Eliezer ben Hyrcanus about 100. Still, in spite of its many shortcomings, the book is a very valuable one (even after Zunz has treated the same subject in his methodical manner), because the author has collected many valuable references from rabbinical literature.

Abraham's interest in secular knowledge, quite rare in his environment, is also manifest in the writing of a Hebrew geography, "Gebulot Ereẓ," published anonymously, Berlin, 1821. He edited Menahem Mendel's index to the Zohar, "Tamim Yahdaw," to which he added an introduction and notes, Wilna, 1808. Of his numerous manuscripts which contained glosses to the Talmud, Midrash, "Shulḥan 'Aruk," and explanatory notes to his father's works, a commentary on the introduction to the "Tiḳḳune Zohar" (Wilna, 1867), a commentary on Psalms i.–c.,

באר אברהם (Warsaw, 1887), "Sa'arat Eliyahu," exegetical notes and biographical data about his father (Jerusalem, 1889), and "Targum Abraham," notes on Targum Onkelos (Jerusalem, 1896), have been published. The last-mentioned were edited by his great-grandson Elijah, who calls himself Landau. Abraham of Wilna was very much interested in Talmudic philology and archeology; but while very industrious and well versed in rabbinical literature, he betrays a lack of secular knowledge.

Abraham Wilna, like his father, never officiated as rabbi, but was a highly respected member of the Jewish community of Wilna, in which he held various offices.

D.

ABRAHAM, ÉMILE: French playwright; born at Paris, 1833. He devoted himself entirely to the drama, as playwright, as theatrical critic, and as editor of "L'Entr'acte," the theatrical column of the "Petit Journal." Later he became general secretary of the Porte St. Martin and the Gymnase theaters. He is the author of a number of comedies and vaudevilles, among which may be mentioned: "Chapitre V." (1863); "Le Lorgnon de l'Amour" (1863); "Les Parents de Province" (1865), with Jules Prével; "L'Amour d'une Ingénue" (1866); "L'Avenue des Soupirs" (1866); "Nicaise" (1867); "Les Petits Crevés" (1868), with A. Flan and J. Prével; "La Clef Perdue" (1876); "La Charité Chrétienne" (1885).

Abraham also wrote a number of librettos for operettas, among which are: "L'Homme entre Deux Âges" (1862); "Un Drame en l'Air" (1865), with Adrien Marx and Cartier; "Le Train des Maris" (1868); "Les Croqueuses de Pommes" (1869), with Eugène Grangé; "La Cruche Cassée" (1870), with H. Lucas; "Les Flâneurs de Paris" (1876), with Eugène Grangé.

Under the pseudonym "Adrien Laroque," Abraham published a theatrical biographical annual, "Acteurs et Actrices de Paris."

ABRAHAM OF HAMBURG (called also **Rab Aberle**): Warden and leading spirit of the Ashkenazic community of London; born at Hamburg after 1650; died at London after 1721. By inducing the *shamas* (sexton) of the only Ashkenazic synagogue at that time surreptitiously to mutilate the *tallit*, or prayer-scarf, of the rabbi Judah Loeb ben Ephraim Anschel—in which condition he unwittingly used it—he forced Anschel to go, and installed Uri Phœbus in his place (1705). Abraham interfered not only in the affairs of the Ashkenazic, but also in those of the Sephardic community; for it was he who drew Ẓebi Ashkenazi's attention to an expression in a sermon of David Nieto's on Providence (1705) which savored of heresy. In this case Abraham failed to carry his point; and he was equally unsuccessful in trying to induce Ashkenazi to confirm a decree of excommunication against Mordecai Hamburger, who thereupon seceded and founded the Hambro' Synagogue. Later in life Abraham became involved in difficulties, owing to a lawsuit with his brother-in-law at Hamburg and to the conduct of his son, who dissipated at Paris the fortune Abraham had made at his trade as jeweler.

J.

ABRAHAM IBN HASSAN HA-LEVI: Author of a work on the six hundred and thirteen Biblical precepts, published as an appendix to the "first" rabbinic Bible (by Daniel Bomberg, Venice, 1517) under the title, "Commands and Prohibitions, by Rabbi Abraham Ibn Hassan ha-Levi." This work, originally written in Arabic, contained at first only a list of the Biblical precepts, arranged in the order of the weekly lessons, where they are recorded, and annotated with the corresponding references to Maimonides' "Yad ha Ḥazaḳah." Later, however, it was considerably enlarged by its Hebrew translator, Judah ben Shoshan or Shushan, who is otherwise unknown; he added to it corresponding passages from the Talmud and Sifre. Through this enlargement its original purpose of serving as a short educational guide was lost. The Hebrew text was published only once, but a Latin translation of it, made by the converted Polish Jew, Philip Ferdinand, was printed at Canterbury in 1597, and afterward reprinted by J. von Lenz in his "Theologia Judaica," in 1694. Ferdinand gives the name of the author as Abraham ben Kattani and the title of the book as "Ḳol Adonai." Upon what grounds he does so is not clear, since he himself refers to the Bomberg Bible as his source. In some manuscripts of Abraham's work he is more fully described as one coming from "Arnut in the land of Lanardu," which does not afford much help. Yet we may safely assume that the author came from a country where Arabic was generally spoken among the Jews; for only this language can be implied when Judah ben Shoshan describes himself as the translator of the work. This assumption finds strong support in the Arabic names Hassan and Shoshan, and renders improbable Neubauer's assertion that the work of Hassan is identical with the well-known law digest, "Sefer ha-Ḥinnuk," written originally in the rabbinic Hebrew idiom.

Bibliography: Steinschneider, *Cat. Bodl.* 4230, 5053; Neubauer, in *Monatsschrift*, 1877, xxi. 181, 182; idem, *Cat. Bodl. Hebr. MSS.* Nos. 73, 887, 2323, 2455.

L. G.

ABRAHAM BEN ḤAYYIM (called also **Abraham ben Ḥayyim ben Reuben** and **Abraham ben Ḥayyim ben Abraham ben Reuben**): Rabbi of Narbonne, where he lived in the first half of the thirteenth century. He was a brother of Reuben ben Ḥayyim, the pupil of Isaac ha-Kohen of Narbonne, and the teacher of Menahem Meïri. Abraham left his native place about 1240 and settled at Villefranche-de-Confluent, a small town in Roussillon, where his son, the philosopher Levi ben Abraham, author of "Liwyat Ḥen," was born. The son took an active part in the religious discussions that lasted from 1303 to 1306.

In the introduction to his work, "Bet ha-Beḥirah," Menahem Meiri refers to Abraham ben Ḥayyim in the highest terms, and names him among the most famous rabbis of Narbonne ("Rabbins Français," p. 543). Grätz ("Gesch. d. Juden," vi. 466) confounds him with Abraham ben Ḥayyim of Béziers, to whom Abraham ibn Ezra, while in that city in 1155, dedicated his "Sefer ha-Shem." He is, rather, to be identified with the poet Abraham ben Ḥayyim, the author of the four liturgical compositions (*ḳerobot*) embodied in the ritual used in the city of Carpentras, France, and which were recited on Sabbath Parah in the ancient Comtat-Venaissin. Indeed, one of these poems bears the acrostic of Abraham and another that of Abraham bar Ḥayyim.

Bibliography: Renan, *Les Rabbins Français*, p. 629; Zunz, *Literaturgesch.* p. 481; Gross, *Gallia Judaica*, p. 421.

S. K.

ABRAHAM ḤAYYIM BEN GEDALIAH: Galician Talmudist. He flourished early in the nineteenth century, was a disciple of the brothers Phinehas and Samuel Horowitz, and, like his teachers, is considered one of the most erudite of the Ḥasidim. He did not derive his Ḥasidic principles from these teachers, but directly from the *maggid* (preacher) of Mezhiritz, whose utterances he frequently quotes in his "Oraḥ la-Ḥayyim" (The Way to Life), Zolkiev, 1817. This work appeared posthumously and contains an introduction by R. Ephraim Solomon Margaliot.

Bibliography: Walden, *Shem ha-Gedolim he-Ḥadash*, p. 14; Benjacob, *Oẓar ha-Sefarim*, p. 49.

L. G.

ABRAHAM BEN ḤAYYIM LISKER. See Lisker, Abraham ben Ḥayyim.

ABRAHAM BEN ḤAYYIM BEN REMOK (רמוך): Spanish scholar; born in Barcelona about the middle of the fourteenth century. He wrote a commentary on the Psalms which is still extant in manuscript at Oxford (Bodleian, No. 326). Abraham ben Ḥayyim, the author of "Ẓiẓ ha-Zahab," a commentary on the Song of Songs and Ruth, is perhaps identical with Abraham ben Ḥayyim ben Remok. In the introduction to the commentary on the Psalms, the author gives a short autobiography, which throws some light on the conditions which prevailed at the time among the Jews in southern Europe. He was obliged to leave his native town on account of the persecutions that began about the end of June, 1348 (Grätz, "Gesch. d. Juden," vii. 363), and moved to Barbastro, Aragon, where he remained over thirty years—in fact, until 1391 (Grätz, *ib.* viii. 60 *et seq.*), in which year the persecution of the Jews began. His house was pillaged, his property destroyed, and he himself thrown into prison. However, he was liberated after having taken part in a public disputation (Tortosa, 1413 and 1414) between Jews and Christians. Jewish scholars were even forbidden to study the Law, and as Abraham states, "in those times they were not allowed to retain the Torah or the prayer-book, but had to deliver them up to the churches."

Bibliography: Steinschneider. *Hebr. Bibl.* ix. 111. xv. 109; *Jew. Quart. Rev.* xi. 612, where references are given to the pronunciation of the name *Remok*; Neubauer, *Cat. Bodl. Hebr. MSS.* Nos. 326 and 1151.

ABRAHAM DE HERRERA. See Herrera, Abraham de.

ABRAHAM BAR HILLEL: One of the few Hebrew poets in Egypt; lived in the second half of the twelfth century, and wrote the "Megillah Zuṭṭa" in elegant rimed prose, narrating an important episode of Jewish history in Egypt. As a prologue and an epilogue, he added poems which show their author to have been a skilful versifier. This work was completed in 1176. In view of the fact that there are very few literary remains of the Jews who dwelt in Egypt during the Middle Ages, these efforts of Abraham bar Hillel, which were only discovered in 1896 in the *genizah* of Cairo, have especial value.

Bibliography: Neubauer, in *Jew. Quart. Rev.* 1896, viii. 541–561; D. Kaufmann, *ibid.* 1897, ix. 168–172.

L. G.

ABRAHAM BAR ḤIYYA HA-NASI (called by non-Jews **Abraham Judæus,** and frequently **Savasorda,** which is a corruption of the Arabic *ṣaḥib al-shurṭah*—"governor of a city").—**As a Mathematician and Astronomer:** A celebrated Jewish mathematician, astronomer, and philosopher of the twelfth century. He lived in Barcelona in 1136. According to S. D. Luzzatto, there exists a manuscript, dated April 10, 1136, in which the scribe adds to the name Abraham bar Ḥiyya the formula for the dead, ז׳צ׳ל ("May the memory of the righteous be blessed"). From this it may be inferred that 1136 was the year of his death. Perhaps, further proof of this is afforded by the circumstance that the translator Plato of Tivoli, having completed the translation of the "Quadripartitum" of Ptolemy, October 20, 1138, does not mention Abraham bar Ḥiyya, although before that time Plato had availed himself of his services as interpreter. But some scholars think that the Magister Abraham who dictated "De Astrolabio" (probably at Toulouse) to Rudolph de Bruges (a work that the latter finished in 1143) was identical with Abraham bar Ḥiyya. As the title "Sephardi" (Spaniard) is always appended to his name, it is certain that he was Spanish. Nevertheless, he must have passed several years in southern France, as he composed some works for the Provençal Jews, in which he complains of their ignorance of mathematics. Steinschneider has proved that he was not a disciple of R. Moses ha-Darshan or the teacher of Ibn Ezra.

Original Works.

Abraham bar Ḥiyya, together with Abraham ibn Ezra, occupies an important place in the history of Jewish science. He was, indeed, one of the most important figures in the scientific movement which made the Jews of Provence, Spain, and Italy the intermediaries between Mohammedan science and the Christian world. He aided this movement not only by original works, but also by translations, and by acting as interpreter for another great translator, the celebrated Plato of Tivoli. Steinschneider has also shown that his original works were written in Hebrew and not, as some have thought, in Arabic. These original works are:

(1) יסודי התבונה ומגדל האמונה ("The Foundations of Understanding and the Tower of Faith"), an encyclopedic work, which is said to treat of arithmetic, geometry, optics, astronomy, and music. Unfortunately only a few short fragments of this work have been preserved (MSS. De Rossi Library, No. 1170; Berlin Library, No. 244; Munich Library, No. 36; and, under a false title, MSS. Bodleian, 1268, No. 7).

(2) חבור המשיחה והתשבורת ("Treatise on Geometry"), probably intended to be a part of the preceding work. This is the celebrated geometry

translated in 1116 (?) by Plato of Tivoli, under the title "Liber Embadorum" (see Boncompagni in "Atti dell' Accademia dei Lincei," 1851, iv. 275; "Hebr. Bibl." vii. 84; "Serapeum," 1858, p. 34; it was edited by Steinschneider in the "Publications of the Mekiẓe Nirdamim," 1895, vol. xi.).

(3) צורת הארץ ("Form of the Earth"), an astronomical work on the formation of the heavens and the earth, which was to have been followed by a second part on the course of the stars (see No. 4). A portion was translated into Latin by Sebastian Münster and by E. O. Schreckenfuchs. It appears also that complete translations into Latin and French were made (Steinschneider, "Abraham Judæus," 12). MS. 2033 in the Bodleian Library at Oxford contains a copy with a commentary, apparently by Ḥayyim Lisker.

(4) חשבון מהלכות הכוכבים ("Calculation of the Courses of the Stars"), the sequel to the preceding work, which is found sometimes in manuscripts with the notes of Abraham ibn Ezra (MS. 37 of Leyden, according to the catalogue of Steinschneider, p. 147; MS. 203 of Rome, "Bibl. Casanatense," according to the catalogue of Sacerdote).

(5) לוחות or לוחות הנשיא ("Tables" or "Tables of the Prince"), astronomical tables, called also "Tables of Al-Battani," because the author followed the Arabic astronomer of that name (see Battani). Several manuscripts of this work contain notes by Abraham ibn Ezra; and this fact has occasioned some confusion between the "Tables" of these two authors.

(6) ספר העבור ("Book of Intercalation"). This work was published in 1851, in London, by Filipowski. It is the oldest Hebrew work treating of the calculation of the calendar (see Calendar).

(7) הגיון הנפש ("Meditation of the Soul"), an ethical work upon a rationalistic religious basis. It was published in 1860 by Freimann, with a biography of the author (by the editor), a list of his works, and a learned introduction by Rapoport.

(8) מגלת המגלה ("Scroll of the Revealer"), a controversial work, in defense of the theory that the Messiah would appear in the year 5118 (1358; MS. Munich, 10^3, סוד הגאולה).

(9) An apologetic epistle addressed to Judah ben Barzilai al-Barzeloni.

Translations.

As has already been stated, Abraham bar Ḥiyya assisted a number of scholars in their translations of scientific works. But there is still a great deal of doubt as to the particulars. A number of Jewish translators named Abraham existed during the twelfth century; and it is not always possible to identify the one in question. It is only possible, therefore, to give the titles of the works thus translated, without touching upon the question of authorship, or inquiring into the language of the originals, as follows:

(10) "De Horarum Electionibus," the well-known treatise of Ali ben Aḥmad al-Imrani.

(11) "Capitula Centiloquium," astrological aphorisms.

(12) A commentary of Aḥmad ibn Yusuf on the "Centiloquium," attributed to Ptolemy.

(13) "De Astrolabio" of Rudolph de Bruges.

(14) "Liber Augmenti et Diminutionis," a treatise on mathematics; a manuscript in the Bibliothèque Nationale of Paris (7377 A).

G. S.

——**As a Moral Philosopher:** Abraham b. Ḥiyya or (as Rapoport in his introduction to the "Hegyon ha-Nefesh," p. 63, suggests) Ḥayya, so as to rime with Zakkaya, was a pioneer in his field of work. In the preface to his book, "Ẓurat ha-Areẓ" he modestly states that, because none of the scientific works such as exist in Arabic was accessible to his brethren in France, he felt called upon to compose books which, though containing no research of his own, would help to popularize knowledge among Hebrew readers. His Hebrew terminology, therefore, occasionally lacks the clearness and precision of later writers and translators.

As Moral Philosopher.

Not only as mathematician and astronomer, but also as moral philosopher, the author of the profoundly religious work, "Hegyon ha-Nefesh" (Meditation of the Soul) deserves special notice. In this field of philosophy he had also pioneer work to do; for, as is shown by Guttmann ("Monatsschrift," 1900, p. 195), in refutation of Kaufmann's assumption that the "Hegyon ha-Nefesh" was originally written in Arabic ("Z. D. M. G." xxx. 364; "Die Spuren Al-Baṭlajûsis," p. 28, and Bacher, "Die Bibelexegese der Jüdischen Religionsphilosophen des Mittelalters," p. 82), Abraham b. Ḥiyya had to wrestle with the difficulties of a language not yet adapted to philosophic terminology. Whether composed especially for the Days of Repentance, as Rapoport (*ibid.*) and Rosin ("Ethik des Maimonides," p. 15) think, or not, the object of the work was a practical, rather than a theoretical, one. It was to be a homily in four chapters on repentance based on the Hafṭarot of the Day of Atonement and Sabbath Shubah. In it, with the fervor of a holy preacher, he exhorts the reader to lead a life of purity and devotion. At the same time he does not hesitate to borrow ideas from non-Jewish philosophers; and he pays homage to the ancient sages of the heathen world who, without knowledge of the Torah, arrived at certain fundamental truths regarding the beginning of things, though in an imperfect way, because both the end and the divine source of wisdom remained hidden to them ("Hegyon," pp. 1, 2). In his opinion the non-Jew may attain to as high a degree of godliness as the Jew ("Hegyon," p. 8*a*).

Abraham b. Ḥiyya's philosophical system is like that of Gabirol and of the author of "Torot ha-Nefesh" (Reflections on the Soul), ed. Broydé, 1896—Neoplatonic as Plotinus has stated it: Matter, being void of all reality, requires form to give it existence. Now the union of these two by the will of God, which brings them from a state of potentiality into one of actuality, is creation, time itself being simultaneously produced with the created things. Both matter and form consist of two different elements. There is pure and there is impure matter. So also there is form too sublime to mingle with matter, such as that of the angelic or the upper world; and form which, being receptive and hollow, is susceptible to mixture with matter. The upper world, while gazing upon the lower and radiating its higher light, causes the mixture of matter with receptive form, the *tohu wa-bohu*; and out of pure matter the celestial bodies, and out of impure matter the four elements, were evolved. But while the first formed into an inseparable combination and the mix-

Matter and Form.

ture of the latter is one which constantly changes, a third form exists which mixes with matter for a certain time, to live again in a disembodied state after its separation; and this is the human soul. According to its wisdom—which makes it seek the upper world, the pure lasting form—or its folly—which makes it follow the impure matter of the perishable world below—the soul of man partakes of the nature of either the one or the other: but, his destination being to live forever like the angels, man has been appointed by God to be the ruler of all beings on earth; and in the same measure in which he fulfils or deviates from his destination, does he rise or fall in dignity above or below his fellow creatures. Says Abraham b. Ḥiyya, in common with Aristotle ("Ethics," vii. 11), and others: "Greater is he who has succeeded in training himself to abandon every thought of worldly passion and longs only for the service and adoration of the Most High, than he who has still to wrestle with the appetites of the flesh, though he overcome them in the end." For after all, says he with Plato ("Phædo," p. 64), the soul in this world of flesh is, as it were, imprisoned, while the animal soul craves for worldly pleasures, and experiences pain in foregoing them. Still, only the sensual man requires corrections of the flesh to liberate the soul from its bondage; the truly pious need not, or rather should not, undergo fasting or other forms of asceticism except such as the law has prescribed ("Hegyon," p. 16*a*). But, precisely as man has been set apart among his fellow creatures as God's servant, so Israel is separate from the nations ("Hegyon," p. 7), the same three terms (*bara, yaẓar, 'asah*) being used by the prophet for Israel's creation (Isa. xliii. 7) as for that of man in Genesis.

Three Classes of Pious Men.

Like Baḥya ("Ḥobot ha-Lebabot," ix. 3) Abraham b. Ḥiyya distinguishes three classes of pious men: (1) such as lead a life altogether apart from worldly pursuits and devoted only to God ("these are but few in number and may in their sovereignty over the world be regarded as one individuality"; Alfarabi, "Model State"; see Guttmann, *ib.* p. 212, note); (2) such as take part in the world's affairs, but are, as regards their conduct, ruled only by the divine laws and statutes without concerning themselves with the rest of men (these form the "holy congregation" or the "faithful city"); and (3) such as lead righteous lives, but take care also that the wrong done outside of their sphere is punished and the good of all the people promoted (these form the "kingdom of justice" or the "righteous nation"). In accordance with these three classes of servants of God, he finds the laws of the Torah to be divided into three groups: (1) The Decalogue, containing the fundamental laws with especial reference to the God-devoted man who, like Moses, lives solely in the service of God (the singular being used because only Moses or the one who emulates him is addressed). The first of the Ten Commandments, which he considers merely as an introductory word, accentuates the divine origin and the eternal goal of the Law; the other nine present the various laws in relation to God, to domestic life, and to society at large. Each of these three classes again refers either to the heart or sentiment, to the speech or to the action of man. (2) The group of laws contained in the second, third, and fourth books of Moses, intended for the people of Israel during their wandering in the desert or during the Exile, to render them a holy congregation relying solely upon the special protection of God without resorting to warfare. (3) The Deuteronomic legislation intended for the people living in an agricultural state and forming a "kingdom of justice." However, in the time of the Messianic redemption, when the evil spirit shall have vanished altogether, when the sensual man shall have become a spiritual one, and the passions that created hatred and strife shall have given way to love of man and to faithful obedience to the will of God, no other laws than those given to the God-devoted one in the Decalogue—the law written upon the heart of man—will be necessary. Men, imbued solely with love for their fellows, free from sin, will rise to the standard of the God-devoted man, and, like him, share in the eternal bliss of God. Against Rapoport, Guttmann has shown ("Monatsschrift," p. 201, note 2) that Naḥmanides read and used the "Hegyon ha-Nefesh," though occasionally differing from it; but while Saadia is elsewhere quoted by Abraham b. Ḥiyya, he never refers to him in "Hegyon" (Guttmann, in "Monatsschrift," pp. 199, 200). Characteristic of the age is the fact that while Abraham b. Ḥiyya contended against every superstition, against the *teḳufah* ("Sefer ha-'Ibbur," p. 8), against prayers for the dead ("Hegyon," p. 32*a*), and similar practises (*ib.* p. 40*a*), he was, nevertheless, like Ibn Ezra, a firm believer in astrology. In his "Megillat ha-Megalleh" he calculated from Scripture the exact time for the advent of the Messiah to be the year of the world 5118 (see "Ben Chananja," 1869, iv. 7, 8). He wrote also a work on redemption, from which Isaac Abravanel appropriated many ideas. It is in defense of Judaism against Christian arguments, and also discusses Mohammed, "the Insane"; announcing the downfall of Islam, according to astrological calculation, for the year 4946 A.M.

Bibliography: Steinschneider, *Z. D. M. G.* 1876, p. 633; idem, *Hebr. Bibl.* 1861, iv. 108-109 (where Rapoport's reading of the name "Ḥayyah," instead of "Ḥiyyah," is adopted): 1876, xvi. 90 (where the name "Albargeloni" is declared to be a pure invention). See also Brüll's *Jahrb.* ii. 189.

J. G.—K.

ABRAHAM BEN ISAAC AUERBACH: Liturgical poet of the seventeenth century; born at Kosfeld and became rabbi at Münster. During a visit to Amsterdam in 1675, he was made acquainted with an attempt by a clergyman, named Christopher Bernard, to asperse the Jews, who triumphantly disproved the charges. Abraham ben Isaac composed a number of *seliḥot* (penitential hymns) and *pizmonim* (triumphant odes), the former while the danger was impending, the latter when it was past. These were printed by Joseph Athias at Amsterdam in 1677, in a brochure which has become very rare and which is distinguished by the number of rabbinical authorities who expressed their approbation of Auerbach's poetical efforts. Both the past and present rabbis of the German congregation of Amsterdam, Isaac Aboab, the ḥakam of the Portuguese congregation, besides rabbis and rabbinical assessors of Posen, are included among the signatories of the *haskamah* (approbation).

J.

ABRAHAM BEN ISAAC BEDARESI. See Bedaresi, Abraham ben Isaac.

ABRAHAM BEN ISAAC OF GRANADA: Cabalist of the thirteenth century. He wrote: (1) A work on the Cabala, under the title of "Sefer ha-Berit." This is quoted by Moses Botarel in the introduction to his commentary on the "Sefer Yeẓirah," which passage contains a reference to Maimonides' "Moreh." (2) Another work on the Cabala, under the title "Berit Menuḥah," valued highly by Isaac Luria for its profound comments. Its language, as well as the manner in which Simon ben Yoḥai is introduced as speaker, shows striking resemblance to the Zohar, and it may be that the author had a larger version of the Zohar before him than is now extant. (3) A work entitled "Megalle ha-Ta'alumot," quoted by the author in the work previously mentioned.

K.—J. L. S.

ABRAHAM BEN ISAAC ḤAYYOT: Commentator; lived in the seventeenth century. He is the author of "Holek Tamim" (He Who Walks Perfect), explaining the laws of the Pentateuch after the fourfold method of interpretation known as פרד"ס; that is, *perush* ("literal explanation"), *remez* ("allegorical"), *derush* ("homiletical"), and *sod* ("mystical") (Cracow, 1634).

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 14.

M. B.

ABRAHAM BEN ISAAC BEN JEHIEL OF PISA: Grandson of the famous philanthropist, JEHIEL OF PISA, whose charity did much to alleviate the sufferings of the Spanish exiles in 1492. Abraham was a worthy member of that distinguished family. He died, according to the report of Gedaliah ibn Yaḥyah, in 1654, in the prime of manhood. Michael is mistaken in thinking him to be identical with that Abraham ben Isaac of Pisa from whose pen a responsum exists in the collection of Menahem Azariah da Fano, who died in 1620.

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 144.

D.

ABRAHAM BEN ISAAC HA-KOHEN: A hymn-writer who flourished in Germany about 1096; probably the son of Isaac ben Eleazar ha-Kohen, who lived in Mentz in 1093. He is the author of several liturgical works, in one of which reference is made to the cruelties perpetrated upon the Jews by the crusaders. He composed several *yoẓerot* for Sabbath Ḥanukkah, in one of which the story of Judith and Holofernes is repeated.

BIBLIOGRAPHY: Zunz, *Litteraturgesch.* p. 153.

J. C.

ABRAHAM BEN ISAAC HA-LEVI: A Spanish Talmudist and author; born at Barcelona in the early part of the fourteenth century; died at Narbonne in October, 1393. He was a religious poet and leader of the Jewish community in Gerona (Catalonia), and is praised not only for his deep Talmudic knowledge, but more especially for the disinterested manner in which he performed his functions. It is probable that he left Gerona at the time of the terrible persecution of 1391 and settled in Narbonne. A poem for the Passover service and four poetical lamentations from his pen are preserved in manuscript. In 1394, Profiat Duran wrote a memorial notice of Abraham (printed in "Ma'aseh Efod," edited by Friedländer and Kohn, Vienna, 1865, p. 191). A letter exists in manuscript, addressed by Moses Vidal ha-Levi to Abraham Isaac ha-Levi, identified by Neubauer with the subject of this article.

G.

ABRAHAM BEN ISAAC IBN MIGAS. See IBN MIGAS, ABRAHAM BEN ISAAC.

ABRAHAM B. ISAAC OF NARBONNE (commonly called **RABaD II.** from the initial letters of his official designation "ab bet din" = chief judge). Distinguished Talmudist of Languedoc: born probably at Montpellier about 1110; died at Narbonne, 1179. His teacher was Moses b. Joseph b. Merwan ha-Levi, and during the latter's lifetime RABaD II. was appointed president of the rabbinical board of Narbonne—composed of nine members—and was made principal of the rabbinical academy. In the latter capacity he taught two of the greatest Talmudists of Provence—namely, Abraham b. David III., who afterward became his son-in-law, and Zerahiah ha-Levi.

Ha-Eshkol.

Like most of the Provençal scholars, RABaD II. was a diligent author, composing numerous commentaries upon the Talmud, all of which, however, have been lost with the exception of that upon the treatise Baba Batra, of which a manuscript has been preserved in Munich. Numerous quotations from these commentaries are to be found in the writings of Zerahiah Gerondi, Naḥmanides, Nissim Gerondi, and others. Many of his explanations of Talmudical passages are also repeated in his responsa which give his method of treatment. In Abraham's comments on the Talmud he seems to have taken Rashi as his model; for they are marked by the same precision and clearness of exposition. An idea of this writer's Talmudical knowledge may be gathered from his book "Ha-Eshkol" (three parts of which were published by M. Auerbach, Halberstadt, 1867–68). This work, the fourth part of which exists in manuscript in the library of the Alliance Israélite of Paris, was modeled after the well-known work of Alfasi, and was the first important attempt at a legal code made by the French Jews. It can not, however, be said to equal Alfasi's work either in originality or in depth, but it contained some noteworthy improvements upon its model, such as the arrangement of its contents according to subject-matter, which greatly facilitated its practical use. RABaD II. also drew upon the Jerusalem Talmud and the gaonic literature much more fully than Alfasi, and treated at much greater length many subjects which were only briefly considered by the latter. His depth and acumen, however, are shown to much better advantage in his responsa, quoted in the collection "Temim De'im" (part iv. of "Tummat Yesharim," by Benjamin Motal, Venice, 1622), and in the "Sefer ha-Terumot" of Samuel Sardi. Other responsa sent to Joseph ben Ḥen (Graziano) of Barcelona and Meshullam ben Jacob of Lunel are found in a manuscript belonging to Baron de Günzburg in St. Petersburg. As an acknowledged rabbinical authority and president of the rabbinical board, he was frequently called upon to give his decision on difficult questions: and his answers show that he was not only a lucid exegete, but also a logical thinker.

Though he lacked originality Abraham's influence upon Talmudical study in Provence ought not to be underrated. Languedoc formed politically a connecting link between Spain and northern France; in like manner Jewish scholars played the rôle of intermediaries between the Jews of these countries. Abraham b. Isaac represented this function; he was the intermediary between the dialectics employed by the tosafists of France and the systematic science of the Spanish rabbis. The French-Italian codifiers—Aaron ha-Kohen of Lunel, Zedekiah b. Abraham, and many others—took Abraham b. Isaac's "Ha-Eshkol" for their model; and it was not until the appearance of the "Ṭur," written by Jacob b. Asher, a German Jew resident in Spain, that "Ha Eshkol" lost its importance and sank into comparative oblivion. The school founded by Abraham b. Isaac, as exemplified in RABaD III. and Zerahiah ha-Levi, was nevertheless the creator of a system of Talmudic criticism;

and the method it employed was in fact no other than the tosafist dialectic modified and simplified by Spanish-Jewish logic.

ABRAHAM JESOFOVICH: Secretary of the treasury of Lithuania under King Sigismund I. of Poland; born in the middle of the fifteenth century; died at Brest-Litovsk, 1519. When Alexander Jagellon expelled the Jews from Lithuania in 1495 (from which banishment they returned in 1503), the most prominent Jews of the principality were the three brothers Jesofovich of Brest: Abraham, Michael, and Isaac. Abraham was then assessor of Kovno, and as soon as the edict for the banishment of the Jews was issued, he went to Wilna to return the accounts of the district which had been entrusted to him. He probably emigrated to Poland with the rest of his coreligionists, but returned and embraced Christianity. This so pleased Alexander that he elevated him to the rank of nobility, giving him the supplementary name "Jastrzhembetz." In 1506, when Abraham farmed the revenue of the customs of Kovno, he held the titles of alderman of Smolensk and prefect of Minsk, and the king presented him with the estate of Voidung. When King Sigismund I. ascended the throne in 1506, he confirmed the titles and gifts granted Abraham by Alexander and farmed out to him many other taxes, together with the mint of Lithuania. Abraham stood high in the royal favor, and in 1509 Sigismund I. granted him the estates and manorial rights of Grinkov and two estates in the district of Troki. In 1510 Abraham was appointed secretary of the treasury of Lithuania, which position he held until his death. His brothers Michael and Isaac did not change their religion. Nevertheless, they were always on good terms with their brother. Probably owing to Abraham's influence, Michael was appointed "senior" of all the Lithuanian Jews, with the power of jurisdiction over them.

The will of Abraham, dated at Brest-Litovsk, September 25, 1519, bears among other signatures the names of his brothers Michael and Isaac. Through the influence of Duke Albert of Prussia and "in memory of the services of the late Abraham Jesofovich," etc., the king in 1525 raised the Jew Michael Jesofovich to the rank of nobility. He died about 1530. Many of the descendants of Abraham Jesofovich held high positions in Lithuania. Thus, in the eighteenth century, a certain senator, Andrei Abramovich, was castellan of Brest-Litovsk (1757-63).

ABRAHAM (JACOB JOSEPH) BEN JOEL ASHKENAZI KATZENELLENBOGEN. See Katzenellenbogen, Abraham.

ABRAHAM BEN JOSEPH HA-LEVI, OF CRACOW: Polish commentator, born at Cracow about 1620; died, probably in Hamburg, about 1670, or at least some time after 1659. In consequence of the persecution of the Jews of Poland by the Cossacks in 1656 he fled from his native city and sought asylum in Hamburg. Here he produced a commentary upon Megillat Ta'anit, which was printed at Amsterdam, in 1659, and went through several editions. His work, however, was not favorably received by his contemporaries, for both Ephraim Cohen, author of "Sha'ar Ephraim," a collection of rabbinical decisions, and Abraham Gombiner, author of "Magen Abraham," refer to him somewhat disparagingly.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 124.

L. G.

ABRAHAM BEN JOSEPH OF ORLEANS: French Talmudist; lived at Orleans, and perhaps at London, in the twelfth century. He belongs to the older tosafists, and his interpretations of the Talmud are quoted several times in the Tosafot. He is mentioned as the father of three daughters. He was the father-in-law of Judah ben Isaac, of Paris, surnamed Sir Leon (1166-1224), and therefore a contemporary of Rabbenu Tam of Rameru, the head of the tosafistic school in the middle of the twelfth century. It has been suggested by Jacobs that he is identical with the Abraham fil Rabbi Joce, mentioned in the English records of the twelfth century.

Bibliography: Zunz, *Z. G.* p. 47; Jacobs, *Jews of Angevin England*, pp. 409, 417; Gross, *Gallia Judaica*, p. 57.

L. G.

ABRAHAM BEN JOSEPH SOLOMON HA-ḤAZAN: Karaite rabbi at Koslov, now Eupatoria, Crimea, in the first half of the nineteenth century. His father, Joseph Solomon, whom he succeeded in the rabbinate, instructed him in the literature and science of the Karaites. He is the author of six Hebrew poems, which are found in the "Karaite Liturgy" (Vienna ed., pp. 168 *et seq.*). In a poem, composed in honor of Simḥa Bobowich, who was head of the Koslov community—which poem is also incorporated in the "Liturgy" (p. 187)—he calls himself, from the initials of his father's name, Ibn Yashar.

Bibliography: Fürst, *Gesch. d. Karäert.* iii. 138; Gottlober, *Biḳḳoret le-Toledot ha-Ḳaraim*, p. 151.

I. Br.

ABRAHAM JOSHUA HOESHL: Rabbi at Kolbushowa, and later at Miedzyboz, Poland; lived in the beginning of the nineteenth century. He wrote two commentaries on the Pentateuch: "Torat Emet" (The Teaching of the Truth) and "Oheb Yisrael" (The Lover of Israel). In both works Abraham gives four different explanations of the Scripture: the literal, the homiletic, the allegoric, and the mystic.

Bibliography: Walden, *Shem ha-Gedolim he-Ḥadash*, p. 13.

I. B.

ABRAHAM BEN JOSIAH OF JERUSALEM: A Karaite author, who flourished in the first half of the eighteenth century. He went from Palestine to the Crimea, where, in 1712, he finished "Emunah Omen," a work on Karaite theology, edited by Jacob ben Abraham Firkovitch, Eupatoria, 1846. He treats of divinity and the immutability of the Law, on the main issues between Karaite and Rabbinite doctrines, and on the relations of science to religion. Without exhibiting any originality of thought, the work is remarkable as displaying the thorough familiarity of the author with the entire rabbinical literature; it shows also the high esteem in which he held such authorities as Maimonides and Ibn Ezra. In 1715, under the pseudonym Abraham Kalai (after the town in which he resided at the time), he wrote, under the title שאול שאל ("Shaol Shaal"), a work on the rules for the slaughtering of animals, a favorite Karaitic subject. Jost's doubts as to his identity with Abraham Yerushalmi were dispelled by Gottlober, "Biḳḳoret le-Toledot ha-Ḳaraim," p. 151.

K.

ABRAHAM BEN JOSIAH HA-ROFE: A Karaitic scholar and physician, born in Troki, a town near Wilna, in Lithuania, about 1636; died there in 1688. He was one of the leading scholars of his time, and, according to Karaitic tradition, a disciple of Joseph Solomon Delmedigo. In his later years he was appointed physician in ordinary to King John Sobieski (1674–96). He wrote a number of works on medicine and natural science, which, however, were never printed.

S. M. D.

ABRAHAM JUDÆUS. See Abraham ibn Ezra.

ABRAHAM JUDÆUS MEDICUS. See Abraham ben Shem-Ṭob.

ABRAHAM BEN JUDAH: Flourished in the thirteenth century at Barcelona, Spain. According to De Rossi ("Dizzionario," p. 237) there is, among the manuscripts of the Vatican library, an unpublished philosophical work by him, in four parts, called "Arba'ah Ṭurim" (The Four Rows), which treats of God's existence, of divine providence, of the reasons for the Mosaic laws, and of the purpose of the Jewish prayers.

M. K.

ABRAHAM BEN JUDAH: A physician who wrote in Hebrew a medical work, "Mareot ha-Shetanim" (Aspects of the Urine); date of birth and death unknown. According to a statement in the introduction, the author intended his work to be a guide for young practitioners and a reference book for laymen. He promised, also, to make a compilation on this same subject, drawn from the writings of the best authorities. It is not unlikely that his book is only an extract from the work on urine written by Isaac Israeli, who died about 950.

Bibliography: Steinschneider, *Hebr. Uebers.* p. 759.

ABRAHAM BEN JUDAH BERLIN: German rabbi; died at Amsterdam March 13, 1730; son of the famous court Jew, Jost Liebman, and disciple of Isaiah Horowitz, the second of that name at Posen. He was rabbi in Halberstadt in 1692 (Auerbach, "Geschichte der Israelitischen Gemeinde Halberstadt," 1866, p. 331), and in 1715 or 1717 he was called to Amsterdam, where until his death he officiated as rabbi and preacher. He left no work behind him, and, judging from his contributions to the works of others, he does not appear to have possessed any originality, as shown by the responsa אבן השהם by Eliakim Goetz, rabbi of Hildesheim, No. 56 (Dyhernfurth, 1733), and also by Abraham's scholastic notes on the Talmud, found in the collection קול יהודה of Judah Loeb ben Ḥanina Selig of Glogau, Amsterdam, 1729; reprinted various times, and lastly at Lublin, 1897.

ABRAHAM BEN JUDAH DE BOTON. See Boton, Abraham ben Judah de.

ABRAHAM BEN JUDAH EBERLEN. See Eberlen, Abraham ben Judah.

ABRAHAM BEN JUDAH ELIMELECH (ALMALIK): A cabalistic writer who lived at Pesaro (Italy) about the end of the fifteenth century and was probably a Spanish exile. He wrote a book entitled "Liḳḳute Shikḥah u-Peah" (Gleanings), a cabalistic commentary on haggadic portions of the Talmud. In its preface the author gives some detail of his life. It was published, together with Joseph ben Ḥayyim's commentary on the Ten Sefirot, and Joseph Giquitilla's treatise on cabalistic subjects, Ferrara, 1556.

Bibliography: Michael, *Or ha-Ḥayyim*, No. 106; Benjacob, *Oẓar ha-Sefarim*, No. 310, p. 267.

ABRAHAM OF LERIDA: Physician, surgeon, and astrologer. All that is known of him is that, on September 12, 1468, he couched a cataract in the right eye of King John II. of Aragon, and afterward was equally successful with the left eye.

Bibliography: Kayserling, *Gesch. der Juden in Portugal*, p. 88, note 2.

M. K.

ABRAHAM HA-LEVI. See Abraham ben Isaac Ẓemaḥ ha-Levi.

ABRAHAM HA-LEVI: Tosafist, not yet fully identified. In "Pisḳe Tosafot" an Abraham ha-Levi is quoted who is not known otherwise than under this name. However, it is probable that he was identical with one of the many German or French tosafists of the name of Abraham, as the addition "ha-Levi" may have been dropped for convenience. He is possibly identical with Abraham ben Baruch, brother of Meir (ha-Levi) of Rothenburg, who flourished about 1225–93, and was the author of a work which still exists in manuscript.

Bibliography: Zunz, *Zur Geschichte und Literatur*, pp. 47, 48, 60, 162.

L. G.

ABRAHAM HA-LEVI BEN ELIEZER HA-ZAḲEN (the Elder): Spanish exile in Palestine, author and cabalist of the early part of the sixteenth century. He was brother-in-law of Abraham Zacuto, the author of the "Yuḥasin." On being exiled from Spain, 1492, he lived for a brief period in Egypt and Constantinople. Subsequently he went to Jerusalem and Safed, where he studied the Cabala. At Jerusalem he was admitted to the school of Samuel Misod of Safed and Jacob ben Mani. In a letter sent by the bet din to a philanthropist, his name stands at the head, showing that he was the ab bet din. Later he was appointed head of the school of David ben Susan.

His courageous attitude is manifested in the responsum to Isaac Sholal—at that time *nagid* of Egypt —on the question whether it is allowable to pray to the angels. Therein he strongly opposes those cabalists who, as he says, "while leaving the path of righteousness to go into the paths of darkness, serve idols, but not the Lord God." Of certain old customs, he says: "These are not usages, but . . . Pay no attention to what is found in treatises written by unknown men; for many falsifications are found in them." On inquiries into dreams, which often occupy the attention of the cabalists, based upon I Sam. xxviii. 6, 15, he says: "Deep thought and exaggerated imagination suggest to you sometimes a Bible passage, in which the anxious mind accidentally finds an answer."

He wrote a commentary on the little book called "Nebuot ha-Yeled" (The Prophecy of the Child), attributed to an imaginary person named Naḥman Katofa and said to have been found in the ruins of the city of Tiberias, written on old parchment and hidden in an earthen jar. The meaning of this manuscript was very obscure. The commentary was published in 1516. Abraham is also the author of "Mashre Ḳiṭrin" (The Untier of Knots), Constantinople, 1510, a commentary on the seventy weeks of Daniel's prophecy (Dan. ix. 24–27), a subject treated also in "Nebuot ha-Yeled." According to Abraham's explanation, the year of redemption should have been 1530. He also wrote "Tiḳḳune Shabbat," mystical reflections on the Sabbath ritual, which went through several editions in Venice, Amsterdam, Basel, Wandsbeck, Cracow, Frankfort-on-the-Oder, Zolkiev, etc.; "Masoret ha-Ḥokmah," on the Ten Sefirot, and "Megillat Amraphel" on the merits of an ascetic life. See Abraham ben Eliezer ha-Levi Berukim, with whom he has sometimes been confounded.

ABRAHAM HA-LEVI SHIMSHUNI OF PRAGUE. See Shimshuni, Abraham ha-Levi, of Prague.

ABRAHAM LICHTSTEIN. See Lichtstein, Abraham.

ABRAHAM OF LUNEL: A celebrated French philologist of the sixteenth century, who is said to have mastered twenty languages. He embraced Christianity, and about 1537 was made professor of Hebrew at Avignon. As he grew older, however, love for his old faith revived in him, and being unable to conceal his true sentiments, he was accused of being a Jew in secret, and in 1593 was deprived of his office. To avoid a worse fate he fled to Venice, where he openly returned to Judaism.

ABRAHAM (ABULMENI) MAIMUNI I. See Maimon, Abraham ben Moses.

ABRAHAM MAIMUNI II. See Maimuni II., Abraham.

ABRAHAM MALAK, or HA-MALAK: Russian rabbi; only son of Dob Baer of Mezhirich, who was the first leader of the South Russian Ḥasidim; follower of Ba'al Shem-Ṭob, and son-in-law of Meshullam Phœbus of Kremenetz; died, while comparatively young, at Fastov, a village in the government of Kiev, about 1780. He was educated in the principles of the Ḥasidim and the Cabala, but on account of his retiring habits and his unpractical nature did not succeed his father as head of the sect. He withdrew after Rabbi Baer's death to the village of Hannipol, where he led the life of a hermit, admitting into his presence only a few *ẓaddiḳim* ("pious men"), among whom were Zalman of Lyady, his friend and schoolmate, and Nahum of Chernobyl. Nahum procured for Abraham the position of preacher at Fastov, where, until his death, he continued his secluded, introspective mode of life. It was on account of his pious seclusion from the world and of his strict observance of Ḥasidic ordinances that the epithet Malak ("Angel") was given to him. His son was Shalom of Pogrebish.

Abraham's commentary on the Pentateuch, which, combined with that of his friend Abraham ha-Kohen Kalishker, was published under the title "Ḥesed le-Abraham," long after his death, by his grandson, Israel of Rozenoi (Czernowitz, 1851; Warsaw, 1883), is partly cabalistic in character, and partly historical, and contains many passages reproving the degenerate Ḥasidim of his generation. Two passages are characteristic as to the personality and standpoint of the author. In the preface he complains that whereas wisdom (Cabala) represents the purest religious metaphysics, it had become obscured by a grossly materialistic conception, as was also the case with the sublime teachings of true Ḥasidism. "This is the protest of a noble soul against the commencing degradation of Ḥasidism," says Dubnov, "against the irreverent and intemperate degradation of the worship of God and the crude idolatry which manifests itself in the cult of the ẓaddiḳim." In another place Abraham describes the ideal ẓaddiḳ, and it is an echo from his own soul when he mourns that "this generation can not comprehend the great mission of such a one. Like Saul of old, he is taller than his contemporaries, and so absorbed in the meditation of divine wisdom that he can not descend to the lower steps upon which ordinary people stand."

H. R.

ABRAHAM MALAKI: A poet who flourished at Carpentras, near Avignon, about the end of the thirteenth century. In his poem, "The Flaming Sword," Abraham Bedarshi recognizes his poetic talent. Zunz ("Literaturgesch." p. 500) mentions a liturgical poet of the name of Abraham of Carpentras. He identifies him with Abraham ben Isaac, surnamed Don Abraham of Montpellier, one of the partizans of the anti-Maimonist Abba Mari of Lunel, and thinks he is the author of the introduction to Ibn Gabirol's "Azharot," which were recited on the first and second nights of Shabu'ot (Pentecost) in the communities of the ancient county of Venaissin, and are still in the Sephardic liturgy. Gross, however, with more reason, attributes this poem to Abraham Malaki, who is called by some Abraham the Old, and by others simply Abraham ("Gallia Judaica," p. 607). The unfortunate poet Isaac ben Abraham Gorni, who was at Carpentras at the same time, speaks of Abraham Malaki in the highest terms. "Abraham," he said, "will intervene in favor of the sinners of Sodom [Carpentras], where there are not ten righteous."

Bibliography: Extract from Gorni's *Divan*, in *Monatsschrift*, 1882, p. 512; Zunz, *Literaturgesch.* p. 500; Gross, *Gallia Judaica*, p. 607.

ABRAHAM MINZ. See Minz, Abraham.

ABRAHAM THE MONK: A Palestinian friar who lived in a monastery on Mount Sinai. He was born about the close of the sixth century, and became a convert to Judaism about 615. As a Christian, he spent his life in penance and prayer. Doubts as to the Christian dogma grew in his mind, and, after a prolonged struggle, he deserted his cell in the monastery on Sinai and wandered through the desert into Palestine, finally reaching Tiberias. Here he submitted to circumcision and became a Jew, receiving the name Abraham, by which he was subsequently known.

Bibliography: *Bibliotheca Patrum*, ed. Leyden, xii. 265; Grätz, *Gesch. d. Juden*, v. 26, 388.

ABRAHAM BEN MORDECAI FARISSOL. See Farissol, Abraham ben Mordecai.

ABRAHAM BEN MORDECAI GALANTE. See Galante, Abraham ben Mordecai.

ABRAHAM BEN MORDECAI HA-LEVI: An Egyptian rabbi of the end of the seventeenth century. In 1691 he edited at Venice his father's responsa, "Darke No'am," adding a treatise of his own on circumcision, which, however, met with a great deal of opposition from contemporary rabbis. Abraham's own collection of responsa, "Ginnat Weradim" (Garden of Roses), arranged in the same order as the four "Ṭurim," and his treatise on divorce, "Yaïr Netib" (Illuminator of the Path), were published at Constantinople in 1716–18, by his son-in-law Ḥayyim ben Moses Tavila, physician in ordinary to the sultan.

Bibliography: Azulai, *Shem ha-Gedolim*, s.v.; Benjacob, *Oẓar ha-Sefarim*, pp. 99, 212.

W. B.

ABRAHAM MORPURGO. See Morpurgo, Abraham.

ABRAHAM BEN MOSES (SCHEDEL): Printer and corrector for the press; flourished in Prague about 1600. Abraham met with some success in authorship. He translated the Book of Ezekiel into Judæo-German rime, and printed it in his own establishment in 1602. He shows himself to have been one of the best cultivators of that particular field of literature from which sprang the Judæo-German folk-songs.

His father, Moses ben Abraham, lived at Prague (1585–1605), being preacher and judge there, as well as author of a commentary on the Passover Haggadah, entitled "Ḥelḳat Meḥoḳeḳ" (Portion of the Lawgiver). He was employed as proof-reader in the printing establishment of Mordecai Cohen. His brothers, Judah (known also as Loeb or Loew) and Azriel, also occupied themselves with the "holy art of printing," as they styled it.

H. B.

ABRAHAM BEN MOSES ALASHKAR. See Alashkar, Abraham ben Moses.

ABRAHAM B. MOSES COHEN: A learned rabbi, probably of Spanish origin; lived in Italy during the first half of the sixteenth century; died about 1550. The data given by writers who mention him are conflicting. The earlier bibliographers, Bartolocci ("Bibliotheca Rabbinica," Nos. 44, 80, 107) and Wolf ("Bibl. Hebr." i., No. 100), confound him with Abraham of Pisa.

Abraham b. Moses Cohen was the editor of Judah he-Ḥasid's "Sefer Ḥasidim," to which he added a table of contents of one hundred columns, a lengthy introduction, and an epilogue. He also wrote a supercommentary on Rashi, and another on the "Sheiltot," and made a collection of his sermons and responsa; but none of these works has been published.

He is perhaps identical with the Abraham Cohen of Bologna mentioned in the responsa of Benjamin b. Mattathiah, published in 1539 (§§ 12 and 249), as well as with the Abraham b. Moses praised by Solomon Athias (1549) and with the Abraham Cohen mentioned in the "Yuḥasin" among the learned rabbis of Italy.

Bibliography: Steinschneider, *Cat. Bodl.* cols. 1322, 2825, 2826; idem, *Hebr. Bibl.* i. 43; Abraham Zacuto, *Yuḥasin*, p. 165; Conforte, *Ḳore ha-Dorot*, p. 34.

ABRAHAM NAHMIAS, in responsa of David Nahmias. See Nahmias, Abraham, 4.

ABRAHAM BEN NATHAN: French author; born in the second half of the twelfth century, probably at Lunel, Languedoc. He received his education in that town, after which he is sometimes called ("RABN" = **R**abbi **A**braham **b**en **N**athan—R. Eliezer ben Nathan has also the same designation—"ha-Yarḥi" = of Lunel, since the Hebrew *yareaḥ* is the equivalent of the French *lune*), perhaps under the guidance of RABaD III. (see Abraham ben David of Posquières). His regular rabbinical studies, however, were pursued at Dampierre, in northern France, at the academy of R. Isaac ben Samuel, called R. Isaac ha-Zaḳen. Abraham subsequently left his birthplace, and, after much traveling, finally settled in Toledo in 1204, where his learning quickly gained for him the favor of the rich and learned Joseph ibn Shushan and that of his sons, Solomon and Isaac. To these patrons he dedicated his work "Ha-Manhig" (The Guide), or as the author called it, "Manhig 'Olam," which he began in 1204 and completed some years later. In its present form the book consists of two distinct portions, the first of which comprises a collection of responsa, compiled from his numerous written and oral decisions, some of the former of which still bear the usual epistolary conclusion: "Shalom! A. B. N." (Greeting! Abraham ben Nathan). The second part contains extracts from the halakic works of Alfasi, Isaac ibn Giat, and Isaac ben Abba Mari, a relative of Abraham's.

The "Manhig" did not exert any important influence on halakic literature and is only occasionally mentioned by rabbis of the Middle Ages. However, it must be considered as of some importance in the history of Jewish literature, for it contains numerous literal quotations from the two Talmuds and most of the halakic and haggadic Midrashim, as well as from certain collections of the Haggadot which have been wholly lost; so that the "Manhig" contributes considerably to the textual criticism of all of those works. It gives interesting and instructive details concerning special synagogical usages, personally observed by the author in northern France, southwestern Germany, Burgundy, Champagne, Provence, England, and Spain, and for which there is no other source of information. Thus, he tells us that it was the custom in France for children to bring their Christian nurses to the courtyard of the synagogue on Purim, where their parents and relatives loaded them with gifts (p. 43*a*, ed. Berlin). He relates also that this custom was strongly objected to by many, because the Jewish poor were losers thereby, and Rashi is said especially to have denounced it.

Abraham is said also to have written a work entitled "Maḥaziḳ ha-Bedeḳ," upon the ritual for slaughtering animals for food, mention of which, however, is made by but one writer in 1467. Renan was mistaken in saying that this work is mentioned in "Ha-Manhig" (p. 1*b*; Renan, "Les Rabbins Français," p. 747), for the words *sifri maḥaziḳ ha-bedeḳ* refer, as may be seen from page 2*b*, line 6, to the "Ha-Manhig," which was designed to counteract any schism (בדק) in matters of ritual. Zacuto, in "Yuḥasin" (ed. Filipowski, p. 221), who is followed by Conforte, in his "Ḳore ha-Dorot" (ed. Berlin, 19*b*), ascribes, without giving his authority, a certain book entitled "Maḥaziḳ ha-Bedeḳ" to Abraham ben Nathan. But Reifmann's assertion that RABN was the author of a work entitled "Bet Zebul" (Habitation) is wholly unwarranted; for these two words, occurring in the introduction to "Ha-Manhig" (p. 1, l. 6), refer to the "Ha-Manhig" itself, as is evident from the passage on page 2, line 6. RABN wrote also a commentary on the treatise "Kallah," which is extant in fragmentary form only; specimens of it were given in the Hebrew weekly "Ha-Maggid" (1865, pp. 149, 150, 157, 158).

During his long stay in Spain, Abraham learned Arabic sufficiently to translate into Hebrew a responsum by Saadia, which is to be found in the "Ha-Manhig" (ed. Berlin, p. 95). Quite recently also his responsa were published in Wertheimer's "Ginze Yerushalayim," 1896.

G. L.

ABRAHAM PROCHOWNIK ("The Powder-maker"): A legendary personage said to have been nominated prince of Poland, in 842, under the following circumstances: After the death of Prince Popiel, the Poles held a council at Krushwitz, to elect a successor. They disagreed for a long time, and finally decided that the person who first entered the city on the following morning should be their ruler. This was none other than the Jew Abraham the Powder-maker (*prochownik*), who was escorted to the council-hall and proclaimed prince of Poland. Abraham declined the honor and insisted upon their electing the wise Pole Piast, who became the founder of the Piast dynasty (compare the similar legend concerning Saul Wahl). A choice of king by lot or chance encounter is found in many folk-tales.

H. R.

ABRAHAM PROVENÇAL. See Abraham ben David Provenzal.

ABRAHAM OF PRZEMYSL (pronounced *pshĕ'mishl*): Polish rabbi who flourished about the close of the seventeenth century; son of Judah Loeb, rabbi of Ulanov, in Galicia. At an early age he went to Fürth, in Germany, with the intention of publishing his father's work, "'Eẓ Kol Peri" (Trees of Every Fruit), but encouraged by the court agent, Model, son of Amshel of Ansbach, he published instead his own work, "Petaḥ ha-Ohel" (Entrance of the Tent). It consists of two parts, the first, an alphabetical collection of popular haggadic subjects, mostly selections from homiletic and cabalistic works, which were eagerly read in those times; the second, an alphabetical arrangement of difficult and much disputed legal points in the Talmud and the casuistic works. Abraham of Przemysl was related to Joel Heilprin, rabbi of Lemberg.

ABRAHAM REUBEN. See Hoshke, Reuben.

ABRAHAM SABA: A preacher in Castile, where he was born in the middle of the fifteenth century. He became a pupil of Isaac de Leon. At the time of the expulsion of the Jews from Spain he took refuge in Portugal, where he met with further misfortune; for scarcely had he settled in Oporto when King Emanuel ordered all Jews to be expelled from Portugal, all Jewish children to become Christians, and all Hebrew books to be burned (Dec. 24, 1496). Saba's two sons were forcibly taken from him, and he fled from Oporto, abandoning his entire library and succeeding only at the risk of his life in saving his own works in manuscript. He fled to Lisbon, but before reaching there was told of a new order of the king decreeing the death of any Jew with whom a Hebrew book or *tefillin* (phylacteries) were found. He hid his manuscripts and tefillin under an olive-tree and entered the city. Upon leaving Lisbon he attempted to recover his hidden treasure, but being discovered by the king's guards, he was thrown into prison, and after a six months' confinement was sent across the frontier. He went to Fez, Morocco, where he resided for ten years. Soon after his arrival he fell ill; his great privations and terrible sufferings having undermined his health. On his recovery he recommitted to paper from memory the following works, the original manuscripts of which had been lost in Portugal: (1) "Eshkol ha-Kofer" (A Cluster of Camphire), a commentary on Ruth and Esther; (2) "Ẓeror ha-Ḥayyim" (Bundle of Life), commentaries on the Song of Songs and the treatise Berakot; (3) "Ẓeror ha-Mor" (Bundle of Myrrh), a commentary on the Pentateuch, containing interpretations according to both the ordinary sense and the mystical method of the Zohar; (4) "Ẓeror ha-Kesef" (Bundle of Silver), legal decisions (compare "Monatsschrift," 1853, pp. 246, 247, and the Leyden Catalogue, pp. 94, 96). A manuscript of his commentary on the Book of Job was in Jellinek's library. Saba wrote also a commentary on Pirḳe Abot, mentioned in his commentary on Genesis, pp. 3 and 5.

According to Azulai ("Shem ha-Gedolim"), who read the anecdote in a work entitled "Dibre Yosef," Abraham in journeying from Fez to Verona became sick on the ship in mid-ocean during a great storm. The captain, unable to control the ship, had given up all hope, and implored Rabbi Abraham to pray for divine assistance. Abraham stipulated that in case of his death his body should be delivered to the Jewish community of Verona, and then prayed for the safety of the vessel. His prayer was heard, the storm abated, and the ship went safely on. Two days later Abraham died, and the captain, keeping his promise, brought the body to Verona, where it was buried with great honors. Abraham is not to be confounded with R. Abraham Saba of Adrianople, who is mentioned in the responsa of R. Elijah Mizraḥi, No. 52.

ABRAHAM IBN SAHL: See ABU ISḤAḲ, IBRAHIM IBN SAHL.

ABRAHAM SAMUEL: Talmudist, preacher, and liturgical poet; flourished about the middle of the sixteenth century. He was a pupil of Abraham Motal, rabbi of Salonica, and later became teacher and preacher at Istib (Rumelia). He died childless about the year 1650. In order to prevent his name from falling into oblivion, Nissim ben Moses Cohen of Venice published, in 1719, a part of his manuscripts under the title, "Shirat Dodi" (The Song of My Friend), a versification of the halakot contained in Mishnah Shabbat. As poetry it has no value whatsoever, as might have been expected, considering the dry legal matter he had to handle.

The authorship of the תוכחות, printed in the "Nagid u-Meẓawweh," p. 22 (Amsterdam, 1712), can not be ascribed to him. Inasmuch as the memorial formula ז״ל is omitted after his name, the author of the *tokaḥot* must have lived after 1712, whereas Abraham Samuel died about 1650. The writer of these tokaḥot is called Abraham ben Samuel, and not Abraham Samuel.

BIBLIOGRAPHY: Conforte, *Ḳore ha-Dorot*, ed. 1846, p. 52*b*; Steinschneider, *Cat. Bodl.* No. 4308; Michael, *Or ha-Ḥayyim*, No. 254. Both Steinschneider and Michael overlooked Conforte's note and therefore fell into errors.

G.

ABRAHAM BEN SAMUEL COHEN OF LASK, known as **"The Ḥasid [Pious] of Amsterdam":** A Jewish ascetic who flourished at the end of the eighteenth century. He went to live at Jerusalem in 1785, but afterward traveled through Europe as an agent for the collection of donations for the Polish Jews in Palestine, making Amsterdam his center; he died as ḥakam at Safed, Palestine, during a riot against the Jews, who had protested against excessive taxation. He was an ascetic of a remarkable type; he fasted six days of the week, from Sabbath night to Sabbath eve, but feasted quite luxuriously on the Sabbath. Often he devoted entire days and nights to the study of the Torah, standing upright during that time. He took his daily ablutions in the river before offering his prayers in the morning, often breaking through the ice in winter for this purpose. Yet in spite of all this austerity he was a man of uncommon vigor.

Once in Palestine, together with a number of Jewish scholars, Abraham was dragged to prison by some Turkish officials, and subjected to the bastinado, for no other reason than that it was the usual method pursued by the Turkish government for extorting money from the Jews. Abraham and another rabbi alone survived. At every stroke received Abraham uttered the rabbinic phrase, גם זו לטובה ("This, too, is for the best"). He was held in reverence by the best men of the time as "the holy man of God." He published several cabalistic homilies, one under the title of "Weshab ha-Kohen" (The Priest Shall Return), Leghorn, 1788; another, "Weḥishab lo ha-Kohen" (The Priest Shall Reckon), Fürth, 1784; a third, "Bet Ya'aḳob" (Jacob's House), Leghorn, 1792; and a fourth, "'Ayin Panim ba-Torah" (Seventy Meanings of the Law), Warsaw, 1797. The last work gives seventy reasons for the order of the sections in the Pentateuch, as well as seventy reasons why the Law begins, "In the beginning God created the heavens and the earth" (Gen. i. 1). All are filled with fantastic numerical and alphabetical combinations.

ABRAHAM BEN SAMUEL MEYUḤAS. See MEYUḤAS, ABRAHAM BEN SAMUEL.

ABRAHAM SON OF SAMUEL THE PIOUS: An eminent Talmudic scholar and elegist, the brother of Judah the Pious (of the Ḳalonymus family); was born at Speyer about the second half of the twelfth century. He attained a very old age, for Rabbi Eliezer ben Nathan (RABN) of Mayence, whose death occurred before 1170, considered him a rabbinical authority of the first order, and Isaac of Vienna, the author of "Or Zaru'a," who flourished about 1250, knew him personally. Abraham was the author of several elegies on the sufferings of the Jews during the first (1096) and the second (1147) Crusades, as also of a few *seliḥot* or penitential poems. He was also active as an apologist for Judaism, as is shown in the "Niẓẓaḥon."

ABRAHAM SCHRENZEL. See Rapoport, Abraham.

ABRAHAM HA-SEPHARDI: Hebrew poet and ritualist. He was rabbi at Arta in 1521. Though not a Karaite, he has been credited with the authorship of the seven poems of four lines each which precede the different sections of the Nineteenth Psalm, printed in the Karaite prayer-book for use during the seven days of Passover.

Bibliography: Zunz, *Ritus*, p. 161; idem, *S. P.* p. 543.

G.

ABRAHAM BEN SHABBETHAI COHEN OF ZANTE (called also **Abraham Cohen Rofe**): Physician and poet; born in Crete in 1670; died in 1729. He must have removed at an early period to Zante. He studied under Hezekiah Manoah Provençal, a physician of Verona. He was the author of a poetical paraphrase of the Psalms, which he published, together with other poems of his own, under the title "Kehunat Abraham" (Abraham's Priesthood), Venice, 1719. A specimen of this work, now quite rare, was reprinted in the periodical "Ha-Meassef," iii. 1, and in "Bikkure ha-'Ittim," v. 83. While he shows a good command of the Hebrew language, his poetry is not of a high order.

ABRAHAM BEN SHEM-ṬOB: Medical writer; born in the middle of the thirteenth century, probably at Marseilles, where his father, Shem-Ṭob ben Isaac of Tortosa, practised medicine. He is author of a medical handbook (חבור רפואה בדרך קצרה) in ninety-one paragraphs. Of this, two manuscripts are in the Bibliothèque Nationale de Paris (Hebr. MSS. Nos. 1181, 1182), in which the scribe adds after the name of the author the eulogy וה̈י לג̈ו ("God preserve him"). He is also called "Abraham the Hebrew of Tortosa," by Bonafos Bonfil Astruc, the Hebrew translator of the "Liber Practicæ" of Zahrawi, and "Abraham Judæus Tortuosensis," by Simon of Genoa, also known as a medical writer. He studied probably in Italy, as the last chapter of his handbook shows the influence of the Italian physician Gentile. Abraham ben Shem-Ṭob assisted in the translation of "Serapion de Simplicibus" (printed in 1473), and also translated chapter twenty-eight of the "Liber Practicæ," under the special title "Liber Servitoris." It treats of the preparation of simple medicaments. The Hebrew translation is lost, but the Latin version still exists under the title "Liber Servitoris XXVIII. de Præparatione Medicinarum Simplicium, translatus a Simone Januensi, interprete Abrahamo Judæo," Venice, 1471. Abraham was the actual translator and Simon merely added his name.

ABRAHAM BEN SHERIRA: Gaon in Pumbedita; successor to Rabbi Joseph bar Abba, from 816 to 828. He was inclined to mysticism, and was reputed to have the ability for predicting future events by watching the motion of the branches of trees. He is quoted in 'Aruk, *sub radice* נס.

A. K.

ABRAHAM SHMOILOVICH: A Lithuanian merchant known also as "The Honorable Sir Abraham, the Jew of Turisk," who flourished at the end of the sixteenth and the beginning of the seventeenth century. His name figures in the books of the Brest-Litovsk custom-house for the year 1583 as an exporter of lumber and cereals. On May 19, 1595, Alexander Pronski, the warden of Troki, leased, for a term of three years, to the "Noble Sir Burkatzki" and the "Honorable Sir Abraham Shmoilovich" of Turisk a feudal estate in the district of Vladimir, with its population and all its appurtenances. Even the resident Jews and the income derived from them were included in this list. The lessees also acquired the right to collect all the revenues, and in fact enjoyed the privileges of full manorial lords. On May 27, 1595, the Prince and Princess Grigori Sangushko leased to Shmoilovich and to his wife, Rikla Odinna, the village of Koshar and others adjoining, and six years later, Aug. 29, 1601, still other towns and hamlets.

H. R.

ABRAHAM SHOFEṬ (BEN SAMUEL): A Karaite leader; lived in Poland at the end of the seventeenth century. He was a favorite of King John Sobieski (1674–96), and largely instrumental in the foundation of Karaite colonies in the neighborhood of Lemberg, Galicia. According to a Hebrew manuscript concerning the Karaites in Poland, it was King John Sobieski who conceived the plan of these colonies, and in 1688 ordered Abraham Shofeṭ to issue invitations to several Karaite families in Lithuania and the Crimea to settle in Galicia. Many from Troki complied, and on them grants and privileges were bestowed as well as communal autonomy. As to the surname Shofeṭ ("Judge"), Neubauer surmises that the ḥakam, or spiritual leader, of the Lithuanian Karaites was clothed with judicial authority.

ABRAHAM BEN SIMEON HAIDE (HAIDA). See HAIDA, ABRAHAM BEN SIMEON.

ABRAHAM BEN SIMEON BEN JUDAH BEN SIMEON OF WORMS: Cabalist; born 1410; died 1440. He was the author of "Segullat Melakim" (Royal Devices), a treatise containing information on practical Cabala and on magic and natural science, which he collected on his travels. This treatise he wrote for his son Lamech, whom he warned against magic, which he denounced as the "black art." The work is divided into four parts, of which only the first part and the table of contents to the other three parts are preserved, in a manuscript originally belonging to David Oppenheimer's library, now in Oxford. Abraham was a pupil of R. Jacob Elim in Egypt, contemporary of Pope Martin V.

ABRAHAM SIRALAVO. See SIRALAVO, ABRAHAM.

ABRAHAM BEN SOLOMON: Talmudic scholar, who flourished in Italy at the beginning of the thirteenth century. Some of his interpretations and decisions are recorded by Zedekiah ben Abraham 'Anaw, the author of the "Shibbole ha-Leḳeṭ" (Ears of Gleaning), who probably had before him some of Abraham's manuscripts. Abraham had the critical faculty sufficiently developed to consider Isa. xlv. 7, "I form the light and create darkness," as directed against the dualism of the Parsees (*l.c.* 12).

BIBLIOGRAPHY: Zedekiah ben Abraham, *Shibbole ha-Leḳeṭ*, p. 6*b*; Buber, introduction to *Shibbole ha-Leḳeṭ*, 8*b*; Michael, *Or ha-Ḥayyim*, No. 237.

L. G.

ABRAHAM BEN SOLOMON AKRA: An Italian scholar and editor of scientific works; lived at the end of the sixteenth century. He edited the work "Meharere Nemerim" (Venice, 1599), a collection of several methodological essays and commentaries on various Talmudic treatises. Akra is the author of a methodological treatise on the Midrash Rabbot, which Isaiah Horwitz (של"ה) embodied in his work "Shene Luḥot ha-Berit" (ed. Amsterdam, p. 411), without credit. The same thing occurs in the Wilna edition of the Midrash Rabbot, where Akra's treatise is reproduced from the "Shene Luḥot ha-Berit." Akra's work appeared originally as an appendix to the "Arze Lebanon," a collection of cabalistic essays, Venice, 1601. Abraham makes there the interesting statement that he saw in Egypt the manuscript of the Midrash Abkir. This is the last trace of the existence of that small Midrash.

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 247.

L. G.

ABRAHAM BEN SOLOMON CONTI. See CONTI, ABRAHAM BEN SOLOMON.

ABRAHAM SOLOMON OF SAINT MAXIMIN: Physician, who flourished in the fifteenth century, being in high favor with René of Anjou, count of Provence. Cæsar of Nostradamus, himself of Jewish origin, in "L'Histoire et Chronologie de Provence," p. 618 (Lyons, 1624), says:

> "There was in the city of Saint Maximin a Hebrew, very learned and widely known in medicine, a celebrated philosopher named Abraham Solomon, who, despite the fact that he was a Jew, stood in high favor with the grandees of his day, especially with René of Anjou. As the king desired to keep him in his service, he was excused from paying the taxes usually levied upon the Jews."

This is not surprising on the part of René, who devoted a great part of his life to art, and especially to the collection of the poetry of the Provençal troubadours, being himself an author of some renown. Abraham was not the only Jewish physician in the service of the count. According to Nostradamus (p. 621), it was through his Jewish physicians that he became aware of the miserable condition in which the Provençal Jews lived, and he did what he could to ameliorate it.

Abraham probably belonged to the Abigdor family, and has been identified as the Abraham Abigdor (1433–48) mentioned in a list of physicians at Marseilles during the fourteenth and fifteenth centuries ("Rev. Ét. Juives," vii. 294). Here Abraham Solomon really means Abraham ben Solomon, the word "ben" being often omitted in such names. There is reason to believe that his father may have been Solomon ben Abraham Abigdor, a translator of some repute.

G.

ABRAHAM BEN SOLOMON SELAMA. See SELAMA, ABRAHAM BEN SOLOMON.

ABRAHAM BEN SOLOMON OF TORRUTIEL (Spain): Historian; lived at the end of the fifteenth century and at the beginning of the sixteenth. When only nine or ten years old, he was compelled to leave Spain (1492) in the company of those whom Ferdinand and Isabella had driven from their homes. He seems to have been of the family of Asher ben Jehiel, whom he calls אדוני, while he speaks of Asher's father as זקיני. Apparently, his teacher was one Jacob לואל; which name Graetz takes to be a mistake of the copyist for Alfual, while Harkavy emends it to "Al-Wali." Abraham went with a number of the exiles to Fez, Morocco, and with them suffered much through want, and by a fire which broke out in the city eight months after his arrival.

In later years Abraham ben Solomon wrote an appendix to "Sefer ha-Ḳabbalah," the historical work of Abraham ibn Daud, continuing an account of the Jews from the year in which Abraham ibn Daud died (1180) to the year 1525. This appendix is made up of three parts: (1) A list of learned men not mentioned by Abraham ibn Daud, taken largely from the "Sefer Zeker Ẓaddiḳ" of Joseph ibn Ẓaddiḳ; (2) a list of learned men from the time of Abraham ibn Daud down to that of Isaac Campanton (1463)—a man for whom he expresses the highest admiration; (3) a history of the kings that ruled in Spain up to Ferdinand; an account of the expulsion of the Jews from Spain, of the learned men that lived after Campanton, and of the fortunes of the exiles in Fez. In the preface he promises to add what Abraham Zacuto has to say upon the events that happened between the years 1509 and 1534.

The third section is of the most interest. Like the author of the "Shebeṭ Yehudah," Abraham, though young at the time, was an eye-witness of the events that he narrates with so much feeling. He speaks with much bitterness of the attitude of the rich men of Spain, who, with Abraham Senior, chief rabbi of Castile, at their head, preferred to change their faith rather than suffer martyrdom or exile. He holds that the expulsion of 1492 was a just sentence of God upon the Jews of Spain, because of their many sins, and especially on account of the arrogance of their great men, who neglected the Law and left it to be observed only by the poor and lowly.

BIBLIOGRAPHY: The manuscript of the *Sefer ha-Ḳabbalah* with the appendix of Abraham ben Solomon was brought from the East by Abraham Harkavy, and is now in the Bodleian. It was printed by Neubauer in his *Medieval Jewish Chronicles*, 1887, i. 101-114 (compare p. xiv.), and was again edited with critical notes by A. Harkavy in Rabbinowitz's Hebrew translation of Grätz's history, 1898, vol. iv. (*Hadashim gam Yeshanim*, ii. 2); Grätz, *Gesch. d. Juden*, 3d ed., viii. 484; Fidel Fita, in *Buletin de la Real Academia de Historia*, ix. 245.

ABRAHAM OF TOLEDO (called also **Don Abraham Alfaquin** = Arabic *ḥakim*, "physician" or "wise man"): Physician of King Alfonso the Wise of Castile, who esteemed him highly; flourished in the second half of the thirteenth century. At the king's request he translated several books from Arabic into Spanish. One of these was Al-Heitham's treatise on the construction of the universe, the Latin translation of which ("De Mundo et Cœlo") is based on Abraham's Spanish version. It is not strictly a translation, but rather a paraphrase of the Arabic original, as observed by the anonymous Latin translator, who remarks in his preface that the king had requested Abraham "to arrange the work in better order than it was, and to divide it into chapters." More widely known is Abraham's Spanish translation (1277) of Zarkali's "Astrolabe," which furnished the foundation for the Latin and Italian translations. The French translation of the seventieth sura of the Koran, by Bonaventura de Sene, is also based on the Spanish translation made by Abraham in 1264. Some writers have tried to identify this Abraham with Abraham Judæus Tortuosensis, who, toward the end of the thirteenth century, translated several works from the Arabic and perhaps also from the Latin; for instance: "'De Simplicibus opus ex Dioscoride et Galeno aggregatum,' interprete Abrahamo Judæo Tortuosensi," and "'Liber Servitoris,' interprete Abrahamo Judæo Tortuosensi" (Venice, 1471). Compare ABRAHAM B. SHEM-ṬOB.

ABRAHAM TROKI BEN JOSIAH. See ABRAHAM BEN JOSIAH HA-ROFE.

ABRAHAM OF TROYES: Head of the community of Troyes, France; lived about the middle of the twelfth century. He was a contemporary of Rabbenu Tam. The influence that he exercised at Troyes gave rise to a somewhat curious legal incident. Eleazar ha-Nadib (the word *nadib* denotes a Jewish Mæcenas), against whom he had brought an action, demurred to appearing before the rabbinical court at Troyes; and, being supported by Isaac ben Samuel of Dampierre, had his case referred to another tribunal (Gross, "Gallia Judaica," pp. 165, 239). Yom-Ṭob ha-Nadib, the son of Eleazar, being placed in a similar position, also refused to be judged at Troyes, and was sustained in his contention by Judah Sire Leon of Paris ("Rev. Ét. Juives," vii. 42). At the same time Simson ben Abraham of Sens took the part of the son-in-law of Simson of Troyes, who, being afraid of the influence of the opposite party, also objected to being tried before the rabbinical court of that town (Gross, *l.c.*).

ABRAHAM DEL VECCHIO OF FERRARA. See DEL VECCHIO, ABRAHAM, OF FERRARA.

ABRAHAM HA-YAKINI (this name seems to be of Turkish origin, and is pronounced somewhat like Haikini): One of the chief agitators in the Shabbethaian movement, the son of Pethahiah of Constantinople; born—according to a not entirely reliable source, מאורעות צבי (Lemberg, 1871, p. 3)—on Sept. 8, 1611. He studied under Joseph di Trani of Constantinople (died 1644), and under Mordecai, a German cabalist. From the latter he probably derived the touch of mysticism which, combined with cunning and great intelligence, made him the most suitable representative of Shabbethai Ẓebi. Ha-Yakini persuaded Shabbethai, who at that time was convinced that he was the Messiah but was timid and fearful of proclaiming himself, boldly to declare his claims. It was in Constantinople, about 1653, that Shabbethai Ẓebi became acquainted with Ha-Yakini, who, on account of his learning and oratorical powers, enjoyed a great reputation in his native town. He is described by contemporaries as the best preacher of his day.

Ha-Yakini put into the hands of Shabbethai Ẓebi a spurious book in archaic characters, which, he assured him, contained the Scriptural proof of his Messianic origin. This fabrication, entitled "The Great Wisdom of Solomon," began as follows:

> "I, Abraham, was confined in a cave for forty years, and I wondered greatly that the time of miracles did not arrive. Then was heard a voice, proclaiming, 'A son will be born in the year 5386 [1626] to Mordecai Ẓebi and he will be called Shabbethai. He will humble the great dragon . . . he, the true Messiah, will sit upon My [God's] throne.'"

In this manner, and in a style imitating the ancient apocalypses, this fabrication, attributed to Ha-Yakini, who was a master of Hebrew diction, continues to describe the vision which had appeared to the fictitious Abraham. Shabbethai Ẓebi accepted this work as an actual revelation and determined to go to Salonica—the paradise of cabalists—and there begin his public activity. Ẓebi was not ungrateful, and later appointed Ha-Yakini among the kings whom he purposed to enthrone over his prospective world-wide empire. Ha-Yakini on his side proved himself not unworthy of the confidence shown by his master. He gave proof of his devotion at the time when Shabbethai Ẓebi was in prison in Constantinople, and when even the greatest enthusiast could no longer be in doubt concerning his true character. He forged official opinions of the rabbinical council of Constantinople in favor of Shabbethai's claims to Messiahship. With great subtlety he obtained influence over two Polish rabbis who, as delegates of the Jews of eastern Europe, had come to Constantinople in order to investigate the claims of Shabbethai, and exercised such influence over them as to lead them to declare themselves his adherents. The conversion of Shabbethai to Mohammedanism put an end to the career of Ha-Yakini as an agitator. Notwithstanding his activity in this direction, he found time for literary work, which is of such merit that, had it not been for the deceptions he practised, it would have secured him an honorable place among the Jewish scholars of his time. He is the author of one hundred and fifty psalms (composed in imitation of those in the Bible), which appeared under the title "Hod Malkut" (Glory of the Kingdom), Constantinople, 1655. He also wrote "Eshel Abraham" (Abraham's Oak), a collection of sermons, and "Tosefet Merubbah" (Additions to Additions), a commentary upon the Tosefta, and responsa. At the request of the Dutch scholar and bibliophile L. Warner, whom he knew personally and for whom he copied many Karaitic manuscripts, he composed a work on the genealogy of the patriarch Abraham, which is still preserved in the Warner collection at Leyden. From a Hebrew letter of Ha-Yakini to Warner it is learned that the former was in favor with the Dutch minister at the Turkish court, and it must be stated to the credit of Ha-Yakini that he used his influence in behalf of strangers. It may be mentioned that with the Crimean Jews (Crimchaki) Ha-Yakini is still a name to conjure with; at their prayers in memory of Israel's great dead his name is mentioned with special solemnity.

ABRAHAM BEN YEFET (JAPHETH): Karaite poet; born about the beginning of the fifteenth century; died after 1460. He traced his descent to Moses Dar'i, the celebrated Karaite poet. He copied the religio-legal compendium of Samuel ha-Rofe ha-Ma'arabi in 1460. Abraham ben Yefet is probably identical with the Karaite poet Abraham ha-Rofe, since Rofe is a cognomen of many of the ancestors of Abraham ben Yefet. Even in his work as scribe he reveals his poetic nature by subjoining an epigram at the end of each manuscript that he copied.

ABRAHAM BEN YOM-ṬOB BONDI. See Bondi, Abraham ben Yom-Ṭob.

ABRAHAM BEN YOM-ṬOB OF JERUSALEM: Astronomer and rabbi of Constantinople; born about 1480. He was a pupil of Elijah Mizraḥi, and is quoted by Joseph Caro as a high authority. In 1556, at the instance of Joseph Nasi, he joined the rabbis of Constantinople who attempted to interdict commerce with Ancona on account of the oppression that the Maranos of that port suffered under the jurisdiction of the popes. Abraham ben Yom-Ṭob edited a calendar for the Jewish, Christian, and Mohammedan years, which is printed in the Greek Maḥzor (ed. Elijah ha-Levi, Constantinople, 1526). He follows the system of Ulugh Beg, which he verified, he says, by means of an instrument divided into minutes, the diagonal of which was almost twenty-four spans long. He cites Isaac Israeli.

ABRAHAM ẒEBI OF PIOTRKOW: Polish Talmudist; flourished at the beginning of the nineteenth century. He was a rabbi in several Polish communities, including Piotrkow, where he died. His work, "Berit Abraham" (Dyhernfurth, 1818), contains responsa covering the field of all four parts of the "Shulḥan 'Aruk." Besides this there are several responsa of his in the works of his contemporaries.

L. G.

ABRAHAMS, ABRAHAM: Writer on *sheḥiṭah* (laws of ritualistic killing of animals); born at Siedlce in Poland, December, 1801, and died at Jerusalem, January 23, 1880. He was familiarly known as Rabbi Abraham, and for nearly half a century he performed the duties of principal *shoḥeṭ* in London. Owing to the persecution of the Jews by the Russian government, he fled from Poland to England in 1837, and received the appointment of shoḥeṭ at Leeds. Two years afterward he became chief shoḥeṭ of London. As an authority on sheḥiṭah he enjoyed a very wide reputation, being the author of several popular Hebrew works upon this and other Talmudical subjects. His opinions on the minutiæ of the ritual and observances were greatly respected, especially in Poland. His best-known works are "Bet Abraham" and "Yizkor le-Abraham," the latter being his autobiography. A year before his death he settled in Jerusalem, in order to end his days in study in that city. One of his last acts was to present to the Mishkenot Israel Building Society the house he had purchased in the Holy City, directing that it be used in perpetuity as a synagogue. His son by a second marriage was Barnett Abrahams.

G. L.

ABRAHAMS, BARNETT: Dayyan, or assistant rabbi, of the Spanish and Portuguese Congregation of London, England, and principal of Jews' College. He was born in Warsaw, Poland, in 1831, and died in London, November 15, 1863. Abrahams was educated at University College, and received the degree of B.A. from the University of London. He received his rabbinical instruction from his father. From a minor position in the Spanish congregation Abrahams became dayyan, performing at the same time the duties of ḥakam. On the resignation of Dr. Loewe Abrahams became principal of

Jews' College, a position for which he was eminently fitted, as the bent of his mind was toward the education of the young. With this object before him he succeeded in founding the Society for the Diffusion of Religious Knowledge Among the Young, and he remained one of its most influential members till his death. He wrote several of the tracts published by the society. Two of his sons, Joseph and Moses, became Jewish ministers, and a third son, Israel, is senior tutor of Jews' College.

Bibliography: *Jew. Chron.* Nov. 20, 1863.

G. L.

ABRAHAMS, ISRAEL: English author and teacher; born in London, November 26, 1858; son of Barnett Abrahams. He received his education at Jews' College, of which his father was principal, and at University College, London. He received the degree of M.A. from the University of London in 1881. Abrahams taught secular subjects as well as homiletics at Jews' College, and was appointed senior tutor of that institution in 1900. He is a forceful lecturer and an earnest lay preacher. As honorary secretary of the Jewish Historical Society of England and as a member of the Committee for Training Jewish Teachers, he has been very active. He is also a member of the Committee of the Anglo-Jewish Association, and of several other institutions of the community.

Abrahams was joint author with Claude G. Montefiore of "Aspects of Judaism," published in 1895. His chief works are "Jewish Life in the Middle Ages," 1896, and "Chapters on Jewish Literature," 1898. Since 1889 he has been joint editor of the "Jewish Quarterly Review," and has helped materially to raise it to its present high position. He is a prolific contributor to periodical literature, and is especially well known for his articles on literary subjects, which appear weekly in the "Jewish Chronicle" under the title of "Books and Bookmen."

Bibliography: *Who's Who?* 1900; Harris, *Jew. Year Book*, 1900.

G. L.

ABRAHAMS, LOUIS BARNETT: Head master of the Jews' Free School, London; born at Swansea, South Wales, 1842. He was educated in the Jews' School at Manchester, whither his family had removed in 1845. In 1854 he was indentured to Moses Angel at the Jews' Free School, London, as a pupil-teacher, and in 1864 he was appointed principal instructor of English. For the next twenty years Abrahams had charge of nearly all the teaching staff of the boys' department of the school. In 1884 he was appointed vice-master. When, in December, 1897, failing health compelled the retirement of Moses Angel, Abrahams was elected head master of the school, while Moses Angel became principal; on the death of the latter in September, 1898, Abrahams succeeded him.

Abrahams is a graduate of the London University, and one of the founders of the Jewish Educational Board and of the Teachers' Training Committee. His published works are: "A Manual of Scriptural History for Jewish Schools and Families," London, 1882; "A Translation of the Prayer-Book for School Use"; "A Chronological History of England."

On the establishment of the "Jewish Record," in 1868, Abrahams acted as its first editor. He has been also a frequent contributor to other Jewish periodicals.

Bibliography: *Jew. Chron.* Dec. 10, 1897, p. 9; *Jew. Year Book*, 1899; *Young Israel*, Dec., 1899 (portrait).

G. L.

ABRAHAMS, NICOLAI CHRISTIAN LEVIN: Danish scholar, professor of the French language and literature at the University of Copenhagen; born at Copenhagen Sept. 6, 1798; died there Jan. 25, 1870. He entered the university in 1815, and graduated in law in 1818. He was one of the twelve Danes (*tylvten*) who sent the literary challenge to the Danish author Baggesen in reply to his criticism of the literary idol of the time, Adam Oehlenschläger. For four years, in order to continue his studies, he traveled in foreign countries, and in 1828 he returned to Copenhagen and wrote, to gain the degree of master of arts, a dissertation on Wace's "Roman de Brut." A year later he was appointed lector of French at the University of Copenhagen, and in 1832 was promoted to a professorship after he had been baptized. Abrahams did much for the promotion of the study of French in Denmark, not only by his lectures, but also by his publications, of which some are scientific and others are of a more popular nature. In 1857 he retired from his position at the university and became notary public. For some years he was president of the Society of Fine Arts in Copenhagen, a history of which he wrote in 1864. He was also president of the Society for the Development of Danish Literature. Among his works are "Description des Manuscrits Français du Moyen-Âge de la Bibliothèque Royale de Copenhague," 1844; "Fransk Sproglære," 1845; "Balthasari Castilioni Aulici Liber Tertius Secundum Veterem Versionem Gallicam," 1848; "Meddelelser of mit Liv," published by his son in 1876.

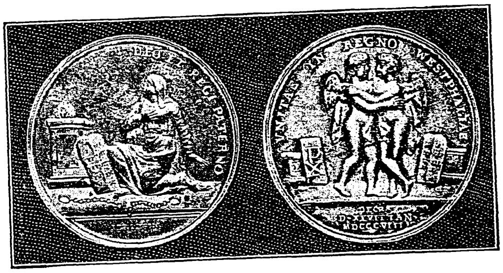
A. M.

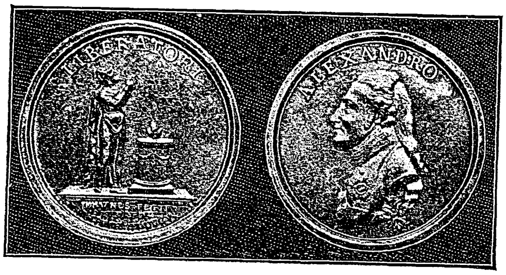
ABRAHAMSON, ABRAHAM: German medalist and master of the Prussian mint; born at Potsdam, 1754 (1752 ?); died in Berlin, July 23, 1811. As an engraver he was considered one of the best of his time. Having learned the art of engraving from his father, Jacob Abraham, he soon excelled him in artistic execution. There exists a medal of the actor Brockmann, which is said to be the joint production of father and son.



Medal Commemorating Enfranchisement of Jews in Westphalia.

Abrahamson was much influenced by the designs of Chodowiecki, and sought to draw nearer to nature than did the latter, and thus avoid the dangers of too pedantic a style. On account of this the obverse sides of his medals are much finer than the reverse, which always exhibit the poverty and coldness of allegorical creation. Up to the year 1788 Abrahamson had engraved only the designs of others; then, in search of ideas and to study form, he set out for the various art centers of Europe. He spent four years abroad, and on his return most of the medals he made were of his own design. The following are by far the best of his numerous productions:

"Equipping the Prussian Troops" (1778); "Peace of Teschen" (1779); "Death of Duke Leopold of Brunswick"; "Peace with Russia" (1762); "Occupation of the District of the Netze" (1772); "The King's Seventy-first Birthday" (1782); "Introduction of Silkworm Culture" (1783); "Meeting of the Monarchs at Tilsit" (1808); "Death of Queen Louise" (1810); "Enfranchisement of the Jews in Westphalia"; "The Emancipation of the Jews by Alexander I.": the last two are known as historic thalers.



Abrahamson's Medal commemorating the Emancipation of the Jews by Alexander I.

He also designed and engraved a medal commemorating the death of Queen Marie Antoinette; but his greatest work was a medal bearing the bust of Frederick the Great on a stone pediment that crushes a sphinx. The legend on this medal reads, "Fredericus Legislator 1785." In addition to these Abrahamson executed a series of medals of the great men of his time. This included Moses Mendelssohn, Kant, Lessing, Wieland, Ramler, Sulzer, Euler, Spalding, D. Bernouilli, Overbeck, Roloff, Marggraff, Formey, Martini, Gall, Burg, Gebhardi, Weisse, Spiegel, and others. The frontispiece of the eighty-sixth volume of the Krünitz-Flörke "Ökonomische Encyklopädie" (Berlin, 1802) is a copperplate portrait of Abrahamson. He is the author of "Versuch über den Geschmack auf Medaillen und Münzen" (Essay on Style in Medals and Coins), Berlin, 1801. Many other designs created by him have been cut by Daniel Berger, and afterward reproduced in copperplate as engravings for books.

F. S. W.

ABRAHAMSON, AUGUST: Swedish philanthropist, and founder of the Sloid Seminary of Nääs, near Göteborg; born Dec. 29, 1817, at Karlskrona, Sweden, where his parents, originally from Germany, had settled; died May 6, 1898, at Nääs. August in his fourteenth year was apprenticed to a hardware merchant in Göteborg, and eventually he became founder and owner of one of the most extensive businesses in Sweden.

The large fortune which he thus accumulated was used by him for the improvement of the educational system of his native country. In 1868 he retired from business, and bought the magnificent estate of Nääs, with its picturesque old castle. Here he at once devoted himself to philanthropic and educational work, founding free schools, and otherwise furthering the material and spiritual interests of the community in which he lived. Later his efforts were directed to wider enterprises. In 1872 he established at Nääs an industrial school for boys, and two years later a similar institution for girls, in both of which instruction in manual training formed an important feature. At the head of these schools he placed his nephew, Otto Salomon, to whose efforts the remarkable success of the undertaking was largely due.

To meet the growing demand for instructors in handicrafts, Abrahamson and his nephew added in 1874 a sloid-training department for teachers. Sloid work may be described as a series of carefully graduated exercises in the making of articles of common household use, varying from simple objects, such as a pen-rest, to a table or cabinet. This sloid-training department developed into the great Sloid Seminary of Nääs, which, by Abrahamson's will, became possessed of his entire estate (380,000 crowns, or about $102,600) on condition that the institution should be continued under the name "August Abrahamson's Stiftelse." Every year large numbers of students from all parts of the world receive at the seminary gratuitous instruction in sloid work. The splendid results achieved, and the world-wide renown of the institution, are worthy memorials of the pioneer of manual training in the Scandinavian peninsula.

H. R.

ABRAHAMSON (ABRAMSON), MEYER: A German physician and writer on medicine; born at Hamburg, 1764; died there October 21, 1817. He graduated from the University of Göttingen in 1783 and began practise in his native city, where his father had also been a medical practitioner. Shortly afterward he was appointed physician to the Jewish Hospital in the city of Hamburg and to the poor of that city. In 1784 he began his literary career and became a prolific and popular writer on medical subjects. Most of his essays were published in "Richter's Chirurgische Bibliothek," "Baldinger's Magazin," "Meckel's Neues Archiv der Practischen Heilkunde," and "Hufeland's Journal." In book form he published: "Abhandlungen und Beobachtungen über Einige Krankheiten der Augen" (1785); "Unterricht für Diejenigen, die mit Leibesbrüchen Behaftet Sind" (1786); "Einige Worte an das Publikum über die Wichtigkeit der Kuhpocken-Impfung" (1801); "Hämorrhoiden" (third ed., 1815; translated into Swedish, 1807); "Gicht" (1815; second ed., 1816); "Der Arzt für Hypochondrische und Hysterische Frauenzimmer" (1817). Of a more scientific character is his treatise, "Untersuchungen über die Grosse Sterblichkeit unter Schwangeren, Wöchnerinnen und Neugeborenen Kindern" (1806). Abrahamson was a member of several scientific societies of Germany and Sweden.

M. B.

ABRAMOVICH, MIKHAIL SOLOMONOVICH: Russian poet, son of Solomon (Shalom) Abramovich; born at Berditchev in 1859, and educated at the Gymnasium of Jitomir. At the age of twenty he went to St. Petersburg, only for a short time. Being implicated in a revolutionary movement, he was banished first to the government of Archangel, then to Samara and Kazan. In 1887 he graduated at St. Petersburg, where in 1901 he practised law. His earliest poems appeared in "Voskhod," "Nedyelya," and other periodicals, and were published in book form in 1889. Excepting those devoted to Judaism or that treat of Biblical subjects his poems do not exhibit much originality.

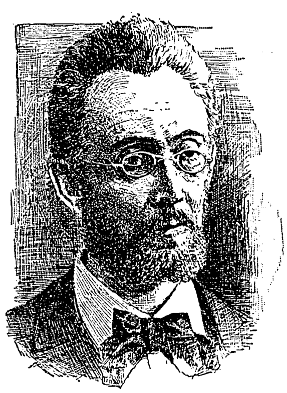
ABRAMOWITSCH, SOLOMON (SHALOM) JACOB, "The Jewish Cervantes," known also by the name of his work, "Mendele Mocher Seforim" (Mendele the Bookseller): A Hebrew and Judæo-German writer; born at Kopyl, Lithuania, in 1836. He studied Talmud at the ḥeder and bet ha-midrash until the death of his father, which occurred in 1849. As a youth he wandered from town to town, visiting Slutsk and Wilna, and learning Hebrew literature in the rabbinic colleges of those towns. Early in life the poetic side of his nature asserted itself, and he wrote several Hebrew lyrics, but without much success. Through family circumstances he was compelled to remove from Lithuania and to go to Volhynia and thence to Podolia. During his wanderings he became thoroughly acquainted with the conditions of Jewish life in Russia. At the age of eighteen he settled in the city of Kamenetz-Podolsk, where he made the acquaintance of the Hebrew poet Abraham Gottlober, and began the study of modern Russian and German literature, under the guidance of Gottlober's elder daughter.



S. J. Abramowitsch.

In 1856 he became a teacher in the Jewish Boys' College of the government in Kamenetz, and in the same year he published his first essay, under the title "On Education," in the periodical "Ha-Maggid." At this time a strong progressive movement took possession of the cultured Jews in Russia in consequence of the reforms of Alexander II. (see HASKALAH). Abramowitsch entered into the fight, and wrote political articles for the periodicals and likewise published many essays in Hebrew on natural science. Two volumes, made up of collected articles on politics, were published by him under the titles "Mishpaṭ Shalom" (Peaceful Judgment), 1860, and "'En Mishpaṭ" (Critical Eye), 1866. In 1862 Abramowitsch began the publication of his work "Toledot ha-Ṭeba'" (Natural History), adapted from the "Naturgeschichte" of H. O. Lenz. Three volumes of this work were finished before 1872. They aroused great interest in the study of natural science among the younger generation.

Wanderings.

But it was not in this line of literature that the talent of Abramowitsch reached its fullest development. He was by nature an artist, a novelist who penetrated the depths of the great mass of the people and their customs. In 1868 he published a novel under the title "Ha-Abot we-ha-Banim" (Fathers and Sons), a descriptive tale of life among the Russian Jews of his generation, in which he pictured the struggles between the orthodox parents and their progressive sons. This work has been translated into Russian. Abramowitsch's talent manifested itself especially in his tales of the life of the common people, written in the Judæo-German dialect. His first novel in this line, entitled "Das Kleine Menschel," was written in 1865 and published under the pseudonym "Mendele Mocher Seforim" (Mendele the Bookseller). It was a biting satire on an unworthy Jewish favorite of the governor of his province. Not content with attacking such an influential person, he published in 1869 "Die Taxe oder die Bande Stadt-Baale-Tobot" (The Gang of City Benefactors), translated into Russian by Joseph Petrikovski (Byelaya Tzerkov, 1884), a very sharp satire on the Russian *parnasim* who managed the affairs of the congregation in their own interest. This work provoked the wrath of the zealots at the head of the congregation of Berditchev, where Abramowitsch lived, and he was forced to move to Jitomir, which was then the center of the *Maskilim* (Progressists). In 1873 he published "Die Kliatsche," partly translated by Wiener under the title "Dobbin" ("Yiddish Literature" pp. 277–281), an allegory which describes the life of the Jews in their exile, both in the past and present, with a remarkable psychological thoroughness. This book was later translated into Russian, but the censor interdicted its circulation after the publication of the first few chapters. A few years later the novel "Kiẓẓur Mas'ot Binyamin ha-Shelishi" (An Abridged Account of the Travels of Benjamin III.), of which a specimen is translated by Wiener, pp. 285–295, gave a satirical picture of the life in the small towns of Volhynia. Both "Kliatsche" and "Mas'ot" were translated into Polish by the Christian author, Clemens Junosza of Warsaw. The translation of the second book bears the title "The Jewish Don Quixote." From 1888 to 1890 he published two remarkable novels: "Fischke der Krummer," describing the life of wandering Jewish beggars and soothsayers with considerable psychological skill and subtlety, and "Wünschfingerl," of a more historical cast, dealing with the times of Nicholas I. and Alexander II. In 1881 Abramowitsch removed to Odessa, where he became principal of the Talmud Torah School. In 1884 the twenty-fifth anniversary of his literary activity was celebrated.

Novels.

In later years Abramowitsch was again inclined to write in the classical Hebrew, to which, through his literary talent, he gave a new shape and which he enriched by new terms. In this language he published his books, "Shem we-Yaphet ba-'Agalah" (Shem and Japhet in the Chariot), 1890; "Bi-Yeme ha-Ra'ash" (In the Days of Storm), 1894; "Bi-Yeshibah shel Ma'alah" (In Celestial Councils), published in Sokolow's "Aḥiasaf," 1895; and "Be-'Emeḳ ha-Baka" (In the Vale of Tears"), in "Ha-Shiloaḥ," 1897–98. The last novel was the author's own Hebrew translation of his book, "Wünschfingerl," but with many additions and corrections. In recent years Abramowitsch has become a contributor to the Judæo-German paper, "Der Jud," which is edited in Russia and published at Cracow, Austria. In this paper he published a novel with an autobiographic notice under the title "Shelomoh Rabbi Ḥayyim's." The influence of such a literary talent as that of Abramowitsch on his contemporaries has been very great, and he has more than any other helped to shape the style adopted in Yiddish literature, to which he added many expressions borrowed from his native Lithuanian dialect.

S. M. D.

ABRAMS, HARRIET: English soprano vocalist and composer; born 1760; died in the first half of the nineteenth century. She was the eldest of three sisters (Harriet, Theodosia, and Eliza), all excellent vocalists. Harriet herself was a pupil of Dr. Arne, and made her début at Drury Lane Theater, London, in her master's musical piece, "May Day," October 28, 1775. She and her sister Theodosia sang at the opening of the Concerts of Ancient Music in 1776. She sang also at the Handel Commemoration in Westminster Abbey in 1784 and at the principal London concerts for several years afterward, when she and her sisters retired into private life. Harriet Abrams composed several pleasing songs, two of which, "The Orphan's Prayer" and "Crazy Jane," aided by the impressive singing of her sisters, became very popular. She published, further, in 1787, a collection of Scotch songs harmonized for three voices, besides other pieces at later dates.

ABRAMSON, ARTHUR VON: Russian civil engineer; born at Odessa, March 3, 1854. He was educated at the gymnasium of his native city, and studied mathematics at the University of Odessa, which he left to take a course in civil engineering at the Polytechnikum of Zurich, Switzerland, from which he was graduated in 1876. Returning to Russia in 1879, he passed the state examination at the Russian Imperial Institute of Roads and Communications, and was appointed one of the directors of the Russian state railway at Kief. He devised, built, and managed the sewer system of Kief, and constructed the street-railroad of that city. In 1881 he founded and became editor-in-chief of a technical monthly, "Inzhener" (The Engineer). He was appointed president of the local sewer company and director of the Kief city railroad.

H. R.

ABRAMSON, BERNARD: Russian physician of the nineteenth century. He was a corresponding member of the St. Petersburg Academy of Science, and for valued work in sanitation was made a hereditary honorary citizen by the Russian government. Owing to his interest in Jewish matters, he was requested by the government to draw up a curriculum for the Jewish school at Uman in the government of Podol. In 1849 the title of collegiate councilor was conferred upon him; and in the same year he was elected a member of the Odessa English Club (composed of Russian noblemen). He wrote various medical works.

ABRAVALLA (אברבאליא), SAMUEL, called THE GREAT: The richest Jew in Valencia. He was forced during the persecution of 1391 to accept Christianity. The *jurados* of Valencia reported on this baptism on July 14, 1391, as follows: "Yesterday there was baptized the great Don Samuel Abravalla with great solemnity in the palace of En Gasto under the patronage of the marquis, and he has received the name of Alfonso Ferrandes de Villanueva, from an estate which he owns in the marquisate, called Villanueva" (De los Rios, "Hist. de los Judíos de España y Portugal," ii. 603). This Samuel Abravalla can scarcely be identical with Don Samuel Abravanel, who was also baptized in 1391, but took the name Juan de Sevilla. Abravalla soon returned to Judaism, as did also Abravanel. He was sent with Don Solomon ha-Levi to Rome as ambassador of the Spanish Jews, and had an interview with the pope.

ABRAVANEL, ABARBANEL, or ABRABANEL: One of the oldest and most distinguished Spanish families, which traces its origin from King David. Members of this family lived at Seville, where dwelt its oldest representative, Don Judah Abravanel. Samuel Abravanel, his grandson, settled at Valencia, and Samuel's son, Judah (or perhaps he himself), left Spain for Portugal. Isaac, the son of Judah, returned to Castile, where he lived till the time of the great expulsion of the Jews from Spain in 1492. Then, with his three sons, Judah, Joseph, and Samuel, Isaac went to Italy. Their descendants, as well as other members of the family who arrived later from the Iberian peninsula, lived in Holland, England, Turkey, and elsewhere during and since the sixteenth century.

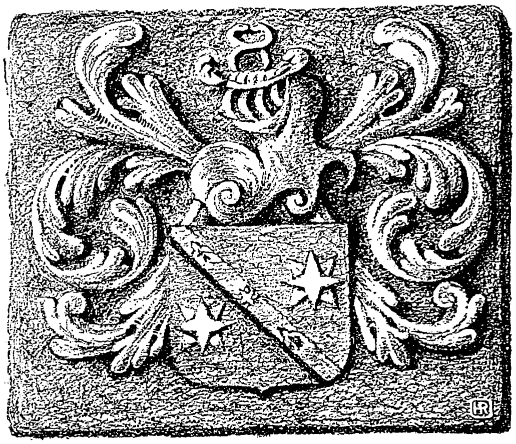
Manuel

Isaac Abravanel: Statesman and Bible commentator, son of the Portuguese treasurer, Dom Judah, was born in the year 1437 at Lisbon, and died at Venice in 1508. He was buried in Padua.

Abravanel received a careful education and was a pupil of Joseph Ḥayyim, rabbi of Lisbon. Well versed in Talmudic literature and in the learning of his time, endowed with a clear and keen mind, and full of enthusiasm for Judaism, he devoted his early years to the study of Jewish religious philosophy, and when scarcely twenty years old wrote on the original form of the natural elements, on the most vital religious questions, on prophecy, etc. His political abilities also attracted attention while he was still young. He entered the service of King Alfonso V. of Portugal as treasurer, and soon won the confidence of his master. Notwithstanding his high position and the great wealth he had inherited from his father, his love for his afflicted brethren was unabated. When Arzilla, in Morocco, was taken by the Moors, and the Jewish captives were sold as slaves, he contributed largely to the funds needed to manumit them, and personally arranged for collections throughout Portugal. He also wrote to his learned and wealthy friend Jehiel, of Pisa, in behalf of the captives. After the death of Alfonso he was obliged to relinquish his office, having been accused by King John II. of connivance with the duke of Bragança, who had been executed on the charge of conspiracy. Abravanel, warned in time, saved himself by a hasty flight to Castile (1483). His large fortune was confiscated by royal decree. At Toledo, his new home, he occupied himself at first with Biblical studies, and in the course of six months produced an extensive commentary on the books of Joshua, Judges, and Samuel. But shortly afterward he entered the service of the house of Castile. Together with his friend, the influential Don Abraham Senior, of Segovia, he undertook to farm the revenues and to supply provisions for the royal army, contracts that he carried out to the entire satisfaction of Queen Isabella. During the Moorish war Abravanel advanced considerable sums of money to the government. When the banishment of the Jews from Spain was decreed, he left nothing undone to induce the king to revoke the edict. In vain did he offer him 30,000 ducats ($68,400, nominal value). With his brethren in faith he left Spain and went to Naples, where, soon after, he entered the service of the king. For a short time he lived in peace undisturbed; but when the city was taken by the French, bereft of all his possessions, he followed the young king, Ferdinand, in 1495, to Messina; then went to Corfu; and in 1496 settled in Monopoli, and lastly (1503) in Venice, where his services were employed in negotiating a commercial treaty between Portugal and the Venetian republic (Zurita, "Historia del Rey Don Fernando el Católico," v. 342*a*). M. K.

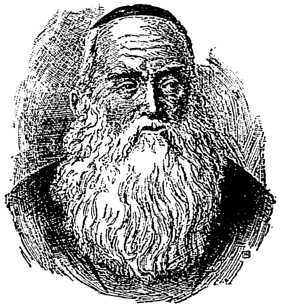


Abravanel Coat of Arms.

(From the Archives of the Amsterdam Portuguese Congregation.)

As Author and Exegete.

Abravanel's importance, however, lies not only in his changeful and active career. Although his works can scarcely be said to be of an absolutely original character, they contain so much instructive material, and exerted so wide an influence, that they demand special attention. They may be divided into three classes, referring to (1) exegesis, such as his commentary upon the entire Bible with the exception of the Hagiographa; (2) philosophy, dealing with philosophy in general and particularly with that of the Jewish religion; (3) apologetics, in defense of the Jewish doctrine of the Messiah. Characteristic of Abravanel's exegetic writings is his accurate estimation of the historical standpoint in the ancient annals of the Jewish people. All preceding Jewish exegetes had been too far removed from the tumult of the great world to possess a proper estimate of the historical epochs and episodes described in Scripture. Abravanel, who had himself taken part in the politics of the great powers of the day, rightly perceived that mere consideration of the literary elements of Scripture was insufficient, and that the political and social life of the people must also be taken into account. He recognized also the value of prefacing the individual books of the Bible with a general introduction concerning the character of each book, its date of composition, and the author's intention; he may consequently be considered as a pioneer of the modern science of Bible propædeutics. These excellences of Abravanel's commentaries were especially appreciated by the Christian scholars of the seventeenth and eighteenth centuries. No less than thirty Christian writers of this period—among them men of eminence, like the younger Buxtorf, Buddeus, Carpzov, and others—occupied themselves with the close study of Abravanel's exegetical writings, which they condensed and translated, and thus introduced to the world of Christian scholarship. Possibly somewhat of this appreciation of Abravanel by Christians was due to the latter's tolerance toward the Christian exegetes—Jerome, Augustine, and Nicholas de Lyra—all of whom were closely studied by him and quoted without prejudice, receiving praise or disapprobation as the case demanded.



Isaac Abravanel.

(Traditional portrait.)

As Philosopher.

Abravanel's Jewish predecessors in the realm of philosophy, whoever, by no means received the same amount of tolerance at his hands. Men like Albalag, Palquera, Gersonides, Narboni, and others, were roundly denounced by Abravanel as infidels and misleading guides, for venturing to assume a comparatively liberal standpoint in religio-philosophical questions. Although he was the last Jewish Aristotelian, Abravanel was essentially an opponent of philosophy, for his entire conception of Judaism, opposed to that of Maimonides and his school, was rooted in a firm conviction of God's revelation in history, and particularly in the history of the selected people. Had Abravanel not been misled by the "Guide" of Maimonides, for whom he shared the traditional veneration, he might have given an exposition of his views on the relations of philosophy and religion. As it is, however, these views are confused, being at one and the same time Maimonistic, anti-Maimonistic, and, in a measure, even cabalistic. A characteristic instance of his vacillation is afforded by his most important religious work, the "Rosh Amanah" (The Pinnacle of Faith), based on Cant. iv. 8. This work, devoted to the championship of the Maimonidean thirteen articles of belief against the attacks of Crescas and Albo, ends with the statement that Maimonides compiled these articles merely in accordance with the fashion of other nations, which set up axioms or fundamental principles for their science; but that the Jewish religion has nothing in common with human science; that the teachings of the Torah are revelations from God, and therefore are all of equal value; that among them are neither principles nor corollaries from principles: which certainly is rather a lame conclusion for a work purporting to be a defense of Maimonides. It would not be just, however, to assert that Abravanel makes a pretense of championing Maimonides, while being actually opposed to him. Abravanel is no hypocrite; wherever he thinks that Maimonides deviates from traditional belief, he does not hesitate to combat him strenuously. He thus assails Maimonides' conception that the prophetic visions were the creations of imagination. Abravanel will not hear of this explanation even for the *bat kol* of the Talmud, which, according to him, was a veritable voice made audible by God—a miracle, in fact (commentary on Gen. xvi.). In like manner Abravanel exceeded all his predecessors in combating Maimonides' theory of the "Heavenly Chariot" in Ezekiel ("'Aṭeret Zeḳenim," xxiv., and commentary on the "Moreh," part iii. 71–74, ed. Warsaw). Indeed the most noteworthy feature of all Abravanel's philosophical disquisitions is the success with which he demonstrates the weak points in the Maimonidean system.

As Apologete.

One point of Maimonides' system, however, and one that was not strictly in the line of tradition, found in Abravanel a zealous imitator: the belief in a Messiah. He felt deeply the hopelessness and despair which possessed his brethren in the years following their expulsion from Spain, and set himself, therefore, to champion the Messianic belief and to strengthen it among his desponding brethren. With this aim he wrote the following three works: "Ma'yene ha-Yeshu'ah" (Sources of Salvation), completed Dec. 6, 1496; "Yeshu'ot Meshiḥo" (The Salvation of His Anointed), completed Dec. 20, 1497; and "Mashmia' Yeshu'ah" (Proclaiming Salvation), completed Feb. 26, 1498—all of them devoted to the exposition of the Jewish belief concerning the Messiah and the Messianic age. The first-named of these is in the form of a commentary upon Daniel, in which he controverts both the Christian exposition and the Jewish rationalism of this book. Curiously enough, in opposition to the Talmud and all later rabbinical tradition, he counts Daniel among the prophets, coinciding therein—but therein only—with the current Christian interpretation. He is impelled to this by the fact that Daniel furnishes the foundation for his Messianic theory. The remainder of his commentary is devoted to an exhaustive and caustic criticism of the Christian exposition.

The second work is probably unique in being an exposition of the doctrine concerning the Messiah according to the traditional testimony of Talmud and Midrash; it is valuable for its exhaustive treatment and clearness of presentation. Of no less importance is his third apologetic work, which contains a collection of all the Messianic passages of the Bible and their interpretations, in the course of which latter Abravanel very frequently attacks the Christian interpretation of these passages. It contains (pp. 32*c*–34*b*, ed. Amsterdam) a description of the Messianic age as conceived by the Jewish orthodoxy of the Middle Ages. These apologetic works of Abravanel were widely read by his coreligionists, as is evidenced by their frequent republication, and they contributed undoubtedly to the reassurance of many of his brethren as to a better future for Israel.

The following list of Abravanel's works is arranged alphabetically, according to the Hebrew alphabet, the date of the first edition being given in each case:

(1) "'Aṭeret Zeḳenim" (Crown of the Ancients), Sabbionetta, 1557; (2) "Yeshu'ot Meshiḥo" (The Salvation of His Anointed), Karlsruhe, 1828; (3) "Maamar Kaẓer" (Short Treatise), Venice, 1574; (4) "Ma'yene ha-Yeshu'ah" (Sources of Salvation), Ferrara, 1551; also at Naples, no date, possibly *ed. princeps*; (5) "Mashmi'a Yeshu'ah" (Proclaiming Salvation), Salonica, 1526; (6) "Mif'alot Elohim" (Works of God), Venice, 1592; (7) "Mirkebet ha-Mishneh" (Second Chariot), Sabbionetta, 1551; (8) "Naḥlat Abot" (The Paternal Inheritance), Constantinople, 1505; (9) "Perush" (Commentary) on the Pentateuch, Venice, 1579; (10) "Perush" on the Earlier Prophets, Pesaro, 1511 (doubtful); (11) "Perush" on the Later Prophets, Pesaro, 1520 (?); (12) "Perush" on Maimonides' "Moreh Nebukim," Karlsruhe, 1831; (13) "Rosh Amanah" (The Pinnacle of Faith), Amsterdam, 1505; (14) "Shamayim Ḥadoshim" (The New Heavens), Rödelheim, 1828; (15) "Ẓurot ha-Yesodot" (Forms of the Elements), Sabbionetta, 1557; (16) "Teshubot" (Responsa), addressed to Saul ha-Kohen of Candia, Venice, 1574. See also ARAMA, DAVID; BIBAGO, ABRAHAM.

BIBLIOGRAPHY: Autobiographical notices are given in the introduction to his commentaries on Joshua, Kings, and Deuteronomy and in his *Teshubot*; Baruch חזקיטו, preface to Abravanel's *Ma'yene* (is of great value); Carmoly, in Jost's *Annalen*, 1839, p. 101; also an anonymous writer, *ib.* p. 181; Luzzatto, *ibid.* 1840, pp. 17, 24; Jost, *Gesch. d. Israeliten*, iii. 104–109; Grätz, *Gesch. d. Juden*, viii. and ix., see index; M. H. Friedländer, *Chachme ha-Dorot*, Brünn, 1880, pp. 136–150; Schwerin-Abarbanel, in Berliner's *Magazin*, 1891, xviii. 133–145, 235–241; Steinschneider, *Cat. Bodl.* No. 5302; Fürst, *Bibl. Jud.* pp. 11–15; The *American Israelite* (Cincinnati, O.), 1862, pp. 212, 220, 228, 236, 244, contains a translation (incomplete) of the *Rosh Amanah*.

L. G.

Isaac Abravanel: 1. Son of Joseph Abravanel, and grandson of the Bible-commentator; was distinguished for his philanthropy and his devotion to science. He lived at Ferrara, Italy, where he died in 1573. He entrusted the education of his children to Isaac de Lattes in 1567. Amatus Lusitanus was in friendly intercourse with him and a frequent visitor at his house. **2.** A rich and highly respected man who lived at Venice in 1668.

Jonah Abravanel: 1. Poet; flourished at Amsterdam in the seventeenth century; died there Aug. 11, 1667. He was the son of the physician Joseph Abravanel, and a nephew of Manasseh ben Israel. He wrote "Elegio em Louvar da Nova Yesiba, instituto por o Senhor Yshac Pereira, de que he Ros Yesiba o Senhor Haham Menasse ben Israel" (Amsterdam, 1644). He wrote also elegies upon the martyrs Isaac de Castro Tartas (1647) and the Bernals (1655). He published with Dr. Ephraim Bueno, after 1630, ritualistic works and "Psalterio de David . . . transladado con toda fidelidad" (Amsterdam, 1644). **2.** A learned and highly respected man who lived also at Amsterdam, where he died Feb. 19, 1707. **3.** Son of Manasseh Abravanel; was a member of the Talmudical Academy 'Ez Ḥayyim in Amsterdam, 1710.

Joseph Abravanel: 1. Physician and scholar; son of Isaac Abravanel; born at Lisbon in 1471; died about 1552. He lived at Venice and later at Ferrara, and enjoyed a great reputation. **2.** A physician, brother of Manasseh Abravanel; flourished at Amsterdam in the seventeenth century; died about 1620. **3.** A member of the Academy 'Ez Ḥayyim at Amsterdam, in 1706.

Judah Abravanel: 1. Receiver of customs at Seville, Spain, in 1310. He rendered substantial service to the grandees of Castile. The infante Don Pedro, in his will, dated Seville, May 9, 1317, ordered that Judah be paid: (1) 15,000 maravedis ($36,000) for clothes delivered; (2) 30,000 maravedis ($72,000) as part of a personal debt, at the same time requesting Judah to release him from paying the rest. Judah had been in great favor with King Alfonso the Wise, with whom he once had a conversation regarding Jews and Judaism. **2.** Grandson of the preceding; Portuguese treasurer about 1400. He managed the financial affairs of the infante Dom Fernando, who assigned to him, in 1437, over half a million reis blancos. **3.** See Leo Hebræus. **4.** The grandson of Judah Abravanel, or Leo Hebræus, bore also the name of Judah. He was a much respected man, who died Dec. 15, 1583, at Ferrara, at the age of fifty. He lived with his brother Jacob Abravanel and another Judah Abravanel, who was renowned for his wealth and for his philanthropy.

Samuel Abravanel: Son of Judah Abravanel of Seville; settled in Castile. He became a patron of learning. He supported the scholar, Menahem ben Zerah, and had him elected rabbi of Toledo. As a mark of his gratitude Menahem dedicated to Abravanel his work, "Ẓedah la-Derek" (Provision for the Journey). During the persecution of 1391 he submitted to baptism and was named, according to Zacuto, Juan of Seville. He soon, however, returned to Judaism. See also Abravalla, Samuel.

Samuel Abravanel: Youngest son of Isaac Abravanel, and grandson of Judah; was born in 1473, at Lisbon. His father sent him to Salonica to pursue his Talmudic studies, where he became the pupil of Joseph Fasi. He lived at Naples, and was employed as financier by the viceroy Don Pedro de Toledo. He made the best possible use of his great wealth, which amounted to more than 200,000 gold zecchini or sequins (about $450,000). The poet Samuel Usque said that he deserved the surname "Tremegisto," that is, "thrice great": great in scholarship, great in name (ancestry), and great in wealth. "He generously employs his wealth in promoting the welfare of his coreligionists. He enables many orphans to marry, supports the needy, and endeavors strenuously to free captives, so that in him are combined all the great qualities which make one fitted for the gift of prophecy." By his contemporaries he was surnamed "Nasi" (Prince), and was much respected. His second wife, Benvenida Abravanela, a woman of prudence, culture, grace, piety, and charity, nobly seconded his efforts. The viceroy of Naples permitted his daughter Leonora, later grand duchess of Tuscany, to be on friendly terms with Benvenida and even to become her pupil. Leonora looked up to her with filial love and respect.

Samuel Abravanel was a patron of Jewish learning. His house was a favorite resort for Jewish and Christian scholars. The Portuguese refugee, David ben Yaḥya, whom Samuel succeeded in placing as rabbi at Naples, and the cabalist Baruch of Benevento, were his intimates. Following in the footsteps of his father, and aided by his noble wife, Samuel was always ready to defend his brethren in faith. When Charles V. issued an edict to expel the Jews from Naples, Benvenida, with the assistance of Leonora, intervened in their behalf so effectively that the decree was revoked. But several years later, when Charles V. ordered the Jews either to leave the land or to wear the badge, the Abravanels settled in Ferrara, where Samuel died in 1551, and Benvenida three years later.

The following were also prominent members of the family: the wealthy and learned "Prince" Ḥiyya Abravanel, who lived at Salonica with the preacher Senior Abravanel (died 1620); Hirsh Abravanel, who was head of the rabbinate at Lissa, Prussia (died 1863).

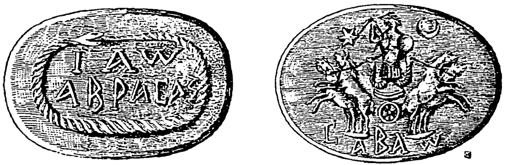
ABRAVANEL DORMIDO, DAVID. See Dormido, David Abravanel.

ABRAXAS or **ABRASAX** ('Αβράξας, oftener 'Αβρασάξ): A term of Gnostic magic, of uncertain etymology. According to Irenæus ("Adversus Hæreses," i. 24, 3–7), the Gnostic Basilides (died about 130) gave the name of Abraxas to the highest Being, who presides over the 364 kingdoms of spirits (52 × 7 = 364), because the numerical value of the letters of this name is equivalent to 365 (a = 1, b = 2, r = 100, a = 1, x = 60, a = 1, s = 200)—*i. e.*, the 364 spirits + the Highest Being Himself. In a magic papyrus it is expressly stated that Abraxas is equivalent to 365, the number of days in the year (Wessely, "Neue Zauberpapyri," p. 56; Dieterich, "Abraxas," p. 46). Bellermann ("Versuch über Gemmen mit Abraxasbild," Berlin, 1817–19, derives this word from the Coptic. He claims it is a compound of *Abrak* and *sax*, meaning "the holy Word," "the blessed Name." See, on the other hand, Baudissin, "Studien zur Semitischen Religionsgeschichte," i. 189, note 1. Other etymologies and a summary of all investigations in the matter are given by Matter in his "Histoire Critique du Gnosticisme," 1828 (German trans. by Dörner, ii. 56 *et seq.*, Heilbronn, 1834). Güdemann sees in Abraxas some connection with the magic formula of the papyri, "arbathiaoth" (which he identifies with ארבע אותיות), the four-lettered name of God ("Festschrift zum Achzigsten Geburtstage Moritz Steinschneider's," p. 15). Moïse Schwab suggests that Abraxas is the equivalent of אב ברא ("the Father created") ("Vocabulaire de l'Angélologie," p. 383). Geiger suggested a derivation for Abraxas from the Hebrew *ha-berakah* ("the blessing"); this is approved by King, "Gnostics," p. 251, but rightly rejected by Krauss in Pauly-Wissowa, "Realencyklopädie," p. 7.

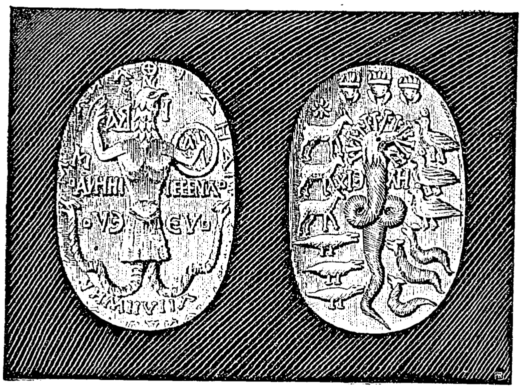


Abraxas God (Gnostic Gem, Obverse and Reverse).

(From King's "Gnostics.")

As has been shown by Schmidt ("Gnostische Schriften in Kopt. Sprache," pp. 562 *et seq.*), Abrasax stands in no organic connection with the Basilidian system and its 365 worlds corresponding with the numerical value of the Greek letters of Abrasax. Like Barbelo and other similar names mentioned by Priscillian, Abrasax represented a demiurge, a divine potency elevated by some heretic sect to the position of a god. From the papyri and the magic gems it is certain that the word refers to the use of the Ineffable Name as a master-key with which the powers of all the upper and the nether world are locked or unlocked, bound or loosened, by the great Manda da Haye (Wisdom of Life = God). Now there occurs in the mystical writings the name Raza Rabba ("the Great Secret"), met also in the Cabala under the name of Raza de Razin (" Secret of Secrets "). This suggests the etymology from Ab Raza, "Father of the Secret," which is the same as "Master Secret." See Brandt, "Mandaeische Schriften," pp. 143 *et seq.*; "Mandaeische Religion," pp. 213 *et seq.*

Abraxas-gems are engraved stones of varying material and form upon which this word appears, either alone or with other names of God, and in connection with mystic figures and groups of letters.



Abraxas (Gnostic Gem, Obverse and Reverse).
(From King's " Gnostics.")

The most frequently encountered Abraxas figure is a human form with a fowl's head and the extremities of a serpent, carrying in the one hand a shield and in the other a whip. These Abraxas-stones, especially those which from their material are used for superstitious practises, are also of interest from the standpoint of Judaism, inasmuch as they often bear Hebraic names of God: Iao, Sabaoth, Adonai, Eloai. Beside an Abraxas figure the following, for instance, is found: ΙΑΩ ΑΒΡΑΣΑΞ ΑΔΩΝ ΑΤΑ, "Iao Abrasax, thou art the Lord" (Bellermann, "Versuch," iii., No. 10). With the Abraxas-shield are also found the divine names Sabaoth Iao, Iao Abrasax, Adonai Abrasax, etc. (Baudissin, "Studien zur Semitischen Religionsgeschichte," i. 189 *et seq.*). All these stones are used as amulets, and they furnish indisputable evidence of Jewish influence over the views of heathen nations of antiquity. The magic papyri reflect the same ideas as the Abraxas-gems. The following example will suffice: "Iao Sabaoth, Adonai . . . Abrasax" (Wessely, "Neue Zauberpapyri," p. 27, No. 229; see the index). In the group "Iakoubia, Iaosabaoth Adonai Abrasax" (*ibid.* p. 44, No. 715), the first name seems to be composed of Jacob and Ya. The patriarchs are sometimes addressed as deities; for which fact many instances may be adduced. The magic word "Ablanathanalba," which reads in Greek the same backward as forward, also occurs in the Abraxas-stones as well as in the magic papyri. This word is usually conceded to be derived from the Hebrew (Aramaic), meaning "Thou art our father" (אב לן את), and also occurs in connection with Abraxas; the following inscription is found upon a metal plate in the Carlsruhe Museum:

ΑΒΡΑΣΑΞ
|| ΒΛΑΝΑΘ
ΑΝΑΛΕΛ

It is evident that the last two lines ought to be read Ablanathanalba, which Baudissin (*l.c.* 202) has overlooked. From the examples adduced it is evident that Abraxas probably means " holy name," seeing that it is often attached to divine appellations. It does not seem to be of Hebrew origin, as there is no possible derivation or etymology for it (a fact which in itself would be remarkable in view of the unchanged adoption of the names Adonai, Sabaoth, Eloe, and Iao), nor has it maintained itself in Jewish lore, while names of God play as important a part in Jewish mysticism as they do in Gnostic-heathen-Jewish magic, the most important testimonies to which are the magic papyri. There is not a single reliable instance of אברסכס or אברכסס occurring in Hebrew. Schwab, in his "Vocabulaire de l'Angélologie," under אברגג Abragag (=Abrasax), refers to "Sefer Raziel," 37*b*; under אברסכס he refers to the article יאיר, where also there is nothing more than a reference to "Raziel" (7*a*) again. In Gaster, "The Sword of Moses" (London, 1896), on p. 8, No. 6, among certain unintelligible magic groups of letters, אבכסס is found, which Gaster emends אברכסס. As the older and much more frequent form of the word is Abrasax, this emendation is certainly a hazardous one.

L. B.—K.

ABRECH.—Biblical Data: The proclamation of the criers on the approach of Joseph (Gen. xli. 43). It has been variously explained. Some favor an Egyptian origin, others a Semitic one. Jewish commentators derive it from *barak* (to bend the knee) and recognize in it a *hiphil* formation. The general opinion of scholars at present is in favor of Semitic origin. Delitzsch ("Hebrew Language," p. 25) refers it to the Assyrian *abarakku* (a titled personage), which has much in its favor. The El-Amarna tablets prove the possibility of a Semitic word finding its way into Egypt at an early date.

G. B. L.

——**In Rabbinical Literature:** The term Abrech, which occurs only once in the Scriptures, engaged the attention of the rabbis from an early date. The following two explanations were given in the middle of the second century of the common era: Judah b. Ilai considered Abrech as a compound of אב (father) and רך (tender), and explained Joseph's title to mean one who is a father in wisdom but young in years. This explanation was held by Judah's contemporary, Jose, "son of a woman of Damascus," to be a perversion of words. According to Jose, Abrech is identical with the title "Alabarchos," given to the head of the Jews in Egypt (Sifre, Deut. i.; Mek. on Deut. i. 1, published by Hoffmann in the Hildesheimer "Jubelschrift," Hebrew part, p. 5). Despite the opposition to it, Judah's explanation prevailed among the Jews (see Gen. R. xc. 3). Origen and Jerome, in

their commentaries on the word, doubtless obtained Judah's explanation from their Jewish teachers, though Origen supplements his remarks by saying that Abrech is to be literally rendered as γονατίζειν (bending of the knee). This view is advocated by Jewish grammarians from the time of Jonah ibn Ganaḥ. An interpretation different from the foregoing, which is of Palestinian origin, is that given by Babylonian scholars, who explain the word as being a compound of "ab" (father) and "rak" (Old Persian *arjaka* = king), signifying "father of the king" (B. B. 4*a*; Targ. O., Targ. Yer. *ad loc.*). The Babylonian etymology is followed by Peshito as well as by the Arabic translator, both rendering the word "father and ruler" (see Brüll, in Geiger's "Jüd. Zeit." iii. 281 *et seq.*; Ginzberg, in "Monatsschrift," 1899, xliii. 545).
L. G.

ABREST, PAUL D' (pen-name of **FRIEDRICH KOHNABREST**): Journalist; born at Prague, 1850; died at Vöslau, near Vienna, in July, 1893. He received his education at the Lycée Bonaparte in Paris, and on its completion he devoted himself to journalism. He was a frequent contributor to "Le Petit Journal," "La Vérité," "Le Rappel," "Le Siècle," and "L'Indépendance Belge." Later he became correspondent of the "Temps" at Vienna, at the same time contributing to Austrian and Hungarian journals. During the Russo-Turkish war he represented the "Siècle"; and afterward, at the instance of the French government, he went to Bosnia to investigate the economic condition of that country. Besides his articles, several collections of which have appeared in book form, Abrest wrote: "Vienne sous François Joseph," a "Life of General Hoche," and a history of the opera.

Bibliography: *Jewish Chronicle*, August 4, 1893, p. 6.
B. B.

ABROGATION OF LAWS: In Deut. xiii. 1 (xii. 32, A.V.) Moses is described as saying: "What thing soever I command you, observe to do it: thou shalt not add thereto, nor diminish from it." Taking this injunction literally, the Sadducees, and later the Karaites, rejected the rabbinical development of Judaism, as additions to and modifications of the Mosaic laws. But the injunction could not have meant that for all future time, without regard to varying circumstances, not the least alteration or modification should be made in the religious and civil laws established for the people of Israel.

Rabbinical Authority.

The ancient rabbis claimed authority, not only to make new provisions and to establish institutions as a "hedge" for the protection of the Biblical laws, but under certain circumstances even to suspend and to abrogate a Biblical law. They derived this authority from the passage in Deut. xvii. 8–11, in which mention is made of a supreme court consisting of priests, Levites, and "the judge that shall be in those days." Doubtful questions of law were to be brought before this court, and unconditional obedience to this supreme authority in all religious, civil, and criminal matters is emphatically enjoined in the words:

> "According to the law which they shall teach thee, and according to the judgment which they shall tell thee, thou shalt do; thou shalt not depart from the word which they may tell thee, to the right or to the left."

In reference to this, Maimonides teaches in his celebrated code "Hilkot Mamrim," i. 1:

> "From the Sanhedrin in Jerusalem, law and decision should go forth to all Israel. Whatever it taught either as tradition or by interpretation according to the hermeneutic rules, or whatever it enacted according to the exigencies of the time, must be obeyed."

"A later court has a right to reject a decision based on the interpretation of a former though higher court, for Scripture says: 'Go to the judge who will be in those days,' meaning, you shall go according to the authority of your own time" (*ibid.* ii. 1). And again:

> "Any religious court [kol bet din] has the power to set aside even a Biblical law as a temporary measure. If they find it necessary to suspend for the time being an injunction, or to permit one to act against a prohibition in order to bring the masses back to the Torah, or in order to prevent a greater evil, those in authority may do according to the exigency of the time. Just as a physician is sometimes compelled to amputate the limb of a patient in order to save his life and general health, so those in authority [bet din] may at any time decree the temporary suspension of some laws in order to secure the fulfilment of the religious law in general" (*ibid.* ii. 4).

Although Maimonides here refers only to the right of temporarily suspending a law, there are cases mentioned in the Talmud, as will be seen later, in which a Biblical law was entirely abrogated. Besides, the simile used by Maimonides in the passage just quoted applies rather to the abrogation than to the temporary suspension of a law; for the amputation of a limb to save the life and health of the patient is not a mere temporary separation.

Talmudic View.

The Talmud contains the following maxims by which the religious authorities of various periods were guided in abrogating certain laws: "The abrogation of a law is sometimes equivalent to the maintenance of the law"; that is, to set a law aside is sometimes as meritorious as to establish it (Men. 99*b*). "It is better that a single law be uprooted than that the whole Torah be forgotten" (Tem. 14*b*). "There are times when the duty of working for the glory of God requires the abolition of a law" (Ber. 54*a* and 63*a*). "The court [the religious authority] may, under circumstances, decree to uproot a positive law of the Bible" (Yeb. 89*b*). In citing some examples of suspension and of abrogation of Mosaic laws in different periods, one may be recorded from the Bible. According to I Kings, xviii. 31, the prophet Elijah offered a sacrifice upon the altar erected on Mount Carmel. This was in contravention of the law in Deut. xii. 13, which forbade the offering of sacrifices outside of the central sanctuary. The rabbis defend the act of the prophet on the ground that it was a temporary measure necessitated by the circumstances (Yeb. 90*b*).

Of more importance are the following cases of the abrogation of a Biblical law as stated in the Talmud: Ezra (according to Yeb. 86*b*, Ḥul. 131*b*) decreed that the first tithe should be given to the priests, contrary to the Mosaic Law in Num. xviii. 21, which ordained that they should be given to the Levites. In consequence of this abrogation another law had to be abrogated, namely, that which referred to the solemn profession which, according to Deut. xxvi. 12–15, every farmer had to make annually in the Temple; for the passage in this confession, "have given it [the tithes] to the Levite," could not any longer be said in truth (Soṭah, 47*b*, after Tosef., Sotah, xiii. 10).

The Prosbul.

Hillel the Elder enacted a measure, termed Prosbul, which was tantamount to an abrogation of the Biblical law in Deut. xv. 2, concerning the release from debt in the Sabbatical year. Finding that this law, which was intended to benefit the poor, proved in the course of time rather a disadvantage to them, as no one was willing to lend them money lest he lose his claim at the approach of the Sabbatical year, Hillel, by virtue of his authority as head of the Sanhedrin, caused a law to be enacted by which the creditor could transfer the debt to the court in writing, so that the latter might collect it in spite of the Sabbatical year (Mishnah Sheb. x. 3, 4). See Accommodation of the Law.

Discontinuance of Jubilee.

While the Sabbatical year, especially in so far as it concerned the fallow land (Lev. xxv. 3–7), was strictly observed during the period of the second Temple, and even after its destruction, there is no historical record of the observance of the jubilee year as ordained in Lev. xxv. 8–12. According to the Talmud ('Ar. 32*b*), the observance of the jubilee ceased from the time when the tribes of Reuben and Gad and the half-tribe of Manasseh were carried off by the king of Assyria. The Talmud justifies the abrogation of this Biblical institution by a rather too literal interpretation of the words in the law concerning the jubilee year: "And ye shall proclaim liberty throughout the land unto all the inhabitants thereof"; only when all the inhabitants were in the land was the jubilee to be observed, but not when some tribes were exiled from it ('Ar. *ibid.*). The abrogation of other Biblical laws on account of changed circumstances is ascribed to Rabbi Johanan ben Zakkai, as the abrogation of the water of the ordeal, ordained in Num. v. 11–31 for the trial of a woman suspected of adultery (Soṭah, ix. 9), and the abrogation of the solemn rite of expiation ('Eglah 'Arufah) for a murder the perpetrator of which is unknown, as ordained in Deut. xxi. 1–9 (Tosef., Soṭah, xiv. 1 and *ibid.*).

After the Second Temple.

In consequence of the destruction of the Second Temple by the Romans numerous laws were suspended, especially the sacrificial laws and most of the laws concerning Levitical uncleanliness and purification. The Sanhedrin of Jabneh, on the motion of Rabbi Joshua ben Hananiah, permitted an Ammonite to enter the Jewish congregation of Israel, thus actually abrogating the Biblical law in Deut. xxiii. 4 [A. V. 3]: "An Ammonite shall not enter into the congregation of the Lord." The reason for setting this Biblical law aside was that it was claimed by the rabbis that, in consequence of the conquest of the land of the Ammonites by Sennacherib, the real descendants of that nation could not with certainty be identified (Mishnah Yad. iv. 4). In connection with the above-mentioned cases in which Biblical laws were abrogated, the following one may here be referred to; though it does not concern any express Biblical law, it deals with one which was considered to have a Biblical basis. For many centuries it was regarded as a transgression of the Law to commit the traditional law to writing; it was to be transmitted only from mouth to mouth, and was therefore called the oral law, in contradistinction to the written Law contained in the Pentateuch. The purpose of this prohibition was probably that the traditional law should not be regarded as of equal sanctity with the Law of Moses. A Biblical basis for this prohibition was found in the passage of Ex. xxxiv. 27: "Write thou these words," etc. By emphasizing the word "these" the passage was interpreted to mean: "Only these words (of the divine Law) you may write, but not the traditional law." Nevertheless, when in the course of time the subject-matter of the oral law had accumulated to such an extent that it became almost impossible to preserve it by oral transmission, it was written down in the Mishnah and kindred works; and the abrogation of the prohibition so long regarded as Biblical is justified in the Talmud by a reference to the principle: "It is better that one law be set aside rather than that the whole Law be forgotten" (Tem. 14*b*).

Abrogative Power of Later Courts.

As regards the abrogation of rabbinical laws, customs, and institutions, the following principles are laid down in the Talmud: "A later court [that is, an authoritative assembly of scholars] may abrogate the decision of a former court only when it is superior in learning and in numbers" (Mishnah 'Eduy. i. 5). "A prohibition passed by a majority of votes requires for its abrogation another majority of votes" (Beẓah, 5*b*). "We must not impose on the community a restriction which the majority can not endure" ('Ab. Zarah, 36*a*). In accordance with these principles and their actual application in cases mentioned in the Talmud, Maimonides formulates in his code the following rules:

1. Laws and customs, whether prohibitory or mandatory, if established by a former authority and generally accepted in all Israel, may only be abrogated by a later assembly that is superior to the former, both in learning and in number. By the latter term is meant the number of contemporaneous scholars endorsing the authority and the decision of that assembly.
2. Restrictive measures, however, which were enacted by a former authority as a necessary "hedge" to protect the Torah, and which have been accepted in all Israel, may not be abrogated by a subsequent though higher authority.
3. If it is found that such laws are not as generally accepted or as generally tolerable as was formerly supposed, a later though inferior assembly may abrogate them.
4. Every law, however, may be set aside temporarily by a minor authority, when it is necessary for the maintenance of religion in general ("Hilkot Mamrim," ii. 2–7).

Mention may here be made of cases where the motives which had caused the enactment of a law have ceased to operate. According to Maimonides even such a law can be abrogated only by an assembly of superior authority; while, according to Abraham ben David, the celebrated critic of Maimonides' code, and according to Asheri and others, the abrogation of such a law can be decided by any rabbinical assembly, though it be of lesser authority than that which had enacted the law. During the Middle Ages and down to the last century the religious leaders in Israel kept within the limits of the above-stated rules regarding the Abrogation of Laws. In the seclusion of their ghetto life, and under the oppression and persecution which they had to endure, the Jews felt neither the necessity nor the desire to abrogate any of the sacred laws and customs inherited from their forefathers. The teachers were in general inclined rather to increase than to diminish the burden of the law.

Modern Times.

From the time, however, when in most of the civilized countries the Jews began to enjoy the blessings of emancipation and to participate in the modern culture of the world, the necessity for abrogating some of their ancestral laws and customs which were not compatible with their new circumstances became more and more apparent. Not having, as heretofore, their own judicature, the civil law of the Pentateuch, so elaborately developed in the Talmud and in the rabbinical codes, was of necessity set aside. In this respect even the most conservative willingly acquiesced in its abrogation, following the principle laid down by Samuel, one of the most prominent teachers in the beginning of the third century, *dina de-malkuta dina* ("the civil law of the land in which we live is our law," Giṭ. 10*b*).

Many of the ritual and ceremonial laws and customs fell of themselves into disuse; others were either abolished or modified by the various rabbinical conferences held during the last half century in Germany and in the United States. The authority of these conferences has been recognized by the reform Jews only. See CONFERENCES, RABBINICAL.

ABSALOM ("The Father of Peace").—**Biblical Data:** Third son of King David, born in Hebron in the early years of that king's reign. His mother, Maachah, was the daughter of Talmai, king of Geshur (II Sam. iii. 3; II Sam. xiii. 37; I Chron. iii. 2).

Absalom appears as the avenger of his sister Tamar, who had been entrapped, outraged, and shamefully cast aside by her half-brother Amnon, David's eldest son. Having heard of the crime, the king was greatly irritated, but he had not the courage to punish Amnon, on account of his love for his first-born. The victim sought refuge in the house of Absalom, who advised her to bear the insult in silence. Absalom himself did not at first resent it otherwise than by systematically ignoring Amnon (II Sam. xiii. 1-22), but on the occasion of a banquet two years later, at which all David's sons were present, Absalom's servants, at the command of their master, fell upon Amnon and slew him (II Sam. xiii. 23-33). The other sons of David hurried back to Jerusalem, where a rumor had already spread that Absalom had killed all his brothers; and the king deeply mourned over the death of Amnon. As for Absalom, he fled to Talmai, his grandfather, in Geshur, and remained there three years (II Sam. xiii. 33-38).

But soon David longed to see Absalom, and Joab, David's nephew, moved by sympathy for the murderer, availed himself of this opportunity to persuade the king to recall Absalom. David consented, and Joab went to Geshur and brought Absalom to Jerusalem, where he was restored to his house and family, but was granted no privileges of rank at court. Through the influence of Joab a reconciliation between father and son was brought about (II Sam. xiv. 1-24). At this time Absalom is represented as a handsome and full-grown man. His beauty, in combination with an amiable disposition, rendered him popular among the people, and he took advantage of this popularity to strengthen his own position and to arouse dissatisfaction with David (*ibid.* 25-35). Absalom asked his father's leave to go to Hebron, and he used the opportunity to encourage a rebellion against David (II Sam. xv. 1-9). Ahithophel, David's counselor, joined Absalom, while Joab remained faithful to David. The rebellion assumed such large proportions as to oblige David to leave Jerusalem and seek refuge beyond the JORDAN. Absalom entered Jerusalem, and, on the advice of Ahithophel, appropriated the harem of David as a symbol of having entered upon royal control (II Sam. xv. 10-xvi. 23).

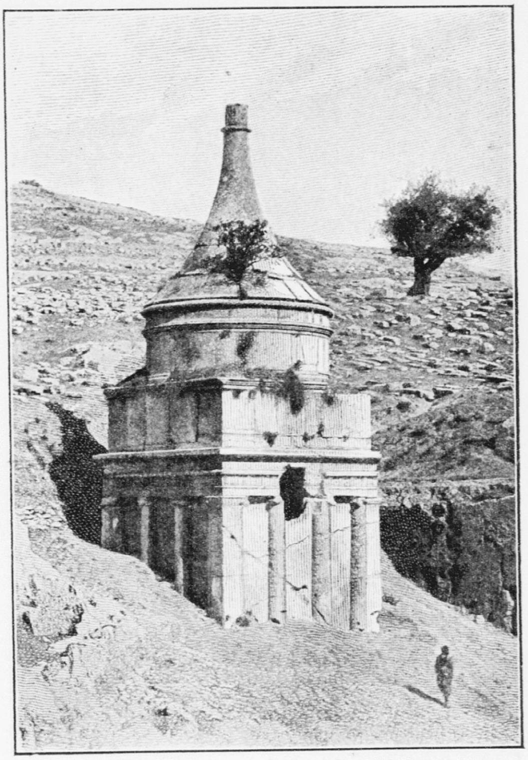
Absalom Caught in a Tree.
(From the Yiddish "Yosippon," Fürth, 1769.)

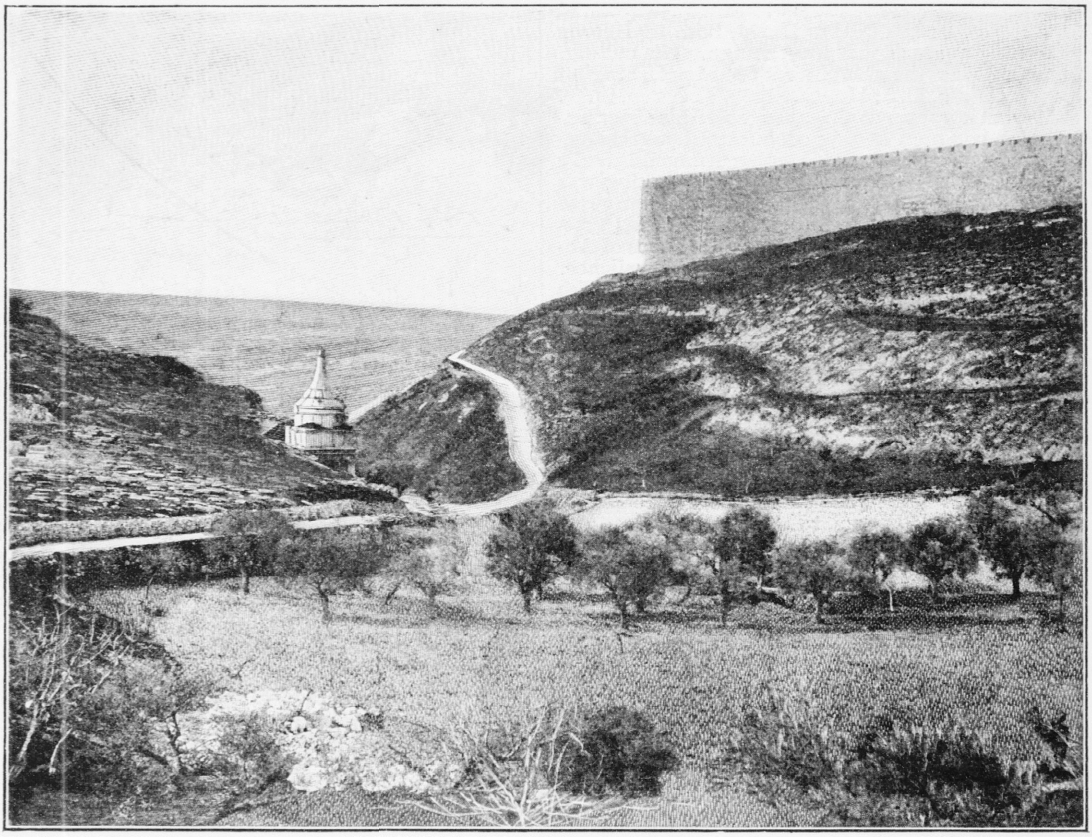


The Traditional Tomb of Absalom.
(From a photograph.)

Ahithophel proposed to pursue David with 12,000 picked soldiers and to bring back to Absalom all the people that had fled with David. This plan was frustrated by Hushai, who counseled that all Israel be gathered from Dan to Beer-sheba, unto Absalom, and that the latter should then go to battle in his own person (II Sam. xvii. 7-13). It is very likely that, during this interval, Absalom was anointed king (II Sam. xix. 11). But the delay gave David time to reach the Jordan unmolested and also to strengthen his army. While the king himself remained in Mahanaim he sent forth his warriors divided into three columns (II Sam. xviii. 1-4). The encounter took place in the forest of Ephraim. Absalom was defeated, and while he was fleeing through the forest his long hair was caught in the branches of a tree. One of Joab's men found him suspended from the tree and reported the fact to Joab, who thrust three darts through the heart of the rebellious prince. The death of Absalom put an end to the rebellion. According to II Sam. xviii. 33, xix. 1–5, David's mourning was greater for Absalom than for Amnon. See ABSALOM'S TOMB.

H. H.

——**In Rabbinical Literature:** The life and death of Absalom offered to the rabbis a welcome theme wherewith to warn the people against false ambition, vainglory, and unfilial conduct. The vanity with which he displayed his beautiful hair, the rabbis say, became his snare and his stumbling-block. "By his long hair the Nazarite entangled the people to rebel against his father, and by it he himself became entangled, to fall a victim to his pursuers" (Mishnah Soṭah, i. 8). And again, elsewhere: "By his vile stratagem he deceived and stole three hearts, that of his father, of the elders, and finally of the whole nation of Israel, and for this reason three darts were thrust into his heart to end his treacherous life" (Tosef., Soṭah, iii. 17). More striking is the following: "Did one ever hear of an oak-tree having a heart? And yet in the oak-tree in whose branches Absalom was caught, we read that upon its heart he was held up still alive while the darts were thrust through him [Mek., Shirah, § 6]. This is to show that when a man becomes so heartless as to make war against his own father, nature itself takes on a heart to avenge the deed."



TRADITIONAL TOMB OF ABSALOM, SHOWING ITS POSITION NEAR THE WALL OF JERUSALEM.
(From a photograph.)

Popular legend states that the eye of Absalom was of immense size, signifying his insatiable greed (Niddah, 24*b*). Indeed, "hell itself opened beneath him, and David, his father, cried seven times: 'My son! my son!' while bewailing his death, praying at the same time for his redemption from the seventh section of Gehenna, to which he was consigned" (Soṭah, 10*b*). According to R. Meir (Sanh. 103*b*), "he has no share in the life to come." And according to the description of Gehenna by Joshua ben Levi, who, like Dante, wandered through hell under the guidance of the angel Duma, Absalom still dwells there, having the rebellious heathen in charge; and when the angels with their fiery rods run also against Absalom to smite him like the rest, a heavenly voice says: "Spare Absalom, the son of David, My servant."

ABSALOM'S TOMB: A tomb twenty feet high and twenty-four feet square, which late tradition points out as the resting-place of Absalom. It is situated in the eastern part of the valley of Kidron, to the east of Jerusalem. In all probability it is the tomb of Alexander Jannæus (Conder, in Hastings' "Dict. Bible," article "Jerusalem," p. 597). It existed in the days of Josephus ("Ant." vii. 10, § 3). See illustrations on pp. 133, 134.

ABSALOM ('Αψάλωμος): One of the five sons of John Hyrcanus, who was thrown into prison with his mother and two of his brothers when Judas Aristobulus ascended the Hasmonean throne (105 B.C.). However, after a year's suffering, the king's death released him. His brother, Alexander Jannæus, then assumed the royal dignity, and caused the execution of another brother, who had aimed at the crown, while Absalom, who preferred the life of a subject, he covered with honors. Nothing more is known concerning Absalom's career, except that he outlived all his brothers, and was taken prisoner by Pompey when he captured Jerusalem in 63 B.C. Through his daughter, who married his nephew Aristobulus II., Absalom became the great-grandfather of Mariamne, the wife of Herod the Great.

M. BR.

ABSALOM THE ELDER: A Tanna, the dates of whose birth and death are unknown. A homiletic interpretation of Ex. xiv. 15 is recorded in his name in the Mekilta, Beshallaḥ, 3. There is no certainty about his name, for in a parallel passage (Ex. R. xxi. 8) he is quoted as "Abṭolis," "Abṭelos" (an abbreviation of Abtolmus-Eutolemus). Elijah Wilna corrected his name in accordance with this in the passage of Mekilta, an emendation fully justified considering the fact that copyists were generally not familiar with Greek names.

ABSOLUTE, THE (from the Latin *absolutus*= loosened, removed from other things; Greek *καθ' αὐτό*= self-existing, by itself): A philosophic term indicating a being or substance free from contingency and external determination. It is defined by the philosophers in various ways. Spinoza defines it as the *causa sui*, the cause of itself; Kant as the *Ding an sich*, the thing in itself; Fichte as the *gänzlich Unumschränktes*, the completely unlimited; Schopenhauer as *das An-nichts-Geknüpfte*, the unconnected; Spencer as "the Unknowable." The opposite idea is that of *the relative, the conditional, the determined.* From Aristotle down, the notions of Deity and of The Absolute are identified with each other in philosophy; for Deity is universally conceived as the uncaused cause of all other existences, as the *causa prima*, as the first, unpreceded source of all existence (Aristotle, "Metaphysics," ii. 2, xii. 7 *et seq.*; "Physics" viii. 5; Maimonides, "Moreh Nebukim," i. 69). This first cause is called in Arabic by two synonymous terms, *illah* and *sabab*, which are reproduced in the philosophic Hebrew by the terms, also synonymous, עלה and סבה. The Absolute forms the limit of the conceivable, the highest point of related thought.

The pyramid of logical thinking must pause or reach its summit at the crowning point; a *regressus in infinitum*, that is, a pushing of thought beyond this last reach of mental ability, is impossible. According to Maimonides (*l.c.*, lxviii.) and the other Arabic-Jewish philosophers, this highest attainable goal of thought is identical with God and The Absolute. The classical representative of German philosophic romanticism, Schelling, approaches very closely in his views to the Arabic-Jewish conception of The Absolute, in which the thinking subject and the thought-object become one.

L. S.

ABSTINENCE: Refraining from enjoyments which are lawful in themselves. Abstinence can be considered a virtue only when it serves the purpose of consecrating a life to a higher purpose. The saints, or adherents of religious and philosophical systems that teach the mortification of the flesh, practise asceticism only with the view of perfecting the soul for the higher state of bliss for which they believe it to be destined (see ASCETICISM). The Jewish religion, having for its fundamental ethical principle the law of holiness: "Ye shall be holy: for I the Lord your God am holy" (Lev. xix. 2), accentuates the perfectibility of the whole man, while demanding the sanctification of all that pertains to human existence. "The Lord did not create the world for desolation; he formed it for human habitation" (Isa. xlv. 18) is the principle emphasized by the rabbis (Pes. 88*b*). In the ideal state of things nothing should be profane. "In that day there shall be [inscribed] upon the bells of the horses: Holiness unto the Lord! And the pots in the Lord's house shall be like the bowls before the altar" (Zech. xiv. 20, 21). This view is expressed in no uncertain terms by Rab in Yer. Ḳid. iv., at the end: "Man in the life to come will have to account for every enjoyment offered him that was refused without sufficient cause." Accordingly we find asceticism, or abstinence as a principle, condemned in the Talmud. "Why must the Nazarite bring a sin-offering at the end of his term? (Num. vi. 13, 14). Because he sinned against his own person by his vow of abstaining from wine," says Eliezer ha-Kappar (Sifra, *ad loc.*, and Ned. 10*a*), drawing his conclusion from this Biblical passage: "Whosoever undergoes fasting and other penances for no special reason commits a wrong." "Is the number of things forbidden by the Law not enough that thou venturest to add of thine own accord by thy inconsiderate vow?" says R. Isaac (Yer. Ned. ix. 41*b*). See Maimonides, "Yad ha-Ḥazaḳah, De'ot," iii. 1, where the monastic principle of abstinence, whether in regard to marriage or to eating of meat and drinking of wine, or to any other personal comfort, is most emphatically condemned as antagonistic to the spirit of Judaism.

Still abstinence is frequently considered meritorious, if not actually necessary, as a means of self-discipline. Simon the Just said: "I partook of a Nazarite meal only once, when I met with a handsome youth from the South who had taken the vow. When I asked him the reason, he said: 'I saw the Evil Spirit pursue me as I beheld my face reflected in the water, and I swore that these long curls shall be cut off and offered as a sacrifice to the Lord.' Whereupon I kissed him upon his forehead and blessed him, saying: 'May there be many Nazarites like thee in Israel!'" (Nazir, 4*b*). In this sense abstinence is supposed to have a positive value, as a training in self-control. Consequently the law: "Be holy!" was interpreted: Exercise abstinence in order to arrive at the state of purity and holiness ('Ab. Zarah, 20*b*; Sifra, Ḳedoshim, beginning). Excessive indulgence in wine or in any form of enjoyment being harmful (Prov. xxiii. 20), man must learn self-restraint in due time. "Haste!" people say to the Nazarite. "Pass quickly around the vineyard, come not too near the grape" (B. M. 92*a*) became the proverbial warning. "Make a fence around the Law" (Ab. i. 1; Ab. R. N. ii.). "Abstain from everything evil and from whatsoever is like unto it," a rule found alike in the "DIDACHE," iii. 1, and in the Talmud

(Ḥul. 44*b*)—a saying based on Job, xxxi. 1. "Abstain from lusts of the flesh and the world" ("Didache," i. 4). All the Mosaic laws concerning diet are declared by Rab to have for their purpose the purification of Israel (Lev. R. 13)—to train the Jew in self-discipline.

Accordingly there were those that taught and practised abstinence for the purpose of self-consecration. Such were the followers of the Rechabites (Jer. xxxv. 2) among the Essenes, "the water-drinkers" (Mek., Yithro, Amalek 2). A revival of their principles was attempted in Persia by Abu Isa al-Ispahani in the eighth century, who added to the prohibition of wine also that of meat. With this may be compared the vegetarianism of the modern sect of Ḥasidim. The tendency to mysticism induced moral philosophers of the Middle Ages like Baḥya ibn Paḳuda to favor abstinence as a mode of moral self-elevation (see "Ḥobot ha-Lebabot," ix. 5, xi. 6).

The Biblical narrative, however, according to which man, in the golden age of innocence (Gen. i. 29), abstained from eating the flesh of animals, while after the flood, in an age of decline, the eating of meat, with the exception of the blood, was permitted (Gen. ix. 2 *et seq.*), is in striking accord with Greek or Aryan tradition (Plato, "De Legibus," vi. 782; Plutarch, "Symposion," viii. 83; Porphyrius, "De Abstinentia," iii. 25, 26; Diogenes Laertius, viii. 20; Spiegel, "Eranische Alterthümer," i. 455).

As a rule, however, Jewish opinion has been against total abstinence, and is best represented by Maimonides, who advocates the "golden middle way" of moderation ("Yad ha-Ḥazakah, Hilkot De'ot," i.-iii.). K.

ABTALION, POLLION, or PTOLLION: A leader of the Pharisees in the middle of the first century B.C. and by tradition vice-president of the great Sanhedrin of Jerusalem. He was of heathen descent (Bab. Yoma, 71*b*; 'Eduy. v. 6; Giṭ. 57*b*; Yer. M. Ḳ. iii. 81*b*; see Weiss, "Dor Dor we-Dorshaw," i. 1, and Landau, p. 319). Despite this fact, Abtalion, as well as his colleague, Shemaiah, the president of the Sanhedrin, was one of the most influential and beloved men of his time. Once, when the high priest was being escorted home from the Temple by the people, at the close of a Day of Atonement, the Talmud (Yoma, 71*b*) relates that the crowd deserted him upon the approach of Abtalion and his colleague and followed them. Abtalion used his influence with the people in persuading the men of Jerusalem, in the year 37 B.C., to open the gates of their city to Herod. The king was not ungrateful and rewarded Abtalion, or, as Josephus calls him, "Pollion," with great honors (Josephus, "Ant." xv. 1, § 1). Although there is no doubt that, in this passage of Josephus, Abtalion is meant by this name Pollion (the original form of the name is presumably "Ptollion," which explains both the prefixed *A* in the Talmud and the omission of the *t* in Josephus), in another place ("Ant." xv. 10, § 4), where this name recurs, it is doubtful whether Abtalion is intended or not. Josephus relates there how Herod exacted the oath of allegiance under penalty of death, and continues: "He desired also to compel Pollion, the Pharisee, and Sameas, together with the many who followed them, to take this oath; they, however, refused to do this, but nevertheless were not punished as were others who had refused to take it, and this indeed out of consideration for Pollion." Since this episode took place in the eighteenth year of Herod's reign (20 or 19 B.C.), this Pollion can not have been Abtalion, who died long before, as we learn from authoritative Talmudic sources, according to which Hillel, the pupil and successor of Abtalion, was the leader of the Pharisees about 30 B.C. It is probable, therefore, that Josephus was misled by the similarity of the names Shemaiah and Shammai, and so wrote "Pollion and Sameas" instead of "Hillel and Shammai."

Very little is known concerning the life of Abtalion. He was a pupil of Judah ben Ṭabbai and Simon ben Sheṭaḥ, and probably lived for some time in Alexandria, Egypt, where he and also his teacher Judah took refuge when Alexander Jannæus cruelly persecuted the Pharisees. This gives pertinence to his well-known maxim (Ab. i. 12), "Ye wise men, be careful of your words, lest ye draw upon yourselves the punishment of exile and be banished to a place of bad water (dangerous doctrine), and your disciples, who come after you, drink thereof and die, and the name of the Holy One thereby be profaned." He cautions the rabbis herein against participation in politics (compare the maxim of his colleague) as well as against emigration to Egypt, where Greek ideas threatened danger to Judaism. Abtalion and his colleague Shemaiah are the first to bear the title *darshan* (Pes. 70*a*), and it was probably by no mere chance that their pupil Hillel was the first to lay down hermeneutic rules for the interpretation of the Midrash; he may have been indebted to his teachers for the tendency toward haggadic interpretation. These two scholars are the first whose sayings are recorded in the Haggadah (Mek., Beshallaḥ, iii. 36, ed. Weiss.). The new method of *derush* (Biblical interpretation) introduced by Abtalion and Shemaiah seems to have evoked opposition among the Pharisees (Pes. 70*b*. Compare also Josephus, *l.c.*, Πολλίων ὁ Φαρισαῖος, where a title is probably intended). Abtalion and Shemaiah are also the first whose Ḥalakot (legal decisions) are handed down to later times. Among them is the important one that the paschal lamb must be offered even if Passover fall on a Sabbath (Pes. 66*a*). Abtalion's academy was not free to every one, but those who sought entrance paid daily a small admission fee of one and a half tropaika; that is, about twelve cents (Yoma, 35*b*). This was no doubt to prevent overcrowding by the people, or for some reasons stated by the Shammaites (Ab. R. N. iii. [iv.] 1).

ABTALION (OTTAVIANO), SON OF MORDECAI (MARCO) OF MODENA: Italian Hebrew scholar; born in Modena in 1529; died in Ferrara in 1611. From the fact that Azariah de Rossi in his "Meor 'Enayim," p. 98*b*, refers to him as איש מודינה ("a man of Modena"), it is assumed that he was a native of that city. The mere family name De Modena, when not implying actual birth or residence, is expressed in Hebrew by ממודינה ("of Modena"). The descendants of this family now bear the simple name "Modena." The family originated in France, whence it emigrated to Italy during one of the expulsions of the Jews. Mordecai, the father of Abtalion, was a very learned rabbi and distinguished physician in Bologna. Abtalion, the youngest of four sons, removed to Ferrara, where he distinguished himself through his knowledge of Hebrew and his secular attainments. Both he and his father seem to have written much, though nothing has been printed.

Abtalion is remembered chiefly because of his intercession with Pope Gregory XIII., who in 1581 had decreed that all Jews, under threat of severe penalties, deliver up all the copies of the Talmud and other rabbinical works in their possession, in order that they be burnt. The Jews were naturally anxious to secure the repeal of this decree, and, as Abtalion was well acquainted with Latin, a number of Jewish congregations in his district chose him as their delegate. The pope admitted him to several audiences. A long and well-conceived address in choice Latin, which Abtalion delivered before the pope and many of the Church dignitaries, made a deep impression upon them, and the decree was revoked. Abtalion appears to have been in his youth a cabalist, for it was commonly reported that he had invoked the prophet Elijah, who revealed himself to him.

BIBLIOGRAPHY: Ghirondi and Nepi, *Toledot Gedole Yisrael*, s.v.; Grätz, *Gesch. d. Juden*, x. 141; Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 176. A relic of an old family archive is in the possession of a descendant, Abd ul-Kader Modena, assistant librarian of the University of Padua. It contains, among others, a letter sent to Abtalion from Rome, dated 1581, informing him of the steps which had been taken to secure the revocation of the Talmud decree by the Papal See. In this letter his name is written Ottaviano da Modena.

E. L.

ABTALION BEN SOLOMON: Italian rabbi; born at Consiglio about 1540; died Oct. 26, 1616. He was a pupil of Samuel Judah Katzenellenbogen, rabbi of Padua. His veneration for his teacher was so great that he had his portrait painted and hung in his study. When asked to explain this act, then an uncommon one among the Jews, he wittily replied that Isaiah had said (Isa. xxx. 20), "And thine eyes shall see thy teachers." After having completed his studies he settled as rabbi at Rovigo. A decision rendered by Abtalion on a question concerning the ritual fitness of a *miḳweh* (ritual bath) gave rise to a heated discussion among the Italian rabbis, his opponents being the rabbis of Venice, who were the most learned in the country. Apart from several decisions on that *cause célèbre*, scattered through the works of the most important rabbis of those times, there are four books wholly devoted to the subject; namely: "Milḥamot Adonai" (Venice, 1608); "Miḳweh Yisrael" (Venice, 1607); "Palge Mayim" (1617) for, and "Mashbit Milḥamot" (1606) against, Abtalion. Abtalion vehemently condemned the *pilpul* method, and opposed it. Leon de Modena, the critic (1571–1648), glorified Abtalion's name in an elegy which was used as the latter's epitaph.

L. G.

ABTERODE (APTROD), DAVID: Rabbinical writer; great-grandfather of DAVID SINZHEIM; probably born at Abterode near Frankfort-on-the-Main, in which town he lived toward the end of the seventeenth and at the beginning of the eighteenth century. He wrote commentaries on the "Sefer Ḥasidim" and on the "Yoẓerot" (Liturgies for Festivals); but the manuscripts were completely destroyed by the great fire in that city in 1711. His son Solomon Zalman rewrote from memory the commentary on "Sefer Ḥasidim," and published it in 1724.

ABTOLMUS. See EUTOLEMUS.

ABU: Arabic word meaning "father." With its different cases *aba* (accusative) and *abi* (genitive), as well as its abbreviated form *bu*, it is frequently used in Arabic as the first element in certain compound names. The relation between "Abu" and the succeeding name is either of genealogical, historical, or attributive nature, as Steinschneider designates it.

The genealogical relation is the oldest and most original, for in olden times Abu denoted the actual father of a son (more rarely of a daughter), upon whose own proper name the word Abu followed. Thus, when a man whose real name was Ibrahim married and had a son whom he named Isḥaḳ (Isaac) he would thenceforward be called Abu Isḥaḳ.

The use of Abu in the formation of names in those cases wherein some relationship in history or legend is to be expressed is called the historical relation of the word. When, for instance, any one of the name of Ibrahim (Abraham) receives the cognomen of Abu Isḥaḳ (Isaac), the particle Abu is intended to recall the particular Ibrahim mentioned in the Bible and Koran, who actually was Abu ("Father") of Isaac. Owing to the extensive use of these names among the Arabs and the great difficulty they offer to Europeans, the following list of historical names, called *kunya* by the Arabs, may be of service: (1) The usual cognomen for Ibrahim is Abu Isḥaḳ. (2) Isḥaḳ is Abu Ibrahim: in which Abu has entirely lost its original signification of "father." (3) Ya'akub (Jacob) is called Abu Yusuf (Joseph). (4) Yusuf again is called Abu Ya'akub. (5) Musa (Moses) has two cognomens, Abu' Imram (Amram) and Abu Harun (Aaron). (6) Harun's kunya is Abu Musa. (7) Da'ud (David) is called Abu Sulaiman (Solomon). (8) Sulaiman is called Abu Da'ud, or even Abu Ajub (Job).

Abu is used attributively in conjunction with adjectives or abstract nouns, forming names like the English "Goodman," "Prettyman," "Longman," "Longfellow," etc., as, for instance, Abu al-Kheir, "Father of the Good." The following adjectives, according to Steinschneider, are those most employed by Judæo-Arabic writers in connection with Abu, either with or without the definite article:

Afia or Afiyya
'Alâ
'Ali
Barakat
Fada
Fa'dhil
Faraj
Fath
Fihm
Ḥajaj
Ḥasan or Ḥassan
Hashim
Jayyid
Kheir
Maḥasin
Manẓur
Muna
Munadim
Nasr
Ridha
S'ad or Sa'ad
Sa'id
Ṭahir
Taur or Thur
Walid

ABU AARON OF BAGDAD. See AARON BEN SAMUEL OF BABYLON.

ABU ABDALLAH MOHAMMED AL-NASIR: Almohade sultan; ruler of Morocco and southern Spain at the beginning of the thirteenth century. The rule of the Almohade sultans necessarily proved oppressive to the Jews under their sway. They had to choose between conversion to Islam and quitting the country. Many adopted the former course, though only outwardly, a practise sanctioned to a certain extent by Maimonides' father, as well as by Maimonides himself. This was not unknown to the Jewish authorities, who acquiesced in it. Abu Yusuf Ya'akub (1184–98), himself a noted theological authority among the Almohade rulers, hoped to make the proselytes better Moslems by ordering them to wear a special garb, consisting of a black gown with long sleeves, a coarse veil to serve as headgear. As soon as his son Abdallah al-Nasir ascended the throne, the Jews of the Maghreb tried to induce him to repeal this law; but they met with small success. He only changed the colors and ordered them to wear yellow. This was the beginning of a distinguishing costume worn by Jews in the Middle Ages, and the practise was soon imitated in European countries. See BADGE.

ABU ISḤAḲ AL-ELVIRI: Mohammedan poet; lived in Spain toward the middle of the eleventh century. In one of his poems he attacked Jews in general, and in particular Joseph ibn Nagrela, whom Badis, king of the Berbers, had appointed vizier. Abu Isḥaḳ's inflammatory verses hastened. if they did not directly cause, the assassination of Joseph ibn Nagrela.

W. M.

ABU ISḤAḲ IBRAHIM IBN SAHL (or SUHL) AL-ISRAILI OF SEVILLE: Spanish poet of the thirteenth century; died at sea in 1259 or 1260. Under the pressure of the Almohade rule he embraced the Mohammedan faith, but it was believed in Spain that he recanted before he died. There exist three editions of his works (Cairo, 1875 and 1885; Beirut, 1885), which were written in Arabic, and were edited by Ḥasan b. Mohammed al-'Aṭṭar, who also appended a biography of the poet, in which he broadly discussed the question of the sincerity of Ibn Sahl's conversion mentioned above. The poems are mostly of a religious character; a specimen may be found in Ḥaji Khalfah's article on the poet (vol. iii. 241, "Diwan," p. 52). Larger extracts are given in Mohammed ben Shakir's biographical dictionary ("Faawat al-Wafayat," Bulak, 1866, pp. 29-35). The attention paid to this poet is probably due to the circumstance that he was a converted Jew; for this reason the authenticity of many of his poems is open to grave doubt. Abu Sahl ranks among the oldest poets who developed the species of *muwashshah* songs, or girdle rimes, consisting of rimed stanzas headed and concluded by verses of different rimes, but repeated in each subsequent strophe. One of Abu Sahl's *muwashshaḥs* is printed together with six other poems in a little volume entitled "The Seven Sparkling Stars'; that is, the Andalusian Muwashshaḥs," p. 9, Beirut, 1864. The text, however, shows considerable variation from Al-'Aṭṭar's edition, both as regards the arrangement of the stanzas and the wording.

ABU ISḤAḲ IBRAHIM IBN ZAHAB. See Ibrahim ibn Zahab.

ABU ISḤAḲ (= IBRAHIM) IBN AL-MUHAJIR: Spanish-Arabic vizier of the middle of the twelfth century mentioned in the "Diwan" (collection of poems) of Moses ibn Ezra, with the title "vezir." This is the only fact known about him, but the importance of the position assigned to him by Ibn Ezra has led to two attempts at identification. According to Steinschneider he is identical with the Abraham ibn Meir to whom Moses dedicated his "Tarshish." (See "Kerem Ḥemed," iv. 29; Grätz, "Gesch. d. Juden," 3d ed., vi. 100; Steinschneider, "Cat. Bodl." col. 1808; "Jew. Quart. Rev." ix. 619.) A poet, Joseph ben Meir ibn Muhajir, is supposed by Steinschneider to have been a brother of Abu Isḥaḳ ("Cat. Bodl." col. 1809). Luzzatto supposed that he was the son of Abu Ibrahim ibn Muhajir, to whom Judah ha-Levi dedicated a poem ("Betulat bat Yehudah," p. 20).

Abu Sulaiman (=David) ibn Muhajir, possibly a relative, is mentioned, together with Isaac Alfasi and Judah ibn Balaam, by Moses ibn Ezra in his "Kitab al-Muhadarah" (Fürst's "Literaturblatt des Orients," x. 203; Steinschneider, "Cat. Bodl." col. 1809), although Schreiner does not speak of him in his description of Ibn Ezra's work ("Rev. Ét. Juives," xxi. xxii.). Abu Sulaiman is not to be confounded with David ibn Hajar mentioned in "Sha'are Ẓedeḳ," as was done by Grätz, "Gesch. d. Juden," 2d ed., vi. 112.

ABU TALIB: Imaginary name of the Mohammedan disputant in the controversial epistles of Samuel Maroccanus (see Abbas, Samuel abu Nasr ibn). The name is given in some editions as **Abucalis** or **Abucalib.** The manuscripts in which the name occurs attribute the "translation" to Alfonsus Bonihominis, identified by Steinschneider with Abner of Burgos. But it is extremely doubtful whether any Arabic original existed, and the name of the defender of Islam is probably therefore quite fictitious. It cannot be identified with any known Arabic writer.

ABUBUS: Father of Ptolemy, who murdered Simon at Jericho, where he was stationed as military officer. (I Macc. xvi. 11, 15.) G. B. L.

ABUDARHAM (Arabic: **Abu-dirham** or **Abu-darahim,** "Father of the Dirhems"—or tax): A family name borne by Spanish Jews, for the first time by **David Abudarham,** who was a tax-collector and elder of the congregation of the Jews of Tudela during the reign of Sancho the Great, king of Castile and Leon (1258–95). Sancho was the first to regulate the taxes which the various Jewish communities had to pay to the royal treasury. For this purpose a commission of the four chief men of the communities was summoned to meet at Huete, September, 1290. In the event of the commission failing to agree, it was the king's order that the whole matter be referred to David, and both parties were to abide by his decision. See the document in Jacobs, "Sources," p. 141, where Don **Dani Abudarham** is equivalent to Don **David Abudarham;** Kayserling, "Rev. Ét. Juives," xxxviii. 254; Grätz, "Gesch. d. Juden," vii. 167, 168. In an elegy on the catastrophe which overtook the Jews of Toledo in 1391 ("Letterbode," vi. 33–37) mention is made of "the Synagogue of Abudirham" (אֲבִידַרְהָם), probably so called after this David, who must have caused it to be built (Kayserling, in "Rev. Ét. Juives," xxxviii. 254). David's son's name was Joseph, and his grandson's David, the best known of the family.

In 1524 **Moses** and **Isaac Abudarham** are mentioned as living in Rome and entertaining Moses Reubeni for a short while (Vogelstein and Rieger, "Gesch. d. Juden in Rom," ii. 44).

A certain **Abraham Abudarham** while at Agramunt in 1444 copied the Hebrew translation of Aristotle's "Nicomachean Ethics" (Neubauer, "Cat. Bodl. Hebr. MSS." col. 508, No. 1426).

About 1790 Romanelli mentions the family Abudarham in North Africa ("Jew. Quart. Rev." xii. 116), and a certain **J. Abudarham** is said to have lived in Gibraltar in 1843 ("Voice of Jacob," vol. iii., list of subscribers). An Abudarum is mentioned in Marseilles in 1887; and in Tunis the family Abou-Derham is to be found at present (Cazes, "Essai sur l'Histoire des Israélites de Tunisie," 1888, p. 177).

Bibliography: On Dirham as an Arabic proper name, see Seybold, *Ibn al-Atîr's Kunja Wörterbuch*, p. 245, last line, Weimar, 1896; Yaḳut's *Geogr. Dict.*, Index, p. 425. Compare the use of "Dinar" in a similar sense, Seybold, p. 98; Yaḳut, same place. Steinschneider, *Jew. Quart. Rev.* x. 130, believes it to be a by-name of some one named Joseph, because Ḥajjaj ben Yusuf was the first minter.

G.

ABUDARHAM (or **ABUDRAHIM**), **DAVID BEN JOSEPH BEN DAVID:** A commentator on the Synagogue liturgy, who lived at Seville, Spain, about 1340, and was a pupil of Jacob ben Asher. He belonged to the class of writers who, in an age of decline, felt the need of disseminating in popular form the knowledge stored up in various sources of rabbinical literature, and thus obtained a well-deserved fame. His book has no specific title beyond the name "Ḥibbur Perush ha-Berakot we-ha-Tefillot," probably because it was intended to serve as a running commentary to the liturgy. In the preface he states that he desired to afford the people, whom he found lacking in knowledge, the means of using the liturgy intelligently, and for this purpose he collected, from both the Babylonian and the Palestinian Talmuds, from the Geonim and all the commentators down to his own time, the material for the explanation of each portion of the prayer-book. In order to elucidate the meaning and origin of each observance connected with divine worship throughout the year, he made use of all the works concerning the rites he could obtain, some of which were very rare. In addition he gave a systematic exposition of the Jewish calendar; but at the same time, he lays no claim to any originality. He certainly succeeded, as no one did before him, in writing a commentary which is very valuable, if not altogether indispensable, to the student, and which deserves to be translated and condensed for the benefit of those who still use the ancient ritual.

His Account of the Ritual.

Though he was a believer, like most of his contemporaries, in the mystical sense of words and numbers, he combined a fair grammatical knowledge (in spite of occasional errors, as, for instance, his derivation of *minḥah* from *menaḥ yoma*), good common-sense, and a comprehensive rabbinical erudition, and thus was better qualified than many of his predecessors to give a satisfactory explanation of almost every phrase of the prayer-book. The work started by Rashi and Meir of Rothenburg, and prosecuted especially in France, Spain, and Germany during the fourteenth century (see Zunz, "Ritus," pp. 22–30), found in Abudarham's profound spirituality and wise judgment a fitting conclusion and consummation. Three introductory chapters on the reading of the Shema' (Deut. vi. 4), the Daily Prayer, and the various Benedictions precede the commentary, which begins with the Night Prayer, and then follows the order of the prayer-book, chiefly of the Sephardic Minhag, from beginning to end: first the Daily Morning, Afternoon, and Evening Prayers; then the Sabbath, the New Moon, and the Passover Prayers (including the Passover Haggadah) and the Pentecost Prayer. Considerable space is given to the prayers of the fast-days in general, besides those of the national fast-days in commemoration of Jerusalem; then follow New-year's Day and Atonement Day and the Sukkot festival prayers. This section is followed by a chapter on the Haftarot, and then follow one on the calendar and a special discourse on the Teḳufot and the superstitious belief concerning it.

The last section treats, in nine chapters, of the various Benedictions, as for example before and after meals. The closing paragraph quite characteristically contains the rules regarding the cutting of nails, and ends by stating: "This book was completed in Seville in 5100 after the Creation of the World, by Abudarham." In the manner of an eclectic he frequently states, or suggests, many explanations for one fact; but a certain warmth of religious feeling pervades the whole book and makes it a harmonious unit, giving it an edifying, rather than a merely legal, character. That the work supplied a commonly felt need is shown by its nine editions. The first edition appeared in Lisbon in 1489; the second in Constantinople in 1513; the third and fourth in Venice in 1546 and 1566 respectively; the fifth in Amsterdam in 1726 (in this a portion of the calendar was omitted); the sixth and seventh in Prague in 1784 and 1817 respectively; the eighth in Lemberg in 1857; and the ninth in Warsaw in 1877. A manuscript exists in the Friedländer Library at St. Petersburg.

See also Brüll's *Jahrb.* ii. 165, where attention is called to the passage on the teleology of the organs of the human body, taken literally from Shabbethai Donolo, *Commentary on the Book Yeẓirah*, ed. Prague, p. 11b.

K.

ABUDIENTE: Name of a Marano family living at Lisbon. **Gideon Abudiente,** about the end of the sixteenth century, is the earliest bearer of this name of whom we have cognizance. His son, together with some other members of the family, emigrated, early in the seventeenth century, to Amsterdam, where they reverted to the Synagogue. From here some Abudientes went to Hamburg, and others to London, where they seem to have borne the double name Gideon-Abudiente; but in England the descendants discarded the second part of the name and called themselves GIDEON. In the lists of the Portuguese congregation at Amsterdam, for the year 1675, the names **Eliau Obediente, Jeudah Obediente,** and **Jeudah Raphael Obediente** appear.

BIBLIOGRAPHY: De Castro, *De Synagoge van de Port.-Israel. Gemeente te Amsterdam*, 1875, pp. 51, 54; Kayserling, in *Monatsschrift*, ix. 69; Lucien Wolf, *The Treves Family in England* (reprinted from the *Jew. Chron.*), p. 15, London, 1896.

G.

Abraham ben Gideon Abudiente: A prominent Dutch scholar and mystic; born about the beginning of the seventeenth century; died after 1666. He lived in Amsterdam, and his signature is among the first on the letter of homage sent by twenty-four distinguished men of Amsterdam to SHABBETHAI ẒEBI in October, 1666.

BIBLIOGRAPHY: *Monatsschrift*, 1876, pp. 141-143.

M. K.

Daniel Abudiente: Uncle of MOSES GIDEON ABUDIENTE, whose "Grammatica Hebraica" he commemorated in a Spanish sonnet prefixed to the work.

Gideon Moses Abudiente: A son of MOSES GIDEON ABUDIENTE, and, like his father, gifted with poetical talent. He wrote a eulogy on Joseph ben Isaac Penso's "Pardes Shoshannim" (Garden of Lilies), Amsterdam, 1673.

Judah Abudiente: Probably a son of DANIEL ABUDIENTE; lived at Amsterdam, and published "Or Ṭob" (Good Light), a Hebrew-Spanish glossary for the young (p. 32, Amsterdam, 1675).

Moses Gideon Abudiente: Portuguese poet and Hebrew grammarian; born at Lisbon early in the seventeenth century; moved to Amsterdam, Holland, about 1624; and died at Hamburg, Germany, February 24, 1688. For some years previous to his removal to Hamburg he lived at Glückstadt, Holstein. He wrote in Portuguese "Grammatica Hebraica," the first part of which appeared in Hamburg, 1633, and included in the fourth part, devoted to Hebrew style, some of his own poems. He also published "Fin de los Dias Publica ser Llegado, y Fin de los Dias Pronosticado por todos los Prophetas," Glückstadt, 1665, treating of the theology of the prophets, in which, according to Da Costa, he seems to follow Shabbethai Ẓebi ("Israel en de Volken," 1873, 2d ed., p. 515). His Hebrew poems are said to exist in manuscript; some of them were published in "Ha-Meassef" (the Hebrew magazine issued in 1785), and reprinted in "Bikkure ha-'Ittim."

ABUDIENTE, SAMSON. See GIDEON, SAMSON.

ABU-L-FADHL DAUD. See DAUD, ABU FADHL.

ABU-L-KHEIR ("Father of the Good"; called also **Isaac ben Samuel**): A Spanish scholar and translator, who flourished in the fifteenth century. He was expelled from Spain in 1492, and settled at Padua, where, in 1496, he completed his Hebrew commentary upon Al-Fergani's "Extract from the Almagest," which, however, as Steinschneider showed, is in part plagiarized from Ḥandali's commentary. Two years later he translated Albubather's "Liber de Nativitatibus" from Latin into Hebrew, under the title of "Sefer ha-Moladot," and also Rajil's astronomical work, "Completus." Abu-l-Kheir's works have not been printed, but are to be found in manuscript in many European libraries.

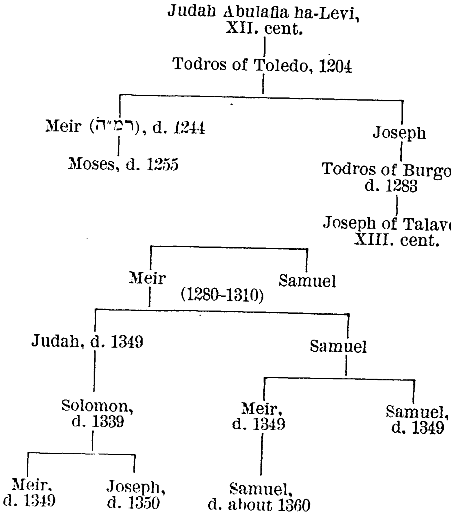
ABULAFIA or **ABU AL 'AFIYAH** (אבו אל עפיא, אבול־עפייא, that is, "Father of Health"; written also אבולאפיו; from which the Italian name "Bolaffi" and the English "Bolaffey" are certainly derived. See Steinschneider, "Jew. Quart. Rev." xi. 488. The name appears as Abenefeia in the Barcelona list of 1383. "Rev. Ét. Juives," iv. 66): Name of a widely scattered Jewish family of Spanish origin, one of whose branches, for the sake of clearer designation, bore the surname of Ha-Levi. Members of this family were found in various cities of the Orient and in Africa in the sixteenth century. From the data collected by Zunz, "Z. G." pp. 432-434, the following imperfect genealogical trees can be drawn up; for later descendants see BOLAFFEY:



The first Abulafia lived in the twelfth century in Toledo, and the first Jew to settle in Spain in modern times was an Abulafia from Tunis. It is probable that Moses and Solomon Afia (עפייה), mentioned in 1445 as prominent men in Saragossa, belonged to the same family.

M. K.—G.

ABULAFIA, ABRAHAM BEN SAMUEL: One of the earliest cabalists; born 1240 at Saragossa, in Aragon; died some time after 1291. Very early in life he was taken by his parents to Tudela, in Navarre, where his aged father carefully instructed him in the Bible and Talmud. When eighteen years old his father died, and two years later Abraham began a life of ceaseless wandering. His first journey was to Palestine, whence he intended to start and find the legendary river Sambation and the lost Ten Tribes. He got no further than Acre, however, owing to the desolation wrought in the Holy Land by the last Crusades. He then determined to go to Rome, but stopped short in Capua, where he devoted himself with passionate zeal to the study of philosophy and of the "Moreh" of Maimonides, under the tutelage of a philosopher and physician named Hillel—probably the well-known Hillel ben Samuel ben Eliezer of Verona. Although he always holds Maimonides in the highest estimation, and often makes use of sentences from his writings, he was as little satisfied with his philosophy as with any other branch of knowledge which he acquired. He thirsted after the highest. He was of a communicative disposition, able and eager to teach others. He wrote industriously on cabalistic, philosophical, and grammatical subjects, and succeeded in surrounding himself with numerous pupils, to whom he imparted much of his own enthusiasm. On his return to Spain he became subject to visions, and at the age of thirty-one, at Barcelona, immersed himself in the study of the book "Yeẓirah" and its numerous commentaries. This book, and particularly the commentary and method of the German mystic, Eleazar of Worms, exercised a deep influence upon him, and had the effect of greatly increasing his mystical bent. Letters of the alphabet, numerals, vowel-points, all became symbols of existence to him, and their combinations and permutations, supplementing and explaining one another, possessed for him an illumining power most effectively to be disclosed in a deeper study of the divine names, and especially of the consonants of the Tetragrammaton. With such auxiliaries, and with the observance of certain rites and ascetic practises, men, he says, may attain to the highest aim of existence and become prophets; not in order to work miracles and signs, but to reach the highest degree of perception and be able to penetrate intuitively into the inscrutable nature of the Deity, the riddles of creation, the problems of human life, the purpose of the precepts, and the deeper meaning of the Torah. His most important disciple, and one who carried his system further, was the cabalist Joseph Chiquitilla. Abulafia soon left Spain again, and in 1279 wrote at Patras, in Greece, the first of his prophetic books, "Sefer ha-Yashar" (The Book of the Righteous). In obedience to an inner voice, he went in 1280 to Rome, in order to effect the conversion of Pope Nicholas III. on the day before New Year, 5041. The pope, then in Suriano, heard of it, and issued orders to burn the fanatic as soon as he reached that place. Close to the inner gate the stake was erected in preparation; but not in the least disturbed, Abulafia set out for Suriano and reached there August 22. While passing through the outer gate, he heard that the pope had succumbed to an apoplectic stroke during the preceding night. Returning to Rome, he was thrown into prison by the Minorites, but was liberated after four weeks' detention. He was next heard of in Sicily, where he appeared as a prophet and Messiah. This claim was put an end to by a letter to the people of Palermo, which most energetically condemned Abulafia's conduct. It was written by R. Solomon ben Adret, who strove with all his power to guide men's minds aright in that trying time of hysterical mental confusion. Abulafia had to take up the pilgrim's staff anew, and under distressing conditions compiled his "Sefer ha-Ot" (The Book of the Sign) on the little island of Comino, near Malta, 1285–88. In 1291 he wrote his last, and perhaps his most intelligible, work, "Imre Shefer" (Words of Beauty); after this all trace of him is lost.

Abulafia calls his cabalistic system "prophetical cabala," distinguishing it thus from that of his predecessors, which he considers of lower grade, because it satisfied itself with the characterization of God as *En-Sof* ("the Being without end"), with the *Sefirot* as vague intermediaries, and with the doctrine of the transmigration of souls, and because its method remained essentially speculative. Such is only a preliminary and inferior grade of knowledge; the highest goal is prophetism, assuring men a certain degree of community with God. Means hereunto are afforded by the close study of the names of God, particularly of the four-lettered YHWH, and also by *gemaṭria*, the symbolical employment of letters as numerals. In this the letters of a word are to be considered not only as letters, giving the sound, but as numerals, the sum of which may be replaced by the equal sum of other letters, producing, of course, a new word, which must prove to be identical in significance, or at least allied, with the first word whose sum it equals. Thus Abulafia calls himself sometimes רזיאל and sometimes זכריהו, because the total of the letters in each of these words equals 248, which is likewise the total of the letters in his own given name אברהם. In one place, desiring to call himself "Berechiah," he misspells it ברכהיהו in order to make it aggregate 248 (Steinschneider, "Cat. Munich," No. 409). He also employs the processes of *notarikon* (regarding each letter in a word as the initial of some other word, and so making of it an acrostic), of *temurah* (substitution of one letter for another), and of *ẓiruf* (connecting various letters of the same word). He claims to have derived his system of letter-symbols from Moses Naḥmanides; but he probably drew it, especially the gemaṭria and the play with the names of God and the necessary attendant ascetic life and contemplation—כוונה—from the German mysticism of Eleazar of Worms. His view of prophetism or the prophetic gift as the highest goal seems to indicate the influence of Judah ha-Levi's "Cuzari," but his idea of the nature of prophecy itself is rather in accord with Maimonides.

Abulafia's influence upon the further development of the Cabala was rather of a retarding than a fostering nature. He gave it a visionary turn. Owing to his influence there was a growing tendency to juggle with the names of God and angels, and to employ gemaṭria in its most diverse forms. He was the first one, too, to allow the Christian idea of the Trinity to show a faint glimmer in the Cabala.

Abulafia began his fruitful literary activity in 1271; he himself states the number of his writings to be twenty-six, of which twenty-two are "prophetical." Of these the following have been printed: "Sefer ha-Ot" (in the "Grätz-Jubelschrift," Hebrew part, p. 65); וזאת ליהודה ("And this is for Judah"), consisting of a reply to Solomon ben Adret's attack, in Jellinek, "Auswahl Kabbalistischer Mystik," p. 13; "Sheba' Netibot ha-Torah" (The Seven Ways of the Law), and "Imre Shefer," in Jellinek, "Philosophie und Kabbala"; a part of his autobiography from his "Oẓar Eden Ganuz" (The Hidden Treasure of Eden), in Jellinek, "B. H.," iii. introduction, p. xl.

[Jellinek, in his preface to "Sefer ha-Ot," says: "In the Spaniard Abraham Abulafia of the thirteenth century Essenism of old found its resurrection. Preaching asceticism and the highest potentiality of the spirit through communion with God, effected by a perfect knowledge and use of His names, he was thoroughly convinced of his prophetic mission, and considered himself to be the God-sent Messiah and Son of God. He differs, however, from the Messiahs who have risen at different times in his many-sided philosophical training as well as in his perfect unselfishness and sincerity. He addresses himself not to the masses, but to the educated and enlightened, and does not confine his mission to his coreligionists, but is filled with the desire to extend it to the adherents of the Christian church also. It seems that, for the sake of influencing these, he tried to construct a Trinitarian system, though it was a Trinity in form merely, and did not touch the essence of God's personality. Before his vision stood the ideal of a unity of faith, the realization of which he longed to bring about. Imbued with this spirit, his disciples worked in Spain and Italy, emphasizing still more the Trinitarian idea while treating of the 'Ten Sefirot' in order to win the adherents of the Church. Hence the terms Father, Mother, Son, and Holy Ghost, borrowed from the Christian creed, in the cabalistic literature of the thirteenth century. In order to understand Abulafia psychologically and judge him correctly and without bias in the light of history, it must be borne in mind that his cradle was in Spain, the home of religious ecstasy, and that the age in which he lived was that of the Crusades, so favorable to mystic speculation, an age in which many longed to see the barriers separating Judaism, Christianity, and Islam broken down, and in which the Messianic hopes of the Jews found new nourishment in many hearts." K.]

Jellinek gives a list of Abulafia's works in the introduction to "Philosophie und Kabbala," p. 7; but it needs correction from Steinschneider, "Catalog," 2d ed., No. 285 *et passim*, Munich. Abulafia's writings are not wanting in excellent ideas and beautiful illustrations, but these are so overgrown with mystic obscurity and abstruseness that a perusal of them is not very edifying.

BIBLIOGRAPHY: M. H. Landauer, in *Literaturblatt des Orients*, 1845, pp. 381 *et seq.* (this scholar disinterred Abulafia from his long obscurity); Jellinek (who devoted a great deal of study to this author), in the works already mentioned and in his *Beiträge zur Gesch. der Kabbala*, pt. ii.; Steinschneider, *Catalog der Hebr. Handschriften der Staatsbibliothek zu München*, 2d ed., Nos. 28 *et alia*, containing references to *Hebr. Bibl.*; Grätz, *Gesch. d. Juden*, vii. 7; Bloch, *Gesch. d. Entwickelung d. Kabbala*, pp. 46 *et seq.*; Vogelstein and Rieger, *Gesch. d. Juden in Rom*, i. 247 *et seq.* (needs some emendation).

P. B.

Ḥayyim Abulafia (Abolafia): Author of "Shibḥe Tannaim" (The Praises of Tannaim), Salonica, 1872, a work glorifying the Tannaites.

Ḥayyim ben David Abulafia: Talmudist, who lived in Palestine at the end of the eighteenth century. He held rabbinical posts in Safed, Larissa, and Smyrna. An extensive work from his pen on the Book of Commandments ("Semag" = "Sefer Miẓwot Gadol") was destroyed by fire in Smyrna. He was the author of some haggadic expositions which are to be found in the collection of rabbinical decisions, "Esh Dat" (The Fire of the Law), by Joseph Naḥmuli, Salonica, 1790. Several of his rabbinical decisions and sermons appeared after his death under the title "Nishmat Ḥayyim" (The Breath of Life), Salonica, 1806.

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, i. 54.

Ḥayyim ben Jacob Abulafia: Rabbinical authority; born in Palestine; died at Damascus, 1744. He was the grandfather of Ḥayyim ben David Abulafia and grandson of Isaac Nissim aben Gamil. Abulafia was a rabbi in Smyrna, where he instituted many wholesome regulations. In his old age he restored Tiberias. He is the author of several works: (1) "Miḳrae Ḳodesh" (Holy Convocations), Smyrna, 1729, containing treatises on Biblical and Talmudical themes; (2) "Yosef Leḳaḥ" (Increase of Learning), Smyrna, 1730-32, a work in three volumes on the Pentateuch; (3) "Yashresh Ya'aḳob" (Jacob Will Take Root), Smyrna, 1729; and (4) "Shebut Ya'aḳob" (The Captivity of Jacob), Smyrna, 1733, an elaborate commentary on the haggadic compilation "'En Ya'aḳob," by Jacob ibn Ḥabib and others (Steinschneider, "Cat. Bodl." col. 820). M. K.

Ḥayyim Nissim Abulafia: Chief rabbi of Jerusalem; born near the beginning of the nineteenth century, probably in Tiberias, Palestine; died at Jerusalem, Feb. 21, 1861. He was a descendant of Ḥayyim Abulafia (Fürst, "Bibl. Jud." i. 16, and "Zimrat ha-Areẓ" by Jacob Berab, son-in-law of Ḥayyim Abulafia, 1st ed., Mantua, 1745), who, at the invitation of Sheik Dahir al-Emir, came from Smyrna to Tiberias in the middle of the eighteenth century. Ḥayyim Nissim was chosen chief rabbi of Jerusalem, to succeed R. Isaac Kobo, in the fall of 1854, and was recognized as such by the pasha of Jerusalem, although, like his predecessor, he was not confirmed by the central government of Constantinople. He held the office for six years and four months, when he died. He left many works in manuscript, but as far as known none has been published. R. Abraham Ashkenazi was his successor.

BIBLIOGRAPHY: Luncz, *Jerusalem Year Book*, iv. 212, 213. For his epitaph *ibid.* i. 145-147.

P. Wi.

Isaac Abulafia: Rabbi at Aleppo, and author of "Pene Yiẓḥaḳ" (Isaac's Countenance), Smyrna, 1871.

Jacob Abulafia: Rabbi; died at Safed, Palestine, at the beginning of the eighteenth century; father of Ḥayyim ben Jacob Abulafia and grandson of Jacob Berab. Abulafia was a pupil of Asbasan and a rabbi in Damascus. His rabbinical decisions are still extant in manuscript (Azulai, "Shem ha-Gedolim," No. 140; Ghirondi and Nepi, "Toledot Gedole Yisrael," No. 213).

Joseph ben Meir Abulafia: Spanish rabbi in Seville, Spain; died at Toledo, 1349.

Joseph ben Todros Abulafia: Spanish writer; lived in Talavera, and published a defense of Maimonides, which he addressed to the rabbis of Provence. Moses de Leon dedicated his book "Sheḳel ha-Ḳodesh" (The Shekel of the Sanctuary), 1292, to him (Zunz, "Z. G." pp. 433 *et seq.*).

Meir ben Joseph Abulafia: Spanish rabbi in Toledo, 1305.

Meir ben Todros ha-Levi Abulafia (known sometimes as **Ramah = Rabbi Meir ha-Levi**): Nasi and Talmudist; born at Burgos, Spain, about 1180; died March 29, 1244. He was the son of Todros ben Judah, to whom the physician Judah ben Isaac dedicated his poem, "The Conflict of Wisdom and Wealth," published in 1214. Meir, the schoolmate of Moses Naḥmanides, was so highly esteemed at Toledo that on his father's death in 1225 the latter's honorary title of *nasi* (prince) was applied to him. Although he did not hesitate to place interpretations of his own on Talmudic passages wherever they seemed contradictory to his idea of a perfect God and His attributes, his unflinching orthodoxy led him to cling to the most extraordinary legends and opinions of the Talmud, believing them to be literally true. No wonder that the manner in which Maimonides treated the doctrine of resurrection in his "Yad ha-Ḥazaḳah" made a painful impression upon him. Meir wrote a letter to the leading men of Lunel in order to express his indignation. He met, however, with scant approval; for Aaron ben Meshullam answered him harshly, rebuking him for his presumption and arrogance.

Contest with Maimonides.

Meir, who was so haughty that he thought it derogatory to his dignity to pay a visit to his father, could not quietly suffer such a rebuke, and replied with great self-confidence. He next applied to the scholars of northern France regarding the same matter, but his success with them was not greater. None the less he remained throughout his lifetime an opponent of Maimonides and an adherent of the Cabala. On account of advanced age he took no part in the controversies which broke out later with regard to the "Moreh."

Meir was the author of "Yad Ramah" (an allusion to his name), a commentary on the Talmudic treatises Baba Batra and Sanhedrin (2 vols., Salonica, 1790, 1798), and of the valuable work, "Masoret Seyag la-Torah," containing Masoretic notes on the Pentateuch, alphabetically arranged (Florence, 1750; Berlin, 1761). His correspondence with the "Sages of Lunel" was published from the manuscript by J. Brill under the title "Kitab al-Rasa'il-Sefer Iggerot" (Paris, 1871). Compare AARON BEN MESHULLAM.

BIBLIOGRAPHY: Geiger, *Jüd. Zeit.* ix. 282 *et seq.*; Grätz, *Gesch. d. Juden*, vii. 39 *et seq.*

Moses Abulafia (or **Abu Amrum Musa**): Spanish musician; died 1283. He was the son of Joseph Abulafia, and wrote a treatise on music (Steinschneider, "Hebr. Bibl." viii. 70, xix. 40 *et seq.*; idem, "Hebr. Uebers." p. 689). Another Moses Abulafia was a rabbi in Toledo between 1470 and 1480 (Zunz, "Z. G." p. 434).

Samuel ha-Levi Abulafia (or **Al-Levi,** but erroneously **Allavi**): Spanish financier; born at Toledo about 1320; was treasurer to Don Pedro the Cruel of Castile. In 1350 he was recommended to the king as chief treasurer by the minister Juan Alfonso de Albuquerque, whose estates he managed. He soon became privy councilor of his new master, and was the most influential man in Castile. Through his friendship for Doña Maria de Padilla, the mistress of Pedro, he drew on himself the hatred of the legitimate queen and of the grandees who adhered to her cause. In 1354, while with the king in the fortress of Toro, he was suddenly seized by the enemies of the monarch and thrown into prison. He succeeded in procuring his release through the payment of a large ransom and escaped, together with the king, who had also been seized. Don Samuel ha-Levi restored the thoroughly disorganized finances of the state, and by rigorous control of the tax-collectors, on the one hand, and by an arrangement which he made with the creditors, on the other, he managed to accumulate a large amount of money in the royal treasury. He appointed a number of his relatives collectors of taxes. His nephew, **Don Joseph ha-Levi,** became tax-collector of Seville. Don Samuel ha-Levi occupied a mansion in Toledo, which is still known as Palacio del Judío ("Jew's Palace"). Several synagogues were built at his expense in various parts of Castile, among them a magnificent one in Toledo. This synagogue was finished in 1357, and was afterward converted into a church under the name of EL TRÁNSITO. Hebrew inscriptions, still preserved on the side walls of this edifice—to-day a national monument—perpetuate the memory of his good deeds. Samuel maintained himself nearly twenty years in his high position. In 1360 Don Pedro discovered the existence of a widespread conspiracy in which the archbishop of Toledo and Don Samuel were said to be implicated. The archbishop was expelled, but Don Samuel, who, it is said, had been denounced by envious coreligionists, was dragged to Seville and imprisoned, together with his wealthy relatives. His entire fortune and that of his relatives, consisting of 190,000 doubloons ($950,000 or £195,737), twenty boxes filled with jewelry and silk and velvet clothing, and eighty slaves, were confiscated by the king. He died under torture in Seville, November, 1360. "From the prison, in which his king caused him to be afflicted, the Lord summoned him to a heavenly habitation."

Samuel ha-Levi Abulafia: Translator of Toledo, who was still living in 1278. At the command of King Alfonso X. of Castile he translated from Arabic into Spanish "Fabrica y Usos del Orlogio della Candela" (Manufacture and Uses of the Candle Clock).

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 1358; idem, *Hebr. Uebers.* p. 986; Grätz, *Gesch. d. Juden*, vii. 469; Kayserling, *Bibl. Esp.-Port. Jud.* p. 99.

M. K.

Todros Abulafia: Spanish Talmudist, religious poet, and cabalist; born in 1234; died at Seville after 1304 (according to Grätz, "Gesch. d. Juden," viii. note 12; Zacuto in the "Yuḥasin" gives 1288; Azulai, 1283; Zunz, "Literaturgesch." p. 481, 1283). He was a son of Joseph ben Todros ben Judah ha-Levi Abulafia and a nephew of Meir ben Todros Abulafia. He was wealthy and influential and enjoyed the royal favor of King Sancho IV. of Castile (1284–95). At one time he fell into disgrace, was imprisoned and in danger of capital punishment. While in prison he had a vision foretelling his speedy release, which happened on the following morning. He was an especial favorite of Queen Maria de Molina and, as one of her retinue, accompanied the monarchs of Castile to their meeting with the king of France on Provençal soil. Upon this occasion great respect was shown him by the Jews of southern France, and the poet Abraham Isaac Bedersi composed some eulogistic verses in his honor. A poetic dedication by Todros himself is mentioned by Zunz ("S. P." p. 481), and he was also the author of "Sefer 'Aliyot Yebamot," containing novellæ upon the Talmudic treatise Yebamot (Azulai, "Shem ha-Gedolim"). He devoted most attention, however, to the Cabala.

He, like his sons Joseph and Levi, liberally supported cabalistic scholars. He wrote two cabalistic works, (1) "Sha'ar ha-Razim" (The Gate of Secrets), a commentary on Ps. xix., in which he discusses its mysteries in connection with the Sefirot; (2) "Oẓar ha-Kabod" (The Treasury of Glory), an interpretation of the Talmudic Haggadot in a cabalistic sense. The section of this treatise dealing with Berakot and Mo'ed has been printed (Novydvor, 1808). Quotations from the Zohar occur in it for the first time (27*a*; מהיטבאל בת מטרד, Zohar, i. 36*a*, 145*b*).

This is the first attempt at a cabalistic explanation of the Haggadot. In these two works Todros Abulafia appears as an open opponent of Maimonides, whom he otherwise greatly honors.

M. R.

ABUN BEN SHARADA: A Spanish poet; flourished at the beginning of the eleventh century, first at Lucena, afterward at Seville. None of his poetical works has survived; and his name is known only from quotations made by poets like Solomon ibn Gabirol, Moses ibn Ezra, and Judah Alḥarizi. In a poem attributed to Solomon ibn Gabirol (compare Dukes, in "Orient," xi. 267) Abun is mentioned immediately after the lexicographer Menahem ben Saruk. Moses ibn Ezra, in his "Diwan" (compare Neubauer, "Cat. Bodl. Hebr. MSS." No. 1972, ii. 12), eulogizes his life in one poem and bewails his death in another. The eulogy, however, seems to be concerned with the man rather than with the poet. Indeed, Judah Alḥarizi ("Taḥkemoni," iii.) classes Abun among the poets whose works have been forgotten because they were of but little interest.

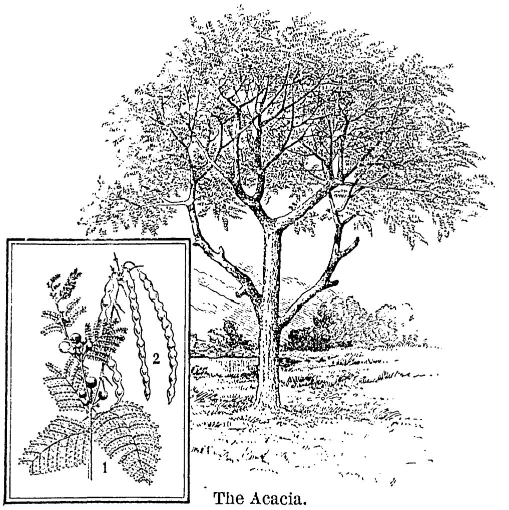
I. BR.

ABYSS: Term for the תהום (Gen. vii. 11) of the Old Testament, used in the apocalyptic, New Testament, and cabalistic literature for the place of punishment of the wicked; hell; the abode of certain demons. As such the Abyss of Fire is mentioned in the Book of Enoch (xviii. 11–16, 19; xxi. 1–6; xc. 21–25) as the prison-house of impure angels (compare Luke, viii. 31; Rev. ix. 1; xi. 7—Abyss, the seat of the dragon; xx. 3, where "Satan is cast into the abyss, shut up and a seal set upon him"). According to the Prayer of Manasseh, verse 3, the Lord has closed and sealed up the Abyss by His awful and mystic name. There was a place beneath the altar of the Temple at Jerusalem believed to lead down to the very Abyss of the world, the foundation-stone of the earth being placed there (Suk. 49*a*, 53*a*; see Targ. Yer. Ex. xxviii. 30, and Zohar, iii. 61). In the cosmography of the rabbis (Midr. Konen) the Abyss forms part of Gehenna; it is beneath the ocean, and consists of three, or seven, departments, one above the other. In the Cabala the opening of the great Abyss in the lower world, sealed with the seal that bears the Holy Name, plays a great rôle as the seat of the evil spirits, and with it corresponds the opening of the great Abyss in the upper world as a cosmogonic element. See GEHINNOM; SHEOL.



The Acacia.
1. Flowering branch. 2. Seed-pod.

K.

ABYSSINIA. See FALASHAS.

ACACIA.—Biblical Data: A hard and durable but light wood; at first yellowish, but gradually turning very dark, like ebony. Of this the Ark and its altars, with their staves, and the bars of the Tabernacle were made (Ex. xxxv. 7; Deut. x. 3). The Acacia-tree is called in Hebrew *shiṭṭah* (for *shintah*), plural *shiṭṭim*; שטה, שטים, Arabic, *sanṭ*; an Egyptian loan-word. It is the *Spina Ægyptiaca* of the ancients (*Mimosa Nilotica*, Linn.). It is a large, spreading, thorny tree with many branches, found in Africa and Arabia. The name of this tree (shiṭṭim) is found in various locality names mentioned in the Bible: Shittim (Num. xxxv. 1); Abel-Shittim (*ibid.* xxxiii. 49); Beth-Shittah (Judges, vii. 22). It appears to have been highly prized (Isa. xli. 19).

BIBLIOGRAPHY: Jablonsky, *Opuscula*, ed. te Water, i. 260; Rosenmüller, *Handbuch der Bibl. Alterthumskunde*, iv. part i. p. 272; Robinson, *Bibl. Researches in Palestine*, ii. 249; Imanuel Löw, *Aramäische Pflanzennamen*, p. 59; p. 197 (for the meaning of *shiṭṭah* = *sanṭ* = *Acacia*, *Acacia Nilotica*), p. 388 (for the meaning of *toranita* = cypress).

J. P. P.

——**In Rabbinical Literature:** R. H. 23*a*, referring to Isa. xli. 19, counts the shiṭṭah (explained as *toranita* = "cypress-tree" according to Löw, "Pflanzennamen," p. 388; according to others = "pine") among the ten kinds of cedar-trees; so also B. B. 80*b*; but Yer. Ket. vii. 31*d*; Tan., Terumah, § 9; Ex. R. xxxv., mention twenty-four cedar-trees, seven of which are derived from Isa. xli. 19 (compare the fourteen trees in Enoch, iii. and Book of Jubilees, xxi. 12, where, instead of *shaḳed* (almond), shiṭṭah (Acacia) was most likely the original reading; see Dillman, "Das Buch Henoch," p. 91, where reference is made to Isa. xli. 19, lv. 13, lx. 13; compare also "Geoponica," xi. 1, where fourteen evergreen trees are enumerated). See Tan. *l.c.*: "Of all these the shiṭṭim-wood alone was selected in order to atone for the sin that Israel was to commit in Shittim [Num. xxv. 1 *et seq.*]. Indeed, while Phinehas assuaged the divine wrath [Num. xxv. 7], the Holy One—blessed be He!—said: 'I shall in the future heal the plague of Shittim: A fountain shall come forth from the house of the Lord, and shall water the valley of Shittim'"; see Joel, iv. 18, *Heb.* (Tan. *l.c.*).

"Acacia trees without any knots or fissures were cut by Jacob the patriarch in Migdal Ẓebo'aya, Palestine, and were taken down by him to Egypt to be preserved by his children for future use in the wilderness; wherefore we read (Ex. xxxv. 24): 'Every man with whom was found shiṭṭim [R. V. acacia] wood.' R. Hananiah was asked regarding the Acacia-trees that were still growing there whether it was right that people should refrain from using them for common purposes in order that the wood might be consecrated solely for the Ark, to which he replied: 'By all means remain true to the custom of your fathers,'" which was not to use Acacia for such purposes (Gen. R. xciv.; Cant. R. i. 12; Yer. Pes. iv. 30*d*; see also Testament of the Patriarchs, Simeon, § 8).

K.

ACADEMIES IN BABYLONIA: The Jews of Babylonia, no doubt, shared in the changes and movements that Ezra and his successors, who came from Babylonia, introduced into Palestine. But for the four centuries covering the period from Ezra to Hillel there are no details; and the history of the succeeding two centuries, from Hillel to Judah I., furnishes only a few scanty items on the state of learning among the Babylonian Jews. Sherira Gaon, in his famous letter (the chief source of information on the Babylonian schools) referring to those dark centuries, wrote: "No doubt, here in Babylonia public instruction was given in the Torah; but besides the exilarchs there were no recognized heads of schools until the death of Rabbi [Judah I.]." The principal seat of Babylonian Judaism was Nehardea, where there certainly was some institution of learning. A very ancient synagogue, built, it was believed, by King Jehoiachin, existed in Nehardea. At Huẓal, near Nehardea, there was another synagogue, not far from which could be seen the ruins of Ezra's academy. In the period before Hadrian, Akiba, on his arrival at Nehardea on a mission from the Sanhedrin, entered into a discussion with a resident scholar on a point of matrimonial law (Mishnah Yeb., end). At the same time there was at Nisibis, in northern Mesopotamia, an excellent Jewish college, at the head of which stood Judah ben Betera (Bathyra), and in which many Palestinian scholars found refuge at the time of the persecutions. A certain temporary importance was also attained by a school at Nehar-Peḳod, founded by the Palestinian immigrant Hananiah, nephew of Joshua ben Hananiah, which school might have been the cause of a schism between the Jews of Babylonia and those of Palestine, had not the Palestinian authorities promptly checked Hananiah's ambition.

Nehardea, Sura, Pumbedita, and Maḥuza.

Among those that helped to restore Palestinian learning, after Hadrian, was the Babylonian scholar Nathan, a member of the family of the exilarch, who continued his activity even under Judah I. Another Babylonian, Ḥiyya, belonged to the foremost leaders in the closing age of the Tannaim. His nephew, Abba Arika, afterward called simply Rab, was one of the most important pupils of Judah I. Rab's return to his Babylonian home, the year of which has been accurately recorded (530 of the Seleucidan, or 219 of the common era), marks an epoch; for from it dates the beginning of a new movement in Babylonian Judaism—namely, the initiation of the dominant rôle which the Babylonian Academies played for several centuries. Leaving Nehardea to his friend Samuel, whose father, Abba, was already reckoned among the authorities of that town, Rab founded a new academy in Sura, where he held property. Thus, there existed in Babylonia two contemporary academies, so far removed from each other, however, as not to interfere with each other's operations. Since Rab and Samuel were acknowledged peers in position and learning, their academies likewise were accounted of equal rank and influence. Thus both Babylonian rabbinical schools opened their lectures brilliantly, and the ensuing discussions in their classes furnished the earliest stratum of the scholarly material deposited in the Babylonian Talmud. The coexistence for many decades of these two colleges of equal rank originated that remarkable phenomenon of the dual leadership of the Babylonian Academies which, with some slight interruptions, became a permanent institution and a weighty factor in the development of Babylonian Judaism.

When Odenathus destroyed Nehardea in 259—twelve years after Rab's death, and five years after that of Samuel—its place was taken by a neighboring town, Pumbedita, where Judah ben Ezekiel, a pupil of both Rab and Samuel, founded a new school. During the life of its founder, and still more under his successors, this school acquired a reputation for intellectual keenness and discrimination, which often degenerated into mere hair-splitting. Pumbedita became the other focus of the intellectual life of Babylonian Israel, and retained that position until the end of the gaonic period.

Nehardea once more came into prominence under Amemar, a contemporary of Ashi. The luster of Sura (also known by the name of its neighboring town, Mata Meḥasya) was enhanced by Rab's pupil and successor, Huna, under whom the attendance at the academy reached unusual numbers. When Huna died, in 297, Judah ben Ezekiel, principal of the Pumbedita Academy, was recognized also by the sages of Sura as their head. On the death of Judah, two years later, Sura became the only center of learning, with Ḥisda (died 309) as its head. Ḥisda had in Huna's lifetime rebuilt Rab's ruined academy in Sura, while Huna's college was in the vicinity of Mata Meḥasya (Sherira). On Ḥisda's death Sura lost its importance for a long time. In Pumbedita, Rabbah bar Naḥmani (died 331), Joseph (died 333), and Abaye (died 338) taught in succession. They were followed by Raba, who transplanted the college to his native town, Maḥuza. Under these masters the study of the Law attained a notable development, to which certain

Palestinian scholars, driven from their own homes by the persecutions of Roman tyranny, contributed no inconsiderable share.

Rab Ashi, Founder of the Babylonian Talmud.

After Raba's death, in 352, Pumbedita regained its former position. The head of the academy was Naḥman bar Isaac (died 356), a pupil of Raba. In his method of teaching may be discerned the first traces of an attempt to edit the enormous mass of material that ultimately formed the Babylonian Talmud. Not Pumbedita, however, but Sura, was destined to be the birthplace of this work. After Raba's death, Papa, another of his pupils, founded a college in Naresh, near Sura, which, for the time being, interfered with the growth of the Sura school; but after Papa's death, in 375, the college at Sura regained its former supremacy. Its restorer was Ashi, under whose guidance, during more than half a century (Ashi died 427), it attained great prominence, and presented such attractions that even the exilarchs came there, in the autumn of each year, to hold their customary official receptions. The school at Pumbedita recognized the preeminence of that of Sura; and this leadership was firmly retained for several centuries.

The unusual length of Ashi's activity, his undeniable high standing, his learning, as well as the favorable circumstances of the day, were all of potent influence in furthering the task he undertook; namely, that of sifting and collecting the material accumulated for two centuries by the Babylonian Academies. The final editing of the literary work which this labor produced did not, it is true, take place until somewhat later; but tradition rightly names Ashi as the originator of the Babylonian Talmud. Indeed, Ashi's editorial work received many later additions and amplifications; but the form underwent no material modification. The Babylonian Talmud must be considered the work of the Academy of Sura, because Ashi submitted to each of the semiannual general assemblies of the academy, treatise by treatise, the results of his examination and selection, and invited discussion upon them. His work was continued and perfected, and probably reduced to writing, by succeeding heads of the Sura Academy, who preserved the fruit of his labors in those sad times of persecution which, shortly after his death, were the lot of the Jews of Babylonia. These misfortunes were undoubtedly the immediate cause of the publication of the Talmud as a complete work; and from the Academy of Sura was issued that unique literary effort which was destined to occupy such an extraordinary position in Judaism. Rabina (R. Abina), a teacher in Sura, is considered by tradition the last amora; and the year of his death (812 of the Seleucidan, or 500 of the common era) is considered the date of the close of the Talmud.

Saboraim and Geonim.

The three centuries in the course of which the Babylonian Talmud was developed in the academies founded by Rab and Samuel were followed by five centuries during which it was zealously preserved, studied, expounded in the schools, and, through their influence, recognized by the whole diaspora. Sura and Pumbedita were considered the only important seats of learning: their heads and sages were the undisputed authorities, whose decisions were sought from all sides and were accepted wherever Jewish communal life existed. In the words of the haggadist (Tan., Noah, iii.), "God created these two academies in order that the promise might be fulfilled, that the word of God should never depart from Israel's mouth" (Isa. lix. 21). The periods of Jewish history immediately following the close of the Talmud are designated according to the titles of the teachers at Sura and Pumbedita; thus we have "the time of the Geonim and that of the Saboraim. The Saboraim were the scholars whose diligent hands completed the Talmud in the first third of the sixth century, adding manifold amplifications to its text. The title "gaon," which originally belonged preeminently to the head of the Sura Academy, came into general use in the seventh century, under Mohammedan supremacy, when the official position and rank of the exilarchs and of the heads of the academy were regulated anew. But in order to leave no gaps between the bearers of the title, history must either continue the Saboraim into the seventh century or accept an older origin for the title of gaon. In point of fact, both titles are only conventionally and indifferently applied; the bearers of them are heads of either of the two academies of Sura and Pumbedita and, in that capacity, successors of the Amoraim.

The inherited higher standing of Sura endured until the end of the eighth century, after which Pumbedita came into greater importance. Sura will always occupy a prominent place in Jewish history; for it was there that Saadia gave a new impulse to Jewish lore, and thus paved the way for the intellectual regeneration of Judaism. Pumbedita, on the other hand, may boast that two of its teachers, Sherira and his son Hai (died 1038), terminated in most glorious fashion the age of the Geonim and with it the activities of the Babylonian Academies.

Organization of the Academies.

The official designation of the Babylonian Academies was the Aramaic *metibta* (Hebrew, *yeshibah*), session, meeting. The head of the academy was accordingly called *resh metibta* (Hebrew, *rosh yeshibah*). There is a tradition that Huna, the second principal of Sura, was the first to bear the title. Before him the usual appellation in Babylonia was *resh sidra*; *resh metibta* remained the official designation for the head of the academy till the end of the gaonic period, and was by no means displaced by the title gaon, which, in fact, signifies merely "Highness" or "Excellency."

The Kallah.

At the side of the *resh metibta*, and second to him in rank, stood the *resh kallah* (president of the general assembly). The *kallah* (general assembly) was a characteristic feature of Babylonian Judaism altogether unknown in Palestine. Owing to the great extent of Babylonia, opportunities had to be furnished for those living far from the academies to take part in their deliberations. These meetings of outside students, at which of course the most varying ages and degrees of knowledge were represented, took place twice a year, in the months Adar and Elul. An account dating from the tenth century, describing the order of procedure and of the differences in rank at the kallah, contains details that refer only to the period of the Geonim; but much of it extends as far back as the time of the Amoraim. The description given in the following condensed rendering furnishes, at all events, a curious picture of the whole institution and of the inner life and organization of the Babylonian Academies:

> "In the kallah-months, that is, in Elul, at the close of the summer, and in Adar, at the close of the winter, the disciples journey from their various abodes to the meeting, after having prepared in the previous five months the treatise announced at the close of the preceding kallah-month by the head of the academy. In Adar and Elul they present themselves before the head, who examines them upon this treatise. They sit in

Procedure at the Kallah.

the following order of rank: Immediately next to the president is the first row, consisting of ten men; seven of these are reshe kallah; three of them are called 'ḥaberim' [associates]. Each of the seven reshe kallah has under him ten men called 'allufim' [masters]. The seventy allufim form the Sanhedrin, and are seated behind the above-mentioned first row, in seven rows, their faces being turned toward the president. Behind them are seated, without special locations, the remaining members of the academy and the assembled disciples.

"The examination proceeds in this wise: They that sit in the first row recite aloud the subject-matter, while the members of the remaining rows listen in silence. When they reach a passage that requires discussion they debate it among themselves, the head silently taking note of the subject of discussion. Then the head himself lectures upon the treatise under consideration, and adds an exposition of those passages that have given rise to discussion. Sometimes he addresses a question to those assembled as to how a certain Halakah is to be explained: this must be answered only by the scholar named by the head. The head adds his own exposition, and when everything has been made clear one of those in the first row arises and delivers an address, intended for the whole assembly, summing up the arguments on the theme they have been considering. . . .

"In the fourth week of the kallah-month the members of the Sanhedrin, as well as the other disciples, are examined individually by the head, to prove their knowledge and capacity. Whoever is shown to have insufficiently prepared himself is reproved by the head, and threatened with the withdrawal of the stipend appropriated for his subsistence. . . . The questions that have been received from various quarters are also discussed at these kallah assemblies for final solution. The head listens to the opinions of those present and formulates the decision, which is immediately written down. At the end of the month these collective answers [responsa] are read aloud to the assembly, and signed by the head."

W. B.

ACADEMIES IN PALESTINE: According to an oft-quoted tradition of Hoshayah (a collector of Tannaite traditions, who lived in Cæsarea in the first half of the third century), there existed in Jerusalem 480 synagogues, all of which were destroyed with the Temple. Each of these synagogues was provided with a school for Biblical instruction, as well as one for instruction in the oral law. Besides these schools of the lower and middle grades mentioned by the tradition (which is not to be too readily discredited, though it may have exaggerated their number for the sake of a good round figure), there existed in Jerusalem a sort of university or academy—an institution composed of the scribes (sages and teachers), whose pupils, having outgrown the schools, gathered around them for further instruction and were called, therefore, *talmide ḥakamim* ("disciples of the wise"). There is, however, no certain information as to the organization of this institute, or of the relation in which it stood to the Great Sanhedrin, whose Pharisee members certainly belonged to it. The most important details of its activity are afforded by the accounts concerning the schools ("houses") of Hillel and Shammai, whose controversies and debates belong to the last century of the period of the Second Temple, and relate not only to the Halakah, but also to questions of Biblical exegesis and religious philosophy. For example, it is said that the schools of Shammai and Hillel occupied two and a half years in discussing the question whether it had been better for man not to have been created ('Er. 13*b*).

Jabneh, Temporary Center of the Jewish Nation.

The destruction of Jerusalem put as abrupt an end to the disputes of the schools as it did to the contests between political parties. It was then that a disciple of Hillel, the venerable Johanan ben Zakkai, founded a new home for Jewish Law in Jabneh (Jamnia), and thus evoked a new intellectual life from the ruins of a fallen political existence. The college at Jabneh, which at once constituted itself the successor of the Great Sanhedrin of Jerusalem by putting into practise the ordinances of that body as far as was necessary and practicable, attracted all those who had escaped the national catastrophe and who had become prominent by their character and their learning. Moreover, it reared a new generation of similarly gifted men, whose task it became to overcome the evil results of still another dire catastrophe—the unfortunate Bar Kokba war with its melancholy ending. During the interval between these two disasters (56–117), or, more accurately, until the "War of Quietus" under Trajan, the school at Jabneh was the recognized tribunal that gathered the traditions of the past and confirmed them; that ruled and regulated existing conditions; and that sowed the seeds for future development. Next to its founder, it owed its splendor and its undisputed supremacy especially to the energetic Gamaliel, a great-grandson of Hillel, called Gamaliel II., or Gamaliel of Jabneh, in order to distinguish him from his grandfather, Gamaliel I. To him flocked the pupils of Johanan ben Zakkai and other masters and students of the Law and of Biblical interpretation. Though some of them taught and labored in other places—Eliezer ben Hyrcanus in Lydda; Joshua ben Hananiah in Beḳiin; Ishmael ben Elisha in Kefar Aziz, Akiba in Bene Beraḳ; Hananiah (Ḥanina) ben Teradyon in Siknin—Jabneh remained the center; and in "the vineyard" of Jabneh, as they called their place of meeting, they used to assemble for joint action.

Palestinian Judaism Restored.

In the fertile ground of the Jabneh Academy the roots of the literature of tradition—Midrash and Mishnah, Talmud and Haggadah—were nourished and strengthened. There, too, the way was paved for a systematic treatment of Halakah and exegesis. In Jabneh were held the decisive debates upon the canonicity of certain Biblical books; there the prayer-liturgy received its permanent form; and there, probably, was edited the Targum on the Pentateuch, which became the foundation for the later Targum called after Onkelos. It was Jabneh that inspired and sanctioned the new Greek version of the Bible—that of Akylas (Aquila). The events that preceded and followed the great civil revolution under Bar Kokba (from the year 117 to about 140) resulted in the decay and death of the school at Jabneh. According to tradition (R. H. 31*b*), the Sanhedrin was removed from Jabneh to Usha, from Usha back to Jabneh, and a second time from Jabneh to Usha. This final settlement in Usha indicates the ultimate spiritual supremacy of Galilee over Judea, the latter having become depopulated by the war of Hadrian. Usha remained for a long time the seat of the academy; its importance being due to the pupils of Akiba, one of whom, Judah ben Ilai, had his home in Usha. Here was undertaken the great work of the restoration of Palestinian Judaism after its disintegration under Hadrian. The study of the Law flourished anew; and Simon, a son of Gamaliel, was invested with the rank that had been his father's in Jabneh. With him the rank of patriarch became hereditary in the house of Hillel, and the seat of the academy was made identical with that of the patriarch.

In the time of Simon ben Gamaliel the seat of the Sanhedrin was frequently changed; its first move being from Usha to Shefar'am (the modern Shef'a 'Amr, a village about twelve miles eastward of Haifa); thence, under Simon's son and successor, Judah I., to Bet Shearim; and finally to Sepphoris (Zipporin), the modern Sefoorieh, where a

Movements of the Sanhedrin.

celebrated disciple of Akiba, Jose ben Ḥalafta, had been teaching. Only with great difficulty could Simon ben Gamaliel establish his authority over this pupil of Akiba, who far outshone him in learning. Simon's son, Judah I., however, was fortunate enough to unite with his inherited rank the indisputable reputation of a distinguished scholar, a combination of great importance under the circumstances. Judah, in whom "Torah and dignity" were combined, was the man appointed to close an important epoch and to lay the foundation of a new one. The academy at Sepphoris, to which eminent students from Babylonia also flocked, erected an indestructible monument to itself through Judah's activity in editing the Mishnah, which attained to canonical standing as the authentic collection of the legal traditions of religious practise. In the Mishnah, the completion of which was accomplished soon after the death of its author or editor (about 219), the schools both of Palestine and of Babylonia received a recognized text-book, upon which the lectures and the debates of the students were thenceforward founded. The recognition of Rabbi Judah's Mishnah marks a strong dividing line in the history of the Academies and their teachers: it indicates the transition from the age of the Tannaim to that of the Amoraim.

Centers of Learning.

After Judah's death Sepphoris did not long remain the seat of the patriarch and the Academy. Gamaliel III., the unpretentious son of a distinguished father, became patriarch; but Ḥanina ben Ḥama succeeded him as head of the school, and introduced the new order of things that commenced with the completion of the Mishnah. In Ḥanina's lifetime the last migration of the Sanhedrin occurred. His pupil, Johanan b. Nappaḥa, settled in Tiberias, and the patriarch Judah II. (grandson of Judah I.) soon found himself compelled to remove to that city. The imposing personality and unexampled learning of Johanan rendered Tiberias for a long period the undisputed center of Palestinian Judaism, the magnet which attracted Babylonian students.

When Johanan died in 279—this is the only settled date in the whole chronology of the Palestinian amoraim—the renown of the Tiberias Academy was so firmly established that it suffered no deterioration under his successors, although none of them equaled him in learning. For a time, indeed, Cæsarea came into prominence, owing solely to the influence of Hoshaya, who lived there in the first half of the third century, and exercised the duties of a teacher contemporaneously with the Church father, Origen, with whom he had personal intercourse. After Johanan's death the school at Cæsarea attained a new standing under his pupil Abbahu; and throughout the whole of the fourth century the opinions of the "sages of Cæsarea" were taken into respectful account, even in Tiberias. Sepphoris also resumed its former importance as a seat of learning; and eminent men worked there in the fourth century, long after the disaster to the city wrought by the forces of the emperor Gallus. From the beginning of the third century there had been an academy at Lydda in Judea, or "the South," as Judea was then called. This academy now gained a new reputation as a school of traditional learning. From it came the teacher to whom Jerome owed his knowledge of Hebrew and his insight into the "Hebræa Veritas." But neither Cæsarea, Sepphoris, nor Lydda could detract from the renown of Tiberias.

Tiberias accordingly remained the abode of the official head of Judaism in Palestine and, in a certain sense, of the Judaism of the whole Roman empire, as well as the seat of the Academy, which considered itself the successor of the ancient Sanhedrin. The right of ordination which, since Simon ben Gamaliel, the patriarch alone had exercised (either with or without the consent of the Council of Sages), was later on so regulated that the degree could only be conferred by the patriarch and council conjointly. The patriarchal dignity had meanwhile become worldly, as it were; for exceptional learning was by no means held to be an essential attribute of its possessor. The Academy of Tiberias, whose unordained members were called *ḥaberim* (associates), never lacked men, of more or less ability, who labored and taught in the manner of Johanan. Among these may be mentioned Eleazar b. Pedat, Ami and Assi, Ḥiyya bar Abba, Zeira, Samuel b. Isaac, Jonah, Jose, Jeremiah, Mani, the son of Jonah, and Jose b. Abin, who constitute a series of brilliant names in the field of the Halakah. In the department of the Haggadah—always highly prized and popular in Palestine—the renown of Tiberias was also greatly augmented by many prominent and productive workers, from the contemporaries and pupils of Johanan down to Tanḥuma b. Abba, who was illustrious as a collector and an editor of haggadic literature.

The Jerusalem Talmud.

The imperishable monument to the school of Tiberias is the Palestinian or, as it is commonly called, the Jerusalem Talmud, of which Johanan b. Nappaḥa laid the foundation; for which reason he is generally styled, although erroneously, its redactor or author. In point of fact, however, this work was not completed until nearly a century and a half after Johanan's death; and its close is undoubtedly connected with the extinction of the patriarchal office (about 425). But Tiberias did not therefore cease to be a seat of learning, although very little of its subsequent activity is known. According to a Babylonian legend, a scion of the Babylonian exilarch's house fled to Tiberias in the first third of the sixth century, and there became a *resh pirḳa* (ἀρχιφερεχίτης = head of the school); a hundred years later a Syrian bishop made an appeal to the sages of Tiberias for the purpose of inducing Du Nuwas, the Jewish king of South Arabia, to cease his persecution of the Christians there.

The Tiberian Punctuation.

Further importance was gained by Tiberias as the seat of the Masoretic traditions and innovations; for there in the seventh century was introduced that system of punctuation which was destined to aid so efficiently in the proper reading and understanding of the Biblical text. This system, which achieved universal recognition, is called the "Tiberian punctuation." At Tiberias flourished, about the middle of the eighth century, the Masorite Phinehas, called also Rosh Yeshibah ("Head of the Academy"), and Asher the Ancient, or the Great, forefather of five generations of Masorites (Nehemiah, Moses, Asher, Moses, and Aaron), was to a certain extent his contemporary. The last-named Aaron ben Moses ben Asher (briefly called Ben Asher), a contemporary of Saadia, brought the Tiberian school of Masorites to a distinguished end. Tiberias thereafter ceased to play any part in Jewish learning, until, in the twelfth century, it emerged for a brief period, and again in the sixteenth century, when it became the object of the pious ambition of Don Joseph Nasi of Naxos.

AÇAN (or **ḤAZAN**), **MOSES**: Identical perhaps with the Moses ben Joseph Ḥazan, who lived in 1245 at Toledo, and maintained business connections with Alfonso X., the Wise, king of Castile. When Alfonso was in Cuença in 1271, Moses Açan informed him of the business relations that existed between himself and the infante and Don Nuño de Lara, as well as the grandees of Castile.

M. K.

AÇAN (or **ḤAZAN**), **MOSES DE ZARAGUA**: Native of Catalonia, who flourished in the fourteenth century. He wrote a rimed treatise on chess in the Catalonian dialect, which he begins by referring to the creation of the world, and exhorts his fellow man to glorify the Creator by the practise of virtue. Favoring chess, he opposed all games of chance, particularly card-playing, which, he declared, would ruin all addicted to it. This treatise, a manuscript of which is preserved in the Escurial, was translated into Spanish in 1350, probably by a Castilian Jew.

ACBARA. See Okbara.

ACCAD or **AKKAD** (**Archad,** Septuagint, or in some manuscripts, **Achad**).—**Biblical Data**: Word occurring once in the Old Testament (Gen. x. 10), as the name of a city; one of the four cities which formed the beginning of the kingdom of Nimrod. The exact location is unknown. On the Assyrian and Babylonian cuneiform tablets Akkad appears as the name of a city, and also in an inscription of Nebuchadnezzar I. (about 1135 B.C.), but the connection in which it occurs gives no hint of its locality or history. See "Keilinschriftliche Bibliothek," iii. 170, 171. Some critics are inclined to identify this place with the city of Agade in northern Babylonia, of which Sargon I. was king about 3800 B.C., but there is no positive proof that the two are identical. The word Akkad, as used both by Assyrians and Babylonians, occurs most frequently as a part of a royal title much affected both in early and in later periods. In the early inscriptions it is *lugal Kengi* (*Ki*) *Uri* (*Ki*), which appears in Semitic in the form *shar* (*mât*) *Shumêri u* (*mât*) *Akkadi*; that is, king of Sumer and Accad. There has been much controversy in recent times regarding the exact meaning of this title, and it can hardly be said that a conclusive decision has yet been reached (see Babylonia). It is at least reasonably clear that both the Babylonian and Assyrian kings who bore it claimed, by its use, to govern the whole of Babylonia. In this use Accad designates northern Babylonia, and Sumer southern Babylonia.

R. W. R.

—**In Rabbinical Literature**: The old Jewish traditions differ as to the identity of Accad. According to the Palestinian tradition (Targ. Yer. i. and ii. to Gen. x. 10, Gen. R. xxxvii.), Accad is identical with Nisibis. Jerome and Ephraem Syrus, in their commentaries on the passage, accept this view. The Babylonian authorities considered Accad to be the city of Bashkar (or Kashkar; see Rabbinowitch, "Diḳduḳe Soferim" to Yoma, 10*a*, note 10; Jastrow, "Dict." p. 676), mentioned several times in the Talmud (*e.g.*, Yoma, 10*a*). Its situation, however, is unknown.

ACCENTS IN HEBREW: Symbols denoting vocal stresses on particular syllables in pronouncing words or sentences. 1. In every word we utter, one syllable is spoken with greater emphasis and clearer enunciation than the rest. About it, as the strongly stressed or accented element, the other unaccented, or rather less strongly accented, syllables are grouped. Thus, in the word "con*tra*dict" the last syllable is the bearer of the main accent; a weaker, secondary accent rests on the first, while the italicized intermediate syllable is unaccented. Similarly, in a sentence, some words are pronounced with marked distinctness, while others are spoken hastily, almost without a stop, and made to lean forward or backward, as the italicized words in "*he is a* man *of the* world"; "*I* knew *it*." Both the accent which belongs to every word in itself ("word-accent") and the one which indicates its rank in a sentence ("sentence-accent") are to be regarded as the vital force which welds disjointed speech-elements into harmonious sense-units. The stops become particularly noticeable when, in a larger complex of clauses, they serve to mark the limits of each clause and its relation to the others. Some pauses are bound to be made, on physical grounds, to take breath; it is nearly always so arranged that the logical pauses shall coincide with those intervals. In an ordinary page of English the word-accent is never indicated (as it is in Greek), nor do the signs of punctuation (. : ; ,) show all the stops which careful reading in accordance with sense (especially oratorical delivery or the forceful recital of a literary masterpiece) requires. In the Hebrew text of the Bible, on the contrary, is found an elaborate system of signs (notations of stresses, or Accents) by which the stronger as well as the weaker stresses belonging to syllables and words are marked, so that a reader who is acquainted with the use of the symbols may recite the sacred texts correctly and, in appearance at least, intelligently, without considering grammar or sense.

Name.

2. The Hebrew (Aramaic) word טַעַם (טַעֲמָא), plural טְעָמִים (טַעֲמִין), which is used in the Masorah in the sense of "accent," "accents," denotes, in the first place, "taste" (in the literal sense, as in Ex. xvi. 31); then, "judgment," "good sense" (see I Sam. xxv. 33); in Talmudic Hebrew, "sense" (דְּבָרִים שֶׁל־טַעַם "words of sense"; יֹצֵא לְכַמָּה טְעָמִים "admitting of more than one sense"). This is the oldest term which thus conclusively proves that the Biblical system of accentuation was primarily designed to mark the various degrees of logical, or sense, pausation. This method of punctilious distribution of great and small pauses led, however, to a peculiar intonation in a half-singing style which is called Cantillation; this may still be heard in (orthodox) Jewish synagogues. The Accents have the secondary function of marking this intonation, each symbol being equal to several musical notes. Hence their appellation in Arabic, *laḥn*, plural *alḥan*, as early as Ibn Koreish, and the Hebrew term נְגִינָה "melody," plural נְגִינוֹת.

On the term "trop" (the same as the English "trope," in the sense of a musical cadence) used by the Jews in their vernaculars, see Berliner, "Beiträge zur hebräischen Grammatik in Talmud und Midrasch," p. 29, note 4, Berlin, 1879.

Sentence-Accent.

3. All of the Hebrew Accents are properly "sentence-accents." Hence they vary in form (֑, ֔, ֣, ֤ etc.) in accordance with their varying pausal functions. The sign once chosen, the "word-accent" is indicated by its place in the accented syllable, above or below the initial consonant in the center; when there is a vowel sign below, the latter occupies the center, while the accent sign is placed farther to the left: בָּשָׂר, לַחֹ֔דֶשׁ, יִשְׁפֹּט, תִּכְלֶ֫נָּה. Some of the accents are placed, without regard to the accented syllable, invariably at the beginning or at the end of the word (hence termed *prepositives* and *postpositives*: הַמֶּ֫לֶךְ, אָמַ֫רְתִּי; in the editions of Baer, the notation is repeated on the accented syllable: הַמֶּ֫לֶךְ). A secondary accent (מֶתֶג "bridle," that is, check) is indicated by ֽ: הָֽאִשָּׁה. A word may lose its accent; then it is joined by means of a hyphen (מַקֵּף "coupler") to the next following word: יִקְרָא-לִי, יִשְׁמַר-צֵאתְךָ, וְאֶת-כָּל-הַבְּהֵמָה; the words thus united are regarded, for purposes of accentuation, as one word: מִקְנֵה-אַבְרָם.

Place of Word-Accent.

Hebrew words have their main accent either on the last syllable (מִלְּרַע "below") or on the penult (next to the last syllable) (מִלְּעֵיל "above"). The accent is never found farther back (for a seeming exception see below). In the majority of words (word-types) the accent falls upon the last syllable: אָנֹכִי, זָהָב, עָזַב, etc. Penultimate accentuation is found in the pronouns אֲנַ֫חְנוּ (and the shorter form נַ֫חְנוּ), אַתֵּ֫נָה, הֵ֫מָּה, הֵ֫נָּה (similarly in the dissyllabic suffixes -כֶ֫נָה, -הֶ֫מָּה); in verbal forms of all stems (conjugations) ending in -תָּ (-תָּה), -תִּי, -נוּ, -נָה; in the causative stem (*hif'il*), additionally in the forms ending in -ָה and -וּ; the latter rule applies also to verbs ע"ע and ע"וי in all stems (except those which follow the analogy of triliteral verbs), hence קָ֫לָה, etc.; in the noun in forms with a helping vowel like מֶ֫לֶךְ (compare מַלְכְּ+ךָ), as in verbal forms like יָ֫גֶל; similarly in the dual ending -ַ֫יִם; with the so-called locative ending -ָה (with a few exceptions); in verb and noun before the suffixes -נִי, -ךָ(-כָה) (when preceded by [י]ֵ and in forms of the type קְטָלַ֫תְהוּ and יִקְטְלֶ֫נְךָ, יִקְטְלֶ֫נְּךָ, hence יִקְטְלֶ֫ךָּ; similarly מִמְּךָ), -ךְ (in קְטָלַ֫תֶךְ, יִקְטְלוּ֫נֶךְ) and -כִי, in -ֵ֫ךְ, before -הוּ, -ָהּ, -נוּ, -ם (in קְטָלָ֫תַם), -מוֹ and -נָה; in the adverbs לָ֫מָּה (also לָמָּה) and כָּ֫כָה and those with the locative ending -ָה like אָ֫נָה and שָׁ֫מָּה (although not uniformly); in וַיִּקְטֹל forms (not uniformly, although with more regularity in verbs ע"ע and ע"וי) when the last syllable is closed and the next to the last is open, hence וַיֹּ֫אמֶר, וַיְבָ֫רֶךְ, וַיָּ֫סָב, וַיָּ֫קָם, etc.; in forms of the type וְקָטַל the accent remains on the penultimate before -נוּ and (less uniformly) in all forms with an open penultimate.

Penultimate accentuation may also be due to *recession* (נְסוֹג אָחוֹר "stepping back"), as in קֹ֫רֵא לַ֫יְלָה, that is, when a non-pausal accent (see § 4) due on the ultimate precedes a pausal accent (*ibid.*) due on the penultimate; the non-pausal then recedes to the penultimate (and even farther back in גֶּ֫עֶרְמוּ מַ֫יִם) on the same conditions as the secondary accent if the two words were hyphenated (see below): in point of fact, the non-pausal is intended as a substitute for the secondary accent (see § 4); the rule, however, is not followed consistently (see Jos. Wijnkoop, "Darke ha-Nesiga, sive Leges de Accentus Hebraicæ Linguæ Ascensione," Leyden, 1881; also in Hebrew, דַּרְכֵי הַנְּסִיגָה, Amsterdam). Finally, penultimate accentuation is due to recession in *pause*, that is, when the accent is a pausal one, ֑, ֔, ֒, less often ֓, ֔, etc.; in אָנֹ֫כִי, אָ֫נִי, אָ֫תָּה; in verbal forms ending in -ָה and -וּ, hence קָטָ֫לָה, יִקְטֹ֫לוּ, etc.; also in וְקָטַלְתִּי, וְקָטָלְתְּ; in forms like שֶׁ֫כֶם, יֶ֫הִי, פֶּ֫רִי (for the non-pausal forms פְּרִי, יְהִי, שְׁכֶם); before the suffix -ךָ, hence מַלְכֶּ֫ךָ, קְטָלֶ֫ךָ, etc.; in adverbs and participles, for example, עָ֫תָּה, הִנְנִ֫י. Conversely, the pausal accent may bring about ultimate accentuation as in וַיָּסֹב, וַיָּמֹת, וַיִּגְמַל.

Secondary Accent (מֶתֶג).

Properly, the secondary accent is due upon the second syllable from the main accent, provided the intervening syllable is long, that is, open with a long vowel, closed with a short vowel, or opened, that is, originally closed, with a short vowel: הָֽאֶחָת, הָֽאִשָּׁה, הָֽאָדָם. The syllable receiving the secondary accent must also be long (open with a long vowel, opened with a short vowel: הַֽחַיִּים, יַֽעַמְדוּ; with a closed syllable the sign is implied, but never expressed: אַבְרָהָם). When the syllable preceding the main accent is overlong, that is, closed with a long vowel, the secondary accent will be placed there: שָֽׁמְרָה מִבָּרֶךָּ אֹֽזֶן שִֽׁית-לִי, בָּֽתִּים, הָיְתָה (imperative) and similar instances, owing to a retarded pronunciation of *o* which is thus raised to *å*. Similarly, the secondary accent will fall upon the syllable preceding the main accent when it is long (open with a long vowel, opened with a short vowel) and the syllable bearing the main accent is a compound one, that is, consists of an ordinary (simple) syllable preceded by a consonant and an incompletely reduced vowel (a חָטֵף: ֲ, ֱ, ֳ), or by a consonant and a completely reduced vowel (a vocal שְׁוָא: ְ) at the beginning of a word; neither combination is capable of forming a syllable by itself, nor may it be joined in speech to the preceding syllable: כִּֽי-לְגוֹי, יַֽעֲלֶה, וְגָֽלְלוּ. When a word is long enough, another subsidiary accent may become necessary; it is placed at the same distance from the secondary accent as the latter from the main accent, and upon the same conditions (the one to the right being the stronger): הָֽקִים-אֹתְךָ, מֵֽהַתַּחְתֹּנוֹת, וּמֵֽהַתִּיכֹנוֹת, וְהָֽעֲמָלֵקִי, וַאֲבָֽרְכָה. When the second syllable from the main accent is closed (with a short vowel) and the syllable next preceding is open, the secondary accent is placed upon the latter, the interval between the two accents thus exceeding the limit of one syllable: הָֽאַרְבָּעִים, וּמִֽדְבְּרֵי, פְּרַס-וּמָדַי (observe that -וּ prefixed never takes a secondary accent).

Distinct from the מֶתֶג in the cases just mentioned (also in all forms of the verbs הָיָה and חָיָה in which the guttural closes a syllable with a short vowel, for instance, לִֽהְיוֹת, יִֽחְיֶה, וִֽחְיִיתֶם), which the Hebrew grammarians term "light מֶתֶג," is the so-called "heavy מֶתֶג" which is found, on certain conditions, with closed syllables containing a short vowel (הַֽמְטַהֵר, וַיִּֽתְהַלְּכוּ, הַֽכְּזוֹנָה, etc.), or (in Psalms, Proverbs, Job) with reduced vowels (vocal שְׁוָא, חָטֵף: בְּֽנֵי נֶגְדָּךְ, קְֽרָא-נָא, אֲֽנִי עַבְדְּךָ, and so on). A third kind which does not concern us here at all is the so-called "euphonic

מְתֶג." See Gesenius-Kautzsch, "Hebrew Grammar" (Clarendon Press edition), § 16, 2; Stade, "Hebräische Grammatik," §§ 53–56; both rest upon S. Baer, "Die Methegsetzung," in Merx's "Archiv für Wissenschaftliche Erforschung des A. T.," 1867, pp. 56 *et seq.*; 1868, pp. 194 *et seq.*, also in Latin in his edition of Proverbs. The accent is often an aid to sense, especially in words similar in sound, but different in meaning, as שָׁתָה "he drank," שָׁתָה "she put"; רָחֵל בָּאָה "Rachel is coming," רָחֵל׀ בָּאָה "Rachel came." Similarly, the מֶתֶג; compare יִרְאוּ, "they will fear" and יִרְאוּ "they will see," etc.

Small words of frequent occurrence, as the monosyllabic prepositions and conjunctions (-אֶל, -אֶת, -עַד, -עַל, -עִם; -גַּם, -כִּי, -פֶּן), the words -אֵין, -לֹא, -כָּל, also אֲשֶׁר, are, as a rule, joined to the following (long) word. Not only two, but three, and even four, words may be hyphenated thus: אֶת-כָּל-עֵשֶׂב, -אֶת-כָּל-אֲשֶׁר-לוֹ.

Use of Hyphen.

On the other hand, a long word will occasionally be joined to a following small word: הִתְהַלֶּךְ-נֹחַ, נִשְׁבְּרֵי-לֵב. There is always a close syntactical relation between the hyphenated words. Indeed, in every union of words, sense and rhythm are equal determining factors.

4. The verse (פָּסוּק) is adopted as sense-unit. It is certainly the natural unit in the poetical portions of the Bible in accordance with the Rhythm of Parallelism. It is there equally natural to divide the verse into two halves. Accordingly, in a part of the recently discovered fragments of the Hebrew text of Ecclesiasticus, each verse occupies two short lines (stichs) running across the page; for example:

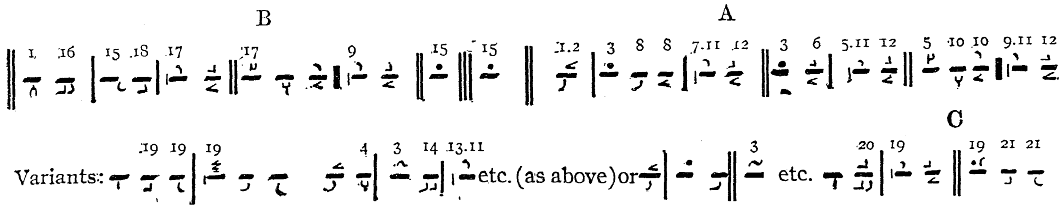
Place of Sentence-Accent.

עד עולם הגיד נהיות ונסתרות לפני בואן:

The Song of Moses (Deut. xxxii.) is still arranged in this fashion in the Scrolls and in the ordinary editions of the Hebrew Bible.

Elsewhere the Verse-division is an arbitrary, though convenient, innovation which was not permitted to penetrate into the Scrolls (the sign, marking the end of a verse, must be kept out of them; see Soferim, iii. 7). The whole of the Bible was to be read according to a rhythmical swing which even in the poetical compositions is largely determined by sense. The traditional verse, as a glance at the English Bible will show, does not always coincide with our period; nor is it always of the same length. For purposes of accentuation each verse must be dealt with separately. The problem is invariably: given a verse, determine the accentuation. The leading principle of the system is halving (extended from the poetical portions to the rest of the Bible). Each verse is divided into two parts not necessarily equal; these parts are each divided into two other parts; this process is continued until an indivisible complex of words is reached. The greater pauses are regulated by sense. Frequently, however, the logical pause is sacrificed to rhetorical effect. A characteristic deviation from the accepted method of punctuation consists in passing over introductory clauses or phrases which are treated as a subordinate part of what follows; for example, "*And God said,* Let there be a firmament in the midst of the waters, and let it divide the waters from the waters" (Gen. i. 6). The lesser pauses obey the laws of syntactical construction, which are obviously various in different languages. The English sentence "And the earth was waste and void" properly reads in Hebrew: "And the earth—it was waste and void"; hence there will be a pause in Hebrew after "and the earth." The order of words differs also. Compare the very opening of the Bible in Hebrew and in English. Rhetorical effect makes itself felt in connection with the smaller no less than in the case of the greater pauses. Thus, for the sake of emphasis, the pause may be shifted from one place to another; or it may be introduced within a group of words which is properly indivisible. In general, greater latitude is permissible in dealing with the slighter pauses. Individual taste will there play an important part. Rhythm is another factor. A group must consist of more than two words to admit of a marked pause within it. When thus the stops have been properly distributed in a verse, our next task is to indicate both the presence and the absence of a pause by the corresponding signs (accents). The accents are either pausal (מַפְסִיקִים "stops") or non-pausal (מְשָׁרְתִים "servants," *servi*). The notation differs in Job, Proverbs, Psalms (אִיּוֹב מִשְׁלֵי תְּהִלִּים; hence, אֱמֶ"ת, טַעֲמֵי אֱמֶ"ת) from that employed in the other (twenty-one) books (טַעֲמֵי כ"א סְפָרִים). The two systems must be treated separately, that of the three books first.

Determination of Accent.



A. טַעֲמֵי אֱמֶ"ת.

Pausal: ◌ֽ (סִלּוּק "cessation"), ◌֥֫ (עֹלֶה וְיֹרֵד "ascending and descending"), ◌֑ (אַתְנָח "rest"), ◌֗ (רְבִיעַ "rhomb"), ◌֝֗ (רְבִיעַ מֻגְרָשׁ, "רְבִיעַ *gereshatum* [see below]"), ◌֮ (צִנּוֹר "water-channel"), *postpositive*, ◌֭ (דְּחִי "thrust back"), *prepositive*, ◌֡ (פָּזֵר "shake" or "trill"), ◌֓׀ (great שַׁלְשֶׁלֶת "chain"), ◌֣׀ and ◌֨ (אַזְלָא לְגַרְמֵהּ and מְהֻפָּךְ לְגַרְמֵהּ; לְגַרְמֵהּ "by itself"), that is, pausal (for the meaning of אַזְלָא and מְהֻפָּךְ see below).

List of Accents.

Non-pausal: ◌֥ (מֵ[א]רְכָא "lengthening"), ◌֖ (טַרְחָא "laboring, heavy, slow"), ◌֨ (אַזְלָא "going on," that is, not pausing), ◌֣ (מוּנָח "settled," that is, unvarying in its tone), ◌֬ (עִלּוּי "placed above"), ◌֤ (מְהֻפָּךְ "turned round"; the older form was ◌֤), ◌֪ (גַּלְגַּל "wheel"; the older form was ◌֪, ◌֪), ◌֓ (little שַׁלְשֶׁלֶת), ◌֘ (צִנּוֹרִית), *pretonic*. The names, it will be observed, are derived from the musical value or from the form of the accents. Other names are met with; but those given are the most common. The diagram printed above will be employed to illustrate the use of the various signs.

Explanatory Notes.

1. The proper measure of a poetical verse is two short lines (a distich or couplet). Such is the form of an ordinary verse in Proverbs. The main cesura is then marked by ֑. But frequently, as in Psalms, a verse will contain three short lines (a tristich or triplet; that is, rhythm is sacrificed to sense); or a verse may contain four short lines (a tetrastich or quatrain; that is, two rhythmical verses making one sense-verse); or a verse, not necessarily long, may be trisected purely for reasons of sense or for the sake of oratorical emphasis. The main cesura will then be marked by ֥֫ (a stronger ֑), while ֑ will be reserved for the secondary cesura (that is, the one between ֥֫ and ֑). In the diagram the three by no means coordinate sections of the verse are designated by the letters A, B, and C. In a short verse, therefore, drop A, and retain B and C. In a still shorter verse (one consisting of but one short line), drop A and B, and retain C. *This principle applies equally to the smaller sections on the diagram (that is, those limited by a pausal accent), the beginning of which may be lopped off to suit varying lengths.*

There will be found ֥֫ in the sixth word from ֑ and farther; it will be replaced by ֑ occasionally in the fifth, and almost always in the fourth word; ֥֫ is never used farther to the left: ֑ is replaced by ֭ always in the first, occasionally also in the second, word (see note 19).

2. רְשָׁעִ֗ים, חֲפֵצִ֗י, מְצָ֗א, אֶ֗ל חָ֗ק (for אֶל־חֹק), יִרְאֶ֗נּוּ טוֹב, שׁ֗וּב נָ֗א.

3. The main cesura in section A is marked by ֗; when a second cesura becomes necessary, ֗ is repeated. *Observe, in general, that whenever an accent is repeated, the one farther to the left is the weaker.* Between ֗ and ֥֫ there must be no word (in which case ֗ is called little ֗) or at least two words (then we have great ֗). Two ֗s must equally be separated by at least two words. When ֗ becomes impossible, ֜ takes its place. The shortest measure of section A is two words; a cesura is always required.

4. The servus of ֥֫ is ֤ (or ֣, when properly the hyphen should be employed; or ׀֤, that is, with a פָּסֵק). This ֤ may occur in the same word with ֥֫ (in place of the light מֶתֶג).

Here פָּסֵק, "cutting off," "separating," is a line similar to the one used with שַׁלְשֶׁלֶת and לְגַרְמֵהּ. It occurs (*a*) before or after the divine name "to prevent its being joined, in the reading, to a word which—in the opinion of the accentuators—it was not seemly to bring into contact with it"; (*b*) between two words of which the first ends in the same letter with which the second begins; (*c*) elsewhere, to mark an emphatic intonation. In all these cases, פָּסֵק introduces a slight pause after a non-pausal accent.

5. In the section limited by great ֗ (great ֗'s section), the main cesura is marked by ֝ (rarely by ׀֤) and the secondary cesura by ׀֤. When only one cesura is required, it is marked by ׀֤ (that is, the ֝ section is cut off); but ֝ is found in exceptional cases, and necessarily, when two servi are introduced (see note 12). Sections of two words may and may not have a cesura. If required, it will, of course, be marked by ׀֤. The shortest measure is one word.

6. Great ֗ never has more than one servus, which is ֤ (exceptionally ֥; particularly when another ֗ precedes). When a pausal accent (֝ or ׀֤) precedes, it is ֝, but ֓ when an open syllable directly (that is, no חָטֵף intervening) precedes the tone-syllable; these accents may appear in the same word with great ֗ (֓ taking the place of light מֶתֶג).

7. Sections of two words will occasionally have a cesura; it is omitted in the case of small words standing at the beginning of the section and accented on the first syllable, unless emphasis is desired. The cesura in little ֗'s section is marked by ׀֤. The shortest measure of little ֗'s section is one word.

8. Little ֗ may have two servi, ֣ ֥ (or ֣ ׀֣); or one servus, ֣. The two servi (֣ ֥) appear occasionally in the same word (when the syllable immediately preceding the tone is open); but this rule is not always obeyed.

9. The cesura in ֝'s section is marked by the same accent, and is dependent upon the same conditions as the cesura in little ֗'s section (see note 7). A secondary cesura is seldom required; the accent marking the main cesura will then be repeated. The shortest measure of ֝'s section is one word.

10. ֝ may have two servi, ֣ ֥ (*i.e.*, ֨ when the tone falls on the second letter and farther; ֥ when on the first); or one servus, ֣ (it may appear instead of light מֶתֶג in the same word with ֝) (or ׀֣). In a few instances three servi are found: ֣ ֨ ֥.

11. ׀֝, when a servus precedes; or when the tone falls on the third syllable or farther; in all other cases, ׀֤ (the latter always between ֝ and ֥).

12. There is no cesura in ׀֝'s section. Its shortest measure is one word. Except in two instances, ׀֝ has never more than one servus, ֥, when the tone is on the first syllable (but in two instances in the place of the hyphen); or on the second when it is simple and the first syllable is a simple closed one without heavy מֶתֶג; ֓ when the condition mentioned in note 6 is fulfilled; ֭ in all other cases (but ֥ in a few instances where the חָטֵף or פַּתַח preceding the tone-syllable is abnormal). Two servi: ֥ ֥; ֥ in the place of a hyphen.

13. The rules for the division of ֜'s section are the same as those laid down for great ֗ (see note 5).

14. ֜ has properly only one servus, ֥, when the tone is on the first syllable; ֥ when on any other syllable (but ׀֤; also ֥ exceptionally in two places; in one of them two consecutive ֜'s are found); always ֥ when under a dageshed letter, except in three places, where ֥ is found again. Exceptionally two servi are found: ֥ ֥; the first is properly in the place of a hyphen; once we find ֥ ֥, where again the first is in the place of a hyphen.

15. The main cesura in section B is marked by ֭; for a second cesura, ֭ will be repeated; and so on. The ֭s may follow each other closely. Properly, between ֭ and ֑ at least two words should intervene. This must always be the case when ֭ marks a subordinate cesura; otherwise an interval of one word is frequently sufficient. When ֭ becomes impossible or undesirable, ֖ takes its place. The interval between ֖ and ֑ must never exceed one word. ֖ is frequently found in the second word from ֑. It is found in the first only when ֑'s word is long; that is, when the tone-syllable therein is preceded by at least two syllables, or by one syllable, provided it is the bearer of a secondary accent (see § 3); otherwise ֖ gives way to a servus. The shortest measure of B is two words (except after ֥֫,

when one word is sufficient). Sections of two words may and may not have a cesura.

16. ֥ should properly never have more than one servus. In all cases where two or more servi are found the servus immediately preceding ֥ is a substitute for ֭ (see note 15). Three servi: ֣ ֣ ֣ (but ֣ ֥, *i.e.*, ֣ when the tone is on the third syllable; or on the second syllable when the first syllable is overlong; ֦ when the condition mentioned in note 6 is fulfilled; ֣ in all other cases). In three instances ֽ takes the place of the middle servus; it is preceded by ֣ and followed by ֣ (when the tone is due on the first syllable) or by ֦ (when the usual condition is fulfilled). Two servi: ֣ ֥ (but ֤ ֥). One servus: ֣ after ֥ (but ֤); ֣ in all other cases. More than three servi are found in three instances: in one ֽ occupies the second place before ֥; in the others the multiplication of servi is due to the resolution of hyphenated words.

17. Theoretically, ֑ marks the main, and ֗ the secondary cesura in ֥'s section; but ֥'s section is usually too short to require two cesuras. One expects ֗ to be the accent where only one cesura is required. Such is frequently the case. But ֑ is employed when the section in front of the cesura must itself be bisected, or when the pausal accent requires two servi before it (in either case ֣ is out of the question; see note 12); sometimes (in three instances) for no apparent reason (֑ and ֗ are so nearly alike in pausal force that occasionally one is placed for the other). Between ֗ and ֥ there must be at least one word. Otherwise ֗ gives way to a servus. The shortest measure of ֥'s section is one word. Sections of two words, of course, have no cesura. The cesura fails likewise in the case of small words standing at the beginning of the section and accented on the first syllable, unless emphasis is desired. The foregoing rules remain in force, even when ֥ gives way to a servus (see note 15).

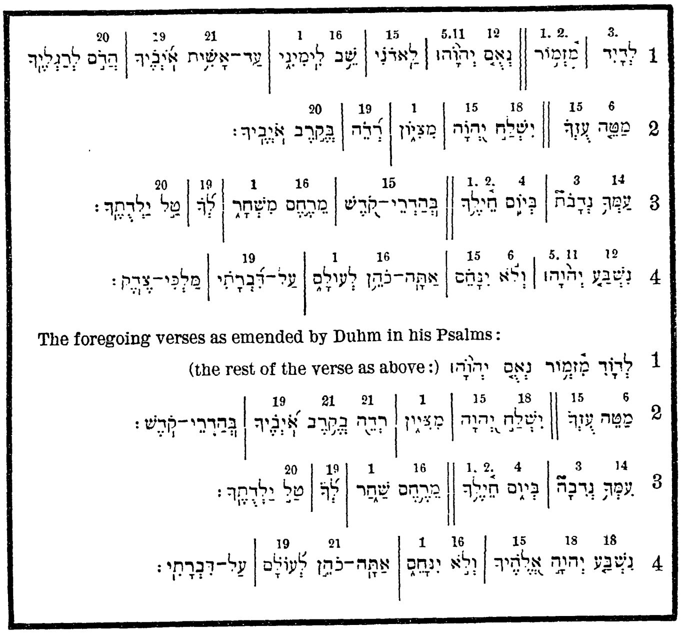
18. ֥ should properly never have more than one servus: ֣ (it may be found, instead of light ֽ, in the same word with ֥ only when the syllable preceding the tone-syllable is overlong and has *a* or *ō* for its vowel). When two servi appear, the one adjoining ֥ (֣) is a substitute for ֗ (see note 17), while the one farther to the left is ֣'s servus (see note 12): ֣ ֦. Once three servi are found: ֣ ֣ ֣; ֣ takes the place of a hyphen.

19. The main cesura in section C is marked by ֑; the secondary cesura by ֗. When only one cesura is required, ֗ should properly mark it. However, ֑ is employed (the two accents are presumably regarded as of equal force; see, for a similar substitution, note 17). Between ֗ and ֥ there must be at least one word. When ֗ is due in the word immediately preceding ֥, it is replaced by a servus, ֣. Another servus, ֥, may be placed in the next preceding word. This necessitates a further change: ֑ (marking the main cesura), which does not permit ֥ immediately after it, and is transformed into ֽ֣. ֑ may be found in the word adjoining ֥ only when ֥'s word is long; otherwise ֑ gives way to a servus. This may necessitate a further change: when the word adjoining ֥ is itself short (that is, with only one syllable, which is not the bearer of a secondary accent, before the accented syllable); ֥, when due on the next preceding word, is replaced by ֑. The shortest measure of C is one word. But ֥ does not permit ֥ immediately before it; the latter accent will then be replaced by ֑, the other accents remaining the same as before ֥. Sections of two words have a cesura, provided the last word is of sufficient length to permit ֑ before it (see above).

20. ֥ should properly never have more than one servus. In all cases where two or more servi are found, the servus immediately preceding ֥ is a substitute for ֑ (see note 19). Three servi: ֣ ֥ ֦, that is, ֥ and ֦ upon the same conditions as before ֥ (see note 16); where ֽ is used before ֥ ֽ will be employed here. Two servi: ֣ ֥; but ֤ ֥; ֥ may take the place of light ֽ in the same word with ֣ (provided that ֑ does not precede; see note 19); in a few places the servi are altogether irregular. One servus: ֣ (when the tone is on the first syllable; but ֤), ֣ (when on any other syllable), or ֣ (after ֗). In a few instances four servi are found.

21. There is no cesura in ֑'s section. Its shortest measure is one word. Except in a few instances, ֑ has never more than two servi. Three servi: ֣ ֥ ֦ (֥ or ֦ according to the usual rule); in three passages: ֥ ֽ ֦ and ֣ ֽ ֥. Two servi: ֣ ֥. One servus: ֣. The servi of ֽ֣ are the same as those of ֑.

As an illustration of the application of the above diagram and rules to concrete cases, the first four verses of Psalm cx. are given above. The cesuras are indicated as in the diagram; the figures refer to the notes.



The foregoing verses as emended by Duhm in his Psalms:
(the rest of the verse as above:)

First Four Verses of Psalm cx.

The verse from Ecclesiasticus quoted above would be accented as follows:

15 | 16 1 | 19
עַד־עוֹלָם | הִגִּיד נִהְיוֹת | וְנִסְתָּרוֹת | לִפְנֵי־בוֹאָן׃

B. טַעֲמֵי כ״א סְפָרִים.

List of Accents. *Pausal:* ◌ֽ, ◌֑, ◌֒ (סְגוֹלְתָּא "cluster of grapes"), *postpositive,* ◌֓׀, ◌֕, and ◌֔ (great and little זָקֵף, "upright"), ◌֖ (טִפְחָא "handbreadth," or טַרְחָא), ◌֗, ◌֘ (זַרְקָא, "scatterer"), *postpositive,* ◌֙ (פַּשְׁטָא "stretching out"), *postpositive,* ◌֚ (יְתִיב "resting"), *prepositive,* ◌֛ (תְּבִיר "broken"), ◌֜ (גֶּרֶשׁ "expulsion"), ◌֞ (גֵּרְשַׁיִם "double גֶּרֶשׁ"), ◌֡, ◌֟ (great פָּזֵר), ◌֠ (great תְּלִישָׁא "drawing out"), ◌֣׀ (לְגַרְמֵהּ—that is מוּנָח לְגַרְמֵהּ).—*Non-pausal:* ◌֣, ◌֤, ◌֥, ◌֦ (double ◌֥), ◌֧ (דַּרְגָּא "trill"), ◌֨, ◌֩ (little תְּלִישָׁא), ◌֪.

Explanatory Notes.

1. The verse may be of varying length. In a long verse ◌֑ marks the main cesura. The two sections are designated in the diagram by the letters A and B. In a short verse drop A and retain B. The shortest measure of a verse is two words. The cesura never fails.

◌֑'s proper place is in the fifth word from ◌ֽ and farther; when due in the fourth and farther to the left, it may be replaced by ◌֔ or ◌֖ (in accordance with the rules laid down for the position of those accents in note 2); the substitution is common in short verses; it necessarily takes place in verses of three or two words; in the first word before ◌ֽ (even in a long verse), ◌֑ is rarely used (except in cases of a marked logical pause).

2. The main cesura in A is marked by ◌֒; the second by ◌֔; for every following cesura ◌֔ is repeated until the last is reached, which is marked by ◌֖. Between ◌֒ and ◌֑ at least three words must intervene; but the proper place is at a considerable distance from ◌֑. Between ◌֔ and ◌֑ there must be at least one word. When ◌֑'s word and the one adjoining it are both short the distance between ◌֔ and ◌֑ must amount to two words. When ◌֔ becomes impossible ◌֖ takes its place. In a few instances where the two words immediately preceding ◌֑ are very short, that is, monosyllables, and properly subject to hyphenation, ◌֖ is found in the third word; this is its utmost limit to the right. The shortest measure of A is one word. Sections of two words always have a cesura.

3. ◌֑'s servus is ◌֣ (which is repeated in the few instances which call for a second servus; see note 2). In a few instances ◌֖ is found in the same word with ◌֑; grammarians incorrectly call it a servus (מְאַיְלָא "inclined").

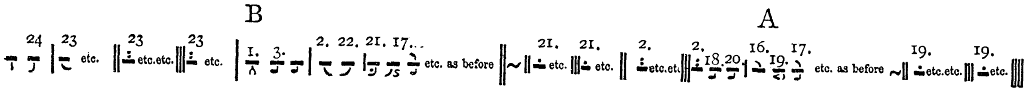
4. The main cesura in ◌֒'s section is marked by ◌֗, which is repeated for every following cesura until the last is reached, which is marked by ◌֘. Between ◌֘ and ◌֒ there must be at least one word. When ◌֒'s word or the one adjoining is long, ◌֗ is admissible in the second word, but is not necessary. When ◌֗ becomes impossible or undesirable, ◌֘ takes its place. ◌֘ is comparatively rare in the third word; this is its utmost limit to the right. The shortest measure of ◌֒'s section is two words. The cesura never fails. When only one word is available ◌֓׀ takes the place of ◌֒.

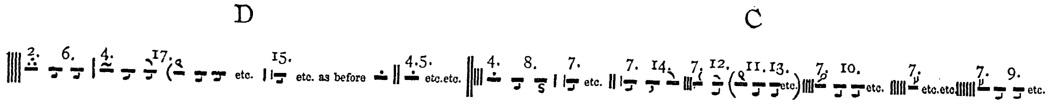
5. Between two ◌֗'s there must be at least three words. When the interval is shorter the one to the left is transformed into ◌֙; the change does not affect the ◌֗ next to the left, which always maintains its position, there being a sufficiently long interval between it and the ◌֗ preceding it. Between ◌֙ and ◌֛ or ◌֘ there must be at least two words; otherwise ◌֙ is transformed into ◌֘ or ◌֛. But ◌֙ may precede another ◌֙; this is the only case in which two ◌֙'s may come together.

6. ◌֗ may have one or two servi, both ◌֣'s.

7. The main cesura in ◌֗'s section is marked by ◌֡, which is repeated for every following cesura until a point is reached when ◌֡ is inadmissible or undesirable (see below); then it gives way to ◌֠; the next cesura is marked by ◌֜; then comes ◌֣׀ which may be repeated. Between ◌֡ and ◌֗ there must be at least four words. It is rarely found in the fourth word. It necessarily replaces there ◌֠ when the next cesura is due immediately before ◌֗; ◌֣׀ then becomes unavailable (see below), and ◌֜ takes its place (that is, ◌֣׀'s section is obliterated); the interval between ◌֜ and ◌֠ must never exceed one word; otherwise ◌֠ and ◌֩ (the servus due in the second word before ◌֜; see note 13) would come together, and, on musical grounds, the two accents can not come together without a pausal accent between them. In a few instances ◌֡ takes the place of ◌֠ in the fourth or third word for no apparent reason. Between ◌֠ and ◌֗ there must be at least two words; it is found in the second only when the two next following words are both long; its utmost limit appears to be the fifth or sixth word (where it replaces ◌֡ for the main cesura). When ◌֠ becomes unavailable it gives way to ◌֜. Between the latter and ◌֗ there need be no interval; its utmost limit is the fourth word. Between ◌֣׀ and ◌֗ there must be at least one word; it is found in the first only in the place of ׀ (that is, פָּסֵק) when the latter sign is due before ◌֜ (strangely enough, the notation remains the same); its utmost limit appears to be the third word. In a section consisting of only three words ◌֣׀ may take the place of ◌֜ in the second word. The shortest measure of ◌֗'s section is one word. Sections of two words may or may not have a cesura; the cesura is likely to occur when the last word is long, but it is not necessary even then. The cesura may be left out also in sections of three words provided it is due immediately before ◌֗.

In the twenty-one books פָּסֵק is especially employed to mark a stop in long sections limited by ◌֡, ◌֠, or ◌֜, for the subdivision of which by means of pausal accents there exists no provision in the accentual system; or to mark a stop immediately before ◌֛, ◌֙, or ◌֘, neither ◌֣׀ nor ◌֜ being available (see note 15).





8. ◌֗ may have one or two servi. Two servi: ◌֣ ◌֧. One servus: ◌֣. The latter is occasionally found in the same word with ◌֗, especially in order to indicate a compound word (אִ֣ילוֹ, Eccl. iv. 10, for example).

9. There is no cesura in ◌֡'s section. Its shortest measure is one word. ◌֡ may have from one to six servi, all ◌֣'s. ◌֟ is found in sixteen instances; in every instance ◌֡ might have been used. ◌֟ never stands alone; it may have as many as six servi: ◌֪ ◌֣ ◌֣ etc.

10. There is no cesura in ◌֠'s section. Its shortest measure is one word. ◌֠ may have from one to five servi, all ◌֣'s. ◌֠ and ◌֩ are constantly interchanged, particularly where the former is subordinated to ◌֜ (see note 11) or to the servus that takes the place of ◌֜ (see note 15).

11. ◌֜'s section should properly be indivisible. But very often a division is introduced. The main cesura is then marked by ◌֡, and the second by ◌֠. Between ◌֡ and ◌֜ at least two words should properly intervene; the former is rarely found in the second word. Sometimes, when there are only two words in ◌֜'s section, a cesura is introduced. Similarly, in a few very rare instances, ◌֠'s section is bisected; ◌֡ then marks the cesura. The reason for the phenomena just mentioned is apparently the slight and almost imperceptible difference in pausal force between the three accents: ◌֡, ◌֠, and ◌֜. The shortest measure of ◌֜'s section is one word.

12. ◌֜ when the accent is on the penultimate, or when ◌֨ precedes; ◌֞ when the accent is on the ultimate, and ◌֨ does not precede.

13. ◌֜ may have from one to five servi, but ◌֞ can have only one. Three or more servi: ◌֨ ◌֩ ◌֣ ◌֣, etc. Two servi: ◌֨ ◌֩. One servus: ◌֣ (when the accent is on the first letter of the word, this is the only servus ◌֞ can take), or ◌֨ (when on any other letter). ◌֨ may take the place of light מֶתֶג in the same word with ◌֜ when no other servus precedes (except when the מֶתֶג divides ◌ְ◌ or ◌ֱ◌, or when ־ follows, unless at the same time ◌֠ precedes).

14. There is no cesura in ◌֣׀'s section. Its shortest measure is one word. ◌֣׀ may have one or two servi: ◌֥ ◌֨, ◌֥.

15. The rules for the division of ◌֛'s, ◌֙'s, and ◌֮'s sections are nearly the same as those governing the division of ◌֗'s section (see note 7). The following differences should be noted: ◌֣׀'s section is seldom available (only three instances are recorded). ◌֠ may be found in the second word before ◌֛, etc., though not frequently, even when the two words next following are both short; its utmost limit appears to be the fifth word (where it replaces ◌֡ for the main cesura). In five passages ◌֠ and ◌֜ are found in the same word (second from ◌֛, etc.); there was evidently a difference of opinion among the accentuators; both accents are now chanted, ◌֜ first. Between ◌֜ and ◌֛ there must be at least one word (but see below); its regular utmost limit is the third word; it is found in the fourth only when the next following cesura is marked by ◌֣׀ (see above), or when it and ◌֠ change places, as in Gen. i. 12; only in the latter case ◌֜ may be found in the fifth word (see Deut. xvii. 5); ◌֠ and ◌֜ may also change places when the latter accent is due in the third word. When ◌֜ becomes unavailable it gives way to a servus, its own servi remaining; ◌֜ may remain when the last word is long. The section limited by ◌֛, etc., may contain no more than one word. Sections of two words may and may not have a cesura: a cesura is admissible when the latter of the two words is long and the interval between the tone-syllables considerable; but even then it is rarely introduced; the accent marking the cesura is ◌֞. The cesura may be left out occasionally also in sections of three words even when it is due at a sufficiently long distance (that is, after the first word of the section) to make ◌֜ available.

16. When ◌֙ is due on the first letter of the word and no servus precedes, it is replaced by ◌֚.

17. ◌֛, etc., may have as many as six servi. Four or more servi: ◌֥֧֤ ◌֨ ◌֩ ◌֣ ◌֣. Three servi: ◌֥֧֤ ◌֨ ◌֩. Two servi: ◌֥֧֤ ◌֣֨—that is, ◌֣ when on the first letter, and ◌֨ when elsewhere; the two servi may occasionally appear in the same word, the first replacing the light מֶתֶג or indicating the end of the first part in a compound word; ◌֥ may take the place of ◌֣ between ◌֨ and ◌֮ when מֶתֶג occurs in the latter's word, or when פָּסֵק precedes. One servus: before ◌֛: ◌֥֧, that is, ◌֧, when two or more syllables intervene between the servus and ◌֛, שְׁוָא at the beginning of a word and furtive פַּתַח counting as syllables; ◌֥ when only one syllable (even an overlong syllable) or none at all intervenes; ◌֧ always remains before פָּסֵק; ◌֥, provided no other servus precedes, may replace מֶתֶג (in the same word with ◌֛) when the latter is due in an overlong syllable (immediately before ◌֛); but not in an open syllable separated from ◌֛ by another open syllable or by an incompletely reduced vowel (חָטֵף); before ◌֙: ◌֥֤, that is, ◌֤, when one or more syllables intervene between the servus and the tone-syllable of ◌֙'s word, שְׁוָא at the beginning of a word and furtive פַּתַח counting as above; in a few compound words ◌֤ appears in the same word with ◌֙; ◌֥ when no syllable intervenes; ◌֤ always remains before פָּסֵק; before ◌֮: ◌֣.

18. ◌֔ when a servus precedes; otherwise ◌֕ is used.

19. The rules for the division of ◌֔'s section are the same as those governing the division of ◌֒'s section except that for ◌֮ there is used here ◌֙. The shortest measure of ◌֔'s section is two words. Sections of two words may or may not have a cesura. The cesura always fails when the second word is short; when it is long a cesura must be introduced, unless the first word is very short, or is a word of frequent occurrence.

20. ◌֔ may have one or two servi, both ◌֣'s. ◌֣ may appear in the same word with ◌֔, provided that no second ◌֣ precedes, in place of light מֶתֶג (it must not divide ◌ְ◌ or ◌ֱ◌; see note 13), but not on the first letter; when ◌֣ is inadmissible and the pausal accent preceding is not ◌֙, ◌֨ (called here מְתִיגָה, or a kind of מֶתֶג) is introduced in the place of the heavy מֶתֶג; when neither ◌֣ nor ◌֨ is admissible ◌֕ is necessarily employed.

21. The rules for the division of ◌֖'s section are the same as those governing the division of ◌֔'s section except that for ◌֙ there is used here ◌֛. The shortest measure of ◌֖'s section is one word. Sections of two words may or may not have a cesura (a cesura may be introduced only when ◌֖'s word is long).

22. ◌֖ has usually only one servus: ◌֥. It occasionally appears in the place of light מֶתֶג, or in compound words, in the same place with ◌֖. In fourteen instances ◌֖ is preceded by two servi: ◌֦ ◌֧ (◌֦ is properly a weakened ◌֛; ◌֧ is ◌֛'s servus).

23. The rules for the division of section B are the same as those governing A except that ◌֒ is not available here. The shortest measure of B is one word. Sections of two words always have a cesura.

24. ◌ֽ's servus is ◌֥. In a few instances ◌֖ is found in the same word with ◌ֽ (מַאיְלָא; see note 3).

For the sake of illustration the Second Commandment (Ex. xx 3–6) is here subjoined (according to the טַעַם הָעֶלְיוֹן; see below):

9 9 9 9 4 7.12 12.13 13 13 13
לֹא יִהְיֶה לְךָ אֱלֹהִים אֲחֵרִים עַל־פָּנַי לֹא תַעֲשֶׂה לְךָ פֶסֶל ׀
7.12 1.1 11 7 9 7
וְכָל־תְּמוּנָה אֲשֶׁר בַּשָּׁמַיִם מִמַּעַל וַאֲשֶׁר בָּאָרֶץ מִתַּחַת
6 4 17 4.5 8 7 14
וַאֲשֶׁר בַּמַּיִם ׀ מִתַּחַת לָאָרֶץ לֹא־תִשְׁתַּחֲוֶה לָהֶם וְלֹא
10 2.18 20 19 17 7.12 13 2
תָעָבְדֵם כִּי אָנֹכִי יְהוָה אֱלֹהֶיךָ אֵל קַנָּא פֹּקֵד
1 2 22 21 17 1[7]
עֲוֹן אָבֹת עַל־בָּנִים עַל־שִׁלֵּשִׁים וְעַל־רִבֵּעִים לְשֹׂנְאָי
24 23 23 19 17
וְעֹשֶׂה חֶסֶד לַאֲלָפִים לְאֹהֲבַי וּלְשֹׁמְרֵי מִצְוֹתָי׃

The use of a separate system for the three books requires an explanation. Luzzatto (in his "Prolegomeni ad Una Grammatica Ragionata della Lingua Ebraica," pp. 177 *et seq.*; letter to Baer appended to the latter's treatise, תּוֹרַת אֱמֶ״ת, p. 55) writes that the different method of chanting in vogue for those books called for a different notation. Baer (תּוֹרַת אֱמֶ״ת, p. 3), and before him Elias Levita, believed that the shorter measure of the poetical verses is responsible for the change of the accentual system. Wickes ("Poetical Accentuation," pp. 7 *et seq.*) seems to combine both views when he says that the system of accentuation found in אֱמֶ״ת involves "a refinement of a purely musical character," and that "the idea seems to have been to compensate for the shortness of the verses by a finer and fuller, more artificial and impressive melody." It would seem that Baer's opinion needs but a slight modification to be accepted as an adequate explanation. The accentuation of the three books may be said to be designedly adjusted to the stichic form of the poetical texts (see beginning of this section; also טַעֲמֵי אֱמֶ״ת, note 1). In the majority of cases the distich was found to cover the sense-verse. ֑ was the natural sign; it is the sign of bisection in a verse in the other books of the Bible. But occasionally the sense required a sense-verse of three stichs. Had ֑ been used to mark the main cesura, the rhythmical trisection would have been entirely obliterated. With the introduction of ֫, ֑ was kept in its place and the rhythmical division left recognizable. Monostichs were not infrequently found in the texts. It was thought desirable to mark them as such accentually by avoiding ֑. The poetical accentuation (the name will now be found appropriate), while primarily serving the requirements of sense, aims at the same time to do justice, as far as it can, to rhythm. It could safely be employed in books like Job, Proverbs, and Psalms, which were not read in public service, and for which therefore no established method of chanting existed (as is the case with Canticles and Lamentations); there was, of course, no room for it in the case of Ps. xviii. and cv. 1–15, which are repeated in II Sam. xxii. and I Chron. xvi. 8–22 in non-poetical surroundings. We subjoin here Ps. xviii. 16 = II Sam. xxii. 17, *Heb.* 16, which will illustrate the transposition of one system into the other:

וַיֵּרָאוּ אֲפִקֵי יָם	וַיֵּרָאוּ ׀ אֲפִיקֵי מַיִם
יִגָּלוּ מֹסְדוֹת תֵּבֵל	וַיִּגָּלוּ מוֹסְדוֹת תֵּבֵל
בְּגַעֲרַת יְהוָה	מִגַּעֲרָתְךָ יְהוָה
מִנִּשְׁמַת רוּחַ אַפּוֹ׃	מִנִּשְׁמַת רוּחַ אַפֶּךָ׃

A double accentuation is found in Gen. xxxv. 22 (one is intended for the verse ending at the Masoretic section; the other extends farther so as to slur over the uncomplimentary story concerning the misconduct of Reuben, מַעֲשֵׂה רְאוּבֵן; or in order to imply the fanciful idea that, in spite of his misconduct, Reuben was still counted with the other sons of Jacob; see Rashi, *ad locum*, and sources) and in the Decalogue, Ex. xx. 3 *et seq.* and Deut. v. 7 *et seq.* (one divides the Decalogue into ordinary verses, neither too long nor too short; the other divides it into ten verses, one for each Commandment). According to the predominance of the lower (֑, ֖, ֥) or upper (֔, ֙, ֒) signs, one accentuation is spoken of as the "lower" טַעַם הַתַּחְתּוֹן, and the other as the "upper" טַעַם הָעֶלְיוֹן.

With the superlinear vocalization goes a system of superlinear accentuation. The signs for the pausal Accents differ; some of them represent the actual or modified initial letters of their names; they are placed invariably above the line. The signs for the nonpausal Accents are the same as in the ordinary system, and are infralinear. The system also aims at simplicity. Ambiguous signs are avoided; ֥ is used in the place of ֤ and ֚ which are wanting, also in the place of ֣ repeated, and in other cases. There is no separate notation for the three books. Wickes ("Prose Accents," pp. 142 *et seq.*) proves conclusively that the superlinear system is derived from the ordinary one. Facsimiles may be found in Ginsburg's "XV. Facsimiles of Manuscripts of the Hebrew Bible," plate ii., London, 1897, and in Stade's "Hebräische Grammatik"; see also the reproduction in Baer's edition of Job. Compare also the literature quoted in article VOCALIZATION.

Accentuation Supposed to be of Divine Origin.

5. The general belief of the Jews in the Middle Ages was that both the vocalization and accentuation originated with Ezra and the mythical GREAT SYNAGOGUE. Thus BEN ASHER (דִּקְדּוּקֵי הַטְּעָמִים, § 16 and elsewhere) speaks of the Accents as introduced by the prophets and princes of the diaspora (the exiled Jews in Babylon), to whom the interpretation of every word (Scriptural passage) was revealed; the accentuation which bears the seal of the prophets is therefore inspired. Some even maintained that the Torah Pentateuch which Moses received on Sinai and delivered to Israel was furnished with vowel-points and accent-signs, both of which were indeed as old as the alphabet and the language (communicated to Adam in paradise). The Sinaitic origin of the punctuation was emphatically denied by Mar Natronai II. (859–869), who accordingly prohibited its introduction into the Scrolls (see "Maḥzor Vitry," p. 91, Berlin, 1893, and Grätz, "Gesch. der Juden," 2d ed., v. 503).

Ben Asher's opinion of the sacredness of the Accents was shared by the contemporaries of Saadia (892–942). This gaon was accused by his detractors of ascribing to himself the gift of prophecy because he had written a treatise in Biblical style with vowel-points and Accents. In his defense Saadia pointed to extracanonical writings (such as Sirach, Scroll of the Hasmoneans, and others) which were pointed and accented. While Saadia evidently does not assign to the accentuation special sacredness, he is nevertheless far from suspecting its recent origin; for, speaking of Sirach's book, he says that he (Sirach) furnished it with points and Accents (wj'alahu musammanan mut'aman). See Saadia's סֵפֶר הַגָּלוּי, ed. Harkavy, St. Petersburg, 1891, קנא; also קפא, note 2; נב, note*. The recently found fragments of Sirach have traces of points and Accents (see "Rev. Ét. Juives," xl. i. *et seq.*); on a text of the Scroll of the Hasmoneans with points and Accents (among the Cambridge manuscripts brought from Cairo), see

Abrahams, "Jewish Quarterly Review," 1899, xi. 291 *et seq.*

6. The accentuation, like the vocalization, is certainly a post-Talmudic innovation. The treatise Soferim, in which for the first time reference is made to points marking the beginning (or, as it may be called, the end) of a verse (iii. 7), and possibly also to signs (points) by which the subdivisions of a verse are indicated, is post-Talmudic. פָּסַק (Soferim, iii. 7) apparently means "to cut up a verse"; compare Meg. 22*a*: לֹא-הִתִּירוּ לִי לִפְסֹק, "I was not permitted to break up a verse"; in xiii. 1, reference is made to the stichic form of the texts of Psalms, Job, and Proverbs in which a verse (that is, a long verse) is said to be broken up into three parts by a blank left after the opening portion (פְּתִיחָה, מַפְתָּח; corresponding to –'s section), at the אַתְנָח (this is apparently the correct reading; see the edition of Müller, Leipsic, 1878) and at the end (סוֹף). Observe that the terminology is far from fixed. In the Talmud itself reference is made to the practise of reciting the text in a manner according with the logical pauses (Meg. 3*a* = Ned. 37*b*; Ḥag. 6*b*; in Ber. 62 mention is made of a system of hand movements used by teachers in training their pupils to pause in the proper places), and apparently also to the habit of chanting (Meg. 32*a*), but not to written signs by which pauses are marked. The beginnings of our system of accentuation may therefore safely be placed in the sixth century. The first to prove the post-Talmudic date of the points and Accents was ELIAS LEVITA (מָסֹרֶת הַמָּסֹרֶת, 1538). See VOCALIZATION.

Post-Talmudic Origin.

7. One is led to the same conclusion by an examination of the Syriac system of accentuation introduced at the end of the fifth century by the grammarian Joseph Huzaya (Wright, "A Short History of Syriac Literature," pp. 115 *et seq.*, London, 1894), to which the Hebrew system bears a striking resemblance and from which it is apparently derived. The Syrians, apt disciples of the Greeks, adopted from the latter their method of reading, and accordingly also their system of punctuation. The Greeks distinguished three kinds of reading (*ἀνάγνωσις*): oratorical or dramatic delivery implying declamation and gesticulation (*καθ' ὑπόκρισιν*); reading in accordance with the tone, that is, word-accent (*κατὰ προσῳδίαν*), and reading in accordance with pauses required by the sense (*κατὰ διαστολήν*). A single point (*στιγμή*), placed above or below or in the middle of the line, indicated the pauses; the upper point (*τελεία στιγμή*) at the end of a period complete in itself (*αὐτοτελής*), the lower point (*ὑποστιγμή*) between protasis and apodosis, and the middle point (*μέση στιγμή*) in a long sentence in order to permit the reader to take breath. Upon this modest system, which is found in our oldest Syriac manuscripts, Huzaya founded a more elaborate one to mark the subordinate divisions in a more regular and careful manner. The following diagram will illustrate the system (A means protasis, and B apodosis):

Compare with this the Hebrew (prose) system in its essential parts:

The point employed at the end the Syrians call *pasoḳa*, that is, "sector"; פָּסוּק (corrupted into פְּסוּק) was apparently the name which in the Hebrew system belongs to the double point (:) marking the end of a verse. The Greeks also had a sign called *ὑφέν* (from which our "hyphen" is derived) to mark the coalescing of two syllables into one (synalepha). The Syrians employed the same sign to join together two Syriac words used in translation of one Greek word; hence the Hebrew hyphen (see § 3). In the Hebrew system the rhetorical Accents (they were the signs of interrogation, exclamation, etc.) are wanting. However, in distributing the pauses the Jewish accentuators frequently pay attention to the requirements of rhetorical declamation (see the quotation from the "Manuel du Lecteur," in Merx, p. 69, note 2; also Ḳalonymus ben David at the end of the Hebrew grammar of Abraham de Balmis, Venice, 1523). See Merx, "Historia Artis Grammaticæ apud Syros," pp. 62 *et seq.*, Leipsic, 1889. On the origin (and function) of the minor pausal Accents see Büchler, "Untersuchungen zur Entstehung und Entwickelung der Hebräischen Accente," Vienna, 1891 (see also Grätz, "Monatsschrift," 1882, pp. 385–409).

8. It is doubtful whether the vocalization and accentuation were introduced simultaneously. Perhaps the latter followed the former. Both became an object of care to the Masoretes, who, in addition to the task of preserving the traditional consonantal text intact, undertook to watch over the traditional vowel-points and accent-signs. Compare, for example, the Masoretic note to Jer. i. 7: ד' בְּטַעַם בְּסִפְרָא, that is, the words וַיֹּאמֶר יְהוָה אֵלַי occur four times (i. 7, iii. 11, xi. 6, xv. 1; contrast iii. 6 and xi. 9) in Jeremiah thus accented. On the accentual variations of the Orientals (מַדִּינְחָאֵי) and Occidentals (מַעַרְבָאֵי) see MASORAH. Even more minute are the differences between BEN ASHER and BEN NAPHTALI. Our editions usually follow the former, who is the authority of the West.

9. The accentuation offers an invaluable aid to the understanding of the Biblical text. One must, however, constantly bear in mind its limitations, which are of a twofold character. On the one hand, in attempting to accomplish too much, the system fails in important points. In short verses its pauses are unnecessary; in long verses there are not enough of them. Sense is not infrequently sacrificed to rhetorical effect. The imperfection of the system is particularly noticeable in the awkwardness with which a parenthesis is indicated (compare, for example, Jer. xx. 1). Nor is it always easy to tell just what the accentuators had in mind in choosing a certain mode of accentuation. While, for the finer points of Biblical exegesis, a knowledge of the Accents is indispensable, the beginner in the study of the Bible should not be burdened with learning more than a few of the important pausals, which are quite sufficient for ordinary purposes. On the other hand, the accentuation represents the interpretation current in the Jewish schools at a comparatively late period. While, on the whole, the accentuation endeavors to be true to the natural meaning (*peshaṭ*; which see) of the Biblical documents, it does not altogether keep itself free from dogmatic prejudices (see I Sam. iii. 3), which it indeed shares with the ancient versions. At best the accentuation is representative of traditional Jewish exegesis, which the student of the Bible is frequently forced to overrule. The rule laid down by ABRAHAM IBN EZRA: כָּל-פֵּרוּשׁ שֶׁאֵינֶנּוּ עַל-פֵּרוּשׁ הַטְּעָמִים לֹא-תֹאבֶה לוֹ וְלֹא-תִשְׁמַע אֵלָיו "no interpretation of a Biblical passage which does not follow the accentuation should be accepted," was sinned against by every Jewish commentator of importance, including Ibn Ezra

Value in Bible Interpretation.

himself. It should, of course, be remembered that the deviations from the accentual interpretation which are met in rabbinical commentaries were not always conscious transgressions. The minutiæ of the accentuation were not always present to the mind of the commentators. But there are cases where the Accents are avowedly disregarded (see Ḳimḥi on Hosea, xii. 12: אֵין כָּל־טַעֲמֵי הַפֵּרוּשִׁים הֹלְכִים אַחֲרֵי טַעֲמֵי הַנִּקּוּד "in interpreting Scripture we are not always bound by the accents"; see also Luzzatto, "Prolegomeni," pp. 187 *et seq.*).

In Isa. xl. 3 there is a famous case where the accentuation (קוֹל קוֹרֵא בַּמִּדְבָּר) is unquestionably right. Accordingly the Revised Version (text) translates: "The voice of one that crieth, 'In the wilderness,'" etc. The quotation of the verse in Mark, i. 3 connects "in the wilderness" with "the voice of one crying" (implying the accentuation קוֹל קוֹרֵא בַּמִּדְבָּר). The New Testament accentuation (hardly invented for the occasion; the punctuation in the Septuagint is due to New Testament influence) is probably nothing more than a haggadic interpretation of the kind so often met with in midrashic works. A puzzling accentuation which goes with the rendering of the Septuagint and Vulgate may be found in Isa. vii. 3: וּשְׁאָר יָשׁוּב בְּנֶךָ (*et qui derelictus est, Iasub filius tuus*; see Baer's edition, "Additamenta," p. 67).

The Accents in the ordinary editions of the Bible are frequently unreliable. Baer's and Ginsburg's Bible editions (where also important variants are noted) are indispensable to one interested in Biblical accentuation.

Bibliography: The oldest rules on the subject of the Biblical Accents may be found in Ben Asher's treatise, דִּקְדּוּקֵי הַטְּעָמִים, edited by Baer and Strack, §§ 16-28, 30-35, 41, 42, 47, Leipsic, 1879. A treatise falsely ascribed to Judah ben Bil'am (הוֹרָיַת הַקּוֹרֵא, ed. Mercerus, Paris, 1565) deals with the subject at greater length (the same treatise in Arabic may be found in Wickes, *Poetical Accentuation*, pp. 102 *et seq.*). In Ḥayyuj's סֵפֶר הַנִּקּוּד (ed. Nutt, pp. 126-129, London, 1870) there is found a chapter on the Accents, which, however, was not written by the famous grammarian himself. *Manuel du Lecteur* is the name given by J. Derenbourg to a treatise on points of grammar and Masora, edited by him (Paris, 1871) from a Yemen manuscript; it contains rules on the Accents. A useful compilation from the works of early Jewish writers on the prose Accents is Wolf Heidenheim's work, מִשְׁפְּטֵי הַטְּעָמִים, Rödelheim, 1808. A few other treatises are mentioned in Wickes. To Christian writers of the seventeenth and eighteenth centuries (Bohlius, Wasmuth, Spitzner, and others) belongs the merit of formulating the principle of halving (see § 4). The paragraphs devoted to the subject in the current Hebrew grammars are more or less superficial (beginners will find the chapter on Accents in Driver's *Hebrew Tenses*, Oxford, 1892, very serviceable). An elaborate discussion is found only in the grammars of Luzzatto (§§ 69-164; compare also his *Prolegomeni*, 177-191), Ewald (§§ 95-100; Ewald rejects the principle of halving, in the place of which he puts his own principle of tripartition; the discussion is quite abstruse) and Olshausen (§§ 41-53; compare the diagram for the prose Accents on pp. 98 and 99, which resembles the diagram given above, § 4). Baer's treatise, תּוֹרַת אֱמֶ"ת, Rödelheim, 1853, deserves notice (compare also Baer in Delitzsch, *Commentary on the Psalms*, 1860). The most thorough works on Biblical accentuation (from which much of the material available for § 4 has been taken, with the necessary simplification) are the ones by William Wickes. *Poetical Accentuation*, Oxford, 1881; idem, *Prose Accentuation*, Oxford, 1887. Compare also Japhet, מורה הקורא, *Die Accente der Heiligen Schrift*, Frankfort-on-the-Main, 1896; König, *Gedanke, Laut, und Accent als die Drei Factoren der Sprachbildung*, Weimar, 1874; Grimme, *Abriss der Biblisch-Hebräischen Metrik*, in *Z. D. M. G.* li. 529 *et seq.*, 683 *et seq.*; idem, *Grundzüge der Hebräischen Accent- und Vokallehre*, Freiburg (Switzerland), 1896; idem, *Collectanea Friburgensia*, fasc. v.; Prætorius, *Ueber den Rückweichenden Accent im Hebräischen*, Halle-on-the-Saale, 1897; Ackermann, *Das Hermeneutische Element der Biblischen Accentuation*, Berlin, 1893; Nathan, *Die Tonzeichen in der Bibel*, in *Programm der Talmud-Tora-Realschule*, Hamburg, 1893; Friedlander, *Die Beiden Systeme der Hebräischen Vokal- und Accentzeichen*, in *Monatsschrift*, xxxviii. 311 *et seq.*

ACCENTS, MUSICAL VALUE OF. See Cantillation.

ACCEPTANCE: In law, the assent by one party to an offer made by another, or to any act which becomes operative only by such assent; in commerce, the question whether the assent has been given before the withdrawal of the offer or incomplete act arises most frequently over "time contracts," when two parties seek to agree upon buying, by quality or quantity only, at a future time goods or effects not identified; as, so many bushels of red wheat, so many pounds of mess beef. This class of contracts is void according to Talmudic law: no one may sell what he does not own at the time, for instance, a fisherman may not sell his next haul, nor a son his share in a dying father's succession, nor may one who is still bargaining for the purchase of a field sell the field to a third person (B.M. 16*a*, *b*). Exceptions to the rule are allowed only on the score of a pressing emergency.

The Mohammedan law annuls all such sales or contracts as a species of gambling; but the Talmud seems to proceed only on the technical ground that the ownership can not be transferred in the way which the law points out for each species of property. But however helpless to enforce agreements of this kind human law might have been deemed by the old sages, they assure us that

> "He who punished the generation of the Flood and the generation of the Dispersion will punish the man who does not stand by his word" (Mishnah B. M. iv. 2).

Even where a specific thing, whether land or chattel, is the subject of a bargain, the Talmudic law does not seem to distinguish between a sale and an "executory contract," that is, an agreement to sell and to buy, though there are "purchases on condition." The question as to when the minds of buyer and seller have so far met that neither of them "can go back" can be treated under the head of Alienation only; for it is merely a question of change of title (Ḳinyan), that is, as to what precise moment the title in the thing sold or exchanged vests in the buyer. The older Roman law similarly did not recognize executory sales; for *emptio et venditio* was a real not a consensual contract; that is, it became binding not by consent of the parties alone, but by the bodily delivery of the thing sold according to prescribed forms.

The question of the acceptance by the wife of a bill of divorce written by the husband is extensively discussed in the Talmud. Strictly, delivery only is necessary. Scripture says, and he shall "give it in her hand" (Deut. xxiv. 1), which, according to the oldest authorities, is complied with by putting it "on her roof, in her yard, or on her shed," even without her consent. For the requisites of delivery, and how the wife can hasten it by a voluntary acceptance through her agent, see Divorce.

A discussion very much like that about the bill of divorce is found in the Talmud, concerning the moment at which a deed of manumission becomes final; but the rules in the two cases differ somewhat, because the principle adopted in the Halakah assumes that the deed of manumission is in its nature wholly beneficial to the slave; while the delivery of a bill of divorce is in its nature an unfriendly act (Giṭ. 12*b*).

This question of Acceptance or finality is often complicated with the law of Agency; for when documents are sent by "messengers," that is, agents, or when the party who is to receive a document empowers another to receive it, there is more room for dispute as to the moment of finality than when the two parties deal with each other in person.

L. N. D.

ACCESSORIES: In English and American law an accessory is a person who, without committing a criminal act with his own hands, or without even being present, aiding and abetting the criminal, nevertheless shares in the guilt of the act, in one of two ways: either by counseling, advising, or procuring the act to be done, in which case he is called "an accessory before the fact," and is considered fully as guilty as the principal offender, or by shielding such offender from punishment, after the act is committed, when the person so shielding becomes an accessory after the fact, whose degree of guilt is lower than that of the principal. The Bible treats very fully of Accessories to one offense, that of idolatry. An individual who advises another to worship false gods is guilty of a substantive offense, and is known as מסית=seducer (Deut. xiii. 7–12; see Abetment). Such seducer is to be put to death by stoning, because "he has sought to mislead thee" (Deut. xiii. 10, *Heb.* 11). It is, therefore, not necessary that any one should have been actually misled, as the very attempt at seduction is punishable with death. The verses Deut. xiii. 13–19 begin by assuming that a few worthless men may mislead the inhabitants of a city into idol-worship and command that the city be destroyed, but say nothing about any special punishment for the instigators. Hence, neither the first nor the second passage deals with the case of a true "accessory before the fact"; that is, with the one who is punished, because he has counseled the commission of a crime which has been committed by others.

Definition.

The Mishnah (Sanh. vii. 10) defines the offense of a private person (not a prophet) who seduces individuals (not a whole city) and sets forth the manner of procedure against him. In Deut. xiii. 8, *Heb.* 9, the person sought to be seduced is commanded: "Neither shall thine eye pity him, neither shalt thou spare, neither shalt thou conceal him." Here, then, is a law declaring that to shield this class of offenders from punishment is sinful. But one who thus becomes an accessory after the fact to the offense of shielding cannot be punished; for the Torah proceeds in the next verse to lay upon the person sought to be seduced the duty of bringing the tempter to justice; and according to the established rule (Mak. iii. 4) wherever a prohibition in the Torah is followed by the command to do an opposite act, the prohibition carries no punishment with it. For Accessories before the fact to other offenses than idolatry the written law pronounces no penalty; nor does it anywhere say in set terms: Do not counsel or procure forbidden acts to be done by others. Hence, the Scriptural punishment of death, or of forty stripes save one, can not be adjudged even against him who employs a murderer to take a man's life; for it is the foremost principle of the Talmudic criminal law that sentence of death or stripes must not be awarded for any offense not expressly denounced in the written law, but derived from it only by construction or by "searching." How this and some other principles unduly favoring the accused would, if faithfully followed in practise, lead to the immunity of the guilty, and how the rabbis of Mishnaic and Talmudic times were compelled to contrive a new system of procedure and of punishment by the side of that which they taught as the truly Scriptural system, are shown under Criminal Law and Criminal Procedure.

Biblical and Talmudic View.

However, in a discussion on the law of agency we find a saying of the old sages (Ḳid. 43*a*):

> "Where one says to his agent: Go and kill such a person, the slayer is punishable and he who sends him goes free; but Shammai taught under a tradition from Haggai, the prophet, that he who sends him is punishable; for in II Sam. xii. 9 [*Heb.*] David is told: 'It is thou who hast killed him, by the sword of the children of Ammon.'"

It is admitted by all that he who directs a murder is punishable in the sight of God; but the distinction between Shammai and the other sages is that Shammai would inflict the heavy punishment of death, and the others a lighter one, though this is not named. L. N. D.

ACCHO (called also **Acco, Acre, Ptolemais, St. Jean d'Acre**). See Acre.

ACCIDENT: Term used in philosophy to express a characteristic of an object or notion which does not necessarily follow from its nature and is not essential to its concept, but is connected with the object as an unessential, seemingly, by chance or Accident. The opposite notion is that of the essential, that is, a necessarily contained characteristic, without which the object would lose its identity. That a human being is mortal or a biped is necessarily contained in the notion "human being," but to be white is only the chance or accidental characteristic of any particular human being, for negroes are also human beings.

Philosophic Notion.

Among the Arabic and Jewish philosophers the doctrine of accidents = מחודשות or חדושים, also מקרים, assumes special importance, particularly as a proof of the existence of God (compare Munk, "Guide des Égarés," i. 385, 398, 424; Kaufmann, "Gesch. der Attributenlehre," p. 281). Descartes, Hobbes, and Locke substitute for the term "Accident," which had been universally used in the Middle Ages, the term "modus" (= temporary condition), and this change was adopted by Spinoza ("Ethics," part i., definition 5). The logical relation is that of subject and predicate, the metaphysical relation that of substance and Accident (עצם ומקרה in Arabic-Jewish philosophic phraseology). The relation of Accident, as a chance quality, to attribute, as a permanent characteristic of the substance (הצורה הטבעית) has been clearly explained by Maimonides, "Moreh Nebukim," ii. 19. Maimonides distinguishes between separable and inseparable accidents, מקרה נפרד and מקרה קים.

Bibliography: Maimonides, *Moreh*, i. 73, ii. 19; idem, *Yesode ha-Torah*, iv. 8; idem, *Millot ha-Higgayon*, § 9; Schmiedel, in *Monatsschrift*, xiii. 186.

L. S.

——**In Law:** In daily life, Accident means unforeseen harm that comes to persons or things, presumably through lack of care. When the contributor to an Accident is another than the person injured, or is the owner of the things destroyed or depreciated, there is room for litigation, which, in every system of jurisprudence, is governed by special laws.

The Torah treats of the law of negligence in Ex. xxi. 28–36 and xxii. 4, 5, the leading cases being those of an ox goring a man or beast; an open, unprotected pit; fire spreading to a neighbor's property; also, to a certain extent, trespassing cattle. For the rules of Ex. xxii. 6–14, concerning the liability of a person lawfully possessed of another's goods for loss or destruction, see Bailments. In the language of the Mishnah the chief instances given in the Torah for a more broadly applicable law, such as those relating to the Goring Ox or those relating to any animal that inflicts unusual harm, or to the open pit or any similar inanimate thing, are called אבות ("fathers"); other instances derived from these are known as תולדות ("descendants"). The latter may be called "derivatives."

The Four "Fathers," or Leading Cases.

The Mishnah and the Tosefta treat the law of compensation for results of negligence in Baba Ḳamma, i.–vi., commented on in the Babylonian Talmud, 2–62*b*, and in the Jerusalem Talmud, 2–5*c*. Maimonides, in his "Yad ha-Ḥazaḳah," treats the subject under the heading "Nizḳe Mamon" (Damage to Property).

The "goring ox" with its derivatives is put aside, because full compensation for its acts can be demanded only when the master has been forewarned, and the treatise opens with the following four "fathers" for full compensation, under the technical names of "ox," "pit," "chewer," and "kindling." Here the "ox" means an animal allowed to trespass on a stranger's land and do injury with its foot; the "chewer," a like animal that does harm with its teeth. Both examples are derived from Ex. xxii. 4. The damage done may far surpass the gain to the owner of the animal. The "pit" refers to Ex. xxi. 33, the "kindling" to Ex. xxii. 5. It may be remarked that Abba Arika, the eminent Babylonian authority, understands the "ox" among the "fathers" to embrace both the foot and tooth, and regards the word here rendered "chewer" as standing for man; for when a man himself commits an injury he is always mulcted in full damages (B. Ḳ. 3*b*).

Derivative Cases.

Any tame animal permitted wilfully or carelessly to go on a neighbor's land, and which does mischief by knocking things over with its body, or by dragging them along by means of its hair, tail, harness, bridle, or yoke, or by the burden which it carries, or by rubbing against a post or wall, is a derivative of the "ox," while an animal breaking down a post or wall by rubbing against it, or defiling grain or grass with its excrements, is a derivative of the "chewer." But striking with the body, or malignantly biting, or crouching on something, or kicking, is treated on the same principle as "goring." Chickens, dogs, cats, and even hogs are named among the animals for which the owner is made liable. Derivatives of the "pit" are a stone, knife, burden, or a mound; in short, anything over which one can stumble or from which one can receive injury if left in רשות הרבים (public domain); that is, on the highway or on common lands. Derivatives of the "kindling" are articles which the owner has left on his roof, whence the wind carries them off to the injury of person or property. For whatever damage arises indirectly, the ultimate author is liable to the extent of only half compensation. Thus, when the foot, in striking the ground, kicks up pebbles, and these cause an injury, or when the animal upsets any implements, which in turn fall upon other implements and break them, the damage is considered remote, and only half compensation is given. These remote damages, when caused by animals, are known generally as the "case of pebbles."

Placing the Liability.

Herein the Jewish law differs very widely from the English common law, as laid down in the leading case of Scott *versus* Shepherd (the "Squib case"), well known to lawyers. The four "fathers" and their derivatives have this in common: The entire estate of the owner of the guilty beast or thing is liable for the full damage, to be paid from "the best"; for Scripture (Ex. xxii. 4) says, "Of the best of his own field and of the best of his own vineyard shall he make restitution." For the explanation of "the best" see Appraisement. The ground of liability is based upon the natural tendency of animals to do harm, and the owner is bound to watch them. The general principle is thus stated: "I am considered to have caused the injury done by anything I am bound to watch; and if I have actually caused the injury in part, I am bound to make good the whole injury" (B. Ḳ. l. 2). This latter point is thus illustrated: "If a pit be nine palms in depth and I dig it down a tenth palm, so as to make it deep enough to kill a beast that falls into it, I am as liable as if I had dug the whole pit" (B. Ḳ. 10*a*). While in the case of the "ox" and the "chewer" the owner is bound only for damage done on the land of the injured party, the "pit" is supposed to be on the public domain; the fire may start from that, or on the guilty party's own ground, presumably from the latter, and he is liable. The "ox" and the "chewer" make their owner liable for harm done to man or beast, to buildings or goods; the "pit," according to the words of Scripture, should "an ox or ass fall therein" (Ex. xxi. 33), only for the killing or maiming of animals—as ox or ass is supposed to exclude human beings and goods (כלים, literally "implements"); though R. Judah, one of the older sages, who is mentioned as dissenting on this point of law, held that satisfaction must be made for goods. The law, however, remains such that there is no liability for loss or destruction of goods, other than the falling animal, by the "pit" or by any of its derivatives, even when man and goods or beast and goods fall in together.

Contingent Results.

But while no redress is given for persons that fall into a pit and die, there is redress for injuries not fatal (B. Ḳ. 28*b*). For the death of a beast, only the owner of the pit is liable, when it happens at night or when the beast, by reason of youth, blindness, or deafness, is not able to take care of itself; but it is otherwise when the beast is injured, but not killed. The digger of a pit on his own ground may become liable if he open the property to public use and an injury ensue from the pit. On the other hand, where there are public places in which it is customary to deposit certain articles—for instance, jars of wine around a wine-press—the owner of these utensils is not liable if man or beast stumble over them. Again, whoever throws water from his house, or cellar, or yard, into the highway, is liable for any damage to man or beast, from sliding and falling, but not for damage to goods; for such water on the highway is legally considered in the nature of a "pit." As to derivatives of the "pit," the Mishnah teaches: If a jar be left upon the highway, and a traveler stumble over it and break it, the traveler is not liable for the loss, but, on the contrary, the owner of the jar is liable if the traveler is hurt by the water or the potsherds (Mishnah B. Ḳ. iii. 1). A distinction is attempted by some who say that when the article thus left on the highway or public domain has been abandoned by its owner he is no longer responsible for the injuries caused by it: but this is disallowed by most authorities (Maimonides, "Nizḳe Mamon," xiii. 2).

If any one start a fire on the field of another, he is of course liable for the result; if he start it on his own ground, and there is either a stone fence of sufficient height to check the flames, or a stream, or a public road (sixteen cubits in width), between the place and a neighbor's ground, the crossing over of the flames or the sparks is regarded as the result of unusual forces, against which human foresight can not avail. But in case of a fire that passes from point to point, whoever starts it is liable for whatever damage it may do at any distance. The starter of a fire is responsible for injuries to anything except things hidden, as in the Scriptures (Ex. xxii. 5) mention is made only of "stacks of corn, or the standing corn, or the field." Goods hidden in a field or among the hayricks need not be paid for by one that starts a fire; but such a one is liable for the furniture in a house and, it would seem, for the goods in a shop; for things of value are expected to be deposited in a house, but not in a field (Maimonides, *l.c.*, xiv. 12).

Indirect Liability.

When a spark is emitted from a hammer and does damage the striker is liable. "When a camel laden with flax passes along the highway, and the flax, being pressed into the shop, catches fire from a lamp of the shopkeeper, and the house is burnt, the owner (*ba'al*) of the camel is liable" (B. Ḳ. vi. 6). Here is shown the kindling of a fire treated as damage arising from the ordinary walk of an animal; for it is not the driver, but the owner, of a camel on whom the blame is laid. Maimonides declares him liable because the camel was too heavily laden. But when the shopkeeper leaves his lamp on the outside, he is liable to the owner of the flax. The above-mentioned passage of the Mishnah is remarkable for the closing words (which are, however, not good law): "R. Judah says, when it is the Ḥanukkah lamp, he is not liable," for this happens to be the only mention made of the Ḥanukkah lamp in the whole compilation known as the Mishnah.

Other cases are discussed in the Mishnah, such as the aggravation of "pit" and "fire," when occurring on the ground of the injured party or on the common ground of injurer and injured.

From the Scriptural phrase "the ox of his neighbor" the principle is drawn that damages for negligence can not be exacted where the thing injured belongs to a heathen, or is consecrated property, or *res nullius*, such as the estate of a convert dying without issue. The term *mu'ad* ("witnessed against" or "forewarned") is derived from the case of the goring ox in Scripture (Ex. xxi. 29), extended by the Mishnah to those agents who, without any proof of former viciousness, are held responsible for any damage that they inflict. Thus, as already stated, a human being is mu'ad whether acting wilfully or unwittingly, whether awake or asleep; if he blind his neighbor's eye or break his implements, he must pay the full damage. But the word *nezeḳ* for damage must be here taken in the narrow sense of depreciation; for the one that unwittingly or unwillingly inflicts a personal injury is liable for the lasting injury only, not for the four other causes of damage—pain, loss of time, cost of cure, and disgrace—for which the wilful assailant must answer (Maimonides, *l.c.*, xliii. 1–5; "Ḥobel," i. 11 *et seq.*).

Such animals as a wolf, a lion, a bear, a panther, a leopard, and a serpent are held to be always vicious, and their owner is consequently "forewarned"; the exception sought to be made in favor of such animals, when tamed, is disallowed by the majority (B. Ḳ. i. 4).

Value of a Human Life.

With the exception of the ransom which the owner of the "forewarned" ox has to pay in certain cases for a man or woman killed by the beast—this being demanded by the very words of Scripture—no compensation is ever paid for causing the death of a human being; for the idea of atoning by money for the loss of human life was abhorrent to the Hebrew mind. This rule was applied even when a slave was killed by an Accident; wherein the Talmud differs from the Roman law, which says only *liber homo nullius est pretii* (a freeman can have no valuation put upon him). It is only since Lord Campbell's Act, in 1846 (9 and 10 Vic. c. 93), that the English common law has allowed compensation for the death of persons by negligence. The master of a slave is not liable for the torts done by him, even to the extent of giving him up in compensation for them; nor is the husband bound for the torts of his wife. But should the slave be manumitted, or the woman be divorced or become a widow, he or she may be sued for the damage done during slavery or coverture. Deaf-mutes, insane persons, and minors (boys not over thirteen) are not liable for their own torts, while other persons are liable to them or to their representatives (Mishnah B. Ḳ. viii. 4).

Legal Status of Agent.

The maxim of the Roman and the English law, *qui facit per alium facit per se* (he who acts through another acts of himself), has its equivalent in the phrase of the Talmud, "A man's agent [literally, "messenger"] is like himself"; and this should lead to the master's liability for the acts of his agents and servants (not slaves), which in modern law is the most important point in the law of negligence.

On the contrary, the Mishnah says, when one delivers his cattle to an independent herdsman, the liability devolves on the latter. But where the offending beast has been entrusted to a person unfit to care for it, such as a deaf-mute, an insane person, or a minor, the owner is liable for all mishaps, as if he had retained personal control (B. Ḳ. vi. 2). While full damages are held a personal debt of the owner, half damages are to be paid only "from the body" of the offending animal. The law in Exodus says: "They shall sell the live ox, and divide the money of it; and the dead ox also they shall divide" (Ex. xxi. 35). The old sages showed how this law, when literally enforced, might often work hardship, as when a worthless steer or he-goat should kill a valuable cow, worth more as a carcass than her living slayer; hence they deduced their own rule. The owner in such cases pays half the damage, but only as far as the animal causing the injury will satisfy it. This corresponds to *pauperies* of Roman law, by which, however, slaves as well as animals can be surrendered in satisfaction for any harm done by them; and it finds an analogue in modern maritime law, in which the liability of the ship-owner is in most cases narrowed down to what can be realized upon the ship. The rule that half damages are always paid "from the body" only, has one exception, known as that of "the pebbles" and referred to above.

Full damages are deemed to be of the nature of a debt, and may therefore be adjudged upon the wrongdoer's admission; half damages are regarded in the light of a penalty, and can only be adjudged on the testimony of witnesses, as in prosecutions for crime. But all appraisement of either full or half damages must be made by a court of experts; that is, on the judgment of ordained judges, not of private men chosen by the parties. Hence, when all semblance of ordination had come to an end the Jewish rabbis could no longer adjudge these damage cases except by way of arbitration, conciliation, and religious advice; consequently the later practical codes, like the "Shulḥan 'Aruk," are silent on the whole subject.

For the rules by which a tame animal becomes "forewarned," together with the liability of its owner for the death of human beings, see Goring Ox.

L. N. D.

ACCO, ISAAC. See Isaac ben Samuel of Acre.

ACCOMMODATION OF THE LAW: An adaptation of laws to circumstances; the mitigation of the rigor of a law in order to reconcile it with the exigencies of life under changing circumstances. Cases of accommodating the law to existing conditions are mentioned in the Bible as well as in the rabbinical literature. According to Ex. xii. 18, and xiii., the Passover was to be kept annually on the fourteenth day of the first month, at even; but according to Num. ix. 1–14, when the second Passover was celebrated in the wilderness, certain men were prevented from keeping it, owing to their being defiled by contact with the dead. On inquiring what they should do, a later Passover was instituted for the benefit of any one who had been prevented from keeping it at the ordinary time in the first month, and this was to be observed on the fourteenth day of the second month. In conformity with this Accommodation of the Law in peculiar circumstances, King Hezekiah, at the beginning of his reign, celebrated the great Passover in the second month, being unable to complete the sanctification of the Temple at the regular season of the feast (II Chron. xxx.).

Passover in Duplicate.

Debts; 'Agunot.

Another instance is that of Prosbul (derived from the words *πρὸς βουλήν*, "before the court I herewith deposit"), instituted by Hillel the Elder (see Abrogation of Laws). Finding, under the changed circumstances of his time, that the Mosaic law, which canceled all debts in the Sabbatical year, had proved disadvantageous rather than beneficial to the poor (since no one would lend them money lest the claim might be repudiated at the approach of the Sabbatical year), Hillel modified the law so that the Sabbath year should not annul the indebtedness, provided the creditor transferred it to the court by a document termed Prosbul. Another example of Accommodation of the Law concerns the evidence of an absent husband's death, intended to permit the wife to remarry, and thus avoid the stigma of being an 'Agunah or deserted wife. In all civil and criminal cases, and in all matrimonial affairs, it was an established rule of the law that everything must be proved by two witnesses (Deut. xix. 15), but in this instance the testimony of a single witness was considered sufficient; even the testimony of near relatives, and of persons otherwise regarded as incompetent witnesses by the rabbinical law, might be admitted to establish the death of the absent husband. The Accommodation of the Law in this case is justified by the rabbis for the reason that "some allowance is to be made in favor of the deserted woman, who, otherwise, would have to remain forever in unhappy widowhood" (Yeb. 88*a*, Giṭ. 3*a*).

Locomotion on the Sabbath.

The following example will illustrate the mitigation of the rigor of a traditional law in order to adjust it to practical life. From the injunction to the manna-gatherers, "Abide ye every man in his place, let no man go out of his place on the seventh day" (Ex. xvi. 29), rabbinic tradition derived for all future generations the two following prohibitions: (1) No Israelite shall on the Sabbath day go farther than 2,000 cubits from the place of his abode, the so-called Sabbath journey. (2) No Israelite shall carry any object from private to public premises, or vice versa, on the Sabbath. These two restrictive laws led, of course, to great inconvenience in practical life, for, through their operation, almost all freedom of locomotion on the Sabbath was prohibited. In order to lessen the inconvenience caused by these two injunctions, the rabbis introduced certain legal formalities termed *'erube teḥumin*, *'erube ḥaẓerot*, and *'erube meboöt* (connection of boundaries, premises, and approaches), by which a Sabbath journey could be extended to 4,000 cubits, and certain public premises be considered as having been changed into private common premises, from which it was permitted to carry objects to adjoining private houses and vice versa (Mishnah 'Er. i.–iv.).

Again, in fixing the Jewish Calendar care was taken to arrange it in such a manner that the tenth of the month of Tishri should never fall either on a Friday or on a Sunday, because it would, in some respects, be very inconvenient to celebrate the Day of Atonement either immediately before or immediately after the weekly Sabbath (R. H. 20*a*). To prevent such an inconvenient occurrence, it was determined that in some years either a day should be added to the regular number of days of the preceding month of Heshwan, or a day taken from the regular number in the month of Kislew.

Sabbath for Man, not Man for Sabbath.

Although the ancient rabbis were in general very strict where ritual and ceremonial laws were concerned, they did not hesitate to accommodate these laws to times and circumstances. The following are some of the principles they established: Referring to the passage in Lev. xviii. 5, "Ye shall therefore keep my statutes, and my judgments; which if a man do, he shall live in them," they say, "man shall *live* in the laws of God, but not *die* by means of them" (Sanh. 74*a*; Yoma, 85*b*). "Where human life is in danger, any laws may be set aside, except those concerning idolatry, incest, and murder" (Yoma, 82*a*). In cases of illness and in any, even the remotest, danger, a deviation from the strict observance of the precepts relating to the Sabbath is permitted (Mishnah Yoma, viii. 6). "The Sabbath is delivered into your hand, not you into the hand of the Sabbath" (Mek. to Ki Tissa, p. 110, ed. Weiss; Yoma, 85*b*). "You may desecrate one Sabbath in order to be able to keep many Sabbaths" (Mek., *l.c.*; Shab. 151*b*).

Likewise, concerning the fast of the Day of Atonement, though it was regarded as of the utmost importance and consequently observed with extreme strictness, the rabbinical law easily accommodated itself to circumstances. If, for instance, on that day an Israelite be attacked by the disease of בולמוס (craving hunger), he is allowed to eat even that food which is otherwise strictly forbidden (Mishnah Yoma, viii. 6). In case of illness, too, the patient may break the fast of that day, either when he himself or his physician finds it necessary (Yoma, 83*a*).

The principle of accommodation is applied also in modern Judaism by the advocates of moderate reform. Under the protection of rabbinical authority they seek by various modifications to accommodate the ritual and liturgical laws to present conditions and circumstances. This endeavor is, however, disapproved by the advocates of strict orthodoxy, who rigorously and tenaciously adhere to every inherited religious form and custom, even though it be incompatible with modern thought and modern needs and conditions. Neither does the principle of accommodation satisfy those who advocate a radical reform of religious laws and institutions. The advocates of moderate reform hold that the principle of accommodation helps to reconcile the present with the past, to harmonize ancestral laws and institutions with the changed conditions of our time; that it prevents a breach of the unity in Israel; and that slowly, but surely, it introduces many essential improvements into Jewish religious life and institutions, thus exercising a wholesome influence upon the development of Judaism.

M. M.

ACCUSATORY AND INQUISITORIAL PROCEDURE: Two methods by which persons suspected of crime may be tried. In the Inquisitorial method the judges or other officials seek to draw from the suspected person an acknowledgment of guilt by examining him regarding all the circumstances of the crime and about his own past life. They compel him in many cases to give such answers as they wish to hear. Formerly they resorted to the rack or thumbscrew; in some countries even to-day infliction of blows or close confinement is not uncommon. In the Accusatory method, a representative of the commonwealth, perhaps of the injured party, frames a written accusation, in which it is set forth that the accused, at a specified time and place, committed a certain offense. This accusation being denied by the accused, or standing controverted by operation of the law, the prosecutor brings his witnesses and other proofs as a plaintiff would do in a civil suit for the recovery of property; and if the guilt of the accused is not established by the witnesses and proofs (evidence being also adduced in defense) to the satisfaction of the judges or jurors, an acquittal follows and the accused goes free.

Among those nations that pay little or no regard to the freedom or rights of the individual, the Inquisitorial method is in vogue even at the present day, at least during the preliminary stages of a prosecution; and the admissions of guilt that have been wheedled or extorted from the accused are brought out against him on the final trial, which, in concession to the spirit of the times, is cast into the Accusatory form. Neither Great Britain, with her colonies, nor the United States of America, recognize the Inquisitorial method at any stage; and under the laws that govern the trial of criminals in these countries all confessions or admissions that have been elicited by playing upon the hopes or fears of the criminal are ruled out.

Status of Witnesses.

The system that the Jewish sages worked out from the written law is altogether Accusatory, like the Anglo-American method. It goes even farther, for it makes no use whatever of admissions or of confessions of guilt, either in or out of court; the Scriptural command, "At the mouth of two witnesses or at the mouth of three witnesses shall the matter be established" (Deut. xix. 15), is understood as excluding the mouth of the accused; and the principle is laid down, "No one can make himself out guilty" (or "wicked"), and it appears often throughout the Talmud.

The witnesses can testify only to what they have seen; or, when the offense consists of spoken words, as to what they have heard. Testimony as to the admissions of the accused is inadmissible; for even if they were made in open court, the judges would not listen to them, nor be influenced by them in their decision.

The treatise Sanhedrin (chaps. iii.–vi.) deals with criminal procedure in cases in which the punishment is death or exile to the cities of refuge, and incidentally in those cases in which the infliction of forty stripes might be adjudged. The first chapter of the treatise Makkot deals with the proceedings against false witnesses (see Deut. xix. 16–21).

The form in which the accusation should be drawn is not touched upon either in the Mishnah or in the Gemara; it is not even clear that the accusation was reduced to writing: although probably it was, since writing entered into other parts of the procedure, and two or three secretaries were employed by the court to record the views of the judges, and heralds were sent forth at the execution to read the sentence. At any rate, as the constitution of the court varied according to the seriousness of the crime (it being in some cases constituted of three, in other cases of twenty-three, judges), a definite charge must have been made before the trial could begin.

We find nothing in the Talmud as to discrepancy or "variance" between the accusation and proof, by reason of which so many criminals escape under the English-American methods; but a discrepancy between the witnesses on a material point would lead to an acquittal, whenever two witnesses do not testify to the same criminal act.

Cross-examination of Witnesses.

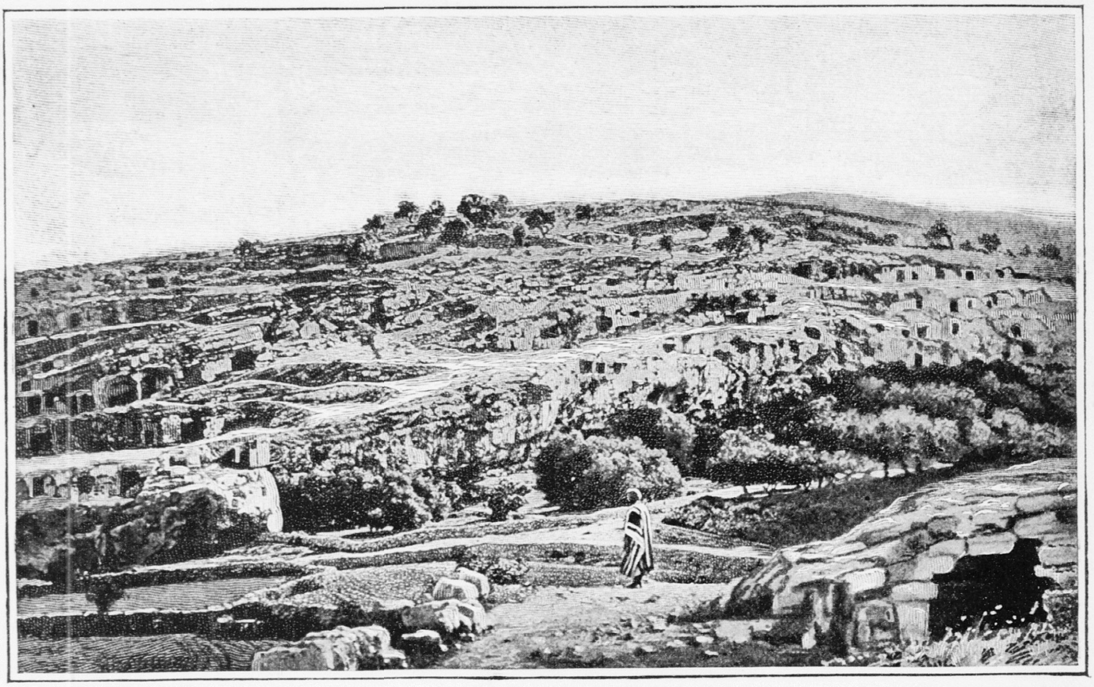
Cross-examination (*derishah wa-ḥaḳirah*) is the same in criminal as in civil cases; the judge who carries it the farthest is praised; of course, the witnesses are confronted with the accused in open court; "disciples of the wise," who might be considered as theologians, but are also lawyers, sit in three rows in front of the judges, and practically form the bar. Any one of these disciples is permitted to raise and argue a point on behalf of the accused, and the latter also may argue on his own behalf; arguments in favor of acquittal may be raised even after sentence, up to the very moment of execution. Only when all doubt is at an end the condemned criminal is exhorted to confess, in order that he may find forgiveness in another world; but his confession never can be used against him to assure his punishment on earth.

Confession of Crime.

Curiously enough, this custom of exhorting the condemned man to confess his guilt in his last moments is based on the example of Joshua (Josh. vii. 19), who besought Achan, when he had been pointed out by an ordeal as the guilty man who took for his own use part of the spoil of Jericho, that he should glorify the God of Israel by confessing his sin before his execution.

This short method of dealing with a man who has by his misdeed brought God's wrath down upon his people was deemed "a decision for the hour" (*horaat sha'ah*), not to be taken as a precedent in the affairs of life in later days. The sages whose institutions are discussed in the Mishnah never asked a culprit to confess, except at the last moment, and then only for the good of his soul (see Mishnah Sanh. iv. 1, 3, v. 2, 4, vi. 1, 2). L. N. D.

ACELDAMA (R. V., **Akeldama**, חקל דמא = "Field of Blood"): An ancient ossuary on the southern extremity of Jerusalem, near the ravine of Hinnom. The field once contained rich clay deposits which were worked by potters. A red clay is still dug in its neighborhood. The "potter's house" mentioned in Jer. xviii. 1–6 is thought to have stood there; not far from it was the gate Ḥarsit and "the valley of the son of Hinnom" (see Jer. xix. 2). Later it was used as a cemetery for non-Jews. Christian tradition connects it with the death of Judas Iscariot, who is supposed to have bought it, or agreed to buy it, with the money he received for betraying Jesus (Matt. xxvii. 6–8; Acts, i. 19). The Aceldama (Hakled-damm) of to-day presents a large, square sepulcher, of which the southern half is excavated in the rock, the remainder being built of massive masonry. In the center stands a huge pillar, constructed partly of rough blocks and partly of polished stones. The floor is covered with moldering bones, this repository having been in use as late as the first quarter of the nineteenth century. Much of its clay was taken away by Empress Helena and other prominent



Traditional Site of Aceldama in the Valley of Hinnom.

(From a photograph by Bonfils.)

Christians, for sarcophagi. There may be some connection in name between Aceldama and אפס דמים (I Sam. xvii. 1), which is translated in Yer. Sanh. ii. 20*b*, Ruth R. iv. (on ii. 3) ii. 9, Midr. Sam. xx. by חקל סומקתא.

M. B.

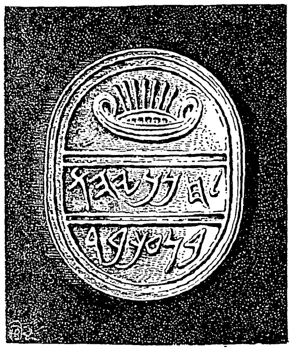
ACHAN (in I Chron. ii. 7, **Achar,** probably from Achor, the valley mentioned in Josh. vii. 26).—**Biblical Data:** The son of Carmi, son of Zabdi, son of Zerah, of the tribe of Judah, who committed sacrilege during the capture of the city of Jericho by the people of Israel in taking a portion of the spoil devoted to the Lord. Since the war was a holy war (see Ban and Ḥerem), he involved the whole nation in guilt, and caused its defeat in the battle of Ai, in which thirty-six men of Israel were killed. To assuage the wrath of the Lord kindled against the people, the twelve tribes were assembled according to their clans and households, and the sacred lot was cast in order to discover the guilty family that had come under the ban. Achan was singled out, and confessed that he had stolen silver and gold and a costly Babylonian mantle, and had hidden them in his tent. The stolen things were immediately sent for and laid before the Lord, and Achan and his family, his cattle, his asses, his sheep, and all his belongings were brought to the valley afterward called the "Valley of Achor" (עכור "Trouble"). Joshua said to him there: "Why hast thou troubled us? The Lord shall trouble thee this day." Achan and all that belonged to him were stoned to death and, with the whole of his possessions, burned, and "a great heap of stones" was raised over the ashes (Josh. vii. 24–26). This mode of expiation for sacrilegious theft appears somewhat harsh and inhumane, particularly so if we understand the words, "And all Israel stoned him with stones; and they burned them with fire and stoned them with stones" (Josh. vii. 25), to refer not only to Achan, his goods, and his beasts, but also to "his sons and daughters" mentioned in the preceding verse (see W. Robertson Smith, "Religion of the Semites," 2d ed., p. 162).

——**In Rabbinical Literature:** The Jewish exegetes, Rashi, Gersonides, and others, maintain that the stoning (Josh. vii. 25) was inflicted only on the beasts, and that the sons and daughters were brought there merely to witness and be warned. This seems to be the opinion also of the rabbis in the Talmud (see Rashi on Sanh. 44*a*), although they say that the wife and the children were accessories to the crime, in so far as they knew of it and kept silent. According to another and apparently much older rabbinical tradition, Achan's crime had many aggravating features. He had seen in Jericho an idol endowed with magic powers, with a tongue of gold, the costly mantle spread upon it, the silver presents before it. By taking this idol he caused the death, before the city of Ai, of thirty-six righteous men of Israel, members of the high court. When Joshua, through the twelve precious stones of the high priest's breastplate, learned who was the culprit, he resorted to the severest measures of punishment, inflicting death by stoning and by fire both on him and his children, in spite of Deut. xxiv. 16; for these had known of the crime and had not at once told the chiefs of the hidden idol. They thus brought death upon more than half the members of the high court (see Pirḳe R. El. xxxviii.; Tan., Wa-yesheb, ed. 1863, p. 43). Another view expressed by the rabbis is that Achan committed incest, or violated the Sabbath, or was otherwise guilty of a fivefold crime. This view is based upon the fivefold use of the word גם ("also," "even") in Josh. vii. 11 ("They have also transgressed my covenant," etc.), as well as upon his own confession: "Thus and thus have I done" (Josh. vii. 20). Achan is held up by the rabbis as a model of the penitent sinner; because his public confession and subsequent punishment saved him from eternal doom in Gehenna. "Every culprit before he is to meet his penalty of death," says the Mishnah Sanh. vi. 2, "is told to make a public confession, in order to be saved from Gehenna's doom." Thus Achan confessed to all his sins when he said: "Of a truth I have sinned against the Lord, the God of Israel, and thus and thus I have done." That his avowal saved him from eternal doom may be learned from Joshua's words to Achan: "Why hast thou troubled us? So may the Lord trouble you this day," which are taken to mean "in the life that now is, so that thou mayest be released in the life to come" (Sanh. 43*b*-44; see also Ḳimḥi on Josh. v. 25).

——**Critical View:** Bible critics are inclined to ascribe the story of Achan to two different writers, since the words in the first part of Josh. vii. 25, "All Israel stoned *him* with stones" (וירגמו), show a different style and tradition from those at the end of the verse: "they stoned *them* with stones" (ויסקלו אתם). See Dillmann's commentary *ad loc.*, and Bennet on Joshua in "S. B. O. T." p. 66. K.

ACHAWA: 1. German annual published at Leipsic (C. L. Fritzsche) under the title, "Achawa, Jahrbuch für 1865 = 5625," from 1865 to 1868 by the Society for the Help of Needy Jewish Teachers, their Widows and Orphans. The annual treated specially of pedagogical questions, with here and there literary *morceaux* and articles by M. Wiener on the history of the Jews in Germany. **2.** A monthly journal published at Amsterdam and founded about 1888 by a society of teachers bearing the same name. It is devoted exclusively to pedagogy. I. Br.

ACHBOR ("Mouse"): **1.** Father of Baal-hanan (comp. Hannibal), king of Edom (Gen. xxxvi. 38, 39, and in the corresponding list of I Chron. i. 49). It has been suggested that the name implies a species of totemism (W. R. Smith, "Kinship and Marriage in Early Arabia," p. 302), and the discovery of sacrificial mice by the Palestine Exploration Fund ("Quart. Statement," 1893, p. 296; see illustration in next column) gives the theory some interest. The name Baal-hanan ben Achbor finds an exact parallel in the inscription on the accompanying seal, Hananyahu bar Achbor.

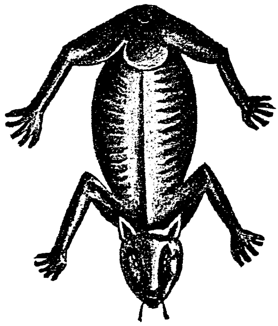


Hananyahu bar Achbor.
(From Benzinger.)

2. One of the men sent by King Josiah to consult the prophetess Huldah concerning the finding of the "book of the law" (II Kings, xxii. 12, 14); son of Michaiah. In II Chron. xxxiv. 20 his name is given as Abdon, but the existence of the name Achbor on an archaic Hebrew seal found at Jerusalem (see illustration above) proves this to be a misreading. Achbor is referred to again only as the father of Elnathan (Jer. xxvi. 22, xxxvi. 12). G. B. L.—J.

ACHERON, or ACHERUSIAN LAKE: The fiery river of Hades in Greek mythology, mentioned in Plato's "Phædo," 113A, which figures also in Jewish eschatology. In the Sibyllines, i. 301 (also in Enoch, xvii. 6), the souls of the dead traverse Acheron to enter the realms of bliss. In the Book of Adam and Eve (Apocalypsis Mosis, ed. Tischendorf, p. 37) one of the six-winged seraphim takes the body of the dead Adam, casts it into the Acherusian Lake, and washes it in the presence of God, who, after three hours, raises it and hands it over to Michael the archangel, to take it into the third heaven.

In the Christian Apocalypse of Paul (written after some Jewish model), Paul is shown a river with waters white as milk, and told that it is the Acherusian Lake (the Syrian version has changed it into the Sea of the Eucharist), within which there was the city of God. Into this lake those who repent of their sins are cast by Michael the archangel, after which they are brought by him into the city of God, where the righteous dwell (see Apoc. Paul, ed. Tischendorf, iii. 22). The Acherusian Lake is probably the same as the *nehar di-nur*, the river of fire (Enoch, xvii. 5), in which the souls must bathe, according to Jellinek's "B. H." iii. 31 and 139, v. 183, to receive their baptism of purification before entering paradise, but at times they bathe in streams of balsam ("B. H." ii. 29).



Sacrificial Mouse (see ACHBOR).

K.

ACHISH.—Biblical Data: King of Gath in the time of David and Solomon (I Sam. xxi.-xxix. 1; I Kings, ii.). David, when fleeing from Saul, twice sought asylum with Achish, the first time incognito. He was, however, recognized, whereupon he feigned madness, and escaped (I Sam. xxi. 10-15, xxii. 1). The second time he was also recognized, but was well treated as a supposed enemy of Saul (I Sam. xxvii.). Achish led the Philistine attack on Israel which resulted in the death of Saul and his sons. He was also at the battle of Gilboa (I Sam. xxviii.-xxxi.). Two servants of Shimei fled to Achish (I Kings, ii. 39-46). The superscription to Ps. xxxiv. reads "Abimelech," apparently by error for Achish.

D. G. L.

——**In Rabbinical Literature:** The Haggadah elaborates David's insanity as follows: Among Achish's body-guard were the brothers of Goliath, who immediately sought to slay their brother's conqueror. Achish forbade this, pointing out that the combat had been a fair one. The brothers retorted that then, according to the terms of the agreement (I Sam. xvii. 9), Achish must relinquish his throne to David. The only way out of this complication was for David to feign madness, but just at that time a daughter of Achish became really insane, and her mania was augmented by David's actions; therefore he was driven away (Midr. Teh. xxxiv.). L. G.

ACHMETHA: Name given in the Old Testament (Ezra, vi. 2) to the Persian city called by the Greeks Ecbatana or Agbatana. In Old Persian it is called Hagmatana; in Babylonian, Agamatanu; while in the works of Arabic historians it appears as Hamadan, the modern form of the name. When the Median kingdom arose, in the seventh century B.C., Ecbatana was the chief city. At a later period it was the summer residence of the Persian kings. According to Herodotus (i. 98), the city was surrounded by high and strong walls, the turrets of which had different colors. The inner wall surrounded the palace and treasury. The royal archive mentioned in Ezra, vi. 2, was probably found within the inner wall. A greatly exaggerated description of the walls occurs in Judith, i. 2, where Arphaxad (Gen. x. 22-24, xi. 13) is said to have been the builder of the city. It is also mentioned in the Talmud (Ḳid. 72*a*; Yeb. 17*a*; see Neubauer, "G. T." p. 376). F. Bu.

ACHOR: A valley near Jericho. From Josh. xv. 7 it would appear that it was situated upon the northern boundary of Judah. Its exact position has not, however, been ascertained. Eusebius ("Onomasticon," ed. Lagarde, p. 105) and Jerome ("Liber de Situ et Nominibus Locorum Hebraicorum," xxiii. 868) allude to it as a valley north of Jericho; whereas some modern writers identify it with Wadi el-Kelt, a deep ravine south of Jericho. According to Josh. vii. 24–26, Achan was stoned there; and, in view of the trouble that he brought upon his people and upon himself, the place assumed a typical character, symbolizing an accursed desolation that will only be redeemed in the times of the Messiah (Hosea, ii. 15; Isa. lxv. 10). M. B.

ACHSA or **ACHSAH** ("Anklet"): Daughter of Caleb (I Chron. ii. 49), who was promised by her father to the man who should capture Kirjath-sepher. Othniel, the son of Kenaz and nephew of Caleb, took it and married Achsah (Josh. xv. 16, 17). In Judges, i. 12, 13, the story is repeated, but here Achsah asks springs of water in addition to the "south land," and both the upper and the lower springs are granted her. G. B. L.

ACHSELRAD, BENEDICT (Bendet ben Joseph ha-Levi): A darshan, or preacher, of Lemberg in the first half of the seventeenth century. He was the author of several homiletical works, of which the following have been published: "Ben Da'at" (The Son of Knowledge), Hanau, 1616, containing one hundred and fifty homiletic discourses on the Psalms; "Derush 'al 'Aseret ha-Dibberot," an Interpretation of the Decalogue, Hanau, 1616, containing homilies on the Ten Commandments; and "'Abodat ha-Levi" (The Office of the Levite), Cracow, between 1632 and 1648, containing sermons and homiletic interpretations on Genesis. The last is merely a fragment of a work which treated the whole Pentateuch in the same manner: it has not been published. There must also have existed a homiletic commentary by him on Proverbs, which is mentioned several times by Achselrad himself, and the existence of which is also confirmed by Aaron Samuel, rabbi of Fulda, in his introduction to Achselrad's "Ben Da'at."

L. G.

ACHSHAPH: Town mentioned in Josh. xi. 1 and xii. 20 as the seat of a north Canaanitish king. Robinson ("Biblical Researches," iii. 55, London, 1856) identifies it with the ruins at Kesaf, or Iksaf, a village northwest of Hunin and south of a branch of the Nahr el-Kasimiye (Guérin, "Galilee," ii. 269). This would agree with Josh. xi. 1, but not with xix. 25, as in the latter passage this town must be looked for in the neighborhood of the coast. The identification of Achshaph with the Aksap of the Egyptian list of Thothmes is uncertain.

BIBLIOGRAPHY: W. Max Müller, *Asien und Europa*, p. 154.

F. Bu.

ACHZIB (called also **Chezib, Chozeba**): **1.** A town of Judah, in the southern Shephelah or lowland (Josh. xv. 44), coupled with Mareshah in Micah, i. 14, where it appears as paronomastic with deceit. In Gen. xxxviii. 5, it reads Chezib, and in I Chron. iv. 22, it appears as Chozeba, and is there connected with the Judean clan of Shelah. Comparisons with the names of modern places, such as 'Ain Kus(s)abe (Robinson, "Socin-Bädeker"), six miles southeast of Tell el-Hesy, or a doubtful 'Ain el-Kezbeh near Bet Nettif (G. A. Smith), have little probability.

2. Phenician city, claimed by the Asherites (Josh. xix. 29), but not conquered (Judges, i. 31). The Greeks called it Ecdippon (compare Josephus, "B. J." i. 13, § 4; *idem*, "Ant." v. 1, § 22, where the form Arce occurs). Akzibi is mentioned in a cuneiform inscription of Sennacherib. It is the small village, now Ez-Zib, nine miles north of Acre (Acco), on the seashore. On the importance of this place in the Talmud, as determining the southern limits of Palestine for certain ritual purposes, see Neubauer, "La Géographie du Talmud," under "Kezib," p. 233.

W. M. M.

ACME (Ἀκμή): Jewish slave of Livia, wife of the Emperor Augustus. During the family troubles which clouded the last nine years of Herod's life, she came under the influence of his son Antipater, while he lived at Rome. Induced by large presents and specious promises, she forged a compromising letter from Herod's sister Salome to her mistress, the empress Livia, which she forwarded to Herod through the agency of Antiphilus, a friend of Antipater in Egypt. Acme's guilt was discovered by an intercepted letter to Antipater, in which she speaks of having forged the letter at Antipater's request. Herod reported the matter to Augustus, and Acme was put to death in the year 5 B.C.

G.

ACOSTA, CRISTÓVAL: Spanish physician and botanist of the sixteenth century. He was born in Africa, whither his parents fled when exiled from Spain. He studied medicine, and for several years traveled through Africa and Asia, particularly through China. While on his travels he made the acquaintance of the most important physicians in Arabia, Persia, China, Turkey, and other lands. On his return he established himself at Burgos, Spain, and published a work entitled, "Tratado de las Drogas i Medicinas de las Indias Orientales con sus Plantas Debujadas al Vivo" (1578) (Treatise on the Drugs and Medicines of the Indies with their Plants Illustrated from Nature); which was translated into Italian (Venice, 1585), and into French by Antoine Collin. Death prevented him from completing a work he had projected on the flora and fauna of India. Acosta was baptized, but at what time is uncertain.

M. K.

ACOSTA, DUARTE NUÑES D': Merchant at Hamburg during the first half of the seventeenth century; descendant of a prominent Marano family from Portugal. When, about 1640, King John IV. of Portugal established his agency at Hamburg, he made Acosta the first incumbent of the office, with the title of "noble of the house," in spite of local prejudice against the Jews due to the propaganda against them led by JOHN MÜLLER. Throughout the existence of the agency, to the year 1795, other members of the Acosta family held the office.

W. M.

ACOSTA, GERÓNIMO NUÑEZ D' (called also **Moses Curiel**). See CURIEL, MOSES.

ACOSTA, JOAN D': Jester at the court of Peter the Great of Russia in the first half of the eighteenth century. Originally he was a broker at Hamburg, but met with such small success that he removed to Russia, and received an appointment as jester. His appearance was droll; he is described as having been very clever and witty, and master of almost all European languages. According to Doran ("History of Court Fools"), Peter met him among the patients at the "Water Cure" at Alonaitz in 1719. Kostomarov calls him Lyacosta. It is said that Czar Peter enjoyed discussing theological questions with him, and that these discussions often led to heated arguments. As a reward for his services the czar gave him the sandy and uninhabited island of Sammer, in the Gulf of Finland. He retained his position as court jester under Empress Anne.

H. R.

ACOSTA, LUIS D': Marano of Villa-Flor, Portugal; born in 1587. At the age of forty-five, he was condemned to the galleys because he had been secretly following the law of Moses.

BIBLIOGRAPHY: Kayserling, *Sephardim*, p. 203.

W. M.

ACOSTA, URIEL (originally, **Gabriel da Costa***): Noted writer and rationalist; born at Oporto, 1590; died at Amsterdam, April, 1647. Born and reared in a Marano family, all of whose members had become strict Catholics—his father held an ecclesiastical position—young Gabriel seems to have pondered secretly on the race and faith of his fathers, to which he felt himself powerfully attracted. When apprenticed to the legal profession he found time to study the Law and the Prophets, and he experienced the influence of their broad humanitarian views and of their noble conceptions of the Deity. Dissatisfaction with the formal routine of Catholicism was probably responsible for his spiritual uneasiness, as suggested by Grätz ("Gesch. d. Juden," x. 133). In 1615 force of circumstances compelled him to accept the semi-legal, semi-clerical office of treasurer of an endowed church in Oporto: his father being dead, the support of his mother and young sister and brothers devolved upon him. Cautiously revealing to these relatives his heart's longing for Judaism, he found them acquiescent; and in 1617 or 1618, after running great danger of detection and punishment, the family emigrated from Portugal to Amsterdam, where they could openly live as Jews. In Amsterdam they abjured Christianity; and Gabriel and his four brothers (Kayserling, "Gesch. d. Juden in Portugal," p. 287) entered the Abrahamic covenant, Gabriel discarding his name for Uriel.

Religious Scruples.

Full of enthusiasm for Judaism—an enthusiasm that had fed upon his dreams and fancies of the unknown faith and the bygone history of his people—it was almost in the nature of things that Acosta should be doomed to suffer severe disenchantment through the realities he encountered. The days of Moses and Isaiah no longer existed: in place of their broad principles and declarations he found in the Judaism of Amsterdam a rigid, cumbersome, and prosaic accumulation of ritual and observance, "line upon line, and precept upon precept." This was very different from the free and liberal religion which his inexperienced fancy had pictured to him in his native land. Feeling the inspiration of his high ideals, he was frank enough to express outspokenly his disgust with the formal Judaism of the day. Something of his Christian training may have shaped his phraseology when he openly spoke against "the Pharisees" of the Amsterdam synagogue; but he naturally knew nothing of the fierce heat of suffering which had fused the faith of Isaiah, and welded it into the rigid forms he found extant. On their side the Amsterdam Jews, who had known persecution and were grateful even for the tacit tolerance of the Netherlands, were not disposed calmly to see an impetuous and ill-informed young enthusiast openly assail the ancestral faith. By his criticisms against Judaism, Acosta thus condemned himself to a life of severe isolation almost from the hour of his arrival in Amsterdam. When it got abroad that he was preparing a book which should set forth his grave doubts as to the immortality of the soul and the reality of future reward or punishment, and should, moreover, point out the discrepancies between the Bible and rabbinical Judaism—soundly rating the latter for its accumulation of mechanical ceremonies and physical observances in lieu of spiritual maxims and philosophic conceptions—he was answered even before he had spoken, as it were, by the publication of a work in Portuguese, written by a certain physician, Samuel da Silva, in 1623, "Tratado da Immortalidade da Alma, Composto pelo Doutor! . . . em que Tambem se Mostra a Ignorancia de Certo Contrariador," etc. But this only served to expedite Acosta's work, which appeared in 1624, also in Portuguese, under the title "Examen dos Tradiçoens Phariseas Conferidas con a Ley Escrita por Uriel, Jurista Hebreo, com Reposta a hum Semuel da Silva, seu Falso Calumniador." Acosta's lack of clearness, either of expression or of thought, or of both, is shown by the fact that in this work he reiterates that the soul of man is not immortal—the very heresy of which Da Silva had accused him.

Uriel da Costa

Disappointment at Amsterdam.

The matter had now become so public that the officials of the Amsterdam Jewish community could not but take notice of it. Accordingly, Acosta was indicted before the magistracy for the utterance of views subversive of the foundations not only of Jewish, but of Christian, faith; and judgment was asked against him as a public enemy to religion. He was arrested, thrown into prison, and fined 300 gulden ($120); and his book was condemned to be publicly burned. Acosta seems to have fled to Hamburg after this (see Perles, in "Monatsschrift," 1877, p. 206), but he eventually returned; for doubtless he felt himself completely ostracized there too by Jew and Christian alike. Moreover, he was ignorant of the German language. He returned to Amsterdam in bitter resentment. He found he could not live in seclusion; he yearned for companionship; he desired to marry again—he seems to have lost his wife in the interim (see Perles, *l.c.*, p. 209)—and as the guardian of his younger brothers he feared their financial interests would suffer through his disgrace. Accordingly, he resolved to swallow the bitter draft. He volunteered, as he says, "to become an ape among the apes," and in 1633 he offered his formal submission to the officers of the synagogue; he would be a dissenter and a sinner no more.

---

*The Latin and more familiar form of the surname is "Acosta," used by Gutzkow in his well known drama devoted to the subject of this article; Uriel himself signed "da Costa."

Abjures His Errors.

Though outwardly obedient, Acosta's enthusiastic religious bent had evolved a new tendency away from Judaism. "I doubted whether Moses' law was in reality God's law, and decided that it was of human origin, as many others in the world have been." One step led to another. A species of natural religion, free from form or formula, bereft of all ceremony and ritual, seemed to him to be the true religion for man. He became a Deist. God is in nature the ruler of the external world: He has no concern with doctrines or modes of worship, all of which are equally vain in His sight. Nature teaches peace and harmony: religion uses the sword or the stake, or else the ban of excommunication. All the religion he would approve is contained in the seven Noahidic commandments ("Exemplar Humanæ Vitæ," ed. Limborch, p. 666).

Second Excommunication and Suicide.

Unfortunately for himself, Acosta could not be a perfect hypocrite: in his mode of life he continually transgressed Mosaic and rabbinical regulations, such as those touching the Sabbaths and festivals, the dietary laws, etc.; and people soon knew of it. His own relatives severely condemned him for this unfaithfulness, but to no purpose. Finally it was learned that he had dissuaded two Christians—a Spaniard and an Italian—from carrying out their avowed intention of embracing the religion of Israel; and this treachery, as it seemed, once more brought the lightnings of authoritative Judaism about his head. Summoned again before the officials of the congregation, he was required to renounce the errors of his way under penalty of the "greater ban." He would not submit; and again he was excommunicated. This further stroke of bigotry, as he considered it, was borne by him in sullen silence for seven years, during which time he suffered the indignity of being avoided by all, even by his nearest relatives. At the end of that period he succumbed and once more gave in his submission to authority, and was made to testify to it by the most degrading penances. Before the assembled hundreds in the synagogue—men and women—he recited a public confession of his sin and a recantation; this was followed by a public scourging then and there, to the extent of the Biblical "forty stripes save one"; and as the crowning act he was laid prostrate upon the threshold of the holy place, to be stepped over or trampled on by the gathered crowds. A proud and indomitable spirit like Acosta's might submit outwardly to such terrible formalities; but it could not brook them tamely. He went home, and shortly after ended his stormy career by shooting himself, having used the interval to write a few pages of what he called "Exemplar Humanæ Vitæ" (A Specimen of Human Life), a sketch of his own career. It is almost the only source of information respecting the life of this eccentric and unfortunate thinker, and was published with a refutation by Philip Limborch, a Dutch theologian, as an appendix to his own work, entitled "Amica Collatio cum Erudito Judæo," Gouda, 1687; republished 1847.

His "Exemplar."

The "Exemplar Humanæ Vitæ," even making allowance for the intense mental stress under which it was written, and for the natural temptation to leave behind as crushing an indictment of his opponents as he could frame, shows Acosta to have been an ill-balanced thinker, impulsive to a degree, impatient, and presumptuous in the face of grave disabilities. Had careful religious training in Judaism been joined to more wisely directed energies, the uncommon intellectual endowments he undoubtedly possessed might have made of him a powerful champion of the ancestral faith, a "Pharisee of the Pharisees." He had all the superabundant zeal necessary for the equipment of such a defender of the faith.

An interesting reference to Acosta was discovered (see Perles, in "Monatsschrift," 1877, xxvi. 193) in a letter printed in a volume of responsa by a certain learned Venetian merchant, Jacob b. Israel ha-Levi (2d ed., Venice, 1632, art. 49). In this letter, advice is asked of Ha-Levi as to the propriety of interring in the congregational cemetery the mother of an unnamed renegade, who had herself shared in her son's apostasy. The description given of the unnamed apostate's acts and writings, as well as the date of the letter and the known literary correspondence of the Amsterdam ecclesiastical authorities with Ha-Levi, leaves no room for doubt that Acosta was the excommunicate in question.

The tragic life of Acosta has furnished material for the dramatist and the novelist. The most important dramatic production is Gutzkow's tragedy, entitled "Uriel Acosta" (Leipsic, 1847), translated into Hebrew by Solomon Rubin, Vienna, 1856. The novelist Zangwill has also used the material for a sketch in his "Dreamers of the Ghetto" (pp. 68–114, Philadelphia, 1898).

F. de S. M.

ACQUI: A city on the Bormida, in the province of Alessandria, Italy, famous for its hot springs and its ancient Roman ruins. According to its archives, Jews have lived there since 1400. In the first decades of the nineteenth century the Jews at Acqui aggregated about 700; in 1899 they numbered but 220 individuals, many having emigrated to the more important cities of Turin and Milan. The congregation of Acqui possesses many charitable institutions. In 1881 the old synagogue, together with the ghetto, was demolished; and a new one has been constructed in the Via Jona Ottolenghi, owing to the munificence of the man after whom the street is named. See Ottolenghi, Vita.

In 1899 the rabbi of the congregation was Adolfo Ancona, a pupil of Prof. Eude Lolli.

F. S.

ACQUISITION (LAW), TALMUDICAL. See Alienation and Acquisition.

Composition of Jewish Court.

ACQUITTAL IN TALMUDIC LAW: The Jewish court for hearing capital offenses was composed of twenty-three judges, and according to the opinion of many sages, even offenses of a lower degree, such as were punishable by stripes only, must be tried by a like number of judges. Still it must not be thought that the Jewish court corresponded in any way to an English or American jury. Modern jurors are supposed to render a verdict upon the facts adduced by the evidence, while the presiding judge instructs them on the law in the case. But the twenty-three judges of the Jewish Criminal Court were all supposed to be versed in the law. According to the pharisaic idea, it was requisite that they be "disciples of the wise," that is, learned in the traditions. It was not so much their business to weigh conflicting evidence as to decide upon the competency and the sufficiency of the testimony given by the witnesses according to certain hard and fast rules. But it was deemed the highest duty of the judges to see that no innocent man be condemned; in fact, that no one should be convicted who was not guilty both morally and legally, and whose guilt was not established in a strictly legal way; and for this purpose they were to carry on a most searching cross-examination of the prosecuting witnesses.

Agreement of Witnesses.

The Talmud speaks in the main of Acquittal from lack of sufficient evidence. As there must be two eyewitnesses to a criminal act in order to convict, or two ear-witnesses in the few cases in which the offense consists of spoken words (for example, incitement to idol worship), if one of the two, having been examined separately, breaks down, or if the two contradict each other in any material point, an Acquittal must follow. Here a difference comes in between the failure to answer under the general cross-questioning on the time and place of a criminal act, which is known as *ḥakirah* (searching), and the free and rambling cross-examination known as *bediḳah*. As to the former, the answer "I don't know" by either of the witnesses destroys the testimony of both; for such an answer makes it impossible eventually to fulfil the Scriptural law as to "plotting witnesses" (see ALIBI) by proving that the witnesses were, at the exact time named by them, at other places. But either witness or both witnesses may fail to answer some of the questions put to them relative to surrounding circumstances, without destroying the effect of their testimony. Of course, if two witnesses answer concerning the circumstances of an offense in such a way that one plainly contradicts the other, the testimony of both falls to the ground; whereof the best known example is given in the story of Susannah, told in the Apocryphal additions to the Book of Daniel. But within certain limits contradictions, even as to time and place, are not fatal. Thus, considering the uncertainty of the lunar calendar, one witness might place the crime on the second day of the month, the other on the third; because one might know whether the preceding month had twenty-nine days or thirty days, while the other witness did not. However, if upon cross-examination it should appear that both knew the right time of the new moon, and that they meant different days, their testimony is really contradictory, and fails in effect. If they differ by two days—say the third and the fifth—the discrepancy can not be reconciled, and there must be an Acquittal. As to the hour when the deed was done, a difference of one hour is immaterial; when the witnesses differ by two hours, both, however, naming an hour in the forenoon, or both an hour in the afternoon, the oldest authorities (R. Meir and R. Judah) are divided in opinion, and most of the modern codifiers hold with the latter sage, that a difference of even two hours might be charged to an innocent mistake on the part of one or both. But if one says at the fifth hour, and the other says at the seventh hour (from dawn), the variance is fatal; for forenoon and afternoon are easily distinguished by the position of the sun in the east or in the west (Sanh. v. 3). "If the judges find a point in favor of the accused, they acquit him immediately" (Sanh. v. 5); while, if there is an inclination to convict, there must be an adjournment to the next day. In the discussions before the final session, those who have once declared for Acquittal must not argue on the side of conviction, but they may vote for it, if brought over to it by the arguments of the other side. Such at least is the understanding expressed by Maimonides and by Obadiah de Bertinoro in their commentaries on the Mishnah.

Majority Necessary for a Decision.

Unanimity of the judges was not required either to convict or to acquit. But the majority of one for Acquittal was deemed sufficient by all, while if the majority among the judges for conviction was no greater than one, new judges had to be added to the court until a result was reached; either a conviction by a greater majority than one or an Acquittal. In the highly improbable event of the court having come to no decision after being increased to its utmost limit, that is seventy-one, or for the rare cases triable before the great Sanhedrin (also of seventy-one judges), it was provided that upon a division of thirty-six for conviction and thirty-five for Acquittal, the judges should discuss the matter in secret session until one was brought over to the side of the defense (Sanh. v. 5). There is no doubt, however, that until judgment was rendered, any one of the judges was free to change his mind either way. If less than twenty-three judges gave an opinion one way or the other, that is, if one or more of the bench of judges said that they did not know which way to decide, it was the same as if the full number of twenty-three had not been empaneled, and there could not be an Acquittal any more than a conviction. New judges had to be added to the bench, two by two, till there were twenty-three ready to give their opinion one way or the other.

An Acquittal Was Final.

An Acquittal once pronounced was irrevocable; the judgment could never be reopened, nor the trial resumed, though the clearest evidences of guilt might thereafter come to light, or though the court had erred most grievously in applying the law. The principle that "no one must be twice put in jeopardy of life and limb," so highly valued in English law, and which is imbedded, as a part of the Bill of Rights, in every American Constitution, was derived from the words of the Scripture (Ex. xxiii. 7): "And the innocent and righteous slay thou not: for I will not justify the wicked." The principle is expressed in the Mishnah (Sanh. iv. 1) thus: מחזירין לזכות, "in cases involving property, they 'turn back' (that is, go to a new trial) as much to acquit the accused as to condemn him; in capital cases (or criminal cases in general), however, they 'turn back,' only to acquit, but not to condemn."

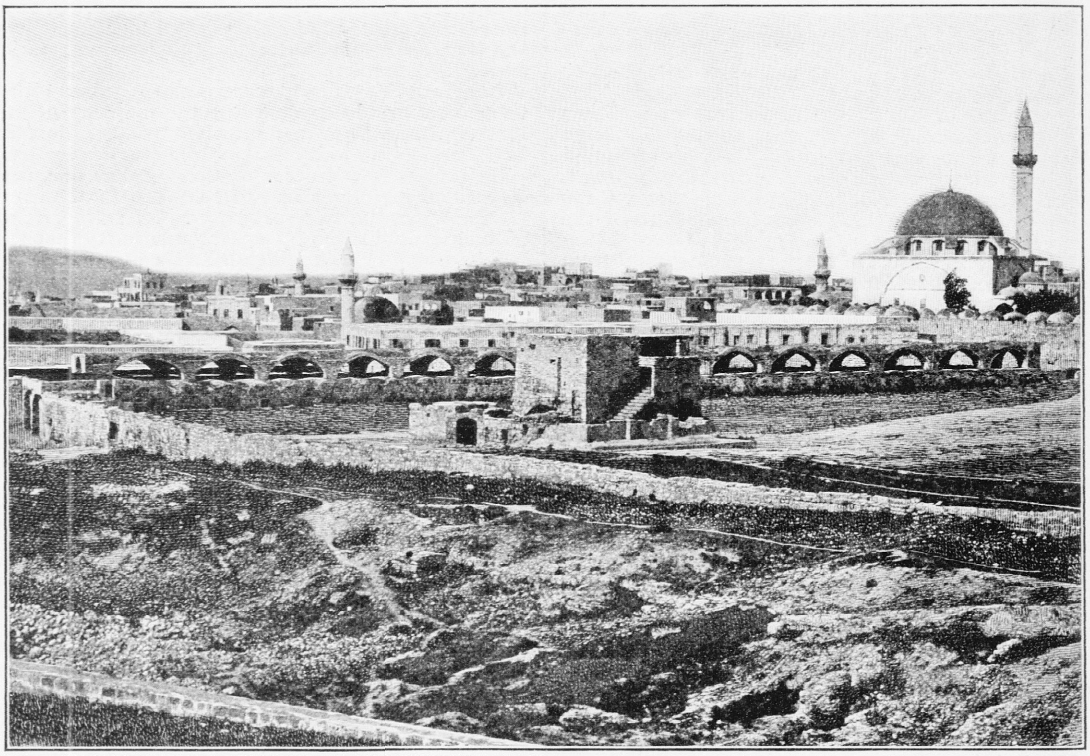
A new point calculated to bring about Acquittal may be adduced even while the convicted man is on the way to execution.

Taking into account that all circumstantial evidence of guilt and also the testimony of women, of slaves, and of Gentiles were excluded; considering

Rarity of Condemnation.

also the many chances, as shown above, of the breaking down of a witness, or contradiction between the necessary two witnesses, and, lastly, the requirement of a warning (*hatraah*), without which no capital sentence (except for incitement to idol worship) could be pronounced (Mak. i. 8, 9)—a requirement which must, however, have crept into the law at a very late day—it is not to be wondered at that death-sentences were rare.

A Sanhedrin which puts one person to death in seven years is called bloody—Rabbi Eleazer ben Azariah says, if it puts one person to death in seventy years; R. Tarfon and R. Akiba both claim if they had been on the Sanhedrin nobody would ever have been put to death; whereupon Rabban Simon, son of Gamaliel, retorts: "The men who talk in this way multiply the shedders of blood in Israel" (Mishnah Mak. i. 10).



The Modern City of Acre.

(From a photograph by Bonfils.)

It may be stated that the rules herein given favoring acquittals did not apply to prosecutions for theft. As the only punishment for this crime was compensation in double (in some cases four times or five times) the value of the thing stolen, the prosecution was deemed to be in the nature of a civil suit for the recovery of money or property (though non-payment might bring about the temporary enslavement of the accused). See Accusatory and Inquisitorial Procedure, Criminal Laws, Criminal Procedure.

L. N. D.

ACRA: Fortress built by Antiochus Epiphanes in the year 173 B.C. at Jerusalem, on an outlying spur of the Temple mount toward the south, where he placed a garrison, stored provisions, and kept armor. The Greek (I Macc. i. 33) reads "Acra," which has been translated as if it were not a proper name.

G. B. L.

ACRE (called also, at different times, **Acca, Akka, Accho, Acco, St. Jean d'Acre,** and **Ptolemais**): City and seaport of Phenicia, situated on a promontory at the foot of Mount Carmel (compare Josephus, "Ant." ii. 10, § 2), having (1901) a population of about 9,800, among whom there are a few Jews. Acre is mentioned in hieroglyphic inscriptions about 1500 B.C. under the form of *A-ka* and in the El-Amarna Tablets (Winckler's ed., Nos. 11, 65, 157, *et seq.*) as *Ak-ka*, the seat of a rapacious prince. On Phenician coins its name is עך. The tribe of Asher claimed it (Josh. xix. 30, where the name is distorted into *Ummah*, but is still correctly read 'Ακκώ in the better manuscripts of the Septuagint; see Dillmann, "Commentary," and Hollenberg, in Stade's "Zeitschrift," i. 100), but the tribe was unable to conquer it (Judges, i. 31, where the name is written *Accho*). Sennacherib conquered *Akkû* in 701 B.C., and gave it as a fief to Tubaalu (Ethobalos) of Sidon. Josephus ("Ant." ix. 14, § 2) refers this (after Menander) to the time of Shalmaneser (IV.). Asurbanipal, returning from his expedition against the Arabs (about 645 B.C.), suppressed a revolt of Akkû and Ushû (Schrader, "C. I. O. T." 161; Delitzsch, "Paradies," p. 284; Winckler, "Geschichte," pp. 252, 288). In Greek times the old name *Akē* (Strabo, 758) was little used;

which of the Ptolemean kings of Egypt gave the new name *Ptolemais* to the city is doubtful (usually Ptolemy I., Soter, is assumed).

The great importance of the city as a port on the harborless coast of Palestine was manifest, especially in the wars of the Maccabees, when it was repeatedly the basis of operations against Palestine (I Macc. v. 15–22, xi. 22, xiii. 12). Demetrius could offer no greater inducement in order to win the Jews than to promise Ptolemais as a gift to the Temple of Jerusalem (compare I Macc. x. 39). The population showed a specially intense hatred toward the Jews (II Macc. xiii. 25). Jonathan the Maccabee was treacherously murdered there by Tryphon (I Macc. xii. 48). Alexander Jannæus vainly attempted to conquer it (Josephus, "Ant." xiii. 12, § 2). Ptolemy X. and his mother, Cleopatra III., disputed its possession with each other until Cleopatra handed it over to the Syrian king as the dowry of her daughter Selene. Tigranes plundered it 70 B.C. Under the emperor Claudius, Acco "received the rights of a Roman colony" (Pliny, 5, 17). Conquered by the Arabs in 668, the city reached its highest importance during the Crusades as a base of operations for the Christians. It was, for a time, the seat of the Latin kingdom of Jerusalem and, until 1291, of the Knights of St. John, who transformed its name to St. Jean d'Acre. In modern times its successful defense by the Turks and English against Bonaparte in 1799, its conquest by the Egyptians under Ibrahim Pasha in 1832, and its recapture with European aid in 1840 are the most notable events.
W. M. M.

ACROSTICS: Compositions, usually rhythmical, in which certain letters (generally the first or last of each line), taken consecutively, form a name, phrase, or sentence. Several instances of alphabetical Acrostics occur in the Hebrew Bible. According to Pesikta Rabbati, § 46, ed. Friedmann, p. 187, the first verse of Ps. xcii. is an acrostic on the name Moses. Acrostics are usually held to be of late date, but if Bickell and Gunkel have rightly detected traces of an alphabetical arrangement in Nahum, i. ii. and iii., it follows that the Hebrew acrostic is at least as old as the seventh century B.C. On the other hand, the attempt to discover nominal Acrostics in the Hebrew Bible has not been successful. Much ingenuity has been expended on the endeavor to find the name of God acrostically in the Book of Esther. Two suggestions, made by Lagarde and Luzzatto, have, however, some plausibility; namely, "Pedahel" (end of Ps. xxv.) and "Simon" (Ps. cx. 1–4). The Simon referred to might be Simon the Maccabee (142–135 B.C.). See Lagarde, "Symmicta," i. 107; Gunkel, in Stade's "Zeitschrift," xiii. 224; Cheyne, "Origin and Religious Contents of the Psalter," p. 228, New York, 1891; compare "Theologische Literaturzeitung," 1892, No. 26, col. 637.

Biblical.

The alphabetical Acrostics of the Bible (on which see Driver, "Introduction," p. 337) are confined to the Psalms, Proverbs, and Lamentations. They include Psalms ix.–x. (incomplete); xxv. (extra verse at end, ו line missing); xxxiv. (resembles xxv., but here the פ verse seems originally to have preceded the ע verse; otherwise there is no subject to צעקו in verse 18, unless it refers to "the doers of evil" in verse 17: Duhm thinks that יהוה in verse 23 belongs to the author's name); xxxvii. (ע verse missing, but perhaps to be restored from the long verse 28); cxi. and cxii. (a half-verse to each letter); cxix. (eight verses to each letter); and cxlv. (נ line missing, but supplied in the Septuagint). In all these Psalms the alphabetical arrangement seems to have been chosen as an artificial link between verses not logically connected.

Besides the Psalms, the two other books above mentioned contain passages alphabetically arranged. Prov. xxxi. 10–31 is alphabetical (in the Septuagint the פ precedes the ע), and if, as Bickell assumes, chap. li. of Ecclus. (Sirach) contained an alphabet, this would be due to imitation of Proverbs. The Cairene fragment of Sirach discovered by Professor Schechter does not present a complete alphabet (see Schechter and Taylor, "The Wisdom of Ben Sira," pp. lxxvi. *et seq.*). Lam. i.–iv. are alphabetical; chap. iii. is a triple acrostic. In ii.–iv. the פ line precedes the ע. Chap. v. is not alphabetical, but it contains twenty-two verses. In Lamentations the alphabetical order is associated with a defined elegiac measure. It should be added, finally, that H. P. Chajes has lately advanced the very improbable view that in their original form chaps. x.–xxii. 16 of the Biblical Book of Proverbs were arranged alphabetically ("Proverbia-Studien," Berlin, 1899).

Post-Biblical.

Beginning with the gaonic age, Acrostics, either (1) alphabetical, (2) nominal (giving the author's name), or (3) textual (giving a Biblical quotation), are frequently found in Hebrew literature. The Midrash (Cant. R., beginning) ascribes to King Solomon the composition of Acrostics; but elsewhere the Midrash alludes to Greek Acrostics (*ἀλφαβητάρια*) (Eccl. R. to vii. 8). These Greek Acrostics were probably used in the ancient oracles, and were afterward adopted by the Christian Greek writers (Krumbacher, "Geschichte der Byzantinischen Litteratur," pp. 697 *et seq.*). Acrostics were also popular in early Syriac literature. Ephraim of Edessa (307–373) wrote alphabetical poems; and at about the same period Aphraates arranged his homilies under the twenty-two letters of the Syriac alphabet. This may be compared with the method of the Karaite Judah Hadassi, whose "Eshkol ha-Kofer" (written in 1148) is arranged in an elaborate series of alphabets. The medieval Church was fond of alphabetical hymns (Julian, "Hymnology," pp. 3, 4 *et seq.*). These "abecedaria" were sometimes composed for dogmatic purposes (Bingham, "Works," v. 17).

Acrostics obtained a firm hold on Hebrew writers in the gaonic period. The letters of that age often open with Acrostics on the writer's name; and later the same fact may be noted in prefaces to treatises. The liturgy was soon embellished with acrostic passages, and this independently of the introduction of rime. The earliest acrostic prayers are collected in Zunz, "Gottesdienstliche Vorträge," 2d ed., p. 391. Sometimes patriarchal names are thus introduced, as Abraham in ישתבח; Isaac and Rebekah in בפי ישרים. The order of the lines in "En Kelohenu" (originally מי כאלהינו) was ingeniously disarranged to introduce the acrostic אמן ברוך אתה; the words אל מלך נאמן inserted before the Shema' also form the acrostic "Amen."

The extent to which Acrostics were used by medieval Hebrew liturgical poets (see Piyyuṭ) is not easily determined. Kalir, the first great name among them, was followed in this, as in other points, by his imitators; but the Spanish poets, equally with the Kalirian, were victims to the fancy. A large number of Judah ha-Levi's hymns and secular verses are Acrostics on his name; most frequently he uses יהודה, but sometimes the fuller form אני יהודה הלוי בר שמואל חזק אמן. Abraham ibn Ezra wrote many Acrostics on his name אברהם; occasionally, like other poets, he introduced into his letters the name of his correspondent.

Some writers wove into their verses Acrostics consisting not only of their own names, but of long, continuous passages from Scripture introduced word by word (these are referred to above as textual Acrostics). A very elaborate instance is Simon b. Isaac's piyuṭ ויושע שושני פרח (for the seventh day of Passover). A special kind of acrostic was the repetition of the same initial throughout the composition. The "Thousand Alephs" of Abraham b. Israel Bedersi, of Joseph ibn Latimi, and of J. Cohen Ẓedeḳ are cases in point. The alphabetical Midrashim, such as the Alphabet of Sirach (pseudonymous), do not belong to Acrostics proper.

Acrostics were also employed for Mnemonics and for charms. Many of these are Abbreviations rather than Acrostics. The oft-used cabalistic formula קרע שטן is, however, a genuine acrostic; the phrase has a meaning, and the letters forming it are, according to some, the initial letters of the second line of the early morning prayer beginning אנא בכח. Acrostics were very little used in Hebrew as Riddles. As an example, however, of what may be done in this way, witness the following quadruple Hebrew acrostic, attributed to Abraham ibn Ezra. It is a response to a question in ritual law, and reads identically forward and backward, upward and downward.

I. A.

ACSÁDY, IGNATZ (IGNATIUS): Hungarian historian; born at Nagy-Károly, September, 9, 1845. He was educated at Debreczin and Budapest, and he began his journalistic career in 1869 as contributor to "Századunk," a political journal. In 1870 he joined the staff of the "Pesti Napló" and remained a regular contributor. In acknowledgment of his merits as a historian he was elected corresponding member of the Hungarian Academy of Sciences in 1888. His researches deal chiefly with the economic life of the sixteenth and seventeenth centuries in Hungary. He has also tried his hand at writing novels and dramas. Since 1894 he has taken an active part in the work of the Hungarian Jewish Literary Society as chairman of the committee on documents.

Ignatz Acsády.

His more important works are: "Az Általános Államjog és a Politika Története" (The Common State Law and the History of Politics), Budapest, 1875–76, published by the Hungarian Academy; "Zsidó és Nem Zsidó Magyarok az Emanczipáczio után" (Jewish and Non-Jewish Hungarians after the Emancipation), 1883; "Az Osztrák Császári Czim és Magyarország" (The Austrian Imperial Title and Hungary), Budapest, 1877; "Széchy Mária" (1885); "Magyarország Budavár Visszafoglalása Korában" (Hungary at the Time of the Reoccupation of Buda), prize essay, 1886; "Magyarország Pénzugyei I. Ferdinand Alatt" (The Financial Affairs of Hungary under Ferdinand I.), 1888, and "Közgardaszégi á Lapotsunk XVI. és XVII. Szazadban" (Our Economic Conditions in the Sixteenth and Seventeenth Centuries), 1889.

In 1891 he edited the "Kis Cyclopedia" at the request of the Athenæum Society. He wrote the fifth and sixth volumes of Szilágyi's "National History of Hungary," published in 1895–98, on the occasion of the thousandth anniversary of the existence of Hungary. The fifth volume of this work deals with the conditions prevailing in Hungary after the battle of Mohacs, 1526, and the sixth with the reigns of Leopold I. and Joseph I.

He has been a prolific contributor to Hungarian journals, such as "Magyar Tanügy," "Budapesti Szemle," "Századunk," "Magyar Zsidó Szemle," etc.

Bibliography: Pallas, *Magyar Lexicon*, i. 70; Szinnyei, *Magyar Irók Tára*, i. 50; *Magyar Szalon*, 1887, p. 481.

ACTS OF PARLIAMENT RELATING TO THE JEWS OF ENGLAND: The legislature of England expresses its will in formal documents known as Acts, and thus the record of the legislative enactments concerning the Jews of England is to be found in the collected Acts known as the "Statutes of the Realm." As Parliament, in the modern sense of the term, had scarcely begun to exist before the Jews were expelled from England in 1290, there are only a few references to the Jews in the statutes of the fourteenth century. A reference to them in the Statutes "De Mercatoribus" (Statutes, i. 100), "De Pistoribus" (*ib.* pp. 202, 203), and the Statute 1 Ed. III., st. 2, c. 3, exhaust the list. But after the return of the Jews to England many Acts relate to their position with regard to marriage laws, etc., and especially to their legal disabilities. The most interesting of these are the two Acts removing and replacing these disabilities during the "No Jews!" agitation of 1753. The following is a list of the chief Acts of the English Parliament (including some Acts of the Colonial Parliaments) relating to the Jews:

1694.—6 & 7 Wm. III., cap. 6, sec. 63.
  Jews cohabiting as man and wife to pay the duty imposed by this statute on marriages.
1702.—1 Anne, cap. 30 (repealed in 1846).
  An Act to oblige the Jews to maintain and provide for their Protestant children.
1740.—13 Geo. II., cap. 7.
  An Act for naturalizing such foreign Protestants and others therein mentioned (including Jews) as are settled or shall settle in any of His Majesty's colonies in America.
1753.—26 Geo. II., cap. 26.
  An Act to permit persons professing the Jewish religion to be naturalized by Parliament, etc.
1753.—26 Geo. II., cap. 33.
  Lord Hardwicke's Act for prevention of clandestine marriages. (Sec. 18 exempts Jewish marriages.)
1754.—27 Geo. II., cap. 1.
  An Act to repeal an Act of the twenty-sixth year of His Majesty's reign, intituled, An Act to permit persons professing the Jewish religion to be naturalized by Parliament, etc.
1820.—Barbados—An Act concerning the vestry of the Hebrew nation resident within the island. (For electing five representatives to settle taxation.)
1823.—Geo. IV., cap. 76.
  Repealing Lord Hardwicke's Act. (Sec. 31 exempts Jews.)
1830.—Copy of a bill which has recently passed the House of Assembly in Jamaica. (Repealing the clauses disabling Jews from being elected members of the Corporation of Kingston.)
1836.—6 & 7 Wm. IV., cap. 85.
  An Act for marriages in England. (Sec. 2. Jews may contract marriage according to Jewish usages, provided that both parties are of the Jewish religion, and that the registrar's certificate has been obtained.)
1836.—6 & 7 Wm. IV., cap. 86.
  An Act for registering births, deaths, and marriages in England. (Sec. 30. The president of the London Committee of Deputies of the British Jews is to certify to the registrar-general the appointment of secretaries of synagogues to act as marriage registrars.)
1840.—3 & 4 Vic., cap. 72.
  An Act to provide for the solemnization of marriages in the districts in or near which the parties reside. (Sec. 5. Jews exempted from operation of the Act.)

1844.—7 & 8 Vic., cap. 81.
An Act for marriages in Ireland. (Sec. 12. Jews may contract marriages according to their usages, provided they give notice to the registrar and obtain his certificate. Sec. 13. Jewish registrars to be certified by the president of Jewish Board of Deputies.)

1845.—8 & 9 Vic., cap. 52.
An Act for the relief of persons of the Jewish religion elected to municipal offices.

1846.—9 & 10 Vic., cap. 59.
An Act to relieve Her Majesty's subjects from certain penalties and disabilities with regard to their religious opinions. (Sec. 2. Jews are to be subject to the same laws as Protestant dissenters with regard to their schools, places of religious worship, education, and charitable purposes, and the property held therewith.)

1847.—10 & 11 Vic., cap. 58.
An Act to remove doubts as to Quakers' and Jews' marriages, solemnized before certain periods. (Declares all marriages among Jews solemnized in England before April 1, 1837, or in Ireland before April 1, 1845, according to their usages, are good in law, if both parties were Jews.)

1855.—18 & 19 Vic., cap. 81.
An Act to amend the law concerning the certifying and registering of places of religious worship in England. (Sec. 2. Synagogues may be certified as such to the registrar-general, and to be exempt from the provisions of the Charitable Trusts Act, 1853, with certain exceptions.)

1855.—18 & 19 Vic., cap. 86.
An Act for securing the liberty of religious worship. (Sec. 2 provides that 9 & 10 Vic., cap. 59, *vide supra*, is to be construed with reference to this Act.)

1856.—19 & 20 Vic., cap. 119.
An Act to amend the provisions of the marriage and registration Acts. (Sec. 21. Marriages of Jews may be solemnized by license. Sec. 22. Twenty members of the West London synagogues of British Jews, or of any synagogue in connection therewith, may certify a secretary to the registrar-general, as a registrar of marriages.)

1858.—21 & 22 Vic., cap. 49.
An Act to provide for the relief of Her Majesty's subjects professing the Jewish religion. (Sec. 1 empowers either House of Parliament to modify the form of oath, so as to enable a Jew to sit and vote. By Sec. 3, Jews are precluded from holding certain offices. By Sec. 4, the right of presenting to any ecclesiastical benefice possessed by Jews is to devolve on the Archbishop of Canterbury.)

1860.—23 & 24 Vic., cap. 63.
An Act to amend the Act of the twenty-first and twenty-second years of Victoria, chapter forty-nine, to provide for the relief of Her Majesty's subjects professing the Jewish religion. (Repealed by 29 & 30 Vic., cap. 19, which removed the words "on the true faith of a Christian" from the oath.)

1870.—32 & 33 Vic. Workshop Act permits Jews to work on Sunday.

1871.—33 & 34 Vic., cap. 116.
An Act for confirming a scheme of the Charity Commissioners for the Jewish United Synagogues.

1872.—35 & 36 Vic., cap. 33. The Ballot Act. (Schedule I., sec. 26. If a Parliamentary election takes place on Saturday, the presiding officer may mark a Jewish elector's ballot-paper for him.)

1878.—41 & 42 Vic., cap. 16.
An Act to consolidate and amend the law relating to factories and workshops. (Sec. 50 provides means by which Jewish manufacturers closing on their Sabbath may employ young persons and women in such a way as to make up the lost time. Sec. 51. Jewish employees in factories or workshops are permitted to be employed on Sunday, subject to certain restrictions.)

[For statutes affecting the Jews in other countries see articles on respective countries.]

ADAFINA. See Ani.

ADAH.—Biblical Data: One of Lamech's two wives (Gen. iv. 19, 20). The name is mentioned in the poem in verses 23 and 24.

The names of Lamech's wives have been variously explained. "Ornament" and "Shadow" are the meanings most often given, but Böttcher suggests "Migrant" and "Protectress," Ewald and others "Aurora" (or "Light") and "Shade"—that is, "Day" and "Night"; whence Goldziher and Lenormant find a basis for a mythical origin (compare Dillmann, "Genesis," and Lenormant, "Origines," i. 183 *et seq.*). Cheyne regards the names as epithets of old chieftainesses. In the poem from which the names are taken Lamech stands for the typical warrior, whose power to avenge himself is complete. "Adornment" and "Shade"—that is, "Protection"—could easily have been poetically conceived as his wives, and Naamah (נעמה), or "Pleasure," as the daughter of Zillah (ver. 22). The possibility of a personal origin of the names, as Cheyne conceives it, can not, however, be denied.

G. A. B.

——**In Rabbinical Literature:** The Midrash interprets Adah, the name of one of the wives of Lamech, as the "deposed one" (Aramaic עדיא), and the name of the other, Zillah, as signifying that "she shaded herself" (Hebrew צל) at the side of her husband. It states in explanation that the immoral generation before the Deluge was in the habit of marrying two wives; one for the perpetuation of the race, the other for indulgence in sensual pleasure. In Lamech's case the former was Adah, who was the slave tyrannized over by her husband; the latter was Zillah, the mistress who commanded him (Gen. R. xxiii. 2).

L. G.

ADAH: Wife of Esau (Gen. xxxvi. 2–16), thought by modern writers to be added by the final redactor (R) of the Pentateuch. Adah is said (verse 2) to be the daughter of Elon the Hittite. The priestly narrator (P) (Gen. xxvi. 34) has Judith, the daughter of Beeri the Hittite, as the corresponding wife. Dillmann is no doubt right in the opinion that the redactor had before him another source in which the names of Esau's wives differed from those given in the source employed by the priestly writer, and that his modification (Gen. xxxvi.) is due to this. The Kenites and Edomites were contiguous clans, and this Adah and that of the Kenite Lamech may have a common origin (compare Halévy, "Recherches Bibliques," in "Rev. Ét. Juives," ix. 219).

G. A. B.

ADAIAH ("The Lord has Adorned"): **1.** A man of Boscath, father of Jedidah, the mother of King Josiah (II Kings, xxii. 1). **2.** Two members of the Bani family who had taken foreign wives (Ezra, x. 29, 39). **3.** The son of Joiarib of the tribe of Judah, residing in Jerusalem (Neh. xi. 5). **4.** A Levite of the family of Gershon (I Chron. vi. 26). In the chronological list in I Chron. xi. 6 he is called Iddo. **5.** Son of Jeroham, a priest holding office in Jerusalem (I Chron. ix. 12; Neh. xi. 12). **6.** Son of Shimei, mentioned in the genealogical list of Benjamin (I Chron. viii. 21). **7.** Father of Maaseiah, who helped Jehoiada in the religious reformation, in dethroning Athaliah, and in crowning Joash (II Chron. xxiii. 1, where the Hebrew has "Adaiahu").

G. B. L.

ADALBERG, SAMUEL: Polish author; born at Warsaw in 1868. He published "Liber Proverbiorum Polonicorum cum Adagiis ac Tritioribus Dictis ad instar Proverbiorum Usitatis," Warsaw, 1889–94. This work, containing forty thousand proverbs, is the largest collection of its kind. Adalberg, besides, made valuable contributions to Polish and to Jewish proverb literature ("Wisla," iv. 1890; the latter was issued as a book of 985 pages).

Bibliography: *Encyklopedja Powszechna*, i. Warsaw, 1898; Ignac Bernstein, *Katalog Dziel Tresci Przyslowiowej Skladajacych Bibljoteke*, i. 5, 6, Warsaw, 1900.

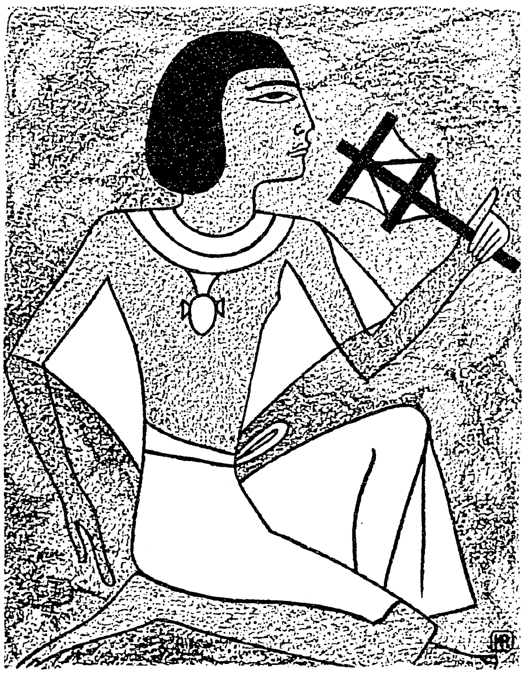
ADAM.—Biblical Data: The Hebrew and Biblical name for man, and also for the progenitor of the human race. In the account of the Creation given in Gen. i. man was brought into being at the close of the sixth creative day, "made in the image of God," and invested with dominion over the rest of the animate world. Man was thus created, male and female, charged to replenish the earth with his own kind and to subdue it to his own uses. In Gen.

ii. a more particular account of man's creation is given. The scene is in Babylonia, near the confluence of the Euphrates and Tigris rivers, in the country of Eden. After the soil had been prepared by moisture "God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul" (Gen. ii. 7).



Receiving the Breath of Life through the Nostrils.
(From Naville's Egyptian "Book of the Dead.")

He was then placed in a garden planted for him in Eden, to "till and tend it." Of all that grew in the garden he was permitted to eat freely, except "the fruit of the tree of the knowledge of good and evil." Man next made the acquaintance of all the lower animals, learning their qualities, and giving them names. But among these he found no fit companion. Hence God, by express creative act, made for him a mate, by taking a rib from his side and constructing it into a woman.

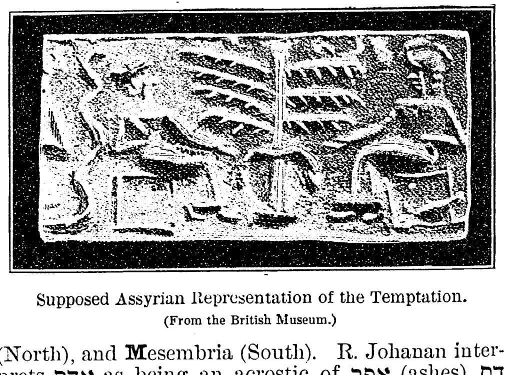
Curse of Disobedience.

In Gen. iii. the first chapter in the moral history of mankind is given. The woman was tempted by the serpent, who told her that if she and her husband would partake of the forbidden fruit their eyes would be opened, and they "would be as gods, knowing good and evil" (Gen. iii. 5). She ate of the fruit, and gave to her husband, who also ate of it. This act of disobedience was followed by a divine judgment. The serpent was cursed because he had tempted the woman, and between his and her descendants there was to be perpetual enmity. The woman was condemned to the pangs of child-bearing and to subjection to her husband. As a punishment for the man the ground was cursed: thorns and thistles were to spring up; hard labor would be needed to insure the production of human food; and toil would be the lot of man from childhood to the grave. Finally, the man and his wife were expelled from the garden "to till the ground from which he was taken." Of Adam and his wife, now called "Eve" (חוה) because she was the mother of all living (חי) it is only known that after their exile from the garden they had children born to them (see Gen. v. 3, 4). J. F. McC.

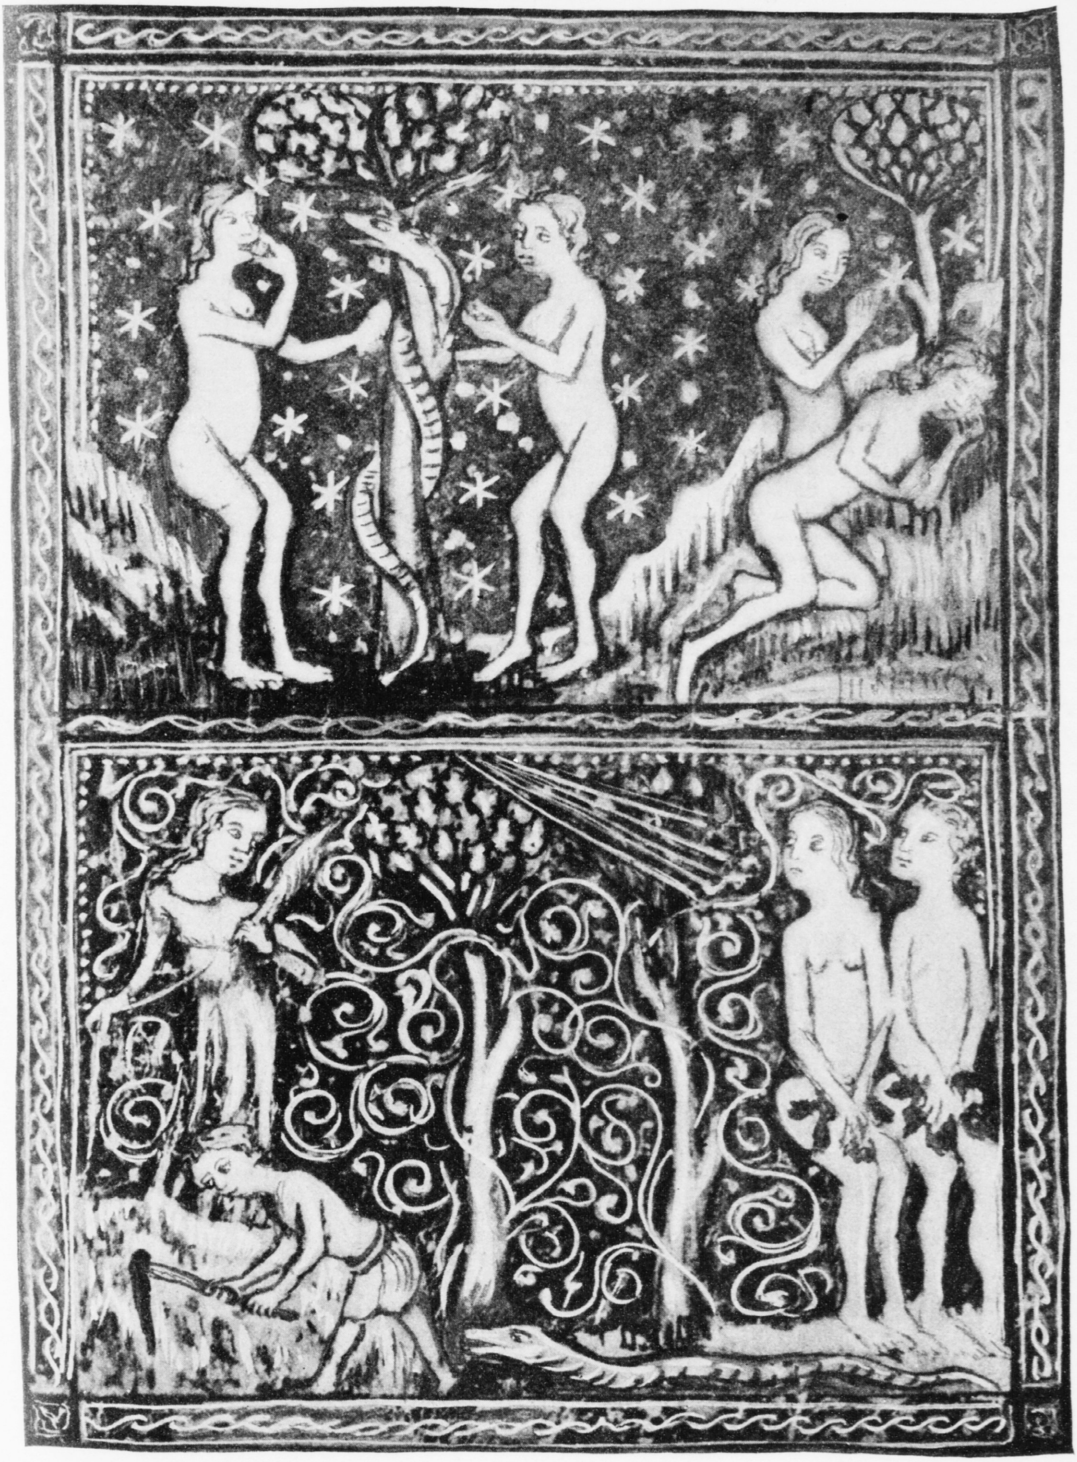
——**In Apocryphal and Rabbinical Literature:** While the generic character that the name of Adam has in the older parts of Scripture, where it appears with the article ("the man"), was gradually lost sight of, his typical character as the representative of the unity of mankind was constantly emphasized (compare Sanh. iv. 5; the correct reading in Tosef., Sanh. viii. 4–9):

> "Why was only a single specimen of man created first? To teach us that he who destroys a single soul destroys a whole world and that he who saves a single soul saves a whole world; furthermore, in order that no race or class may claim a nobler ancestry, saying, 'Our father was born first'; and, finally, to give testimony to the greatness of the Lord, who caused the wonderful diversity of mankind to emanate from one type. And why was Adam created last of all beings? To teach him humility; for if he be overbearing, let him remember that the little fly preceded him in the order of creation."

In a dispute, therefore, as to which Biblical verse expresses the fundamental principle of the Law, Simon ben 'Azkai maintained against R. Akiba—who, following Hillel, had singled out the Golden Rule (Lev. xix. 18)—that the principle of love must have as its basis Gen. v. 1, which teaches that all men are the offspring of him who was made in the image of God (Sifra, Ḳedoshim, iv.; Yer. Ned. ix. 41*c*; Gen. R. 24). This idea, expressed also by Paul in his speech at Athens, "[God] hath made of one blood all nations of men for to dwell on all the face of the earth" (Acts, xvii. 26), found expression in many characteristic forms. According to Targ. Yer. to Gen. ii. 7, God took dust from the holy place (as "the center of the earth"; compare Pirḳe R. Eliezer xi., xx.) and the four parts of the world, mingling it with the water of all the seas, and made him red, black, and white (probably more correctly Pirḳe R. El. xi. and Chronicle of Jerahmeel, vi. 7: "White, black, red, and green—bones and sinews white; intestines black; blood red; skin of body or liver green"); compare Philo, "Creation of the World," xlvii.; Abulfeda, "Historia Ante-Islámica." The Sibylline Oracles (iii. 24–26) and, following the same, the Slavonian Book of Enoch find the cosmopolitan nature of Adam, his origin from the four regions of the earth, expressed in the four letters of his name: **A**natole (East), **D**ysis (West), **A**rktos (North), and **M**esembria (South). R. Johanan interprets אדם as being an acrostic of אפר (ashes), דם (blood), and מרה (gall; see Soṭah, 5*a*). But this interpretation seems to have originated in other circles; for we find Isidor of Seville ("De Natura Rerum," ix.) declare that Adam was made of blood (*sanguis*), gall (*cholē*), black gall (*melancholia*), and phlegm: the four parts constituting the temperaments, which correspond to the four elements of nature, as does the microcosm to the macrocosm (see



Supposed Assyrian Representation of the Temptation.
(From the British Museum.)



ADAM AND EVE.

(From the Sarajevo Haggadah of the fourteenth century.)

Piper, "Symbolik der Christlichen Kirche," 90, 469). R. Meir (second century) has the tradition that God made Adam of the dust gathered from the whole world; and Rab (third century) says: "His head was made of earth from the Holy Land; his main body, from Babylonia; and the various members from different lands" (Sanh. 38*a* *et seq.*; compare Gen. R. viii.; Midr. Teh. cxxxix. 5; and Tan., Peḳude, 3, end).

Two Natures in Adam.

There are, however, two points of view regarding man's nature presented in the two Biblical stories of man's creation; and they are brought out more forcibly in the Haggadah, and still more so in the older Hellenistic literature. "Both worlds, heaven and earth, were to have a share in man's creation; hence the host of angels were consulted by the Lord when He said, 'Let us make man'" (Gen. i. 26, Gen. R. viii.). But the old haggadists loved especially to dwell on the glory of God's first-created before his fall. He was "like one of the angels" (Slavonic Book of Enoch, xxx. 11; compare Christian Book of Adam, i. 10; also Papias in Gen. R. xxi.; Pirḳe R. El. xii.; Ex. R. xxxii.; Targ. Yer. Gen. iii. 22). "His body reached from earth to heaven [or from one end of the world to the other] before sin caused him to sink" (Ḥag. 12*a*, Sanh. 38*b*; compare also Philo, "Creation of the World," ed. Mangey, i. 33, 47). "He was of extreme beauty and sunlike brightness"(B. B. 58*a*). "His skin was a bright garment, shining like his nails; when he sinned this brightness vanished, and he appeared naked" (Targ. Yer. Gen. iii. 7; Gen. R. xi.; Adam and Eve, xxxvii.). When God said: "Let us make man in our image," the angels in heaven, filled with jealousy, said: "What is man that Thou thinkest of him? A creature full of falsehood, hatred, and strife!" But Love pleaded in his favor; and the Lord spoke: "Let truth spring forth from the earth!" (Gen. R. viii.; Midr. Teh. viii.). Far older, and blended with Babylonian mythology (Isa. xiv. 12), is the story preserved in Adam and Eve, the Slavonic Book of Enoch, xxxi. 3-6 (compare Bereshit Rabbati, ed. Epstein, p. 17; Pirḳe R. El. xiii.; Chronicle of Jerahmeel, xxii.; and Koran, sura ii. 34; xv. 30), according to which all the angels were commanded by Michael the archangel to pay homage to the image of God; whereupon all bowed before Adam except Satan, who, in punishment for his rebelliousness, was hurled from his heavenly heights to the depth of the abyss, while his vacant throne was reserved for Adam, to be given to him at the time of the future resurrection. Henceforth, Satan became the enemy of man, appearing to him in the guise of an angel of light to seduce him (compare II Cor. xi. 14). A somewhat modified midrashic legend (Gen. R. viii.) relates that the angels were so filled with wonder and awe at the sight of Adam, the image of God, that they wanted to pay homage to him and cry "Holy!" But the Lord caused sleep to fall upon him so that he lay like a corpse, and the Lord said: "Cease ye from man, whose breath is in his nostrils: for wherein is he to be accounted of?" (Isa. ii. 22). Another version (Pirḳe R. El. xi.; Tan., Peḳude, 3) is that all other creatures, marveling at Adam's greatness, prostrated themselves before him, taking him to be their creator; whereon he pointed upward to God, exclaiming: "The Lord reigneth, He is clothed with majesty!" (Ps. xciii. 1). Still, the Book of Wisdom (ii. 23, 24) seems to allude to the older legend when saying, "God created man for immortality, but through the envy of Satan death entered the world" (compare Josephus, "Ant." i. 1, § 4; Ab. R. N. i.; Gen. R. xviii., where the serpent is represented as moved by jealousy).

The Fall.

Adam in paradise had angels (agathodæmons or serpents) to wait upon and dance before him (Sanh. 59*b*, B. B. 75*a*, Pirḳe R. El. xii.). He ate "angel's bread" (compare Ps. lxxiii. 26; Yoma, 75*b*; Vita Adæ et Evæ, § 4). All creation bowed before him in awe. He was the light of the world (Yer. Shab. ii. 5*b*); but sin deprived him of all glory. The earth and the heavenly bodies lost their brightness, which will come back only in the Messianic time (Gen. R. xii.; Vita Adæ et Evæ, § 21; Philo, "Creation of the World," p. 60; Zohar, iii. 83*b*). Death came upon Adam and all creation. God's day being a thousand years (Ps. xc. 4), Adam was permitted to live 930 years—threescore and ten less than one thousand (Book of Jubilees, iv. 28, and Gen. R. xix.), so that the statement "in the day that thou eatest thereof, thou shalt surely die" might be fulfilled. The brutes no longer stood in awe of man as their ruler; instead, they attacked him. But while sin was of fatal consequence, and the effect of the poison of the serpent is still felt by all following generations, unless they should be released from it by the covenant of Sinai ('Ab. Zarah, 22*b*; IV Book of Esdras; Apoc. Mosis, xx.; see articles SIN and FALL), the Jewish haggadists emphasize one point not mentioned in the Bible, but of great doctrinal importance in comparison with the teachings of Paul and his followers. The deadly effect of sin can be removed by repentance. Hence, Adam is represented as a type of a penitent sinner. Thus, he is described in Vita Adæ et Evæ, as well as by the rabbis of the second century ('Er. 18*b*; 'Ab. Zarah, 8*a*; Ab. R. N. i.; Pirḳe R. El.), as undergoing a terrible ordeal while fasting, praying, and bathing in the river for seven and forty days (seven weeks, Pirḳe R. El.), or twice seven weeks—the shortening of the days after Tishri being taken by Adam as a sign of God's wrath, until after the winter solstice the days again grew longer, when he brought a sacrifice of thanksgiving. Another view is that when the sun rose the following morning he offered his thanksgiving, in which the angels joined him, singing the Sabbath Psalm (Ps. xcii.). About Adam and the one-horned ox (the Persian *gaiomarth*), see Kohut, in "Z. D. M. G." xxv. 78, n. 6.

On account of the Sabbath the sun retained its brightness for the day; but as darkness set in Adam was seized with fear, thinking of his sin. Then the Lord taught him how to make fire by striking stones together. Thenceforth the fire is greeted with a blessing at the close of each Sabbath day (Pesiḳ. R. xxiii.; Pirḳe R. El. xx.; similarly, Pes. 54*a*).

When Adam heard the curse, "Thou shalt eat of the herbs of the earth," he staggered, saying: "O Lord, must I and my ass eat out of the same manger?" Then the voice of God came reassuringly: "With the sweat of thy brow shalt thou eat bread!" There is comfort in work. The angels taught Adam the work of agriculture, all the trades, and also how to work in iron (Book of Jubilees, iii. 12; Gen. R. xxiv.; Pes. 54*a*). The invention of writing was ascribed to Adam.

Adam in the Future World.

On the day Adam covered his naked body for the first time, he beheld in clothing a mark of human dignity, and offered God a thanksgiving of incense (Book of Jubilees, iii. 22). The garments made by God were not of skin, but of light (Gen. R. xx.), and robes of glory were made of the serpent's skin (Targ. Yer. Gen. iii. 21).

Adam, "the first to enter Hades" (Sibylline Oracles, i. 81), was also the first to receive the promise of resurrection (Gen. R. xxi. 7, after Ps. xvii. 15). According to the Testament of Abraham, Adam sits at the gates, watching with tears the multitude of souls passing through the wide gate to meet their punishment, and with joy the few entering the narrow gate to receive their reward.

The Jewish view concerning Adam's sin is best expressed by Ammi (Shab. 55*a*, based upon Ezek. xviii. 20): "No man dies without a sin of his own. Accordingly, all the pious, being permitted to behold the Shekinah (glory of God) before their death, reproach Adam (as they pass him by at the gate) for having brought death upon them; to which he replies: 'I died with but one sin, but you have committed many: on account of these you have died; not on my account'" (Tan., Ḥuḳḳat, 16).

To Adam are ascribed Ps. v., xix., xxiv., and xcii. (Midr. Teh. v. 3; Gen. R. xxii., end; Pesiḳ. R. xlvi.; see Bacher, "Ag. Pal. Amor." ii. 337 *et seq.*). His body, made an object of worship by some semi-pagan Melchisedician sect, according to the Christian Book of Adam, was shown in Talmudic times at Hebron, in the cave of Machpelah (B. B. 58*a*, Gen. R. lviii.), while Christian tradition placed it in Golgotha near Jerusalem (Origen, tract 35 in Matt., and article GOLGOTHA). It is a beautiful and certainly an original idea of the rabbis that "Adam was created from the dust of the place where the sanctuary was to rise for the atonement of all human sin," so that sin should never be a permanent or inherent part of man's nature (Gen. R. xiv., Yer. Naz. vii. 56*b*). The corresponding Christian legend of Golgotha was formed after the Jewish one.

K.

——**In Mohammedan Literature:** No mention is made of Adam in the early suras of the Koran. Though Mohammed speaks of the creation of man in general from a "clot of blood" or a "drop of water" (suras lxxv. 34, lxxvii. 20, xcvi. 1), it is only in the later Meccan suras that the original creation of man is connected with a particular individual. But in these suras the theory is already developed that Satan's designs against man are consequent upon the expulsion of the former from paradise at the time of man's creation. Geiger has incorrectly remarked ("Was Hat Mohammed aus dem Judenthume Aufgenommen?" p. 100) that this is not a Jewish idea (see Vita Adæ et Evæ, § 16). It belongs also to the cycle of the Christian-Syriac Midrash (see Budge, "The Book of the Bee," p. 21, trans.; Bezold, "Die Schatzhöhle," pp. 5, 6, trans.). In the earliest account the name Adam does not occur; nor does Iblis vow vengeance upon a single individual, but rather upon the whole race of mankind:

Iblis, the Devil, Respited.

"When thy Lord said to the angels, 'Verily, I am about to create a mortal out of clay; and when I have fashioned him, and breathed into him of My spirit, then fall ye down before him adoring.' And the angels adored, all of them save Iblis, who was too big with pride, and was of the misbelievers. Said He, 'O Iblis! what prevents thee from adoring what I have created with My two hands? Art thou too big with pride? or art thou amongst the exalted?' Said he, 'I am better than he; Thou hast created me from fire, and him Thou hast created from clay.' Said He, 'Then go forth therefrom; for verily thou art pelted, and verily upon thee is My curse unto the day of judgment.' Said he, 'My Lord! then respite me until the day when they are raised.' Said He, 'Then thou art amongst the respited until the day of the stated time.' Said he, 'Then, by Thy might, I will surely seduce them all together, except Thy servants amongst them who are sincere!' Said He, 'It is the truth, and the truth I speak; I will surely fill hell with thee and with those who follow thee amongst them all together'" (sura xxxviii. 70-85).

At a later period Mohammed develops the personal character of the first man and his direct relationship to God, whose vicegerent (*khalifah*, calif) he is to be on earth. At the same time Satan is represented as being the one who drove Adam from paradise:

Adam as Vicegerent of God.

"And when thy Lord said unto the angels, 'I am about to place a vicegerent in the earth,' they said, 'Wilt Thou place therein one who will do evil therein and shed blood? We celebrate Thy praise and hallow Thee.' Said [the Lord], 'I know what ye know not.' And He taught Adam the names, all of them; then He propounded them to the angels and said, 'Declare to Me the names of these, if ye are truthful.' They said, 'Glory be to Thee! no knowledge is ours but what Thou Thyself hast taught us; verily, Thou art the knowing, the wise.' Said the Lord, 'O Adam, declare to them their names'; and when he had declared to them their names He said, 'Did I not say to you, I know the secrets of the heavens and of the earth, and I know what ye show and what ye are hiding?' And when He said to the angels, 'Adore Adam,' they adored him save only Iblis, who refused and was too proud, and became one of the misbelievers.

"And He said, 'O Adam, dwell, thou and thy wife, in paradise, and eat therefrom amply as you wish; but do not draw near this tree or ye will be of the transgressors.' And Satan made them backslide therefrom, and drove them out from what they were in, and He said, 'Go down, one of you the enemy of the other; and in the earth there are an abode and a provision for a time.' And Adam caught certain words from his Lord, and He turned toward him; for He is the Compassionate One easily turned. He said, 'Go down therefrom altogether, and haply there may come from Me a guidance, and whoso follows My guidance no fear is theirs, nor shall they grieve'" (sura ii. 29-36).

In sura vii. 10 *et seq.* the same story is repeated, though with several additions. In particular, Mohammed has now learned the manner in which Satan tempted Adam:

Satan Beguiles Adam.

"But Satan whispered to them to display to them what was kept back from them of their shame, and he said, 'Your Lord has only forbidden you this tree lest ye should be twain angels or should become of the immortals'; and he swore to them both, 'Verily, I am unto you a sincere adviser'; and he beguiled them by deceit, and when they twain tasted of the tree their shame was shown them, and they began to stitch upon themselves the leaves of the garden. And their Lord called unto them, 'Did I not forbid you from that tree there, and say to you, Verily, Satan is to you an open foe?' They said, 'O our Lord, we have wronged ourselves—and if Thou dost not forgive us and have mercy on us, we shall surely be of those who are lost!' He said, 'Go ye down, one of you to the other a foe; but for you in the earth there are an abode and a provision for a season.' He said, 'Therein shall ye live and therein shall ye die; from it shall ye be brought forth'" (sura vii. 19-24).

In suras xvii. 63, xviii. 48, references are also made to the refusal of Iblis to worship Adam. The latter was created from earth (iii. 51) or from clay (xxxii. 5).

That Adam is the first of the prophets is only hinted at in the Koran. In the passage (ii. 35) cited above, "And Adam caught certain words [*kalimat*] from his Lord," the reference may be to a supposed revelation to Adam. For this reason, in iii. 30, Mohammed says, "Verily, God has chosen Adam, and Noah, and Abraham's people, and Imram's people [the Christians]"; making Adam the representative of the antediluvian period.

Adam's Creation.

To these somewhat meager accounts later Arabic writers and commentators have added various details which find their parallel in the Jewish and Christian Midrash. Ḥamzah al-Ispahani expressly says that a Jewish rabbi in Bagdad, Zedekiah by name, told him, among other things, that Adam was created in the third hour of the sixth day, and Eve in the sixth hour; that they were made to dwell in Gan-Eden (גן עדן), from which they were expelled after the ninth hour; that God sent an angel to them, who taught Adam how to sow and to perform all the other work connected with agriculture. The same angel instructed Eve how to perform all manner of household duties. The historians Tabari, Masudi, Al-Athir, etc., have evidently culled from similar sources. They tell us that when God wished to form Adam He sent first Gabriel, then Michael, to fetch soil for that purpose. The earth, however, refused to give the soil, and yielded only to the Angel of Death, who brought three kinds of soil, black, white, and red. Adam's descendants, therefore, belong either to the white, the black, or the red race.

The soul of Adam had been created thousands of years previously, and at first refused to enter the body of clay. God forced it violently through Adam's nose, which caused him to sneeze. As it descended into his mouth, he commenced to utter the praises of God. He tried to rise; but the soul had not yet descended into his feet. When he did stand upright, he reached from earth up to the throne of God, and had to shade his eyes with his hand because of the brilliancy of God's throne. His height was gradually diminished, partly as a punishment for his sin, and partly through grieving at the death of Abel.

The Future Unveiled to Him.

Adam wished to see the generations which were to come from him. God drew them all from out of his back; they stood in two rows—one of the righteous, the other of the sinners. When God told Adam the span of life given to each, he was surprised to find that only a small number of years had been allotted to David, and made him a present of forty years; of which present, says the Mohammedan Midrash, a formal document was drawn up and signed.

When Adam was driven from paradise, he first alighted on the island of Sarandib (Ceylon). Here his footprint (seventy ells long) is still to be seen, as is that of Abraham in Mecca. From Ceylon Adam journeyed to the holy city in Arabia, where he built the Kaaba, having through fasting and silence gained the partial forgiveness of God.

Another legend connects the building of the Kaaba with ABRAHAM. When the time came for Adam to die, he had forgotten the gift of forty years to David, and had to be reminded of it by the Angel of Death. He is said to have been buried in the "Cave of Treasures"—a Christian, rather than a Jewish, idea. Several of these peculiar features are found again in the Pirḳe de-Rabbi Eliezer, a work that was compiled under Arabic influence (Zunz, "G. V." 2d ed., pp. 289 *et seq.*).

G.

——**Critical View:** According to modern critics, the story of the creation of man is presented in two sources. One of these forms the beginning of the document known as the PRIESTLY CODE (P), and the other is written by the so-called JAHVIST (J). The former makes the Creation to be the first of a series of stages in the development of the history of Israel and the theocracy, which is the great end of the divine government. Each event is to man a gradation leading up to a final act of Providence. This first stage fitly ends with the making of man in the image of God, which follows upon the creation of light, the sky, the earth, and the sea; of plants, and of animals of the water, the air, and the land. This narrative as found in the final form of the Hexateuch is interrupted in Gen. ii. 4 by the second narrator, and is not resumed till Gen. v. 1, where the second stage begins with the "generations [*toledot*] of Adam."

The second narrative (Gen. ii. 4-iv.) is the beginning of a history written much earlier than the priestly document. Its interest centers in Adam not as the first link in the chain of the history of Israel, but as the founder of the human race. The descriptions are naive and anthropomorphic, telling of man's home in Eden, his divinely given mate, his progress in knowledge, his sin, his banishment from paradise, and the fate of his children.

Etymology of "Adam."

The etymology of the word "Adam" is of importance. The writer of Gen. ii. 7 gives his own explanation when he says: "God formed man of dust of the ground." That is to say, the man was called "Man" or "Adam" because he was formed from the ground (*adamah*). Compare Gen. iii. 19. This association of ideas is more than an explanation of the word: it is also suggestive of the primitive conception of human life. According to the oldest Semitic notions, all nature was instinct with life; so that men not only came from and returned to the earth, but actually partook of its substance. The same notion declares itself in the Latin *homo* and *humanus*, as compared with *humus* and the Greek *χαμαί*, in the German *gam* (in *Bräutigam*), and the English *groom*; also in the Greek *ἐπιχθόνιος* and similar expressions. Modern critics are the less inclined to ridicule this as a mere barbaric fancy now that the doctrine of evolution has made them familiar with the unity of nature. This view of the word implies that it was originally not a proper name; for names of persons (for which fanciful etymologies are often given by the sacred writers) are not made up after such a fashion.

A closer examination of the narrative will show that the word is primarily used in a generic sense, and not as the name of an individual. In Gen. i. its use is wholly generic. In Gen. ii. and iii. the writer weaves together the generic and the personal senses of the word. In all that pertains to the first man as the passive subject of creative and providential action the reference is exclusively generic.

Indeed, it is doubtful whether "Adam" as a proper name is used at all before Gen. iv. 25 (J) and v. 3 (P). Here the same usage is manifest: for in the two opening verses of chap. v. the word is used generically. It may also be observed that the writer in Gen. ii., iii. always says "the man" instead of "Adam," even when the personal reference is intended, except after a preposition, where, however, a vowel has probably been dropped from the text. The explanation of the variation of usage apparently is that, as in the case of most of the early stories of Genesis, the material of popular tradition, which started with the forming of man out of the earth, was taken up and worked over for higher religious uses by thinkers of the prophetic school. Adam is not referred to in the later Old Testament books, except in the genealogy of I Chron. J. F. McC.

ADAM, BOOK OF: The Talmud says nothing about the existence of a Book of Adam, and Zunz's widely accepted assertion to the contrary ("G. V." 2d ed., p. 136) is erroneous, as appears upon an inspection of the passage in 'Ab. Zarah, 5*a*, and Gen. R. xxiv. 2. There can be no doubt, however, that there existed at an early date, perhaps even before the destruction of the Second Temple, a collection of legends of Adam and Eve which have been partially preserved, not in their original language, but somewhat changed. It is possible to prove that the apocryphas, Apocalypsis Mosis—as Tischendorf, following a copyist's erroneous inscription, called the book—and Vita Adæ et Evæ, and to a certain degree even their Slavonic, Syriac, Ethiopic, and Arabic offshoots, are of identical Jewish origin. According to these apocryphal works and to the Eastern and Western forms of the Apocalypsis, the Jewish portion of the Book of Adam must have read somewhat as follows (the parallels in apocryphal and rabbinical literature are placed in parentheses):

Adam in the Garden of Eden.

Adam, the handiwork of the Lord (Ab. R. N. i., end), lived with Eve in the Garden of Eden, which was situated in the East (Book of Enoch, xxxii.; B. B. 84*a*). Their food, which they also distributed to the lower animals (Gen. R. xix. 5), consisted of the fruit of the trees in the garden, the only nourishment then allowed to living beings (Sanh. 59*b*). For their protection two angels were set apart (Ḥag. 16*a*), known (Ber. 60*b*) as מכובדים or the partakers of the majesty (כבוד) (*kabod*), called in Latin *virtutes*, from *virtus*, corresponding to *kabod*. But one day when the guarding angels had ascended to heaven to sing their hymn (שירה) to the Lord (Ḥul. 91*b*), Satan thought the time opportune to carry out his evil designs against Adam. Satan hated Adam, for he regarded him as the cause of his fall. After God had created man, He ordered all the angels to prostrate themselves before Adam, but Satan rebelled against God's command, despite the direct bidding of Michael "to worship the image of YHW" (יהו), and answered proudly: "If God be angry against me, I will exalt my throne above the stars of God" (compare Isa. xiv. 13). Whereupon God "cast him out from heaven with all his host of rebellious angels" (Slavonic Book of Enoch, xxxi. 18, and Mek., Shirah, § 2). And Satan the Adversary (Suk. 52*a*) selected the serpent for his tool, as it was not only the most subtle of all animals, but also very similar to man, for it had been endowed with hands and legs like him (Gen. R. xix. 1). And Satan spoke to the serpent: "Be my instrument, and through thy mouth will I utter a word which shall enable thee to seduce man" (Pirḳe R. El. xiii.). After some pleading the serpent succeeded in persuading Eve to eat of the forbidden fruit of the tree of knowledge—a fig-tree (Gen. R. xv. 7)—which the serpent had shaken for her (Ab. R. N. i. 4, ed. Schechter). But the serpent had infused lust into the fruit, and when Eve had eaten of it the sexual desire awoke in her (Slavonic Book of Baruch, xcvii.; Apoc. Abraham, xxiii., and Pirḳe R. El. xxi.), and at the same moment she became aware that she had been undone and "had lost the garment of righteousness in which she had been clothed" (Gen. R. xix. 6, Pirḳe R. El. xiv.). Adam, too, after he had eaten of the forbidden fruit, experienced a sense of loss and cried out: "What hast thou done? Thou hast removed me from the glory of the Lord" (Ab. R. N. i. 6, ed. Schechter).

The Divine Verdict.

Soon after they had sinned they heard the trumpet-blast (*shofar*) of Michael ("B. H." ed. Jellinek, ii. 61) calling the angels: "Thus saith the Lord, 'Come with me into the Garden of Eden and hear the sentence which I will pass on Adam'" (Gen. R. xix. 8). And the Lord then spoke to Adam, saying: "Where art thou hidden? Dost thou think I can not find thee? Can a house hide itself from its builder? [Targ. Yer. to Gen. iii. 9]. Because thou hast broken my commandment I will inflict seventy-two ailments upon thy body" (Mishnah Neg. i. 4). And to the woman He said: "Because thou didst not hearken to my commandment I shall multiply thy labor-pains, and vainly [ἐν ματαιοῖς of the Greek, by a mistake in reading הבלים (habalim) for חבלים (ḥabalim) in the Hebrew] thou wilt then confess and cry: 'Lord, save me, and I will not turn any more to carnal sin.' But thy desire shall be again to thy husband" (a midrashic explanation of Gen. iii. 16, based on the hermeneutic rule of *semikot*—explanation by context—and to be found word for word in Gen. R. xx. 7). Nor did the serpent escape punishment, for it lost its hands and legs (Gen. R. xx. 5), and a spirit of enmity was established between it and man unto the day of judgment; according to Targ. Yer. Gen. iii. 15, "until the time of Messiah" (see Soṭah, 49*b*).

Adam Exiled from the Garden of Eden.

However, the heaviest punishment for Adam was his expulsion from the Garden of Eden. All his supplications, as well as those of the angels, to mitigate the sentence only induced God to promise him, saying: "If after having left the Garden of Eden thou wilt guard against evil until thou diest" ["be prepared to die" is not correct, being based on the confusion of the Hebrew עתיד למות (wilt die) with the Aramaic עתיד (prepared)], "I will raise thee at the time of resurrection" (an old haggadic Targum to Gen. iii. 17, 22, which is also found in Targ. Yer. i. and Gen. R. xx. 10; compare the benediction *meḥayye ha-metim* (He raises the dead), in Apost. Const. vii. chap. xxxiv). In the future world God will be among men (Tan., Num. 145, ed. Buber), and the Evil Spirit will be no more (Gen. R. xlviii. 11).

The sentence of God was carried into effect. Banished from the garden, which was henceforward surrounded by a sea of ice (Book of Enoch, Hebrew version; "B. H." iv. 132), Adam and Eve settled in the neighborhood of Eden in the East (Gen. R. xxi. 9). They were no sooner out of their blissful abode than a paralyzing terror befell them. Unaccustomed to the earthly life and unfamiliar with the changes of the day and of the weather—in paradise an eternal light had surrounded them (Gen. R. xi. 2)—they were terrified when the darkness of night began to fall upon the earth ('Ab. Zarah, 8*a*), and the intercession of God's word (מימרא) was necessary to explain to them the new order of things. From this moment the sufferings of life began; for Adam and Eve were afraid to partake of earthly food, and fasted for the first seven days after their expulsion from paradise, as is prescribed in Talmudic law before an imminent famine (Mishnah Ta'anit, i. 6).

Repentance of Adam.

Humiliated and weakened by hunger and suffering, Adam became conscious of the gravity of his sin, for which he was now prepared to atone ('Er. 18*b*, Gen. R. xxii. 13). He, therefore, like Moses, Elijah, and Abraham (Apoc. Abraham, 12), fasted for forty days, during which he stood up to his neck in the waters of the river Gihon (גיחון), the name of which is etymologically connected by the writer with the roots גחן "to stoop" and גחי "to pray aloud" (Pirḳe R. El. xx.). According to the Vita Adæ et Evæ, Adam stood in the Jordan—a version which may be ascribed to the Christian copyists, who, for obvious reasons, wished to represent Adam as having had his baptism in the Jordan, forgetting that since Eve, as they themselves stated, bathed in the Tigris, Adam would have selected another of the rivers of paradise for that purpose.

The days of repentance having passed, the twins Cain and Abel were born to Adam and Eve (Gen. R. xxii. 2). And soon Cain rose, ran away, and brought a reed to his mother (קנה = קין; compare Gen. R. xxii. 8): "Cain killed his brother with a reed (קנה)"; for, according to the unanimous opinion of the Haggadah, the children of Adam and Eve were born fully developed (Gen. R. xxii. 2). Eve saw in a dream that Cain had assassinated his brother, and Abel was found slain with a stone (Gen. R. xxii. 8; Book of Jubilees, iv.31); but the earth refused to receive his blood (Giṭ. 57*b*). As a compensation for the murdered Abel, God promised Adam a son who should "make known everything that thou doest."

Illness and Death of Adam.

Adam, at the age of nine hundred and thirty years, became very ill; for God had cursed him with seventy-two ailments. He sent his son Seth, with Eve, to the Garden of Eden for the oil of healing, to restore him to health (Pirḳe R. El. xxxv). On his way to paradise Seth was attacked by a wild animal. Upon Eve's demanding how an animal could dare to attack an image of God, the animal replied that she herself, through her sin, had forfeited the right to rule over the animal kingdom (Pesiḳ. v. 44*b*, ed. Buber, and Sanh. 106*b*). Not until Seth exclaimed: "Wait until the day of judgment!" or, "Stop! If not, thou wilt be brought to judgment before God" (both readings based on עד) did the animal let him go. However, the mission of Seth was in vain, for the angel Michael, to whom God had given the control over the human body—for he it was who had gathered the dust for Adam's creation (Midr. Konen, in "B. H." ii. 27), told him that his father's life was at an end, and his soul would depart from him within the course of a week.

Funeral of Adam.

Three days after the death of Adam (Gen. R. vii), which took place, as in the case of Moses and Aaron, in the presence of many angels and even in the presence of the Lord, his soul was handed over by God to Michael, who assigned it an abode in the third heaven (Ḥag. 12*b*) until the day of resurrection. The body was interred with exceptional honors; the four archangels, Michael, Gabriel, Uriel, and Raphael (in the exact order of enumeration given by the Haggadah; see Kohut, "Angelologie," p. 25), buried it in the neighborhood of paradise, the precise spot being (Pirḳe R. El. xii. and xx.) Hebron near Jerusalem; for the site of the altar in the Temple, whence the dust of Adam was taken, is the gate to paradise.

A few days after the interment of Adam by the *virtutes*, Eve felt that her end was approaching. She called her children together and ordered them to write down the names of the first two human beings on two slabs of clay and stone, for she had learned from Michael that God had decided to bring a flood and a destructive fire over the earth and that only these slabs would escape destruction (Josephus, "Ant." i. 2, § 3). Eve passed away after a lapse of six days—that is, after the mourning week of Adam—as the שבעה (*shib'ah*) may consist, according to Talmudic law, of six days only and a few moments of the seventh day (M. Ḳ. 19*b*). Eve was buried by the angels at the side of Adam, and the angels instructed Seth not to mourn more than six days, and to rest and rejoice on the seventh day, for on that same day God and the angels would receive in gladness the soul which is lifted above all earthly matter (Sanh. 65*b*), and, moreover, rest upon the seventh day was to be the symbol of the resurrection in future ages יום שכולו שבת (Sanh. 97*a*).

The reconstruction of the Jewish Book of Adam here attempted may be hypothetical in some points, for neither the Apoc. Mosis nor the Vita can be considered to represent a true copy of the original. But it makes clear that these two apocryphas are based on the Hebrew or Aramaic Book of Adam and that the latter belongs to the midrashic literature, as many of its allusions can only be explained by the Midrash. The legends of Adam with which rabbinical literature abounds seem to point to the same source. Thus the statement in Abot de-Rabbi Nathan (i. 6, ed. Shechter) that Eve always addressed Adam as "lord" is apparently not intelligible, until compared with the Vita and the Slavonic Book of Adam, both of which contain similar statements, which, therefore, must have existed in the original, from which they both drew independently of each other. With regard to the alleged Christian elements and reminiscences of the New Testament in the Apoc. Mosis and Vita they will be sufficiently characterized by the following examples: Apoc. Mosis, iii., "Child of Wrath," is based on a haggadic etymology of the name Cain, and has nothing to do with Eph. ii. 3; and Apoc. Mosis, xix., "Lust is the beginning of all sin," is thoroughly Jewish (see above), and need not therefore have been taken from such a source as James, i. 15. This, moreover, is the case with all the other alleged Christian passages in the Apoc. Mosis, which would prove nothing, even if they were of Christian origin; for it can not be surprising to find Christian allusions in the language of a book so widely read among Christians as the Apocrypha. Even passages where one would expect that a Christian editor or compiler would interject Christological notions are quite free from them; all of which tends to show that neither the Apoc. Mosis nor the Vita was in any way tampered with by Christian writers.

ADAM ("Red"): City near the Jordan. In Josh. iii. 16, Adam is described as the city "that is beside

Zaretan," on the Jordan, near the spot where the Israelites crossed the river on dry ground. It is probably to be identified with the modern Tel Damieh.
G. B. L.

Philo.

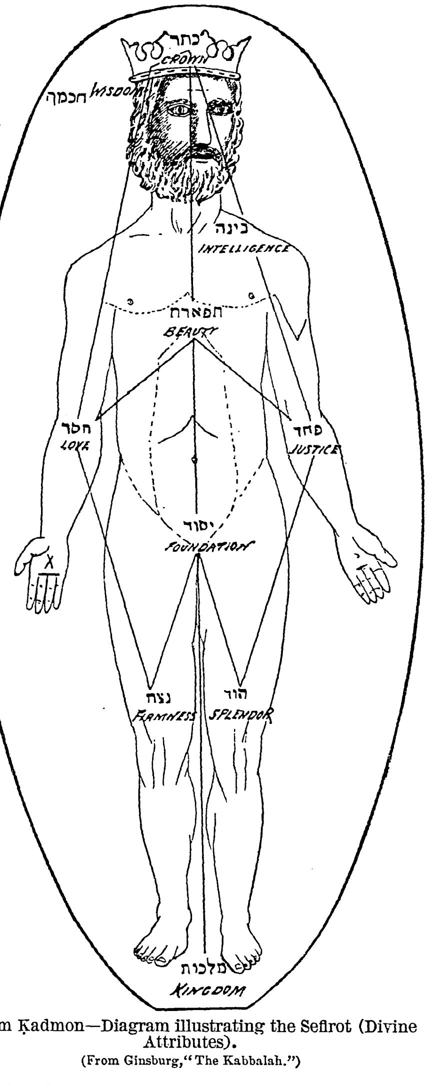
ADAM ḲADMON (more correctly, **ḲADMONI***—*Adam*, Hebrew for "man"; *Ḳadmon* or *Ḳadmoni*, "first" or "original"): The various philosophical (Gnostic) views concerning the original man are, in spite of their differences, intimately related, being a compound of Oriental mythology, Greek philosophy, and rabbinical theology. The first to use the expression "original man," or "heavenly man," is Philo, in whose view the *γενικός*, or *οὐράνιος ἄνθρωπος*, "as being born in the image of God, has no participation in any corruptible or earthlike essence; whereas the earthly man is made of loose material, called a lump of clay" ("De Allegoriis Legum," I. xii.). The heavenly man, as the perfect image of the Logos, is neither man nor woman, but an incorporeal intelligence purely an idea; while the earthly man, who was created by God later, is perceptible to the senses and partakes of earthly qualities ("De Mundi Opificio," i. 46). Philo is evidently combining Midrash and philosophy, Plato and the rabbis. Setting out from the duplicate Biblical account of Adam, who was formed in the image of God (Gen. i. 27), and of the first man, whose body God formed from the earth (Gen. ii. 7), he combines with it the Platonic doctrine of ideas; taking the primordial Adam as the idea, and the created man of flesh and blood as the "image." That Philo's philosophic views are grounded on the Midrash, and not vice versa, is evident from his seemingly senseless statement that the "heavenly man," the *οὐράνιος ἄνθρωπος* (who is merely an idea), is "neither man nor woman." This doctrine, however, becomes quite intelligible in view of the following ancient Midrash. The remarkable contradiction between the two above-quoted passages of Genesis could not escape the attention of the Pharisees, to whom the Bible was a subject of close study. In explaining the various views concerning Eve's creation, they taught ('Er. 18*a*, Gen. R. viii.) that Adam was created as a man-woman (*androgynos*), explaining זכר ונקבה (Gen. i. 27) as "male and female" instead of "man and woman," and that the separation of the sexes arose from the subsequent operation upon Adam's body, as related in the Scripture. This explains Philo's statement that the original man was neither man nor woman.

Midrash.

This doctrine concerning the Logos, as also that of man made "in the likeness" ("De Confusione Linguarum," xxviii.), though tinged with true Philonic coloring, is also based on the theology of the Pharisees. For in an old Midrash (Gen. R. viii. 1) it is remarked: "'Thou hast formed me behind and before' (Ps. cxxxix. 5) is to be explained 'before the first and after the last day of Creation.' For it is said, 'And the spirit of God moved upon the face of the waters,' meaning the spirit of the Messiah [" the spirit of Adam " in the parallel passage, Midr. Teh. to cxxxix. 5; both readings are essentially the same], of whom it is said (Isa. xi. 2), 'And the spirit of the Lord shall rest upon him.'" This contains the kernel of Philo's philosophical doctrine of the creation of the original man. He calls him the idea of the earthly Adam, while with the rabbis the רוח (spirit of Adam) not only existed before the creation of the earthly Adam, but was preexistent to the whole of creation. From the preexisting Adam, or Messiah, to the Logos is merely a step.

Paul.

The above-quoted Midrash is even of greater importance for the understanding of the Pauline Christology, as affording the key to Paul's doctrine of the first and second Adam. The main passage in Pauline Christology is I Cor. xv. 45–50. According to this there is a double form of man's existence; for God created a heavenly Adam in the spiritual world and an earthly one of clay for the material world. The earthly Adam came first into view, although created last. The first Adam was of flesh and blood and therefore subject to death—merely "a living soul"; the second Adam was "a life-giving spirit"—a spirit whose body, like the heavenly beings in general, was only of a spiritual nature. The apparently insuperable difficulty of the Pauline Christology which confronts the expounders of the New Testament (see, for instance, Holtzmann, "Lehrbuch der Neu-Testamentlichen Theologie," ii. 75 *et seq.*) disappears entirely when reference is made to the Midrash. As a pupil of



Adam Ḳadmon—Diagram illustrating the Sefirot (Divine Attributes).
(From Ginsburg, "The Kabbalah.")

---

* The oldest rabbinical source for the term "Adam ha-Ḳadmoni" is Num. R. x., where Adam is styled, not as usually, "Ha-Rishon" (the first), but "Ha-Ḳadmoni" (the original). Compare the very ancient expression "*naḥash ha-ḳadmoni*" (the original serpent, the devil).

Gamaliel, Paul simply operates with conceptions familiar to the Palestinian theologians. Messiah, as the Midrash remarks, is, on the one hand, the first Adam, the original man who existed before Creation, his spirit being already present. On the other hand, he is also the second Adam in so far as his bodily appearance followed the Creation, and inasmuch as, according to the flesh, he is of the posterity of Adam. Paul, therefore, is not dependent upon Philo for his Christology, as most scholars hold; indeed, he differs from him on most essential points. With Philo the original man is an idea; with Paul he is the personality of Jesus. With Philo the first man is the original man; Paul identifies the original man with the second Adam. The Christian apostle evidently drew upon the Palestinian theology of his day; but it can not be denied that in ancient times this theology was indebted to the Alexandrians for many of its ideas, and probably among them for that of preexistence. The Midrash thus considered affords a suitable transition to the Gnostic theories of the original man.

The Clementines.

It has been said that the Midrash already speaks of the spirit (πνεῦμα) of the first Adam or of the Messiah without, however, absolutely identifying Adam and Messiah. This identification could only be made by persons who regarded only the spirit of the Scripture (meaning, of course, their conception of it) and not the letter as binding; who lived in a medium more exposed to the heathen mythology than that of the rabbinical schools. In such circles originated the Clementine "Homilies" and "Recognitions," in which the doctrine of the original man (called also in the Clementine writings "the true prophet") is of prime importance. It is quite certain that this doctrine is of Judæo-Christian origin. The identity of Adam and Jesus seems to have been taught in the original form of the Clementine writings. The "Homilies" distinctly assert:

> "If any one do not allow the man fashioned by the hands of God to have the holy spirit of Christ, is he not guilty of the greatest impiety in allowing another, born of an impure stock, to have it? But he would act most piously if he should say that He alone has it who has changed His form and His name from the beginning of the world, and so appeared again and again in the world until, coming to his own times, . . . He shall enjoy rest forever" ("Hom." iii. 20).

The "Recognitions" also lay stress upon the identity of Adam and Jesus; for in the passage (i. 45) wherein it is mysteriously hinted that Adam was anointed with the eternal oil, the meaning can only be that Adam is the anointed (משיח). If other passages in the "Recognitions" seem to contradict this identification they only serve to show how vacillating the work is in reference to the doctrine of the original man. This conception is expressed in true Philonic and Platonic fashion in i. 18, where it is declared that the "interna species" (ἰδέα) of man had its existence earlier. The original man of the Clementines is, therefore, simply a product of three elements, namely, Jewish theology, Platonic-Philonic philosophy, and Oriental theosophy; and this fact serves to explain their obscurity of expression on the subject.

In close relationship to the Clementine writings stand the Bible translator Symmachus and the Jewish-Christian sect to which he belonged. Victorinus Rhetor ("Ad Gal." i. 19; Migne, "Patr. Lat." viii. col. 1155) states that "The Symmachiani teach 'Eum—Christum—Adam esse et esse animam generalem.'" The Jewish-Christian sect of the Elcesaites also taught (about the year 100) that Jesus appeared on earth in changing human forms, and that He will reappear (Hippolytus, "Philosophoumena," x. 25). That by these "changing human forms" are to be understood the appearances of Adam and the patriarchs is pointed out by Epiphanius ("Adversus Hæreses," xxx. 3), according to whom the Jewish-Christian sects of Sampsæans, Ossenes, Nazarenes, and Ebionites adopted the doctrine of the Elcesaites that Jesus and Adam are identical.

Other Gnostic Systems.

Manicheism.

A portion of these Gnostic teachings, when combined with Persian and old Babylonian mythology, furnished Manes, or Mani, with his particular doctrine of the original man. He even retains the Jewish designations "Insan Kadim" (= אדם קדמון) and "Iblis Kadim" (= נחש קדמון), as may be seen in the Fihrist. But, according to Manes, the original man is fundamentally distinct from the first father of the human race. He is a creation of the King of Light, and is therefore endowed with five elements of the kingdom of light; whereas Adam really owes his existence to the kingdom of darkness, and only escapes belonging altogether to the number of demons through the fact that he bears the likeness of the original man in the elements of light concentered in him. The Gnostic doctrine of the identity of Adam, as the original man, with the Messiah appears in Manes in his teaching of the "Redeeming Christ," who has His abode in the sun and moon, but is (as Kessler, in Herzog's "Realencyclopädie für Protestant. Theologie," 2 ed. ix. 247, has pointed out) identical with the original man. It also appears in this theory that Adam was the first of the sevenfold series of true prophets, comprising Adam, Seth, Noah, Abraham, Zoroaster, Buddha, and Jesus. The stepping-stone from the Gnostic original man to Manicheism was probably the older Mandæan conception, which may have exercised great influence. Of this conception, however, there remains in the later Mandæan writings little more than the expression "Gabra Ḳadmaya" (=Adam Ḳadmon; Kolasta, i. 11).

Mohammedan Sects.

The relation of the Mohammedan sects to Jewish Gnosticism in their teachings concerning the incarnation of the Divine Being is very uncertain. It is only known that their theories contain more Gnostic than Buddhist elements; and in this connection it was probably not by mere accident that the founder of one of their sects, Abdallah ibn Saba (652), was a Jewish apostate. Their Gnostic character plainly appeared a century later (765), when Abdallah's views were systematized by the Ismailians. Their doctrine was then stated as follows: "God has effected seven successive incarnations of His being, in the shape of prophets whom He sent into the world; and these were Adam, Noah, Abraham, Moses, Jesus, Mohammed, and the Mahdi" (August Müller, "Der Islam," i. 588). It is not difficult to discern herein the Clementine theory of the sevenfold prophetic chain beginning with Adam and ending with the Messiah (Mahdi).

The Druses.

A further development of the Mohammedan doctrine is that of Darosi, whose adherents, under the name of Druses, form at the present day an independent community, religiously as well as politically. Darosi in 1017 publicly preached in the mosques that Adam's soul had passed into Ali, his son-in-law, and from him to the Fatimides (Müller, *ib.* i. 632). It is interesting to note that the identification, partial or complete, of Adam (the original man) with the Savior of man is universal, however varying the conception of the Messiah-Mahdi may be.

Akiba.

For practical reasons the consideration of the subject of Adam Ḳadmon in the Cabala has been reserved for the end of this article. Before discussing the subject it will be well to revert to the ancient rabbinical sources already referred to. There is a fundamental theosophical statement by Akiba in the Talmud relative to this topic to which no reference has yet been made. He says, in Abot, iii. 14, "How favored is man, seeing that he was created in the image! as it is said, 'For in the image, אלהים made man'" (Gen. ix. 6). That "in the image" does not mean "in the image of God" needs no proof; for in no language can "image" be substituted for "image of God." There is, moreover, another difficulty in this passage: the verse quoted is not that of Gen. i. 27, wherein the creation of man in the image of God is primarily stated. Gen. ix. 6 treats only secondarily of man's creation. The selection of a secondary quotation in support is not a little surprising to those familiar with the usual rabbinical mode of quotation. In point of fact Akiba does not speak only of the image (צלם) according to which man was created, but also of the likeness (דמות; Gen. R. xxxiv. 14). בצלם really has no other signification than "after the image." Akiba, who steadfastly denies any resemblance between God and other beings—even the highest type of angels—teaches that man was created after an image—that is, an archetype—or, in philosophical phrase, after an ideal, and thus interprets Gen. ix. 6, "after an image God created man," an interpretation quite impossible in Gen. i. 27. Compare the benediction in Ket. 8*a*, בצלמו בצלם דמות תבניתו, wherein God is blessed because "He made man in His image [בצלמו], in the image of a form created by Him." The concluding explanatory words of this benediction intimate, in Akiba's style, that Adam was created after the image of a God-created type (תבנית).

Zohar.

Closely related to the Philonic doctrine of the heavenly Adam is the Adam Ḳadmon (called also Adam 'Ilaya, the "High Man," the "Heavenly Man") of the Zohar, whose conception of the original man can be deduced from the following two passages: "The form of man is the image of everything that is above [in heaven] and below [upon earth]; therefore did the Holy Ancient [God] select it for His own form" (Idra R. 141*b*). As with Philo the Logos is the original image of man, or the original man, so in the Zohar the heavenly man is the embodiment of all divine manifestations: the Ten Sefirot, the original image of man. The heavenly Adam, stepping forth out of the highest original darkness, created the earthly Adam (Zohar, ii. 70*b*). In other words, the activity of the Original Essence manifested itself in the creation of man, who at the same time is the image of the Heavenly Man and of the universe (Zohar, ii. 48), just as with Plato and Philo the idea of man, as microcosm, embraces the idea of the universe or macrocosm.

Luria.

The conception of Adam Ḳadmon becomes an important factor in the later Cabala of Luria. Adam Ḳadmon is with him no longer the concentrated manifestation of the Sefirot, but a mediator between the En-Sof ("Infinite") and the Sefirot. The En-Sof, according to Luria, is so utterly incomprehensible that the older cabalistic doctrine of the manifestation of the En-Sof in the Sefirot must be abandoned. Hence he teaches that only the Adam Ḳadmon, who arose in the way of self-limitation by the En-Sof, can be said to manifest himself in the Sefirot. This theory of Luria's, which is treated by Ḥayyim Vital in "'Eẓ Ḥayyim; Derush 'Agulim we-Yosher" (Treatise on Circles and the Straight Line), leads, if consistently carried out, to the Philonic Logos.

L. G.

ADAMAH ("Red Land"): Fortified city of Naphtali, northwest of the Sea of Galilee (Josh. xix. 36); identified by Conder with modern 'Admah, north of Beth-shean. G. B. L.

ADAMANT: This term occurs three times in the Old Testament (Ezek. iii. 9, Zech. vi. 12, Jer. xvii. 1), and is used as a translation for *shamir*. Although no definite idea can be gathered concerning the identity of the substance intended from these passages, it is possible to determine its nature and the uses to which it was put. A very hard substance is clearly indicated in all the passages, and in Jer. xvii. 1 it is compared with the engraver's tool of iron. In the two other passages it is used figuratively to express an unyielding, stubborn, and defiant spirit. The diamond can not be meant by Jer. xvii. 1, for the diamond was not used for engraving by the ancients, and indeed it is doubtful whether the diamond in its polished form was known to them. The substance used for engraving was corundum (Petrie, "Pyramids and Temples of Gizeh," p. 173), and this is probably intended by the "adamant" of the Bible. The reading "adamant" in Ecclus. xvi. 16 is evidently wrong. It does not give any intelligible meaning, and in the manuscript discovered by Schechter, the Hebrew reads "for the sons of man" ("Wisdom of Ben Sira," ed. Schechter and Taylor, 1899, p. 10, text). The Talmud, explains Shamir as a miraculous worm that was used in engraving the stones on the breastplate of the high priest, and according to a widespread legend which became known to the Arabs, Solomon was assisted by this worm in the building of the Temple (Soṭah, 24*b*, 48*b*).

G. B. L.

ADAMANTIUS: Jewish physician, author, and naturalist (*ἰατρικῶν λόγων σοφιστής*; see Socrates, "Hist. Eccl." vii. 13); lived in Alexandria in the fourth century. He prepared an abridgment, in two volumes, of the *Φυσιογνωμικά*, a work on physiognomy, written by Polemon the rhetor, who is supposed to have lived in the time of Hadrian. Of this work an Arabic version in manuscript exists in the University Library at Leyden. He dedicated his abridgment to the emperor Constantius. The various editions of this work are "Adamantii Sophistæ Physiognomica," in Greek, Paris, 1540; "Adamantii Sophistæ Physiognomicon, id est de Naturæ Indiciis Cognoscendis Libri Duo," in Greek and Latin, Basel, 1544; in Greek, together with the works of Ælian, Polemon, and others, Rome, 1545. An uncritical edition in Greek and Latin was published by I. G. Franz under the title "Scriptores Physiognomiæ Veteres," Altenburg, 1780. Another work by Adamantius, "On the Winds" (Περὶ 'Ανέμων), was published by V. Rose, in "Anecdota Græca," i. 29. Two quotations from this are known, one cited by Ætius, a physician of Amida (see Photius, "Bibliotheca," cod. 221, iii. 163), *Περὶ 'Ανέμων, 'Αδαμαντίου Σοφιστοῦ*, ed. I. Hirschberg, Leipsic, 1899, and one in the late Byzantine period by Joannes Diaconus Galenus. Adamantius himself declares that in this work he followed more the method of the "Physiognomica" of Aristotle than any other, an important fact for the textual criticism of the works both of Aristotle and of Adamantius. Adamantius was also a naturalist; medicaments introduced by him are mentioned by Oribasius, who compiled a medical work during the reign of the emperor Julian.

S. Kr.

ADAM-SALOMON, ANTONY SAMUEL: French sculptor; born at La Ferté-sous-Jouarre, in the department of Seine-et-Marne, France, 1818; died in Paris, April 29, 1881. Adam-Salomon was intended for a mercantile career, which he followed for some time at Fontainebleau; but he afterward entered the factory of Jacob Petit as modeler, a calling for which he had shown talent in his youth. He was sent by the authorities of his department with a scholarship to Paris, where he studied sculpture thoroughly; and then, to perfect himself in his art, he traveled in Switzerland and England. The bust of Béranger which he produced at once established his reputation, and was repeatedly copied. It is said that, as the poet declined to sit for him, he modeled the features from memory. Adam-Salomon exhibited twice in the Salon, under the pseudonym of "Adama" (1844 and 1848).

His other productions included medallions of Copernicus and of Amyot, busts of Rossini, Delphine Gay, George Sand, Lamartine, Halévy, Garnier-Pagès, and others. Lamartine had a special esteem for Adam-Salomon; and the sculptor, after the death of the poet, took a cast of his head. He also made a medallion of Marchand Ennery, chief rabbi of France. Besides these works his bas-relief of Charlotte Corday and the tomb of the duke of Padua are worthy of mention.

Adam-Salomon.

Toward the end of his career, Adam-Salomon devoted himself to photography, and assisted in the development of this art. In 1850 he married Mlle. Georgine Cornélie Coutellier, a fellow artist, of Christian birth, who embraced the Hebrew faith and remained true to it till her death in 1878. The remains of Adam-Salomon rest in Fontainebleau.

J. W.

ADAMS, HANNAH: American author of a Jewish history; born at Medfield, near Boston, in 1755 or 1756; died at Brookline, Mass., November 15, 1832; one of the earliest women writers of America. She acquired the rudiments of Greek, Latin, and Hebrew from some university students boarding with her father who encouraged her religious and historical studies. She wrote extensively on topics connected with her favorite studies, and though her writings brought her little pecuniary profit, they secured her many distinguished friends, among them the Abbé Grégoire, with whom she carried on a correspondence that formed the nucleus for her "History of the Jews." Among her various works are "A View of Religious Opinions" (1784), of which several American and English editions appeared, the fourth edition under the title "Dictionary of Religions"; "History of New England" (1799); "Evidences of Christianity" (1801); an "Autobiography," and the "History of the Jews from the Destruction of Jerusalem to the Present Time" (Boston, 1812; London, 1818). The last work became popular in Europe and America, and a German edition was printed in two volumes at Leipsic in 1819-20. This history of the Jews after Biblical times was the first issued in America, and it contains, among other interesting features, a great deal of information about the Jews of America that was reproduced by Jost. It is based chiefly on the works of Grégoire, Basnage, Buchanan, and others.

G. A. K.

ADAMS, JOHN: Second president of the United States; born at Braintree, Mass., Oct. 19 (old style), 1735; died at Quincy, Mass., July 4, 1826. In the later years of his life he devoted much time and thought to the consideration of the history of religions. Upon this subject he carried on an extensive correspondence with Jefferson, in which he exhibited an intimate knowledge of Jewish history and of the contributions of the Jews to the civilization of the world. In expressing his opinion in February, 1809, he wrote ("Works of John Adams," ix. 609, 610):

> ". . . In spite of Bolingbroke and Voltaire, I will insist that the Hebrews have done more to civilize men than any other nation. If I were an atheist, and believed in blind eternal fate, I should still believe that fate had ordained the Jews to be the most essential instrument for civilizing nations. If I were an atheist of the other sect, who believe, or pretend to believe, that all is ordered by chance, I should believe that chance had ordered the Jews to preserve and propagate to all mankind the doctrine of a supreme, intelligent, wise, almighty Sovereign of the universe, which I believe to be the great essential principle of all morality, and consequently of all civilization. I can not say that I love the Jews very much, nor the French, nor the English, nor the Romans, nor the Greeks. We must love all nations as well as we can, but it is very hard to love most of them."

In 1818 he expressed himself similarly in a letter to Mordecai M. Noah (see Noah, "Travels in England, France, Spain," etc., appendix, p. xxvi.).

H. Fr.

ADAR (R. V., **ADDAR**): **1.** A Benjamite, son of Bela (I Chron. viii. 3). **2.** A border town of Judah (Josh. xv. 3).

G. B. L.

ADAR (Assyrian, **Ad-da-ru**): The twelfth ecclesiastical and sixth civil month (Esth. iii. 7, ix. 1; Ezra, vi. 15). It has usually twenty-nine days, of which the following have been set apart for commemoration: The seventh day is observed as the anniversary of the death of Moses. The ninth of Adar was made a fast-day, because, says the Megillat Ta'anit, the Hillelites and Shammaites strongly opposed each other on the seventh of Adar (compare Shab. 17*a*). The thirteenth day was originally a festival, called Nicanor Day, commemorating the death of Nicanor (see Adarsa), the Syrian general in the Maccabean war, who aroused the indignation of the people by his insulting language concerning the sanctuary (II Macc. xv. 36; Ta'anit, 18*b*; Megillat Ta'anit). Subsequently the thirteenth of the month was made a day of fasting in memory of Esther's fast (Esth. iv. 16), and it was called the Fast of Esther. It was the preparatory day to the festival of Purim, celebrated on the fourteenth day, and in Shushan also on the fifteenth day. At present Adar coincides approximately with March.

K.

ADAR, THE SEVENTH OF: According to tradition or calculation (compare Deut. xxxiv. 8 and Josh. i. 11, iii. 2, iv. 19), the anniversary of the death of Moses (Megillat Ta'anit, last chapter). Josephus ("Ant." iv. 8, § 49) gives the first day of Adar as the day of Moses' death. The day is mentioned with the rest of the ancient fast-days in "Ṭur Oraḥ Ḥayyim," § 580, and "Kol Bo," but Joseph Caro in his commentary states that he has no knowledge of any of them being observed by the people. In the seventeenth century in Turkey and Italy, and later in northern Europe as well, it became customary for pious Jews to observe the day as a fast-day and to read portions from the Midrash relating to the life and death of Moses, arranged in a special *tiḳḳun* by Samuel Aboab, rabbi of Venice. K.

ADAR SHENI (WEADAR): The Second, or intercalary, Adar, the thirteenth month of a Jewish embolismic year; it has twenty-nine days and the first Adar has then thirty. Purim is celebrated on the fourteenth of this later month of Adar in embolismic years. An anniversary of a death (*Jahrzeit*) that has occurred in Adar Sheni is observed in that month in an embolismic year, but otherwise in the first Adar. See Calendar. K.

ADARBI, ISAAC BEN SAMUEL: A casuist and preacher of the Shalom Congregation of Salonica; lived in the sixteenth century. He was the pupil of Joseph Taitazak and the schoolmate of Samuel di Medina (מהרשד"ם). Adarbi wrote: (1) "Dibre Ribot" (Polemics), consisting of four hundred and thirty responsa, which are interspersed with keen discussions on halakic problems occurring in the Talmud and its commentaries (Salonica, 1581; Venice, 1587; Sudilkov, 1833); (2) "Dibre Shalom" (Words of Peace), containing thirty sermons preached on various occasions, as well as homiletic commentaries on the weekly lessons of the Pentateuch (Salonica, 1585). In these sermons he often reproduces observations made by his teacher Taitazak. A second edition was published by Eliezer ben Shabbethai, who added an index of the Biblical passages dealt with and some notes (Venice, 1586; *ibid.* 1587).

Bibliography: Conforte, *Ḳore ha-Dorot*, ed. Cassel, p. 38 (see index); Steinschneider, *Cat. Bodl.* col. 1083; Benjacob, *Oẓar ha-Sefarim*, p. 106.

M. B.

ADARSA (called also **Adasa**): A village in Judea, thirty furlongs from Beth-horon, and a three days' march from Gazera. Eusebius ("Onomasticon," *s.v.*) describes it as being near Guphna. Under the name of Adasa it is mentioned in I Macc. vii. 40, and in Josephus, "Ant." xii. 10, § 5, as the scene of the decisive battle between Judas Maccabeus and the Syrian general Nicanor, which took place on Adar 13, 160 B.C., and in which the latter was vanquished. Although the former had only 3,000 men (I Macc.), or according to Josephus (*l.c.*) only 1,000, while his enemy commanded 9,000, Nicanor, who fell in the battle, was vanquished. His defeat occurred on the day before Mardocheus' (Mordecai's) Day, that is, the Thirteenth of Adar, the day before Purim. In commemoration an annual festival called Nicanor's Day was instituted (I Macc. vii. 49; II Macc. xv. 36). According to the Talmud (Yer. Meg. ii. 66*a* and Megillat Ta'anit, xii.) it was a semi-festival. F. de S. M.

ADAVI, MOSES BEN SAMUEL: A Talmudic scholar and author, who flourished in Tunis about the middle of the eighteenth century. He was a pupil of Isaac Lumbroso and Abraham Ḥayat. Adavi was the author of novellæ and collectanea to several treatises of the Babylonian Talmud and to the "Yad ha-Ḥazaḳah" of Maimonides, which were published in book form at the expense of the sons of Samuel Nataf at Leghorn (1759), and which for that reason bear the title "Bene Shemuel" (Sons of Samuel). This was the first work published by a Tunisian Jew.

Bibliography: Zedner, *Cat. Hebr. Books Brit. Mus.* p. 38; Cazès, *Notes sur les Israélites Tunisiens*, p. 152.

M. K.

ADBEEL: A name found in the genealogical list of the sons of Ishmael, in Gen. xxv. 13, and in the corresponding list of I Chron. i. 29.

G. B. L.

ADDA: The name of two amoraim, neither of whom had a distinguishing patronymic or cognomen. The elder was a Palestinian, and lived in the first generation (third century). He was a colleague of R. Jonathan (Yer. Ter. x. 47*b*). The younger was a disciple of Raba, and a contemporary of R. Ashi (Men. 43*a*, 59*b*). S. M.

ADDA B. ABIMI (BIMI): A Palestinian amora of the fourth generation, disciple of R. Ḥanina b. Pappi, and contemporary of R. Hezekiah. It is surmised that his patronymic Abimi was changed into Ukmi or Ikkuma, that is, "the Dark," because his memory was not retentive enough to guard him against the misquoting of traditions (Yer. Ber. ix. 14*a*; Yer. Ta'anit, iii. 64*b*; 'Er. 9*b*, 12*a*; Beẓah, 26*b*).

S. M.

ADDA B. AHABAH (AḤWAH): 1. A Babylonian amora of the second generation (third and fourth centuries), frequently quoted in both the Jerusalem and the Babylonian Talmud. He is said to have been born on the day that Rabbi (Judah I.) died (Ḳid·72*a*, *b*; Gen. R. lviii; see Abba Hoshaya). He was one of the disciples of Abba Arika (Rab), at whose funeral he rent his garments twice in token of his mourning for the great scholar (Yer. B. Ḳ. ii. 3*a*; Ber. 42*b* *et seq.*). In Pumbedita R. Adda gathered about him a great many pupils, whom he taught sometimes in the public thoroughfares (Yeb. 110*b*). He lived to a very old age, and when interrogated on the merits that entitled him to be so favored of heaven, he gave the following sketch of his life and character:

> "No one has ever preceded me to the synagogue, nor has any one ever remained in the synagogue after my departure. I never walked as much as four cubits without meditating on the Law, and never thought of its contents at places not scrupulously clean. Nor did I prepare a bed for myself to enjoy regular sleep, nor did I disturb my colleagues by walking to my seat at college among them. I never nicknamed my neighbor nor rejoiced at his fall. Anger against my neighbor never went to bed with me, and I never passed the street near where my debtor lived: and while at home I never betrayed impatience, in order to observe what is said (Ps. ci. 2), 'I will walk within my house with a perfect heart'" (Yer. Ta'anit, iii. 67*a*; somewhat different in Babli, *ibid.* 20*b*).

Yet where sanctity of life and the glory of heaven were concerned, he lost his patience and risked much. Thus, on one occasion, when he observed on the street a woman named Matun dressed in a manner unbecoming a modest Jewess, he violently rebuked her. Unfortunately for him the woman was a Samaritan, and for the attack on her he was condemned to pay a fine of 400 zuz (about $60 actual value, or £12), and thereupon he repeated a popular saying, "*Matun, matun* [waiting, patience] is worth 400 zuz!" (Ber. 20*a*).

Such a character is generally surrounded by a halo of legend, and later ages supplied this. It is said that R. Adda's piety was so highly valued in the sight of heaven that no favor asked by him was ever refused.

Legends as to His Sanctity.

In times of drought, for example, when he pulled off but one shoe (preparatory to offering prayer), an abundance of rain descended; but if he pulled off the other, the world was flooded (Yer. Ta'anit, *l.c.*). Even his teacher, the famous Rab, realized Adda's protective influence. On one occasion when he and Samuel, accompanied by Adda, came to a tottering ruin, and Samuel proposed to avoid it by taking a circuitous route, Rab observed that just then there was no occasion for fear, since R. Adda b. Ahabah, whose merits were very great, was with them; consequently no accident would befall them. Samuel's great colleague R. Huna I. also believed in and availed himself of R. Adda's supposed miraculous influence with heaven. This rabbi had a lot of wine stored in a building that threatened to collapse. He was anxious to save his property, but there was danger of accident to the laborers. Therefore he invited Rab Adda into the building, and there engaged him in halakic discussions until the task of removing its contents was safely accomplished; hardly had the rabbis vacated the premises when the tottering walls fell (Ta'anit, 20*b*).

Of Rab Adda's numerous noteworthy observations on Biblical texts, the following may be quoted: "The man who is conscious of sin and confesses it, but does not turn away from it, is like the man who holds a defiling reptile in his hand; were he to bathe in all the waters of the world, the bath would not restore him to cleanness. Only when he drops it from his hand, and bathes in but forty seahs (= about 100 gallons) of water he is clean." This follows from the Biblical saying (Prov. xxviii. 13), "Whoso confesseth and forsaketh them shall have mercy"; and elsewhere it is said (Lam. iii. 41), "Let us lift up our heart as well as our hands unto God in the heavens" (Ta'anit, 16*a*; compare Tosef. *ibid.* i. 8).

2. A disciple of Raba, addressed by the latter as "my son." In a discussion the elder rabbi once rebuked him as devoid of understanding (Ta'anit, 8*a*; Yeb. 61*b*; Sanh. 81*a*, *b*). Subsequently he studied under R. Papa and waited on R. Naḥman b. Isaac (B. B. 22*a*; see version in Rabbinowicz, "Diḳduḳe Soferim," *ad loc.*, note 6; Ḥul. 133*b*, where some manuscripts read "bar Ḥana" or "Ḥanah"). S. M.

ADDA OF CÆSAREA (KISRIN): A disciple of R. Johanan, and a teacher in the third amoraic generation. Because of his cognomen he is erroneously supposed to have been the son of R. Abbahu of Cæsarea (Abbahu II.; Yer. Ber. 4, 8*c*; Yer. M. Ḳ. iii 82*c*; Bab. *ibid.* 20*b*). S. M.

ADDA, CALENDAR OF. See CALENDAR.

ADDA B. ḤUNYA: The homiletic observation on Eccl. i. 4 ("One generation passeth away, and another generation cometh: but the earth abideth forever") has thus been transmitted by him: "Consider the present generation as good as the generation that is passed and gone. Say not, 'Were R. Akiba living, I would study the Bible under him; were R. Zerah and R. Johanan living, I would read Mishnah before them.' But consider the generation that has arisen in thy days, and the wise men of thy time, as good as the previous generations and as the earlier wise men that have been before thee" (Eccl. R. *ad loc.*; compare Midr. Sam. § 15). S. M.

ADDA B. MATNA: A Babylonian amora of the fourth century, disciple of Abaye and of Raba. He appears to have obtained some halakic information from Rabina I., and in his later years to have associated with Rabina II. To satisfy his thirst for knowledge, he felt obliged to leave his home, and when his wife asked, "What will thy little ones do?" he laconically replied, "Are the water-plants in the marshes all gone?" (Shab. 48*a*; Ket. 28*a*, 77*b*, 85*a*; Shebu. 18*a*; Meg. 28*b*; 'Er. 22*a*).

S. M.

ADDA, MESHOḤAAH (משוחאה "Surveyor"): A disciple of R. Judah b. Ezekiel, who instructed Raba how to measure city limits for the regulation of Sabbath walks ('Er. 56*b*, B. M. 107*b*). S. M.

ADDA B. MINYOMI: A Babylonian amora of the third century, junior contemporary of Rabina I. and of Huna Mar b. Iddi. He is sometimes quoted anonymously as "The Court of Nehardea" (B. Ḳ. 31*b*, Ḥul. 49*a*, Sanh. 17*b*). S. M.

ADDA B. SIMON: A Palestinian amora, who is known chiefly for ethical rules quoted in the name of his predecessors (Yer. Ber. ii. 4*d*; Yer. Meg. 1, 71*c*; Eccl. R. iv. 17). S. M.

ADDAN: A city of Babylonia, some of the inhabitants of which migrated with the Jews under Zerubbabel, but were unable to prove their Israelitish descent (Ezra, ii. 59). In the corresponding list of Neh. vii. 61, the place is called **Addon.** I Esd. v. 36 has **Charaathalan** which is probably due to a running together of the words Cherub and Addan.

G. B. L.

ADDER (שפיפון): Reptile mentioned only in Gen. xlix. 17. It is the modern Arabic *shiphon*, a horned sand-snake, or *Cerastes haselquistii* (Hart, "Animals of the Bible," pp. 13, 14). This viper, which is only about a foot long and of a grayish tint, lurks in ruts and footprints, and bites with deadly effect man or beast that passes by. It is found in Africa, where it appears in great variety and in large numbers. See SERPENT. I. M. P.

ADDIR HU (אדיר הוא): A hymn in the Seder, the home service for Passover eve, and so called from its initial words, but also known by its refrain of "Bimherah" (Speedily). It is one of the latest constituents of the HAGGADAH, in which it does not appear much before the end of the fifteenth century. Originally, according to the Avignon Maḥzor, it was a hymn for the festivals generally. But a little later it was adopted as a pendant to the hymn "Addir bimlukah" or "KI LO NAEH," which was chanted on the first evening of Passover. Each hymn has a thought to the promised redemption of Israel. But while "Addir bimlukah" is rather a hymn in praise of the Omnipotence which alone can bring on the redemption of Israel, "Addir Hu" is more strictly a prayer to that Omnipotence to hasten it by the restoration of the ancient center of Israel's religious organization. Originally, therefore, the former was chanted on the opening night of the Passover, and the latter on the second. But with the accretive tendency often evident in the development of the Jewish liturgy, it became the custom, about two centuries ago, to chant both hymns on each occasion.

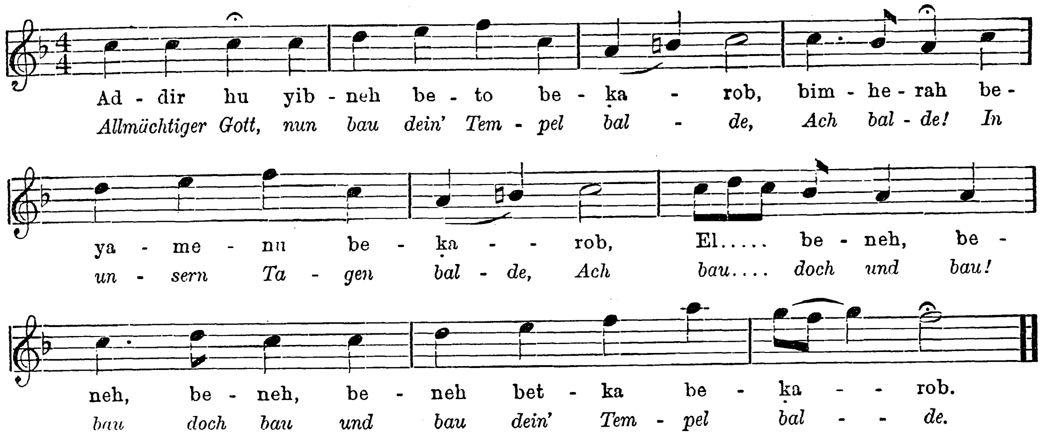
The verses of these hymns differ in the first words only, these being a series of adjectives bearing an alphabetical acrostic. After the initial letter א they are usually grouped three together, thus forming the second to eighth stanzas. A quaint Judæo-German version once had great vogue, and it is still in use. It runs, "Allmächtiger (Barmherziger, etc.) Gott, nun bau dein' Tempel schiere," and so on. This German version appears even in a Haggadah of the Spanish rite (Amsterdam, 1612).

Suitability of the Tune.

The tune seems to be the successful inspiration of a Jewish singer of the early part of the seventeenth century. It has succeeded beyond any other Hebrew melody in maintaining its position against all other airs for the words with which it is traditionally associated. The tune is first met with in the Hebrew, Latin, and German Haggadah published by J. S. Rittangel, electoral professor of Oriental languages at Königsberg, in 1644. He gives it, with a bass part to both Hebrew and German texts, as illustrated below (A). The melody was then of comparatively recent origin, and took a form which, translated into modern notation, is as follows.

A

ADDIR HU



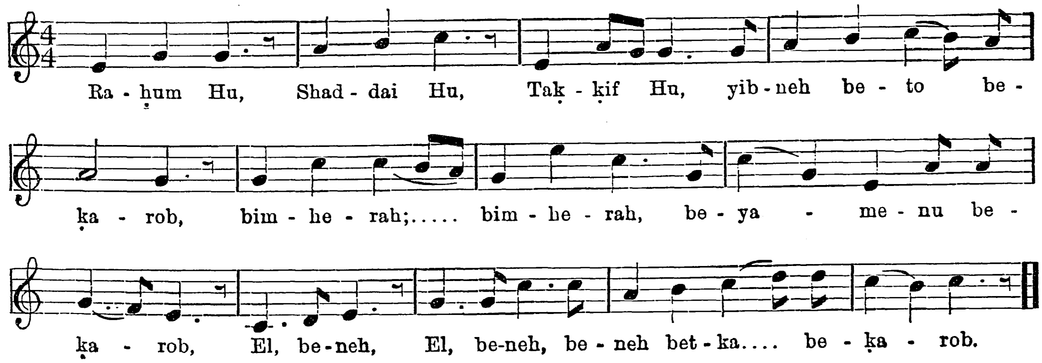
Ad - dir hu yib - neh be - to be - ka - rob, bim - he - rah be -
Allmächtiger Gott, nun bau dein' Tem - pel bal - de, Ach bal - de! In
ya - me - nu be - ka - - rob, El..... be - neh, be -
un - sern Ta - gen bal - de, Ach bau.... doch und bau!
neh, be - neh, be - neh bet - ka be - ka - - rob.
bau doch bau und bau dein' Tem - pel bal - - de.

Here, it will be seen, the melody is very simple, and little beyond speech-song suggested by the rhythm of the words (obviously according to the old German disregard of the stress-syllables) and their phrasing. The cadence itself is likewise but a conventional ending of familiar character. The modulation with the sharpened fourth is perhaps due not so much to the vocalist as to the transcriber. Altogether, the melody of 1644 has the character of a droning intonation rather than of a set melody. If taken by the father or other precentor of the family circle at an extreme pitch, as in Rittangel's transcription, the basses at the table would be tempted to sing "seconds," and would soon arrive at musical phrases nearer to some of the forms now customary. And this is, indeed, what happened: for in Gottfried Selig's "Der Jude," of 1769, just midway between Rittangel's days and ours, the melody is given almost precisely as it is now sung in North Germany. In this it illustrates the history of most Hebrew melodies, which thus gradually crystallized into a tuneful and definite shape, altogether congenial to the ears of the Jews who sang them, and transmitted them modified by the "personal equation" of each depositary of the tradition. The present melody (B), having become familiar to Jews accustomed in their every-day life to the Germanic folk-song, was easily reproduced by them in the family circle, where the ability would be wanting—among the children necessarily—to reproduce the more difficult intervals and ornaments of the synagogue plain-song. Hence it

Adapted for Family Song.

developed but little further; and although three or four variants exist of some of its phrases, they are not of essential importance, and, indeed, are often interchanged by the singer. Perhaps the version most widely followed is the following (set to the concluding stanza):

B



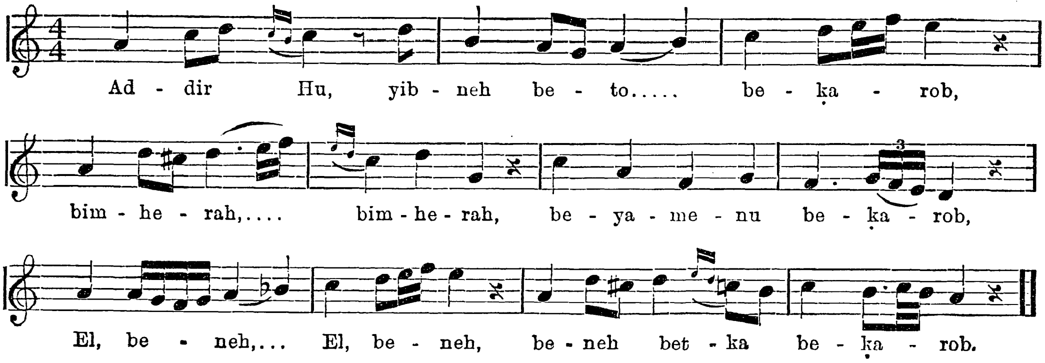
Ra - ḥum Hu, Shad - dai Hu, Taḳ - ḳif Hu, yib - neh be - to be -
ḳa - rob, bim - he - rah;..... bim - he - rah, be - ya - me - nu be -
ḳa - rob, El, be - neh, El, be - neh, be - neh bet - ka.... be - ḳa - rob.

The uniform employment of this melody, in contrast with the divergence of the tunes in use for each of the other Seder hymns, is also due to its selection as the "representative theme" (*niggun*) for the festival of Passover, inasmuch as it is an old custom to chant the responses in Ps. cxviii. to it. The custom, however, does not date back to Rittangel's day, since he tells us that these verses of the Hallel then had their own "very beautiful and delightful melody," which, unfortunately, he omitted to transcribe.

Its Wide Popularity.

The old German tune spread rapidly east and west, being still modified to suit the local ear at each stage of its journeying. It even reached Asia and Africa, where it came into the region of a musical system widely differing from that of its northern fatherland. Thus this melody was affected by the peculiarities of the Perso-Arab music, with its plaintive sadness, its frequent repetition of brief phrases, its tendency to ornamentation, and its undiatonic tonality. When, therefore, the orientalized form was chanted to E. Lubbert in Egypt about forty years ago, he did not readily recognize its descent from the "Addir Hu" of the north; but transmitted it to Fétis, the historian of music, simply as a melody "traditional in the synagogue at Alexandria." When, however, the version which is given above (C) is divested of the local coloring of the melody and shifting of the accent which would inevitably suggest themselves in the mouth of a Jewish cantor in Egypt, very little variation in essentials remains from the version either of old Königsberg or of modern New York.

C



Ad - dir Hu, yib - neh be - to..... be - ka - rob,
bim - he - rah,.... bim - he - rah, be - ya - me - nu be - ka - rob,
El, be - neh,... El, be - neh, be - neh bet - ka be - ka - rob.

F. L. C.

ADDISON, JOSEPH: English essayist; born at Milston, in England, May 1, 1672; died June 17, 1719. He has been fittingly characterized as "the chief architect of English public opinion in the eighteenth century." For this reason his attitude toward Jews and Judaism is of importance.

Attitude Toward the Jews.

By his writings he greatly influenced the public estimate of the Jews in respect to their social and economic status; and for a century after he wrote, legislation and judge-made law both emanated from the classes who read and enjoyed the writings of the chief author of the "Spectator." An examination of Addison's writings discloses at least five distinct references to Jews and Judaism, in all of which he shows a sympathetic attitude and a comparatively intimate knowledge of the subject, considering the circumstances of the day. (See the "Spectator," Nos. 405, 495, 531; "The Freeholder," No. 5, and passages in his "Dialogue on Medals.") The only one of these references to which special attention needs be given here is an essay that appeared in the "Spectator," No. 495, September 27, 1712, which is devoted wholly to the subject of the Jews. The other essays show his recognition of the debt that the English language owes to the Hebrew tongue for the idioms it has absorbed, the influence upon English custom and law of Jewish veneration for the name of God, and the prevalence of patriotism and love of country among the ancient Jews while they still had a country. No. 495 of the "Spectator" contains an interesting characterization of the Jews, and deals with their dissemination throughout the trading world, their numbers, their adherence to their religion, and the natural and providential reasons that may be assigned for these facts. The most interesting and significant passages in this essay are those dealing with the economic value of the Jews, resulting from their dispersion throughout the world. As to this fact, he says:

> "They are, indeed, so disseminated through all the trading parts of the world, that they are become the instruments by which the most distant nations converse with one another, and by which mankind are knit together in a general correspondence. They are like the pegs and nails in a great building, which, though they are but little valued in themselves, are absolutely necessary to keep the whole frame together."

Addison and Shakespeare.

It would be a serious error to regard Addison as merely echoing prevailing popular views of his time in these utterances. On the contrary, much stress must be laid here on Addison's kindly interest and sympathy, his knowledge of his subject, his curiosity concerning Jews and Judaism, his acquaintanceship with Jews, formed both at home and abroad, his information gained through the official channels of the state and colonial departments, and his indebtedness to his father, LANCELOT ADDISON, who published an appreciative volume on the Jews, a few years after his son's birth. When Addison's attitude toward the Jew is compared with that of Shakespeare in his "Merchant of Venice," one becomes impressed with the former's broad, as contrasted with the latter's seemingly narrow, point of view. That this liberal attitude was largely peculiar to Addison himself, even though it may have influenced English gentlefolk to the present day, becomes still more apparent from the fact that no such sympathetic treatment of the Jew as his appeared in English literature for approximately a century after Addison wrote.

Addison's reference to the Jews and international commerce is especially important, because it was a contemporary recognition of the great contribution to general civilization made by the Jews in the English possessions at that time.

[Addison's "Ode on Gratitude" was translated into Hebrew by Shalom ben Jacob Cohen of Meseritz, under the title "Mizmor le-Todah," and published in "Bikkure ha-'Ittim," i. 104 (Steinschneider, "Cat. Bodl." col. 2513). G.]

M. J. K.

ADDISON, LANCELOT: English clergyman and author; father of Joseph Addison; born at Meaburn Town Head, in the parish of Crosby Ravensworth, Westmoreland, 1632; died April 20, 1703. He was educated at Queen's College, Oxford, and served seven years (1662–70) as chaplain of the garrison at Tangiers. While in that city he became sufficiently interested in the condition of the Jews to study their habits and customs, and subsequently published a book upon them. His sojourn in the Barbary states afforded him exceptional opportunities for the study of alien customs, rites, and government, and his inquiring and sympathetic bent of mind induced him to investigate these carefully. The results of his investigations appeared in several works which he wrote and published after his return home; these were entitled "Life and Death of Muhamed," "West Barbary," "The First State of Muhametism," and a work entitled "The Present State of the Jews (more particularly relating to those of Barbary)." The last work was published at London in 1675 (a second edition in 1676, and a third in 1682). There were very few Jews in England at this time, and that country scarcely afforded opportunities for such a study of Jewish conditions as Addison made in the Moorish states; in view of these facts, the success of his work is noteworthy. The book bears the supplementary title, "wherein is contained an exact account of their customs, secular and religious, to which is annexed a summary discourse of the Mishnah, Talmud, and Gemara." The title gives a fair idea of the work; this may be supplemented by the following suggestive passage from the preface:

> "As to the account it gives of the Jews, I conceive there is not any so modern, nor in many things so particular and true, this being the result of Conversation, and not of Report."

While Addison naturally manifests a strong bias in his view of a different creed, it must be conceded that his work exhibited a liberality of view and a keenness of perception not often encountered at that time. These qualities and the marked fearlessness which evidently characterized this ecclesiastic of the dissolute days of Charles II. are indicated in the following passage from his work:

> "For, setting aside the Artifices of Commerce and Collusions of Trade, they [the Barbary Jews] can not be charged with any of those debauches which are grown into reputation with whole Nations of Christians, to the scandal and contradiction of their name and Profession."

ADDO. See Iddo.

ADDON. See Addan.

ADELAIDE: Capital city of South Australia. The history of the Jewish community of this city is closely connected with a pioneer settler, Jacob Montefiore, who took a prominent part in the foundation of both the colony and the community. The congregation, which now numbers about five hundred persons, dates from 1840. The synagogue on Rundle street was consecrated in 1871 and stands upon the site of a small hall that was used by the congregation in its early days.

The Jews of Adelaide have borne an honorable share in the service of the state. In the Legislative Council, Maurice Salem sat for nine years. In the Legislative Assembly, four Jews have occupied seats at various times: Judah Moss Solomon (1852–66), Emmanuel Solomon, Lewis Cohen (1887–93), and V. L. Solomon, who was elected in 1890 and who is still a member. The last named, who was one of the principal pioneers of the northern territory, has filled the highest office attainable by a citizen, having been chosen premier of the colony in November, 1899, though, owing to political combinations, he was in office only seven days. The highest civic office, that of mayor, has been held by three Jews; namely, J. Lazar (1855–58), J. M. Solomon (1869–71), and Lewis Cohen (1883–84). In trade also the Jews have received honors, M. Lazarus having been elected president of the Adelaide Chamber of Manufactures.

Since the community was established, Adelaide has known only one Jewish minister, the Rev. A. T. Boas, who has been associated with the congregation since 1871. Attached to the synagogue is a congregational school, which is attended by sixty children. There are four Jewish societies, of which the Hebrew Benefit and Medical Society is the most noteworthy. It was founded in 1877 by S. Saunders, a justice of the peace, and its assets now amount to over nine hundred pounds sterling (about $4,500). I. Asher has been its president for over fifteen years. The other three societies are the Jewish Philanthropic, the Ladies' Benevolent, and the Hebrew Literary and Social Society. Most of the Jewish public men have been connected, in one capacity or another, with the synagogue and these societies. D. I. F.

ADELKIND: A prænomen; also a family name among the Jews. As the former it is found in a list of martyrs in Nuremberg in the year 1298, and also occurs in a similar list for Weissensee of the year 1303. As a family name it is first met with in the case of Baruch Adelkind of Padua (but evidently of German origin), one of whose sons, Cornelius, became a well-known printer and publisher. The name is purely German, and occurs very early in German literature; the two words that form it, *Adel* (or *Edel* = "noble") and *Kind* (or *Kint*, *Chint* = "origin," "family"), are met very often in names for both men and women among the Jews of Germany.

W. M.

Cornelius B. Baruch Adelkind: Printer and publisher; lived in Italy during the first half of the sixteenth century; he was of German descent. From 1524 to 1544 he was in the employ of the Venetian publisher Daniel Bomberg, by whom were issued, with Adelkind's aid, texts of the Bible entire and in part, commentaries on the Bible, and prayer-books according to the German, Spanish, and Karaite rites. In 1544 he worked for another Venetian publisher, Giovanni di Gara, who, during that year, published editions of Baḥya b. Asher's famous commentary and of the pseudo-historical work, "Yosippon." In the following year Adelkind's name appeared on the title-page of the Midrash on the Pentateuch and the Megillot published in Venice by Giustiniani. From 1546 to 1553 he seems to have combined the functions of printer and publisher; for an edition of Solomon ibn Gabirol's "Mibḥar ha-Peninim" (Venice, 1546) and a reprint of a prayer-book of the German rite (Venice, 1549) bear his name alone. In 1553 he changed his residence from Venice to Sabbionetta, where he was employed by T. Foa, an edition of the Pentateuch, Megillot, and Hafṭarot (1553–55) being published with his aid.

The phrase "from the stem of Israel," that Adelkind and his brother (or brothers?) employ upon several occasions, has suggested to Steinschneider the possibility that he might have been a convert to Christianity. But in the poem on a certain apostate Marano of Venice, which the publisher Soncino adds to his edition of Vidal Benveniste's "Meliẓat 'Efer we-Dinah" (The Poem of 'Efer and Dinah), he calls Adelkind "Cornelius the Israelite," as does Elias Levita in one of the poems addressed by him to Levi b. Gerson.

W. M.

Daniel Adelkind: Printer and publisher; son of Cornelius b. Baruch Adelkind. Little is known of him except for the years 1550–52; and even for that short period the only data are to be gleaned from the mention of his name on the title-pages of books. In 1550 he was engaged with Giustiniani of Venice, whom he assisted in publishing the first edition of the Hebrew translation, by Moses ibn Tibbon, of Maimonides' philosophical work, "Millot ha-Higgayon." In 1551 and 1552 he seems to have had, in Venice, a printing-office of his own; for the following four books, which bear his name as printer, mention no other as editor or publisher: Jacob Weil's "Bediḳot," with a short glossary (Venice, 1551); Samuel Archivolti's ethical work, "Degel Ahabah" (Venice, 1551); "Megillat Sefer" (Venice, 1552); and, finally, the German "Præcepta Mulierum," or "Frauenbüchlein," in a short epilogue to which he begs his father to accept this "booklet" as a gift from his son (1st ed., Venice, 1552).

Bibliography: Steinschneider, *Cat. Bodl.* Nos. 3715, 3949, 5631 (3), 6513 (41), 7004 (1), 7766.

W. M.

ADELSOHN, WOLF: Russian-Hebrew scholar and teacher; born in Lithuania about the beginning of the nineteenth century; died in Odessa, August 13, 1866. Of his parentage nothing is known. Adelsohn was a disciple of Rabbi Manasseh ben Porath, called also Manasseh Ilier. While still a young man he obtained the position of teacher in the house of Lippe Ettinger in Brest-Litovsk. In 1833 he settled in Dubno, where he exercised great influence upon the rising generation of the Maskilim ("Progressists"), and where at the same time he was persecuted by the Ḥasidim for his rationalism. Later, for two years, he was a teacher in the house of Leon Chari in Meseritz, from which place he went to Odessa, where he had to struggle hard for subsistence. He died in extreme poverty from starvation; most of his papers were burnt to disinfect his lodgings.

Among Adelsohn's pupils were the grammarian Ḥayyim Ẓebi Lerner and the Russian censor Vladimir Feodorov (Z. H. Grünberg). Because of his philosophic character and contempt of conventionality he was called the "Diogenes" among the Maskilim. He wrote a critical treatise on "Esther," against the views of Isaac Samuel Reggio, and essays on Hebrew literature, which, after his death, came into the hands of L. Chari and Joel Baer Falkovich.

Bibliography: Gottlober, in *Ha-Boker Or*, 1879, iv. No. 4; Sachs, in *Kanfe Yonah*, Berlin, 1848; Chari, in an article on *Ecclesiastes*, Odessa, 1873.

D. G.

ADEN: Port in western Arabia on the shores of the Red Sea, near the strait of Bab-el-Mandeb; a British possession since 1839. In 1891 its population was 41,910. In 1881 there were in Aden 2,121 Jews, including 125 Beni Israel from Bombay. More recently the Jewish community has received an accession of 250 families from Yemen. Their occupations are those of mat- and reed-workers, masons, porters, bookbinders, money-changers, and jewelers; while the bumboatmen, also, who serve the mail-packets that stop at Aden, are mainly Jews. The trade in ostrich feathers is entirely in the hands of Jews. Their dress consists of kilt, shirt, *arba' kanfot*, waistcoat, and gabardine; and during prayer they wear over the head a ṭallit known as *mandil* (the Arabic word for handkerchief or shawl), with green silk corners, two of which are held in each hand. They use this also to carry home vegetables, etc., from market. The Jewesses wear trousers and shirt, and a sort of wig known as a *masr*; also a veil like the Moslem women. The Jews shave the head, except the *peot* (side-locks), every Friday. Their food is vegetables and fish; but they are said to be much addicted to date wine prepared by themselves.

There appears to be some trace of animal sacrifice among them, possibly borrowed from the neighboring Arabs. When a child is born, a goat is slaughtered and placed under the bed of the mother. On the first day of marriage a heifer is slaughtered; but in this latter case it may be rather for purposes of hospitality.

It is not known when Jews first settled in Aden, which in antiquity was an important mart, and continued so as late as Marco Polo (1254–1324). Some of the earlier rabbis are known as "Adeni," which would imply a congregation of some size. Aden has become important since the British occupation in 1839, at which date the Jews numbered but 250.

Isr.* 1900, pp. 498 *et seq.*, 535; Saphir, *Eben Saifir*, part ii. ch. xi.; *Anglo-Jewish Association, Annual Reports*, 1875, 1876.

J.

ADENI, SOLOMON BEN JOSHUA: Arabian author and Talmudist, who lived during the first half of the seventeenth century at Sanaa and Aden in southern Arabia, from which town he received the name "Adeni" or "the Adenite." He was a pupil of the Talmudist Bezalel Ashkenazi and of the cabalist Ḥayyim Vital. In 1624, or, according to other authorities, in 1622, he wrote a commentary on the Mishnah, entitled "Meleket Shelomoh" (The Work of Solomon). Only a few fragments of this have been published, but they are quite sufficient to indicate the value of the whole work. In this commentary, Adeni exhibits considerable critical ability. He analyzes the Mishnah in a manner that is quite modern, and which is accompanied by a strictly scientific penetration that enables him to enter into the most minute details of the mishnaic text, its punctuation and spelling. The great value of Adeni's work was recognized by Manasseh ben Israel, who made use of its critical conclusions in his edition of the Mishnah of 1632. Adeni incorporated in his work Joseph Ashkenazi's valuable amendments to the Mishnah. In addition to his commentary he wrote "Dibre Emet" (Words of Truth), which, according to Azulai, contains critical notes on the Masorah. In 1854 the manuscript of "Meleket Shelomoh," his first work, was in the hands of Nathan Coronel of Jerusalem, whereas that of his second work, "Dibre Emet," seems to have been lost.

L. G.

ADERSBACH, G. A.: German poet; died in 1823. He belonged to the generation that, in the first quarter of the nineteenth century, took an active part in the struggle for Jewish emancipation. In his contributions to the "Sulamith" (vol. v.) he manifests some poetical ability. Special mention may be made of his odes on the Jewish soldiers who fell in the battle of Waterloo, and on William Wilberforce, the English abolitionist.

BIBLIOGRAPHY: Jost, *Neuere Geschichte*, iii. 35.

ADHAN: A family of northern Africa, several members of which figure in Jewish literature. The family name was originally Aldahhan. In Old Arabic this signifies "an oil merchant"; in the modern Arabic of Morocco it means "a painter" or "decorator" ("Z. D. M. G." xlix. 573; compare Steinschneider, in "Jew. Quart. Rev." x. 130). **1. Moses Adhan** is known from a rabbinical decision that he published in Iyyar, 1732 (printed in "Kerem Ḥemed," the "Responsa of Abraham Alnaqua," ii. 40*a*, Leghorn, 1869 and 1871). A manuscript in the collection of David Kaufmann contains a "lamentation" for the Ninth Day of Ab, with the acrostic "Moses Adhan." The style of this hymn (Stade's "Zeitschrift," ii. 1, xii. 261, etc.) shows that he was a writer of some merit ("Z.D.M.G." l. 236). **2. Jacob Adhan** was the author of a combined Hebrew and Arabic *piyut*, in which the community of Israel (Keneset Yisrael) is represented as pouring out its feelings to God, its beloved, and asking for renewed assistance (J. K. Zenner, "Z.D.M.G." xlix. 573; Kaufmann, *ib.* l.238). Though evidently written in Morocco, the manuscript in which this piyut is found came from Tampa, in the state of Rio Grande do Sul, in Brazil.

G.

ADHAN, SOLOMON BEN MASUD: Translator and author, who lived in the first half of the eighteenth century. He went from Tafilet, Morocco, to Amsterdam so as to obtain the necessary means for the ransom of his family and of his synagogue from the hands of the Moors. He published a translation of Solomon Sasportas' "Zeker Rab" under the title "Memoria de los 613 Preceptos" (An Account of the 613 Precepts), Amsterdam, 1727; also "Bi-Neot Deshe" (In Green Pastures), containing ritualistic and ethical exhortations, as well as legends of Moses and Aaron (Amsterdam, 1735; 2d ed., in Russia, 1809).

M. B.

ADIABENE: A district in Mesopotamia between the Upper Zab (Lycus) and the Lower Zab (Caprus), though Ammianus ("Hist." xviii., vii. 1) speaks of Nineveh, Ecbatana, and Gaugamela as also belonging to it. For some centuries, beginning with the first century B.C., it was semi-independent. In the Talmudic writings the name occurs as הדייב, חדייב, and חדייף, which is parallel to its Syriac form "Ḥadyab" or "Ḥedayab." Its chief city was Arbela (Arba-ilu), where Mar 'Uḳba had a school, or the neighboring Ḥazzah, by which name the Arabs also called Arbela (Yaḳut, "Geographisches Wörterbuch," ii. 263; Payne-Smith, "Thesaurus Syriacus," under "Hadyab"; Hoffmann, "Auszüge aus Syrischen Akten," pp. 241, 243). In Ḳid. 72*a* the Biblical Habor is identified with Adiabene (compare Yeb. 16*b et seq.*, Yalḳ. Dan. 1064), but in Yer. Meg. i. 71*b* with Riphath (Gen. x. 3; compare also Gen. R. xxxvii.). In the Targum to Jer. li. 27, Ararat, Mini, and Ashkenaz are paraphrased by קרדו, הרמיני, וחדייב, *i.e.*, Kurdistan, Armenia, and Adiabene; while in Ezek. xxvii. 23 ועדן, וכנה, חרן are interpreted by the Aramaic translator as "Ḥarwan, Nisibis, and Adiabene."

Relation to Neighboring Kingdoms.

Under the Persian kings Adiabene seems for a time to have been a vassal state of the Persian empire. Ardashir III. (361–338 B.C.), before he came to the throne, had the title "King of Ḥadyab" (Nöldeke, "Geschichte der Perser," p. 70). The little kingdom attained a certain prominence on account of its kings during the first century. IZATES became a Jew. His conversion took place before he ascended the throne and while he lived in Charax Spasinu. At about the same time his mother, Helena, was also converted. The times were troublous ones; for Parthian kings and counter-kings followed each other in quick succession. Artaban III. was king of Atropatene. He had succeeded Vonones, who, having been educated entirely at Rome, was unsympathetic toward the Parthians. Artaban soon had to flee to Hyrcania to escape from the rival king, Tiridates III. He returned, however, in 36, and, being afraid of a conspiracy, took refuge at the court of Izates, who was powerful enough to induce the Parthians to reinstate Artaban. For this service certain kingly honors were granted Izates, and the city of Nisibis was added to his dominions. However, in 45, Gotarzes, an adopted son of Artaban, was raised to the throne by the nobles, in preference to Vardanes, his half-brother. In 49 Meherdates (Mithridates V.), a son of Vonones, was sent from Rome by Claudius to take possession of the throne of Parthia. Izates played a double game, though he secretly sided with Gotarzes. A few years later, Vologeses I. set out with the intention of invading Adiabene and of punishing Izates; but a force of Dacians and Scythians had just entered Parthia, and Vologeses had to return home.

Izates was followed on the throne by his elder brother, Monobaz II. It is related that in the year 61 he sent a contingent of soldiers to Armenia to assist the Parthian candidate, Tiridates, against Tigranes, who had made an incursion into the territory of Adiabene. The troops of Monobaz, however, were beaten back at Tigranocerta. Monobaz was present when peace was concluded at Rhandea between Parthia and Rome in the year 63. The chief opponent of Trajan in Mesopotamia during the year 115 was the last king of independent Adiabene, Meharaspes. He had made common cause with Ma'nu (Mannus) of Singár (Singara). Trajan invaded Adiabene, and made it part of the Roman province of Assyria; under Hadrian in 117, however, Rome gave up possession of Assyria, Mesopotamia, and Armenia. In the summer of 195 Severus was again warring in Mesopotamia, and in 196 three divisions of the Roman army fell upon Adiabene. According to Dio Cassius, Antoninus took Arbela in the year 216, and searched all the graves there, wishing to ascertain whether the Arsacide kings were buried there. In later times Adiabene became an archbishopric, with the seat of the metropolitan at Arbela (Hoffmann, "Akten," pp. 259 *et seq.*).

Conversion of Some of Izates' Subjects.

It is impossible to tell how far the inhabitants of Adiabene had followed the example of their king and become Judaized. Josephus ("B. J." preface, § 2) refers to the "Adiabenoi" as Jews. Both Queen Helena and Izates showered presents upon Jerusalem, and the queen took the king's sons there to be educated. The remains of Helena and Izates were sent by Monobaz II. to Jerusalem for burial. There seems to be no doubt that there were a number of Adiabene Jews in Jerusalem, who probably belonged to the princely household. Josephus knew several, and in

"B. J." ii. 19, § 2 mentions a Kenedeus and a Monobaz as aiding bravely in the defense of Jerusalem against the Romans, and "the sons and brethren of Izates the king . . . were bound . . . and led to Rome, in order to make them hostages for their country's fidelity to the Romans" ("B. J." vi. 6, § 4). A certain Jacob Ḥadyaba is mentioned in B. B. 26*b*; and also Zuga of Ḥadyab, or Zawa (Heilprin, "Seder ha-Dorot," ed. 1882, ii. 115). The Talmud mentions a certain kind of scorpion in Adiabene (Bab. Shab. 121*b*; in Yer. Shab. xiv. 14*b*, the reading שנהדריית is incorrect) that might be killed on the Sabbath day because of its venomous character. It also states (Bab. Men. 32*b*) that the followers of Monobaz (Yer. Meg. iv., end, בית מלון!) were accustomed to fix the *mezuzah* upon a staff, and to set the staff upright in any inn in which they happened to pass the night (Tosef., Meg. iv. [iii.] 30; Yer. Meg. iv. 75*c*).

Traditions.

All manner of false traditions have gathered around these statements. The Armenian historian Moses of Chorene, who wrote in the fourth or fifth century, has transferred the story of Izates' intervention in Parthia to Abgar, one of the kings of Edessa, making Helena the wife of Abgar, Ukkama (Von Gutschmid, "Kleine Schriften," iii. 45), probably because Abgar VII. was the son of Izates (Duval, "Histoire d'Edesse," p. 51). In later Jewish tradition Monobaz is made out to be a son of Agrippa II. (Ibn Daud, "Sefer ha-Ḳabbalah," in Neubauer, "Med. Jew. Chron." i. 51; compare also "Seder 'Olam," *ib.* 170; and "Seder 'Olam Zuṭṭa," in one recension, *ib.* 71, which in another recension (*ib.* 75), however, is said to be impossible. The same is to be found in Zacuto's "Yuḥasin," ed. Filipowski, 93). According to Ẓemaḥ Gaon, he was a son of Herod ("Yuḥasin," 93, 2, below).

BIBLIOGRAPHY: Chief authority is Josephus (*Ant.* xx. 2, § 4; *B. J.* ii. 19, § 2; iv. 9, § 11; v. 2, § 2; 3, § 3; 4, § 2; 6, § 1), who probably got his information from Adiabene Jews in Jerusalem (Von Gutschmid, *Kleine Schriften*, iii. 4). Notices may also be gathered from Pliny, *Historia Naturalis*, v. 66, vi. 44 *et seq.*; Ammianus, *History*, xviii. 7, § 1; xxiii. 6, § 21; Strabo, *Geography*, xvi. 745 *et seq.*; Brüll, *Adiabene*, in *Jahrb.* i. 58 *et seq.*; Grätz, in *Monatsschrift*, 1877, xxvi. 241 *et seq.*, 289 *et seq.*; Von Gutschmid, *Gesch. G.

ADIBE, JACOB: A Jew, exiled from Portugal in 1496, who dwelt at Azamor in the province of Duccala, Morocco. In 1512 the ruler of Azamor had surrendered to the sovereignty of Portugal, but soon renounced his allegiance. King Manuel thereupon ordered a fleet to the rebellious city, entrusting his nephew, Don Jaime, duke of Bragança, with the supreme command. There ensued a fierce battle between the Moors and the Portuguese, which raged all day without apparent result. At dawn on the following morning, however, Adibe appeared before Don Jaime and announced to him the evacuation of the city. At the same time he asked for protection for his family and his coreligionists. The duke complied with this request; and under the protection of a military force, the Jews, numbering several thousands, were escorted out of the city and settled at Saffee and Fez. Adibe himself returned later to Azamor.

ADIDO. See Ḥadido.

ADIEL: **1.** A prince of the family of Simeon, who captured Gedor in the days of Hezekiah (I Chron. iv. 36). **2.** A priest, son of Jahzerah (I Chron. ix. 12). **3.** The father of Azmaveth, who was "over the king's [David's] treasures" (I Chron. xxvii. 25).

G. B. L.

ADINO THE EZNITE.—Biblical Data: In II Sam. xxiii. 8 *et seq.*, in which the names of David's heroes are recorded, occur two mysterious words, עדינו העצני (according to the *ḳeri*), which came to be regarded as the designation of one of the heroes. They are thus interpreted in the Septuagint, which was followed by numerous other versions. The two words clearly represent a textual corruption for עורר את חניתו—that is, "brandishing his spear," as the parallel passage (I Chron. xi. 11) correctly reads—and instead of being a proper name, are merely descriptive of Yosheb Bashshebet (a euphemism for Esh-baal) the Tachmonite, mentioned at the beginning of the verse.

J. Jr.

——**In Rabbinical Literature:** According to a Haggadah, this name is only a designation of David to denote two of his principal virtues. On account of his modesty he is called 'Adino ("pliant like a worm") because he bowed down and crawled in the dust before pious men and scholars. For his heroic deeds and his strength in battle he is called Ha-'Eẓni ("the man as strong as a tree [עץ]"; M. Ḳ. 16*b*). The Vulgate translation, "*tenerrimus ligni vermiculus*" (the most tender wood-worm), is based upon a somewhat different Haggadah. The Targum, on the other hand, also applies the name to David, but translates it as the one "adorned" with "weapons" (עדי and זין).

L. G.

ADIYA. See Samuel ibn Adiya.

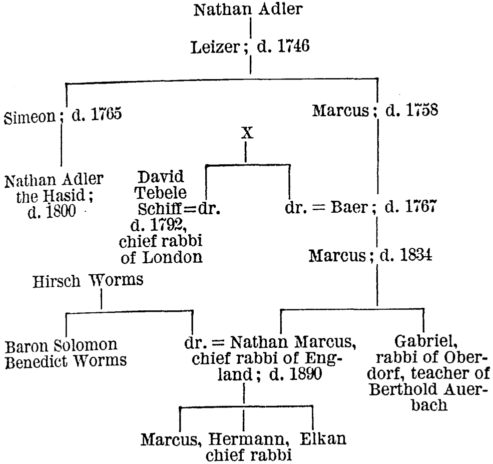
ADJIMAN: Jewish family in Turkey, several members of which were treasurers and intendants-general of the janizaries. Meir Adjiman, who lived under Selim III., possessed such influence that he was able to promote a simple janizary private to the rank of a *saka-bachi*. The same janizary had him strangled a few years later. A similar fate overtook his successors, the brothers Baruch and Jacob, and also Isaiah Adjiman, the last of whom met his death under Mohammed II.

M. K.

ADJURATION, TALMUDICAL MODE OF. See Oath.

ADLER: A family that came originally from Frankfort, but which has been connected for more than a century with the chief rabbinate of England. Tebele Schiff, who was chief rabbi of London, was, it is true, only connected by marriage with Baer Adler, the two having married sisters. But there is little doubt that the family associations thus created with England had something to do with the candidature of N. M. Adler for the chief rabbinate of England in 1844. Though a Frankfort family—and thus related, directly or indirectly, with the Worms and Rothschilds—they have been, this century, more closely connected with Hanover, especially while it was under British sovereignty—another point of connection with England. The name has been derived from the eagle on the sign-board in the Frankfort ghetto, or from the outstretched hands in the priest's blessing, resembling the wings of an eagle, the Adlers being of priestly stock.

Tradition traces it back to Simon, the author of the "Yalḳuṭ Shimeoni"; but the actual pedigree, the main features of which are contained in the following sketch, goes back only to the beginning of the eighteenth century:



Nathan Adler
Leizer; d. 1746
Simeon; d. 1765
Marcus; d. 1758
X
Nathan Adler the Hasid; d. 1800
David Tebele Schiff=dr. d. 1792, chief rabbi of London
dr. = Baer; d. 1767
Marcus; d. 1834
Hirsch Worms
Baron Solomon Benedict Worms
dr. = Nathan Marcus, chief rabbi of England; d. 1890
Gabriel, rabbi of Oberdorf, teacher of Berthold Auerbach
Marcus, Hermann, Elkan chief rabbi of British empire

J.

ADLER, ABRAHAM JACOB ("Koppel"): German rabbi, educator; born in 1813; died at Worms in 1856. He was the son of Isaac Adler, associate rabbi in Worms, and brother of Rabbi Samuel Adler. He studied at the universities of Bonn and Giessen, and afterward went to Frankfort-on-the-Main, where he became teacher at the Buchholz School, and to Gross-Kanizsa, Hungary, in 1839, where he was engaged as tutor in a private family. He was elected rabbi of Worms in 1842, but gave up his rabbinical career in the same year, and, assisted by his wife, founded a private school for young girls. At the rabbinical conferences at Frankfort-on-the-Main, in 1845, he distinguished himself as a great Talmudical scholar and radical reformer, siding with Holdheim, Geiger, and Einhorn, and wrote "Die 77 Sogenannten Rabbiner und die Rabbinesversammlung," Mannheim, 1845, a pamphlet which created some stir. In 1848 he established a political paper, and became a contributor to Nowack's "Kirchenzeitung." In the revolutionary movement of 1848 Adler espoused the cause of political freedom with all the ardor and eloquence of his enthusiastic nature. He did not commit any overt act which could be justly brought up against him, but after the scattering of the revolutionary forces by the Prussian arms he was seized in his study by gendarmes, on the eve of the Day of Atonement, and hurried away to the Iron Tower at Mayence. There he languished for many months, his wife lying at the same time at the point of death. At last he was acquitted by a jury, and was released from his prison. The position of rabbi at the New York Temple Emanu-El was first offered to him in 1854, but his poor health prevented him accepting the call, which his brother Samuel entered upon three years later. Broken in health by the trials through which he had passed, he died in the winter of 1856. Among his works are: "Geschichte der Juden in Frankfurt-am-Main," and "Reform des Judenthums," written with the aid of his friend Wagner of Mannheim, 1846.

Bibliography: Sermon by L. Lewysohn (of Worms) and another by Dr. Stein (of Frankfort-on-the-Main), in *Archives Israélites*, 1856.

S.

ADLER, CYRUS: Librarian of the Smithsonian Institution; founder of the American Jewish Historical Society. He was born at Van Buren, Arkansas, Sept. 13, 1863, and was educated at the Philadelphia High School, University of Pennsylvania (B.A., 1883; M.A., 1886), and Johns Hopkins University (Ph.D., 1887). He was fellow in Semitic languages at Johns Hopkins University, 1885–87, was appointed instructor in Semitic languages, 1887, and associate, 1892. Adler became assistant curator in the department of Oriental antiquities in the United States National Museum, in Washington, in 1887, and custodian of the section of historic religious ceremonials in 1889.

He went to the Orient for fifteen months as special commissioner for the World's Columbian Exhibition at Chicago, at which the Oriental exhibits were obtained mainly through his efforts; he also participated in the organization of the United States Government exhibits at the expositions at Cincinnati, 1888, at Chicago, 1893, and at Atlanta, 1895; of the last-named he, together with Dr. I. M. Casanowicz, published an illustrated catalogue in the "Report of the United States National Museum for 1896" (pp. 943–1023, with 46 plates). Adler may justly be regarded as the originator of the American Jewish Historical Society, which was the outcome of an appeal issued by him early in 1892. After acting as its secretary from that date he became its president in 1898. Of the many learned societies of which he is member he has acted as vice-president of the Anthropological Society of Washington, as member of council of the Philosophical Society of Washington, and as trustee of the American Jewish Publication Society and of Gratz College. In 1899 he was elected a member of the American Philosophical Society. He has played an important part in the organization of the international catalogue of scientific literature, and represented the United States at the conference on this subject held in London in 1898. Besides the catalogue of Biblical antiquities at the Atlanta Exposition and other papers in the reports and proceedings of the United States National Museum and in the journals of the learned societies of which he is a member, Adler has published, with Allan Ramsay, "Told in the Coffee House" (New York, 1898), a series of folk-tales collected in Constantinople; and has edited the "American Jewish Year Book" since 1899.

J.

ADLER, DANKMAR: German-American architect and engineer; born in Stadt-Lengsfeld, Saxe-Weimar-Eisenach, July 3, 1844; died in Chicago, April 15, 1900. He was a son of Rabbi Liebman and Sara Eliel Adler, who emigrated to America in 1854. Educated at the public schools of Detroit and the University of Michigan, he settled in Chicago in 1861, at the beginning of the Civil War, and almost immediately enlisted in the artillery.

Adler was president of the Western Association of Architects, secretary of the American Institute of Architects, and president of the Illinois State Board of Examiners of Architects. He designed many important public buildings in Chicago, such as the synagogues of the Sinai, Zion, Anshe Ma'arabh, and Isaiah congregations, Grace Methodist Episcopal and Unity churches, McVicker's Theater, the Central Music Hall, Auditorium, and Stock Exchange. Among those that he designed and planned in St. Louis are the Wainwright, Union Trust, and St. Nicholas buildings; in New Orleans, the Union Station; in Pueblo, Col., the Opera House. In New York he was associate architect of Carnegie Music Hall. Adler was trustee of the United Hebrew Charities in Chicago, and was its secretary from 1873 to 1877.

J. Sto.

ADLER, DAVID BARUCH: Danish banker and politician; born May 16, 1826, at Copenhagen; died there December 4, 1878. In 1846 he became a partner in a commission house (Martin Levin & Adler) in London, where, in 1849, he married Jenny Raphael, daughter of the banker, John Raphael. In 1850 he returned to Copenhagen and became a partner in the banking house of D. B. Adler & Company, in which position his operations were directed toward the transfer of the financial center of Jutland's monetary affairs from Hamburg to Copenhagen. This circumstance placed him in a very difficult position during the financial crisis of 1857. In acknowledgment of the support given him during this period of financial stress he established, in 1864, a fund of 20,000 kroner for widows and daughters of impoverished merchants. He was an outspoken free-trader and was one of the founders of the Free Trade Society.

Adler was a member of the administration of the Copenhagen Privatbank, 1857; of the Handelsbanken, 1876, and of several financial institutions in Jutland. After the war of 1864 he contracted for the Danish public loan through Raphael & Son in London, and, in 1868, for a Swedish public loan. As a politician, Adler belonged to the left wing of the National Liberal party, and occupied an influential position. As a member of the Danish parliament he had a seat in the Folkething, 1864–69, serving on the finance committee, on one occasion, as president. From 1869 he was member of the Landsthing. Among other public offices, he held the position of town councilor in Copenhagen, 1858–64 and 1869–72; was member of the Chamber of Commerce (*Grosserer-Societetet*), of which he was one of the founders, 1875–78; member of the Maritime and Commercial Court, 1862–78, and member of the Board of Representatives of the Jewish congregation in Copenhagen.

Adler's great interest in Danish art and industry made him a very active member of the committee for the decoration of the National Theater in Copenhagen and of that for Denmark's participation in the Paris Exposition, 1878. His activity in the administration of the charity organization of Copenhagen was also of great importance.

Bibliography: Bricka, *Dansk Biografisk Lexikon*, s.v.; *Illustriret Tidende*, Dec. 15, 1878.

A. M.

ADLER, ELKAN NATHAN: Lawyer, and collector of Hebrew manuscripts; born at London, 1861; son of Chief Rabbi Nathan Adler. His early training was obtained successively in the City of London School and at University College, London. Mr. Adler spent several years in travel throughout the East, visiting all the countries containing small Jewish colonies. From 1888 to 1898 he made three journeys specially to Egypt and Palestine. In 1892 and 1894 he traveled from Spain to Morocco, and in the latter part of 1894 and at the beginning of 1895 visited Algiers and Tunis. During these journeys he made it a practise to seek Hebrew manuscripts, and in this way accumulated one of the largest private collections in the world. Among the positions held by Mr. Adler was that of honorary secretary of the Jewish Association for the Diffusion of Religious Knowledge. He was vice-president of the International Conference on the Russo-Jewish question at Berlin, 1891. He is joint secretary of the Jewish Convalescent Home, a member of the committee of the Stepney Jewish schools and Chovevi Zion Association, and superintendent of Sabbath-classes. Articles on the Egyptian and Persian Jews have been contributed by him to the "Jewish Quarterly Review" and other journals.

Bibliography: Jacobs, *Jewish Year Book*, 1899. G. L.

ADLER, FELIX: Founder of the Society for Ethical Culture, educator, and author; second son of Rabbi Samuel Adler; was born at Alzey, Germany, Aug. 13, 1851. In 1857, when his father received a call to the ministry of Temple Emanu-El at New York, the family came to that city. Adler's preliminary education was obtained in public and private schools in New York city. He afterward entered Columbia College, whence he was graduated in 1870.

With the view of preparing himself for the Jewish ministry, he went to Germany, where he pursued theological, philosophical, and linguistic studies at the Hochschule für die Wissenschaft des Judenthums at Berlin, together with studies in philosophy and economics at the University. He later entered the University of Heidelberg, where he obtained the degree of doctor of philosophy in 1873.

Finding upon his return to New York that the attitude he had reached with regard to Jewish religious beliefs made it impossible for him to enter the active ministry, he accepted the chair of Hebrew and Oriental literature established for him by some of his friends at Cornell University, and held this position from 1874 to 1876. In the latter year he returned to New York and organized a society for ethical culture based upon the principle of the promotion of right living independent of religious, dogmatic, or sectarian views (see Ethical Culture, Society for). As a lecturer in connection with the Society for Ethical Culture Adler has shown great activity, and has made a mark on religious thought in the United States.

As a corollary to this work, and as an outgrowth of his own studies in pedagogics and didactics and social science, Dr. Adler has been instrumental in organizing in New York a system of district nursing in connection with the dispensaries (1878), a free kindergarten (1880), a workingmen's school, a movement for improving the dwellings of the poor, and a number of other institutions and movements. He has exerted great influence toward the introduction of manual training, science, and art teaching in the public schools.

His chief literary works are "Creed and Deed" (New York, 1877) and "The Moral Instruction of Children" (New York, 1898). He wrote the articles on Jews, Jewish History, and Jewish Literature in Johnson's "Universal Cyclopedia" of 1876. G. H.

ADLER, GEORGE: German economist and author; born at Posen, May 28, 1863. His thesis for the doctor's degree (1883) was on Rodbertus-Jagetzow, the well-known Prussian state socialist. He is a remarkably prolific writer on economic and sociological questions, publishing many treatises, and contributing numerous articles to German reviews. He lectured as extraordinary professor on sociology in the University of Basel, Switzerland, and later became professor of political economy in the University of Freiburg, Germany. Adler has advocated a moderate social policy and bitterly opposed revolutionary socialism. Of his books may be mentioned: "Karl Marx'sche Kritik" (1886); "Internationaler Arbeiterschutz" (1888); "Social Reform und Theater" (1891); "Staat und Arbeitslosigkeit" (1894); "Die Imperialistische Socialpolitik" (1897); "Die Socialreform im Alterthum" (1898); "Geschichte des Socialismus und Communismus," i. (1900). In the last two works he dealt also with the social ideas of the ancient Hebrews.

Bibliography: Kürschner, *Literatur-Kalender*, 1898.

M. B.

ADLER, GOTTLIEB: Austrian physicist and mathematician; born March 7, 1860; died Dec. 15, 1893, at Stecken, Bohemia. After receiving his early education at the gymnasium of Iglau, Moravia, being graduated in 1877, he entered the University of Vienna, and received the degree of Ph.D. in 1882. He then devoted himself principally to the study of mathematical physics, and in 1885 was appointed "privat-docent" (instructor) at the university. Shortly before his death he was promoted to the position of professor extraordinary at the same university.

The scientific papers of Adler relate almost entirely to researches in the domains of electricity and magnetism, and, with a few exceptions, were published in the "Sitzungsberichte der Kaiserlichen Akademie der Wissenschaften zu Wien, "covering a period of nine years (1884–93). Brief notices of these investigations may be found in the "Fortschritte der Physik," xl.-xlix., Brunswick.

A. S. C.

ADLER, GUIDO: Austrian writer on music; born at Eibenschütz, Moravia, Nov, 1, 1855. His father, Joachim, a physician, died in 1857, whereupon his mother removed to Iglau. He was educated in Vienna, where he studied music at the conservatory under Bruckner and Desoff. In 1878 he was graduated from the Vienna University as doctor of jurisprudence, and in 1880 as doctor of philosophy. His dissertation, "Die Grundklassen der Christlich-Abendländischen Musik bis 1600" (The Chief Divisions of Western Church Music up to 1600), was reprinted in "Allg. Musikzeitung," 1880. In 1883 Adler became lecturer on musical science at Vienna University, on which occasion he wrote "Eine Studie zur Geschichte der Harmonie" (An Essay on the History of Harmony), published in the "Sitzungsberichte der Philosophisch-Historischen Klasse der Wiener Academie der Wissenschaften," 1881. In 1884 he founded with Friedrich Chrysander and Philip Spitta the "Vierteljahresschrift für Musikwissenschaft." In 1885 he was called to the German University of Prague, Bohemia, as ordinary professor of the history and theory of music, and in 1898, in the same capacity, to the University of Vienna. In 1886 he published "Die Wiederholung und Nachahmung in der Mehrstimmigkeit"; in 1888, "Ein Satz eines Unbekannten Beethovenischen Klavierkoncerts." In 1892–93 he edited a selection of musical compositions of the emperors Ferdinand III., Leopold I., and Joseph I. (two vols.). Since 1894 he has been the editor of "Denkmäler der Tonkunst für Österreich," an important publication for the history of music.

Bibliography: Riemann, *Musik-Lexikon*, 1899, s.v.

M. B.

ADLER, HELENE: German teacher and writer; born at Frankfort-on-the-Main in 1849, in the same house in which Ludwig Börne was born, and which was the property of her father, who was one of the minor officers of the Jewish community of Frankfort. She was graduated from the Wiesbaden Women's College in 1867, and for fifteen years was teacher in the school of the Frankfort Orphan Asylum. Miss Adler, who since 1882 has devoted herself entirely to literature, is the author of the following works: (1) "Beim Kuckuk" (poems), 1882; (2) "Religion und Moral" (a treatise on education), 1882; (3) "Waisenerziehung" (an essay on the education of orphans), 1885; (4) "Vorreden und Bruchstücke" (poems), 1897.

Bibliography: *Lexikon Deutscher Frauen der Feder*, 1898, p. 4.

H. R.

ADLER, HERMANN: Chief rabbi of the United Hebrew Congregations of the British empire; born in the city of Hanover, May, 1839; second son of Nathan Marcus Adler; educated at University College School and University College, London. He studied at Prague and Leipsic between 1860 and 1862, devoting especial attention to theology and the Talmud. In December, 1862, he received the degree of Ph.D. at Leipsic, and next year Chief Rabbi Rapoport of Prague conferred upon him the *hattarat horaah* (rabbinical diploma).

Chief Rabbi Hermann Adler.

In 1863 Dr. Adler became principal of Jews' College, an institution for which, like his father, he always entertained a special regard. Though he was appointed minister of the Bayswater Synagogue, London, in 1864, he remained the tutor of theology in Jews' College until 1879, when he relinquished his active duties there. However, he did not entirely sever his connection with the college; for when Sir Barrow Ellis died in 1887 he was unanimously elected chairman of the council, and at his election as chief rabbi in 1891 he became president of the institution.

When in 1879 advancing age compelled his father, the chief rabbi, to delegate to another some of his most onerous duties, Dr. Adler became his deputy, and when his father died in 1890 he was unanimously elected to succeed him (June, 1891).

Extent of Influence.

Dr. Adler's influence has been very wide-spread, covering the whole extent of the British empire and even reaching beyond. He is socially the recognized representative of English Jewry, and he is one of the most prominent figures in philanthropic circles. He is the minister of the Cathedral Synagogue in Duke's Place, as well as president of the London bet din.

Dr. Adler holds many honorary offices in the community, and in addition to being president of Jews' College, he is president of Aria College. For a time he was president of the Jewish Historical Society of England, and he has held the vice-presidency of the Jewish Religious Educational Board and of the Anglo-Jewish Association. He also takes an active part in the Russo-Jewish Committee, which he represented at Berlin in 1889 and at Paris in 1890. Outside the community, too, he holds important offices, and is vice-president of the Society for the Prevention of Cruelty to Children and of the Mansion House Association for improving the dwellings of the poor.

His Works.

He is the author of a volume of "Sermons on the Biblical Passages Adduced by Christian Theologians in Support of the Dogmas of Their Faith"; "Ibn Gabirol and His Relation to Scholastic Philosophy," in "University College Essays," 1864; "Jewish Reply to Bishop Colenso"; and various Sabbath readings published by the Jewish Association for the Promotion of Religious Knowledge. Dr. Adler has contributed numerous articles to reviews, among them an article in reply to Prof. Goldwin Smith, entitled

"Can Jews be Patriots?" ("Nineteenth Century," 1878) which attracted much attention.

G. L.

ADLER, ISAAC: Son of Rabbi Samuel Adler, American physician and professor of clinical medicine in the New York Polyclinic Medical School and Hospital; born at Alzey, Germany, in 1849; emigrated to America in 1857. He was graduated from Columbia College in 1868, studied medicine in the universities of Heidelberg, Vienna, Prague, and Berlin; and received his degree of M.D. from Heidelberg in 1871. From the year 1875 Adler held the position of visiting physician to the German Hospital in New York city. In 1892 he became professor of clinical pathology at the New York Polyclinic Medical School. Adler was elected in 1898 consulting physician to the Montefiore Home. He is the author of a number of scientific monographs on medical subjects, one of which, "Observations on Cardiac Syphilis ("New York Medical Journal," lxxiii. 577), has had the distinction of being translated into French in "Revue Générale de Clinique et de Thérapie," xii. 818–824, Paris, 1898. W. S.

ADLER, JACOB: Judæo-German actor; born at Odessa, Russia, January 1, 1855. Influenced by a Jewish troupe which came from Rumania to Odessa in 1875, he resolved to devote himself to a theatrical career. He made his first appearance in 1878 at the theater in Kherson, Russia, and from the outset proved himself a skilful interpreter of the sentiment and thought of the Russian ghetto. In 1883, when the Russian government prohibited all Jewish plays, Adler emigrated to London. In February, 1888, he removed to New York, where he became one of the leading actors on the Jewish stage. See Drama.

M. B.

ADLER, KARL FRIEDRICH: Austrian jurist; born at Prague, Bohemia, March 31, 1865. He is the son of Moritz Adler, author of "Der Krieg, die Congressideen, und die Allgemeine Wehrpflicht" (1868). Karl Adler studied at the universities of Prague and Vienna, was professor extraordinary of commercial law in the University of Vienna from 1893 to 1898, and in 1900 was professor of civil law at the University of Czernowitz, Bukowina. In 1898 he embraced Catholicism. Adler is the author of "Das Oesterreichische Lagerhausrecht" (1892), a treatise on the Austrian law concerning the regulation of storehouses; "Realcontract und Vorvertrag" (1892), a work dealing with contracts and first drafts; "Zur Entwicklungslehre und Dogmatik des Gesellschaftsrechts" (1895), an examination into the evolution and dogmatics of social law. He has contributed miscellaneous papers to "Zeitschrift für Handelsrecht" (vol. xxxv.), "Archiv für Bürgerliches Recht" (vol. iii.), "Conrad's Handwörterbuch der Staatswissenschaften," "Zeitschrift für Privat- und Oeffentliches Recht," "Monatsschrift für Handelsrecht," etc. S.

ADLER, LAZARUS (LEVI): German rabbi, of the period of transition; born at Unsleben, Bavaria, Nov. 10, 1810; died at Wiesbaden, Jan. 5, 1886. He studied Hebrew literature at an early age, and, under his father's tuition, read both the Bible and the Talmud. In accordance with the system of education then prevailing, he was placed in the *yeshibah* (rabbinical academy) of Rabbi Hirsch Kunreuter, at Gelnhausen, where for five years he assiduously applied himself to Talmudic studies. Thence he went to Würzburg, Bavaria, partly to attend the lectures on the Talmud by Chief Rabbi Abraham Bing and partly to prepare himself for academic studies. In 1830 he was matriculated at the University of Würzburg. From his intercourse here with Einhorn and Dukes he received many spiritual suggestions. These were not wasted; and, under the advice of his teacher, Professor Wagner, he read Herder's writings, which definitely shaped his conception of the clerical calling in relation to preaching and practise.

In 1832, accompanied by friends, he journeyed to Munich, and in the winter of 1833 received the degree of doctor of philosophy at Erlangen. Returning home, he prepared for, and passed with honors, the Theological State Board examination, prescribed by law for teachers. With others of congenial views, Adler founded (Würzburg, 1837–38; Munich, 1839–45) "Die Synagoge," a non-partizan Jewish religious journal, whose sole aim was to instruct and to edify. At an assembly of representatives of Jewish congregations, convened at Würzburg by order of the Bavarian government, and which Adler attended as the representative of his native congregation, he showed the same moderate policy that he pursued throughout his life.

In 1840 Adler was elected district rabbi of Kissingen, a section of the country comprising twenty-four congregations. A memorandum on the civic position of the Jews in Bavaria, published by Adler in 1846 at Munich; a circular letter, addressed to the deputy Allioli, and entitled "Emancipation and Religion of the Jews, or the Jewish Race and its Adversaries" (Fürth, 1850); and an "Open Letter" (1852), addressed to the deputies Ruland, Sepp, and Allioli, were all well received.

In 1852 Adler received a call to Mayence; but, having also been offered the chief rabbinate of the electorate of Hesse, at Cassel, as successor to Philip Roman, who died 1842, he decided to accept the latter appointment. While at Cassel, in addition to his increasing ministerial duties, he contributed occasionally to the literature of his day. "Talmudische Welt- und Lebensweisheit" was the title of a work in which he intended to treat the Pirḳe Abot; but only the first volume appeared. A large number of excellent sermons that he published testify to his homiletic gifts. In the field of pedagogics he was also active, editing school-books, especially a reader for Jewish schools containing numerous translations (in German) from rabbinical literature. He also published "Discourses for the Promotion of Humanity" (in German, 3 vols., 1860, 1870, 1876). The Bavarian government would not permit him to attend the congresses of rabbis at Brunswick, Frankfort, and Breslau; but he took a prominent part in the proceedings of the congress at Cassel, over which he presided, and in those of the synods at Leipsic and Augsburg. An earnest speaker, he strenuously advocated moderation, pleading for union and peace. His last work, favoring wise reforms, bore the title "Hillel and Shammai, or conservative Reform and stable Conservatism; a message of peace to the congregation of Israel and its leaders," Strasburg, 1878.

M. Sc.

ADLER, LIEBMANN: American rabbi; born at Lengsfeld, near Eisenach, Saxe-Weimar, Germany, January 9, 1812; died in Chicago, Ill., January 29, 1892. He was educated in Biblical and rabbinical literature by Isaac Hess, rabbi of Lengsfeld; and, under Rabbi Kunreuther, afterward continued his Hebrew studies in Gelnhausen, as well as at the Talmudic College in Frankfort, where, among others, Rabbi Solomon Trier and Rabbi Aaron Fuld were his teachers. On leaving the college, he pursued a course of pedagogical studies at the Teachers' Seminary at Weimar, and, after graduation there, accepted the position of teacher in his native town, Lengsfeld. In 1854 Adler emigrated to America, and soon after his arrival was elected teacher and preacher of the Jewish congregation at Detroit. In 1861 he received a call from the Ḳehillath Anshe Ma'arabh ("Congregation of the Men of the West"), of Chicago; with which he remained connected until his death. During the latter part of his life his congregation relieved him from the duties of his official position, and thus contributed to his ease and comfort in his declining years.

Adler was an exceedingly modest and unassuming man. He abhorred every kind of polemic, every expression of unkindness. In his religious views he was conservative; yet his conservatism did not prevent him from feeling the necessity for introducing, to a moderate extent, some reform in the liturgy of his congregation and in the ceremonial life of his people. In 1890 Adler published three volumes of sermons: "Betrachtungen über Texte aus den Fünf Büchern Mosis," 2 vols., and "57 Vorträge über Texte aus den Nachmosaischen Biblischen Büchern." A selection from Adler's sermons, in an English translation, was published by the Jewish Publication Society of America (Philadelphia, 1893), under the title of "Sabbath Hours."

B. F.

ADLER, MARCUS NATHAN: Born at Hanover, June 17, 1837; the eldest son of Chief Rabbi Nathan Marcus Adler; conspicuous for his labors in connection with education; communal worker. He entered University College, London, whence he was graduated as master of arts. He was a member of the council of Jews' College and of the Jewish High School for girls; also president of the Stepney Jewish schools.

Adler became a fellow of University College, London, and a fellow of the Royal Statistical Society, and he was also one of the founders of the London Mathematical Society. He is a vice-president of the Institute of Actuaries and the actuary of the Alliance Assurance Company. He was at one time confidential secretary of Sir Moses Montefiore. He has published numerous papers on life assurance, political economy, archeology, and Jewish history.

F. S. W.

ADLER, MICHAEL: English rabbi; born July 27, 1868. He was educated at Jews' Free School, Jews' College, and University College, London, and was graduated from the London University with the degree B.A. Adler was appointed minister of the Hammersmith and West Kensington Synagogue, London, in 1890. He became honorary chaplain at Wormwood Scrubs Prison, and senior master of Hebrew at Jews' Free School, in 1893. He is the author of "Elements of Hebrew Grammar" (1st ed. 1897, 2d ed. 1899), and "Students' Hebrew Grammar" (1899). He has contributed various articles to the "Jewish Quarterly Review" and the "Transactions of the Jewish Historical Society."

S.

ADLER, NATHAN: German cabalist; born at Frankfort-on-the-Main, Dec. 16, 1741; died there Sept. 17, 1800. As a precocious child he won the admiration of Ḥayyim Joseph David Azulai, who, in 1752, came to Frankfort to solicit contributions for the poor of Palestine. Adler attended the rabbinical school of Jacob Joshua, author of "Pene Yehoshua'," who was at that time rabbi at Frankfort; but his principal teacher was David Tebele Schiff, afterward rabbi in London. In 1761 he established a *yeshibah* himself, in which several prominent rabbis received their early teachings, notable among whom were Abraham Auerbach, Abraham Bing, rabbi in Würzburg, and especially Moses Sofer (Schreiber), rabbi in Presburg. Nathan Adler was mystically inclined. He had devoted himself to the study of the Cabala, and adopted the liturgical system of Isaac Luria, assembling about himself a select community of cabalistic adepts. He prayed according to the Sephardic ritual, pronounced the priestly blessing every day, and in other ways approached the school of the Ḥasidim, who had at that time provoked the strongest censures on the part of the Talmudists of the old school. His followers claimed that he had performed miracles (Moses Sofer, "Ḥatam Sofer, Oraḥ Ḥayyim," 197), and turned visionaries themselves, frightening many persons with predictions of misfortunes which would befall them. Finally, the rabbis and congregational leaders intervened in 1779 and prohibited, under penalty of excommunication, the assemblies in Nathan Adler's house.

R. Nathan, however, paid no attention to these orders, but continued in his ecstatic piety. He even excommunicated a man who had disregarded his orders, although this was contrary to the laws of the congregation. His doors remained open day and night, and he declared all his possessions to be common property, that thus he might prevent the punishment of those who might carry away by mistake anything with them. Moreover, he commanded Moses Sofer, who had quarreled with his father, never to speak to his parent again. When the same disciple reported to him that he had gone through the whole Talmud, he advised him to celebrate that event by a fast of three days. In spite of the continued conflict with the congregational authorities, the fame of R. Nathan's piety and scholarship grew, and in 1782 he was elected rabbi of Boskowitz in Moravia. But his excessive and mystical piety having made enemies for him, he was forced to leave his congregation, and in 1785 returned to Frankfort. As he still persisted in his former ways, the threat of excommunication was renewed in 1789, which act was not repealed until shortly before his death. His wife, Rachel, daughter of Feist Cohen of Giessen, survived him. He left no children, though Nathan Adler, chief rabbi of London, was named after him. His mysticism seems to have been the cause of his repugnance to literary publications. The cabalists claimed that real esoteric theology should never be published, but should only be orally transmitted to worthy disciples. In his copy of the Mishnah he wrote brief marginal notes, mostly cross-references. Some of them were collected and explained with admirable ingenuity by B. H. Auerbach under the title "Mishnat Rabbi Natan." One responsum is found among those of Moses Sofer on "Yoreh De'ah," 261.

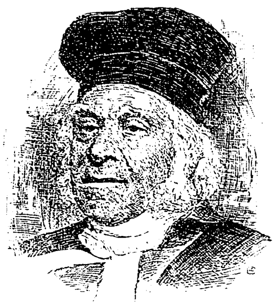
D.

ADLER, NATHAN MARCUS: Chief rabbi of the British empire; born in the city of Hanover, Germany, January 15, 1803; died at Brighton, England, on January 21, 1890. He was the third son of Marcus Baer Adler, chief rabbi of Hanover. He came from a Jewish family of Frankfort, which, for several centuries, supplied theologians to the rabbinical chairs of the Continental ghettos. Born when Hanover was an appanage of the English crown under George III., he was a British subject, and was educated on the broadest lines. In addition to Hebrew and theological learning under his father's supervision, he received a liberal education in the classical and modern languages, attending successively the universities of Göttingen, Erlangen, Würzburg, and Heidelberg. After obtaining his degree at Erlangen he was appointed, in 1830, chief rabbi of Oldenburg, and within a year he became chief rabbi of the city of Hanover.



Nathan Marcus Adler.

Election as Chief Rabbi.

In 1842 the chief rabbi of London, SOLOMON HERSCHELL, died. At this juncture a very critical subject agitated Anglo-Jewish communal life, being nothing less than a schism, which resulted in the formation, in Burton street, of a reform congregation, quite independent of the English rabbinate. Thus the election of a successor to the chief rabbi was naturally fraught with more than ordinary importance. There were fifteen candidates for the position. The final election resulted in the choice of Dr. Adler, who on July 9, 1845, was installed as chief rabbi in London.

Dr. Adler's earliest efforts were directed to the improvement of Jewish education in England, and he foresaw the necessity of planning for the systematic training of future teachers. With this object in view he propounded a scheme for the training of Jewish ministers and teachers, with which a public day-school for the sons of the Jewish middle classes was to be connected. Many obstacles stood in the way of its realization, especially the question of endowments; but through Dr. Adler's perseverance these were overcome, and, on November 11, 1855, Jews' College was inaugurated, he himself being elected its first president. After this, Dr. Adler turned his attention to synagogal administration, and, on solicitation, consented to some slight modifications in the ritual. Nor did he neglect the provincial synagogues; undertaking occasional pastoral visits to them; he succeeded in bringing them more directly under his influence. To unite the various metropolitan synagogues under a central administration was the next object of his endeavors, and it was partly at his initiative that the foundation of the United Synagogue was undertaken. A clause was inserted in the scheme providing that the forms of worship, religious observances, and all other matters connected with the spiritual administration of the United Synagogue should be under the superintendence and control of the chief rabbi. This clause, however, was rejected by the House of Lords. He drew up a code of regulations and prescribed forms of service for special occasions. He received appeals from all over the world, and worked with the Board of Deputies and the Anglo-Jewish Association for the emancipation of the Jews in Rumania and their relief in the Holy Land. In 1866 he gave evidence before the Marriage Law Commission, and prepared an important memorandum on the operation of the marriage laws as affecting Jews in England. Dr. Adler may be considered the virtual founder of the Hospital Sabbath movement among Jews, the object of which was an annual collection for the hospitals, taken up in all British synagogues. In connection with this he compiled a service for the celebration of Hospital Sabbath in the synagogues. The organization of the London and provincial charities was undertaken at his suggestion, and a more discriminating and systematic method for dealing with the poor was adopted. Dr. Adler gave impetus to the system of free religious education, and supervised its progress in the community. In 1880 a conference of delegates of the various synagogues was held to consider the question of a revision of the ritual. Thereupon a report was submitted to Dr. Adler, who conceded many of the more important recommendations of the delegates.

The United Synagogue.

In the same year the United Synagogue, finding that the pressure of his official duties was increasing, appointed a deputy delegate chief rabbi; but, notwithstanding this, Dr. Adler continued to take active interest in the affairs of the Jewish community.

Orthodoxy.

The keynote of Dr. Adler's life is to be found in his unflinching orthodoxy. His sincerity was everywhere admitted, and his love for Judaism and his loyalty to its orthodox presentation were acknowledged to be genuine and real. Great zeal for the cause of education, a benevolent disposition, and a union of Talmudic scholarship and general culture unusual among the rabbis of his generation were his most prominent characteristics.

His Writings.

He was the author of: (1) Hebrew prayers, recited during critical episodes in English history; (2) a volume of "Sermons" in German and English, including his installation address in London, "The Jewish Faith," and "The Bonds of Brotherhood"; (3) several volumes of "Derashot" (Disquisitions), delivered by him semiannually to those interested in the study of the Talmud; (4) "Responsa," several having reference to ritualistic questions in the Anglo-Jewish community (manuscript); (5) "Ḥiddushim" (Novellæ), consisting of short notes on the Talmud and Posekim, especially the Turim, with some annotations on Hai Gaon's commentary, "Seder Teharot," Berlin, 1856; (6) German translation of Judah ha-Levi's "Cuzari," with copious explanatory notes (manuscript); (7) commentary on the Targum of Onkelos entitled "Netinah la-Ger" (A Gift to the Proselyte), published with an edition of the Pentateuch, Wilna, 1875 (in connection with this commentary he edited the "Sefer Yaer," or "Patshegen," and a Masorah on the Targum); (8) "Ahabat Yonatan" (The Love of Jonathan), a work in the same style as the "Netinah" on the so-called Targum of Jonathan, consisting of three parts.

G. L.

ADLER, SAMUEL: German-American rabbi, Talmudist, and author; born at Worms, Germany, Dec. 3, 1809; died in New York, June 9, 1891. From his father, Isaac Adler, who had been one of the dayyanim, or associate rabbis, in Worms, young Adler received his first instruction in Hebrew and in the Biblical and post-Biblical literature of the Jews. When Rabbi Isaac Adler died (Dec. 23, 1822) he left his widow and five young children in straitened circumstances. Samuel, though then but thirteen, in spite of innumerable difficulties and extreme privation, continued his studies at the *yeshibot* (Talmudical colleges) in his native city and in Frankfort-on-the-Main, pursuing at the same time regular classical and general studies at the high schools of those cities. After graduating from the Frankfort Gymnasium, Adler entered, in 1831, the University of Bonn and later that of Giessen, where, in 1836, he received the degree of doctor of philosophy. His first official position was that of preacher and assistant rabbi in Worms. In 1842 he was elected rabbi of the Jewish congregations in Alzey and its neighborhood, and he remained in this position until 1857. About the beginning of that year he received a call from the congregation Emanu-El in New York, as successor to Dr. L. Merzbacher, who had died a few months previously. Adler accepted the call, and in March, 1857, entered on the duties of his office. He remained active as the spiritual head of this congregation until 1874, in which year he was made rabbi emeritus and relieved from active work for the rest of his life. G. Gottheil was his successor.

Samuel Adler was not merely a thorough Talmudical scholar; he was also a master of the entire field of knowledge concerning the Jews. Whatever had any relation to his coreligionists—their history, religion, literature, etc.—interested him and was studied by him. He was not only a scholar, but also a man of vigorous action. During the twenty-one years of his career in Germany he took part energetically in the efforts at that time being made to remove the civil disabilities of the Jews, especially the oath *more Judaico*. He succeeded in obtaining the introduction of the teaching of the Jewish religion in the lower and higher schools of Worms on equal terms with Protestant and Catholic teaching. He labored earnestly to secure the recognition of the equality of the sexes in matters of religion. It was through his influence that the barrier was leveled which had separated the women's synagogue from that of the men in the ancient synagogue of Worms. He gave his special attention to the improvement of the religious instruction of the young, both in the city and in the rural schools of which he had the supervision. He made it his aim to enhance the order, the solemnity, and the dignity of the public worship. He was instrumental in founding a number of new charitable institutions. Above all, he labored with patient zeal to instruct the congregations under his charge in their ancestral religion, to liberate them from the deadening influence of literalism, and to quicken in them the spirit of Judaism. In this endeavor he frequently drew upon the storehouse of his great Talmudic learning for the arguments which he used in his struggle for progress, seeking always to rest the reformation of manners upon a basis of inward conviction, and favoring a gradual transformation rather than an abrupt transition from the old to the new. He attended the three great rabbinical conferences held in Brunswick (1844), Frankfort-on-the-Main (1845), and Breslau (1846), respectively, and took a notable part in their proceedings. In 1854 he was elected rabbi and preacher by the Jewish reform congregation in Lemberg, Galicia, but he declined the call. Throughout his life Adler was an untiring student, and his happiest hours were those spent in his library. He belonged to what may be called the historico-critical school in the science of Judaism. He contributed scholarly articles to several learned periodicals; for example, "Contributions to the History of Sadduceeism," "Jewish Conference Papers" (New York, 1880), "Benedictions" (New York, 1882). Some of these the author collected and published under the Hebrew title, "Ḳobeẓ 'al Yad" (Collections), New York, 1886, mainly as a souvenir for his friends. His extensive library of rabbinica was presented by his family to the Hebrew Union College, Cincinnati.

B. F.

ADLER, VICTOR: Austrian physician, journalist, and leader of the Austrian labor movement; born at Prague, June 24, 1852. Having been graduated as M. D., he settled in Vienna, where his professional practise brought him in contact with the Vienna poor. Adler began to study their economic conditions, which led him to an examination of the whole social problem. So intense became his interest in this subject, that he gave up his practise and devoted himself entirely to socialism. When he joined the socialistic movement, the working classes of Austria were disorganized and wasted their energies in factional fights and anarchistic plots. Owing to his uncommon knowledge of economics, his keen wit, and organizing ability Adler became a power among them, and in 1890, after several years of educational work carried on as speaker and editor of the "Gleichheit," he united them into a strong political party. Under his leadership the chief efforts of the party were now directed toward securing universal suffrage. During this period of great agitation Adler was one of the most prominent figures in Austria. The government made concessions, and on March 9, 1897, for the first time in their history, the working men of Vienna went to the polls and elected fourteen of their candidates. Adler, who had been nominated in one of the parliamentary districts in Vienna, was defeated, owing to a combination of all the Antisemitic forces against him. He has published numerous pamphlets on political and economic questions and translated Stepniak's "Peasants" from Russian into German. Since 1894 he has been editor-in-chief of the "Wiener Arbeiter-Zeitung" and a contributor to several politico-economic reviews.

M. B.

ADMAH ("Red" or "Red Land"): A town named in the genealogical list of Canaan (Gen x. 19), whose king was Shinab (Gen. xiv. 2, 8). It was destroyed together with Sodom and Gomorrah. It is not mentioned in the narrative of the destruction of those two cities, but later accounts refer to it (Deut. xxix. 23; Hosea, xi. 8). G. B. L.

ADMISSIONS IN EVIDENCE: The best evidence in Jewish law must be attested by at least two witnesses, and be of a disinterested and impartial character; hence self-admission, or voluntary confession, is not good evidence, and is not admissible except in the cases mentioned below.

——**In Criminal Cases:** Admission in criminal cases is entirely excluded, and is not even considered in evidence. Applying the Talmudic maxims אדם קרוב אצל עצמו ("Each man is his own near relative")—relatives can not bear witness against one another—and אין אדם משים עצמו רשע ("One can not incriminate himself"), the Jewish legislators probably thought by this means to prevent the methods prevailing in their times of extorting confessions by torture. The Talmud, endeavoring to give a legal aspect to the conviction of Achan on his own confession (Josh. vii. 10–24), has the following haggadic explanation: "Joshua pleaded before the Almighty: 'O Lord of the universe, tell me who is the man?' God answered: 'I do not divulge the secret of any person; furthermore, I am no informer. But go and make investigation among the tribes and families.' When Achan, the son of Carmi, was 'taken' he protested against such a method of conviction: 'Has not Moses our master taught us, "at the mouth of two witnesses, or three witnesses, shall he that is worthy of death be put to death"?' (Deut. xvii. 6). Joshua then spoke persuasively to Achan: 'My son, I pray thee, make confession.' Achan finally confessed, 'Thus and thus have I done'; and when his confession was substantiated by the finding of the property concealed 'in his tent and the silver under it,' this made the conviction legal" (Yer. Sanh. vi. 23*b*).

Regarding admission in perjury, the Rosh (Asher ben Jehiel) wrote the following responsum:

In Perjury.

> "Replying to your inquiry: According to our laws, one who has sworn that he will do a certain thing and afterward admits, 'I have broken my oath and not done as I have sworn'—which fact could not be established by witnesses, but solely by his own admission—does not become thereby a disqualified witness for future cases, as the rule is, 'a man cannot incriminate himself,' and this person who took an oath to enter the accounts in the book justly, truthfully, and to the best of his ability, and now admits false and fraudulent entries, is not to be regarded a perjurer by law, inasmuch as it can not otherwise be proved that he has presumptuously broken his oath. However, should you think it advisable and proper to inflict a punishment on him for contempt and barefacedness for saying that he has broken his oath, you may act in accordance with your discretion.
>
> "Attested by the writer,
>
> "ASHER, son of Jehiel of blessed memory."
>
> (Rosh, "Responsa" No. 5, rule ii.)

Admission involving the guilt of another person is valid, though not operative against the person making it, as in the case of unnatural offenses (Sanh. 9*b* *et seq.*). Raba's rule in this case is פלגינן דבורא ("We split the testimony"), the first part being excluded; otherwise the maxim is עדות שבטלה מקצתה בטלה כולה ("Testimony partly annulled is all annulled").

——**In Civil Cases:** Admission effecting one's own loss is regarded as good evidence, the maxims concerning criminal cases being reversed: אין אדם קרוב אצל ממונו ("One is *not* related to one's money"; Sanh. 10*a* *et passim*), and therefore man may testify against himself in civil cases and הודאת בעל דין כמאה עדים דמי ("The admission of the defendant is as good as a hundred witnesses"; Tosef. B. M. i. 10 *et passim*). The only benefit one can derive by one's admission is to save an extra fine; as in the case of a person admitting seduction, who must pay damages for degradation and impairment, but need not pay as a fine the amount of the legal dowry (Ex. xxii. 16, Shebu. v. 4, Ket. 42*a*). Similarly, in the case of a thief; if he admits his guilt, he must make restitution for the stolen property, but need not pay the fine of double, four, or five times the amount of the theft, as the case might otherwise require (Ex. xxi. 37, xxii. 3): provided, however, that the admission was made before the bet din, or court, and before he was sued and evidence was produced against him; otherwise his subsequent admission is of no avail to release him from the fine (Maimonides, "Hilkot Genebah," iii. 8, 9).

Of a Debt.

Admission of a debt must be made before two men expressly requested to serve as witnesses on this particular point; otherwise, if stated in the absence of the creditor, the debtor can claim that the statement was made for the purpose of making people believe he was poor. Then, again, if the creditor was present, the debtor can claim that the statement was made in fun, משטה הייתי ("I have been joking"). In fact, the debtor's silence to the creditor's demand, before witnesses, is a better indication of his consent than his admission under these circumstances. The best safeguard for the creditor is to have the debtor admit his indebtedness after due demand in court, when the debtor can not have recourse to any such excuses (Sanh. iii. 6, 29*a*; "Shulḥan 'Aruk, Ḥoshen Mishpaṭ," § 32).

Admission of a debt by a person on the point of death, however, is valid in any event, as אין אדם משטה בשעת מיתה ("One is not likely to joke on his death-bed"; B. B. 175*a*; "Ḥoshen Mishpaṭ," § 81, 2).

Admission in writing must be made by the debtor dictating the contents, appointing the witnesses (אתם עדי), and ordering them to write and sign the note (כתבו וחתמו), which makes it a recorded document pledged by the debtor's landed property, which can be seized for the payment of the note even from subsequent purchasers; otherwise the note has no more value than an unsecured debt, and his property subsequently sold can not be held for the payment of the note. Hence the witnesses must not act without special instruction from the debtor (Maimonides, "Hilkot Malweh," xi. § 1).

If there are two partners, *A* and *B*, in a firm, admission made by partner *A* of the payment of a debt from *C*, a debtor of the firm, due the partnership, *A* claiming to have received the money and put it in the partnership treasury is not binding on partner *B*, who disputes the fact. However, *C* is released of his debt by the admission of *A*, who must prove his statement or reimburse *B* (Maimonides, "Hilkot Sheluḥin," x. 6).

Of Part Payment

Admission by a debtor of part payment, if made after suit has begun, subjects the debtor to an oath; whereas a debtor, by general denial, is legally exempt from the oath. The Talmud reasons that in the latter case a man having the effrontery to deny outright will not shrink from swearing falsely. In case witnesses testify to the full payment the oath is administered to the debtor who admits only part payment; but purchasers of his property can claim that they rely on the testimony of the witnesses as to the full payment of the note (Mishnah Shebu. vii. 1; Maimonides, "Hilkot Ṭo'en," iii. § 1, iv. § 1 *et seq.*).

ADMON B. GADDAI: One of three police-court judges in Jerusalem mentioned in the Talmud—the others being Ḥanan b. Abishalom (Ḥanan the Egyptian) and Nahum the Median. Altogether there were nearly four hundred such judges in Jerusalem; but only the most prominent among them are mentioned by name, and of these Admon is the chief. These judges formed an exception to the rule forbidding judges to receive remuneration (Mishnah Bek. iv. 6), their salaries being paid from the funds of the Temple treasury. Each of them was allowed annually ninety-nine manah (see Coins); but where family circumstances required it the judge was allowed to draw a larger amount (Ket. 105*a*). At what particular age they flourished can not be ascertained with precision; but from the fact that Rabban Johanan b. Zakkai and Rabban Gamaliel expressly sanction some of Admon's and Ḥanan's decisions (Ket. xiii. 1–9) it necessarily follows that their terms of office preceded the fall of Jerusalem. S. M.

ADMONI. See Rufus.

ADOI: Name of the father of Hananiah, a *resh galuta* (prince of the captivity), who flourished about 700. It is interesting as exhibiting the Persian form of a Semitic name, which is none other than the familiar Ida, or Ada (Adda), known from Jewish and Palmyrene sources, to which has been added the Persian suffix *oi*, as a term of endearment.

ADOLESCENTOLI, DEGLI, or **DEI, FANCIULLI (הנערים):** One of the four or five noble families which, according to legend, were transported by Titus (70–81) from Jerusalem to Rome. The history of this family, however, can only be traced to the fourteenth century. In the fifteenth century the family seat was at Bologna. A notable representative of this family was Moses ben Judah Nagari. In the fourteenth and fifteenth centuries there were in Spain and in southern France families named Dels Infanz and Dels Fils, distinguished for wealth and learning. It is probable that they were connected with the Italian family Degli Adolescentoli.

M. R.

ADOLPHUS, SIR JOHN: English lawyer, historical and political writer; born at London in 1768; died there July 16, 1845. His grandfather, a Jew of German extraction, was physician in ordinary to Frederick the Great of Prussia, and wrote a French romance, "Histoire des Diables Modernes." Adolphus' father was not in easy circumstances, and only through the liberality of an uncle was Adolphus enabled to live in London. To this relative he owed his education, as well as his indenture to an attorney in 1783. On completing his articles in 1790 he was duly admitted to the bar. In 1793 Adolphus married a Miss Leycester, of White Place, Berkshire, "a lady of good family and small fortune." For several years he continued to neglect law for literature. At first he assisted Archdeacon Coxe with his "Memoirs of Sir Robert Walpole," and then published his own "Biographical Memoirs of the French Revolution" (1799); "The British Cabinet, containing Portraits of Illustrious Personages, with Biographical Memoirs," and "History of England from the Accession of George III. to the Conclusion of Peace in 1783" (1802). The last-mentioned work exhibits considerable learning and independent research, and was commended by the "Edinburgh Review" (1802, No. 2) "for its perfect impartiality in narrating events and in collecting information."

Through the success of his work and the kind offices of Archdeacon Coxe, Adolphus was brought into contact with Addington, the prime minister, who engaged him for political work which included pamphleteering and electioneering. In 1803 he published a "History of France from 1790 to the Abortive Peace of Amiens," and a pamphlet, "Reflections on the Causes of the Present Rupture with France." Shortly afterward Adolphus resolved to return to the profession of law. He entered himself at the Inner Temple in 1803, and was called to the bar in 1807. He took up criminal law as a specialty, and became one of the leading members of the English bar. Among his more notable forensic successes is his ingenious defense of Thistlewood and the other Cato street conspirators in 1820. His legal career being now firmly established, he again devoted a part of his time to literature, and published "The Political State of the English Empire" (four volumes, 1818), "Observations on the Vagrant Act" (1824), and "Memoirs of John Bannister" (1839). Bannister was a comedian with whom he was intimately acquainted. In 1840 he resolved to continue his "History of England," and reissued the first volume, which had gone through four editions. By 1845 he had issued seven volumes, and was at work on the eighth when he died. Apart from these elaborate works, he wrote several essays for the "British Critic" and the "Annual Register."

ADOMIM BEN TAMIM. See Dunash ben Tamim.

ADONAI (אֲדֹנָי, literally "my Lord," the plural form of Adon, that is, "Lord" or "Lordship"): This word occurs in the Masoretic text 315 times by the side of the Tetragram YHWH (310 times preceding and five times succeeding it) and 134 times without it. Originally an appellation of God, the word became a definite title, and when the Tetragram became too holy for utterance Adonai was substituted for it, so that, as a rule, the name written YHWH receives the points of Adonai and is read Adonai, except in cases where Adonai precedes or succeeds it in the text, when it is read Elohim. The vowel-signs *e*, *o*, *a*, given to the Tetragrammaton in the written text, therefore, indicate this pronunciation, Aedonai, while the form Jehovah, introduced by a Christian writer about 1520, rests on a misunderstanding. The translation of YHWH by the word Lord in the King James's and in other versions is due to the traditional reading of the Tetragrammaton as Adonai, and this can be traced to the oldest translation of the Bible, the Septuagint. About the pronunciation of the Shem ha-Meforash, the "distinctive name" YHWH, there is no authentic information. In the early period of the Second Temple the Name was still in common use, as may be learned from such proper names as Jehohanan, or from liturgical formulas, such as Halelu-Yah.

Pronunciation.

At the beginning of the Hellenistic era, however, the use of the Name was reserved for the Temple. From Sifre to Num. vi. 27, Mishnah Tamid, vii. 2, and Soṭah, vii. 6 it appears that the priests were allowed to pronounce the Name at the benediction only in the Temple; elsewhere they were obliged to use the appellative name (*kinnuy*) "Adonai." Philo, too, in referring to it says ("Life of Moses," iii. 11): "The four letters may be mentioned or heard only by holy men whose ears and tongues are purified by wisdom, and by no other in any place whatsoever." According to Josephus ("Ant." ii. 12, § 4):

> "Moses besought God to impart to him the knowledge of His name and its pronunciation so that he might be able to invoke Him by name at the sacred acts, whereupon God communicated His name, hitherto unknown to any man; and it would be a sin for me to mention it."

Pronunciation of the Name by the Temple priests also gradually fell into disuse. Tosef., Soṭah, xiii. 8, quoted Menaḥot, 109*b*, and Yoma, 39*b*, relates that "from the time Simon the Just died [this is the traditional expression for the beginning of the Hellenistic period], the priests refrained from blessing the people with the Name"—in other words, they pronounced it indistinctly, or they mouthed or mumbled it. Thus says Tosef., Ber. vi. 23: Formerly they used to greet each other with the Ineffable Name; when the time of the decline of the study of the Law came, the elders mumbled the Name. Subsequently also the solemn utterance of the Name by the high priest on the Day of Atonement, that ought to have been heard by the priests and the people, according to the Mishnah Yoma, vi. 2, became inaudible or indistinct.

The Use of the Name.

R. Ṭarfon (or Tryphon) relates (Yer. Yoma, iii. 40*d*): "I was standing in the row of young priests, and I heard the high priest mumbling the Name, while the rest of the priests were chanting." Thus the correct pronunciation became a secret, entrusted only to the *kasherim* (worthy ones) or the *ẓenu'im* (Essenes = "the humble or chaste ones"), but withheld from the frivolous, the Hellenists (*peruẓim*); and even the former were taught it only once every seven years, and then only after due purification and sanctification (see Ḳid. 71*a*; Yer. Yoma, *l.c.*, and compare Tosef., Yadayim, at the close, in Simson of Sens' commentary). "Wo upon you, ye Pharisees, who pronounce the Holy Name each morning without due purification!" said the Hemerobaptists; whereupon the Pharisees sarcastically replied: "Wo upon you who pronounce the Holy Name with an organ of the body, while your body itself is unholy!" However, it appears from Ta'anit, 19*a* and 'Ab. Zarah, 18*a*, that the Essene saints made use of the Name in their invocations and miraculous cures, which was afterward declared to be a grievous sin (Sanh. x. 1; compare also Book of Wisdom, xiv. 21). But while even among these the right pronunciation was forgotten in the course of time, and the hope was expressed by Phinehas b. Jair, "the Saint," that the knowledge and the correct use of the Name, so wondrously efficacious in the blessed days long gone by, would again be restored in the Messianic age (see Pes. 50*a*, Midr. Teh. to Ps. xxxvi. and to Ps. xci.), according to R. Mana of the fourth century (Yer. Sanh. x. 28*b*), the Samaritans then used the Ineffable Name in their oath, and Theodoret, the

Church father, in the fifth century, tells us that he heard it pronounced by them as *Yabe*, which is the equivalent of *Yahweh*. Even in the writing of the Name scrupulous care had to be taken by the scribes (see Soferim, v. 6).

The day on which the Pharisees succeeded in abrogating the ancient Sadducean custom of having the Sacred Name written in public documents was celebrated as a great day of thanksgiving (explained correctly by Dalman, against R. H. 18*b*; compare with Yadayim, iv. 8, "Wo upon you, ye Sadducees, who write the name of the temporary ruler alongside of the Sacred Name!"). No wonder, then, that the Greek translators of the Bible, even though some scribe might now and then write the Tetragrammaton in the archaic Hebrew form on the margin, ΠΙΠΙ, as found by Origen (see facsimile attached to article Aquila), took great care to render the name ΠΙΠΙ regularly Κυριός, Lord, as if they knew of no other reading but Adonai. Translations dependent upon the Septuagint have the same reading of the Name. Not from "superstitious fear" or misapplication of the third command of the Decalogue or of Lev. xxiv. 11, but from a reverential feeling that the Name ought not to be pronounced except with consecrated lips and to consecrated ears, the substitute "Lord" came into use. Yet this simple measure, introduced to guard the Name against profane use, formed one of the most powerful means of securing to the Biblical God the universal character with which He is invested as the Lord of Hosts and the Ruler of men and nations. YHWH, as the God of Israel, might still be taken as a tribal God; *The Lord* is no longer the God of one people; He is Lord of all the world, the Only One. Compare Name of God, Shem ha-Meforash, and Tetragrammaton.

K.

ADONAI, ADONAI: The *pizmon* (hymn) on the thirteen Attributes of God in the *selihot* (propitiatory prayers) for the fifth intermediate day of the Ten Days of Penitence, according to the northern liturgies. It is repeated in full in the "Ne'ilah" service of the Day of Atonement. There are five verses bearing the acrostic Amittai, the author's name, with a refrain compounded of the thirteen attributes of God (Ex. xxxiv. 6, 7, according to Rosh ha-Shanah, 17*b*, and the final clause of ver. 9 of the same chapter); being the propitiatory versicle running through the whole system of selihot. This pizmon is usually associated with the beautiful melody given on the previous page, a characteristically Polish utilization of the plaintive Oriental chromatic scale. The melody is not of great age. F. L. C.

ADONAI BEKOL SHOFAR (יי בקול שופר): A short *pizmon* of four stanzas, each ending and commencing with the respective halves of Ps. xlvii. 6. It is chanted in the Sephardic liturgy before the first sounding of the shofar on the Day of Memorial, or New-year festival. The traditional melody, which is repeated after the second sounding of the shofar in the *musaf* prayer, bears some resemblance to old tunes of Provence and Navarre, and may be fairly regarded as a folk-song from the Pyrenean region, adapted for use in worship by the Spanish Jews of the fourteenth century, in accordance with a practise already familiar in the day of Abraham ibn Ezra and Judah ha-Levi, and continuing down to the period of the Expulsion. The secular names of such melodies are given in the rubrics of many editions of the Sephardic Mahzor, the hymns (*piyutim*) included in which, while comparatively few in number, more closely reproduce the meter and rhythm of the Gentile secular verse than the "rimed prose" which occurs so frequently in the northern liturgy. These hymns thus lent themselves readily to secular melodies. F. L. C.

ADONAI MELEK (יי מלך): A refrain of frequent occurrence, particularly during the services of the days of penitence, built up of the following Scriptural phrases: "The Lord reigneth" (Ps. x. 16, *Heb.*); "The Lord reigneth" (Ps. xciii. 1); and "The Lord shall reign for ever and ever" (Ex. xv. 18). Being introduced into the penitential services of both the Ashkenazic and Sephardic liturgies as a refrain, phrase by phrase, to poems in stanzas of three verses, the two traditional melodies may be quoted in contrast, since they are characteristic of the individual differences between the traditional music of the northern and that of the southern Jews of Europe. In the Sephardic liturgy (along, at least, the Dutch, which is also the British and Colonial, line of transmission;

for the Italians have perhaps approximated to the Ashkenazim in this respect) the melodies are intended more for congregational singing than for the cantor's elaboration. Thus they usually present a definite rhythmic form, with the simple outline of a folk-song, from which, indeed, many were first adapted; and their tonality rarely is other than the minor or the major mode. The Sephardim have more traditional strains suited for rendering by a congregational unison, and as a result these melodies have varied but little in local tradition.

In the Ashkenazic liturgy, however, the cantor was, from ancient times, not so much the leader of the congregational song as the practised vocalist who musically interpreted the text to the listening congregation. More rarely, in consequence, were the melodies founded on, or imitated from, the secular music of the land and time; but they were developed from snatches of tune of earlier origin or from brief quotations from parts of the service-music of cognate intention. Thus the northern intonations for parallel passages are, generally, nearer to cantillation than to tune, of irregular and unrhythmic form, and the original lines are well overlaid with melismatic adornment, ill-adapted for congregational rendering, and frequently varying in non-essential details, according to the particular line of tradition.

Moreover, the northern melodies handed down from the Middle Ages are largely "modal"—constructed, that is, in scales such as those of the Catholic plain-song, where the "tonic" is some note other than the *do* or *la* of the modern modes, and the semitones in consequence fall into a different position in the octave from those which characterize the major and minor scales.

Finally, the old northern intonations often differ in the phrase with which they close, alike from the Sephardic and from modern melodies, since the cadence rarely rises to the keynote, but falls to it, or often to the dominant, as in the "plagal cadence," a frequent form of which is given in the example above. Bourgault-Ducoudray has drawn attention to the frequent occurrence of this interval in the melodies of the Levant. F. L. C.

ADONI-BEZEK.—Biblical Data: Canaanitish king (Judges, i.5-7), in the town of Bezek. He was routed by Judah and fled, but was caught. His thumbs and great toes were cut off, as a divine retribution—as he himself acknowledged—for the same mutilation visited by him upon seventy kings. Such treatment rendered the captives practically harmless in case of war, as they could neither run nor handle the bow. See ADONI-ZEDEK. I. M. P.

——**In Rabbinical Literature:** The Midrash suggests that the purport of the Biblical account of

Adoni-bezek's former greatness was to show how very powerful and wealthy were the Canaanites whom Israel conquered by the grace of God. For even Adoni-bezek, compared with others among them, must have been only an unimportant chieftain; since his name is lacking in the list of kings in Josh. xii. 9–24, and this in spite of the fact that he had subjugated seventy other kings (Yalḳ. on Judges, § 37, quoted from Sifre, but not found there). L. G.

ADONIJAH ("Yah is Lord"). — **Biblical Data: 1.** Fourth son of David, by Haggith. After Absalom's death he claimed to be the rightful heir to the throne, by summoning the court officials to a solemn sacrifice (I Kings, i. 5). Adonijah was supplanted by Solomon through the influence of Bath-sheba, the mother of the latter, and through the diplomacy of the prophet Nathan. After his retirement he was put to death by Solomon for seeking in marriage Abishag, David's concubine. This was regarded as an act of constructive treason (I Kings, ii. 25 [A.V. 26]). J. F. McC.

——**In Rabbinical Literature:** According to the rabbis, the expression "and his mother bare him after Absalom" (I Kings, i. 6) is used to indicate that both these sons of David were of the same type and that their actions were similar (B. B. 109*b*, Midr. Teh. on ii. 7), as is shown by the fact that both were pretenders to the throne, and that each kept fifty runners. These were not ordinary footmen, but were men whose spleens had been cut out and the fleshy soles of whose feet had been cut away, both of which operations were held to make running easy (Sanh. 21*b*; 'Ab. Zarah, 44*a*). All this, however, was of no avail to Adonijah. His incapacity for the throne was revealed by the fact that the crown of David did not fit him: this crown miraculously fitted the legitimate kings of the house of David only (Sanh., *l.c.*). The rabbis ascribe Adonijah's death at the hands of Solomon to his anxiety to usurp the throne, in consequence of which Solomon seized the first pretext offered to put his brother out of the way (I Kings, ii. 13 *et seq.*; Yer. Peah, i. 16*a*). L. G.

2. A Levite of the time of Jehoshaphat (II Chron. xvii. 8). **3.** One of the chiefs of the people at the time of the restoration (Neh. x. 16). In Ezra, ii. 13; viii. 13, and Neh. vii. 18 he appears under the name of Adonikam. The latter form is probably correct. J. F. McC.

ADONIM HA-LEVI. See DUNASH BEN LABRAT.

ADONIRAM (also **ADORAM, HADORAM**; "The Lord is Exalted"): Superintendent of the collection of taxes in the reigns of David, Solomon, and Rehoboam ("Adoram," II Sam. xx. 24; "Hadoram," II Chron. x. 18). In both cases, the Septuagint gives "Adoniram." He was stoned to death by the seceding Israelites in the reign of Rehoboam, by whom he had been sent to collect the tax in the north (I Kings, iv. 6; v. 14; xii. 18). G. B. L.

ADONIS (BAAL OF THE PHENICIANS). See TAMMUZ.

ADONIS PLANT. See NAAMAN.

ADONI-ZEDEK ("Zedek is Lord"): King of Jerusalem at the time of the Hebrew invasion of Palestine (Josh. x. 1, 3). He led a coalition of five of the neighboring Amorite cities to resist the invasion, but the allies were defeated at Gibeon, and suffered at Beth-horon, not only from their pursuers, but also from a great hail-storm. The five allied kings took refuge in a cave at Makkedah and were imprisoned there until after the battle, when Joshua commanded that they be brought before him; whereupon they were brought out, humiliated, and put to death. The name Adoni-zedek seems to be corrupted into Adoni-bezek in Judges, i. 5–7.

BIBLIOGRAPHY: G. F. Moore, *Judges*, in *International Critical Commentary*, p. 16.

D. G. L.

——**In Rabbinical Literature:** According to the Midrash, the name Adoni-zedek means "Master of Zedek"—that is, "of Jerusalem," the city of righteousness (*ẓedeḳ*; Gen. R. xliii. 6). L. G.

ADON 'OLAM (אדון עולם) **Music:** One of the few strictly metrical hymns in the Jewish liturgy, the nobility of the diction of which and the smoothness of whose versification have given it unusual importance. According to the custom of the Sephardim and in British synagogues generally, it is congregationally sung at the close of the Sabbath and festival morning services, and among the Ashkenazim also it often takes the place of the hymn YIGDAL at the close of the evening service on these occasions, while both hymns are almost universally chanted on the Eve of Atonement. Because of this solemn association, and on account of its opening and closing sentiments, the hymn has also been selected for reading in the chamber of the dying. It is likewise printed at the commencement of the daily morning prayer, that its utterance may help to attune the mind of the worshiper to reverential awe. In the Sephardic version the hymn comprises six stanzas of two verses each, but the fourth (which is but an amplification of the third) is omitted by the Ashkenazim. For so wide-spread and beloved a hymn, the traditional tunes are singularly few. Only four or five of them deserve to be called traditional. Of these the oldest appears to be a short melody of Spanish origin (see A below).

Of similar construction is a melody of northern origin associated by English Jews with the penitential season (see B below).

This melody is often sung antiphonally, between precentor and congregation, although it was obviously intended for congregational rendering only, like the Spanish tune given above it. The best known of the other traditional antiphonal settings exists in two or three forms, the oldest of which appears to be the one given below (C).

Every one of the synagogal composers of the nineteenth century has written several settings for "Adon 'Olam." Most of them—following the earlier practise of the continental synagogues during the modern period (see CHOIR)—have attempted more or less elaborately polyphonic compositions. But the absurdity of treating an essentially congregational hymn so as to render congregational singing of it impossible is latterly becoming recognized, and many tunes in true hymn form have been more recently composed. Special mention should be made of the setting written by Simon W. Waley (1827–76) for the West London Synagogue, which has become a classic among the British Jews, having been long ago adopted from the "reform" into the "orthodox" congregations of England and her colonies. It is here excerpted from the music-book of that synagogue by the wardens' kind permission (see D below). F. L. C.

[The Adon 'Olam is one of the most familiar hymns in the whole range of the Jewish liturgy, employed in the various rituals all over the world, though not always at the same period of the service or on the same occasions; thus in the Roman Maḥzor it is placed at the end of the Sabbath service and sung together with Yigdal (Zunz, "Ritus," p. 80). In the Sephardic liturgy it has twelve strophes; in the German, only ten. Baer, in his commentary on the "Prayer-book" (Rödelheim, 1868), says that the hymn seems to have been intended to be recited before retiring, as it closes with the words: "Into His hand I commit my spirit when I fall asleep and when I awake." It may be, however, that the beauty and grandeur of the hymn recommended its use in the liturgy, and that it was chanted indiscriminately at the beginning or the close of the service. The date and the name of the author are unknown.

The following translation of the hymn, in which the meter of the original has been preserved, is by F. de Sola Mendes:

ADON 'OLAM.

The Lord of all, who reigned supreme
Ere first Creation's form was framed;
When all was finished by His will
His Name Almighty was proclaimed.

When this our world shall be no more,
In majesty He still shall reign,
Who was, who is, who will for aye
In endless glory still remain.

Alone is He, beyond compare,
Without division or ally;
Without initial date or end,
Omnipotent He rules on high.

He is my God and Savior too,
To whom I turn in sorrow's hour—
My banner proud, my refuge sure—
Who hears and answers with His power.

Then in His hand myself I lay,
And trusting, sleep; and wake with cheer;
My soul and body are His care;
The Lord doth guard, I have no fear!

Bibliography: Landshuth's note in *Siddur Hegyon Leb*, p. 5, Königsberg, 1845.

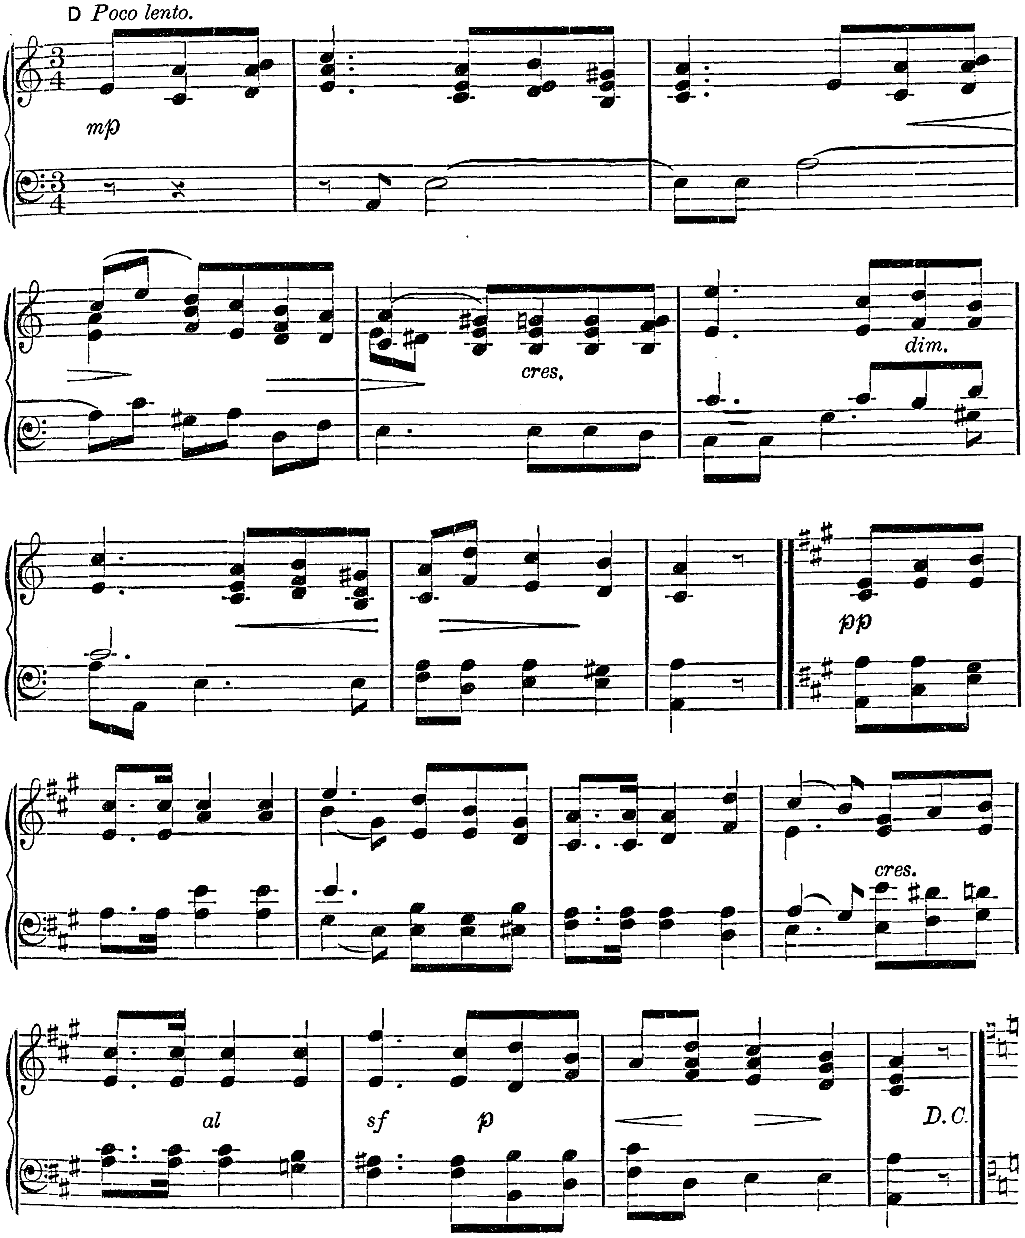
K.]

ADOPTION: The *adrogatio* of the older Roman law—a legal process by which a man can create between himself and a person not his child relations that properly belong only to father and child—is unknown to both Biblical and Talmudic law. But the feeling that the man and woman who bring up a child, and more especially those who teach the child virtue and the fear of God, should be honored as parents is strongly expressed in the Talmud (Sanh. 19*b*), which, in the usual way, strengthens the views of the sages with quotations from Scripture. Concerning the sons of Michal, daughter of King Saul, mentioned in II Sam. xxi. 8, Rabbi Joshua b. Ḳorḥa, one of the sages of Mishnaic times, asks:

"Did Michal bear them? Did not rather Merab bear them? Merab bore them, and Michal reared them; to teach us that whoever rears an orphan in his own house is, in the words of Scripture, deemed its parent. R. Ḥanina drew the same doctrine from Ruth, iv. 17. 'And the women her neighbors gave it a name, saying, There is a son born to Naomi.' Now, did Naomi bear him? Did not Ruth bear him? Ruth bore him and Naomi reared him; therefore he is called Naomi's child.

"R. Eleazar, quoting Ps. lxxvii. 15, finds the doctrine in these words: 'Thou hast with thine arm redeemed thy people, the sons of Jacob and Joseph. Selah!' And was not Jacob their father? Yes; Jacob begat them, but Joseph nourished them; therefore they take his name. R. Samuel b. Naḥmani says, on the authority of R. Jonathan: Whoever teaches the son of his companion the Law, has the right, in the sense of Scripture, to be deemed that person's father: for it is said (Num. iii. 1, 2): 'These are the generations of Aaron and Moses,' and farther on: 'And these are the names of the sons of Aaron'; this is to

ADON 'OLAM



tell thee that Aaron begat them, and Moses taught them: hence they are set down under Moses' name."

Adoption in Female Line.

By a similar exegetical process Moses is called the son of Bithiah, the daughter of Pharaoh (I Chron. iv. 18), whom legend identifies with the Egyptian princess who saved and reared Moses (Meg. 13*a*). As a matter of fact the Scriptures show how Pharaoh's daughter brought up Moses, as if she were his mother; and how Mordecai, after the death of Esther's father and mother, "took her unto himself for a daughter" (Esth. ii. 7), and Esther treated him with the implicit obedience due to a father. But it is not likely that, in case of his death, she would have inherited his estate in preference to nearer blood relations; neither does it appear that a method for creating such a relation between them as would make her his heiress was ever known to the laws of Israel.

There is, however, one passage in Scripture (Gen. xlviii. 5), "Ephraim and Manasseh . . . are mine; as Reuben and Simeon, they shall be mine," which indicates that the writer was probably acquainted with Adoption in the legal sense, such as would give to the chosen children the right of inheriting from the person adopting them; for the obvious intent of the passage is to account for the establishment of two tribes, Ephraim and Manasseh, with distinct territories, on an equality with the tribes claiming descent from Jacob's sons. L. N. D.

Adoption in a legal sense is practically unknown in lands and conditions in which in case of childlessness a man may marry another wife in order to beget a son for his heir (see Koran, sura xxxiii. 3, and Hughes, "Dictionary of Islam," *s.v.* "Adoption"). In fact, the Mosaic institution of the LEVIRATE, by which the surviving brother is enjoined to marry his deceased brother's wife in order to give him a male heir, shows that Adoption in the Roman sense did not exist among the ancient Hebrews (see Deut. xxv. 5–6; compare, however, Sifre, ii. 289; Yer. Yeb. ii. 10*b*; Bab. Yeb. 24*a*, where this primitive view is no longer accepted). The Adoption of the slave as son and heir, as indicated in the Bible in the words of Abraham, "One born in my house is mine heir" (Gen. xv. 3), was probably practised frequently in the manner described in I Chron. ii. 34 *et seq.*, where Sheshan is mentioned as having given his daughter as wife to his servant and adopted their sons as his own.

Yet some form of Adoption was in use in Biblical times. At first, barren wives are found giving to their husbands their female slaves with the view of adopting any children borne by the latter (Gen. xvi. 2, xxx. 3), the mode of Adoption being that the handmaid brought forth her child upon the knees of the adoptive mother (Gen. xxx. 3; compare Gen. l. 23). According to Josephus ("Ant." i. 7, § 1), Abraham, being at first childless, adopted Lot as his son. According to Philo ("Vita Mosis," i. 5) and Josephus ("Ant." ii. 9, § 7), the daughter of Pharaoh formally adopted Moses as her son (Ex. ii. 10). So Ruth, iv. 16 and Esth. ii. 7 are understood by many (see Vulgate to Esther) as referring to Adoption; the placing of the child upon the knee or bosom (Ruth, iv. 16) resembling the old Teutonic mode of Adoption (Grimm, "Deutsche Rechts-Alterthümer," p. 464). According to Ewald ("Alterthümer," p. 191), the mode of Adoption was the casting of a garment upon the person to be adopted: the term "Mantelkind," in German, points to the same origin. Elijah cast his mantle upon Elisha to indicate that he had adopted him as his spiritual heir (I Kings, xix. 19–21); and so, Ewald thinks, should the words be explained which Ruth uses to Boaz: "Spread thy skirt over thy handmaid, for thou art the redeemer" (*go-el*) (Ruth, iii. 9). When the Lord finds Israel as a waif in the wilderness, He is described as performing the same symbolical rite: "I spread my skirt over thee, and covered thy nakedness, and entered into a covenant with thee" (Ezek. xvi. 8). Now, while the former sentence was rather to denote a nuptial relationship (see W. Robertson Smith, "Kinship and Marriage in Early Arabia," p. 87), it is probable that this was the original mode of recognizing paternal relations to a child with the duty of protection implied thereby. It is possible that spreading of the garment over a woman was a more primitive form of marriage; while the spreading of the mantle as in the case of Elisha was a mode of installation or investiture as prophet. Accordingly, the stranger who enters into new religious relation with the Deity of his adopted land is said to come under the wings of the Deity whose protection he seeks. Thus Boaz says to Ruth: "A full reward be given thee of the Lord, God of Israel, under whose wings thou art come to seek refuge" (Ruth, ii. 12). This became the standing expression for conversion to the Jewish religion in rabbinical times; for example, Abraham brought many Gentiles under the wings of the Shekinah (Ab. R. N. ed. Shechter, text *B*, xxvi., and elsewhere). God is in this manner represented as extending His Fatherly protection to the proselyte who recognizes Him as his God and Father. From this point of view Paul always speaks of conversion as "adoption" (*υἱοθεσία*), literally, acceptance as God's children: Rom. viii. 15, "Ye have received the Spirit of adoption [being accepted as children], whereby we cry, Abba, Father"; Rom. ix. 4, "Israelites, to whom pertaineth the adoption" [= the acceptance as God's children]; Gal. iv. 5, Eph. i. 5. Compare "Apost. Const." ii. 26 and 32, "The bishop, your father, leads you to a new birth for adoption."

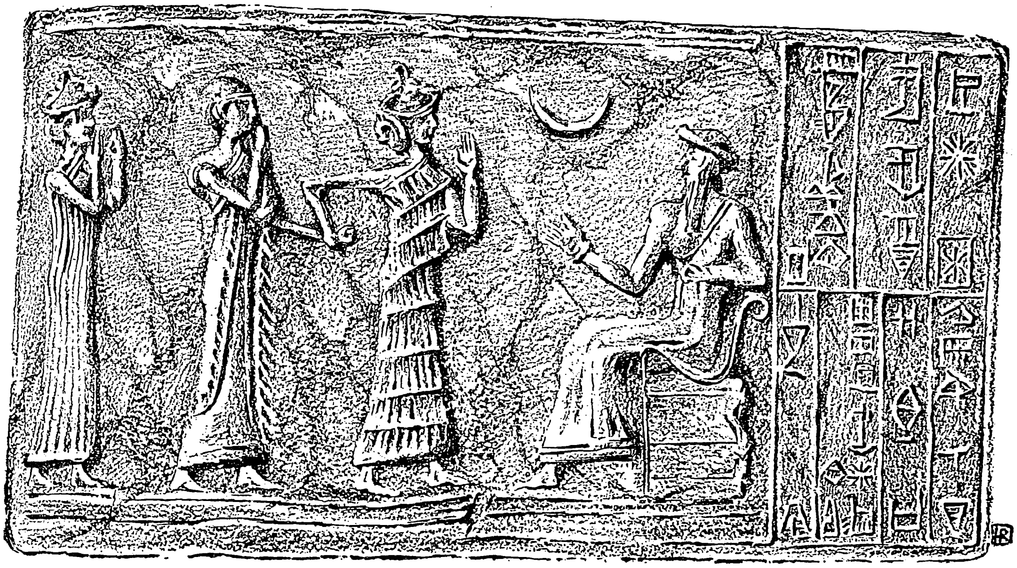
ADORAIM: Fortified city built by Rehoboam in Judah; now called Dura (II Chron. xi. 9 *et seq.*).

G. B. L.

ADORAM. See ADONIRAM.

ADORATION, FORMS OF: The various gestures and postures expressive of homage. In religious adorations these gestures and postures were originally innate and natural expressions of religious feeling, but in the course of religious development they became merely external, without conscious regard to what they were supposed to express. From the time that man conceived his god in accordance with the analogies of the physical world around him (see ANTHROPOMORPHISM), the relationship of man to God expressed itself also in accordance with the characteristics of the two factors—man and God. Thus, with the ancient Hebrews, kissing and stroking the idol was one of the oldest characteristics of worship; so, too, their kinsmen, the Arabs, manifested reverence toward their stone images mainly by these two methods of caress (Wellhausen, "Reste d. Arabischen Heidenthums," p. 109). The Jews, in prophetic times, practised the kissing of Baal (I Kings, xix. 18) and also of the golden calves (Hosea, xiii. 2). Where the idol was inaccessible, it was considered sufficient to throw a kiss with the hand—a form of adoration widely prevalent among the Greeks and Romans of antiquity (see Job, xxxi. 27). The Latin *adoratio* and the Greek *προσκυνεῖν*, which are the terms generally used for adoration, signified, originally, this kiss from the hand. The significance of stroking the idol in ancient Israel is shown by the expression חלה את פני ה' ("to implore God's grace"), which, according to Marti ("Geschichte der Jüdischen Religion," p. 34), originally meant "to propitiate the god" by stroking the face of the idol (compare Ps. xlv. 13; Prov. xix. 6, *Heb.*). To appear barefooted in the sanctuary was another ancient Semitic mode of adoration, as may be seen from Ex. iii. 5 and Josh. v. 15; and also from the fact that the heathen Arabs performed their sacred pilgrimage barefoot (Wellhausen, *l.c.* 110). The underlying idea seems to have been to avoid polluting the deity residing in the shrine by bringing into that shrine the dust of the street.



Worshipers of the Stars.

(From Menant, "Glyptique Orientale.")

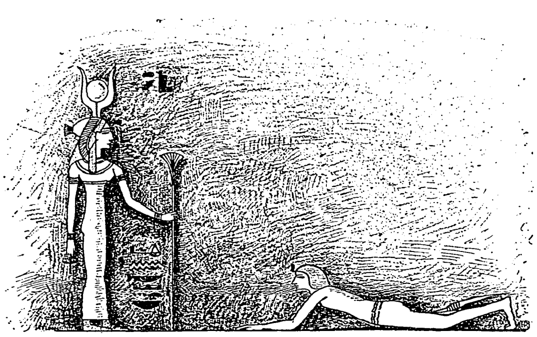
In Prophetical Times. With the spiritual development of Jewish worship—in other words, with the triumph of the prophetic idea—the ancient Forms of Adoration could not remain unchanged, and were therefore, like so many other ancient customs, adapted to the newer religious views. Thus, the various gestures and positions of the body at prayer—especially in the preexilic period—betray quite distinctly their origin in the old places of worship. The spreading of the hands at prayer, frequently mentioned in the older portions of Scripture (Isa. i. 15, Ex. ix. 29), is, as the Assyrian bas-relief of Jews before Sennacherib indicates, the gesture of one standing before a superior and spreading his hands in petition toward him (Babelon, "Manual of Oriental Antiquities," p. 103, plate 1). Representing, as this Assyrian picture does, actually the attitude of entreaty toward a human king, there is no doubt that the religious mode of this same gesture was originally identical with it; hence the representations by Stade, Nowack, Benzinger, and most moderns, which depict it as similar to that of the Egyptian priests, with hands extended toward an altar, must be rejected. The adoration proper of the Bible, namely, lying prone with the face touching the ground, is a survival from the older sanctuaries. The Hebrew word for this gesture is השתחוה ("to prostrate oneself"), usually combined with נפל ("to fall down in surprise"; Josh. v. 14; Job, i. 20); at other times preceded by some form of the root קדד ("to bend the knee"); for the full השתחויה ("prostration") was preceded by a bending of the knee. The Old Testament mentions the Semitic practise of setting one's foot upon the neck of the conquered foe (Josh. x. 24, Ps. cx. 1), a custom also mentioned in the Assyrian inscriptions (see the plate in Riehm, "Handbuch d. Biblischen Alterthums," p. 889). It was a sign of complete subjugation, and was expressed symbolically by the ceremony of *proskynesis* ("lying down"), as shown, for instance, by the tribute-bearing legates on the Assyrian bas-reliefs, and was commonly practised among the Hebrews toward people of rank, or in the presence of the idol to whom one wished to express complete subjection. That the prophets have no words of reproach for this form of adoration—so inappropriate to the invisible God whom no place could contain—shows only how deeply this religious form of reverence had taken root in the habits of the people. The standing posture at prayer was also not reproved by them, although this was, as the Talmud declares it, "the attitude of the slave before his master" (Shab. 10*a*).

It is difficult to interpret the posture described in I Kings, xviii. 42, where Elijah at prayer is represented as having "cast himself down upon the earth, and put his face between his knees" (compare Ta'an. iii. 8). This probably refers to the custom prevailing among the Arabs of sitting solemnly, during a portion of the prayer, in an attitude in which the head can easily touch the ground. That this was no unusual posture at prayer may be seen from the fact that it was practised among the Jews about the year 60 of the common era (Ber. 34*b*). Probably the passage, II Sam. vii. 18—where it is stated that King David went into the house of the Lord and sat there—is to be similarly explained as referring to a peculiar and solemn mode of sitting.

Influenced by the Assyrians, among whom the act of kneeling in token of submission was quite general — as shown in the Assyrian delineations of the kneeling envoys from tributary nations—the Jews adopted this form of religious adoration

Exilian and Postexilian Times.

(I Kings, viii. 54; Ezra, ix. 6, and other passages). But the passage in I Kings. xix. 18, referring to kneeling down before Baal, must be understood as applying to prostrate adoration, which was preceded, as already stated, by a bending of the knee. About this time, too, the practise of spreading the hands wide at prayer was modified in consideration of the conception of the heavenly God, toward whom the hands were to be raised in the direction of heaven whither the seat of God had been transferred (I Kings, viii. 22, 54; Lam. iii. 41). A practise originating in the period of exile was that of turning the face during prayer toward the Holy Land, as the place favored by God (I Kings, viii. 48; Dan. vi. 11 [A. V. 10]).



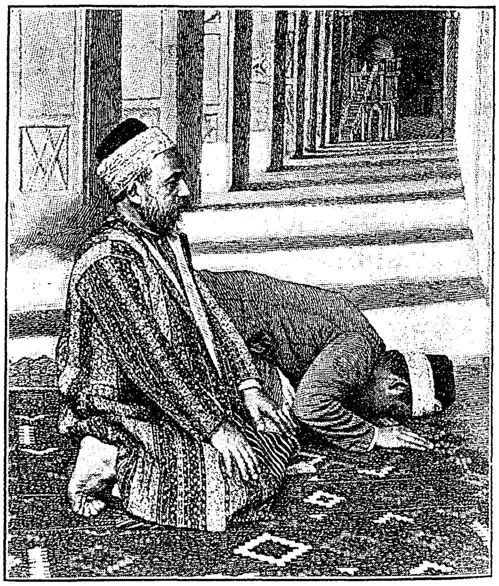
Egyptian Mode of Adoration.
(From Wilkinson, "Ancient Egyptians.")

The scanty literary remains of the last three pre-Christian centuries contain so little concerning the Forms of Adoration that it is probable no essential modifications were made in them. The old *hishtaḥawayah* Form of Adoration was the favorite one in the Second Temple, and in accordance with the pharisaic love of minutiæ the number of bows in the Temple was exactly fixed. Every visitor to the sanctuary had thirteen השתחויות to perform, with the hands and feet spread out and the face touching the ground (Mishnah Sheḳ. vi. 1, 3; Tosef. *ib.* ii. 17). Other optional forms are mentioned, such as קידה (Ber. 34*b*) bending the knee with the face touching the ground, and נשיקה kissing the floor of the Temple (Suk. 53*a*,). When blessing the people in the Temple the priests raised their hands toward heaven; this practise, as we have seen, is the postexilian fashion of spreading the hands. But when the priestly benediction was pronounced in the synagogue, where it very early became an essential portion of the public service (see Dukan), the older fashion of spreading the hands horizontally was employed (Mishnah Soṭah, vii. 6). After every sacrifice the priests had to make the full prostration (Mishnah Tamid, vi. 1, 2). A further form of the השתחויה is the נפילת אפים the sudden and complete prostration with the face to the ground, which took place only once a year, on the Day of Atonement, when the high priest pronounced the Ineffable Name, on hearing which all present threw themselves on the ground (Yer. Yoma, iii. 40*d*. The Mishnah in Bab. Yoma, 66*a*, is a later insertion; see "Diḳduḳe Soferim" on the passage).

During Shema' and Shemoneh-Esreh.

It is highly probable, in view of the great importance attached by the Pharisees to prayers, and of their love for rule and regulation, that those Forms of Adoration described in the oldest portions of the Mishnah date from the pre-Christian time. About the time of Jesus there was a dispute between the Hillelites and the Shammaites concerning the proper attitude in which to recite the Shema'. The latter, in opposition to the former, who were indifferent as to posture, insisted that this prayer must be said standing in the morning; but that, in the evening, the aforementioned posture of solemn inclination was the appropriate one. This dispute lasted until nearly the end of the first Christian century (Mishnah Ber. i. 3). The chief prayer, the Eighteen Benedictions, was, however, always said standing (Mishnah Ber. v. 1; Gem. 30*a*). Hence the name "'Amidah" (Standing) for the Eighteen Benedictions. Thus, in the New Testament it is said, "The Pharisee stood and prayed" (Luke, xviii. 11); and "they love to pray standing" (Matt. vi. 5). Prostration also occurred in the daily prayers, but not on festival days (B. M. 59*b*, where it is mentioned with reference to Eliezer b. Hyrcanus, a younger contemporary of the apostles).

As a result of the adoption by the Christian Church of most of the Jewish Forms of Adoration, it came about that in Palestine, where the opposition between Synagogue and Church grew constantly stronger and more hostile, the old Forms of Adoration came to be looked upon with disfavor. Toward the end of the second century, the Palestinian teachers, relying on Lev. xxvi. 1, took השתחויה as meaning to spread oneself, and taught that it was forbidden outside of the Temple to prostrate oneself upon stone pavement, which was the usual flooring of synagogues, churches, and heathen temples (Sifra, Behar, end; Meg. 22*b*). Thus it came about, some decades later, that when Rab, the founder of rabbinical learning in Babylonia, returned to his home from Palestine, he ostentatiously remained standing in the synagogue when all others threw themselves prostrate on the ground. Since, however, opposition to Christianity was no factor of religious life in Babylonia, as it was in Palestine, and there was, therefore, no necessity for modifying ancient religious customs in obedience to it, the Palestinian prohibition of prostration was modified in Babylonia to the extent that the complete proskynesis, with extended hands and feet,



Mohammedan Form of Adoration.
(From a photograph by Bonfils.)

was forbidden outside of the Temple; other Forms of Adoration were permitted (Meg. *l.c.*).

Various Forms.

Relative to other forms of gesture at prayer, the following may be mentioned: the bowing or bending of the upper part of the body at the beginning and the end of the Eighteen Benedictions—a relic of the old כריעה ("bending of the knee"); the raising of the eyes (Yeb. 105*b*; in Luke, xviii. 13, it was the poor sinner, the publican, who would not raise his eyes to heaven, indicating that it was the Jewish custom to do so); the placing of the feet close together during the recital of the principal prayer (Ber. 10*a*); and the placing the hand over the eyes while saying the Shema' (Ber. 13*b*). Of historical interest is the habit of Rabba (R. Abba b. Joseph) to fold the hands at prayer (Shab. 10*a*), which rather controverts the usual supposition that this gesture is of Germanic origin (see especially Vierordt, in "Studien und Kritiken," 1853, p. 89). It is by no means impossible that this gesture was borrowed from Semites, particularly as it seems to have been a common custom among the Assyrians, as shown by the Assyrian representations of petitioners folding their hands (Vigouroux, "Dictionnaire de la Bible," i. 235).

Post-Talmudic Adorations.

The Talmud regulated religious ceremonies to such minute details that not much remained for later times to do in this particular; hence we find that the medieval Forms of Adoration are identical with those of the Talmud. In post-Talmudic times, the full prostration (proskynesis) took place only on the Day of Atonement, and then four times, and on New-year's Day once; while the נפילת אפים, originally a full prostration, had been modified as early as the time of the Geonim into a mere bowing the head forward upon the arm. Possibly the habit of swaying at prayers, mentioned by Judah ha-Levi in the "Cuzari" (ii. 79, 80), was known in the academies, and transplanted thence into the synagogue; for not alone does Samuel ha-Nagid (eleventh century) speak of the practise of swaying while studying (ed. Harkavy, p. 101), but, as Dukes remarks, Mohammed was acquainted with the habit, and the Talmudic במנוד ראש (Shab. 104*a*) must mean the same, for the Arabic lexicographers (see Fikh al-lugha, Paris edition, xix. § 3, p. 97, l. 14) explain *nawadan* (= Hebrew נוד) as "to shake," applied only to the Jewish mode of shaking the person at prayer or study ("Lit. Blatt. d. Orients," v. 707).

The Karaites.

In their endeavors to purify Judaism from all rabbinical statutes, the Karaites rejected all rabbinical Forms of Adoration, and returned to the ancient Biblical usages. According to the Karaites, the indispensable Forms of Adoration at prayer are the following eight: (*a*) השתחויה bending of the head, which is their interpretation of this word; (*b*) בריכה bending of the upper part of the body until it touches the knees; (*c*) כריעה kneeling; (*d*) קידה a violent bowing of the head; (*e*) נפילה complete prostration (proskynesis); (*f*) נשיאת ידים raising the hands; (*g*) עמידה standing; (*h*) נשיאת עינים raising the eyes to heaven (Elijah Bashiatsi, "Aderet Eliyahu," 104*b*, Odessa, 1870; compare E. Deinard, "Massa Krim," p. 86).

The three principal postures of the body at prayer prevalent among Jews in the time of Jesus—standing, kneeling, and prostration—were adopted by the Christians, at times to the minutest details. Among the early Christians the most customary of all the Forms of Adoration was standing, adopted from the Jewish attitude during the "Eighteen Benedictions"—the prayer of prayers. This may be seen from the numerous illustrations of that time in Aringhi's "Roma Subterranea," Rome, 1651–59. Their outspread hands and their faces turned eastward correspond exactly with the Jewish customs already mentioned, namely, with the ancient practise of turning toward Palestine, which for Jews in Europe is eastward, and with the practise prevalent in all synagogues, of placing the ark in the eastern wall. The custom of kneeling, especially in private prayer, was likewise adopted by the earliest Christians (Luke, xxii. 41; Acts, vii. 60; ix. 40; xxi. 5; Eph. iii. 14, etc.) and became general (see "Hermæ Pastor," i. 1; Clemens Romanus, i. 48; Tertullian, "Ad Scapulam," iv.; Origen, "De Oratione," xxxi.). Less prevalent in the early days of Christianity was the prostration to the ground, employed only on special occasions (Socrates, "Historia Ecclesiastica," iii. 13,17). How completely the Church ritual of early times was dominated by the Synagogue is shown by the usage prevalent in the Christian Church, and mentioned by Tertullian ("De Corona Militis," iii.), that on Sunday, and during the whole week of Pentecost, prayer was not to be said kneeling. The synagogal custom (*minhag*), as old as the first Christian century, omits the prostration on all festivals and semi-festivals (B. M. 59*b*).

Christian Forms of Jewish Origin.

Mohammedan Forms.

But Islam, even more than Christianity, was influenced by the Jewish Forms of Adoration. At first Mohammed commanded that the faces of the faithful should, during prayer, be turned toward Jerusalem; and he only recalled this ordinance when he found that Jews were not to be captured by any such device. The very complicated postures adopted by Moslems at prayer (see Lane's pictures in "Modern Egyptians," i. 75) are probably borrowed from the Jews of Arabia, who, being far removed from Jewish lore, have preserved many archaic customs. These illustrations show all the Forms of Adoration above described as being existent among Jews, and especially that unusual form of sitting solemnly with the head upon the knees.

ADRAMMELECH.—Biblical Data: 1. Mentioned in II Kings, xvii. 31, as a god of Sepharvaim, which until recently was supposed to be the Hebrew name for the Babylonian city Sippar. After the inhabitants of Sepharvaim had been deported to Samaria (II Kings, xvii. 24; Isa. xxxvi. 19) by Sargon, king of Assyria, they continued to worship their gods Adrammelech and Anammelech, accompanying their rites with the sacrifice of children by fire. There was, however, no Assyrian or Babylonian god bearing the name Adrammelech, although, according to some scholars, the form of the word, if it be regarded as Assyrian, points to a supposed original "Adar-malik" (see **2**). There is no reference throughout the cuneiform documents to human sacrifice by fire or otherwise, and it is not certain that the sculptures and bas-reliefs show any representation of such a rite. The reference in Jer. xxix. 22 to the roasting alive of the false prophets Zedekiah and Ahab by the king of Babylon is no doubt historically accurate, although the passage is not regarded by the best authorities (as, for example, Cornill, "Jeremiah," in "Sacred Books of the Old Testament," p. 61) as properly belonging to the text. In any case it would merely show that such cremation was not unknown in Babylonia as a punishment. It could scarcely have existed as a religious observance, or even as a common form of torture; otherwise it would have been mentioned in the inscriptions.

The question whether Sepharvaim is necessarily the Babylonian Sippar at once arises. If this theory be correct, the name Adrammelech would have to be regarded as the secondary title of the sun-god Shamash, who was the tutelary deity of Sippar. But, as no such secondary title exists in the inscriptions, there is no evidence to support such a view. Many scholars suggest that Sepharvaim (LXX. *Σεπφαρίν*, *Σεπφαρείμ*) is identical with "Shabara'in," a city mentioned in the Babylonian Chronicle as having been destroyed by Shalmaneser II. As Sepharvaim is mentioned in connection with Hamath and Arpad (II Kings, xvii. 24, xviii. 34) there is every reason to regard it as a Syrian city. Sepharvaim may therefore be another form of "Shabara'in," which is probably the Assyrian form of Sibraim (Ezek. xlvii. 16), a city near Damascus. If this be so, then any attempt at seeking an Assyrian etymology for the god-names Adrammelech and Anammelech can not, of course, succeed. The fact, too, that the practise of sacrifice by fire was well known in Syria and is mentioned only once in connection with Babylon (compare Prince, "Daniel," p. 75) would appear to confirm this view. It is quite impossible with our present knowledge to arrive at any satisfactory conclusion with regard to the exact meaning of the god-name Adrammelech. The utmost that can be said is that the word "Adr" occurs in Phenician as a god-name in the form יתנאדר, "Itnadr" (Baethgen, "Beiträge zur Semitischen Religionsgeschichte," p. 54), and that "Adr" appears as an epithet in connection with another divine name in the proper name Adarbaal (Baudissin, "Studien zur Semitischen Religionsgeschichte," i. 312). There is no essentially Syrian god Adar.

——**In Rabbinical Literature:** The Talmud teaches (Sanh. 63*b*) that Adrammelech was an idol of the Sepharvaim in the shape of an ass. This is to be concluded from his name, which is compounded of אדר "to carry" (compare Syriac אדרי), and מלך "a king." These heathen worshiped as God the same animal which carried their burdens (Sanh. *l.c.*; see also Rashi's explanation of this passage which interprets אדר "to distinguish," by "carrying"). Still another explanation of the name ascribes to the god the form of a peacock and derives the name from *adar* ("magnificent") and *melek* ("king"); Yer. 'Ab. Zarah, iii. 42*d*.

L. G.

2. Son of Sennacherib, king of Assyria (II Kings, xix. 37; Isa. xxxvii. 38), who, with his brother Sharezer, slew their father while he was praying in the temple of Nisroch at Nineveh, and afterward fled to Armenia. The revolt against Sennacherib is clearly mentioned in the Babylonian Chronicle (iii. 34-35) which, like the account of Berosus, alludes to only one son, without giving his name. The narrative of Abydenus (Eusebius, "Armenian Chronicle," ed. Schoene, i. 35), however, like that of the Scriptures, mentions two sons—Nergilus and Adramelus—which Polyhistor gives in the form "Ardumusanus" (p. 27). It should be added, however, that the existence in Assyro-Babylonian of the form Adar as the name of a god is not altogether certain, although it is probable that the god-name which appears ideographically as Nin-ib should be read Adar. Adar is the name of the last month of the year; but if this be the name of a god, it can hardly be identical with the god Ninib-Adar, who represents the sun in the east—probably the vernal sun. It must also be borne in mind that it is by no means certain that the word Adar is concealed in the name Adrammelech.

J. D. P.

ADRET: A prominent Spanish-Jewish family, members of which are known from the thirteenth to the fifteenth century. In Spanish documents the name is always written Adret, and in a Hebrew manuscript in the Bodleian Library (No. 2218 = Pococke, p. 280*b*) we have the punctuation ר' שלמה בן אַדְרֵת. In a poem of the sixteenth century in favor of the study of philosophy, the name is punctuated אַדְרֵת (H. Hirschfeld, "Jew. Quart. Rev." xii. 141). The form "Adereth," given by some writers, is therefore wrong. The family very probably obtained its name from a place—either the village of Les Adrets, department of Var, France (compare François de Beaumont, Baron des Adrets), or from some town in Spain ("Rev. Ét. Juives," xxi. 148; compare below ABRAHAM DE ADRETO, and SOLOMON DE ADRET).

Following are the known members of the family:

Abraham Adret, who, after his conversion at Barcelona in 1391, took the name **Bernardo Lunez** ("Rev. Ét. Juives," iv. 61, No. 123).

Abraham de Adreto, mentioned in the archives of Aragon as having received a pardon after he had been condemned for consorting with a Christian woman, May, 1272 (Jacobs, "Sources," p. 38, No. 632).

Abraham ben Solomon Adret. Uncertain ("Cat. Bodl." col. 2269).

Galvandarez Adret, who was a victim of the Inquisition in Valencia in 1487 (Jacobs, "Sources," p. 7, No. 94).

Nathan Adret, who, after his conversion at Barcelona in 1391, took the name **Francisco Bertram** ("Rev. Ét. Juives," iv. 60, No. 108).

Solomon Adret, who is mentioned in a Barcelona document of the year 1262 (Jacobs, "Sources," p. 16, No. 215; compare p. 130); supposed to be the grandfather of SOLOMON ADRET (Ludovicus Guixar; see Kayserling, in "Jew. Quart. Rev." viii. 496). He is also mentioned as **Solomon de Adret** (Jacobs, "Sources," p. 42, No. 713). See SOLOMON ADRET, below.

Solomon Adret, who, after his conversion at Barcelona in 1391, took the name **Ludovicus Guixar** ("Rev. Ét. Juives," iv. 60, No. 71).

Solomon Adret, of Tortosa, who was punished by the Valencia Inquisition, October, 1490, together with Isabel, his wife—"por la ley de Mozen" (Kayserling, "Christopher Columbus," p. 90).

Solomon ben Abraham Adret, of Genoa, lived toward the end of the thirteenth century.

G.

ADRET, MOSES: Cabalist of the eighteenth century; lived and died in Smyrna. He possessed an extraordinary memory and was thoroughly acquainted with Talmudic and rabbinic literature. He composed twelve works, among which were commentaries on the "Mishneh Torah" of Maimonides, the "Halakot" of Asher ben Jehiel, and the ritual codes. Adret wrote also rabbinical decisions and novellæ to almost all of the treatises of the Babylonian Talmud, but only a few of these works have appeared in print, under the title ברך משה ("Moses Blessed"), Salonica, 1802.

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, i. 130.

M. K.

ADRET, SOLOMON BEN ABRAHAM (or **RaSHBa**)**:** Spanish rabbi; born in 1235 at Barcelona; died in 1310. As a rabbinical authority his fame was such that he was designated as El Rab d'España ("The Rabbi of Spain"). A manuscript purporting to be a certificate of indebtedness, dated 1262, in favor of a certain Solomon Adret, Jew of Barcelona, and a passport for the same Adret, dated 1269, are still extant (Jacobs, "Sources," pp. 16, 43, No. 130). Moses ben Naḥman (Naḥmanides) and Jonah of Gerona were his teachers. He was a master in the study of the Talmud, and was not opposed to the Cabala. Adret was very active as a rabbi and as an author. Under his auspices and through his recommendation, part of the commentary on the Mishnah by Maimonides was translated from the Arabic into Hebrew. His Talmudic lectures were attended by throngs of disciples, many of whom came from distant places. Questions in great number, dealing with ritual, with the most varied topics of the Halakah, and with religious philosophy, were addressed to him from Spain, Portugal, Italy, France, Germany, and even from Asia Minor. His responsa show evidence of wide reading, keen intelligence, and systematic thought. They also afford a clear insight into the communal life of the time, portraying Adret's contemporaries, and are of value for the study not only of rabbinical procedure but also of the intellectual development of the age in which he lived. Only half of these responsa have been published, as they number three thousand.

Defense of Judaism.

Adret had to contend with the external enemies of Judaism as well as with religious dissensions and excesses within its own ranks. He wrote a refutation of the charges of Raymund Martini, a Dominican monk of Barcelona, who, in his work, "Pugio Fidei," had collected passages from the Talmud and the Midrash and interpreted them in a manner hostile to Judaism. These charges also induced Adret to write a commentary on the Haggadot, of which only a fragment is now extant. He refuted also the attacks of a Mohammedan who asserted that the priests had falsified the Bible. M. Schreiner ("Z. D. M. G." xlviii, 39) has shown that this Mohammedan was Aḥmad ibn Ḥazm, and the book referred to was "Al-Milal wal-Niḥal" (Religions and Sects). Adret opposed also the increasing extravagances of the Cabalists, who made great headway in Spain and were represented by Nissim ben Abraham of Avila, a pretended worker of miracles, and by Abraham Abulafia, the cabalistic visionary. He combated these with vigor, but displayed no less animosity toward the philosophic-rationalistic conception of Judaism then prevailing, particularly in France, which was represented by Levi ben Abraham ben Ḥayyim, who treated most important religious questions with the utmost freedom, and who was joined by the Spaniard Isaac Albalag and others.

Adret and Abba Mari.

Opposed to these was another tendency, the chief object of which was the preservation of the pure faith of Judaism. At the head of this movement stood Abba Mari ben Moses ha-Yarḥi, called also En Duran Astruc de Lunel. He appealed to Adret for assistance. An extensive correspondence ensued between the authorities of southern France and northern Spain, Adret taking a most important part. Afterward this correspondence was collected and published by Abba Mari, in a separate work, entitled "Minḥat Ḳenaot" (The Offering of Jealousy), Presburg, 1838 (see full analysis in Renan's "Les Rabbins Français," pp. 647–694).

Adret, whose disposition was peaceable, at first endeavored to conciliate the opposing spirits. Ultimately he was called upon to decide the affair, and on July 26, 1305, together with his colleagues of the rabbinate of Barcelona, he pronounced the ban of excommunication (*ḥerem*) over all who studied physics or metaphysics before the completion of their thirtieth year. A protest against this ban may be found in a poem in which Philosophy "calls out in a loud voice against . . . Solomon ben Adret and against all the rabbis of France . . . who have placed under the ban all people who approach her" (see H. Hirschfeld, "Jew. Quart. Rev." xii. 140). Those who desired to study medicine as a profession were exempted from the ban. A special ban was pronounced against the rationalistic Bible exegetes and the philosophic Haggadah commentators, their writings and their adherents. The enforcing of these bans caused Adret much trouble and embittered the closing years of his life. He left three sons, Isaac, Judah, and Astruc Solomon, all of whom were learned in the Talmud.

His Works.

Of the works of Solomon ben Adret there have appeared in print: (1) Responsa, Bologna, 1539; Venice, 1545; Hanau, 1610, etc. The second part appeared under the title "Toledot Adam" (The Generations of Man) at Leghorn in 1657, the third part at the same place in 1778, the fourth part at Salonica in 1803, and the fifth part at Leghorn in 1825. (2) A manual on the ceremonial laws to be observed in the home, "Torat ha-Bayit ha-Aruk" (The Complete Law of the House), published at Venice in 1607, at Berlin in 1762, at Vienna in 1811, etc. (3) The shorter manual, "Torat ha-Bayit ha-Ḳaẓir" (The Short Law of the House), published at Cremona in 1565, and at Berlin in 1871. A number of his commentaries and novellæ on Talmudic treatises have been printed. (4) Commentaries upon seven treatises published at Constantinople in 1720, and at Berlin in 1756. (5) Similar disquisitions upon five treatises were published at Venice in 1523 and at Amsterdam in 1715. He wrote besides a number of disquisitions upon single treatises. (6) The "Pisḳe Ḥallah" (Decisions on Ḥallah), published at Constantinople in 1518, and at Jerusalem in 1876. (7) The "'Abodat ha-Ḳodesh" (The Holy Service), on the laws of Sabbath and festivals, published at Venice in 1602. His polemical work against Mohammedanism was edited by Perles, as an appendix to the latter's monograph on Adret.

M. K.

ADRIANOPLE: A city of Turkey in Europe with a population of 70,000, of whom about 8,000 are Jews. The first trace of a Jewish settlement in this city (according to a somewhat doubtful source found in E. Deinard's "Massa Krim" (Burden of the Crimea), p. 13, Warsaw, 1878) was during the reign of Theodosius I. in the year 389. Here they dwelt for a long time, suffering the oppression of the Byzantine emperors, chiefly inaugurated by the codes of Theodosius II. (438) and of Justinian I. (527–565), which not only prohibited them from celebrating the festival of the Passover before the Christian Easter, but compelled them also to make use of the Greek and Latin translations of the Holy Scriptures in their Sabbath readings. Both Benjamin of Tudela (about 1171) and Judah Alḥarizi (about 1225) visited Constantinople, but neither of them makes any mention of the Jews of Adrianople. There is no doubt that such a colony existed about this time, for family names such as Callo, Policar, Papo, Pilosophe, Hoursi, Zaffira, and even common names such as *pappou* (grandfather), *mana* (mother), *papas* (priest), *trandafila* (rose), *skoularitza* (earring), etc.—plainly of Greek origin—are prevalent to this day. Moreover, there exists also a synagogue of the "Gregos," or Greek-speaking Jews, having a special ritual, concerning which there is the following legend of Byzantine times: The sexton of a neighboring church noticed that after the ceremony of the *habdalah*, formerly held in the synagogue itself, the wine-filled chalice used in the service was secreted in a closet. He, therefore, clandestinely entered the synagogue and substituted blood for the wine; then he hastened to inform the judge of the blood-filled chalice and to accuse the Jews of ritual murder. During the same night the beadle of the synagogue had a dream in which the scheme was revealed to him, and he hurried to refill the chalice with wine—thus enabling the Jews to establish their innocence.

Legendary Blood Accusation.

The rich Jews of Adrianople and other cities of the interior, wearied with the exactions of the governors of the province and the zealous proselyting of the priests of the Greek Orthodox Church, removed to the cities of the coast, where they could live in comparative quiet and greater comfort and security. In 1361, when Amurath I. captured Adrianople, he found there only a small and impoverished Hebrew community, which hailed as their savior a conqueror whose religion so nearly resembled their own. They appealed to their coreligionists of Brusa to come and settle in the new Ottoman capital and teach them the language of their new masters. The rabbi—who had been invested by the sultan with administrative and judicial powers over the communities of Rumelia—established in Adrianople a rabbinical college, to the faculty of which all religious questions were referred by the Jews of Buda, Jassy, Galatz, and elsewhere. This college also received students from Russia, Poland, and Hungary. A group of Jews, expelled from Hungary in 1376 by Louis I., took refuge there under the protection of the Crescent. To this Hungarian influx the Synagogue Budoun (of Buda) owes its existence, and this name, like the family name "Magyar" still existing, shows the origin of the congregation. The Hebrew soldiers who began to serve in the Turkish army from the beginning of the Ottoman empire were enrolled in the *ghuraba* (non-Mussulmans, or strangers) organized by Amurath II. (1421–51). As a community, the Jews took no part in the riots of the dervishes under Mohammed I. (1413–21) fomented by Bedreddin, a resident of Adrianople, who used as his tool Torlak-Kiamal, a converted Jew. The Jews of Adrianople have always remained loyal to the sultans, and many of them have become distinguished scientists, so that Mohammed II. (1453) even made a Jew, Hakim Ya'aḳub, his physician, and afterward appointed him minister of finance (*defterdar*).

Rabbinical College.

Karaitic Community.

The Karaitic community of Adrianople, one of whose members, Judah b. Elijah (1363–90), removed to the Crimea (see Deinard, "Massa Krim," p. 66), throve and, by additions from the Crimea and the south of Poland, greatly increased in numbers. Through the teachings of the rabbis and constant contact with the rabbinical Jews and their professors, such as Ḥanok Sasporta of Catalonia, and more especially the tolerant Mordecai b. Eliezer Comtino (1460–90), an astronomer, mathematician, and logician, the community was aroused from its spiritual lethargy. Spurred on by its leading men, Menahem Bashyatzi and his sons Moses, Menahem Maroli, Michael the Elder, and Michael's son Joseph, this Karaitic band instituted a reform in their ritual which permitted the use of a lighted lamp on Friday evenings and a fire on the Sabbath—a reform which triumphed over all the objections of the conservatives. After the conquest of Constantinople in 1453, the members of this sect migrated in a body to that city, leaving behind them no other traces of their former presence than the epitaph on a tombstone of a certain Moses Yerushalmi, מבני מקרא ("of the Karaites"), in the Rabbinite cemetery, dated Tuesday, 9th of Ḥeshwan, 5463 (1702).

The Rabbinite community, on the contrary, remained at Adrianople and increased in numbers and in influence. Groaning under the burden of persecutions and being attracted by the glowing accounts of the kindness of the sultans and the liberties and favors which the Jews enjoyed in Turkey—graphically described in letters from Isaac Ẓarfati in 1454—the Ashkenazim flocked to Adrianople from Bavaria, Swabia, Bohemia, Silesia, and elsewhere, and there founded an Ashkenazic synagogue. Traces of the presence of German Jews appear in certain words of Judæo-German origin, like *roubissa* (rabbi's wife, רבנית), *boulissa* (housekeeper, landlady, בעלת הבית), and in family names like Ashkenazi, as well as in ritualistic usages. The only actual proof, however, is to be found in the epitaph of Moses Levi Ashkenazi Nasi (Prince) ben Eliakim (1466 or 1496). These settlers, together with a contingent which came a little later from Italy and founded the three synagogues of Italy, Apulia, and Sicily, joined forces with the Jews banished from Spain in 1492, who founded seven other synagogues under the names of Aragon, Catalonia, Evora, Gerush ("Exiled"), Majorca, Portugal, and Toledo. This increased the number of synagogues to thirteen.

Influence of the Sephardim.

The Sephardim imposed upon the native and German Jews the language, manners, and customs of Spain, which were adopted by all refugees arriving after the Spanish Jews, especially by the family Alamano, which, on account of the loyalty of its head, Joseph b. Solomon, at the capture of the city of Budapest by Solyman II. (the Magnificent) in 1526, obtained special exemption from imposts and service. Descendants of this family still live in Adrianople. Influenced by these immigrants, the students gradually lost interest in Talmudic studies and were thoroughly captivated by the Cabala, one of whose representatives, Abraham b. Eliezer ha-Levi, was the author of several mystic works. The ground was now prepared for the reception of the seed of the Messianic ideas of the dreamer Solomon Molko, who, in 1529, came to Adrianople to win over Joseph Caro, the well-known casuist, who was a friend of Aaron de Trani, the president of the college, and perhaps also of Yom-Ṭob Cohen and Abraham Saba, rabbis of that time. In 1522 Caro began his commentary ("Bet Yosef") on the "Ṭurim" of Jacob ben Asher, which was finished later at Safed. A printing-press, established by the brothers Solomon and Joseph Jabetz, existed at Adrianople before 1555; subsequently it was transferred to Salonica, on account of a plague raging in the former place. No other printing-press was established there till 1888, when "Yosef Da'at" (El Progreso), a periodical, appeared.

The study of history was encouraged at Adrianople; for Joseph ibn Verga, a Talmudist, finished there the famous chronicle ("Shebeṭ Yehudah") begun by his grandfather, Judah, and continued by his father, Solomon. This was a timely work, for the *autos-da-fé* which it recorded were renewed in Ancona, in 1556, and aroused the indignation of the Jews in Turkey, including those of Adrianople, who, in order to take revenge on Pope Paul IV., thought of adopting Joseph Nasi's suggestion to cease shipping their merchandise to the port of Ancona and to transfer their commerce to Pesaro. Neither Joseph Zarfati, author of sermons ("Yad Yosef," 1617), nor Judah Bithon (1568–1639) witnessed the Messianic agitation instigated by Shabbethai Ẓebi, which came to an end at Adrianople, when both Ẓebi and his wife embraced Islam (Sept. 21, 1666) in the presence of Sultan Mohammed IV., of which fact legends are rife to this day.

Among the rabbis who opposed the propaganda which Shabbethai still continued in favor of Islam, and the agitation fomented by his prophet, Nathan of Gaza, who had been expelled from Ipsala and Comargena, were Abraham Amigo, Elijah and Jacob Obadia, Jacob Danon, Israel Adato, Phinehas Cohen, and Simeon Phinehas. Abraham Magrisso (died 1682 or 1687) appears to have been a most decided anti-Shabbethaian in spite of the presence of Samuel Primo, ex-secretary to the false Messiah, who died at Adrianople (1708).

The annals of the community at Adrianople, spread over many years, furnish only the names of rabbis, viz.: Abraham b. Solomon Kaṭan, 1719; Abraham Ẓarfati, 1722; Eliezer Nahum, 1663–1743, author of a commentary on the Mishnah, חזון נחום. There are, moreover, two families, who for nearly two centuries have supplied two parallel lines of rabbis. To the Behmoiras, of Polish origin, belonged Menahem I. ben Isaac (1666–1728); Mordecai I., author of מאמר מרדכי (died 1743 or 1748); Menahem II. (died in 1776 or 1781); Mordecai II. Chelibi (died 1821); Raphael I. Moses (died 1878), and Raphael II. (died 1897). There were also two non-officiating rabbis of this family, Salomon, author of חשק שלמה (Constantinople, 1767) and מכתב שלמה (Salonica, 1870), and Simeon, author of מטה שמעון (Salonica, 1819), and still another Menahem, author of דברי מנחם. The family Gueron furnished Raphael Jacob Abraham I. (died 1751), author of עטור סופרים (Constantinople, 1756); Eliakim I. (died at Constantinople about 1800); Yakir I. (Preciado Astruc, died at Jerusalem, 1817); Jacob Abraham II. (Cornorte or Menahem, died 1826), author of אביר יעקב (Salonica, 1838); Bekor Eliakim II. (died about 1835); and Yakir II. (PRECIADO; born in 1813; died at Jerusalem after a distinguished career, in 1874); Jacob Abraham III. and Mordecai (died 1889). Besides these two families, which for nearly two hundred years divided between them the honors of governing the community of Adrianople, there were also some able secretaries who efficiently aided in this task. They were Elijah Perez (died 1763), Abraham Perez Isaac Alḳabeẓ (died after 1831), and Samuel ibn Danon (adviser of Yakir II. Guéron) who in 1850 took a prominent part in the foundation of the schools, which were at first under the management of Joseph Halévy, now professor at the Sorbonne, Paris, and were afterward governed by directors sent there by the Alliance Israélite Universelle. Besides a school accommodating 380 scholars, there are also a Talmud Torah with 880 children; a private school (Tiferet Yisrael) with 200 pupils; a Jewish Alliance School with 470 girls; a Jewish club, a small hospital, and several benevolent and debating societies. Adrianople has had to endure its share of disasters: a fire in 1846; the cholera in 1865; and, finally, the calumny of ritual murder in 1872.

[The Alliance Israélite also maintains at Adrianople a school for boys (founded 1867), which in 1897 had 305 pupils. A theological seminary was founded there in 1896 by Mr. Abraham Danon in conjunction with the Alliance, but was, a year later, transferred to Constantinople. G.]

A. D.

ADRIANUS, MATTHÆUS: Hebraist of the sixteenth century. He was a Jew of Spanish descent, but at an early age migrated to Germany, where he embraced Christianity. Though a physician by profession, he achieved eminence mainly as an instructor in Hebrew. Through the influence of Reuchlin and Conrad Pellican, the latter of whom was his pupil, he secured a tutorship in the house of Johann Amerbach, the printer of Basel, and became the instructor of Fabricius Capito at Bruchsall. In 1513 he was called to the chair of Hebrew at Heidelberg, where, among others, Johann Brenz and Joannes Œcolampadius came under his tuition. On the recommendation of Erasmus, in the year 1517, he was given a professorship in the newly established Collegium Trilingue at Louvain, where many hopes were centered in him. These, however, were shattered as early as 1519, when Adrianus publicly stated in one of his lectures that Jerome had often been subject to human errors. This assertion of Jerome's fallibility cost Adrianus the good-will of his colleagues, and particularly of Latomus, who subsequently was Luther's antagonist. Latomus attacked Adrianus' speech and caused his departure from the college. Adrianus' rash frankness, in fact, combined with his petulance and quarrelsome disposition, precluded his lengthy residence at any one place. In 1521 he was expelled from Wittenberg, where, upon his arrival, he had been received with open arms by Luther, and where he had instructed in Hebrew a number of noted men, among whom was Valentin Trotzendorf. Whether he went thence to Leipsic or Freiburg is uncertain, as are also the place and date of his death. Among his literary productions the "Introductio in Linguam Hebræam" and his translations into Hebrew of several Christian prayers, contained in his "Hora pro Domino," are regarded as rarities. But, on the whole, his reputation as one of the most noted Hebraists of his day rested more on his capacity as an instructor than on his writings.

H. G. E.

ADRIEL: The Meholathite to whom Merab (Saul's daughter) was given in marriage instead of to David (I Sam. xviii. 19); son of Barzillai (II Sam. xxi. 8). As to the meaning of the name, Adriel appears to be an Aramaized form of Azriel ("God is my Help"; I Chron. v. 24, xxvii. 19; Jer. xxxvi. 26), with which it is actually identified by the Syriac version, not only in the passage I Sam. xviii. 19, where Aramaisms might be expected, but also in II Sam. xxi. 8. J. D. P.

ADULA OF TUNIS: A Jew who, to avoid being baptized, committed suicide in the house of the catechumen in Rome, on May 2, 1666, at the moment he was about to undergo the rite.

BIBLIOGRAPHY: Vogelstein and Rieger, *Gesch. d. Juden in Rom*, ii. 219; *Allg. Zeit.* No. 266, Munich, 1887.

M. B.

ADULLAM: An old Canaanitish capital in western Judah (Gen. xxxviii. 1; Josh. xii. 15, xv. 35). It was fortified by Rehoboam (II Chron. xi. 7), and was an inhabited city till the end of Old Testament times (Micah, i. 15; Neh. xi. 30; II Macc. xii. 38). The modern Id-el-Miyeh now occupies its site.

The famous **Cave of Adullam** was a resort of David when an outlaw (I Sam. xxii. 1; II Sam. xxiii. 13). Tradition has located it in the valley of Kharaitun, six miles southeast of Bethlehem. However, the locality mentioned above will suit the early history of David just as well, especially as it is probable that the word "cave" rests upon a false reading of the original and should be replaced by "stronghold." In later times Judas Maccabeus visited the city of Adullam (II Macc. xii. 38).

J. F. McC.

ADULTERY (נאוף): Sexual intercourse of a married woman with any man other than her husband. The crime can be committed only by and with a married woman; for the unlawful intercourse of a married man with an unmarried woman is not technically Adultery in the Jewish law. Under the Biblical law, the detection of actual sexual intercourse was necessary to establish the crime (Lev. xviii. 20 [A. V. 19]; Num. v. 12, 13, 19); but this rule was so far modified by the Talmudic law, that circumstantial evidence was sufficient to justify legal procedure if the wife had been cautioned by her husband against intimate association with the suspected man (Soṭah, i. 2). When the Adultery is committed with a married woman who is within the prohibited degrees of consanguinity or affinity, the crime becomes Incest. Although the common opinion of mankind is more inclined to condone the Adultery of the husband than that of the wife, modern law has ignored the distinction between the two crimes, and technically they are alike. But the ancient Jewish law, as well as other systems of law which grew out of a patriarchal state of society, does not recognize the husband's infidelity to his marriage vows as a crime, and it was not until comparatively recent times that the woman was legally entitled to enforce her husband's faithfulness, and was given the right to demand a bill of divorce for his sexual immorality (Isserles on "Eben ha-'Ezer," § 154,1). The sin of concubinage is, however, already severely condemned in Leviticus Rabbah, xxv.

Woman's Rights Enforced.

Although in ancient society and law Adultery was regarded as a private wrong committed against the husband, public law later on exercised control of its investigation and punishment; for organized society was impossible unless it punished this crime, which saps the very root of the social life. "Thou shalt not commit adultery" is not merely a command not to tamper with the domestic affairs of another, but a warning to refrain from unsettling the foundations of society.

Sacredness of Marriage Relation.

The law, therefore, sought to guard the sacredness of the marriage relation by moral injunction and by legal restraints. In patriarchal times the purity of marriage was pictured as jealously guarded (see the cases of Sarah and Rebekah; Gen. xii. 18, 19, xx. 2–7, xxvi. 10, 11). The Biblical and Talmudical ideal of marriage had a strong influence in controlling those who were susceptible to purely moral influence and suasion. "Therefore shall a man leave his father and his mother and shall cleave unto his wife, and they shall be one flesh" (Gen. ii. 24). The woman is made sacred by the ceremony of *ḳiddushin*, and is thereby set apart for her husband alone (Ḳid. 2*b*). Idolatry, murder, and *gilluy 'arayot* (which comprises both incest and adultery) are three crimes never to be committed under any circumstances, and a man should sacrifice his life rather than commit them (Sanh. 74*a*). This was the decision of the rabbis at the meeting at Lydda, during the Hadrianic Revolt (see Graetz, "History of the Jews," ii. 422–424.) Thus law and morality went hand in hand to prevent the commission of the crime. For those, however, who were deaf to warnings of law and reason, the punishment of death was ordained. Both the guilty wife and her paramour were put to death (Deut. xxii. 22).

Unlawful intercourse with a woman betrothed to a man was adultery, because the betrothed woman was deemed as inviolable as the married woman. The punishment for this crime was stoning to death at the place of public execution (Deut. xxii. 24). The punishment for Adultery according to the Mishnah (Sanh. xi. 1) was strangulation; the rabbinical theory being that wherever the death penalty was mentioned in the Bible, without any specific statement of the manner of its infliction, strangulation was meant (Sifra, Ḳedoshim, 4, 9).

The priest's daughter who committed Adultery was burned to death, according to the rabbinical interpretation of the text in Lev. xxi. 9 (Sanh. 66*b*), and her paramour was strangled (Maimonides, "Yad ha-Ḥazaḳah, Issure Biah," iii. 3). When the crime is committed with a bondmaid betrothed to a man, it is not Adultery technically, because the woman is not free, and the death penalty is not inflicted, but as she has a quasi-marital status, she and her paramour are scourged (Lev. xix. 20). Ibn Ezra (*ad loc.*) takes the view that this case refers to the Hebrew maiden who has been sold by her father and who is intended to be the bride of her master or of his son, but who is not yet betrothed; for the betrothal would have made her free *ipso facto*.

Talmudic View.

Under the Talmudic law the severity of the Mosaic code was in many instances modified, and the laws relating to Adultery came under the influence of a milder theory of the relation of crime and punishment. Indeed, the rabbis went so far as to declare that a woman could not be convicted of Adultery unless it had been affirmatively shown that she knew the law relating to it—a theory that resulted in the practical impossibility of convicting any adulteress. No harm was done by this new view, because the right of divorce which remained to the husband was sufficient to free him from the woman, who, although guilty of the crime, was not punishable by the law. Upon this mild view followed the entire abolition of the death penalty, in the year 40, before the destruction of the Second Temple (Sanh. 41*a*), when the Jewish courts, probably under pressure of the Roman authorities, relinquished their right to inflict capital punishment. Thereafter, the adulterer was scourged, and the husband of the adulteress was not allowed to condone her crime (Soṭah, vi. 1), but was compelled to divorce her, and she lost all her property rights under her marriage contract (Maimonides, "Yad ha-Ḥazaḳah, Ishut," xxiv. 6); nor was the adulteress permitted to marry her paramour (Soṭah, v. 1); and if she married him, they were forced to separate.

The right of the husband to divorce his wife at his pleasure was a sufficient protection for him in case his wife was guilty of the crime of Adultery, even if he had no proof of it, but merely suspicion founded on circumstantial facts. If the wife had committed unlawful intercourse against her will, or if she had mistaken the adulterer for her husband, she was not guilty of Adultery, because she did not act as a free agent. The usual punishments are not inflicted in such cases, and the legal consequences of Adultery do not follow (Ket. 51*b*). Such crime is no cause for divorce, except if the woman be the wife of a priest. The priest is not allowed to keep her because of the peculiar sanctity of his office, which requires the highest degree of domestic purity (Yeb. 56*b*).

Exceptions.

Guilt Tested by Ordeal.

As "the eye of the adulterer waiteth for twilight, saying, No eye shall see me" (Job, xxiv. 15), Adultery is a crime usually difficult of proof, and the Biblical code contained provision for the case of the woman who was suspected of Adultery by her husband. Moved by the spirit of jealousy, he brought her before the priest in the sanctuary, and she was there obliged to undergo the severe "ordeal of the bitter waters." A full account of the details of this ordeal is given in Num. v. 11–31; these details may also be found amplified in the Mishnah. The suspected woman was taken to the local court by her husband and there his charge was made. The court assigned two doctors of the law to escort the parties to the Great Sanhedrin at Jerusalem. The purpose of the hearing before the Sanhedrin was to evoke a confession. The Sanhedrin appealed to the woman and suggested various causes that might have induced her to go astray, and finally asked her to confess. If she admitted her crime, she was divorced from her husband at once and lost her property rights under her Ketubah. But if she denied it, she was taken to the East Gate of the Temple, in front of the Nicanor Gate, and there was placed in charge of a priest, who performed the ceremony mentioned in the Book of Numbers. He rent her garment so that her breast was exposed, and loosened her hair; she was draped in black; all ornaments were removed from her person, and a rope was tied around her chest. Thus publicly exposed (only her servants being prevented from seeing her), the jealousy-offering was placed in her hands. It was a humble offering of barley meal, without oil or incense upon it, the feed of beasts, typifying the meanness of the crime that she was supposed to have committed. The priest then placed some of the dust of the Tabernacle in an earthen vessel full of water, and charged her with the solemn oath of purgation (Num. v. 19–22). After this the priest wrote the oath on parchment, blotted it out with the water, which he caused her to drink, and the jealousy-offering was then offered upon the altar (Soṭah, i. 4–6; ii. 1–3).

If the woman refused to submit to the ordeal, and there was circumstantial evidence of her criminality, she was obliged to separate from her husband (Soṭah, i. 5). Whatever may have been the actual significance of this ordeal when first established, within Talmudic times it had merely a moral meaning. It was simply a test under which the woman, if guilty, was likely to succumb and confess. R. Akiba says: "Only when the man is himself free from guilt, will the waters be an effective test of his wife's guilt or innocence; but if he has been guilty of illicit intercourse, the waters will have no effect"; and he based his opinion on a text in Hosea, iv. 14 (Sifre, Naso, 21; Soṭah, 47*b*). In the light of this rabbinical dictum, the saying of Jesus in the case of the woman taken in Adultery acquires a new meaning. To those asking for her punishment, he replied, "He that is without sin among you, let him first cast a stone at her" (John, viii. 7).

This rabbinical interpretation of the law relating to the ordeal practically annulled it, and it soon fell

Ordeal Annulled.

into disuse. During the Roman invasion of Palestine, and the last days of the commonwealth, the Sanhedrin, under the presidency of Johanan ben Zakkai, abolished the ordeal entirely; as the Mishnah states, "when adulterers became numerous, the 'ordeal of the bitter waters' ceased, and it was R. Johanan ben Zakkai who abolished it; as it is written (Hosea, iv. 14), 'I will not punish your daughters, when they commit whoredom, nor your spouses, when they commit adultery; for themselves are separated with whores, and they sacrifice with harlots'" (Soṭah, ix. 9). For it appears that under the Roman régime, immorality spread among the people, the judges became corrupt, the springs of justice were defiled, and general demoralization resulted (Graetz, "History of the Jews," ii. 237, 238). Probably for this very reason Queen Helena of Adiabene, the illustrious and munificent proselyte to Judaism, favored the ordeal; for she presented a golden tablet to the Temple with the chapter from the Law engraved on it, to be used for the rite of the ordeal (Tosef., Yoma, ii. 3; Mishnah Yoma, iii. 10; Gem. *ib.* 37*b*). But even if it had not been abolished, the rite would have sunk into abeyance with the fall of the Temple, because, according to the Law, the ceremony could not be performed elsewhere.

The Law in Patriarchal Days.

In the patriarchal days the Adultery of the wife required no proof, for whenever the head of the family suspected her, he could kill her. Thus Judah ordered his daughter-in-law, Tamar, to be burned because of her supposed Adultery (Gen. xxxviii. 24). Her crime consisted in unlawful intercourse with a man other than the brother of her deceased husband. For at first it was the custom, and afterward it became the law, for the widow of a man who had died without leaving issue, to marry his brother, so that the child of this union might be of the blood of the deceased and bear his name (Deut. xxv. 5, 6: see Levirate). In such cases the widow was really considered the betrothed of her brother-in-law, and her intercourse with another than himself was punishable as Adultery. When the punishment of the adulteress and her paramour was taken out of the hands of the husband and assumed by the civil law, this, like every other crime, had to be proved by two or more witnesses, before a conviction and sentence could follow (Deut. xix. 15; Maimonides, "Hilkot Ishut," xxiv. 18).

Under the theory of the Talmudists, which still further mitigated the severity of the law, the woman could not be convicted of Adultery until it was proved that she had been previously cautioned, in the presence of two witnesses, not to have any communication with the suspected man, and that, in spite of such caution, she had met him secretly under circumstances that would make the commission of the crime possible (Mishnah Soṭah, i. 1, 2; Gem. 2*b*). This caution was given to her because of the general tendency of the rabbinical law toward mercy, based in this case on a technical interpretation of the Biblical text (Num. v. 13). Practically, it worked an acquittal in nearly every case. If, however, the husband was not satisfied with the result, the right of divorce was left open to him, although, when divorced under such circumstances, the wife did not lose her property rights under the ḳetubah. If rumors of the wife's Adultery were circulated during the absence of the husband, the court had the right to summon and caution her with the same effect as though it had been done by her husband (Maimonides, "Hilkot Soṭah," i. 11).

Status of Adulterer.

The paramour was technically the adulterer (*noef*), and under the Biblical law suffered death together with the adulteress (*noefet*). His crime was held in the greatest abhorrence, and Raba and Rab voiced the general opinion when they said that nothing would excuse the wilful adulterer, nor would all his virtues save him from Gehenna (Soṭah, 4*b*). Even a lustful desire was deemed a moral crime, and the echo of "Thou shalt not covet thy neighbor's wife" rings throughout the Talmud and rabbinical writings, and is reechoed in the New Testament (Ex. xx. 17; Eben ha-'Ezer, 21; Matt. v. 27, 28). The adulterer's folly is condemned and makes him liable to the jealous wrath of the outraged husband (Prov. vi. 32–34; Job, xxxi. 9, 10). In Talmudic days, long after the abolition of the death penalty, the adulterer was punished by flagellation, and was forbidden to marry the faithless wife after she had been divorced. Even the mere suspicion of the crime was sufficient to prevent their marriage. A case, however, is suggested in the Talmud in which this restriction seems to have been removed. Here the woman having been suspected of Adultery was divorced, and having remarried was again divorced, and then married the man who had originally been suspected of having committed Adultery with her; the marriage was declared lawful, because it seems that the intervening marriage was considered in some degree a refutation of that suspicion, and acted as a limitation upon the original interdict (Yeb. 24*b*).

The child of an incestuous or adulterous connection was known as a Mamzer. It was not permitted to become a member of the Jewish body politic (Deut. xxiii. 3 [A. V. 2]), and could not intermarry with a Jew or Jewess (Ḳid. iii. 12), although it did not lose its right to inherit from the husband of its mother, who, while not the legitimate father, was for this purpose the putative father (Yeb. ii. 5; Maimonides, "Naḥalut," i. 7).

ADUMMIM ("The Red"): Steep road leading from the plain of Jericho to the hilly country around Jerusalem. It was a part of the boundary between Judah and Benjamin (Josh. xv. 7, xviii. 17). The name refers to the redness of the material of which the road is made. It is now called Tala'at ed-Dam.

ADUMMIM. See Coins.

ADVENT OF MESSIAH. See Messiah.

ADVENTISTS: A Christian sect. Among the chief tenets of the Adventist faith are: (1) The restoration of the Jews to the Holy Land (see Bengel, "Gnomon on the New Testament"), and their conversion, based on Rom. xi. 25, 26 (Ritschl, "Gesch. des Pietismus," i. 565–584). Hence the interest shown by the Adventists in the Zionist movement, though many believe that the return will not take place till after the Resurrection, basing their views on the passage of Ezekiel, "Behold, O my people, I will open your graves, and cause you to come up out of your graves, and bring you into the land of Israel" (xxxvii. 12). (2) Literal interpretation of the whole Bible, including the Old Testament and the Mosaic law.

The notion of waiting for the Second Advent of Jesus, calculated to take place during the present generation, originated in England (E. Irving), spread over Ireland (A. Darby) and Germany (I. A. Bengel), and became especially popular in New England under the influence of W. Miller of Pittsfield, Mass., the prophet who predicted the coming of the Messiah in the year 1843, basing his calculation principally on the "seventy weeks" of Daniel. A division of the Adventists accentuated the Sabbath of Creation, and the consequence was the formation of the SEVENTH-DAY ADVENTISTS. Some insisted also on abstinence from swine's flesh, in accordance with the Mosaic law.

K.

ÆGIDIUS OF VITERBO (or **ÆGIDIUS ANTONIUS CANISIUS**): Cardinal and Christian cabalist; born in 1470 at the Villa Canapina, in the diocese of Viterbo, of rich and noble parents. After a course of studies with the Augustinians at Viterbo, he was made doctor of theology, and in 1503 became general of his order. He died November 12, 1532. In Jewish history the name of Ægidius (or Egidio) is coupled first with the grammarian Elias Levita, who instructed him in Hebrew. When the turmoil of war drove Levita from Padua to Rome, he was welcomed at the house of Ægidius, where, with his family, he lived for more than ten years, all his wants being supplied. It was there that Levita's career as the foremost tutor of Christian notables in Hebrew lore commenced. The first edition of Levita's "Bahur" (Rome, 1518) is dedicated to Ægidius. In return for his Hebrew instruction Ægidius quite willingly introduced Levita into the profane branches of learning and the Greek language, thus enabling the latter somewhat to utilize Greek in his Hebrew lexicographic labors—a debt freely acknowledged by Levita, who, in 1521, dedicated his "Concordance" to the cardinal. It must be noted, however, that Ægidius' anxiety to master the sacred tongue sprang neither from philological inclination nor from a desire to attain a better method of Biblical exegesis: his main motive was thus to be enabled to penetrate the mysteries of the Cabala. As a cabalist, Ægidius belonged to the interesting group of sixteenth-century Christians, among whom Reuchlin and Pico della Mirandola also were prominent, who believed that Jewish mysticism, and particularly the Zohar, contained incontrovertible testimony to the truth of the Christian religion (compare CABALISTS, CHRISTIAN). No wonder, then, that in the course of Reuchlin's conflict with the obscurantists (1507–21), in which the preservation of the Jewish books was at issue, the cardinal wrote (1516) to his courageous and enlightened friend: "While we labor on thy behalf, we defend not thee, but the law; not the Talmud, but the Church." Ægidius also engaged another Jewish scholar, Baruch di Benevento, to translate for him the Zohar (the mystic Book of Splendor). The scholar last named may also have been partly responsible for the numerous cabalistic translations and treatises which appeared under the name of Ægidius. The cardinal appears to have been a zealous collector of Hebrew manuscripts, of which many are still to be seen at the Munich Library, bearing both faint traces of his signature and brief Latin annotations. In the Angelica at Rome an exceedingly valuable old Bible manuscript is extant, which was given by Leo X. to Ægidius. The British Museum contains a copy of Makiri and the Midrash on the minor Prophets, written for the cardinal at Tivoli, in the year 1514, by Johanan b. Jacob Sarkuse. The study of Jewish literature led the cardinal to a friendly interest in the Jews themselves, which he manifested both in his energetic encouragement of Reuchlin in the struggle referred to above and in a vain attempt which he made in the year 1531, in conjunction with the cardinal Geronimo de Ghinucci, to prevent the issue of the papal edict authorizing the introduction of the Inquisition against the Maranos.

The writings commonly attributed to Ægidius are numerous. Most of them are to be found in manuscript form in the Bibliothèque Nationale, Paris, but their authenticity is still to be established. Aside from minor works on the Hebrew language, the majority by far are of a cabalistic nature. There is scarcely a classic of Jewish medieval mysticism that he has not translated, annotated, or commented upon. Among these works may be mentioned the Zohar (Splendor); "Ginnat Egoz" (Nut-Garden); "Sefer Raziel" (Book of Raziel); "Ma'areket ha-Elohut" (System of Theology); "'Eser Sefirot" (Ten Sefirot).

H. G. E.

ÆLIA CAPITOLINA. See JERUSALEM.

ÆMILIUS, PAULUS (called also **da Gin**, *i.e.*, **Grynæus**): Hebrew bibliographer, publisher, and teacher; born at Rödlsee, Germany, probably in the first quarter of the sixteenth century; embraced Christianity in Rome; died 1575. He was employed in copying Hebrew manuscripts, and for this purpose visited the libraries of Paris, Louvain, and Rome. In 1544 he edited and printed at Augsburg a Judæo-German translation of the Pentateuch and the Haftarot, dedicating it to Widmannstadt, custodian of the Hebrew department of the Munich Library. Grünbaum ("Jüdisch-Deutsche Chrestomathie," p. 14) thinks that Æmilius copied from the Cremona edition of 1540. The translation is, on the whole, the same which is used at the present time (1901) in Poland. Perles supposes that Æmilius, together with Isaac of Günzburg, was the editor of the Judæo-German "Sefer ha-Musar" (Book of Ethics), published at Isny in 1542. In 1547 Æmilius was appointed professor of Hebrew at Ingolstadt; and in the following year he published an anti-Jewish pamphlet. In 1562 he edited a Judæo-German translation (in German characters) of the Books of Samuel, without, however, making known that it was a copy of a similar translation—though in Hebrew letters—published in Augsburg, 1543, by Ḥayyim Schwarz. In 1574 he was engaged for forty-six weeks at the Munich Library in making and revising the catalogue of Hebrew manuscripts and books. Thus Paulus Æmilius was the first Jewish bibliographer.

M. B.

His Function.

ÆSHMA (ASMODEUS, ASHMEDAI): In the Mazdian religion the chief of the dævas, or demons. Though the oldest sections of the Avesta—the Gathas—present Æshma mainly as an abstract conception, still, in passages here and there, he is represented in the guise of a personal being ranging among the evil spirits that obey Angro-mainyush. In the later portions of the Avesta the personal character connoted by the name admits of no doubt. Æshma is an enemy of Sraoscha, one of the good angels that serve Ahuramazda. Æshma's design is directed preeminently toward imbuing the hearts of men with anger and revenge. Indeed, all the evil in the world is occasioned through his agency; he fortifies men in the pursuit of evil and seeks to keep them from entering the path of righteousness.

Etymology of the Word.

Whether Æshma, like the Jewish Asmodeus in the Book of Tobit, or the Ashmedai of the Talmud, was, as a demon, specially characterized by carnal desire can not be determined. Against such a supposition the fact may be adduced that the Mazdian religion embraces another demon, Azi, who, as expressly stated, is the demon of carnal desire. It is, however, conceivable that Æshma may have had the same part assigned to him in the popular beliefs of the Persians, although the literary sources contain nothing to support the conjecture. The etymology of the word "Æshma" affords no possibility of arriving at any such conclusion. It is true that "Æshma" is connected with the verb *ish*, denoting "to desire," "to lust after"; but the abstract sense, "anger," that lies in the word "Æshma" in the Gathas, would seem to point to the necessity of referring the word to the same verb "ish" in its sense of "to throw," "to put in motion" (compare Justi's note to Baudissin's article "Asmodi," in Hauck's "Realencyklopädie").

Though "Æshma" does not occur in the Avesta in conjunction with "dæva," it is probable that a fuller form, such as "Æshmo-dæus," has existed, since it is paralleled by the later Pahlavi-form "Khashm-dev" ("Khashm dev" = "Æshma dev"), written with the Aramaic "sheda," but pronounced "dev." Corresponding to this form are *'Ασμοδαῖος* (Asmodeus) of the Book of Tobit, and אשמדאי in the Talmud; for the last-named word is not to be derived from "shemad." In fine, Asmodeus (Ashmedai) embodies an expression of the influence that the Persian religion or Persian popular beliefs have exercised on the Jewish—an influence that shows itself very prominently in the domain of demonology. Thus *'Ασμο*, 'אשם, corresponds to "Æshma," and the ending *δαῖος*, דאי, to "dæva," "dev."

Asmodeus in the Book of Tobit.

Apart from this etymological coincidence—which, as is now generally agreed, has its basis in the fact that the Jewish word is borrowed from the Persian—Asmodeus of the Book of Tobit and Ashmedai in the Talmud bear no very great similarity to their Persian parallel, as Kohut, for instance, has sought to render plausible. All three are evil, harmful demons, though in different degrees; the worst of the three being undoubtedly the Persian Æshma. The Asmodeus of the Book of Tobit is attracted by Sarah, Raguel's daughter, and is not willing to let any husband possess her (Tobit, vi. 13); hence he slays seven successive husbands on their wedding-nights. When the young Tobias is about to marry her, Asmodeus purposes the same fate for him; but Tobias is enabled, through the counsels of his attendant angel Raphael, to render him innocuous. By placing a fish's heart and liver on red-hot cinders, Tobias produces a smoky vapor which causes the demon to flee to Egypt, where Raphael binds him (viii. 2, 3). Asmodeus would thus seem to be a demon characterized by carnal desire; but he is also described as an evil spirit in general: *'Ασμοδαῖος τὸ πονηρὸν δαιμόνιον* or *τõ δαιμόνιον πονηρόν*, and *πνεῦμα ἀκάθαρτον* (iii. 8, 17; vi. 13; viii. 3). It is possible, moreover, that the statement (vi. 14), "Asmodeus loved Sarah," implies that he was attracted not by women in general, but by Sarah only.

Special Office of Æshma.

This general designation of an evil spirit tallies with the description of Æshma in the Bundehesh (xxviii. 15 *et seq.*): "Seven powers are given Æshm that he may utterly destroy the creatures therewith: with those seven powers he will destroy seven of the Kayân heroes in his own time; but one will remain. There where Mitôkht ["Falsehood"] arrives, Arask ["Malice"] becomes welcome; [and there where Arask is welcome] Æshm lays a foundation; and there where Æshm has a foundation many creatures perish, and he causes much non-Iranianism. Æshm mostly contrives all evil for the creatures of Auhramazd, and the evil deeds of those Kayân heroes have been more complete through Æshm, as it says that Æshm, the impetuous assailant, causes them most" (E. W. West, "Sacred Books of the East," by F. Max Müller, v. 108).

Less harmful in character than Æshma and Asmodeus is the figure of Ashmedai in the Talmud: he appears there repeatedly in the light of a good-natured and humorous fellow. But besides that, there is one feature in which he parallels Asmodeus, inasmuch as his desires turn upon Solomon's wives and Bath-sheba. Thus, while Asmodeus resembles Æshma-dæva with tolerable closeness, Ashmedai, on the contrary, would seem to come into direct comparison with a Greek satyr rather than with an evil demon. The historical element, however, that identifies him with Asmodeus on the one hand, and both with their Persian parallels on the other, is by no means to be ignored. Besides, if the Jews have merely borrowed the name from the Æshma-dæva of Parseeism, and have developed, independently, the idea of a demon corresponding to the name, it merely shows that the Jews shaped on lines of their own the materials they had borrowed from their neighbors.

Influence of Persian Beliefs on Judaism.

However, it is not impossible that Æshma-dæva, too, may have had other qualities analogous, point for point, to those of Asmodeus and Ashmedai. It is probable that the belief in the existence of a number of carnally minded and lascivious spirits, which was prevalent among the Parsees as among other peoples with whom the people of Israel came in contact, exercised an influence not merely on the Hebrew conceptions of an Asmodeus or Ashmedai, but also on Jewish ideas in general with regard to the qualities of evil spirits. In later Judaism there may be observed an extensive evolution of the conceptions that are present by intimation in the mythological reminiscence found in Gen. vi. 1 *et seq.* This evolution would seem, in any case, to have been advanced by the views spread by foreign religions. Not the least was the influence of Parseeism. To what extent this influence made itself felt among the Jews of later times, it is of course impossible to determine from the mere presence of Asmodeus in the Book of Tobit or of Ashmedai in the Talmud. But this occurrence indicates one of the channels through which the influence of foreign religions found its way among the Jews. Just as several of the apocalyptic works seem to show that the ideas of the Persian religion have had a bearing upon Jewish theological modes of thought, so do the conceptions of the Book of Tobit with regard to Asmodeus, and the depiction of Ashmedai in the Talmud, show that the popular beliefs of the Persians have likewise had a bearing, presumably in the first instance, on popular beliefs, and later, through them, on their theological modes of thought.

E. St.

ÆSOP'S FABLES AMONG THE JEWS:

Recent research has shown an intimate relation between the fables associated with the name of Æsop and the jatakas, or birth-stories of the Buddha. Sakyamuni is represented in the jatakas as recording the varied experiences of his previous existences, when he was in the form of birds, of beasts, and even of trees. Such legends as these may very well be the natural sources of tales like those of Æsop, which represent beasts as acting with the sentiments and thoughts of human beings. The jatakas are now extant in Pali versions, derived from Ceylon.

India the Probable Source.

It is surmised that a number of them were introduced into the Greek-speaking world by a Cingalese embassy that visited Rome about the year 50, as the fables that can be traced in classical literature later than that date resemble the Indian fables much more closely than the earlier fables of Æsop, as represented by Phædrus. It is probable that these later Indian fables were connected by the Greeks with the name of a Libyan, called Kybises: Babrius, a writer of fables in the third century, couples him with Æsop. Thus, in the first century, there were two sets of fables—one associated with the name of Æsop, and the other with that of Kybises—while in the second century these two sets were included in one compilation, running to three hundred fables, by a rhetor named Nicostratus. In the third century these fables were turned into Greek verse by Babrius.

Known to Tannaim.

It would appear, from references in the Talmud, that the Talmudic sages knew of the fables, both in their separate and in their collected forms. It is said of Johanan ben Zakkai (about the year 80), "He did not leave out of the circle of his studies . . . . . . the speech of angels, of demons, and of trees, the Mishlot Shu'alim and the Mishlot Kobsim" (Suk. 28*a*). The author of this article has suggested that, as the phrase "Mishlot Kobsim" has no meaning except "fables of the washermen," the word *Kobsim** is a misreading for *Kubsis* (כובסים for כובסים); and interprets the passage as stating that Johanan was acquainted with Æsop's Fables and with the Fables of Kybises, the latter of which had just been introduced from Ceylon to the Greek-speaking world. In the next century it is stated (Sanh. 38*b*) that "R. Meir had three hundred Fox-Fables," which statement is interpreted as a reference to the collection of Nicostratus. The latest reference to fables in the Talmud is in the Mishnah (Soṭah, ix. 15), "With the death of R. Meir [about 190] fabulists ceased to be." The importance of the Talmudic references in the critical history of the Æsopic fables is the evidence it affords of a separate collection under the name of Kybises.

That a number of the rabbis of the Talmud were acquainted with fables similar to those of Greece and India is evidenced by the list of Talmudic fables collected by Dr. Back (in "Monatsschrift," 1876–86). The following list will indicate the number of Talmudic fables (or sayings implying fables) that are dependent on the Indian and classical collections respectively:

Title.	Talmudic Reference.	Indian Reference.	Classical Reference.

Of about thirty fables found in the Talmud and in midrashic literature, twelve resemble those that are common to both Greek and Indian fable; six are parallel to those found only in Indian fable (Fables

---

* For a different interpretation of the word, see Fable.

Talmudic, Indian, and Greek Fables.

of Kybises); and six others can be paralleled in Greek, but have not hitherto been traced to India. Where similar fables exist in Greece, India, and in the Talmud, the Talmudic form approaches more nearly the Indian, whenever this differs from the Greek. Thus, the well-known fable of "The Wolf and the Crane" is told in India of a lion and a crane. When Joshua ben Hananiah told that fable to the Jews, to prevent their rebelling against Rome and once more putting their heads into the lion's jaws (Gen. R. lxiv.), he spoke of the lion and not of the wolf, showing that he was familiar with some form derived from India. The Talmudic fables are, therefore, of crucial importance in distinguishing between the later Æsop's Fables—derived directly from India—and the earlier ones, in which a direct Indian source is difficult to prove.

It is absolutely impossible for these fables to have been invented by the Talmudic sages, inasmuch as they were extant in Greece and India in their time; nevertheless there is, in the Bible, evidence of fable literature among the early Hebrews (see FABLE).

The Medieval Æsop.

Throughout the Middle Ages, Æsop's Fables were known mainly from the Latin prose versions of Phædrus, which were translated into Old French and other languages. A number of additional fables, however, are found among those of Marie de France (about 1200); and these show traces of Oriental origin. Here again Jewish literature helps to solve the problem of the sources of these new fables. There is extant a collection of one hundred and seven fables, with the Talmudic title "Mishle Shu'alim," compiled by one Berechiah ha-Naḳdan, containing fifty-three stories found in the work of Marie de France; of these, fifteen are peculiar to her and are not to be found in the classical Æsop. Hence, there can be no doubt that Berechiah derived these fables from the same source as Marie de France; and it has been suggested that this common source was an English translation by Alfred Anglicus of an Arabic version of the fables. He is known, from Roger Bacon's reference to him, to have translated from the Arabic. Marie de France declares that the source from which she derived her fables was an English version of Æsop made by King Alfred, which claim, being based on a mistake that could easily have arisen through confusion of the two Alfreds, is not tenable. Berechiah, as has been proved, lived in Oxford about 1190, and was known there as Benedictus le Puncteur. A further suggestion has been made that Alfred and Benedict worked together; Alfred producing the English version, from which Marie de France derived her fables, and Benedict, the Hebrew set. A careful collation of Benedict's fables with those of Marie de France should solve this problem in much the same manner as the Talmudic fables decided the question of the provenience of the classical ones (see BERECHIAH HA-NAḲDAN).

Berechiah's fables seem to have been the chief source from which the Jews of the Middle Ages derived their knowledge of Æsop's Fables; and versions of Berechiah's fables exist in Judæo-German (see ABRAHAM BEN MATTATHIAS and MOSES WALLICH).

The only version of Æsop in Hebrew was first published at Constantinople in 1516, together with the Midrash on the death of Moses; and from the title it appears to be derived from one of the French versions, since Æsop is there called Ysopet. The Syriac of Syntipas is found written in Hebrew characters, which fact gave rise to Landsberger's theory that the fable was invented by the Hebrews.

J.

AFANASYEV-CHUZHBINSKI, ALEXANDER STEPANOVICH: Christian Russian author and ethnographer (1817–75); he was an enlightened writer who did justice to the Jews. In his "Poyezdka v Yuzhnuyu Rossiyu" (2 vols., St. Petersburg, 1861–63) he gave a faithful picture of Jewish life in South Russia, and defended the Jews against the accusations of the prejudiced masses.

H. R.

AFENDOPOLO, CALEB B. ELIJAH B. JUDAH: Polyhistor, brother of Samuel ha-Ramati, ḥakam of the Karaite congregations in Constantinople and of Judah Bali, brother-in-law and disciple of Elijah Bashyatzi; born at Adrianople before 1430; lived some time at Belgrade, and died about 1499 at Constantinople. According to a notice found in a Paris manuscript, he supported himself by giving private instruction; but this is questioned by Steinschneider. A pupil of Mordecai Comtino at Adrianople, Afendopolo attained great proficiency in science, and, while lacking depth and originality of thought, distinguished himself by prolific literary production, for which his large library, that included rare manuscripts, partly bought, partly copied by himself, offered him rare opportunities. He continued "Adderet Eliyahu" (Elijah's Mantle), a work on Karaite law left unfinished in his charge by his teacher, Elijah Bashyatzi, in 1490. The wife of Bashyatzi, who was Afendopolo's sister, having died before her husband, Afendopolo no longer referred to Bashyatzi as his brother-in-law, but called him teacher. Afendopolo died before completing Bashyatzi's treatise.

His Writings.

Afendopolo's own works give a fair insight into the erudition of the Karaites. Fragments only of many of them have been brought to light by Gurland in his "Ginze Yisrael" (Lyck, 1865), and less exactly by A. Firkovitch. His writings are: (1) An introductory index to Aaron ben Elijah's "Eẓ ha-Ḥayyim" (1497), giving the contents of each chapter under the title, "Derek Eẓ ha-Ḥayyim," published by Delitzsch in his edition (1840) of this work. (2) A similar introductory index to Judah Hadassi's "Eshkol," under the title "Naḥal Eshkol" (Koslov, 1836). (3) "Gan ha-Melek" (Garden of the King), his principal work, finished in 1495, a diwan, or collection of poetical essays on love, medicine, and the active intellect. (4) "'Asarah Mamarot" (Ten Discourses), containing homilies on the Passover lesson (Ex. xii. 14); on the Song of Songs as read on the seventh Passover Day; on Psalm cxix, read, according to Karaite custom, on the seven Sabbaths between Passover and Pentecost; and on the Pentecost lesson dealing with the Sinaitic revelation. The introductory chapter, much of which is reproduced by Mordecai ben Nissim in his "Dod Mordecai," dwells on the origin of the Karaite schism and the main questions at issue between the Karaites and the Rabbinites (see especially Steinschneider, "Leyden Catalogue," pp. 127 *et seq.*). Afendopolo's view of Jesus given therein is remarkable for its impartial tone. He places him, it is true, a century before the common era, but adds:

> "He was, according to the opinion of the lovers of truth, a wise man, pious, righteous, God-fearing, and shunning evil. Neither did he ever teach any law of practise contrary to the written law. Only after his death, a quarrel arose between his followers and those who had opposed him because of his wisdom, which was rooted in the law and not in their rabbinical additions; and many of these disciples of his, sent forth in his name, introduced practises and teachings altogether foreign to him, removing thereby the corner-stone of the Law, though winning the multitudes. Thus the New Testament originated, which separated the Christians from the Jews."

(5) "Abner ben Ner" (1488), a series of Hebrew *makamas*, or short, rimed narratives, introducing Saul, David, and the queen of Sheba into the dialogue. (6) Under the same title, an allegory on the Song of Songs, the same being applied to the relation of God to Israel. (7) "Iggeret ha-Sheḥiṭah" (1497), a work on the rites used in slaughtering animals, in the form of letters addressed to his son-in-law, Jacob b. Judah; the same in condensed form written at Kramaria near Constantinople (1497). (8) "Seder 'Inyan Sheḥiṭah," a similar work in rime, is extant in manuscript (Firkovitch's MS. No. 569). (9) On the use of arrack (in which the passage Deut. xxxii. 38 is applied to the Moslems, and the Christian sacrifice is alluded to; see Steinschneider, "Leyden Catalogue," p. 233; "Polemische Literatur," p. 374). (10) "Iggeret ha-Kimah" (Letter on the Pleiades), treating of forbidden marriages, and directed against Joshua's work on the subject. (11) "Patshegen Ketab ha-Dat" (1496), on the Pentateuch lessons and the Hafṭarot and other Bible selections. (12) A rejoinder to Maimonides in defense of the Karaite calculation of the seven weeks (Steinschneider, "Hebr. Bibl." vii. 11). (13) A defense of Aaron ben Elijah's "Gan Eden" against Moses ben Jacob ha-Ashkenazi (Steinschneider, "Hebr. Bibl." xx. 122). (14) A commentary on the Hebrew translation of the arithmetic of Nicomachus of Gerasa (first or second century), made from the Arabic by Kalonymus ben Kalonymus in 1317. The manuscript is in the Berlin Royal Library (Steinschneider, in "Monatsschrift," xxxviii. 76). Afendopolo has attached to this commentary a sort of general encyclopedia of the sciences. He commences with an analysis of the eight books of Aristotle's "Logic." Practical science, as he calls it, deals with man himself, with the house (family), and the state. Speculative science comprises physics, geometry, and metaphysics. In the same manner he runs through the other sciences, giving their various subdivisions. The highest science is theology, which treats of the soul, of prophecy, and of eschatology. The course of instruction which Afendopolo lays down follows that of Plato; namely, logic, arithmetic, geometry, astronomy, music, the science of aspects (המבטים), metrology, physics, and metaphysics. After discussing future bliss, he deals with two other sciences—law, especially as regards the relation of faith to works, and controversy ("Ḥokmat ha-Debarim"). In the latter he cites freely from Batalyusi, without, however, giving his authority (Steinschneider, in "Monatsschrift," xl. 90 *et seq.*). (15) An astronomical treatise, largely made up of a commentary on the portion קדוש החודש of Aaron ben Elijah's "Gan Eden" (Neubauer, "Catalogue," No. 2054), under the title "Miklal Yofi." (16) "Iggeret ha-Maspeḳet," a work on astronomical terminology, and on the construction of sun-dials, improving upon the method of his teacher, Comtino, by adding the odd hours (Gurland, "Ginze Yisrael," iii. 18, 19). (17) "Tiḳḳun Keli Rob ha-Sha'ot" (1487), which was known also to Joseph del Medigo. Afendopolo also wrote some penitential hymns which are to be found in the Karaite Maḥzor (Neubauer, "Catalogue," No. 2369, 3; Zunz, "G. V." p. 425; idem, 2d ed., p. 440); but most of these hymns were taken from Rabbinite poets (see David Kahana in "Oẓar ha-Sifrut," vol. v., Cracow, 1896). Afendopolo had intended to translate the "Elements of Euclid," and to write commentaries on Jabir ibn Aflaḥ's "Kitab al-Ḥiyyah" (Compendium on Astronomy) and on Ptolemy's "Almagest."

AFFINITY. See Marriage Laws.

AFFRAS RACHMAELOVICH (called also **Aphraschus Rachmailowicz**): A Jewish merchant of Mohilev and Riga, who lived about the end of the sixteenth century. Affras figured prominently in Lithuania as an importer of miscellaneous merchandise, and in White Russia as a farmer of taxes and distillery royalties. The records of Brest-Litovsk, for March 3, 1583, show that nineteen wagon-loads of miscellaneous goods, including cloths, pepper, cinnamon, prunes, and Hungarian leather, coming from Lublin, were passed through the custom-house in the name of Affras Rachmaelovich of Mohilev ("Regesty i Nadpisi," p. 298).

According to Sazonov ("Matters of Jurisprudence," part vii. p. 464), on June 3, 1589, an appeal was made by Jan Loveika, city marshal and royal secretary, to the bailiff of Mohilev, in the name of Affras, farmer of taxes and distilleries of Mohilev, to impose a fine of forty copes (1 Lithuanian cope =3 rubles $22\frac{5}{7}$ kopecks) on Lukian Pilka, for unlawfully dealing in liquors discovered in his possession, by Moshka Julevich, Affras's "servant," in company with the "city servants." Affras also appears among the first Jews on the records of Riga, Livonia, that were summoned with others, about 1595, before the court of burgraves, in a suit concerning some produce of the forest. The representative of Riga at the Polish court received special instructions on his account.

(from the year 80 to 1670), Nos. 642, 672, 676, 678, St. Petersburg, 1899.

H. R.

AFGHANISTAN: Country of Asia, lying to the northwest of India. The Afghans themselves have a tradition that they are descendants of the lost Ten Tribes. They were carried away by Buktunasar (Nebuchadnezzar) to Hazarah, which they identify with the Arsareth (R. V. Arzareth) of the Bible. In the "Tabaḳati-Nasiri," a native work, it is stated that at the time of the Shansabi dynasty there was a people called Bani Israel, who traded with neighboring countries; they had settled in the country of Ghor, southeast of Herat, and about the year 622 they were converted to Islam by a person called Kais or Kish (see Ten Tribes). This throws no light, however, upon the source of the modern Jews of Afghanistan, said to number 40,000 in about sixty congregations, who are chiefly concentrated at Kabul (2,000 souls), Herat, Kandahar, Ghazni, and Balkh. The ruins of the synagogue at Kabul are said to date from the time of Nebuchadnezzar, but the present Afghan Jews speak Persian, and all their religious books and teachers come from Teheran or Muscat. They have in each of the above-mentioned five towns a special quarter called the Mahall-i-Yehudiyeh, which is closed at sunset and opened at dawn. They dress like the rest of the Afghans, except that they wear a black turban, said to be mourning for the fall of Jerusalem, but probably as a distinctive mark (see BADGE). Several of them are doctors. They are exempt from military service, but instead pay a *ḥarbieah*, or war-tax. In 1880 Ayub Khan ordered the Jews of Herat to supply for a harbieah 300 laborers and 2000 tomans (equal to 10,000 Austrian florins), and this caused many to flee back to Persia. See BALKH, KABUL, KANDAHAR, GHAZNI, and HERAT.

J.

AFIA, AARON: A physician, philosopher, and mathematician of Salonica, who lived about 1540. He was the teacher of Daniel ben Peraḥyah, whom he assisted in the translation from the Spanish into Hebrew of Abraham Zacuto's "Almanac." He was also helpful to the preacher Moses Almosnino in his Hebrew translation of Juan Sacrobosco's "El Tratado de la Esphera" (Treatise on the Sphere). He wrote "Opiniones Sacadas de los mas Auténticos y Antiguos Philósophos que Sobre la Alma Escrivieron, y sus Definiciones" (Selected Opinions of the most Authentic and Ancient Philosophers on the Soul, and their Definitions), Venice, 1568.

M. K.

AFIḲOMEN (אפיקומן): A piece broken off the cake of unleavened bread, *mazzah* (usually from the middle one of the three cakes called Cohen, Levi, and Israel), at the beginning of the SEDER service on Passover eve. It is secreted under the pillow of the head of the family, who presides at the *seder* table, and it is eaten at the conclusion of the meal. The word is of Greek derivation, according to some authorities from *ἐπὶ κῶμον*; that is, a call for the after-dinner pastime (*κῶμος*); others hold that it is from *ἐπικώμιον* (festal song). The Jewish form of it occurs in Mishnah Pes. x. 8, which says: "One should not break off the communion meal of the paschal lamb by starting another entertainment, called either *ἐπικώμιον* [festal song], or, according to others, *ἐπίκωμον* [an after-meal dessert or pastime]." This rule of making the paschal lamb the last thing to be partaken of in company was applied at a later time (see Rab and Samuel in Pes. 119*b*) to the Passover bread; and the piece eaten at the end of the meal received the name *Afiḳomen*.

In order to awaken the curiosity of the children the Afiḳomen was broken off the mazzah at the beginning of the seder; the custom arising perhaps from a misunderstanding of the passage in Pes. 109*a*, "They hasten [the eating of] the mazzah in order to keep the children awake," which may also be translated, "They snatch away the mazzah"; and so it became customary to allow the children to abstract the Afiḳomen from under the pillow of the master of the house, and to keep it until redeemed by him with presents.

Subsequently it became quite common among the Jews, by way of witticism, to say: "To eat much Afiḳomen is to live long"; and when a man died advanced in years it was said, "He ate too much Afiḳomen." A piece of the Afiḳomen used to be preserved in every house from year to year, and in Eastern countries it was supposed, when carried in a corner of the *arba' kanfot*, to guard against the evil eye.

***AFRICA:** The Bible has no general name for Africa, any more than it has for Europe or Asia. The word "Ham," from the Hebrew root חמם (to be hot), which is applied in the later Psalms (lxxviii. 51; cv. 23, 27; cvi. 22) to Egypt, is the nearest approach to a general name, inasmuch as it applies directly to the hot southern countries (Book of Jubilees, viii.). Next in importance is the term "Cush," corresponding to the Greek ἔδνος Κουσσαῖον, the Cushite tribe, in Plutarch's "Lives" ("Alexander," lxxii.), and also occurring frequently in the works of other Greek writers in the form Κοσσαῖοι (Knobel, "Völkertafel der Genesis," p. 250, Giessen, 1850). The "Kossaioi" or the "Kissia Chora" of the ancients, it is true, are to be sought in Asia, but it is supposed that a migration of these peoples took place, and there are many philological, historical, and ethnological proofs of such an occurrence. Since two of the peoples mentioned as belonging to the sons of Ham (Gen. x. 6), Mizraim and Canaan, are perfectly well known, it is evident that the enumeration proceeds from south to north; and on this basis Cush must be the southernmost of the Hamitic peoples. The ancient Greeks and Romans regarded these peoples collectively as Ethiopians (Knobel, "Völkertafel der Genesis"), which goes far to prove that the terms "Cush" and "Ethiopia" are nearly equivalent. Both terms were used originally to designate various nations in Asia and Africa, but their use was afterward limited to the countries south of Egypt. Even in its closer application, the Hebrew term "Cush," as used in Gen. x., includes peoples outside of Africa. One, at least, of the descendants of Ham, Sheba (Gen. x. 7), must be identified with a nation in southwest Arabia (Dillmann, "Die Genesis," 5th ed., p. 181, Leipsic, 1886). A definitely bounded African continent, as known to-day, was not thought of by the Biblical writers. On the contrary, the territory on both sides of the Red Sea formed for them an ethnic unit, which was sharply distinguished from the rest of Africa.

Biblical Age.

After Ethiopia, Egypt and Libya are the two most important lands of Africa. The Hebrew name for Egypt is מצרים (compare the Phenician *Muẓra*, for which read *Musra* in Stephanus Byzantinus under the word Αἰγυπτος: Babylonian, *Muẓri*, *Miẓir*—(Schrader, "K.A.T.," 2d ed., p. 89; ancient Persian, *Mudraja*; Septuaginta, *Mestrem*; South Arabian, *Miẓr*; Arabic *Maẓr*). The Hebrew term has not been sufficiently explained, but it certainly shows a dual form which can best be interpreted as referring to the upper and lower districts. From a philological standpoint, however, the form may be differently explained, and the seeming sign of the dual may be regarded as a locative ending (Barth, "Nominalbildung in den Semitischen Sprachen," p. 319). The two names Cush and Mizraim, therefore, designate the entire eastern portion of the African continent known to antiquity. Several of the countries adjacent to Egypt are also found in the table of peoples as given in Genesis. "Phut" is mentioned as of equal rank with Egypt (Gen. x. 6; compare also Nahum, iii. 9; Jer. xlvi. 9; Ezek. xxvii. 10, xxx. 5, xxxviii. 5). The Septuagint, a recognized authority in Egyptian

---

*The history of the Jews in the various subdivisions of the African continent is treated under separate headings. Here only a general survey of that history is presented.

Extent of Africa.

matters, Josephus, and Jerome, all interpret Phut as referring to Libya (Dillmann, "Die Genesis," p. 178), from which it may be assumed that the Biblical writers included in their perspective also that great expanse of territory west of Egypt called Libya, by which name ancient writers often designate the whole of Africa. Authors like Herodotus were unacquainted with any African countries to the west of Libya. Some, indeed, have endeavored to explain the Biblical Havilah as an African region; and Josephus ("Ant." i. 6, § 1) even identifies it with the land of the Gætuli, which view is also held by the medieval chronicler Jerahmeel ("Jew. Quart. Rev." xi. 675; Gaster, "Chronicles of Jerahmeel," 1899, p. 68). The land of the Gætuli is placed by the ancients on the borders of the Sahara (Sallust, "Bellum Jugurthæ," xix. 11); though it is scarcely probable that writers who do not appear to have known even the western coast of North Africa should have been acquainted with an interior country south of ancient Numidia, now Algeria. The Old Testament takes no cognizance of the negro race, though Jer. xiii. 23 may be considered a passing reference to a dark-skinned people. Cush refers only to Ethiopia, and there exists no ground for assuming that the Biblical writers had a more extended knowledge of the African continent.

All other Biblical names that have been supposed to apply to individual parts of Africa belong to the realm of myth.

The term "Sofala" for the east coast of Africa is of the same origin as the Hebrew שפלה (*shefelah*), or coastland (Winer, "B. R." 3d ed., *s.v.* "Ophir"), but the assertion that the Biblical gold-producing Ophir is to be located in that region is utterly without foundation. This semifabulous land has been located with more justification in Mozambique and Zambesia.

Other Biblical Identifications.

The statement that Tunis is the Biblical Tarshish is erroneous, and was long ago refuted by Abraham Zacuto ("Yuḥasin," p. 231*b*, London, 1857). Nevertheless, it is the serious opinion of Zacuto that Epher (Gen. xxv. 4) gave his name to the continent when, as Zacuto thinks, the children of Keturah migrated thither ("Yuḥasin," p. 233*b*). This is also the opinion of the Arabian Ibn Idris (Rapoport, "'Erek Millin," p. 184). Benjamin of Tudela, a noted traveler of the twelfth century, considered Tunis the same as Hanes (Isa. xxx. 4), and also identified the modern Damietta with the Biblical Caphtor. According to legend, the city Sabta (סבתא) was built by Shem, the son of Noah, and it is even related that Joab, the general of David, reached it ("Yuḥasin," p. 226*a*). Israel ben Joseph Benjamin, a traveler of more recent times, whose descriptions of various countries were written in French, German, and English, and translated into Hebrew by David Gordon ("Mas'e Yisrael" [Israel's Travels], p. 109, Lyck, 1859), relates the same legend, but does not mention the "Yuḥasin." In a geographical work by Abraham Farissol, "Iggeret Orḥot 'Olam" (Letter on the Ways of the World), fols. 18 and 30, even paradise is said to have been situated in the Mountains of the Moon, in Nubia (Zunz, "Geographische Literatur der Juden," in "Gesammelte Schriften," i. 179, Berlin, 1875).

Egypt.

Without doubt Egypt is, historically, the most important of the countries of Africa. Indeed, it was considered by the ancients as belonging rather to Asia than to Africa, and was, with Palestine, the classic land of Jewish history. For centuries an important historic connection existed between the land of the Israelites and the kingdom of the Pharaohs, a connection which the tablets discovered in 1887 at Tell el-Amarna have established beyond the possibility of doubt. When the national life of Israel in Palestine ceased, an important section of the people, carrying with them the prophet Jeremiah, wandered back to Egypt. Thus, for the second time, Egypt became the home of the Jewish race, and much of later Jewish history was made upon its soil. To what importance the Jews attained here can best be inferred from legends concerning them, originating in other countries. An Ethiopic apocryphal book contains a legend respecting Jeremiah which narrates that, in answer to a prayer of the prophet, the reptiles of the dry land and the crocodiles of the rivers were exterminated (R. Basset, "Les Apocryphes Éthiopiens," i. 25, Paris, 1893; and also "Chron. Paschale," ed. Dindorf, i. 293; Suidas, under the word 'Αργολαι). According to Jewish legend similar blessings descended upon Egypt at the advent in the land of the patriarch Jacob (Midrash Tanḥuma on Gen. lxvii. 10, quoted by Rashi). A native legend declares also that, previous to the arrival of Joseph, the son of Jacob, the present province of Fayum was covered by a great lake, which received its water from the Nile, but that Joseph drained it and turned it into a dry plain (Baḥr Yusufs; Ritter, "Erdkunde," part i., "Afrika," p. 804, Berlin, 1822).

Jewish Soldiers in Egypt.

In ancient times the Jews performed military service for the Egyptians; for, according to the letter of Aristeas, King Psammetichus, probably the second of the name, employed Jewish mercenaries in a war against the Ethiopians, and it is reported that these Hebrew soldiers distinguished themselves by their courage. Even more remarkable is the legend recounted by Josephus ("Ant." ii. 10, § 2), according to which Moses himself was an Egyptian general, and conducted a successful invasion of Ethiopia (Meroe?). The Hebrew Josephus (Josippon, i. chap. ii.), indeed, reports that Zepho, son of Eliphaz, son of Esau, who was brought to Egypt as a captive by the viceroy Joseph, escaped thence to Carthage, where he was appointed general by King Angias. The source of this legend is not known, but it recalls the Talmudic legend (Yer. Shab. vi. 36*c*), that the Girgashites went to Africa, a statement based upon the fact that Carthage was colonized by Phenicians; hence from Canaan. Again Jerome, in "Onomastica Sacra," ed. Lagarde, Göttingen, 1887, represents Gergesæus as establishing colonies (*colonum eiciens*), which story is undoubtedly based on the Talmudic legend. This recalls the inscription said by Procopius to have been found in Africa, which describes Joshua as a robber, because he conquered Canaan (see "Jew. Quart. Rev." iii. 354; Barker, "Supposed Inscription upon 'Joshua the Robber,'" illustrated from Jewish sources). These wide-spread legends are ample proof that the continent of Africa occupied an important place in the thoughts of Jews.

Ethiopia.

The next most important land of Africa, from the point of view of Jewish history, is Cush (Ethiopia), the influence of whose king, Tirhakah, upon the history of Israel in the days of King Hezekiah is plainly discernible. According to II Chron. xiv. 8 *et seq.*, the Ethiopian king Zerah invaded Judah and advanced as far as Mareshah; but the passage offers many historical difficulties. A war of the Ethiopian king Kyknos with the Syrians and the Children of the East is described in Yalḳuṭ (Ex. § 168, 52*d*) and in the Sefer ha-Yashar (on Ex. ii.), but the source of the legend is unknown. Ezekiel indicates Ethiopia as the border-land of Egypt, and designates

(xxix. 10, xxx. 6) Syene, the present Assouan, as the most southern city. This probably exhausts what the Biblical sources and the legends connected with the Bible contain on Africa.

Greek and Roman Age.

About the time that Greek and Roman culture began to influence the northern portion of Africa the Jews began to spread into these regions; indeed, they went even beyond the confines of the Roman empire. Egypt, according to the testimony of Philo, was inhabited, as far as the borders of Libya and Ethiopia, by Jews whose numbers were estimated at a million. The great mercantile city of Alexandria was the intellectual and commercial center of African Jewish life. Alexander the Great had conferred upon the Jews full rights of citizenship, and they guarded these rights jealously. In Cyrene also they were of importance; and their progress may be traced by the aid of inscriptions as far as Volubilis, in the extreme west of Mauretania (Schürer, "Gesch." 3d ed., iii. 19–26). Throughout the Grecian countries they formed themselves into separate political communities (*πολίτευμα*; see P. Prerdrizet, in "Revue Archéologique," 1899, xxxv. 45), while in the Latin districts they not only founded communities, but built synagogues, some of which were very beautiful. According to Jerome, the Jews dwelt in a continuous chain of settlements, from Mauretania eastward, throughout the province of Africa, and in Palestine, reaching as far as India ("Ep. 129 ad Dardanum," ed. Vallarsi, i. 966). If they were interrogated on Biblical matters they gave no answer ("Ep. 112 ad Augustinum," i. 744), probably in order to avoid being drawn into disputes with Christians. Jerome, it is true, claims they did not know any Hebrew. When Jerome's Bible translation, the Vulgate, was to be introduced among the African Christians, the Jews spread the report that the translation was false and thereby aroused strife among the Christian congregations (Jerome, *ibid.*, and S. Krauss in the "Magyar Zsidó Szemle," vii. 530, Budapest, 1890). But Judaism in these regions did not dissolve or merge into Christianity; on the contrary, it continued to maintain its independent existence. Only in Egypt, particularly in Alexandria, where the path to Christianity had been smoothed by Jewish Hellenism, undoubtedly great masses of Jews went over to Christianity; but even there they continued to exist until the beginning of the fifth century, when Bishop Cyril expelled them from that city, which had been their home for many centuries. They must have returned at the first favorable opportunity, for in 640 the calif Omar, the conqueror of Egypt, found 40,000 Jews in Alexandria.

Rabbinic Accounts.

Rabbinical sources show much familiarity with, and great interest in, this part of the world. The Biblical names of Hamitic peoples are explained in the Talmud and Midrash from the standpoint of Greco-Roman geography. According to the researches of Epstein ("Les Chamites de la Table Ethnographique," in "Rev. Ét. Juives," xxiv. 8; S. Krauss, "Die Biblische Völkertafel im Talmud, Midrasch, und Targum," in "Monatsschrift," xxxix. 56) the following African peoples are mentioned: Syenians, Indians (that is, African Indians), Sembritæ (south of Meroe), Libyans, Zingians (on the east coast of Africa), Mazakians (in Mauretania, mentioned in Sifre, Deut. 320 and in Yeb. 63*b*; in Ex. R. iii. 4 reference is made to a Mauretanian girl). A collective term for the dark-skinned Africans is Cushites, which often occurs in this literature. The terms "Barbar" and "Barbaria," which very frequently occur in connection with the term Cushites, do not indicate the Berbers or Barbary country of Africa, but the Scythian peoples of the north of Europe. The word "Barbaria," which occurs in Ptolemy and in Cosmas Indicopleustes in about the same sense as the modern Barbary, and which has come to the Arabs in the form "Barbara" (Yakut, i. 543), only appears in later Jewish literature in this sense, and is applied to the coast of Somaliland (see Tomaschek, under the word "Barbaria," in the "Realencyklopädie für Classische Alterthumswissenschaft").

Meaning of "Africa."

On the other hand, the rabbinical term אפריקא, which has been wrongly explained as Phrygia, or Iberia in the Caucasus, means nothing else than the present Africa ("Monatsschrift," *ibid.*), and is intended to denote either the entire continent or the Roman province Africa. Thus, when the "sons of Africa" appear before Alexander the Great to accuse the Jews of the reconquest of Palestine (Sanh. 91*a*), and the Egyptians almost immediately present another charge against them, the reference can only be to the province of Africa, since the "sons of Africa" who demand the restoration of Canaan are, without doubt, the Girgashites, who had been compelled to emigrate to Africa (Yer. Sheb. vi, 36*c*.). Since the legend of this Girgashite emigration is intimately connected with the founding of Carthage, Africa is thus identified with it even more closely (Tamid, 32*b*, and the parallel passage, where מדינת אפריקי, "African land," is evidently the same as Carthage). The Septuagint (Isa. xxiii. 1), and Jerome (on Ezek. xxvii.), who, though a Christian, was taught by Jews, and very often the Aramaic Targum on the Prophets, identify the Biblical Tarshish with Carthage, which was the birthplace of a number of rabbis mentioned in the Talmud (compare above the identification with Tunis). Africa, in the broader sense, is clearly indicated where mention is made of the Ten Tribes having been driven into exile by the Assyrians and having journeyed into Africa (Mek., Bo, 17; Tosef., Shab. vii. 25; Deut. R. v. 14; and especially Sanh. 94*a*). Connected with this is the idea that the river Sambation is in Africa. The Arabs, who also know the legend of the Beni Musa ("Sons of Moses"), agree with the Jews in placing their land in Africa (compare Bacher, "Ag. Tan." i. 298; Epstein, "Eldad ha-Dani," p. 15). The probable basis of this legend must be sought in the actual existence of the Falashas in Africa. Rabbi Akiba, who traveled in Africa, on one occasion made use of an African word (Rapoport, in "Bikkure ha-'Ittim," iv. 70, 1823).

Besides the north of Africa, the great region to the west of the Red Sea—the land of Ethiopia or Abyssinia (Habesh), together with its adjacent countries, inhabited from time immemorial by the tribe of the Falashas, who profess the Jewish faith—possesses a special interest for Judaism. The native legend narrates that the queen of Sheba (I Kings, x.) bore a son called Menelek to Solomon, and that Menelek was educated in Jerusalem and afterward introduced the Mosaic law into his own country. This, however, only makes intelligible the rapid dissemination of Christianity in Ethiopia. With this may be compared the conversion of the eunuch of the queen Candace in Acts, viii. 27. According to the royal annals of Abyssinia, a large part of the land was inhabited by Jews, even before the common era. This refers, in all probability, to the Falashas (Ritter, "Erdkunde," part i., "Afrika," p. 218, Berlin, 1822). The undeniable relationship of the Ethiopian language (Geez) to other Semitic dialects stamps the Ethiopians as a Semitic tribe, an assumption that is confirmed by their physical appearance. The nomadic Zalans, who live apart from the state church, also consider themselves Israelites (Flad, "Die Abyssinischen Juden," Basel, 1869; also the monograph of Metz in "Monatsschrift," 1879, xxviii.; and Epstein, "Eldad ha-Dani," Presburg, 1891).

Medieval Period.

The flourishing condition of North Africa brought about by Roman civilization did not last beyond the fourth century. The Vandal hordes conquered the province of Africa, and although as Arians they were well disposed toward the Jews, still the latter suffered greatly. When the Byzantines became masters of this region the little congregation of Borion, which claimed to trace its origin back to King Solomon, was forced by Justinian to accept baptism (Grätz, "Gesch. der Juden," v. 30). But the Byzantine dominion soon gave way to the Saracen; and the Jews were permitted to progress in peace. Under the influence of the vivifying Arabic culture the Jews awoke to a new life. The holy city of Kairwan, from which so many learned Jews have derived their names, is situated in Tunis (Ibn Ḥaukal, "Orient. Geogr." pp. 19, 20, quoted by Ritter, *l.c.*, p. 913), and is not identical with the ancient Cyrene, as Rapoport, the biographer of the North African scholars, asserts ("Bikkure ha-'Ittim," ed. 1826, p. 68; ed. 1831, p. 16).

The city of Kairwan, says the Spaniard Abraham ibn Daud, was the most strongly fortified place in the whole Ma'arab ("West"), as the Jews, following the example of the Arabic "Maghreb," called all North Africa, except Egypt. Natronai ben Ḥabibai, who was a candidate for the exilarchate in Babylon, was obliged to go into exile in this region in 773 (F. Lazarus, in Brüll's "Jahrbücher," x. 176). Others, however, hold that, in the last instance, under the term "Ma'arab," Palestine must be understood.

The Maghreb.

The community of Kairwan was under the jurisdiction of a leader, who bore the title of *rosh* (head). The other congregations of the Maghreb were probably organized in the same manner. In Kairwan Jewish learning flourished greatly. The "sages of Kairwan" are mentioned in the "Pardes" of Rashi; to them the rabbinical decisions of the Geonim Ẓemaḥ (concerning the adventures of the traveler Eldad ha-Dani), Sherira (regarding the succession of the Amoraim and the Geonim), and Hai were addressed. In the tenth century the naturalist and philosopher Isaac Israeli lived in Kairwan. Like Saadia Gaon, he was of Egyptian birth, being a native of the plains of Fayum, not far from the Libyan desert, where the Jews lived in the undisturbed pursuit of their religious practises. Saadia being considered a descendant of the house of David, the Egyptian Jews must, therefore, have belonged to the noble families of Israel. From the eighth to the tenth century the Maghreb was, after Babylonia, the most important country for the Jews. The great rabbinical school upon which the Geonim Jacob ben Nissim, Ḥushiel, and Hananeel conferred great glory was also situated in Kairwan. Hananeel (commentary on Ex. x. 14) is authority for the statement that, in answer to the prayer of Moses, the locusts were banished from Egypt, and that thenceforward the land remained free from that plague. Hananeel shows also some knowledge of Greek, a surprising fact, inasmuch as the Arabic tongue and Arabic culture were all-prevalent in those regions. Abraham Zacuto, who lived in Tunis during the sixteenth century, writes in the "Yuḥasin" (p. 212, ed. London), as does also the chronicler Joseph ben Zaddik Arevalo (quoted by Neubauer, "Mediæval Jewish Chronicles," i. 92, Oxford, 1887), that the rabbinical administration had its seat in Kairwan. The next important town of Morocco was Fez, from which the Karaite Moses Alfasi and the Talmudist Isaac Alfasi derived their names. The Karaite Moses Dari derived his name from another Moroccan city. In the Middle Ages an extensive intercourse existed between Spain and the northern coast of Africa lying directly opposite; the commerce was maintained mainly by Jews. Leo Africanus ("Africæ Descriptio," Zurich, 1559), himself of Jewish birth, reports that in North Africa the Jews were the only masons, locksmiths, goldsmiths, metal-founders, potters, silk-weavers, painters, and minters (Kayserling, "Zur Gesch. der Juden in Marocco aus Alter und Neuer Zeit," in "Monatsschrift," 1861, x. 401).

In the twelfth century, while the Almohades, who had come from North Africa, were devastating Spain, thousands of Spanish Jews were obliged to seek refuge in North Africa. In speaking of this persecution Abraham ibn Daud (ed. Neubauer, p. 77) says that Ibn Tumart had massacred all the Jews, from Zala, "the end of the world," to Almeria, in Spain. The same author (p. 80) mentions Tangier (טאנגה? Tangah) as the remotest settlement of Jews: compare the fragment, p. 190, "the congregation of Israel is scattered from the city of Zala in the extreme Maghreb [Zala in Tripoli, on the Greater Syrtis, is probably meant] up to Tangier [Tanja, so read with the variant, תנדות, Tandut, which must be read תנגא, Tanga] at the beginning of the Maghreb; also in the utmost end of Africa and in all Africa [this last clause is found only in London edition, p. 214*b*] and in Egypt." The lands of Asia and Europe then follow. Ibn Daud also calls the Maghreb "the land of the Philistines" (*ib.* p. 60).

Renaissance of Egypt.

The persecutions of the Almohades forced Moses Maimonides to leave Spain, and, after remaining for a short time in Fez, he took up his abode in Fostat, near Cairo, Egypt. Thus, through this great philosopher, the center of African Judaism became, for a time, transferred to Egypt. The office of *nagid* (in Arabic *raïs*), which made its holder the spiritual head of a large section of the Jews, remained for a long time in the family of Maimonides. It is only necessary to read the chronicle of Joseph Sambari (ed. Neubauer) to perceive that Egypt had become, as it were, a second holy land for Judaism. About 1170 Benjamin of Tudela traveled in Africa, and compiled some very exact data concerning Egypt. Compare Asher's edition, and also Lelewel ("Géographie du Moyen-Âge," vol. iv., Brussels, 1852). In connection with this, it is interesting to note that Benjamin knew of warlike Jews in Libya. The Jewish population of Cairo (New-Mizr) was composed of two elements—Palestinians (Syrians) and Babylonians (Irakians), who had separate synagogues—concerning which many legends were in circulation. The synagogue in Old Cairo (Fostat) was even more celebrated. An inscription on its wall announced that it had been erected thirty-eight years before the destruction of the Second Temple. According to Obadiah Bertinoro, who saw it, this was legible in the sixteenth century ("Jahrbuch für die Gesch. der Juden," iii. 246, Leipsic, 1863). The Arabic writers Abdallatif and Makrizi also mention it. See the note of Munk on "Benjamin of Tudela," ed. Asher, ii. 200. Judah Alḥarizi ("Taḥkemoni," chap. 46) came across a large congregation of Maghrebis in Cairo. Karaites also existed in Egypt in great numbers, and periodically stood higher in the esteem of the government than the Rabbinites. Concerning the Egyptian

Samaritans see the data of Heidenheim in the "Vierteljahrsschrift für Deutsche und Englische Theologische Forschung und Kritik," iii. 354–356 (1867), and N. Brüll in "Jahrbücher," vii. 43–45 (1885). Cazès treats of Jewish antiquities in Tripoli in the "Rev. Ét. Juives," 1890, xx. 78–87. The list of town names in Morocco and Algeria, given for halakic purposes ("Rev. Ét. Juives," v. 249), is of geographical importance.

The Barbary States.

In the Middle Ages only the northern part of Africa is of importance, for general as well as for Jewish history; but the adventurer Eldad ha-Dani attracted general attention in the ninth century by his romantic tales and thereby aroused interest in the Jews of unknown regions of Africa. Fleeing from the massacres in Spain in 1391 and seeking refuge in Africa, the Jews added materially to the population of the Barbary states. The cities of Algiers, Bougie, Constantine, Miliana, Oran, Tenez, Tlemçen and others were settled by exiled Jews and Maranos, and they became communities of importance by virtue of the intelligence peculiar to the Spanish Jews. Algiers sheltered such rabbinical authorities as Isaac ben Sheshet and Simeon ben Ẓemaḥ Duran. A century later, at the time of the great expulsion of the Jews from Spain and Portugal, the same process was repeated, but on a greater scale and under much sadder conditions. It was on the northern coast of Africa that the heartrending incidents took place which are described with such horrible vividness in "Shebeṭ Yehudah" and other chronicles. Hunger, pestilence, and the sword carried off the unhappy refugees by hundreds; those who escaped death were sold into slavery or were forced to renounce their faith. Since that time the descendants of these refugees have lived in the Barbary states, especially in Morocco, in continual misery. Only in Egypt did the Jews retain a position of some importance. In 1517 Egypt came under Turkish rule; and, as in the rest of Turkey, Jewish names came to the fore, mainly of Spanish scholars and diplomats. Under the viceroy Aḥmed Shaitan the Jews were greatly oppressed, but were saved in an almost miraculous manner. In the sixteenth century David Reubeni told a wonderful tale of a Jewish kingdom, by which he probably meant that of the Falashas. The Jews in the Maghreb were just as eager to listen to fantastic Messianic announcements as their brethren in other lands; they also loved to dwell in Jerusalem. In 1521 an anonymous Italian pilgrim reported that all classes of Jews were to be found in Jerusalem, there being among them Mostarbino, or Moriscos, and Maghrebim from the Barbary states "Shibḥe Yerushalaim," p. 21). Jews took a prominent part in the Portuguese conquests and discoveries in and around Africa. The Jews of Saffee and Arzilla also distinguished themselves by their bravery (Kayserling, "Theilnahme der Juden an den Portugiesischen Entdeckungen" in "Jahrb. für die Gesch. der Juden," iii.; also Kayserling, "Geschichte der Juden in Portugal," x. 157–166).

The Modern Period.

The number of Jews in Egypt greatly decreased in modern times, but recent events have again attracted them to the land which first saw them emerge as a nation. The census of 1897 enumerated 25,200, of whom fully one half were foreigners; the Fayum only contained nine. There have been indeed remarkable fluctuations in the Jewish population of Egypt. Meshullam Volterra, about 1490, found in Alexandria only sixty Jewish families (Luncz, "Jerusalem Jahrbuch," 1881, i. 176), yet the Jews there remembered the time when 4,000 families had dwelt within the city. Meshullam found neither Samaritans nor Karaites there. Jacob Safir ("Eben Sappir," Lyck, 1866) found no Jews in Upper Egypt or the Fayum, but 30,000 were reported to be in Syene (Assouan). South of Egypt, in Abyssinia, live the Falashas with a population variously estimated between 80,000 and 200,000 souls. The Jewish population of Morocco is estimated at about 100,000, according to Nossig ("Materialien zur Statistik des Jüdischen Stammes," p. 105, Vienna, 1887), who bases his figures upon the statistical reports of the Alliance Israélite Universelle in Paris and the data of Gerhard Rohlfs. Benjamin Gordon, however, gives their number as 200,000. The Jewish tax furnishes a profitable source of revenue for the government. Here the Jews are subject to the most degrading laws, to oppression and insult by both government and people, and they have even been murdered with impunity. The Alliance in Paris and the Anglo-Jewish Association in London do their utmost to protect them, but, unfortunately, with little success. These institutions also maintain excellent schools in all north Africa, as well as throughout the Orient. The Jews of Morocco and Algeria are of the true Oriental-Jewish type. Fair hair and blue eyes are never found among them. In Algeria, which has been under French rule since 1830, there were, in 1891, about 50,000 Jews. Both in Algeria and Morocco the Jews affect a peculiar pronunciation of the Hebrew (J. J. L. Bargès, "Tlemçen," Paris, 1859). All travelers, both of earlier and later time, remark upon their peculiar ritual (see Zunz, "Ritus"). Tunis, which is a French protectorate, contains about 45,000 Jews. Here the Italian and Spanish Jews, though much fewer than the natives, possess great influence, even greater than those in Egypt or Morocco. In the vicinity of Zaghwan, in Testur and Beni Zit, the Jews live in the mountains as nomads. In Tripoli (including Fezzan and Barka), which is under Turkish rule, they number about 6,000, of whom 3,000 live in Tripoli proper. In the Sahara there are about 8,000 Jews, whose settlements reach as far as Timbuctoo. Mordecai Abu Sereur, who traveled through Morocco, mentions a warlike tribe in the Sahara, the Daggatouns, who claim to be of Jewish origin (see his book, "Les Daggatouns, Tribu d'Origine Juive Demeurant dans le Désert de Sahara," translated from Hebrew into French by I. Loeb, Paris, 1881. English translation by Henry S. Morais, Philadelphia, 1881). According to the "Yuḥasin," 215*a*, the Jews of Ouargla were Karaites. Jews live also among the Kabyles (Benjamin Gordon, *l.c.*, pp. 117, 119, 120). In South Africa Jews live in Cape Colony, Natal, and in the former Boer republics. They enjoy great prosperity, and have formed congregations after the English model. Their number is probably about 20,000. In 1879 a report was circulated that French explorers had discovered Satikinga, an island near the coast of Africa, exclusively populated by Jews. S. K.

Loeb, in the article "Juifs" in "Dictionnaire Universel de Géographie" of Vivien Saint-Martin, p. 28 of the reprint, Paris, 1884, gives the following numbers for Jews in Africa: Egypt, 8,000; Abyssinia (Falashas), 200,000; Tripoli, 60,000; Tunis, 55,000; Algeria and Sahara, 43,500; Morocco, 100,000; Cape Colony, 1,500; total, 468,000. Of these, the estimate for the Falashas is probably double the reality, while the numbers at the Cape have been largely increased —probably to 25,000. J.

AFRICANUS, SEXTUS JULIUS. See Julius, Sextus, Africanus.

AGA, BENJAMIN: Leader of the Karaites of the Crimea, who died in 1824. He was the royal treasurer of Selim Ghyrey Khan, the last Tatar ruler of the Crimea, and therefore is called in Karaite literature Ha-Neeman ("the Trusted")—an appellation bestowed also upon his father Samuel, who died in 1770, and who probably held the same office under former khans. When Ghyrey Khan fled for his life from his rebellious subjects, and sought succor from his protectress Catherine II. in St. Petersburg, Aga followed him, hoping to collect the large sums of money that he had advanced to the fugitive. In 1795, after the Crimea had been under Russian rule for over a decade, Benjamin Aga, Solomon ben Nahamu Bobowitz, and the astronomer Isaac of Kalea, the son-in-law of Jacob Aga, who was the elder brother of Benjamin Aga, went to St. Petersburg as a delegation from the Crimean Karaites, to petition the empress to release their sect from the double rate of taxation which all the Jews then had to pay. Through the intervention of the notorious Count Zoubov (who was one of the assassins of Emperor Paul in 1801), the delegation obtained from the empress the exemption from the obnoxious "Jewish" taxes, some land grants, and other privileges which had not been asked for. This established an important precedent for exempting the Karaites from subsequent antijewish legislation. The extraordinary success of the mission served to arouse great enthusiasm among the Karaites, and Aga and his fellow delegates were received with great honor on their return. A large monolith, fashioned out of marble, with fitting inscription, was erected in the court of the synagogue at Guzlowo (Eupatoria or Koslov), to commemorate an event so important in the history of the Karaites of Russia.

P. W.

AGABUS: A Jew of Jerusalem; one of the prophets who, after the dispersion of the early followers of Jesus, came to the city of Antioch (Acts, xi. 19–28, xxi. 10). He represents some of the spiritual forces that helped to shape the new faith. "By the power of the Spirit he predicted the great famine which afterward visited Judea under Claudius" between the years 44 and 48. This was the famine in which Queen Helena of Adiabene proved a great benefactress of the Jews (see Josephus, "Ant." xx. 2, § 5), and in which Barnabas and Paul were sent from Antioch with contributions for the relief of the Christians in Jerusalem. On another occasion Agabus had come from Judea to Cæsarea into the house of Philip, the preacher of the new tidings, whose four virgin daughters were prophetesses. There he took the girdle of Paul, and, having bound his own hands and feet therewith, said: "Thus saith the Holy Ghost, So shall the Jews at Jerusalem bind the man that owneth this girdle, and shall deliver him into the hands of the Gentiles" (Acts, xxi. 8–11). Paul insisted upon going, in spite of all entreaties, and met with the fate predicted. Prophesying—which by Pharisaic Judaism had been regarded as suspended (see I Macc. iv. 46, xiv. 41; Ezra, ii. 63; Neh. vii. 65; Ps. lxxiv. 9)—was a conspicuous phenomenon among the early Christians (see Matt. xxi. 26; I Cor. xii. 10, 28; "Didache," x. xi. etc.), but was not unknown to those circles of the Jewish people who believed in the working of the Holy Spirit (see Book of Wisdom, vii. 27, and Josephus, "Ant." xiii. 12, § 1; xiv. 16, § 2; xvii. 13, § 3, 4; "B. J." i. 3, § 5).

K.

AGAG.—Biblical Data: King of the Amalekites, taken by King Saul after a successful expedition against him (I Sam. xv.). His life was spared by Saul; but the prophet Samuel, who regarded this clemency as a defiance of the will of YHWH, put him to death at Gilgal as a sacrifice similar to that sometimes performed by the early Arabs after a successful combat (W. Robertson Smith, "Religion of the Semites," 2d ed., p. 491). In Num. xxiv. 7 Balaam refers to Agag in a way that gives probability to the conjecture that the name was a standing title of the kings of Amalek.

J. F. McC.

——**In Rabbinical Literature:** The rabbis taught that the Jews took vengeance on Agag for the cruelties they had undergone at the hands of the Amalekites, who, to mock at the Jews, their God, and the rite of circumcision, mutilated every Jew that fell into their power (see AMALEK); Samuel, they say, treated Agag in the same way. According to some authorities, the death of Agag, described in the Bible by the unusual word *wa-yeshassef* ("hewed in pieces," I Sam. xv. 33), was brought about in a much more cruel way than the word denotes. Others think that the only unusual thing in the execution of Agag consisted in the fact that it was not carried out strictly in accordance with the provisions of the Jewish law, requiring witnesses to prove the crime; nor had he been specifically "warned" as the law required. But, Agag being a heathen, Samuel convicted him according to the heathen law, which demanded only evidence of the crime for condemnation (Pesiḳ. iii. 25*b*, Pesiḳ. R. xii. xiii. and the parallel passages quoted by Buber in Pesiḳ.). The execution of Agag, however, occurred in one respect too late, for had he been killed one day sooner—that is, immediately upon his capture by Saul—the great peril which the Jews had to undergo at the hands of Haman would have been averted, for Agag thereby became a progenitor of Haman (Meg. 13*a*, Targ. Sheni to Esth. iv. 13).

L. G.

AGAI, ADOLF: Physician and journalist; born March 31, 1836, at Jankovacz, Hungary. His father, Joseph Rosenzweig, at the age of thirteen, emigrated from Galicia to Hungary, where he studied medicine, became a physician, and wrote a book on asphyxia, which was ultimately published with the financial aid of the Hungarian secretary of state, Gábor Klauzal. He translated Hungarian classics into Hebrew. His son Adolf, who later adopted a Hungarian name and called himself Agai (Ag= German *Zweig*) was educated at Budapest and Vienna, and afterward traveled extensively in Europe, Asia, and Africa. His first literary production—a novel entitled "Antoinette"—was published in the columns of the "Hölgyfutár" in 1854. For this journal and for the "Vasárnapi Újság" he wrote letters from Vienna (1854–81), and occasionally contributed to the "Wanderer," "Gartenlaube," and "Fliegende Blätter." In 1865, under the pseudonym "Porzó," he wrote a series of spirited feuilletons, remarkable for their pathos and humor. From 1870 to 1879 he edited the "Nagyvilág," and in 1871 founded a comic weekly, "Borsszem Jankó," of which he was editor in 1900. The humorous characters he created are well known in Hungary, especially "Seifensteiner Salamon," a type of witty Jew. In 1871 Agai undertook the editorship of the "Kis Lap," which he had founded for the youth of his country. In that journal he writes under the pseudonym "Forgó Bácsi." His annual calendars, published under the names of the various humorous characters in his "Borsszem Jankó," are widely read. Agai is a successful lecturer, and has translated German and French books into Hungarian. He is a member of the Kisfaludy Society and also of the Hungarian-Jewish Literary Society.

AGAPE (plural **AGAPÆ**—"Love-feasts"): The name given to the communion meals of the early Christians, at which the rich and the poor, the master and the slave, sat together at one table, merging all distinctions of rank in fraternal union and fellowship. A good description of the Agape is given in Tertullian, "Apologeticus," xxxix. It began and closed with thanksgiving and song (see Grace at Meals), but had no specific religious character, nor any reference to the Last Supper of Jesus; at least not during the first century, as is seen from the "Didache," ix. x. (see "Didache," and compare I Cor. xi. 20; Jude, 12, where the term ἀγάπαι, "love-feasts," first appears). The poor and the widows and orphans were the chief partakers of the Agape (Apost. Const. ii. 28). All these worthy recipients from the common dish (called *tamḥuy* in the Mishnah Peah, viii. 7) were regarded as "an altar to God" (Apost. Const. ii. 26, iv. 3). In rabbinical literature reference is made to a similar feast, where "the table spread by the rich in front of their doors for the support of the poor is likened to an altar which atones for the sins of the rich" (Targ. Yer. Ex. xl. 6). Every table at which portions were reserved for the poor is called "the table that is before the Lord" (Ezek. xli. 22; Ber. 55*a*; compare Ab. iii. 6): hence the term, "the Lord's supper" (I Cor. xi. 20), which originally did not refer to Jesus. Some of the saints in Babylon kept up the ancient custom of opening the door before breaking bread and crying forth: "Let all who are hungry come and partake of my meal" (R. Huna in Ta'anit, 20*b*). The provision made by the charity treasury for the needy was called Ḳorban (Midr. Zuṭṭa; see Midr. Shir ha-Shirim, ed. Buber, 23). By referring to this "atoning altar of charity" Johanan b. Zakkai consoled his pupil Joshua b. Hananiah, who mourned over the destruction of the Temple, citing Hosea, vi. 6, "For I desired mercy, and not sacrifice," and pointed to the example of Daniel, who "worshiped the Lord" in exile, no longer by sacrifices of blood, but by providing for the poor (Ab. R. N. iv. 4).

AGATE.—Biblical Data: A precious stone, mentioned four times in the Authorized Version of the Bible—twice as the translation of *kadkod* (Isa. liv. 12, Ezek. xxvii. 16), and twice of *shebo* (Ex. xxviii. 19, xxxix. 12). The Agate derives its name from the place where it was first found—the banks of the river Achates in Sicily; but it is not confined to that locality, being met with in many parts of the world. It occurs near the ancient Chalcedon, in Asia Minor (whence the name "chalcedony"), as the white Agate. The sard (brown), carnelian (red), onyx (white and black), and sardonyx (white and red) are other varieties of the same mineral. Delitzsch, "Hebrew Language," 36, connects shebo with the Assyrian *shubu* ("the shining"). G. B. L.

——**In Rabbinical Literature:** According to Samuel bar Naḥmani (B. B. 75*a*), two angels, Gabriel and Michael, discussed in heaven the meaning of kadkod (Agate), occurring in Isa. liv. 12: "And I will make thy windows of agates [כדכד]." One maintained that this precious stone is identical with beryl, while the other thought it to be a jasper. Whereupon God intervened with a paronomasia, saying: "Kadkod will contain both [ליהוי כדין וכדין]." According to others, the discussion took place between the Palestinian amoraim Judah and Ezekiel, sons of R. Ḥiyya; see also Pesik. R. xxiii., and Midr. Teh. lxxxvii. M. B.

AGDE: A town in the department of Hérault, France, two miles from the Mediterranean Sea and thirty miles from Montpellier. Probably there was a Jewish community here some time before the sixth century; for the Council of Agde, which assembled in the city in 506, prohibited both Christian ecclesiastics and laymen from eating with the Jews or inviting them to their houses. This prohibition, which was only a repetition of that promulgated by the Council of Vannes in 465, proves that the Jews had been on good terms with their Christian neighbors. Agde was the center of great maritime commerce, and the Jews took an important part in the commercial activity of southern France. When William III., seigneur of Montpellier, concluded a treaty of commerce with the bishop and the viscount of Agde in 1195, he stipulated that all merchants of the city, whether Christians, Saracens, or Jews, should be upon a footing of equality. Except those who had been under the protection of the bishop for some time, the Jews of Agde, in the year 1278, were compelled to pay their taxes directly to the royal treasury. Those under the bishop's care continued to pay their taxes to the Church. The number of Jews in Agde can not have been large, as they possessed no cemetery there and had to bury their dead in Béziers, three miles away.

AGE, OLD: Various terms are used in the Bible to designate the declining years of life. The most frequent is *zaḳen* (old, and old man). This term is applied first to Abraham and thereafter to other Biblical worthies, as Isaac, Jacob, Joshua, Eli, Samuel, and David. In a number of instances the term is defined by the additional expression "advanced in years." This term zaḳen is connected with the word *zaḳan* (beard), the gray beard being the most striking sign of age. From zaḳen are obtained the derivatives *ziḳnah* and *ziḳunim*, meaning "old age." We find also the following expressions: *sebah* (old age), *yashish* (an old man), *seba' yamim* (satiated with years), *melo yamim* (full of years), *kabbir yamim* (rich in years). Of the two terms most commonly used for Old Age, sebah designated a greater age than ziḳnah. In the Mishnah Ab. v. 21, where the ages of man are enumerated, the age of sixty is called ziḳnah, while that of seventy is called sebah. In the Bible itself (Ps. xc.) we find but one definite statement of the limit of life: "The days of our years are threescore years and ten; and if by reason of strength they be fourscore years, yet is their strength labor and sorrow" (Ps. xc. 10). In the Talmud we find a similar statement: "If one dies at eighty, he has reached old age" (M. Ḳ. 28*a*, B. B. 75*a*).

The physical ills attendant upon Old Age were fully appreciated by the Biblical and Talmudical sages. The author of Ecclesiastes in his celebrated dirge indicates the failing powers of age (Eccl. xii. 1–7); and the Psalmist makes pathetic reference to the infirmity of his declining years (Ps. lxxi. 9–18). In the Mishnah the greater inability of the aged to acquire learning is set forth by the following simile: "When the old receive instruction it is like writing a palimpsest" (Ab. iv. 20); and in a passage of the

Talmud, in which youth is compared with Old Age, there is the somewhat enigmatic statement, "Two are better than three" (Shab. 152*a*)—an expression strangely similar to the so-called "riddle of the Sphinx."

The fact that Abraham is the first person mentioned in the Bible as aged gave rise to the following Haggadah: "Until Abraham's time the young and the old were not distinguishable from each other; consequently, young people would jest with Abraham, taking him for their companion, whereas the old addressed Isaac in a manner becoming a man of years. This induced Abraham to pray to God for an outward token of dignity and honor for those advanced in years; and the Lord, granting his wish, said, 'Thou shalt be the first upon whose head the silver crown of old age shall rest'" (Tan., Ḥayye Sarah, ed. Buber, 4–5; Gen. R. lxv.; B. M. 87*a*; Sanh. 107*b*).

Old Age implies a state of inactivity; hence its helplessness entailed upon the young the duty of providing for the support and comfort of the old (Ruth, iv. 15). The Essene brotherhoods, especially, made it their object "to honor the old and provide for them; just as lawful children honored and provided for their parents, so they offered the aged all possible comfort by personal care and wise forethought" (Philo, ed. Mangey, ii. 459). During the Middle Ages the aged who lacked support found shelter in houses established by the Jewish community, called *heḳdesh* (see Heḳdesh and Benevolent Institutions).

Respect for Old Age.

Most marked are the teachings of Biblical and Talmudical ethics in regard to the respect due to Old Age. Age as such is regarded as venerable and deserving of consideration from the young. In Lev. xix. 32 the attitude of the young toward the old is expressed in no uncertain tone: "Thou shalt rise up before the hoary head, and honor the face of the old man." The respect entertained for Old Age is indicated in a number of expressions in Biblical and rabbinical literature, such as the following: "The hoary head is a crown of glory, if it shall be found in the way of righteousness" (Prov. xvi. 31); "Despise not thy mother when she is old" (Prov. xxiii. 22); "The beauty of old men is the gray head" (Prov. xx. 29). When Elihu is introduced as one of the speakers in the Book of Job, we read that "Elihu had waited till Job had spoken because they were elder than he" (Job, xxxii. 4). The Talmud also has numerous expressions of a similar tenor. Of Rabbi Meir it is told that he arose whenever he saw even an ignorant old man; for, said he, "the very fact that he has grown old must be due to some merit" (Yer. Bik. iii. 65*c*). Rabbi Johanan always arose before an aged heathen, because, as he said, of the sufferings the heathen must have endured in the course of a long life (Ḳid. 33*a*). "Respect even the old man who has lost his learning" is found in the Talmud; "for there were placed in the ark of the covenant not only the two perfect tablets of the Law, but also the fragments of the tablets that Moses shattered when he saw the people dancing before the golden calf" (Ber. 8*b*).

Age Synonymous with Wisdom.

In several passages of the Bible (Deut. xxviii. 50; Isa. iii. 5, xlvii. 6; Lam. v. 12) disrespect for the aged is considered as one of the marks of evil times; and in the Talmud it is stated that a sign of the troubled days preceding the coming of the Messiah will be the lack of respect and courtesy shown by the young toward their elders (Soṭah, 49*b*). The reason for the respect shown to Old Age lay chiefly in the circumstance that advanced years were supposed to bring experience and wisdom. The old man, having passed through the trials of life, was looked upon as a source of counsel, and as being filled with the spirit of discretion and knowledge (Job, xii. 12; xv. 10). Hence, the term zaḳen came to be used for wise man (counselor), and also for elder in the sense of ruler. Expressive of this is the definition of zaḳen which we find in the Talmud, "The zaḳen is he who has acquired wisdom" (Ḳid. 32*b*). Compare the pun in Sifra, Ḳedoshim, vii. 12 אין זקן אלא זה שקנה חכמה—which is obviously the older form. Another indication of it is the story told by Eleazar ben Azariah, who, having been elected president of the Sanhedrin at the age of eighteen, was considered too young. But a wondrous thing happened: his beard turned white, so that he had the appearance of an old man ("Lo! I am like a man of seventy"—Ber. 28*a*). In accordance with this thought, there is a strain running throughout the literature of the Jews, indicating that the experience of years is the best guide for deciding vexed questions. After the death of Solomon, his son Rehoboam, by disregarding the advice of the elders and following the counsel of young men, brought about the division of the kingdom (I Kings, xii. 13, 14). A similar incident is recorded in the Talmud. In the days of Hadrian, when the enthusiastic young men advised the rebuilding of the Temple of Jerusalem, some wise men reminded the people of the event that occurred in Rehoboam's time, and said, "If young people advise you to build the Temple, and old men say destroy it, give ear to the latter: for the building of the young is destruction; and the tearing down of the old is construction" (Tosef., 'Ab. Zarah i. 19). The classic passage on Old Age in the Book of Ecclesiasticus (Sirach, xxv. 4–6) lays stress upon the insight that comes with years: "How beautiful a thing is judgment for gray hairs, and for elders to know counsel! How beautiful is the wisdom of old men, and thought and counsel to men that are in honor. Much experience is the crown of old men; and their glorying is the fear of the Lord." Hence, "He who learns from the old is like one who eats ripe grapes and drinks old wine" (Ab. iv. 20).

Of the wise who have begun to acquire learning in early youth and continued to devote themselves to study after they have grown old, it is said, "The older scholars grow, the greater their wisdom becomes" (Shab. 152*a*). But there are statements in the Bible and the Talmud to the effect that mere length of years offers no claim to reverence (Job, xxxii. 6–9). The Psalmist exclaims, "I understand more than the aged, because I have kept thy precepts" (Ps. cxix. 100); and the Preacher declares, "Better is a poor and wise child than an old and foolish king" (Eccl. iv. 13). More emphatic is the author of the Book of Wisdom when he says: "Honorable old age is not that which standeth in length of time, nor is its measure given by number of years: but understanding is gray hairs unto men, and an unspotted life is ripe old age" (iv. 8, 9). Similarly, Rabbi Judah ha-Nasi advised, "Look not upon the vessel, but at what is in it, for there are new vessels full of old wine, and there are old vessels which do not contain even new wine" (Ab. iv. 207). In the Midrash, too, it is well said, "There is an old age without the glory of long life; and there is long life without the ornament of age: perfect is that old age which hath both" (Gen. R. lxix.). D. P.

AGEDA, ALLEGED CONFERENCE OF: In an English pamphlet, entitled "A Narrative of the Proceedings of a Great Council of Jews Assembled on the Plain of Ageda in Hungary, about Thirty

Leagues from Buda, to Examine the Scriptures Concerning Christ, on the Twelfth of October, 1650," London, 1655, a certain Samuel Brett gives a full report of a fictitious Jewish conference, said to have been held at Ageda, Hungary, in October, 1650. It was attended by three hundred rabbis and three thousand persons, who had come together from all parts of the world to consider their attitude toward Christianity. Only those Jews were admitted, he states, who understood Hebrew and were able to trace their pedigree to the Twelve Tribes. Six Catholic friars, specially delegated by the pope, were also present. The discussion, carried on in pure Hebrew, lasted for eight days. The doctrines of the Church, as expounded by the Roman friars, were rejected as idolatrous; and the Jews fell back to their former position. Some of them, however, expressed a favorable opinion of Protestantism, and especially of the London clergy.

This report found its way to Germany and Hungary, where it was variously reproduced ("Sulamith," II. i. 233–243; "Allg. Zeit. d. Jud." 1838; Fényes, "Magyaroszágnak Sat. Mostani Állapotja," iii. 27, and in many geographical and historical works; compare Leopold Löw, "Gesammelte Schriften," iv. 419). It is still found here and there in pamphlets of the Jewish missions in England, Germany, and Austria.

However, on critical examination, the story shows all the marks of a fictitious creation. There is no place in all Hungary known as Ageda; the requirement of a pedigree was foreign to Jews of that period; and the statement that the discussions were carried on in Hebrew is also very suspicious. Furthermore, an event of such magnitude would have created the deepest commotion in Israel, and would have given rise to heated polemics and much writing of responsa; whereas there is not the slightest evidence in Jewish literature to corroborate Brett's account. Manasseh ben Israel in his "Vindiciæ Judæorum" speaks of "the fabulous narrative" of the proceedings of this council.

It is probable that Brett wrote his apocryphal account with a twofold purpose: (1) to demonstrate the incapacity of Catholicism to fulfil its mission; and (2) to spur English Christendom to financial contributions for the Jewish missions.

M. B.

AGEN: A town in the department of Lot-et-Garonne, France, on the banks of the Garonne, southeast of Bordeaux. Some Jews settled here in the beginning of the twelfth century. The records show that the Jews of Agen were the first victims of the persecutions by the fanatical "Shepherds" (Pastoureaux), a body of wandering friars, who, headed by a Hungarian monk, under the pretense of delivering Saint Louis, the king of France, then a prisoner in the hands of Saracens, committed barbarous ravages before they could be suppressed. From Agen, the bloody persecutions spread through more than 120 communities in Guienne and Gascony. The unfortunate Jews sent delegates to the king of France imploring his protection. That Jews were still in Agen and its environs in 1250 is proved by the fact that the seneschal there was ordered to find all prohibited Hebrew books, and that the Dominicans, who aided the authorities, threatened with excommunication all Christians who hid these books, or sympathized with the Jews.

There was a hamlet, also inhabited by Jews, called Agenais, near Agen.

M. S.

AGENCY, LAW OF: The Law of Agency deals with the status of a person (known as the agent) acting by direction of another (the principal), and thereby legally binding the principal in his connection with a third person. The person who binds a principal in this manner is his agent, known in Jewish law as *sheluaḥ* or *sheliaḥ* (one that is sent): the relation of the former to the latter is known as agency (*sheliḥut*). The general principle is enunciated thus: A man's agent is like himself (Ḳid. 41*b*).

Appointment.

1. Under the Jewish law an agent may be appointed without the formality of writing, that is, by spoken words; and witnesses are not needed to give effect to these words, except to prove, in case of dispute, that authority had been given, and the extent of such authority. The standard authorities draw this conclusion from the remark in Ḳiddushin, 65*b*, that witnesses are needed only to meet denials.

A woman as well as a man, and even a married woman, or the "Canaanite bondman" or bondwoman of an Israelite, may be an agent and bind the principal, *sholeaḥ* (sender), or *bayal ha-bayit* (master of the house). A deaf-mute, a person of unsound mind, or an infant (a boy under thirteen or a girl under twelve years of age) can not be an agent, being deemed deficient in reason (based on Mishnah B. Ḳ. vi. 4); but such a one may act as messenger to carry money or goods to the party in interest by his express consent. In no case is a Gentile recognized as the agent of an Israelite, either to bind him or to acquire anything for his benefit; and a bondman, not subject to the marriage laws, cannot qualify as the agent of a married woman to accept a bill of divorce for her (Ḳid. 41*b*, Giṭ. 23*b*).

An infant in the legal sense can not appoint an agent, even for acts for which he would be competent in person: thus, an infant wife can not depute one to receive her bill of divorce (Giṭ. vi. 3).

A paid agent—that is, a factor or broker (*sirsur*)—does not differ from the unpaid agent in the relations which he can establish between his principal and a third person.

One who wishes to authorize another to bring an action for him to recover money, land, or goods must make out a writing known as הרשאה (letter of attorney), which in form is a transfer of the claim or of the thing to be sued for. It must contain such words as: "Go to law, win, and get for thyself" (B. Ḳ. 70*a*); otherwise the defendant need not recognize the attorney as a proper party to the litigation. The Talmud refers to these letters of attorney only in cases where the return of a deposit is to be demanded.

Maimonides ("Hilkot Sheluḥin," iii. 2, based on B. Ḳ. 70*a*) holds that the transfer of an aliquot part of the claim is enough to give to the attorney a standing in court; for a part owner may sue on behalf of himself and companions. This view is accepted by later casuists.

An agent may appoint a subagent (Ḳid. 41*a*); but under the Roman, as well as under the English-American law, he can do so only by special authorization. Probably this would also have been the ruling under the rabbinic law; but both the Talmud and the standard authorities are silent as to the conditions allowing the appointment of a subagent.

For the conditions under which substitutes are allowed for delivery of bills of divorce, see Divorce.

Revocation.

2. The powers of an agent may be revoked at any time, and whatever he does after revocation is not binding upon the principal. However, the revocation takes effect only from the time that it is brought home either to the agent or to the person with whom he deals (compare rules in Mishnah Giṭ. iv. 1, with reference to the recalling of a bill of divorce from the hands of the messenger sent to deliver it). But when a deed of manumission is handed to an agent for delivery to the bondman, it can not be recalled; for a person may be benefited in his absence: hence, the mere delivery to the agent gives the bondman his freedom (*ib.* i. 6). As in the Roman and in the English-American law, the death of the principal ends at once all the powers of the agent, and the heirs are in no wise bound by what he does thereafter, nor can they benefit by his acts—such as taking possession of land or chattels—unless they adopt him as their agent (*ib.*; and see Giṭ. 13*a et seq.*). But a request to an agent to make a gift of money to a person named is not revoked by death, it being carried out as the wish of a dying man; while a manumission under like circumstances could only take effect by delivery of the deed. The authority of a subagent is not terminated by the death of the intermediate, but only by the decease of the principal. The power of an attorney holding a *harshaah* to carry on an action does not lapse by the death of the principal; as he is, in form at least, an assignee and acts in his own right.

3. It is a general principle that the agent who acts outside or beyond the power given to him "does not effect anything"; in other words, his acts are void, and neither bind nor benefit his principal.

Extent of Powers.

In construing the powers of an agent—especially those of one who is employed to buy or sell for his principal—the first rule is that the principal is supposed to have his own profit in view when he appoints an agent, and that he says to him in effect, "I sent thee out to gain, not to lose" (Ket. 99*b et passim*). When the agent exceeds his authority, his act is void; but this occurs only when he discloses the agency. As it is presumed that the agent is not to act so as to cause a loss to his principal, a transaction negotiated by an agent may be set aside if the other party to it be guilty of "overreaching," even though to an amount less than one-sixth of the value, which is the limit allowed between parties dealing with each other in person, and though the purchase or sale be of land or of a bond, to which the law on overreaching does not apply. But the principal is protected in this way only when those dealing with the agent are apprised of his character. When one is entrusted with his principal's money or goods, and deals with them as with his own without disclosing his principal, the person dealing with him has the same rights as if he dealt with the principal; and if the agent exceeds his authority, or disregards the implied limitation not to involve his principal in losses, the latter must look to the agent alone for redress (Maimonides, "Yad ha-Ḥazaḳah, Hilkot Sheluḥin," ii. 4).

Any one appointing an agent may confer upon him wider powers, agreeing beforehand to any transactions into which he may enter; in this case the principal is bound by all the bargains which the agent may make, whether good or bad (*ib.* i. 3).

Among later casuists the opinion gained ground that one who has dealt with an agent may, in a dispute with the principal, claim that he has given to the agent this wider authority; and the principal will have to bring witnesses to the contrary, if he wishes to be relieved of the agent's bad bargain ("Ḥoshen Mishpaṭ," §§ 182–184).

Duty of Agent to Principal.

4. No distinction seems to be made between paid and unpaid agents in their duty of protecting faithfully the interests of the principal. Thus, when an agent is entrusted with money to purchase land, it is understood that such a purchase must be accompanied by the usual warranty of title (*aḥarayut*); if he buys without a warranty deed, his principal, if he desires to keep the land, may insist on the agent's first taking it in his own name and then conveying it with his own warranty (Maimonides, *l.c.* i. 3, derived from B. B. 169*b*).

In cases where an agent is sent out to buy an article of known fixed price, and the seller supplies him with a greater quantity, the excess is divided between principal and agent; where the price is not fixed, the whole excess goes to the principal. If an agent is entrusted with money to buy certain goods and he buys them for himself, he must surrender them; but when ordered to buy land and goods, if he puts his principal's money aside, and buys with his own money, he is considered a swindler, but no redress can be obtained. Such an act may even be blameless if the seller happens to dislike the principal, and is unwilling to sell to him, but is willing to deal with the agent. If an agent sent out to buy wheat buys barley, or vice versa, the principal may claim the profit if there be any, but he is permitted to throw the loss on the agent. A factor who has bought goods for his principal and stores them carelessly, so that they are injured by dampness, etc., is liable for the resultant loss ("Ḥoshen Mishpaṭ," *l.c.*).

Non-Commercial Agencies.

5. A man may betroth a woman to himself in person or by proxy through an agent; a woman may be betrothed in person or through her agent (who accepts the coin or ring or anything of value under authority from her); a father can betroth his daughter while she is a girl (between twelve and twelve and a half), either himself or through his agent (Mishnah Ḳid. ii. 1).

The messenger through whom a bill of divorce is sent by the husband for delivery to the wife, or who is sent by the wife to bring or to accept it, can not properly be called an agent; but agency enters into the law of divorce very broadly in the chapters of the Talmud in Giṭṭin. For agency in divorce, see Divorce. Betrothals of either party through an agent ceased long ago among Jews.

For the relation of an agent toward his principal in cases of taking possession, see Alienation.

AGES OF MAN IN JEWISH LITERATURE, THE SEVEN:

The Biblical allusions to the various stages of human life (Jer. vi. 11, li. 22; Ps. cxlviii. 12) and the metaphors in Holy Writ concerning man in all his phases are brought together in Löw's "Die Lebensalter," pp. 12–20 (see Age, Youth). In the Talmud, the idea of "ages of men" is expressed by the word פרק (literally "to break"; compare especially Obad., 14). To the rabbis, a threefold division of human life, viz., boyhood, youth, and old age, seemed more acceptable than any other. In the earlier Midrashim five periods are mentioned: יונקים, בחורים, קטנים, נערים, זקנים (Tan. to Ex., ed. Stettin, p. 180). In the same work (introduction to Haazinu; Pesiḳ. R. xx.; Löw, "Lebensalter,"

p. 24) human life is symbolically compared to the twelve signs of the zodiac (English translation in "Jewish Chronicle," Nov. 23, 1894, p. 11). The computation of fifteen years for each age, to be found in the addition to Abot, v. 21 (Taylor, "Sayings of the Fathers," Eng. ed., pp. 97, 98, Cambridge, 1897), and attributed to Ben Bag Bag, or Samuel ha-Ḳatan (*ibid.* p. 22), became very popular among Jews because of the educational hints thrown out in the saying, which was paraphrased in verse by Solomon ben Isaac Levi, in his commentary called "Leb Abot" (The Heart of the Fathers), published in Salonica, 1565. Abraham ibn Ezra's poem, entitled בן אדמה יזכור במולדתו וכו' ("Mortal Man Should e'er be Mindful of his Origin," etc.), has often been published (see, for instance, Abravanel, "Naḥlat Abot," p. 189*b*, Venice, 1567; "Midrash Shemuel" of Samuel Ucedo, Frankfort-on-the-Main ed., p. 56*a*; the poems of Ibn Ezra, ed. Aḥiasaf, Warsaw, 1893; Taylor, "Sayings of the Fathers," p. 22; compare Steinschneider in "Z. D. M. G.," 1850, iv. 164, n. 77). A German version of the poem which is incorporated in the Sephardic liturgy is given in Löw's book, pp. 38, 39; and another in Letteris, "Andachtsbuch," etc., pp. 149, 150, Prague, 1869. Other poetic selections by Spanish Jewish poets, ancient and modern, on the various stages of human life, are reproduced in Löw, *l.c.*, pp. 37–41.

The division into seven ages appears to have been originally Greek, and is attributed to Solon (flourished about 638–558 B.C.), who, according to Philo ("De Mundi Opificio," ed. Mangey, i. 25, 26), speaks of ten ages of seven years each. The seven ages are first met with in Hippocrates (died about 357 B.C.), and are also given by Philo, whose divisions are infancy, childhood, boyhood, youth, manhood, middle age, and old age.

Reference to the seven periods are quite frequent in the Midrash. There are some data which Löw has omitted to mention. The Midrash Tadsheh enumerates a number of things divisible into seven parts, such as festivals, stars, portions of the human anatomy, etc. Among others are the following: ז" קומות: ילד, נער, רובה, עלם, איש, שב, זקן, which are the equivalents of the designations in Hippocrates (see Jellinek, "B. H." iii. 168, Leipsic, 1855; Egers, in "Hebr. Bibl." xvi. 17). A satirical subdivision into heptads may be found in Eccl. R. to i. 2:

> "The Seven Vanities of which the Preacher speaks correspond to the seven eons of man. The child of a year is like a king, put in a coach and adored by all; at two or three he is like a swine dabbling in filth; at ten he bounds like a kid; at twenty he is like a horse neighing and spirited, and desires a wife; when he has married a wife, behold! he is like an ass; when children are born to him, he is shameless as a dog in procuring the means of sustenance; when he has grown old he is like an ape—that is, if he is an *am ha-arez* [ignoramus]—but a learned man like David is a king, though old (I. Kings, i. 1)."

The same tradition is quoted in the unpublished Midrash ha-Gadol to Gen. ii. 1 with some peculiar variations. Parallels from folk-lore, especially on the zoological metaphors, are given by Löw ("Lebensalter," pp. 23, 24, 371, notes 40, 41) and by Egers ("Hebr. Bibl." xvi. 17). Renderings of the above in German are to be found in Wünsche, "Der Midrash Kohelet," p. 3 (Leipsic, 1880). Löw (*l.c.*, pp. 22, 23) and J. Dessauer, "Spruchlexikon des Talmud und Midrasch," pp. 125, 126, No. 948 (Budapest, 1876), give paraphrases of the tradition in verse (for English translations, see Taylor, "Sayings of the Fathers," p. 111; Hyman Hurwitz, "Hebrew Tales," American ed., 1847, pp. 75, 76; W. A. Clouston, "Flowers from a Persian Garden," pp. 257–259 (London, 1890), with parallels; compare also Schechter, "Studies in Judaism," 1896, pp. 295, 299, 300). There is also an interesting elaboration of the legend of the Seven Ages of Man in an old Midrash on the "Formation of the Child" (Yeẓirat ha-Welad), published in Wagenseil's Latin edition of the treatise Soṭah, pp. 71–79 (Altdorf, 1674); in Makir's "Abḳat Rokel," pp. 23*a*, 24*b* (Amsterdam, ed. 1696), and in Jellinek's "B. H." i. 154, 155 (Leipsic, 1853), where Plato's doctrine of preexistence is indicated. This version of the story is given in Yalḳ. to Eccl. i. 2 (ed. Warsaw, 1877), p. 1080, § 966, from Midr. Zuṭṭa, ed. Buber, p. 84, where it is ascribed to Judah bar Simon, who, in turn, transmits it in the name of Joshua ben Levi.

The fullest and most striking parallel to Shakespeare's "Seven Ages" (on which a special monograph was written by Dr. John Evans, entitled "Shakespeare's Seven Ages of Man, or the Progress of Human Life," London, 1834) is to be found in the Midrash Tanḥuma. The following is a translation:

> "For now, seven worlds follow one another in rapid succession. In the first, the child may be compared to a king: all greet it and long to catch a glimpse of it; they embrace and kiss it, it being but one year old. In the second stage, when about two years old, it may be compared to the unclean animal which wallows in the mire. In the third period, it resembles a kid of the goats, which capers hither and thither in the presence of its mother—an object of delight and joy to its parents, making glad the hearts of all who look upon it. [This period would include the age at which it begins to walk alone along the public way, and extends to the years of maturity at the age of eighteen.] And now, in the fourth stage, he may be likened to a spirited steed, running in the race and confiding in the strength of youth. But there comes the fifth stage, in which he becomes as the saddled ass, when, at the age of forty, he is bowed down by the weight of wife and children, having to travel backward and forward in order to bring home sustenance for the members of his household. And how much keener this contest becomes in the sixth period of life, when, like a whining hound, the bread-winner of the family in shamelessness races and tears about, snatching from one in order to give to another. And, lastly, there arrives the seventh stage of man's existence, in which, ape-like, his countenance changes, and childlike, he asketh for everything, eating and drinking and playing as a child: and there he sits, even his children and his household mocking at him, disregarding him and loathing him; and when he utters a word, he hears such expressions as 'Let him alone, for he is old and childish.' This is the period in which his sleep is so light, that the flutter of a bird's wing would rouse him from his slumber; and this period extends to the time in which his hour of departure from this world is fixed, at which the selfsame angel comes to him and asks him, 'Dost thou recognize me?' to which he replies, 'Indeed, I do: but wherefore dost thou come to me just this day?' 'In order to take thee out of this world,' says the angel, 'for thy time has come to depart hence.' Immediately he commences to weep; and his cry pierces the world from one end to the other: addressing the angel, he exclaims, 'Hast thou not already caused me to quit two worlds, to enter this world?' to which the angel finally replies: 'And have I not already told thee, that against thy will thou art created—against thy will thou art born, against thy will thou livest, and against thy will thou must render account for thy actions before the Supreme King of Kings, blessed be He?'" (Ab. R. N. p. 22).

The first Jewish author who mentions the classification of Hippocrates is Solomon ha-Levi of Salonica, whose views may be found in a sermon delivered by him on the Feast of Tabernacles in 1574. He identifies the seven stages of Hippocrates with the seven names of the evil inclination ("Yeẓer ha-ra'") spoken of in the Talmud (see his "Dibre Shelomoh" (The Words of Solomon), pp. 161*c*, 297*d*; Löw, *l.c.*, pp. 31, 32, 36). The physician Tobias Cohen (1652–1729) was also familiar with the division into heptads. "The life of man," he says, "according to the opinion of the physicians, is divisible into seven chapters, as follows: infancy, childhood, puberty, youth, prime, old age, and very old age" (see Löw, *l.c.*, pp. 36, 372, notes 82, 83). His views differ from those of Philo. Löw, *l.c.*, gives a German translation of Cohen's own ideas on the subject; despite his learning and culture, he seemed to be influenced by the symbolism of numbers (see his "Ma'aseh Tobiah," p. 73*a*). About other divisions of human life by Jewish authors in the Middle Ages and in modern times see the résumé in Löw, *l.c.* pp. 26–41. Poetic contributions to this subject from the pen of Samuel ha-Nagid, Abraham ibn Ezra, and other poets of the Spanish school are especially interesting. See also Seven.

AGGADA, THE. See Haggadah, The.

AGGADISTS. See Haggadists.

AGGEI, THE PROUD KING: The original idea of the legend concerning the Proud King Aggei, which appears in various forms in folk-lore, is found also in the Talmud, the Midrashim, and the Targum. The Russian version, as rendered by Garshin, reads as follows:

> "The wealthy and mighty czar Aggei, ruler of a great country, grew proud and haughty. One day, hearing the priest read from the Holy Scriptures that the rich may become poor and the poor rich, he became angry. Was it possible that he, Aggei, could ever become poor, and some beggar become rich in his stead? He ordered the priest to be imprisoned and the leaves containing the words he had expounded to be torn from the book. God thereupon resolved to humiliate Aggei for his arrogance. On one occasion, when hunting with his servants, he started a beautiful deer, which he pursued into a lonely place, far away from his retainers. When the deer took to the river, Aggei swam after it and followed it into a forest. The creature was an angel that had taken the form of a deer. Later, by the Lord's command, it assumed the appearance of Aggei, joined the hunters, and rode home with them. No one suspected that he was not the real czar, though all were surprised at the change in his behavior; for he became serious and meted out justice on every hand.
>
> "The real Aggei, naked, hungry, and exhausted, met a shepherd, to whom he declared himself as the sovereign. The shepherd considered him an impostor and gave him a thrashing; but later, deciding that Aggei was insane, he threw a sheepskin about him to cover his nakedness. When Aggei returned to the city he went to the palace, but the guard drove him away. He then had to work as a common laborer. Convinced that a bold and impudent impostor had usurped his place, Aggei repaired to the church and, when the new ruler passed by, looked into his face and immediately recognized the angel of the Lord. Filled with horror and fear, he left the city, and soon became convinced that God had punished him for his haughtiness. In his humiliation he confessed his sins and prayed to God for mercy and strength. At the end of three years the new sovereign issued an order commanding all the beggars and the poor throughout the country to attend a grand reception and feast in his palace. Among them was a group of blind men, with Aggei as their leader. When the angel passed round, he asked Aggei: 'Are you also a beggar?' Aggei replied that he was but the servant of the beggars. The angel then told him that his punishment was at an end and that he might take the ruler's mantle, the sword, and the scepter again, and rule the people wisely and mildly. But Aggei did not wish to rule again; and he went away to lead the blind."

This legend is based upon the haggadic tales of Solomon (Sanh. 95*a*; Cant. R. to i. 10; Targ. Eccl. i. 12; Midr. Tan., Waera; Yer. Sanh. ii. 20; Giṭ. 68*b*; see especially the old Russian legend of the "Czar Solomon and Kitovras" (that is, Asmodeus), which is to be found in the collection of legends on Biblical topics under the title "Paleya" (1477 and 1494), which are almost exactly the same in contents as the Talmudic Haggadah of "King Solomon and Asmodeus"). S. Beilin is of opinion that the Russians received the Talmudic legend in a Russian rendering from South Russian Jews in very early times ("Skazanie o Gordom Aggeye" (Tale of the Proud Aggei) in "Voskhod," November, 1899). Israel Lévi in his article, "L'Orgueil de Salomon" ("Rev. Ét. Juives," xvii. 58 *et seq.*), also tries to prove that the legend is not of Indian, but of Jewish, origin; while M. Vesselovski, in "Neue Beiträge zur Geschichte der Salomonsage" ("Archiv für Slavische Philologie," 1882, pp. 393–411), is of the opinion that traces of the Indian legend (from the "Vikramacharitra") are to be found in the Talmudic tale of "Solomon and Asmodeus."

H. R.

AGLA: A cabalistic sign used as a talisman. It is a combination of the initial letters of "*Attah Gibbor Le'olam Adonai*," the first four words of the second benediction of Shemoneh 'Esreh (see Moses Botarel, commentary on "Sefer Yeẓirah," i. 2, and Ḥayyim Vital, "Peri 'Eẓ Ḥayyim, Sha'ar 'Amidah," 18, and Meir ibn Gabbai on "Shemoneh 'Esreh"). To the letters Jod, He, the numerical value of which equals fifteen, Isaac Luria added the numerical value of letters making twenty, which, when added to the fifteen, thus, 15 + 20 = 35, is equivalent to the sum total of the letters in Agla, that is, 1 + 3 + 30 + 1 = 35. Other cabalists identify the name with that of the thirty-five angelic princes of the Torah. Güdemann ("Gesch. der Erziehung der Juden in Italien," p. 336) calls attention to the singular fact that the four letters A G L A inscribed upon wooden dishes, together with Christian crosses, were used as a talisman against fire, the letters being said to signify: *Allmächtiger Gott, Lösche Aus* ("Almighty God, extinguish the flames").

J. L. S.—K.

AGNATES (Latin, *Agnati, Adgnati*): In Roman law, kindred on the paternal side only: the word is used in contradistinction to *cognati*, kindred on the mother's as well as on the father's side.

In Jewish law, the right of inheritance, based on the written law (Num. xxvii. 8–11), recognized among ascending and collateral kindred the Agnates only. The text reads:

> "If a man die, and have no son, then ye shall cause his inheritance to pass unto his daughter. And if he have no daughter, then ye shall give his inheritance unto his brethren. And if he have no brethren, then ye shall give his inheritance unto his father's brethren. And if his father have no brethren, then ye shall give his inheritance unto his kinsman that is next to him of his family, and he shall possess it: and it shall be unto the children of Israel a statute of judgment, as the Lord commanded Moses."

The traditional construction of this law is found in the Mishnah (B. B. viii. 2). The order of succession is as follows:

> "'If a man die, and have no son, then ye shall cause his inheritance to pass unto his daughter' [Num. xxvii. 8]; a son comes before the daughter, and all the descendants of the son come before the daughter. The daughter comes before her uncles; and all the descendants of the daughter come before her uncles. The brothers come before the father's brothers; and the descendants of the brothers come before the father's brothers. The general rule is this: Whoever is preferred in the order of succession, his descendants are also preferred; and the father precedes any of his descendants."

It will be seen that in default of issue the inheritance ascends to the father of the deceased. The Mosaic law does not provide for such a case; perhaps because the text deals with the original division of the Holy Land, the soil of which is supposed to be inalienable, so that no one can well have an inheritable estate in land until after his father's death. But during the second commonwealth the law of the Jubilee could no longer be carried out. Thus, it would often happen that the estate of a childless person would go to his surviving father, as it did by the Roman law also; and this in preference to brothers and sisters and their descendants. Neither the Hebrews nor the Romans shared in the strange notion of the common law of England, that land must in no case "ascend."

Children's Share.

Both Bible and Mishnah treat the daughter only in the singular; but if there were several daughters they divided equally. So did the several sons, aside from the double share of the first-born, which, however, attached only to an inheritance from the father (in which his eldest son, irrespective of the situation of the mother, had a double share—Deut. xxi. 15–17), and not to succession from the mother or brother. Under the words of Scripture, "of all that he hath" (literally, "all that is found with him"), it is held that the double share is allowed only of such estate as the father is possessed of at the time of his death. Hence, if the father's brother dies after him, the first son does not receive a double share of the estate which comes to the sons from this source through the father. And this notion is carried so far that even a loan or other demand owing to the father at the time of death, when collected, is divisible equally; and the eldest son must also recompense his brothers in money for the fruits or corn ears that have grown from buds and stalks since the father's death.

When a first-born son has died before his father, his own children take the double share in the grandfather's estate. Thus, when *A* has two sons, *B* and *C*, who die before him, and *A* dies, *B's* daughter (if he has no son) receives two thirds of *A's* estate, and *C's* children one third (B. B. viii. 4, and Gem. *ibid.* 122*b et seq.*; "Ḥoshen ha-Mishpaṭ," § 278); and generally speaking, under the principle of representation, remote descendants of the decedent, or of a common ancestor, always take by families (*per stirpes*) and never by heads (*per capita*).

Sisters come after brothers and their descendants. Although they are not named in the Bible, the Mishnah takes account of them (B. B. viii. 1): "A man inherits from his mother, and the husband from the wife, and the children of sisters inherit, but do not transmit"; and with these words it excludes the cognates, that is, the kindred on the mother's side.

The right of the surviving husband to inherit the estate of his wife is not derived from Scripture. The Talmud (B. B. 111*b*) points only to an obscure hint in Num. xxvii. 11 to support the customary law of inheritance to this extent; but the wife never inherits from the husband.

Illegitimate Children.

Illegitimates inherit, transmit, or, as links in the line of descent, pass a succession, in the same manner as those born in wedlock; even a *mamzer* (child begotten in incest or adultery) has the same standing as a legitimate child. From this rule are excepted children that are the fruits of intercourse with a "Canaanite" bondwoman or with a Gentile; because such children are reckoned after the mother, not after the father (compare Deut. vii. 4). This full kinship of illegitimates (subject only to this exception) with the father and his Agnates is recognized not only for the purpose of succession, but for all purposes; thus the law of the levirate applies to a natural brother. In fact, the Mishnah lays down the rule of equality under the very head of the levirate (Yeb. ii. 5): "He who is a brother to somebody *from any source* puts his brother's wife under the duty of the levirate, and is a brother for every purpose, except when one brother comes from a bondwoman, or from a Gentile mother; when one is a son from any source, he frees his father's wife from the levirate, and is guilty of a deadly sin in striking or cursing the father, and is his son for all purposes, etc." (see also Maimonides, "Naḥalot," i. 7). The only difficulty resting on an heir, related through an illegitimate birth, is how to prove his kinship. Here the law deems recognition by the ancestor who transmits the inheritance sufficient; and the father's word is believed when he says "N. N. is my son" (B. B. viii. 6, see Maimonides, *l.c.*, iv. 1–8).

An Israelite who becomes an apostate does not lose his standing as an agnate thereby, neither do his children who are born of an Israelite mother.

Gentiles and Proselytes.

Should the estate of a deceased Gentile fall under the jurisdiction of a Jewish court, it must be given to his Gentile kinsmen according to the rules of the Mosaic law. Though the sages held the chastity of the heathen in such low repute as not to recognize the kinship between heathens and converts, the reputed kinship between one heathen and another is deemed sufficient to determine the right of succession.

Every full-blooded Israelite is supposed to have agnatic heirs; for, if need be, the common ancestor would be found in the head of his tribe. But a proselyte dying without issue born while he was a Jew has no heirs, as the marriage of Gentiles is not recognized as a basis of heirship, and the estate of a proselyte in such cases has no owner (see Mishnah B. Ḳ. iv. 7, and elsewhere).

The preference of sons over daughters is greatly moderated and often reversed by the right of the latter to maintenance, based on the marriage contract, or *ketubah*. R. Moses Isserles, in his notes to the "Ḥoshen ha-Mishpaṭ" (§ 276, 4) points out that a person born out of wedlock, whose father is unknown, stands on the same footing as a proselyte. If such a person acquires property and dies without issue, he has no heirs, and his estate belongs to the first occupant. In short, there is no heir by the mother's side either in the case of legitimate or of illegitimate children.

Right of Hotchpot.

The right of hotchpot (*collatio*), by which advances made by the father in his lifetime to his children are reckoned as belonging to the estate, so as to equalize the shares of the children after his death, is known both to Roman and to English-American law, but was not recognized (Mishnah B. B. viii. 7, 8) either in sharing the inheritance or in providing maintenance for the daughters. The same rule for the inheritance of lands applies to goods, effects, or slaves; and, as under the Roman law, the whole estate is treated as one aggregate.

Relationship is spoken of in the Mishnah as an objection against acting as judges—in criminal cases as in civil disputes—or as witnesses (Sanh. iii. 3, 4); but here Agnates are not the only kindred to whom the opposite party may object. In fact, affinity is ground enough.

> "These are relations [for this purpose]: His [a person's] father, his brother, his father's brother, his mother's brother, his sister's husband, his paternal or maternal aunt's husband, his stepfather, his father-in-law, and his brother-in-law (by the wife), with their sons and sons-in-law, and his stepson."

This is the tradition according to R. Akiba; but the older tradition (first Mishnah) was as follows:

> "His father's brother and his father's brother's son and whoever is capable of inheriting, or who is at the time connected by marriage with a woman nearest in descent."

This earlier view seems to have confined the objection to Agnates, and to have proceeded on the ground that the nearest agnate was interested in the property or demand in dispute, and was therefore unfit to act as judge, or to give impartial testimony.

L. N. D.

AGNOSTICISM: A term invented by Prof. Thomas H. Huxley in 1869, expressive of opposition to the claims of the Christian gnostic as "the one who knows all about God" (see Huxley in the "Nineteenth Century," February, 1889), in adaptation of the descriptive adjective found in St. Paul's mention of the altar "to the unknown God" (Acts, xvii. 23). The word agnostic with its derivative has passed into recent literature as the designation in the main of the theories of two groups of thinkers. In its original implication, corresponding to the position of its inventor, the term agnostic represented a state of suspended judgment with regard both to theism and atheism. On the ground that existing evidence does not justify either the affirmation or the denial of the being of God, God is held to be unknown. However, the word has assumed a secondary meaning. It has come to denote the theory that God is not only now unknown, but is forever unknowable, on the assumption that the nature of human knowledge is such as to preclude knowledge of ultimate things. In the former sense the agnostic position makes a reaction against the dogmatism of both the Church and of atheistic materialism. Each presumed to possess ultimate knowledge. A protest against the arrogant gnosis of these, Agnosticism represents a wholesome phase of modern thought. It is expressive of the recognized need of modesty and a higher degree of reverence. The dogmatism of the Church was neither modest nor reverent; and these, its failings, marred also the attitude of its antipode, insistent materialism.

Name and Meaning.

Man's Knowledge of God.

Agnosticism versus Atheism.

Not content to teach that God is, the Church proceeded to catalogue what He is. In claiming for itself this knowledge, it ignored the limitations of human thought. It confounded analogy with identity. The Church failed, furthermore, in self-consistency. It appealed to revelation, and thus conceded the position of those who insist upon the inability of human reason to arrive at a comprehensive knowledge of God. On the other hand, it assumed that the human mind, lacking the insight to attain unto the knowledge of God, may yet understand and interpret revelation, and proceeded to develop, from data beyond cognition, a theory of the Godhead and of God's relations to the world and every individual therein. This contradiction proved to be the vulnerable point which atheism was not slow to attack, but atheism in turn fell into the error of its antagonist. Refusing to acknowledge reality beyond the visible, tangible, and sensuous world, it contradicted itself in building up a theory of the universe which transcended the data of immediate experience. Its denials were as dogmatic as were the affirmations of Church theism. Agnosticism, in proclaiming a truce to the verbalism of both contestants, came upon the world of thought as a refreshing breeze after a hot and stifling sirocco. As such a protest and reaction, it helped to clarify the atmosphere and contributed to the reexamination of the foundations of belief. It emphasized the necessity of clearer statements of the basic propositions at issue. But it could be only preliminary. The metaphysical interest in man is too strong to resign itself to inactivity, and the passion for unity and harmony is too insistently interwoven in the very constitution of the human soul to respect the lines drawn by this Agnosticism of "suspended judgment" in expectancy of further and fuller evidence.

Development of Agnosticism.

In its own development Agnosticism had to progress beyond its first positions. Enunciating the doctrine that God is not only unknown, but forever unknowable, the later agnostic theories recur to the metaphysical epistemology of Kant and Comte, as modified in the synthetic philosophy of Herbert Spencer. Fundamental to this phase of Agnosticism is the thesis that knowledge is confined to phenomena—that the nature of ultimate things lies beyond the reach of human thought. The radical defect of this contention has often been pointed out. If it were true that our knowledge is limited to the phenomenal, by no possibility could we ever become aware of the limitation. To affirm that things-in-themselves exist, but that man can not know them, implies the contradiction of one half of the proposition in the other. If we can not know things-in-themselves, how do we know that they exist? If we know that they exist, then they are not unknowable. The knowledge that they are includes in a certain degree also the knowledge of what they are. The argument which proves that we can not know what things are in themselves tells against the knowledge that they are.

In the Kantian system the principle of causation is relied upon to prove the existence of the things in themselves. But, if our knowledge is confined within the realm of phenomena, this principle, of necessity, will apply only to phenomenal existence. We can not take one step farther by the aid of this crutch. In knowing the limits, we have passed beyond them. This new Agnosticism controverts the position of the sensationists. It concedes that sensations must have a cause beyond themselves. Our knowledge of the outer world is regarded as an inference, depending on an act of abstract thinking. It is then conceded that we know more than the immediate data of experience, for sensations are the only states of experience. Yet we assume, on the principle of causation, the existence of a world beyond and antecedent to our sensations. In truth, the knowledge of sensations is not more direct than that of objects.

Consciousness and Knowledge.

To know consists not in the act of immediate experience, but is a composite operation in which comparison and memory—that is to say, the conscious revivifying of experiences which have passed away and are no more—play considerable part. Self-consciousness as the basis of thought thus transcends the actual as clearly as does the inference of things beyond the phenomenal. But this world, to which our sensations, as interpreted by consciousness, point, and the knowledge of which, though beyond experience, is ours, we interpret by the data of our own consciousness. We project into the beyond our own personality. Our personal experience now, as Kant himself has pointed out, is in a certain sense out of and above time, since the conscious unity which is present in it all, and without which it could not exist, is no member of the temporal series, but is that which makes the very conception of time possible. Our own self thus asserts itself as free from the limitations of time, and, therefore, it is not proved that the reality underlying the All must, of necessity, be quite unlike what we know as human life. What we know of self we may not deny to the absolute.

The fear of falling into Anthropomorphism and Anthropopathism is the fatal obsession of Agnosticism; but we think as men, and can not think otherwise. Mythopoetic construction is inherent in all mental synthesis. Science can not spare the privilege or resist the inclination. Any system of interpreting

Knowledge of God and the World.

nature to man must resort to the picture language, which alone evokes response from the human mind. Confusion in the use of the term knowledge has lent a semblance of cogency to the contentions of Agnosticism. What we know, we know as human beings: that is to say, in its relations to our conscious self. Sensations, the immediate material of our consciousness, we know in no manner different from the way in which we know the unities beyond and underneath these sensations. In their relations to us we know the things-in-themselves, the existence of which need not be established for us by a process of thought, but the knowledge of which is an original datum, which is presupposed in every act of thinking. Our own personal identity and self-consciousness are of things-in-themselves. As we know ourselves, we know them. The knowledge of our Ego, which is the consciousness of our unity, leads to the knowledge of the ultimate unity underlying all that is. While we may never know what God is in Himself, we do know what He is for us. As we are a part of the All, that which we are must also be in some degree of the essence and nature of the All. The All can not be less than we, a part thereof.

Jewish Views.

Judaism has little to learn, and still less to fear, from modern Agnosticism. Conceiving of man as created in the image of God, it bases its God-knowledge on the self-knowledge of man. By looking into himself, man learns to know his God; and it is in terms of this self-cognition that Judaism expresses its God-consciousness. The early Biblical writings are naively anthropomorphic and anthropopathic. The philosophers of Judaism, beginning with Philo, prefer to hypostasize divine manifestations and powers, such as wisdom, grace, justice, prescience, to descriptions of His entity in human terms. This tendency finds expression in the nomenclature which borrows designations of space and locality to connote the Deity. "Being," "He who is," seem to suffice to name Him adequately. Beyond this ascription of Being, the pious disinclination to associate with Him other and less comprehensive connotations would not venture. The ḥazan who exhausted a rich vocabulary of attributive description in his zeal to magnify God was censured for his presumption (Bab. Ber. 33*b*). "The Name" is the favorite synonym for God.

Fundamental to the theology of most of the philosophic writers among the Jews is the thesis that, while we may predicate existence of God, we can not attain unto the knowledge of His quality (Maimonides, "Moreh," i. 58). Joseph Albo reports the answer given by a "wise man" to the query, whether he knew the *what* of the Godhead: "Did I possess this knowledge, I myself would be God" ("'Iḳḳarim," ii. 30). The controversy concerning the ascription of attributes to the Deity was fanned into a high blaze in consequence of dogmatic disputes in the camp of Mohammedan theologians. Saadia devotes a series of chapters ("Emunot we-De'ot," ii. 4–9) to the discussion of the problem, and comes to the conclusion that attributes, in the strict sense of the word, can not be predicated of God. Those found in the Bible may be divided into such as indicate essence and such as connote action; the former are comprehended in God's unity and are a mere accommodation to the necessities of language, while those of activity are mere designations of God's power in nature and history.

Qualification by Negation.

Saadia was succeeded by a long series of thinkers, who contend that the attributes have in reality only a negative implication. They exclude their contraries, but do not affirm of God a positive reality, not included before in His Being. Maimonides, in his "Moreh Nebukim" (i. 50–60), on the whole is inclined to accept this theory. To attribute qualities to God would amount to limiting Him, and thus would degrade His Being. The attributes life, power, knowledge, and will constitute only a seeming exception. But while in man life and knowledge, thought and power are separate and divided, in God, the One and Indivisible, they are one. God's thought is not of the order of human thought. It is spontaneous. Why, then, adds Maimonides, in view of the essential difference of implication in the terms, use them in connection with God? From the very beginning, he adds, Jews had a dread of pronouncing the name of the Deity. The priests alone at certain times and in holy places could presume to utter the Ineffable Appellation. Others had to paraphrase it. Adonai and Elohim designate God as cognized from His works. Still Maimonides' thesis has also its positive side. The more we know what God is not, the nearer, says he, we draw by this road of negation to the perception of what is involved in the concept of the Deity as the One and Indivisible Unity.

Modern Jewish Views.

In all essentials, modern Judaism shares the position of Maimonides. It regards all attempts at descriptive connotations of the Godhead as anthropomorphic makeshifts to find words for a thought which in reality is beyond the power of human tongue adequately to convey. God is. In Himself, He is unknowable. In so far as He is in relation to our own self, the life of Israel, the human family, and the world, He is known. Up to a certain point, then, Judaism is agnostic. It parts company with Agnosticism at the point where the certitude of our own immediate consciousness of the reality beyond the limited range of sensational experience is called into doubt. By the light of this consciousness, which is an immediate datum, by the facts of his own identity and persistency as a conscious entity in time and space—yet withal above time and space, and constituted into a moral personality by the additional data of Israel's history and the guidance of the world and humanity—the Jew, in accordance with Judaism's doctrine, draws the warrant for predicating in his faltering human language the existence of that "power not ourselves making for righteousness," paraphrasing attributes which agnostic metaphysics, in its confusion of the implications and the limitations of knowledge. refuses to admit. The Unknowable God, through the medium of human cognition, is apprehended as the God who is, and, as existing, is known by analogy and brought nearer to man by symbolism rooted in human experience and human self-consciousness. See also Anthropomorphism. E. G. H.

AGOBARD: Bishop of Lyons; born 779; died June 6, 840; was one of the principal opponents of Judaism in the ninth century. In his time the Jews of Lyons inhabited a special quarter, situated at the foot of the hill of Fourvière. They obtained from King Louis the Debonair, of France—the son and successor of Charlemagne—a special magistrate (*magister Judæorum*) named Eberard—a prominent man of the court—to defend them against the intolerance of the clergy. This aroused the indignation of Agobard, which he expressed in four epistles—one to Louis, one to the priests of the palace, one to Bishop Hilduin, and one to Nibridius, bishop of Narbonne.

In the first letter, which he entitles "Concerning the Insolence of the Jews" (*De Insolentia Judæorum*), he complains bitterly of the agitations of Eberard and the royal commissioners, Gerric and Frederick, against his clergy and himself. "What have I done," he asks, "to incur the anger of the king? I have confined myself to giving to the faithful the following recommendations: not to sell Christian slaves to the Jews; not to permit the Jews to sell them in Spain, or to have Christians in their pay and employ; to prevent Christian women from observing the Sabbath with Jews, from working with them on Sundays, and from partaking of their meals during Lent; to forbid their servants eating meat during that period; not to buy meat that had been bled and rejected by them as being unclean and therefore called Christian meat, nor to sell it to other Christians; not to drink such wine as is sold only to Christians," etc.

Accusations against Jews.

Agobard tried to justify these recommendations by enumerating his grievances against the Jews. "They boast," he says, "of being dear to the king and of being received by him with favor, because of their descent from the Patriarchs; they exhibit costly garments which, they say, have been presented to them by the relatives of the king, and gowns which their wives have received from the ladies of the palace; contrary to the law, they take the liberty of building new synagogues; ignorant Christians claim that the Jews preach better than the Christian priests; and the commissioners of the king have ordered a change of the market day, in order that the Jews might be able to observe their day of rest." He ends by accusing the Jews of stealing Christian children to sell them as slaves.

This first epistle is followed by a memorandum, countersigned by the bishops of Vienne and Châlons and entitled, "Concerning the Superstitions of the Jews." In it are recounted the judgments that the Fathers of the Church have passed upon the Jews, the restrictive measures taken against them by different councils, their false superstitions, and their refusal to believe in the divinity of Jesus. By citing numerous Biblical texts, endeavors are made to demonstrate that the society of Jews should be avoided still more than that of pagans, as Jews are the opponents of Christianity.

These writings did not produce on the king the effect expected by Agobard, who, by baptizing a female slave belonging to a Jew (despite the opposition of her master), alienated whatever regard the monarch had entertained for him. Of this he had evidence in the coldness of his reception by Louis at an interview in which Agobard attempted to justify himself.

In a second epistle, addressed by the bishop to the priests at the court, he consults the prelates Adalard, Uvala, and Helisachar upon the course to be pursued toward the pagan slaves, belonging to Jews, who desire to enter into the pale of the Church. Agobard was inclined to admit them.

The third epistle, addressed to Hilduin, prelate of St. Palais, and to the abbot Wala, reveals still more clearly Agobard's zeal for proselytism. He entreats them to induce the king to revoke the edict in favor of the Jews, forbidding the baptism of their slaves. He points out that it is a sacred duty for every priest to work for the salvation of those who are plunged in error; hence they must make use of their influence, "that the souls that could augment the flock of the faithful, and for whose salvation public prayers are offered to God by the Universal Church on Passion Day, should not remain, through the obstinacy of the unbelievers, through the wickedness of the enemies of heaven, as well as the pretended edict of the king, in the snares of Satan."

Not all prelates of that time shared Agobard's sentiments. Nibridius, bishop of Narbonne, did not hesitate to maintain cordial relations with the Jews, and even invited them to his table. Therefore Agobard considered it his duty to induce him to break off all intercourse with them. "It seems to me to be unworthy of our faith," he writes to him, "that the sons of light should associate with the children of darkness, and that the Church of Christ, which ought to present itself for the kisses of her celestial spouse without blemish and without wrinkle, be disgraced by contact with the defiled and repudiated Synagogue." And after having recalled to him all his efforts to prevent every intercourse between Jews and Christians, notwithstanding the opposition of Eberard and the royal commissioners, he adds: "You know that one should not only not make use of those who do not want to accept the apostolic preaching, but should shake off the dust of their dwellings; in the Day of Judgment, Sodom and Gomorrah will be pardoned sooner than they." And he concludes by requesting Nibridius not to allow any of the faithful to communicate with such accursed ones, and to exhort all the neighboring bishops to concur in that work. Besides their polemic interest, Agobard's writings about the Jews, especially his letter on their superstitions, throw light on their social history and give evidence of the existence of works like the "Otiot de R. Akiba," the "Shi'ur Ḳomah," and the "Hekalot," in the ninth century.

It is well known that Agobard openly sided in the revolt of the sons of Louis I. against their father. His wrath at having failed in his undertaking against the Jews was one of the causes that led him to this attitude. In 834 he was compelled to abandon his bishopric and to seek safety in Italy with Lothair, the son of the king; but three years later he was reconciled with Louis and resumed his episcopal duties.

AGRAM (ZAGREB): Austro-Hungarian city, capital of Croatia and Slavonia, situated near the Save river, about 160 miles from Vienna. The first two Jewish families that settled at Agram migrated thither during the second half of the eighteenth century. Soon after the Edict of Toleration had been issued by Emperor Joseph II. in 1781, the number of immigrants, consisting chiefly of merchants and mechanics, slowly increased. In 1811 they bought a lot for a cemetery, and twenty years later purchased a house which was used as a synagogue and as a residence for the rabbi. The Christian population resented the presence of Jews among them, and this led to occasional rioting. The most serious disturbance of this kind occurred in 1839, but did not assume proportions of great consequence. The turning-point in the history of the community dates from the foundation of its school in 1840. Shortly after the congregation elected a rabbi of modern views and German education. In the synagogue the German sermon and some trivial changes in the ritual led at first to friction between the progressive and conservative elements of the community. The latter, discontented with what they considered a departure from their ancestral religion, seceded in 1846, and formed another congregation. In the mean time political questions occupied the attention of the community. The united congregations of the kingdom of Croatia (Agram, Kreutz, Warasdin, and Sissek) petitioned the Hungarian parliament to grant them the franchise, but their petition was rejected. The year of the revolution, 1848, witnessed insignificant rioting in Agram, in spite of which the Jews affiliated with the Croatian party, and some of them also served in the army that fought against the Hungarians.

In 1850 the keeping of records of births, marriages, and deaths was introduced, and the school, which had grown to such an extent that it required five teachers to instruct the classes, was reorganized. The conservative party of the community continued its separate organization, although in 1852 the governor had ordered it to disband, and threatened to punish every attempt at secession. But in opposition the archbishop, George Haulik, encouraged the conservatives, granting them a lot for a cemetery and a new synagogue. Four years later both congregations united and formed a new organization which lasted until 1867, when the introduction into the synagogue of an organ caused another secession of the conservative members. In the meantime the political conditions of the community had been improved by the right to own real estate, which was granted them in 1860, but a petition for full franchise, repeated in 1861, was again rejected. It was not until 1873 that the diet of Croatia granted the Jews full rights as citizens. Subsequently another attempt was made to bring the two congregations together, but as the small orthodox congregation demanded the maintenance of a separate synagogue, a shoḥet, and a ḥazan, the effort was unsuccessful. However, in 1879 the government recognized the orthodox congregation as forming a separate organization, which was, however, not able to erect a modern building until 1897.

The following figures illustrate the steady growth of the community: There were only thirty-two contributing members in 1833; in eight years this number increased to forty-five, and five years later to sixty-two. In 1899 five hundred and thirty-two members represented about two thousand persons comprising the community. This abnormal increase is explained by large accessions from Hungary, Bohemia, and Moravia. Still the growth does not seem to have been as rapid as these figures would indicate, as probably the number of families forming the community was considerably greater than might be inferred from the number of members contributing toward the synagogue, especially as the number of families paying the special Jew tax in 1843 is given as one hundred and four. This tax was a heavy burden on the congregation, both from a material as well as from a moral point of view. In vain did the congregation protest against it. In 1838 the tax amounted to 718 silver florins (about $359, or £72). In 1843 it increased to 800 florins, at which time the income of the congregation was only 1,075 florins, or $537. This income rose to 20,000 florins ($10,000, or £2,000) in 1899, and the value of the real estate owned by the congregation is appraised at 100,000 florins ($50,000, or £10,000).

The occupations followed by the members of the community are varied. Twelve lawyers and fifteen physicians practise in the city, and different manufactures and trades afford employment to numbers of Jewish merchants, mechanics, and clerks. The school of the community is attended by 240 children, and 260 Jewish children are admitted to the public schools. Besides its private school, the congregation maintains a separate school for religious instruction. A Talmud Torah and a Ḥebra Ḳadisha (burial society) were established in 1818, and there exist to-day also a ladies' society and a charitable association called Gemilut Ḥesed.

The following persons have officiated as rabbis at Agram: Aaron Palota up to 1840; J. Goldman, 1840–50, when he became a convert to Christianity; L. Rokonstein, 1850–58, and Dr. Hosea Jacobi since 1867. The last is the author of text-books for religious instruction written in the Croatian language.

G. S.

AGRARIAN LAWS: With the settlement of the Israelites in Canaan, and the consequent transition from their former nomadic mode of life to agricultural conditions, fixed tenure of landed property became a natural institution. At the time of the consolidation of the monarchy, not only each tribe but each clan and each household was permanently settled upon some well-defined, larger or smaller, area. The estate passed, through inheritance, from father to son: where the sentiment of filial affection was particularly strong, it was not permitted to become the possession of a stranger, as is shown in I Kings, xxi. 3, "The Lord forbid it me, that I should give the inheritance of my fathers unto thee"; otherwise, there was nothing in the way of disposing of it by sale (Gen. xxiii. 9), or barter (I Kings, xxi. 2), or gift (Gen. xxiii. 11). Whenever the sale of an estate became necessary (as in the case of poverty), in accordance with an ancient custom, the next of kin enjoyed the privilege of preemption ("the right of redemption," Jer. xxxii. 7; Ruth, iv. 3, 4). According to the older accounts preserved in the Bible, for example, Judges, i., the conquest of Canaan was gradual and protracted; indeed, it was not completed before the reign of Solomon. Moreover, the invasions were made by the tribes singly; there was apparently at no time anything like a concentrated effort. Each invading horde naturally settled on the territory it conquered. But nothing is known about the manner in which the land was parceled out among the individual clans or households.

Fixed Tenure of Land.

The information contained in Joshua, chaps. xiii. *et seq.*, is based upon the theory that the conquest of the greater part of the country was the work of one generation under the leadership of Joshua, who, before his death, distributed the land by lot among the various tribes in shares proportionate to the number of souls constituting each household. The tribes of Reuben and Gad and the half tribe of Manasseh, to whom the country east of the Jordan had been assigned by Moses, were permitted to return to their homes. Special cities, forty-eight in number, scattered through the country, were allotted to the Levites. All this agrees in detail with the instructions which are found in the closing chapters of Numbers (xxxii.–xxxvi.), and which is assumed to belong to the later strata of the Priestly Code; they are probably nothing but the result of the unhistorical reflection of after-times. It is clearly provided (Num. xxxvi. 9) that in no case may land be transferred from one tribe to another.

Distribution of Land.

Somewhat older and quite idealistic in the expectation of miraculously altered geographical conditions is the plan of allotment adopted by the prophet Ezekiel in the constitution he outlines for the restored people (Ezek. xlv. *et seq.*). With the exception of a reservation for the Temple and its ministers (priests and Levites) and for the domain of the prince, the whole country is divided by the prophet into twelve

Rise of a Moneyed Class.

strips, which are to be inhabited by the Twelve Tribes. The wish is expressed that "my people be not scattered every man from his possession" (Ezek. xlvi. 18). Partly in consequence of the Syrian wars by which the northern kingdom was harassed for nearly a century, and partly through the rise of commerce and of a moneyed class in the population, the impoverished peasant was forced to mortgage or sell his small farm. Vast estates became concentrated in the hands of a few; they "joined house to house and field to field," unscrupulously dispossessing the poor, who hired themselves out as laborers or sold themselves and their children into slavery. Against this state of affairs the prophets, nearly all of whom were themselves children of the people, raised a cry of indignation, vehemently denouncing the greed of the rich landlords of Samaria and Jerusalem. Their denunciations, while perhaps barren of immediate results, ultimately led to the formulation of laws directed against aggression on the part of the ruling classes. Thus, the removal of landmarks is made one of those great offenses against which the divine curse is invoked (Deut. xix. 14, xxvii. 17; Hosea, v. 10).

Institution of Jubilee Year.

The Jubilee year was mainly instituted in order to prevent violent changes in the tenure of lands (Lev. xxv. 23 *et seq.*). The land, the law declares, properly belongs to YHWH, who is sole landlord, while all the Israelites are but his tenants. Therefore the land must not be sold in perpetuity. It may be leased, or its crops may be sold; but in the Jubilee year the land returns to its original owner. The price paid for a piece of land must differ according to the number of crops expected before the next Jubilee, the year of release. The original owner may reclaim his property at any time he chooses—according to the Mishnah ('Ar. ix. 1), however, not within the first two years after the sale—by refunding to the buyer the value of the crops remaining until the Jubilee. When, through poverty, he is not in a position to redeem the property himself, the right and the duty of reclaiming it devolve upon his nearest kinsman. Houses in villages are reckoned as part of the ground; they may therefore be reclaimed at any time, and are released in the Jubilee year. But a house in a walled city may be reclaimed only during the first year after the sale; if it be not redeemed within that period it becomes the perpetual property of the buyer and is not released in the Jubilee year. Exception is made in favor of dwellings in Levitical cities, which may be reclaimed at all times, and are released in the Jubilee year. Pasture land around a Levitical city may not be sold. The release of land as a general institution appears nowhere in the earlier literature of the Bible. The nearest approach to it is the provision in the scheme of Ezekiel that, while the prince may give away parts of his domain to his sons in perpetuity, the lands received from him by his servants are to become his again in "the year of liberty" (Ezek. xlvi. 16, 17). The year meant is apparently the seventh year. According to the Deuteronomic code (Deut. xv. 7-13; also Jer. xxxiv. 14), it was the year for the release of debts and the manumission of slaves; the year of Jubilee seems to be modeled upon the Sabbatic year and represents a later and more comprehensive development. The law was probably never enforced. According to the Talmud ('Ar. 32*b*), the Jubilee ceased to be observed with the transportation of the trans-Jordanic tribes by the king of Assyria (I Chron. v. 26). For additional information concerning the rabbinical interpretation of the laws see Mishnah ('Ar. ix.); Maimonides, "Yad ha-Ḥazaḳah," iii. 7, 7. See also JUBILEE, SHEMIṬṬAH.

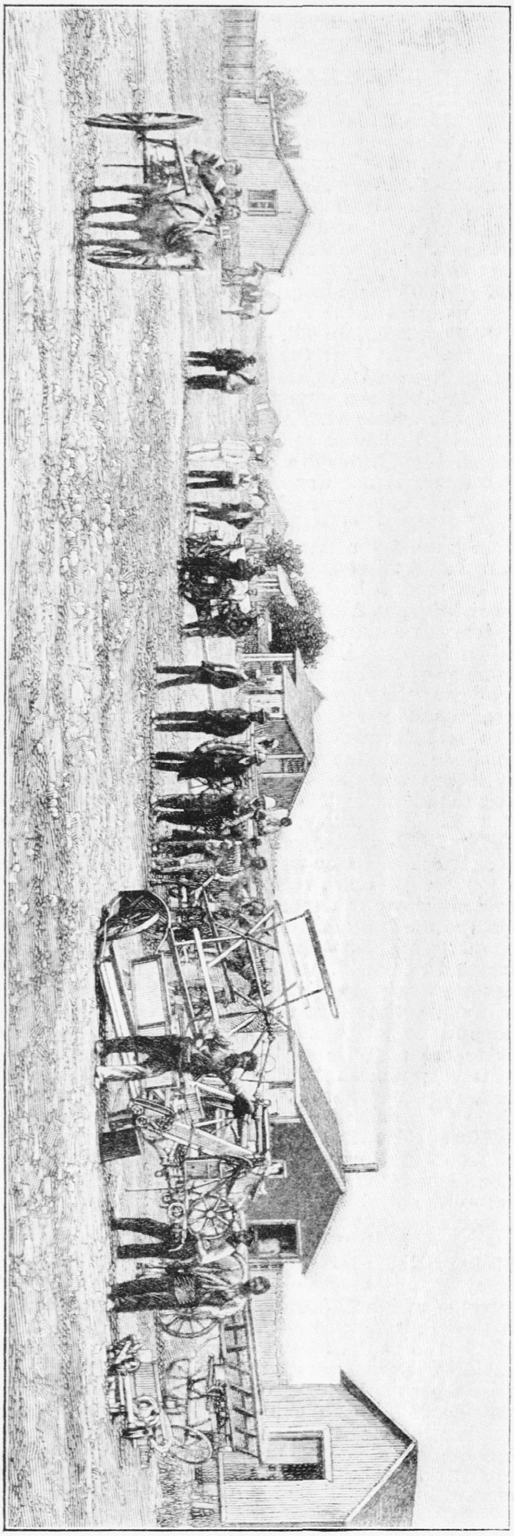
M. L. M.

AGRICULTURAL COLONIES IN THE ARGENTINE REPUBLIC (ARGENTINA): Excepting certain settlements of Jewish farmers in Brazil referred to elsewhere (pp. 265, 266), agriculture among the Jews in South America has been confined to the Argentine colonies established by the Jewish Colonization Association of Paris (of which the late Baron and Baroness de Hirsch were the founders and practically the sole stockholders). In August, 1891, by the direction of Baron de Hirsch, some 3,000 square leagues of land were purchased in various parts of the Argentine Republic, for $1,300,000 (£260,000). In all, over 17,000,000 acres were acquired. At first the project of settling Russian refugees on a large scale in Argentina met with a protest from the government, but the matter was amicably arranged. As early as 1889, independent attempts had been made by certain Jewish immigrants from Russia to establish colonies in Argentina, but this was not done on a well-ordered plan, and later these colonies and colonists were absorbed by the Jewish Colonization Association. The colonies were named for Baron and Baroness Maurice de Hirsch. At first two tracts were set apart for colonization: one, 9 leagues square, situated in the province of Buenos Ayres and called Mauricio; the other, 4½ leagues square, in the province of Santa Fé and called Moïseville. Colonists began to arrive in the summer of 1891 in such numbers that by the end of the year they numbered 2,850. The central administrative office was established in the city of Buenos Ayres; but considerable friction arose between the colonists and the non-resident executive officers, with the result that the very existence of the colony was threatened. There were other difficulties: the locusts, which were very numerous, destroyed the growing crops, and water was scarce. Although the colonies received constant accessions, it was necessary to deport so many discontented colonists to the United States—800 were deported within about two years—that in October, 1893, only 2,683 persons remained. Since then the executive office has been reorganized, and although there have been many desertions, due to discontent or to the damage done to the holdings by locusts and drought, as well as to the distance of the farms from the railroad stations and markets, the number of inhabitants has been slowly but steadily increasing, and the condition of the colonists has become fairly comfortable.

Early Difficulties.

Moïseville.

Moïseville, in the province of Santa Fé, is the oldest of the Jewish Agricultural Colonies in Argentina. It was founded by Russian immigrants in 1890, before the establishment of the Jewish Colonization Association, but was reorganized by that association in 1891. Including the estates of Virginia and Santa Elena, Moïseville embraces nearly 60,000 acres (24,000 hectares), of which 22,500 acres are occupied by colonists. Although it has passed through several grave crises, Moïseville is the most successful of the Argentine colonies. Its success is attributable (1) to the fact that the colonists had time to gain the experience they needed, and (2) to the aid accorded them by the Jewish Colonization Association by the creation of lucerne fields. These fields not only favor the rearing of cattle, but yield forage which finds a ready market in the more northerly portions of Argentina, where fodder is often scarce. The colony is equidistant from the two railway stations of Palacios and



MAURICIO—RUSSO-JEWISH COLONY IN THE ARGENTINE REPUBLIC.
(From a photograph.)

Moïseville, which are connected by a good road, affording ample facilities for the transportation of crops to the markets. Moïseville has become a center for the purchase of provisions by neighboring colonists, many Italian settlers resorting to it for this purpose.

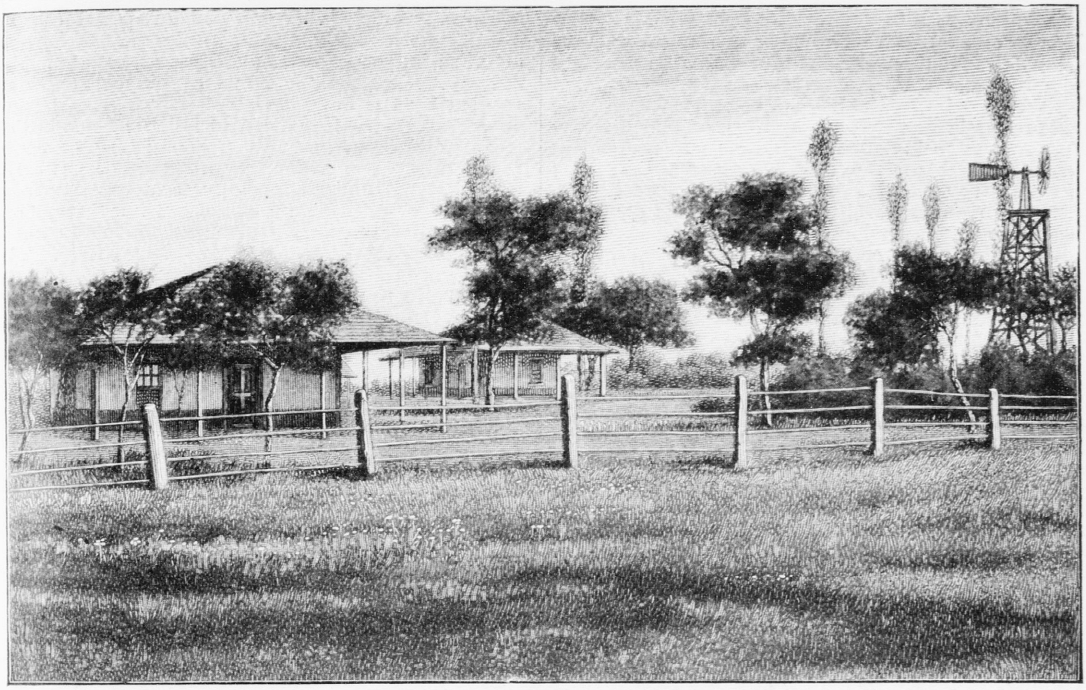
Statistics.

The colony contains 81 colonists, representing a total of 168 families and 825 persons. These families live in 130 brick houses, nearly all of which are surrounded by groves of fruit-trees and gardens planted by the colonists. According to the colony's report for 1899, it appears that in 1898 the area tilled was 20,574 acres (8,300 hectares), divided up as follows: wheat, 11,699; flax, 4,961; lucerne, 3,337; rye, 77; vegetables, 500. Yielding, as they do, six crops a year, the lucerne fields occupy an important place in the agricultural economy of the colony, and their cultivation has made it possible to establish a butter and cheese factory, to which the colonists sell their milk. This factory is conducted as a private enterprise by individuals not connected with the colony, the land, buildings, and a small bounty having been obtained by them from the Jewish Colonization Association. Some colonists sell from 1,800 to 1,900 quarts of milk a month to the factory. About 1,400 head of cattle, including 786 plow-oxen, have been placed at the disposal of the colonists by the Jewish Colonization Association; and in addition to these, many colonists have bought cows of their own. Moïseville contains a synagogue, a school, a pharmacy, and a communal bath. In the school 63 boys and 60 girls are taught. At present (1900) the facilities for education in other parts of the colony are inadequate, and two more schools are to be established shortly.

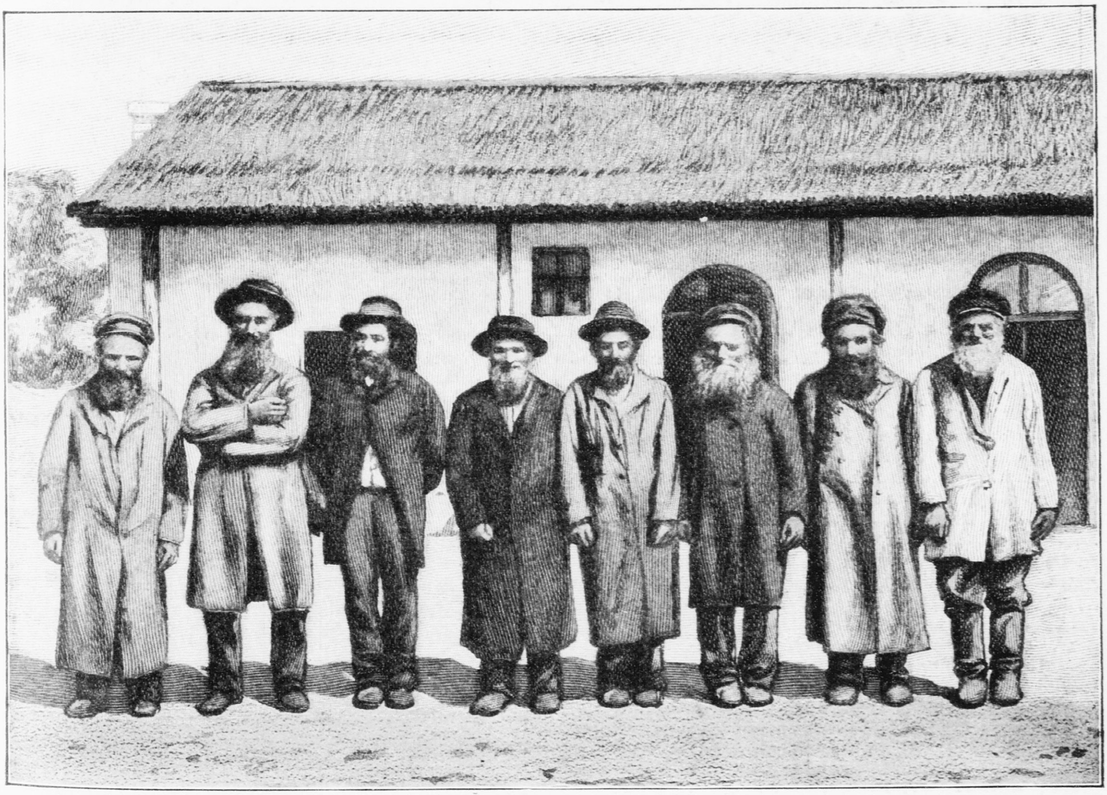
Mauricio and Clara.

Mauricio, in the province of Buenos Ayres, comprises an area of about 62,000 acres (25,000 hectares). There are 164 colonists in Mauricio, representing 211 families, and a total of 1,045 persons. The soil is not so rich as that of other colonies in Argentina. The only way in which this inferiority can be overcome is by variation of crops, which system requires larger areas than are at the disposal of the colonists. As very high prices are asked for land adjacent to the colony, the administrators have met the difficulty by acquiring some not in its immediate vicinity, to which some of the families at Mauricio are to be transferred. This would permit of the allocation of more land to those that remain, thus enabling them to vary their crops. In 1898 the following crops were sown: wheat, 13,427 acres; maize, 6,952; lucerne, 1,475; flax, 7; barley, 12; rye, 71; oats, 7; tobacco, 2½; vegetables, 136; making a total of 22,089 acres, or about 9,000 hectares. Cattle-breeding being considered one of the most important forms of industry by the settlers, it has been necessary to form large lucerne fields at considerable expense, as natural pasturage is insufficient. Upward of 2,500 head of cattle have been placed at the disposal of the colonists by the Jewish Colonization Association, of which about 800 are plow-oxen. A butter and cheese factory is about to be established. Mauricio has a hospital, a steam flour-mill, a slaughter-house, and a bath. The principal centers of the colony are Algarrobo and Alice. At each of these places there is a school, attended by 63 boys and 30 girls and 65 boys and 28 girls respectively. A third school has been opened in Mauricio, and is attended by 24 boys and 8 girls. The sanitary condition of the colony is good.

By far the largest group of Jewish colonies in Argentina is that known as **Clara** (named after the Baroness de Hirsch) in the province of Entre Rios, which was established by the Jewish Colonization



MAURICIO—ADMINISTRATION BUILDINGS.
(From a photograph.)



MAURICIO—GROUP OF COLONISTS.
(From a photograph.)

Association in 1894. Some of the present settlers in Clara were brought there during the second exodus of the Jews from Russia, in 1891, and were selected from refugees that had arrived in Constantinople. But the more important body of colonists was organized in Russia in 1894; ten groups, of about forty families each, being formed. These were taken direct from the ships in which they arrived to the farms on which they were to settle, where houses, cattle, seeds, implements, and the food necessary for them between seed-time and harvest had already been provided. The first three groups to arrive were settled in three villages of fifty houses each; the next three were established upon a system midway between the village system and that of isolated farms; while some of the families of the remaining groups were established upon isolated farms only. The population of this colony has been increased by a considerable immigration, although many of the early settlers, discouraged by reverses and unable to endure the privations of pioneer life, have withdrawn. At first the houses in Entre Rios were built of clay, but they had to be reconstructed, and are now entirely of brick. It was found difficult to supply the necessary water, as wells had to be bored to a depth of 82 to 98 feet. At Moïseville and Mauricio water was found at a depth of 7 to 9 feet. These conditions made the installation of colonists very expensive.

Clara Colony—Children on Horseback Starting for School.

(From a photograph.)

Characteristics of the Colonies.

The soil of this group of colonies is rich, but compact and heavy, as it has been plowed for only a few years; the yield, however, is not so good as might be expected. During 1898 the colonists sowed 66,656 acres, subdivided as follows: wheat, 33,838; lucerne, 4,705; flax, 27,852; barley, 242; rye, 19. In regard to the transportation of produce to market the colonists of Clara are not so well situated as those of Moïseville and Mauricio, where the maximum distance from railway stations is about nine miles. In Entre Rios certain groups are twenty miles or more from the railway. Considerable sums of money are being applied by the Jewish Colonization Association to the formation of lucerne fields in this province, as the breeding of cattle forms an important part of the economy of the colony. A large steam flour-mill is in operation, and there are three well-organized schools in which two hundred children receive instruction. The sanitary condition of the settlement is good. At Ceballos, in the northern portion of Entre Rios, the Jewish Colonization Association has established a cattle-breeding farm of 23,090 acres, which is under the supervision of the council at Buenos Ayres.

In Entre Rios the Jewish Colonization Association owns 381,779 acres, of which 195,545 are colonized. The colony of Clara is composed of 19 villages or groups, which with their populations (January, 1899) are enumerated in the following table:

Statistics of Clara Colony.

AGRICULTURAL COLONIES IN CANADA: Agricultural activity among Jews in Canada is a sequel to Russo-Jewish immigration occasioned by persecution. The Mansion House Committee of London, England, the Jewish Colonization Association of Paris, and a local committee in Montreal, Canada, have been the chief agencies that have fostered and directed the movement. Jewish farmers have met with a certain measure of success in the colonies established there; but Canada does not offer to novices in farming the natural advantages pertaining to favorably situated parts of the United States. The question of markets for the sale of produce is also a more serious one in the Dominion; and the long winters, during which little outside work can be done, have proved to be a test that many would-be colonists have been unable to stand.

Moosomin Colony.

The first Jewish agricultural colony in Canada was established under the auspices of the Mansion House Committee, which, in 1884, purchased several thousand acres of land in the district of **Moosomin** in the Northwest Territories, 220 miles west of Winnipeg, the capital of Manitoba. About 30 families received grants of land, cattle, implements, etc., as well as sufficient food and other necessaries to last until the end of the third harvest. Before the termination of this period the settlers had become discouraged, and had all abandoned their farms. Most of the colonists migrated to Winnipeg. The colony had been under the management of Sir Alexander Galt, then Canadian High Commissioner in London, who acted as trustee for the Mansion House Committee. While the land at Moosomin was good for agricultural purposes and was well supplied with water and timber, it was twenty to twenty-five miles distant from the railroad; consequently, the colonists found it impossible to obtain a market for their produce.

In 1891 a Jewish colony was founded at **Oxbow,** in eastern Assiniboia, twenty-five miles east of Hirsch, the first settlers being a farmer named Pierce and his two sons. In 1900 there were at this place 14 Jewish families, including some from Winnipeg, and some of the original Hirsch colonists, who, in order to avoid the repayment of advances made to them, removed to Oxbow with the cattle and implements provided for them by the Jewish Colonization Association of Paris.

It was in consequence of the very large influx of Russian refugees into the Dominion, at the time of the second great migration, that Baron Maurice de Hirsch decided in 1892 to start an agricultural colonization movement among these people by placing some of them, selected as most suitable for the purpose, on farms in the Northwest Territories. The Young Men's Hebrew Benevolent Society of Montreal agreed to undertake this task; and, in consequence, the members of the Board of Trustees of that society were appointed trustees of the colonization fund, under the direction of the Jewish Colonization Association of Paris.

Colony Named after Baron Hirsch.

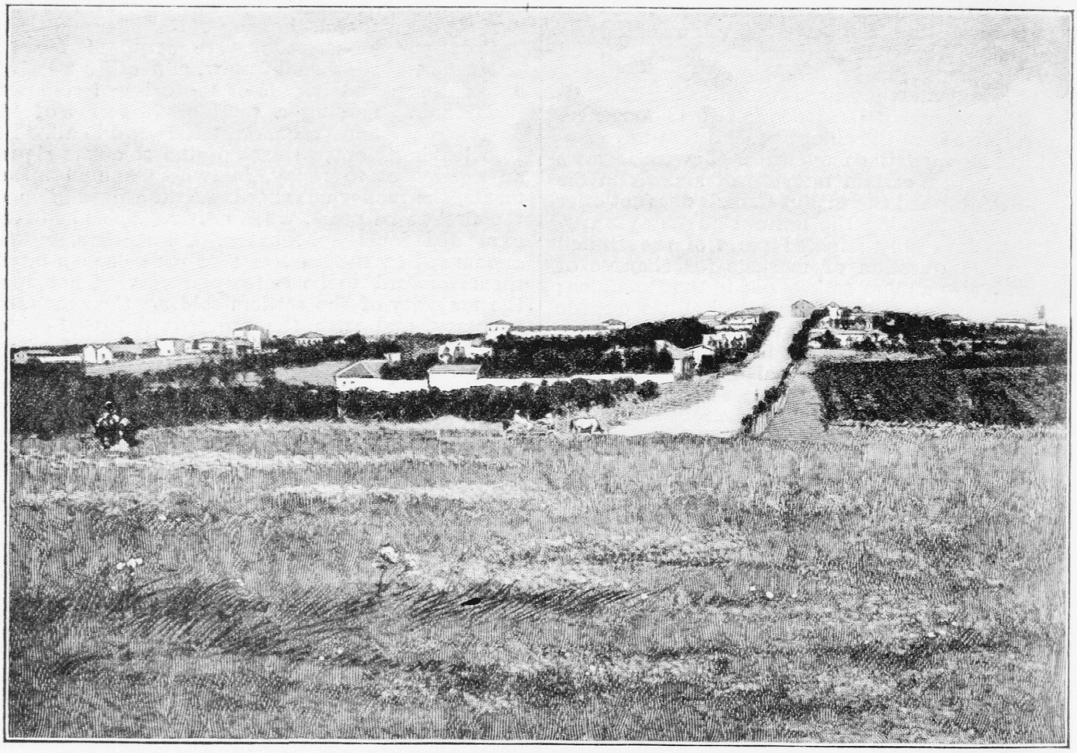
Careful investigations were made before the land for the colony of **Hirsch,** named after its founder, was finally selected. It lay in the extreme south of the district of Assiniboia, six miles from the Mouse River, and about twelve miles from the United States boundary line (102° W. long.; 49° 21′ N. lat.). The land was practically free, as it was obtained from the government upon payment of the homestead entries, which are repayable if the provisions of the Dominion Lands Act are complied with. At first, 49 families were sent to Hirsch and provided with houses, horses, cattle, implements, seed, and provisions for three years. It was soon found, however, that 24 additional homesteads were required for the sons, sons-in-law, and other relatives and friends of the original colonists, making a total of 73 farms of 160 acres each, or 11,680 acres in all. Before leaving Montreal each of the colonists signed an agreement to repay, in twelve annual instalments, the money advanced. At the expiration of the first three years, when nearly $50,000 had been expended for the benefit of the settlers, it was announced by the trustees that the colonists ought thenceforward to be self-supporting. Thereupon the majority of the settlers sold all their movable property, and with the proceeds departed—some going to Winnipeg, others to St. Paul, and a few even as far as San Francisco. In 1895, 5 families were brought from Red Deer to Hirsch; and in 1899, 3 families came from Winnipeg, and 5 from London. In 1900 there were 28 families at Hirsch—all doing well, especially those of the original settlers that remained. Two schools have been built, one of which was opened in 1899 and the other in 1900. A paid manager has now full charge of the colony, all responsibility being taken from the Montreal trustees. In this colony there is an abundant supply of water from wells throughout the year. The climate is healthful; and the soil is a clayey loam mixed locally with gravel or sand, having a rich vegetable mold as top-soil. It is fertile, and there is no barren land—buffalo-grass, which forms nutritious pasture, covering the uncultivated districts. The staple product of the district is wheat. Next to wheat, prairie-grass is the most important crop, on account of its usefulness in dairying and stock-raising.

Wapella and Red Deer Colonies.

Wapella, which is on the Canadian Pacific Railroad, in the eastern part of the district of Assiniboia, is on the site of a former settlement, and was formed in 1894 by 20 Jewish families. These colonists had means of their own and needed no outside assistance. However, they did apply for help to build a school, and funds were provided for that purpose; but before these could be sent, the settlers succeeded in raising sufficient money among themselves. The school was opened in 1898; and altogether the colony seems to be prospering. Wapella dates back to 1886, when Herman Landau, of London, sent John Hepner and four young Jews to Canada; forwarding, at the same time, $2,000 to the officials of the Canadian Pacific Railroad, to assist in locating them, and to provide the settlers with the necessary implements, cattle, tools, provisions, and seed.

Another settlement was formed in the **Red Deer** district by a few Russo-Jewish colonists, who were assisted by some benevolent people of Chicago; but after remaining upon their farms for a year, they found that they were unable to make a living, and petitioned the colonization committee at Montreal to remove them to Hirsch. Their request was granted; and in the autumn of 1895 they were given cattle and implements and placed upon some of the farms abandoned by the original colonists at Hirsch. In 1900 they were said to be thriving.

One of the mistakes that the Jewish farmers of Canada have made has been the purchase of expensive farming implements on the instalment plan. The rate of interest on deferred payments—often as high as 12 per cent per annum—causes them to run into debt, and they seldom succeed in extricating themselves. Mixed farming is generally advised; and where this system is adopted success usually follows. All the settlements are suited to this kind of farming, since they embrace good grazing-land, as well as good soil for both grain and root crops. Hay grows in abundance; and the land is not subject to early frosts. M. R.



General View of the Rishon le-Zion Colony, Palestine.
(From a photograph.)

AGRICULTURAL COLONIES IN PALESTINE: Since the dispersion of the Jews from their native land, many efforts have been made to induce them to return to Palestine and engage in agriculture. Probably the first of these to lead to any practical result occurred in the nineteenth century; though in the travels of Benjamin of Tudela, and of Petaḥyah of Ratisbon, there are records of small settlements of Jews in the Holy Land dating as far back as 1170. Three centuries later Meshullam ben Menahem Volterra, of Florence, while traveling through Palestine (1481), found sixty Jewish families in Gaza on farms, where they cultivated the vine and raised cereals (see his מכתב מסע, "Letter of Travels," ed. by M. Luncz, Jerusalem, 1882).

Early History.

When, at the close of the sixteenth century, Joseph Nasi, duke of Naxos, began to rebuild the city of Tiberias, "where only Jews were to dwell," he planted mulberry-trees to encourage the inhabitants in the breeding of silkworms. His contemporary, Moses ben Joseph of Trani, in his responsa (Venice, 1629, i. § 46), relates that the Jews of Palestine devoted themselves at that time to such agricultural pursuits as cultivating cotton, growing cereals, raising vegetables, planting mulberry-trees, breeding silkworms, and apiculture.

These records show merely that agriculture was pursued, perhaps intermittently, by Jews in Palestine for several centuries; but they do not point directly to the founding of Agricultural Colonies as such. For the establishment of these one must look to comparatively modern times.

Sir Moses Montefiore.

That Sir Moses Montefiore long cherished the idea of establishing Agricultural Colonies in the Holy Land is well known. On each of his seven visits there, he devoted much time and thought to the subject, particularly with reference to the problem of securing protection for the lives and property of any future colonists. Besides interviewing Boghuz Bey in 1838 ("Diaries," i. 199), on his second visit to Palestine, he held conferences with Israel Drucker (who had a farm at Djermek) and other landowners. On his fourth visit to the East, in 1854, he was received by the sultan and had an interview with the British Ambassador, Sir

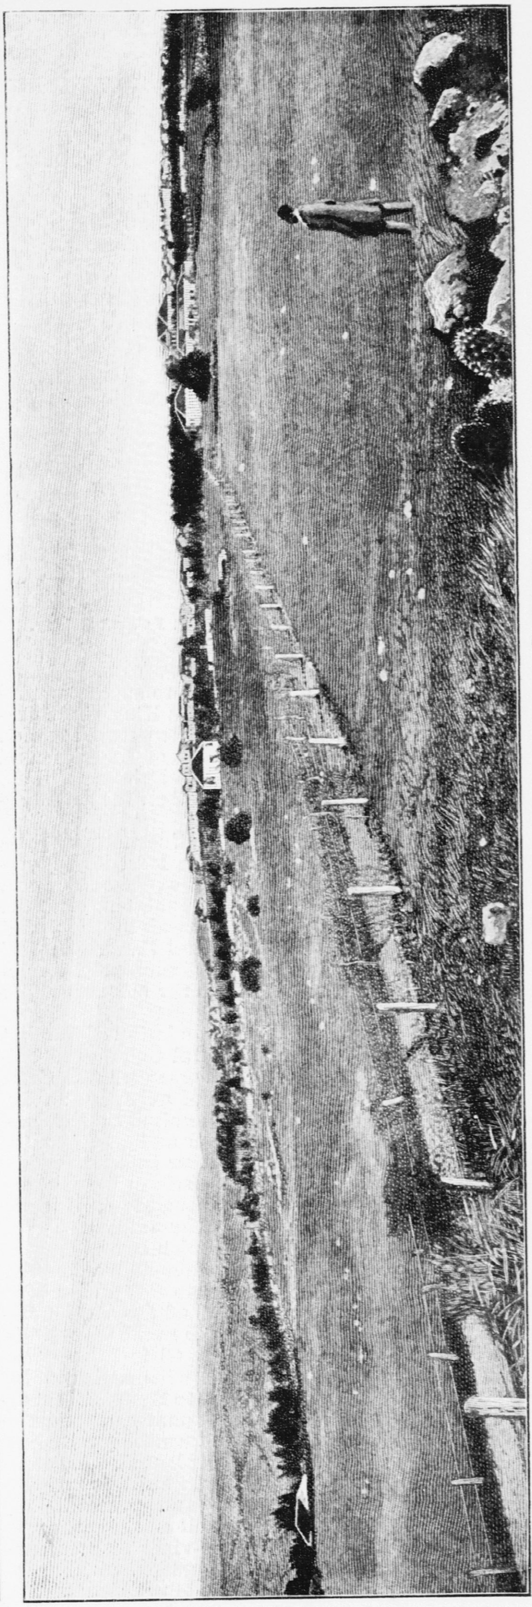
Stratford de Redcliffe, respecting the purchase of land in Palestine. After consulting with a committee, Sir Moses selected thirty-five families from Safed, and provided them with the means necessary to begin farming (*ib.* ii. 47). Previous to this, however, Colonel Gawler, an officer in the British army, had formed in London a colonization society for the same purpose (1845); but on account of the unsettled state of the country that followed the war between Turkey and Egypt (1839–40), the plans could not be realized.

About 1860, several orthodox rabbis, among whom were Hirsch Kalischer and Elijah Gutmacher, developed a plan for the colonization of Palestine with Russian and Rumanian Jews; and this plan was soon after supported by the MASKILIM (Progressists). The latter induced the ALLIANCE ISRAÉLITE UNIVERSELLE, of Paris, to interest themselves in the matter, notwithstanding the circumstance that many members of the Alliance doubted the adaptability of the Jews to agricultural work. This organization sent CHARLES NETTER as its representative to Palestine to investigate. On his return he advised the Alliance to make a beginning by establishing a school for the purpose of training in agriculture the Jewish children of Palestine and those of other Oriental countries. The Turkish government presented the Alliance with 250 hectares (617 acres) of land near Jaffa, on the road to Jerusalem; and in 1870 a farm-school was established, under the supervision of Charles Netter, at **Miḳweh Yisrael**. Here all branches of horticulture, especially viticulture, are taught after the most modern methods, and so successfully that the proceeds derived from the sale of the produce are sufficient to defray all expenses. Former pupils of the institution are employed as teachers of agriculture in several of the more recently founded colonies, while others have received employment in the adjacent Turkish provinces. The population of this colony in 1898 aggregated 225 persons, including 100 pupils in the school.

In 1878 the idea of the Jewish colonization of Palestine was again brought before the public by Laurence Oliphant and the Earl of Shaftesbury. This resulted in the purchase, by several Jews of Jerusalem, of 270 hectares (767 acres) of land from Selim Kassar, an Arab of Jaffa; and the colony of **Petaḥ Tiḳwah** was started. This colony forms a part of the village of Omlebish (*Mulebbis*), and is situated on the road to Nablus, near the river 'Aujeh, about six miles from the sea. Jaffa is only six or seven miles distant. The colonists that settled near the river suffered from malaria; and most of them were compelled to leave. In 1883 a part of their land was bought by a few immigrants from Bielostok, Russia. For these colonists the Russian Chovevei Zion Society ("Lovers of Zion") built eighteen houses on more healthful and higher ground; and the settlers, who began by raising cereals, soon turned to viticulture and the cultivation of fruit-trees.

Baron Edmond de Rothschild.

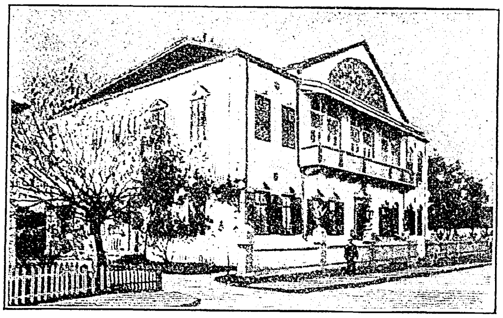
In 1887 Baron Edmond de Rothschild became interested in the colonies and bought some of the vacated land. He planted a number of eucalyptus trees around the marshes as a preventive of malaria. Emil Lachmann, of Berlin, another philanthropist, also bought a part of the land and planted a large orange grove and a number of grape-vines. Upon this tract there are now growing more than a million vines, besides a large number of orange-, lemon-, and other fruit-trees. Some of the colonists occupy themselves in growing wheat; others in the culture of silkworms. Another industry to which they give attention is floriculture. This



GENERAL VIEW OF ZIKRON YA'AḲOB COLONY, PALESTINE.
(From a photograph.)

began with the planting of the geranium, and led to the building, by Baron de Rothschild, of a perfume distillery. The total population of the settlement in 1898 was 802 persons.

The persecution of the Jews in Russia in 1881 did more than any other event to bring about the practical colonization of Palestine by Jews; certainly, it gave it the first impulse. At that time emigration began in earnest, and Russian-Jewish refugees migrated in masses. In nearly every Jewish center of Europe emigration committees were formed. The emigrants organized themselves into small communities, such as the 50 families from Kiev and Elizabethgrad and the "'Am 'Olam" (Perpetual People), who migrated to the United States of America, and founded colonies in Louisiana and Dakota; and the Biluits, who selected Palestine as their future dwelling-place.



Administration Building of the Zikron Ya'aḳob Colony.
(From a photograph.)

At first the colonization of Palestine met with little encouragement from the Alliance Israélite Universelle; and the communities that expected support from that body were greatly disappointed. But the strong faith and self-reliance evinced by those that did venture to Palestine convinced Baron Edmond de Rothschild of the possibility of successfully colonizing the country, and he took the colonies under his care.

First Russian-Jewish Colony in Palestine.

The year 1882 witnessed the foundation of the first of the Russian-Jewish Agricultural Colonies in Palestine. This community, which was called **Rishon le-Zion** (*Ajun-Kara*), consisted of only six Russian immigrants who established themselves on the road between Jaffa and Gaza, one hour and a half southeast from Jaffa and about one hour from the Mediterranean Sea, the site of the ancient En-hakkore (Judges, xv. 19). Soon after they had located themselves, Baron de Rothschild took them also in charge. The population of this colony, which covers an area of 618 hectares (1,545 acres), numbered 266 in 1890. Five years later it had increased to 450, and in 1898 to 531, exclusive of the members of the administration and of the day-laborers. The number of dwellings increased from 44 in 1890 to 62 in 1898. The chief products of the colony are wine and brandy, which are exported to Egypt, Constantinople, Russia, Germany, and to the United States. Over a million and a half of vines have been planted. An enormous cellar has been built, fitted with modern machinery and presses for the manufacture as well as the preservation of wine. Most of the grape-vines planted have been imported from America, and grafted with French varieties, the vines being thus made unsusceptible to the attacks of the phylloxera. The colony has produced as much as 15,000 hectoliters (396,300 gallons) of wine in a year, besides a quantity of good brandy. Over 20,000 mulberry-trees, used in silkworm culture, as well as a large number of fruit-trees, such as the almond, fig, pomegranate, apple, and citron, thrive in the settlement. Every family in the colony inhabits a stone dwelling, with a flower- and market-garden, and owns a horse and cart, together with at least one cow and some poultry. The indebtedness of each family to Baron Rothschild is being gradually liquidated. The colony supports a synagogue, a school, a public bath, a nursery garden, a library, a town hall, and a hospital. The internal affairs of the community are administered by an elective committee of settlers (Dalman in "Zeitschrift des Deutschen Palästina-Vereins," 1893, xvi. 194 *et seq.*; "Palästina," 1892–98; "Die Welt," 1897, No. 27; Luncz, "Luaḥ," 1896–1900; Leo Mozkin in "Die Welt," 1898, No. 36).

A party of ninety Russian-Jewish students, members of the Society Bilu, migrated to Palestine in 1882, and set to work as common laborers, hoping to save enough money to found a separate agricultural colony. They took for their motto the word ביל"ו (*Bilu*), which is an abbreviation made up of the initial letters of בית יעקב לכו ונלכה ("House of Jacob, come, let us go!"). These young men, some of whom were graduates of Russian universities, at first suffered many privations; but in 1884, through the efforts of Jehiel Michael Pinnes, together with a number of immigrants from Kharkov who purchased one-fifth of the land, they joined the **Ghederah** colony, which was started by the Chovevei Zion Society of Paris. Ghederah, named after the village of Katra, is situated about four miles southwest of Ekron, and covers an area of 330 hectares (815 acres). One-fourth of this is under wheat; and on the remainder about 200,000 grape-vines and different kinds of fruit-trees have been planted. The colonists have a synagogue, a school, and a pharmacy. In 1898 twenty families settled in the colony, and the total population amounted to 130 (Mozkin makes the number 69). This colony was supported by the Russian Chovevei Zion Society; but recently it has been taken under the protection of the Jewish Colonization Association of London.

Reuben Lehrer, of Kherson, bought, likewise in 1882, 135 hectares (336 acres), in Wâdi-el-Ḥanin, about two miles from Rishon le-Zion, and founded a colony called **Naḥalat Reuben,** by selling some of the land to Russian immigrants. In 1896 the settlement numbered 18 families, or about 100 individuals, and in 1898 had increased to 121 persons. It has a large orange-grove, 150,000 grape-vines, and many thousands of fruit-trees of various kinds. The founder, Reuben Lehrer, occupies himself with apiculture. In 1895 his 200 hives brought an income of 4,000 francs ($772). The colony received support from the Odessa Aid Society, and recently the Jewish Colonization Association of London granted it a loan of 100,000 francs ($19,300).

Zikron Ya'aḳob Colonies.

In 1882 some Jewish immigrants from Rumania founded the colony **Zikron Ya'aḳob** in Samaria. This is the largest and finest of all the colonies in Palestine. It lies about four miles east of the Mediterranean, and about ten miles from Haifa. The population is about 1,000 (200 families), and the tract occupied is about 1,454 hectares (3,635 acres). The colonists engage in various occupations, such as growing wheat, breeding silkworms, keeping bees, and raising vegetables. As evidence of the prosperity of the colony, reference must be made to the possession of a steam-plow, a steam-mill, an aqueduct, a large nursery-garden, paved streets, spacious wine-cellars, a library, a school, a synagogue, and a hospital. Further evidence of this is the establishment of the following branches: **Tantura,** the ancient **Dor,** now called **Aḥot Zikron Ya'aḳob,** situated four miles north, founded by Baron Edmond de Rothschild, with 20 families and some laborers who had worked in a glass factory which had to be given up, owing to the poor quality of the sand used; **Shefeya,** with 20 families; **Em el-Gammal (Umm al-Jimal),** with 4 families; and **Em el-Tut (Umm al-Tut).** According to the latest information, the **Zikron Ya'aḳob** colony, with its branches, has a population of about 2,000.

General View of Rehoboth Colony, Palestine.
(From a photograph.)

Rosh Pinah.

In the same year (1882) some immigrants from Rumania founded the colony **Rosh Pinah** (Jaunah). No Jewish settlement in Palestine is more picturesquely situated. It lies about four miles north of Safed, on the slope of a mountain, and commands a magnificent view of Mt. Hermon and Lake Huleh (Merom). It covered 640 hectares (1,581 acres), which, in 1896, supported a population of 400, in 70 families, or, according to W. Bambus, 80 families, or about 500 souls. In 1898 the population had decreased to 315. The settlement possesses 60 houses, a small park, all the necessary communal buildings, a silk-factory (affording employment to some fifty lads from Safed), about half a million grape-vines, and about 20,000 mulberry-trees.

Yesod ha-Ma'alah.

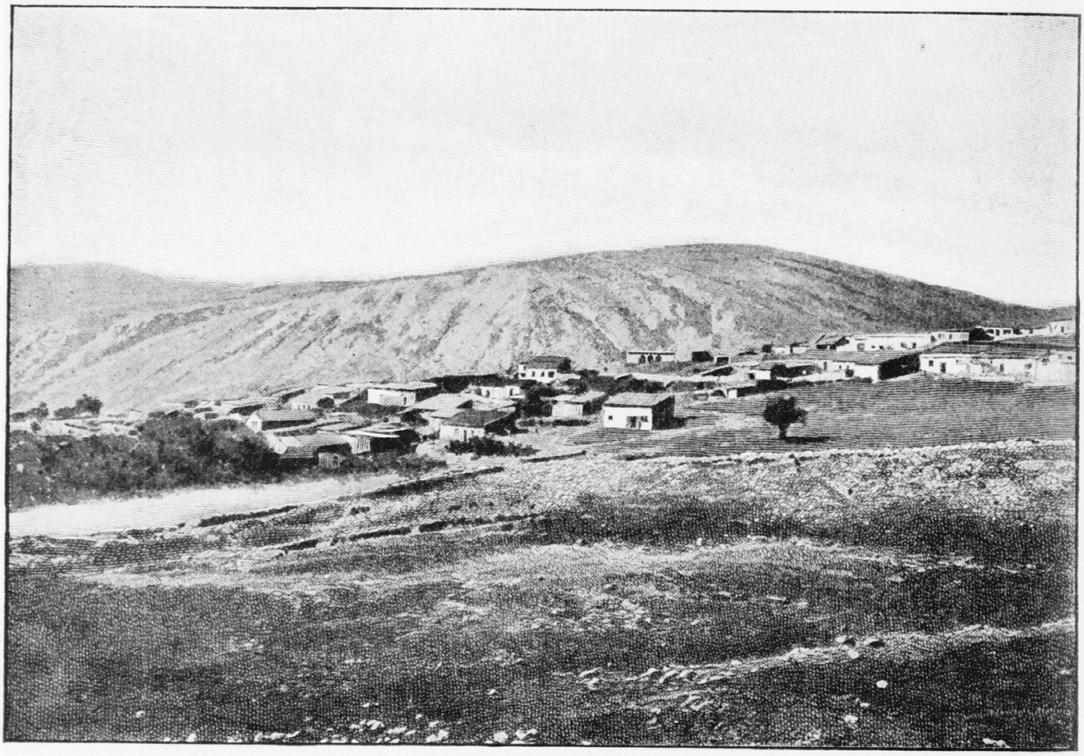
In 1883 immigrants from Russian Poland founded the colony **Yesod ha-Ma'alah** (Izbaid or Ḥurbat Zubad). They encountered difficulties, but many received aid from the Chovevei Zion of Russia and Baron de Rothschild. The settlement, located on the shores of Lake Huleh, occupied a tract of about 228 hectares (563 acres), and had a population of 100. Its irrigation facilities are unusual, receiving, as it does, an inexhaustible supply of water, by steam-power, from Lake Huleh. Large nursery-gardens and the cultivation of roses on an extensive scale constitute the chief industry of the colony. Attar of roses is made at a distillery erected by Baron de Rothschild. Some of the minor occupations, from which an additional income is derived, are fishing in Lake Huleh and cattle-breeding.

Mazkeret Bitya.

In 1884 the colony **Mazkeret Bitya (Ekron)** was started by Baron Edmond de Rothschild, with eleven families of Jewish agriculturists from Rozenoi, Russia, on the site of Ekron of the Bible, the Akir of to-day. This is situated southwest of Er-Ramle, near Jabneh (Jamnia). The colonists, numbering, in 1900, 150, in 30 families, possessed 372 hectares (919 acres). At first the settlers did good work; but in 1888 they were led by agitators to discontinue operations in the year of the Shemiṭṭah, and this inactivity retarded the development of the colony. In a short time, however, they realized their mistake, and by extra industry redeemed their lost time; so much so, that they were the first among the colonists to manage without the aid of Baron de Rothschild. A portion of the land is devoted to the culture of about 16,000 fruit-trees of various kinds; the remainder to the growing of cereals, the conditions being especially suitable for the production of excellent wheat, sesame, and barley.

Mishmar ha-Yarden and Beer-Tobiah.

In 1884 a private individual purchased a large tract of land near the Bridge of the Daughter of Jacob, which is built over the Jordan near Lake Huleh. On a part of this land (200 hectares = 494 acres) 20 laborers settled, who had to pay off their holdings in instalments. Their site was called **Gesher ha-Yarden** (“Bridge of the Jordan”). The other half of this tract was sold to a teacher and 25 laborers from Safed. These latter colonists have been supported by the societies Chovevei Zion and Ezra of Berlin, and were, in 1898, under the protection of the Jewish Colonization Association of London. The colony occupying the entire tract is now called **Mishmar ha-Yarden** (“Watch on the Jordan”). In 1898 it had a population of 93.



General View of Metullah Colony, Palestine.
(From a photograph.)

In 1888 Baron de Rothschild bought 640 hectares (1,580 acres) of land in Kastinje (El-Kastine) from some Bessarabian Jews, and founded the colony known as **Beer-Tobiah.** It is situated about eight miles from Ghederah, on the main road to Gaza. The federated Chovevei Zion societies bought the land from Baron de Rothschild in 1895, and established upon it 20 families that had been laboring in the other colonies. This colony has developed into a typical Palestinian-Jewish village. Industrially it is devoted solely to the growing of wheat; and it is in a prosperous condition. Its population in 1899 was 118.

Rehoboth.

A party of wealthy Russian Zionists, with Rabbi Samuel Mohilever of Bielostok at their head, purchased in 1890 an area of 630 hectares (1,556 acres) from a person at Jaffa, for the Warsaw Agricultural Society **(Menuḥah we-Naḥalah)** and founded the colony **Rehoboth** (Daran). It is situated four miles from Rishon le-Zion, and the same distance from Ramleh, a railroad station between Jaffa and Jerusalem. At first the Turkish government hindered the development of this colony by placing obstacles in its way; but in 1894, the friction between the authorities and the colonists having somewhat abated, Rehoboth began to thrive. In 1898 its population was 281, and its land holdings 955 hectares (2,387 acres). A fine vineyard, laid out by Jewish day-laborers, contains 250,000 vines (650,000 according to W. Bambus in “Palästina, Land und Leute,” p. 67); and there are a great number of almond, mulberry, and other trees. Some of the settlers grow cereals. The fact that each household has a garden, horses, cattle, and poultry indicates a farming spirit among these Jewish settlers. The Jewish Colonization Association granted this colony a loan of 125,000 francs ($25,000). Rehoboth provides a good school for its children. Instruction is given in the Hebrew tongue. Close to this colony the Berlin Ezra Society, in conjunction with the London Chovevei Zion Society, has founded a small colony consisting of six families of laborers.

Russian colonization societies, from Riga, Wilna, and Kovno, in 1883 purchased 2,600 hectares (6,500 acres) in **El-Chuderah,** south of ancient Cæsarea, above the mouth of the Nahr el-Mefdshir, which flows into the Wâdi el-Chuderah, where a colony was founded in 1891 in which there were 153 colonists in 1898.

In 1891 some speculators bought 430 hectares (1,075 acres) of land about two miles north of Safed, in **‘Ain Zeitun,** and sold it to a party of laborers.

Not having sufficient means to work the tract properly, the new owners transferred it to Baron de Rothschild, with whose beneficent aid 750,000 vines and many fruit-trees were planted in the course of six or seven years, and during this time a number of houses were built. The population in 1898 was 51.

Some Minor Colonies.

In the same year (1891) the little colony of **Mozah** was founded near Jerusalem. Three families settled on 59 hectares (147 acres) of land; and they are supported by the B'ne B'rith.

About the same time 5 families from Wilna settled west of Safed in **Shejur** near Kefr Anan.

In 1892 Baron de Rothschild purchased 11,700 hectares (29,250 acres) of land in Karife, in the vicinity of Shech Sad, in the old Trachonitis. He sold 970 hectares (2,425 acres) to the English Chovevei Zion Society. The railroad from Haifa to Damascus traverses the district.

In 1896 Baron de Rothschild founded the colony **Metullah,** which is situated at the foot of Mt. Hermon, not far from the ancient Dan (Laish), on the northern border of Palestine. The population of this colony in 1898 was 233, most of the male members of which were young men who had labored for several years in other colonies or were the children of colonists elsewhere. They cultivate wheat and tobacco.

A Jewish colonization society in Bulgaria, consisting of 50 members, bought 450 hectares (1,125 acres) of land from the English Mission, and founded the colony **Artuf,** or **Hartuf,** in 1896. Nine of the members came with their families, and formed a communistic society, working under the management of a superintendent elected by themselves. In 1898 they had not yet acquired title to their land.

In 1898 Leo Mozkin inspected the colonies on behalf of the Vienna Conference of Zionists, and his report showed a state of affairs not altogether satisfactory.

General Condition of the Colonies.

In 1898 there were in all the 25 colonies about 5,000 Jews. (According to the reports of L. Mozkin and others, there are in all Palestine about 4,500 Jewish colonists, occupying about 25,000 hectares—62,500 acres—of land.) Besides 300 families of day-laborers, there were 660 families of actual colonists, numbering 2,838 persons. Of these, 390 families, or 1,000 persons, were under the management of the Rothschild administration. In addition to the aid received from this source, various bodies support the colonists, more especially two organizations, viz., the Odessa Aid Society for Jewish Agriculturists and Artisans, and, in much larger measure, the Jewish Colonization Association. The following are the chief causes that retard the development of the Palestine colonies: (1) the dependence on charity, notably on that of Baron de Rothschild; (2) the lack of legal security of title; (3) want of publicity (see Leo Mozkin, in "Die Welt," 1898, Nos. 36-38).

Mahanaim.

In 1899 the colony **Mahanaim** was founded by the Galician Ahabat-Zion Society, with the aid of the Jewish Colonization Association and of the Ezra Society of Berlin. They began with 10 Galician and 6 native families, and have already received from the government permission to build houses and enlarge the colony generally. This now covers about 800 hectares (about 2,000 acres), at the foot of Mt. Hermon. It is reached from Port Haifa, via Acre, in twelve hours.

Change of Title.

At the end of 1899 those Agricultural Colonies in Palestine whose title lay in the name of Edmond de Rothschild passed over to the management of the Jewish Colonization Association of London.

AGRICULTURAL COLONIES IN RUSSIA: The idea of colonizing the Jews as agriculturists in Russia originated with the Polish historian Czacki and Nathan Nata (Notkin), who in turn inspired the poet Derzhavin, whom Emperor Paul sent to White Russia in 1799 to investigate the famine in that government and to take proper measures of relief. "To check the selfish occupations of the Jews," Derzhavin recommended that a special class of agriculturists be formed and transferred to the governments of Astrakhan and New Russia, hoping thus to relieve White Russia of a portion of its dense population.

First Suggestion.

On October 9, 1802, a special commission, the first of its kind in Russia, was organized by the benevolent Emperor Alexander I., to consider Derzhavin's recommendation and to draft a plan for improving the condition of the Jews. One Jewish delegate from each government of the Pale of Settlement was elected to confer with the representatives of the government. As a result of the two years' work of this commission an "Enactment concerning the Jews" was sanctioned by the czar, and promulgated December 9, 1804. It contained the following provisions: (1) The Jews of Russia were to be grouped into five classes, viz., agriculturists, manufacturers, artisans, merchants, and minor burgesses. (2) The agriculturists were permitted to buy and rent lands in all the western and southwestern provinces and to cultivate their farms themselves or with hired help. (3) For those without means the government pledged itself to provide 30,000 deciatines (1 deciatine = 2.70 acres) of land in the western and southern governments. (4) All Jews that wished to become colonists were required to submit certificates of their physical fitness for agricultural pursuits; and each family had to give proof of the possession of not less than 400 rubles with which to pay for the land, implements, and household necessaries for settlement. (See "Polny chronologicheski Sbornik zakonov i polozheni kasayushchikhsya yevreyev" (Complete Chronological Collection of Laws and Regulations Concerning the Jews), compiled by V. O. Levanda, pp. 53 *et seq.*, St. Petersburg, 1874.

First Colonies.

In 1806 many Jewish families from the governments Vitebsk and Mohilev on the Dnieper removed to southern Russia and founded the first seven agricultural colonies in the government of Kherson. They were named: Nahar-Ṭob, Har Shefer, Sede-Menuḥah, Bobrovy-Kut, Jefeh-Nahar, Jaazer, and Kamenka. These lands had previously been inspected by Nahum Finkenstein and Lieberman, who were commissioned to do so by the Jews of Vitebsk and Mohilev, with the consent of the minister of the interior (Nikitin, "Yevreiskiya Zemledelcheskiya Kolonii," 12).

The authorities in charge of colonization were directed to establish settlements in territories well adapted for agricultural purposes. The colonies were to be founded at certain distances from Christian settlements, and the Jewish colonists were denied the right to purchase land in Christian villages. Every occupation not in the line of agriculture was strictly prohibited. The colonial authorities were to lend the Jews all possible assistance and protection. Unfortunately for the settlers, the officials selected territories more adapted for cattle-breeding and agriculture on a large scale than for small farms; and those colonists who had settled on their own account were left almost without the necessary means to purchase implements and food. Exhausted by the long and weary journey, and unaccustomed to the climate of the sparsely settled South Russian steppes, many fell ill and died; while others sold their estates for next to nothing and returned to their old homes or left the country altogether. Only the poorest remained in the colonies; and these led a miserable existence, hoping in vain for the support promised by the government. Notwithstanding the drawbacks, 1,690 families had been settled in these colonies up to the year 1810. On April 6 of that year an edict was issued, discontinuing the transfer of Jews to New Russia, all the funds assigned by the government having been expended. In 1819 General Intzov, chief superintendent of South Russian colonies, inspected the Jewish settlements, and he reported on them so favorably that the question of continuing Jewish colonization was discussed at St. Petersburg. In 1823 a loan of 50,000 rubles was granted for colonization purposes, and this enabled 443 families to settle—partly in the old colonies and partly in new settlements. In the same year further emigration to New Russia was stopped by the government. Under the conscientious management of General Intzov, the economic condition of the colonies improved; but his strict administration and almost military discipline drove many of the colonists away. His plan of distributing the free farms—by which the colonists were grouped together, not by families, but to suit the convenience of the management—was detrimental to the development of the colonies.

Second Era.

The second period in the history of Jewish colonization in Russia begins with the edict concerning the Jews issued by Czar Nicholas I. on April 13, 1835. From this it was manifest that the czar intended to colonize New Russia with Jews, who were to be settled there in great numbers. Briefly the provisions of the edict were as follows: (1) Jews were permitted to join the peasant class in New Russia without being compelled to do so. (2) Forty candidates were entitled to the right of founding a colony. (3) Jews were granted the right to buy or rent lands from Christian owners or from the crown in territories where Jews were allowed to live. (4) Jews joining the peasant class were relieved from certain taxes and duties. (5) Jews colonizing fifty Jewish families on their estates were entitled to honorary citizenship, and those colonizing one hundred families were entitled to be raised to the nobility. (6) Colonists were granted the right to send their children to all public schools, gymnasiums, academies, and universities ("Russian Code," pp. 24–27, 104–117). Notwithstanding these privileges, the Jews, remembering the trials and sufferings encountered by the first colonists, showed but little enthusiasm for the scheme; and the czar, disappointed at the complete failure of his well-meant project, ordered a special commission, under the presidency of Count Kankrin, minister of finance, to investigate the matter. This commission attributed the failure to climatic reasons, and recommended the fertile territories of Siberia, with their healthful climate, as more suitable for colonization.

In 1836 the czar issued an order assigning 15,154 deciatines of land in the governments of Tobolsk and Omsk for colonization by Jews. This order had an unexpected and remarkable result. The enthusiasm of the Jews, rich and poor, learned and ignorant, knew no limits. Jewish scholars—I. B. Levinsohn, B. Mandelstamm, and others—supported the government plan by contributions to the press and by public speeches. Almost equal sympathy was shown by the Christian population of all classes.

The Siberian Proposal.

The first who sought to be colonized were 70 families, numbering 350 persons, from Mitau in Courland, who applied through their leaders, Meyer Mendelsohn and Elijah Mitauer, for permission to settle in the province of Ekaterinoslav. Numerous other applicants sent in similar requests for the provinces of Siberia, among them being 117 families from Courland, 200 from the estates of Prince Dolgorukov, and 427 from Mohilev. In all, 990 families forwarded applications to Count Bludov, minister of the interior. At the same time the minister received communications from many governors pointing out the impracticability of sending Jews to Siberia. Count Kankrin, however, remained firm in his conviction that Siberia was the most suitable country for Jewish colonization; and his plan was sanctioned by the czar, October 27, 1836 ("Vos." 1882, iii. 62). Kankrin proceeded with his arrangements, and in due course reported to the czar that all was ready for the expedition. To the intense disappointment of all concerned, the report was returned, January 5, 1837, with the following remark in the czar's handwriting, "The transfer of Jews to Siberia is to be stopped."

As soon as the new edict was issued Bludov gave orders to all governors and governor-generals of the Siberian provinces to seize the would-be colonists wherever they might be found and to send them, under proper convoy, to the government of Kherson. Shortly before the publication of the edict, 36 families had arrived at Omsk. With the permission of the authorities, they had migrated there on their own account. These were permitted to return to their former homes or to settle in New Russia.

Komarov was sent by Bludov to the government of Kherson to settle 738 families in the original nine colonies. But not until the year 1840 were the new colonists moved. There were then to be settled 346 families (1,552 persons) from Courland and 863 families (6,171 persons) from Lithuania and other northwestern provinces. The condition in which most of these colonists from Siberia and from the northwestern governments arrived at South Russia was pitiful. On the road many died, while others had to be placed in hospitals. The Courlanders—destined to be pioneers of colonization—were maltreated by the officials in charge during their voyage down the Dnieper, and were unable to begin work till the following year, as is shown in the report of Dr. Schindler to Prince Dalgorukov. Major Benkendorff, in a communication to Kisselev, declared in distinct terms that the czar's promises to the Jews of Courland, both written and verbal, had not been fulfilled. They found no houses, seeds, or agricultural implements. As soon as they had reached their destination the authorities of Kherson sent them to the old colonies. The result was that in a short time all the houses were overcrowded, and thousands had to camp in the open fields near the settlements.

Difficulties of Kherson Colonists.

In Yanovka, for instance, two thousand settlers had to remain without shelter; and the provisions soon gave out. This famine brought on all kinds of sickness and finally caused the people to revolt. The authorities took strong repressive measures, the number of overseers was considerably increased, and the disturbers of the peace were severely punished. Count Vorontzov, the governor-general of Kherson, decided to found four new colonies; and he did his best to improve the wretched conditions of the old settlements. In June, 1841, he founded four colonies which, according to the wishes of the settlers, were called Novy Breslavl (New Breslau), Lvov (Lem-

Statistics of Kherson Colonies.

berg), Romanov, and Novo Poltavka (New Poltavka), and settled there 700 families ("Vos." 1882, vol. 7). Kartzev's report of 1845 showed that there were 1,661 families (12,779 persons) in the Kherson colonies. Of these, 11,099 individuals were settled by the government; the rest, having paid for their farms, settled on their own account. From 1841 to 1845 the government expended 234,539 rubles in aiding Jewish colonists in Kherson.

The following table shows the condition of the fifteen colonies in the government of Kherson in 1845:

Name of Colony.	Families.		Houses.
	Settled.	Not yet Settled.	
Bobrovy-Kut	233	50	187
Efengar	111	15	159
Inguletz	151	14	130
Israelevka	91	20	82
Izluchista	70	9	60
Kamenka	85	30	60
Lvov (Lemberg)	119	...	119
Nagartov, Great	111	14	95
Nagartov, Little	37	3	31
Novy Breslavl	28	...	92
Novo Poltavka	150	...	150
Romanov	128	...	132
Saigadak	19	...	19
Seidemenuha, Great	229	25	204
Seidemenuha, Little	35	...	35
Total	1,597	180	1,555

In the fifteen colonies there were 5 synagogues, 12 houses of prayer, 6 town-halls, 7 warehouses, 7 bath-houses, 1 seed-warehouse, 8 windmills, 463 horses, 2,332 sheep, 3,322 oxen, 1,117 wagons, 289 plows, and 533 harrows. Of the colonists 3,308 were entered in the books as taxpayers.

The colonies had an income of 3,363 rubles per annum, besides rents from distilleries and restaurants kept by Jews who were not colonists. The local authorities of the fifteen Jewish villages named in the table were 11 mayors, 22 assessors, and 11 clerks. Religious affairs were administered by 12 rabbis, assisted by 30 *parnassim* ("directors") and 16 treasurers. The five synagogues were maintained at the expense of the communities. Most of the colonists originally belonged to the merchant class, 833 persons only being artisans. Only the tailors (359), shoemakers (144), and blacksmiths (11) found employment in the colonies; the others either sought employment or established themselves in surrounding towns. The death-rate of the colonies was very high. To every birth there were over twenty deaths. The poor results shown were due to the inexperience of the colonists, the corruption of the officials, and the absence of all instruction from more experienced colonists. This was practically confessed by the Russian officials in their reports to Czar Nicholas, who took a deep personal interest in the whole matter (see Kisselev's report, June, 1845). In 1846 the colonies were put under the management of the Ministry of Domains, a special Jewish fund, called *korobka* ("basket fund"), being set apart for the necessary expenditures.

As regards the colonies in Ekaterinoslav, a report made in 1847 by Baron Stempel, superintendent of the colonies, shows that the settlers on arriving in Ekaterinoslav generally found no provision made for them. They were not permitted to repair the dilapidated shanties which served for houses, and were not even allowed to seek shelter in the neighboring villages until spring, as Stempel had suggested. Those who did so were cruelly driven back by Cossacks. Epidemics of scurvy and smallpox occurred soon after ("Archives of Kherson-Bessarabia Board of Administration," report of Feb. 15, 1849, No. 116; see also Harold Frederic, "The New Exodus," pp. 78, 79, New York, 1892). After 1849, Jewish immigrants from northwestern Russia were directed chiefly to the government of Ekaterinoslav, where, up to 1856, fifteen colonies, sheltering 766 families, were founded. The Ekaterinoslav colonies were under the management of a director appointed by the Kherson-Bessarabia bureau of government domains, and were divided into four districts, with an overseer at the head of each. The colonists elected their own aldermen, all the other authorities being Christians. Hebrew schools (*ḥedarim*) were prohibited in the colonies.

Colonies at Ekaterinoslav.

The following table shows the condition of the Jewish colonies in the government of Ekaterinoslav in 1890:

Name of Colony.	Land in Deciatines.*	Families.	Hired Help.
Bogodarovka	1,050	278	4
Gorkaya	780	252	16
Grafskaya	910	181	3
Khlyebodarovka	570	81	1
Krasnoselka	1,260	319	3
Mezhirech	1,110	290	24
Nadezhnaya	1,230	351	12
Nechayevka	630	206	5
Novozlatopol	1,860	458	20
Priyutnaya	870	169	5
Roskoshnaya	780	178	..
Rovnopol	1,190	219	4
Sladkovodnaya	840	193	2
Trudolyubovka	960	292	11
Veselaya	810	244	7
Zatishye	1,600	233	..
Zelionoepole	1,170	370	4
Total	17,620	4,314	121

* 1 deciatine = 2.70 acres.

Of the hired help, 106 persons were Christians and 25 were Jews (K. Sluchevski, "Yevreiskiya Kolonii," in "Russki Vyestnik," iv. 206, 1890).

In 1856 Evzel (Joseph) Günzburg gave the government 10,000 rubles, the interest of which was to be applied in providing annual rewards for the best Jewish farmers; the recipients to be determined by the Minister of Domains ("Civil Code," vol. xxxi. No. 30, 672).

Contrast between 1851 and 1865.

After 1856 only four more colonies were founded; namely, two in the government of Kherson and two in that of Ekaterinoslav. Under a law enacted in 1866 Jewish colonization ceased entirely. The measure was adopted mainly for financial reasons, the basket fund no longer sufficing for both colonization and education. Besides this, New Russia was no longer in need of artificial colonization. The reports of V. A. Islavin, an official who visited the colonies in 1851 and again in 1865, enable a comparison of those years to be made. Instead of the 15 colonies in 1847 there were 37 in 1865—20 in Kherson and 17 in Ekaterinoslav; the 2,210 families in 1851, consisting of 14,780 persons, had increased in 1865 to 2,873 families, consisting of 32,943 persons; and instead of 85,563 deciatines of cultivated land in 1851, there were in 1865, 129,521 deciatines.

The following figures contrasting the condition of the colonies in 1851 and in 1865 will be of interest:

	KHERSON.		EKATERINOSLAV.	
	1851.	1865.	1851.	1865.
Public Buildings	59	98	2	98
Private Houses	1,507	2,023	269	922
Expert Farmers	188	269	58	295
Oxen	1,205	440	....	4
Horses	997	2,228	499	1,034
Cows and Calves	4,062	5,579	788	1,668
Sheep	1,393	4,291	....	1,230

In 1869 the Ministry of Domains instituted an inquiry respecting the Jewish settlers of the New Russian colonies, in order to ascertain how many of them really occupied themselves with agriculture and how many were indigent and worthless. As a result, in the course of ten years 10,359 men, women, and children were expelled from the class of agriculturists. In 1874 all reserve lands, which had been counted as part of the colonies, were taken away from them.

In the western governments the Jewish Agricultural Colonies were founded after the publication of the edict of 1835. There the Jews were permitted to settle on government as well as on private lands, and for founding colonies wealthy Jews were rewarded with the title of honorary citizens. In 1848, 158 families, comprising 946 persons, settled on government lands. Eleven years later (1859) the settling of Jews on such land in the western governments ceased entirely; and in 1864 they were deprived of the permission even to settle on private lands. In 1870 there were 34,475 Jews settled in the Agricultural Colonies in the western governments, distributed as shown in the following table:

Government.	Number of Settlements.	Number of Individuals.	Land in Deciatines.
Grodno	20	1,376	2,655
Kiev	32	7,980	2,719
Kovno	15	2,477	2,252
Minsk	25	3,923	3,577
Mohilev	77	2,250	8,413
Podolsk	14	9,411	8,470
Wilna	18	2,960	2,069
Vitebsk	5	824	749
Volhynia	10	3,274	2,947
Total	216	34,475	33,851

The above numbers have since considerably decreased.

STATE OF RUSSO-JEWISH AGRICULTURE.

Volhynia	13,916	408	304,948	319,272	5.8	14.9

*1 deciatine = 2.70 acres.

The preceding table, published in "Statisticheski Vremennik Rossiskoi Imperii" (Statistical Annals of the Russian Empire), 3d series, part 2, edited by V. Alenitzyn, St. Petersburg, 1884, shows the extent of land owned and leased by Jews in western and southwestern Russia in 1881.

These results were the more remarkable because it was exactly in this year 1881 that the colonies received the greatest check to their development by the riots, which actually reached the colonies of Kherson and Bessarabia and disturbed the sense of security in all the rest. Several of the best Jewish farmers in Bessarabia emigrated in that year to the United States and Palestine.

The MAY LAWS of 1882 (put into application in 1891) influenced the development of the Agricultural Colonies of Russia only indirectly. They put a stop to all immigration of the Jewish inhabitants of the towns into the villages, and indeed sent no less than 50,000 from the villages into the towns. By this means the development of agricultural tastes among the Russian Jews was effectively arrested.

Recent Progress.

But the Agricultural Colonies were particularly exempted from the operation of these enactments. In 1880 a fund to promote handicraft and agriculture among the Russian Jews was initiated, with a capital of 200,000 rubles, by S. Poliakov, Baron H. Günzburg, A. Sack, Leon Rosenthal, M. Friedland, and others. Seven years later (1887) the amount of this fund (1,110,271 rubles) was turned over to the general fund of the government treasury. In 1891 an agricultural school, affiliated with the Jewish Orphan Asylum, was opened at Odessa. In 1899 the government granted Baron H. Günzburg permission to found a Jewish agricultural colony on his estate in the district of Bendery, government of Bessarabia. The colony is called Rossianka, and covers 500 deciatines of land, of which 400 are under cultivation, each farmer being entitled to 20. The remaining 100 deciatines are reserved for a common pasture and for future enlargements of the farms. All the settlers, except soldiers that have served their time, must be graduates of some agricultural school; and all storekeepers must be Christians ("Aḥiasaf," 1899, p. 361).

In 1900, according to the latest reports, there were more than 100,000 Jewish agriculturists in Russia cultivating their own farms, 60,000 of whom are settled in 170 colonies. In South Russia, Jews in great numbers seek work on Christian estates and find ready employment there. In Siberia, especially in the district of Krasnoyarsk, there are numerous Jewish agriculturists who have established themselves on single farms; and, except as to their religion, they differ little from the general mass of the peasants.

Poland.

In Poland, according to the official statistics of 1887, Jews owned about 270,000 deciatines. In the government of Plotzk there are three settlements, Kukhari, Dzhikovich, and Rodolobovka, which were founded in the thirties by the local Jewish landowner, Solomon (Zelman) Posner, who enjoyed the protection of the vice-regent, Count Paskevich. These settlements are in a flourishing condition and are inhabited by 500 Jewish farmers. There are also some farmers scattered in the government of Radom. In Bessarabia many Jews cultivate the vine. There are nine colonies, mainly in the district of Soroki, with a population of 4,300 and an area of over 3,000 deciatines. In the same district there are about twenty villages entirely inhabited by Jews, who cultivate the vine, tobacco, and fruit ("Vos." April 20, 1900).

In the periodical "Kaspi" for April, 1895, a good description is given of the Vartashen settlement in the district of Nookha (government of Elisabethpol), which is wholly inhabited by Jewish tobacco-planters (350 families).

The following two tables have been compiled by the Odessa Society for the Aid of Jewish Agriculturists and Artisans in Syria and Palestine. No. I. shows that in 1896 nearly 97,000 Jews in Russia were engaged in agriculture. Besides these colonists who were grouped in settlements there were numerous single families occupied in agricultural pursuits, as shown in table No. II.

From numerous official reports of Benkendorff, Barons Hahn and Stempel, Kartzev and Islavin, up to 1886 (summarized in Nikitin), it is evident that the Jewish colonies in New Russia are in no way behind the Christian Russian villages in rational farming. If the colonies have not been as great a success as was anticipated, the fault lies rather with the method of foundation and the obstacles placed in the way by officials than with the Jewish colonists themselves.

H. R.

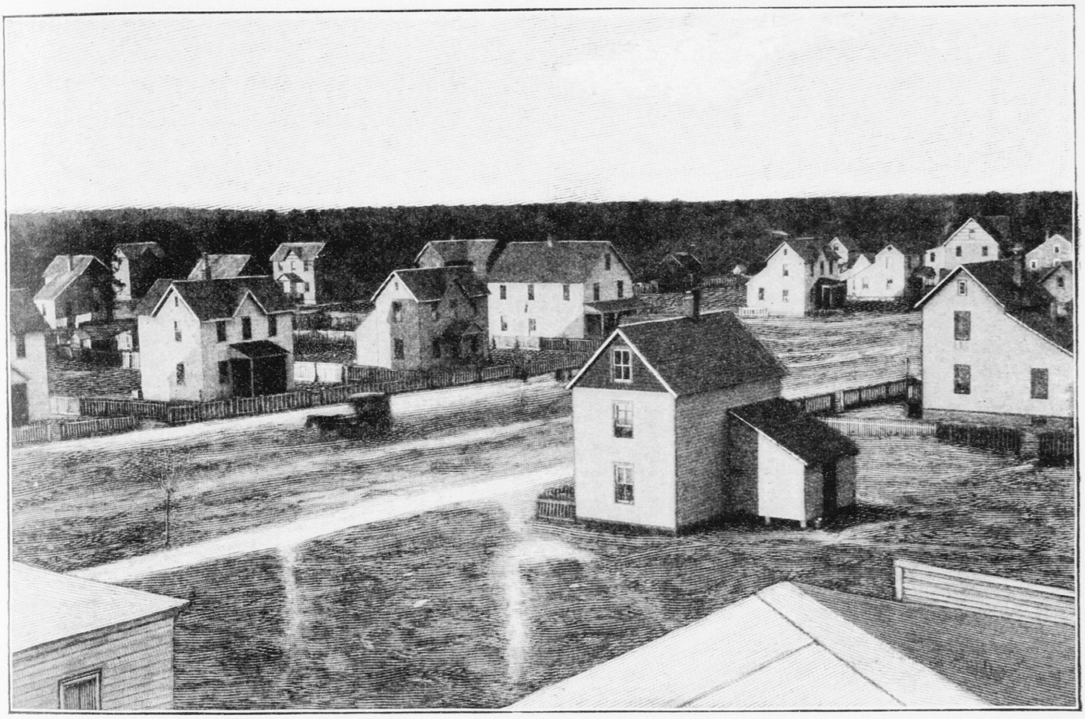
AGRICULTURAL COLONIES IN THE UNITED STATES: With the exception of the partly successful experiment by thirteen Jewish families in the state of New York in 1837 (see below), Jewish agriculture and Agricultural Colonies in America are not of earlier date than the great Russo-Jewish migration of 1881–82.

First Jewish Colony.

The first agricultural colony settled by Jews in the United States was founded at **Wawarsing,** Ulster county, New York, in 1837, and was named SHOLOM ("Peace"). It was founded by thirteen Jewish families—under the leadership of a certain Moses Cohen—who left New York city, where they had been living, to engage in agriculture on farms which they had purchased. For five years they tried to make farming pay, but were compelled to add to their earnings from the land by manufacturing on a small scale and by trading. Some of the original settlers moved out of the colony during this period, and other Jewish families joined; but finding it impossible to support themselves by farming, they sold their holdings and moved away (1842).

Louisiana.

The first agricultural colony of Russian Jews in the United States settled on **Sicily Island,** Catahoula parish, near Bayou Louis, Louisiana, in the eastern part of the state, not far from the Mississippi river. It comprised 35 families from Kiev and 25 families from Elizabethgrad, and had been partially organized in Russia. When the colonists arrived in America in October, 1881, they found that negotiations for the establishment of the colony in Louisiana had been completed by H. Rosenthal. A New York committee consisting of M. S. Isaacs, Dr. Julius Goldman, M. Ellinger, Charles L. Bernheim, and Henry S. Henry, acting as the representatives of the Alliance Israélite Universelle of Paris, France, advanced the colonists the sum of $2,800, nominally as a loan; and they possessed about $2,800 of their own. A tract of land, comprising about 5,000 acres, was purchased at $8 an acre. On their arrival at their future home, the colonists were lodged temporarily in three old houses that still stood on the property, which before the Civil War had been a plantation, and since then had remained uncultivated. Lumber (for the erection of small houses), horses, farm implements, cattle, poultry, etc., were forwarded to the settlement from New Orleans by a local committee of the Alliance, which, under the chairmanship of Julius Weiss, had taken charge of the affairs of the colony.



General View of Woodbine Colony, New Jersey.
(From a photograph.)

The colonists, who numbered 173, were divided into three groups, so as to work most effectively on the land that had been purchased in three tracts. The ground was tilled, and corn, cotton, and vegetables were planted. The colonists worked with energy, building fences and generally improving the land, when, early in the spring of 1882, the entire region was flooded owing to an overflow of the Mississippi river—houses, cattle, implements, and crops being all swept away, and an expenditure estimated at over $20,000 was rendered nugatory. Some of the colonists removed to San Antonio, Texas, and St. Louis, Mo., while others purchased isolated farms in Kansas and Missouri, where they are now successfully engaged in agriculture.

South Dakota.

In July, 1882, Herman Rosenthal, a Russian from Kiev, president of the Louisiana colony, headed a group of 20 Russian families, who settled on farms in the southeastern part of what is now South Dakota, and formed a colony which they called **Crémieux.** It was situated in Davison county, fourteen miles from Mt. Vernon, the nearest railroad station, and twenty-six miles from Mitchell, the county-seat. Most of the colonists had quarter-section farms of 160 acres each, while some of the farms covered as much as a square mile (640 acres). Among the settlers were several families that had joined the ill-fated settlement in Louisiana. The colonists at Crémieux had means of their own, and the first year met with a fair measure of success. Oats, wheat, rye, and barley were sown, and yielded good crops, while especial attention was paid to the raising of flax. In the second year wheat was more extensively cultivated; but the wheat-bug made its appearance, and a large part of the crop was destroyed. In addition to this, a prolonged period of drought caused the death of many cattle. In the third year thunderstorms were so destructive to the standing crops that the colonists were compelled to mortgage their farms; but the rate of interest demanded on loans was so high that most of the settlers sold out and moved away. A few remained a year or two longer; but excessive interest on their mortgages and a scarcity of water proved a combination too powerful for them, and in the latter part of 1885 they also left the settlement. The failure may likewise be attributed, in a measure, to the distance of the colony from the railroad and the county-seat.

Another attempt at Jewish colonization in South Dakota was made soon after, under the auspices of the Alliance Israélite Universelle. Twenty-five unmarried young men settled as farmers upon a tract of land near Crémieux at a place which they called **Bethlehem-Yehudah.** They carried on their work upon a communistic basis; but, notwithstanding outside support, the experiment proved unsuccessful. After a precarious existence of a year and a half, during which there were much strife and discontent in the community, the settlement was abandoned.

THE SCHOOLHOUSE, WOODBINE COLONY, NEW JERSEY.

(From a photograph.)

Colorado.

An attempt to establish a Jewish agricultural colony in Colorado met with no better success. On May 9, 1882, 12 families were sent to **Cotopaxi** in the state of Colorado, with means furnished by the Hebrew Emigrant Aid Society of New York. The colonists were settled on government land, 160 acres being allotted to each family; but of 1,780 acres 100 only were fit for cultivation. Water was scarce, except in the spring, when mountain floods endangered existence itself. During the first year of settlement there were in all 15 families at Cotopaxi, with a total of 64 persons. After many hardships the settlers were compelled to leave the colony, as they could not make a living from the soil, and had no other industries from which to derive an income.

Oregon.

In the summer of 1882 a Jewish agricultural colony of socialists was established in the southwestern portion of Oregon, near the California line, by a party of Jews from southwestern Russia, who called themselves "Sons of the Free," and named their settlement **New Odessa.** The colony was situated 265 miles from Portland, near the town of Glendale, on the California and Oregon Railroad. Originally there were 40 persons in this settlement, most of them unmarried, and many of them would-be social reformers. A grave mistake was made in the selection of the land, but one-fourth of it being capable of cultivation. Some of the settlers lost courage before the first harvest and went away. In March, 1884, 10 new settlers bought 760 acres for $4,800; of which about 100 acres were planted in oats, wheat, barley, and potatoes. A few of the colonists tried to support themselves by cutting ties and firewood for the railroad, but to little purpose. This colony, too, proved a failure, and was abandoned in 1888.

North Dakota.

An attempt was made to found a colony of Russo-Jewish farmers in what is now North Dakota. This colony, known as **Painted Woods,** was located, in 1882, near the town of Bismarck. Twenty families, each receiving 160 acres, made the initial experiment, which was largely due to the efforts of Rev. J. Wechsler of St. Paul, Minn., and his Jewish fellow citizens. In the course of a year the colony had increased to 54 families, representing some 200 individuals; but, owing to prairie fires and severe drought during the winter of 1884–85, their losses were so heavy that there was much distress among the colonists. Before this period of misfortune began the population of the colony consisted of 71 men and 52 women and nearly 90 children. By the spring of 1885 only 40 colonists were left. Funds had been sent during the winter to relieve their wants; and, later, a sum of about $5,000 was furnished to provide seeds, implements, horses, and cattle. In all, about $20,000 had been spent upon the colony by the beginning of 1886. In that year the crops failed, entailing much suffering during the ensuing winter. In 1887 the colonists, having met with no more success than their predecessors, were obliged to give up. It is said that a few Jewish farmers, survivors of this colony, are still to be found scattered through North Dakota.

On March 27, 1884, an agricultural colony was founded in Pratt county, in the southern part of Kansas, which was named after **Sir Moses Montefiore.** At first the prospects of this colony were promising; but it was soon found that the cultivation of the soil was beset with difficulties that had been underestimated. As the settlers were unfitted for the hard work entailed by farming in this region, they were compelled to sell the land and leave. Some of them settled at Alliance, in New Jersey, while most of them—in all, 17 families—were established, April, 1885, near **Lasker,** in Ford county, Kansas, by the Montefiore Agricultural Aid Society of New York. About nine square miles of land were purchased, and each family was given a farm of 160 acres. For some years the colony throve, but in the end was also unsuccessful.

Kansas.

Through the efforts of the Jewish community of Cincinnati another attempt at colonizing in Kansas had been made in 1882. This settlement, which was called **Beer-sheba,** was located in Hodgeman county. Here, again, prospects, apparently bright, were soon dimmed. Owing to disputes between the colonists and the managers of the settlement the latter sold all the animals and implements, thus subjecting the former to many hardships. In order to earn a livelihood the farmers sought employment in Dodge City, Garden City, and other places, where they worked at trades, while their families remained on the farms. They continued to struggle on, and in a few cases succeeded in making their farms moderately profitable; but as a colony the attempt was not a success.

A third agricultural colony, known as **Hebron,** was established in southern Kansas. This settlement comprised 80 families, one-half having private means, the other being aided by the Montefiore Agricultural Aid Society. Only a few families succeeded in making their farms pay, and, as a whole, the attempt was a failure.

In March, 1886, **Gilead,** in Comanche county, Kansas, was settled by 20 families, most of whom were Rumanian; while **Touro** was begun with 12 Russian families, and **Leeser,** in Finney county, with a still smaller number. What has been said of the other Jewish Agricultural Colonies of Kansas applies also to these. Each attempt was a struggle beset with hardships, rewarded by occasional success, and ending in complete failure.

In 1882 Lazarus Silberman, a banker of Chicago, settled 12 Russo-Jewish families on 300 acres of land in Michigan, lying on the shores of Carp lake, between Lake Michigan and Grand Traverse bay. After many difficulties with the settlers, who either would not or could not make any payments on the amounts advanced to them, Silberman abandoned the enterprise; and soon after the colonists disbanded. The failure was ascribed as much to lack of capital as to the fact that the colonists were not practical agriculturists.

Michigan.

In August, 1891, 16 families of Russian Jews settled in Huron county, Michigan, some three miles from the town of Bad Axe. They called their settlement **Palestine.** The land was wild but good. The colonists took it on five-year contracts, agreeing to pay $12 an acre for their holdings, each family contracting for 40 to 60 acres. This settlement, like most of the other attempts at Jewish colonization in the United States, was begun too hastily, and without sufficient means to tide the colonists over the unproductive period and to secure them against probable losses from drought, fire, and flood. They succeeded in erecting a few shanties and log houses, but these were insufficient for their needs; and they ran into debt for the few horses and cows that they were able to obtain. In the spring of 1892 the Beth-El Hebrew Relief Society of Detroit (a city one hundred and thirty-five miles southwest of the colony) sent food and tools to the colonists, and on their behalf applied to the Baron de Hirsch Fund, which, at this time and in subsequent years, gave them substantial help. In spite of this support the farmers have been unsuccessful. Four or five have given up their holdings, while the rest are still struggling on in the hope of eventually paying off their burden of debt. In October, 1897, there were 13 men, 11 women, and 39 children in the colony. In April, 1900, there were but 8 families, and these, too, would have left but for the frequent and substantial aid rendered by philanthropic organizations.

Virginia.

Among other Jewish Agricultural Colonies having only brief existence may be mentioned one established by 15 Jewish families in 1883 on land purchased with their own funds near the city of Washington, D. C. This colony they called **Washington,** and it, too, was doomed to failure. Through the efforts of some philanthropic Jewish residents of Baltimore 9 families were established in November, 1882, at a place called **Waterview,** on the Rappahannock river, in Virginia, but before 1886 this colony had disappeared. A dozen Jewish families were colonized in Middlesex county, Virginia, in 1882, but did not remain there long.

Among several other futile attempts at Jewish agricultural colonization between 1882 and 1892 was one in Calaveras county, California.

Connecticut.

Jewish agricultural colonization in Connecticut dates from the settlement of three Jewish families, in 1891, at New London and Norwich, by the United Hebrew Charities of New York city, with money provided for the purpose by the Baron de Hirsch Fund. The families were sent to work in mills, but by strict economy they succeeded in a few years in saving enough money to enable the heads of the families, who had been dairy-farmers in Russia, to buy cheap farms near Norwich. Not long after, in

1892, one Ḥayyim Pankin, a Russian Jew, aided by the Baron de Hirsch Fund, bought a farm near **Chesterfield.** He soon succeeded in inducing 28 other Jewish families to settle near the same place. They all engaged mainly in dairy-farming, as the soil was not rich enough to make market-gardening profitable, although each farmer raised his own fodder and the potatoes and other vegetables required for his family. The general method by which these farms were purchased was by the payment of one-third to one-half in cash, the balance remaining on mortgage at 5 or 6 per cent per annum. Later, the Baron de Hirsch Fund made loans on second mortgage to some of the farmers, to enable them to improve their holdings. The population of Chesterfield has been unstable. Of the 28 families that settled in August, 1892, only 15 remained in the autumn of 1894; but 18 others had come in the meantime, so that in the latter year the total number of Jewish farmers was 33. In 1897, through the good offices of the trustees of the Baron de Hirsch Fund, a steam creamery was erected and a synagogue was built. In size the farms range from 32 to 132 acres, the average being about 60; the price paid, including buildings, averages $15 an acre. While some of the original settlers who were unsuccessful left the colony, newcomers took their places, so that the population has not decreased.

The general statistics of Jewish Agricultural Colonies in Connecticut may be summarized as follows: In April, 1891, 2,376 acres of farm land were owned by 19 Hebrew immigrant families (compare "American Jewish Year Book," 1899–1900, pp. 281 and 283). These farms cost $20,800, of which sum $5,840 was paid in cash. The total Jewish farming population at that time was 143 persons. In January, 1892, the number of acres of woodland and pasture owned by Jewish farmers was 7,843, of which 1,420 acres were cleared. The purchase price of these lands was $89,600, of which $36,050 had been paid, the balance remaining on mortgage at 5 or 6 per cent. These farms were owned by 52 families, consisting of 491 persons. The farmers owned 229 head of cattle.

In December, 1899, there were 600 Jewish farmers in New England, mainly in Connecticut, with some scattered in Massachusetts. It was estimated that $1,100,000 had been invested by them in their holdings, $1,250,000 remaining on mortgage. The principal groups of settlements in Connecticut are at **Chesterfield, Colchester,** and **Montville,** with others near Norwich and New London.

New Jersey.

Of all the Jewish Agricultural Colonies in the United States the most important are those founded in New Jersey. With few exceptions they were all established in the southern part of the state, and include **Alliance, Rosenhayn, Carmel, Woodbine, Montefiore, May's Landing, Halberton, Malaga,** and **Hightstown.** Of these only the first four still (1900) remain. There were 300 Jewish farmers in New Jersey at the beginning of the movement in 1882, 200 in 1893, and only 76 at the end of 1896. Through aid extended by the Jewish Colonization Association of Paris in 1897, the colonists were given effective help, so that in 1900 it was estimated that there were 250 Jewish farmers in the state—most of whom were settled in the southern part. Of these probably not more than 100 families make a living exclusively by farming.

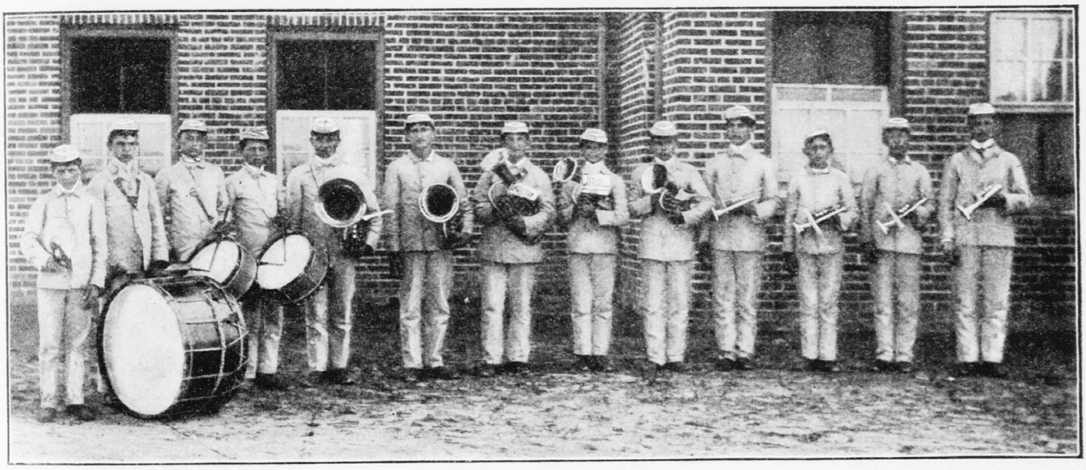
The colony of **Alliance** is situated in Salem county, New Jersey, about a mile north of Broadway—a station on the New Jersey Southern Railroad. It is about 43 miles southeast of Philadelphia, and 4 miles from Vineland, the nearest market-town. The colony was named after the Alliance Israélite Universelle, which provided funds for its foundation. Three large wooden buildings were erected to afford temporary shelter for the colonists, who were brought thither in May, 1882.

The soil is a light sandy loam covered with the bush and scrub-oak common in southern New Jersey. At the outset 25 families, principally from cities of southern Russia (Elizabethgrad, Odessa, Kiev, etc.), settled at Alliance, but this number soon increased to 67 families. The first winter was passed by the colonists crowded together in the three buildings mentioned, their needs being provided for in part by the Hebrew Emigrant Aid Society. The next year the land was divided into fifteen-acre farms; houses consisting of two rooms and a cellar were erected, wells sunk, and other improvements made. Contracts were entered into under which each farmer was to pay within ten years $350 for his holding, the house being reckoned at $150. The number of acres devoted to communal purposes, school-buildings, factories, burial-ground, etc., was 150.

Each family during the first year of settlement received $8 to $12 per month for 9 months, according to the number of its members, and $100 worth of seed for planting. Each farmer also received some furniture, cooking utensils, small farming implements, etc. The second year each family received $30 worth of seed, and about 50 families were also supplied with sewing-machines. One of the large buildings above referred to was converted into a cigar factory during the second winter; but, the hands being unskilled, wages were very low. This industry was discontinued the next year, and the colonists suffered very much in consequence. Owing to these hardships and discouragements, by the end of 1884, 17 farmers abandoned their holdings, which reduced the population to 50 families, comprising 250 persons. About this time a party of delegates from the Mansion House Fund of London, England (Samuel Montagu, Benjamin L. Cohen, and Dr. A. Asher), visited and investigated the condition of the colony, with the result that $10,000 was sent for its aid to the New York Hebrew Emigrant Aid Society, the Alliance Land Trust being formed by Henry S. Henry, Isaac Eppinger, Leopold Gershel, Leonard Lewisohn, S. Muhr, F. de Sola Mendes, and others. About $7,000 was devoted to the completion of the purchase of the land in behalf of the colonists generally, the remainder being used to buy horses, cows, implements, etc., for the more deserving among them. New contracts were made whereby one-half of the farm was to be given to the holder free of charge, provided the other half was paid for in equal instalments extending over thirty-three years.

Local Industries.

Among the local industries established at Alliance were a shirt factory and a tailors' shop, the employment from which materially aided the colonists during the winter months. In 1889 the population of the colony was 529, of whom 282 were males and 247 females. The farmers owned 1,400 acres of land, of which 889 were cultivated. There were 92 houses in the colony, a synagogue (dedicated July 29, 1888), a library, a post-office, and a night-school. Through the joint efforts of the Baron de Hirsch Fund and the Jewish Colonization Association of London, tailors' shops have been established, thus affording a local market for produce. The most recent statistics obtainable regarding Alliance show that there are (1900) 96 Jewish families, aggregating 512 persons, in and around the colony (including **Norma**). Of these, 33 families devote themselves entirely to farming, 15 entirely to tailoring, 12 combine farming and tailoring, and the remaining 36 not only till their farms but also follow some other craft, such as masonry, shoemaking, carpentry, etc. Over 1,500 acres of land are owned by these settlers, of which 530 are devoted to fruit, 577 to vegetables, and the remainder to fodder or pasture. There are 87 dwelling-houses, with 141 outbuildings. The capital invested in 1897 was $112,298, of which $68,033 had been repaid in cash. The balance remained due. The value of the yearly products of the soil was estimated at $17,808. The colonists then owned 55 horses, 79 cows, and 4,700 fowls. See also ALLIANCE, New Jersey.



THE BAND OF THE WOODBINE COLONY.
(From a photograph.)

Another Jewish agricultural colony in New Jersey is known as **Carmel,** and lies in Cumberland county, in the southern part of the state, midway between Bridgeton and Millville. The nearest railroad station to the colony is at Rosenhayn, about three miles to the north of Carmel. Seventeen Russo-Jewish farmers, aided by Michael Heilprin of New York, settled here in 1882, and called the place Carmel. A year or two after the settlement, 7 of the original immigrants, discouraged by the poor results, left the colony, but their places were soon filled by others who came from western Russia. In 1889 the colony contained 286 persons, of whom 150 were men and boys and 136 women and girls, living in 30 houses. Eighty-two of their children attended the public school. The farms comprised 864 acres, of which the Jewish colonists occupied 848 acres, although only 123 were under cultivation. Corn, rye, buckwheat, vegetables, and berries were the chief crops. During the winter the farmers supported themselves by tailoring. In the latter part of 1889, owing to a gift of $5,000 by Baron Maurice de Hirsch, 1,500 additional acres of land were purchased, and 36 new houses erected at an average cost of $800 each.

The condition of the colony at Carmel has been one of varying prosperity and depression. Outside aid, either by the establishment of local industries, by liberal loans on mortgage at a low rate of interest, or even by direct gifts, has from time to time been necessary to enable the colony to exist. Carmel contained, in 1900, 89 Jewish families, whose members aggregated 471 persons. The number of families engaged exclusively in farming is 19; 14 combine farming and tailoring, 13 are engaged in farming, 23 in trades other than tailoring, and 33 earn their living exclusively by tailoring. These families own 1,029 acres of land, of which 113 are devoted to fruit-growing, 504 to raising market produce, while the remaining land is devoted to pasture or fodder. Of the dwelling-houses, 46 are occupied, together with 86 barns and other outbuildings. The total value of these holdings is estimated at $84,574, on which there is an indebtedness of $26,273. The yearly produce of the soil was, in 1900, valued at $12,585; that actually sold brought $8,200, while the remainder was consumed by the producers. The settlers of Carmel own 36 horses, 114 cows, and 3,300 fowls. In the community several factories have been established—chiefly for the manufacture of clothing—and the employment they afford is a source from which many of the settlers derive their principal means of livelihood.

Rosenhayn, another colony in the same state, is situated in Cumberland county, on the New Jersey Southern Railroad. It was founded by the Hebrew Emigrant Aid Society of New York, 6 families having been sent to the northern part of Rosenhayn in 1883. In 1887 other Jewish families bought land near Rosenhayn, and, to pay for it, worked at tailoring in Philadelphia. In the following year 37 additional families settled in the neighborhood, where they were sold farm land on the condition that they should build houses and cultivate a certain part of their holdings within a specified time. This agreement imposed hardships on the colonists; for, in order to meet their payments, they had to work at tailoring. For some time they lived and toiled in a large wooden building opposite the Rosenhayn railway station. By the latter part of 1889 the Jewish settlers owned 1,912 acres at Rosenhayn, of which, however, only 261 acres were under cultivation—producing chiefly berries, corn, and grapes. There were 67 families, living in 23 houses, 6 of which were built by local Jewish carpenters. The population at that time amounted to 294, comprising 149 males and 145 females. Sixty of the children attended the public school. In this community there are 47 families, who derive a living wholly or in part from their farms, and who hold a total of 1,388 acres, of which 948 are under cultivation. They own 7,415 fruit-trees, 28,770 grape-vines, 128 horses and cows, and upward of 6,000 fowls. The value of their holdings is estimated at $85,520, upon which there is an indebtedness of

$26,986. Here, as at the other successful southern New Jersey Jewish colonies, there are factories, where a portion of the people earn most of their living expenses, thus furnishing a local market that pays a fair price for their products and enabling them to avoid the expensive freight rates and commissions attaching to the sale of produce elsewhere.

Woodbine, situated in the northern part of Cape May county, New Jersey, at the junction of the West Jersey and Seashore and the South Jersey railroads, is, at the present time (1901), the most successful of the Jewish colonies in America. It was established August 28, 1891, by the trustees of the Baron de Hirsch Fund, and since that time has been carried on under their supervision. The land, comprising about 5,300 acres, was purchased for $37,500. The farms are located around the town, which contains several factories, a synagogue, a church, two public schools, a number of stores, and about a hundred neat frame dwellings, sheltering a population of about 1,000 souls. In 1901 there were 52 families of Jewish farmers at Woodbine, representing a total of about 400 persons. Of the farms 49 contain 15 acres each; two, 10 acres each, and one, 30 acres. Of the total of 785 acres no less than 500 are under cultivation. The principal products are berries, small fruits, and garden truck, as well as dairy products. The aggregate value of the farms is about $50,000. Besides these farms, the Baron de Hirsch Agricultural School has farm land to the extent of 270 acres, of which 121 acres are under cultivation. The town affords a local market for farm products, and the townspeople find sufficient employment in the local factories. It has been found that this system of combining local industries and farming gives the very best results.

Various other attempts to establish Jewish Agricultural Colonies in New Jersey have failed. The colony at **Estelleville,** established in 1882, not far from Alliance, was abandoned in the spring of 1883. Another colony at **Montefiore,** near Belle Plain, a station on the West Jersey Railroad not far from Woodbine, was also abandoned soon after its foundation, leaving 28 houses and a factory standing. In 1891 a syndicate of New York Jews bought up several thousand acres of land for farming purposes about four miles from May's Landing, in Atlantic county, but the colony has been of slight importance. Emphasis should be placed upon the fact that only by the combination of farming and local factory employment have the Jewish colonies in southern New Jersey been able to survive. M. R.

AGRICULTURE.—Historical Aspects: Agriculture was the basis of the national life of the Israelites; state and Temple in Palestine were alike founded on it. At the outset the Hebrews are represented as a pastoral tribe. "A roaming Aramean was my father," said the Israelite when offering his first-fruits as a thanksgiving before the Lord (Deut. xxvi. 5, *Heb.*). The Patriarchs are mainly herdsmen, pasturing their sheep and cattle on commons, without generally cultivating the soil: at the same time Isaac "sowed in that land [Gerar], and received in the same year a hundred-fold" (Gen. xxvi. 12); and Joseph's dream of sheaves of corn in the field (Gen. xxxvii. 6, 7) seems to betoken familiarity with agricultural life. But Jacob and his sons enter Egypt as shepherds only (Gen. xlvii. 3): and this pastoral life was adhered to until even a later period by the tribes of Reuben, Gad, and by half of the tribe of Manasseh, inhabiting the trans-Jordanic plain (Num. xxxii. 1), and by the clans dwelling in the highlands of western Palestine (I Sam. xxv. 2). A certain dislike to agricultural life was, however, manifested among the sons of Rechab (Jer. xxxv. 7). The entire Mosaic legislation was conditioned upon Israel's possession of Canaan as the land promised to Abraham. The Sabbath had chief significance to a people that had passed the pastoral stage and that employed man and beast in agricultural labor (Ex. xxxiv. 21). Still more closely connected with agricultural life were the three festivals of the year (Ex. xxiii. 14-16). The system of public provision for the poor was based upon agricultural life: the Law claimed the gleanings of the harvest, of the vineyard, and of the olive-grove for the poor and the stranger (Lev. xix. 9, 10; Deut. xxiv. 19-21). The Sabbatical year of release—the produce of which was reserved for the poor, the stranger, and the cattle (Ex. xxiii. 11)—and the Jubilee year, with its restitution of the ancestral possessions (Lev. xxv. 28), were based upon an agricultural economy (see Agrarian Laws; Land Tenure; Sabbatical Year).

Israel Originally Pastoral.

The whole conception of God as the bountiful giver, as well as that of His retributive justice—dealing blessings to the observer of the Law, and sorrows or "curses" to the transgressor—is founded altogether upon the fact of Israel's agricultural enjoyment of Canaan (Ex. xxiii. 25; Lev. xxvi. 3-6, 10, 20, 26; Deut. viii. 7-10, xxviii. 3-5, 12, etc.). Canaan was totally dependent for its fertility upon the rain of heaven, which God would grant or withhold according as Israel was faithful or unfaithful (see Driver, "Commentary on Deut." pp. 129 *et seq.*). The impression which Palestine—with its brooks and fountains, its valleys and hills, its fields of wheat and barley, its plantations of vines and fig-trees and pomegranates—made upon the Israelites, unaccustomed as they were to Agriculture, is vividly portrayed in the episode of the spies (Num. xiii. 23 *et seq.*). It appears that when the magnificent fruit of the country was shown to the people, far from awakening a desire to take possession of the land that "flowed with milk and honey," it filled them with fear by reason of its very size, just as did the uncommonly tall men and strong cities that the spies had seen. Canaanite agricultural development presented to the Hebrew shepherd-tribes a superiority from which they shrank with a self-depreciating awe.

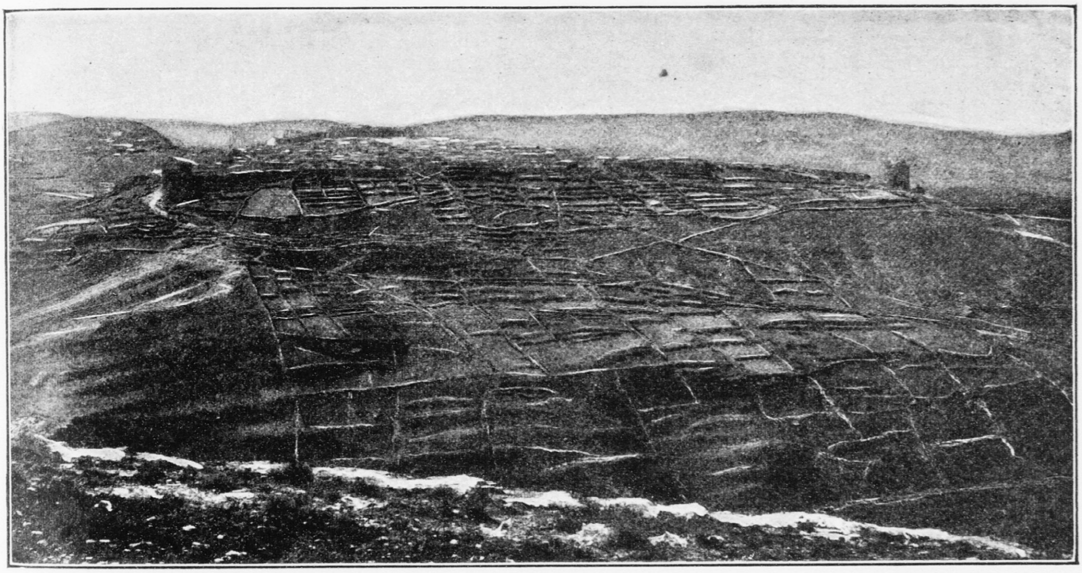
Direct Relations with God.

Centuries had to elapse before Judah and Israel could dwell safely "every man under his vine and under his fig-tree, from Dan even to Beer-sheba" (I Kings, iv. 25), and before the Hebrew farmer could feel that it was his God who instructed him how to plow and to sow and to cast in the wheat and the barley and the rye (Isa. xxviii. 26). The subjugated Canaanites no doubt were made to initiate their Israelitish conquerors into the practises of agricultural life. The land hitherto held to be watered and made fruitful by the Canaanite gods, Baal and Astarte, was conceived to be henceforth under the tutelage of the national deity of Israel, but the art of its cultivation had to be learned from its former owners, and here was a fruitful cause for the people's continual lapses into Canaanite idolatry. The unbridled joy of the harvest and the vintage filled the land with songs and dancing (Judges, ix. 27); and the "high places," as centers of idolatrous worship, continued to exert a baneful spell upon the farming population settled

Agriculture Learned from the Canaanites.

in the vicinity. This was in the main the contest between Baal and YHWH in the time of the early prophets; and Hosea (ii. 10) complained that Israel did not know that it was God, and not Baal, who gave the corn and wine and oil. Only when the name of Baal should no longer be mentioned (*ib.* 18) would the blessings of Agriculture have no admixture of loss and suffering. "Baal" remained the name for the fructifying rain down to the time of the Mishnah (see Sheb. ii. 9, and elsewhere; compare *bet Baal,* the expression for a field watered by rain; see below).

That the Israelites practised Agriculture with success is learned from the statement that Solomon sent to Hiram annually 40,000 kor (about 440,000 bushels) of wheat and barley and 40,000 baths (340,000 gallons) of oil (I Chron. ii. 9 [A. V. 10]). In Ezekiel's time Judah traded extensively with Tyre; sending thither wheat, honey, oil, and balm (Ezek. xxvii. 17). On the other hand, in the time of the Judges, the Midianites and Amalekites regularly destroyed the produce of the soil when the sowing-time had passed (Judges, vi. 2, 3); and in King Saul's time there was no smith found in the land to sharpen the plowshares, because the Philistines would not allow the Israelites to furnish themselves with weapons of war (I Sam. xiii. 19, 20). The great stride forward made during the reign of Solomon indicates that a very large class of the Canaanite population must have been subjugated to perform the main labor of farming for Israel.



Division of Fields in Modern Palestine.

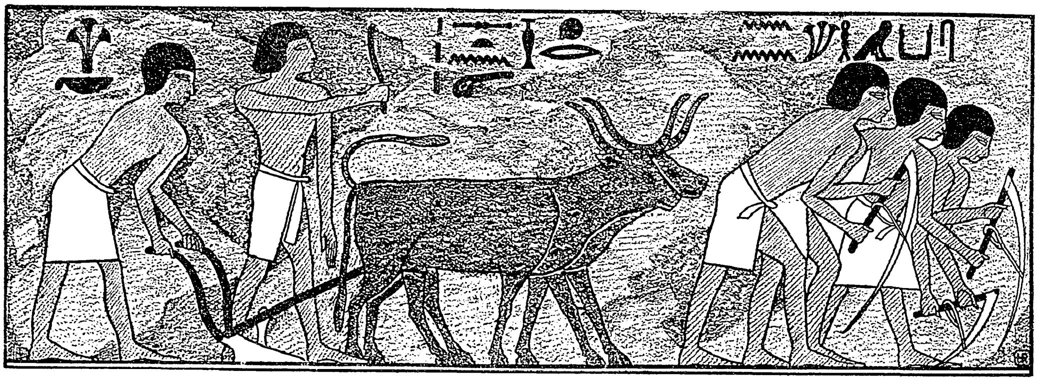
Estimation of Agriculture in the Bible.

The cultivation of the soil is described by the Bible as the destiny and duty of man from the beginning. Adam is placed in the Garden of Eden to dress it and keep it; and when expelled he is sent forth to till the ground (Gen. ii. 15, iii. 23; Ps. civ. 14). The millennium of peace will see a people given only to agricultural pursuits (Isa. ii. 4; Jer. xxxi. 11; Hosea, xiv. 7; Amos, ix. 13; Micah, iv. 4; Mal. iii. 11; Ps. lxxxi. 17 [A. V. 16]). The blessings of the Patriarchs and the Prophets were founded upon agricultural life (Gen. viii. 22, xxvii. 28; Deut. xxxiii. 13, 16, 28). Judges, prophets, and kings (Judges, vi. 11; I Kings, xix. 19; I Sam. xi. 5) are called from the plow to be leaders in Israel. King Uzziah is especially mentioned as a lover of husbandry (II Chron. xxvi. 10). If at times the cultivation of the soil was regarded as a curse (Gen. iii. 17, iv. 12), it was because the blessing of God was withdrawn from the soil for man's sin. If it was not always an easy task, all the greater was the joy of the harvest that rang through their psalms (Ps. lxv., lxxii.; Isa. xvi. 9, 10)—a joy which expressed itself in gratitude to God and in making the needy to be sharers in His gifts (Deut. xvi. 11–15, xxvi. 11). "He that tilleth his land shall have plenty of bread," says the Book of Proverbs (xii. 11, R. V.). "The king himself is served by the field" (Eccl. v. 8).

In Post-exilic Times.

The love for Agriculture became so ingrained in the Jew that he contemptuously gave the trader the name of "Canaanite" (Zech. xiv. 21; compare Hosea, xii. 8 [A. V. 7]). This attachment to the soil and its cultivation increased rather than diminished during the Babylonian Exile. "Houses and fields and vineyards shall be possessed again in this land"—this was the divine message sent to the people through the prophet Jeremiah before the catastrophe came upon the land (Jer. xxxii. 15). In fact, it was only because the land did not have its Sabbath years of rest, as the Law prescribed, that the people were delivered into the hands of the enemy, according to the warning of Lev. xxvi. 34, 43. Every prophetic vision of the future contained the promise of great agricultural prosperity for the exiled Jew (Amos, ix. 13 *et seq.*; Isa. xxxv. 1; Ezek. xxxiv. 26 *et seq.*). Not only those who wandered into Babylonian captivity, but those also who were left in Judea, became peaceful tillers of the soil (Jer. xxix. 5; II Kings, xxv. 12). The words of Neh. xiii. 15 give us an insight into the wine and fruit production of the Judean colony, which was considerable enough to induce the Tyrians to erect markets in Jerusalem, where the Jews exchanged their produce with them even on the sacred Sabbath.

We have an excellent description of the fertility of the soil by a non-Jewish observer, in the Letter of Aristeas (§§ 107–114), written in the second century B.C., and in Hecatæus, fragments of which are preserved by Diodorus, xl. 3, 7. Josephus (“Contra Apionem,” i. 22) says: “Unlike other cities which, having a large population, neglect agriculture, the inhabitants of the highland of Samaria and the neighborhood of Idumæa devote great labor to the cultivation of the soil. The land has large plantations of olive-trees, of wheat, barley, and other cereals, and an abundance of wine, dates, and other fruit. It is well adapted both for agriculture and commerce.” In the same work (i. 12) he says: “We neither inhabit a maritime country nor do we delight in merchandise; having a fruitful country for our habitation, we take pains in cultivating that only.” In his “B. J.” ii. 3, §§ 2–4, he describes Galilee as “exceedingly fertile, full of plantations of trees of all sorts, no part of it lying idle; its many villages full of people owing to the richness of the soil.” So Perea, “in spite of its rougher soil, is richly planted with fruit-trees, chiefly the olive, the vine, and the palm-tree.” “Still more fruitful are the hills and valleys of Samaria and Judea. Besides their abundance of trees, they are full of autumnal fruit, both such as grow wild and such as require cultivation.” Especially of the Ḥasidim or Essenes we are told by Philo (“On the Virtuous Being Free,” xii., and in the fragment preserved by Eusebius, “Præp. Ev.” viii. 10) that they devoted all their energy and skill to the cultivation of the soil as a truly peaceable pursuit of life. Indeed, it required no small share of self-sacrifice and piety to live as a farmer and observe the Mosaic laws concerning the tithes and other gifts claimed by priest and Levite, the altar and the poor, the Sabbatical year of release and similar precepts, while at the same time many a year’s produce was spoiled by locusts and drought or other irresistible cause. What such a calamity meant for the nation may be learned from the Book of Joel and from Megillat Ta‘anit. But, unlike the Israelites during the First Temple, the Jews of the second commonwealth conscientiously observed the seventh year of release (see Josephus, “Ant.” xii. 9, § 5; xiv. 10, § 5). Still the rural population (*‘am ha-areẓ*) was not as strict in these matters as the doctors of the law wished them to be, and they were consequently treated with suspicion. All the more rigorous were the Ḥasidim or Pharisees in their exclusivism. It is chiefly owing to this feature that we find agricultural life so extensively treated of in the Mishnah, the whole first section, Zera‘im (with the exception of the first treatise), being devoted to it.



Plowing and Hoeing.

(From Wilkinson, “Ancient Egyptians.”)

Love for Agriculture was assiduously inculcated by the Jewish sages. “Hate not toilsome occupation and husbandry appointed by the Most High” (Ecclus. [Sirach], vii. 15, *Greek*). In Vita Adæ et Evæ, 22, it is the archangel Michael who instructs Adam in paradise how to sow and to plant. In the Book of Jubilees, xi. Abraham is represented as the inventor of an improved method of plowing the field so as to protect the seeds against birds. In Ex. R. xxxix. we are told that the faithful observance of the agricultural seasons by the inhabitants of Palestine induced Abraham to make his stay there. In the Testaments of the Patriarchs it is Issachar, the model of Essene piety (compare Gen. R. xcviii. xcix.; Targ. Gen. xlix. 15), who says (Testament of Issachar, iii. 5): “I became a husbandman for my parents and brethren, and brought in the fruits of the field according to the season, and my father blessed me, for he saw that I walked in simplicity. . . . Keep therefore the Law of God, my children, and get simplicity. Bow down your back unto husbandry and labor in tillage of the ground in all manners of husbandry, offering gifts unto the Lord with thanksgiving, for with the first-fruit of the earth did the Lord bless me, even as He blessed all the saints from Abel even until now.” **In the East.** Accordingly, many prominent rabbis in Judea and in Babylonia were industrious cultivators of the soil, notwithstanding Ecclus. xxxviii. 25: “How can he get wisdom that holdeth a plow?” (compare Ber. 35*b*); many instances in the Talmud (Peah, ii. 6; Shab. 150*b*; Ḥul. 105*a*) illustrate this fact. Rabba’s pupils were exempted from attending his lectures in the months of Nisan and Tishri, as these sowing and harvest seasons required their presence in the field (Ber. 35*b*).

The Jews were probably the chief producers of wine and oil also in Syria and all the lands colonized by them, or otherwise the rabbinical prohibition of the wine and oil prepared by the heathen (Shab. 17*b*) could hardly have been adhered to. In Africa also the Jewish colonists produced wine, oil, and wheat, and the strange identification of the Egyptian god Serapis with Joseph made by both Jews (‘Ab. Zarah, 43*a*; Tos., ‘Ab. Zarah, v. [vi.] 1) and Christians (see “Vita Saturnini,” quoted by Mommsen, “Römische Geschichte,” v. 585, and King, “Gnostics,” p. 161) probably owes its origin to the fact that the wheat exported from Alexandria was shipped to the Serapeum in Ostia under the symbolic tutelage of Serapis, the god with a measure on his head, which suggested resemblance to Joseph, the seller of corn in ancient Egypt (Mommsen, *ibid.* v. 577; Suidas, *s.v.* "Serapis"). The Alexandrian Jews owned ships and were mariners themselves, undoubtedly owing to their living near the seashore and their being made exporters of corn by the Jewish farmers throughout Africa (see Grätz, "Gesch." i. 387, note 3). That the Jews of Alexandria were both farmers and shipowners we learn from Philo ("Contra Flaccum," viii.). But Herzfeld ("Handelsgeschichte des Jüdischen Alterthums," pp. 76–102) has shown that the Jews in Palestine, too, from the time of the Maccabees until the destruction of the state, exported, partly in their own ships, their produce of crops, oil, and wine, of balsam, honey, spices, and of drugs of all kinds, and that the Jews remained tillers of the soil in all parts of the Roman empire, while pursuing other trades as well, as may be learned from the fact that they bought slaves and converted them to Judaism until they were forbidden to do so by Constantius in 339 and by Theodosius in 393 ("Codex Theodos." xvi. 8, §§ 4, 9).

In Arabia the Jews of Yemen were in the time of Mohammed thrifty farmers. The Jewish colonists of Haibar especially were very successful in the cultivation of wheat and of palm-trees, before their wholesale slaughter by Mohammed.

The Jews of Abyssinia have always been farmers, and the Ten Tribes are described as agriculturists in the mythical story of Eldad ha-Dani.

In Western Europe.

The Jews of southern France pursued an agricultural life and were possessed of ships for their wine trade from the sixth to the ninth century (Cassel, article "Juden" in Ersch and Gruber, "Encyklopädie," xxvii. 61, 64; Grätz, "Gesch." v. 56, after Gregory of Tours. See also Stobbe, "Juden in Deutschland," p. 7). In Languedoc many were owners of the vineyards (J. Bédarride, "Les Juifs en France," p. 87; see Saige, "Les Juifs de Languedoc Antérieurement au XIVe Siècle, 1881," p. 70). In the time of Charlemagne, Jews used to farm large tracts of land for their Christian neighbors who had no experience in agricultural life, but the legislative measures of the king, intended to render the Jews as a merchant class more serviceable to the state, prohibited this (Bédarride, *l.c.*, p. 75). It was especially the wine trade which they controlled (Depping, "Die Juden im Mittelalter," p. 53).

In Spain, in the early Middle Ages, the Jews were the chief agriculturists, and remained such, notwithstanding Visigoth legislation prohibiting them from working in the field on Sunday, and buying slaves and the like (see Grätz, "Gesch. der Juden," v. 70, 168). Under Egica, in 694, they were forbidden to own land and carry trade in their own ships, but in 711 the Arabs, after the invasion under Al-Tarik, restored the rights of the Jews, and the latter were quick to learn from their Moorish neighbors how to improve the method of irrigating the soil by hydraulic machines and the like (see Bédarride, *l.c.*, p. 94 and note 24 on p. 463). The great silk industry of the Spanish Jews (see Grätz, "Gesch. der Juden," v. 396 *et seq.*) makes it probable that they had also plantations of mulberry-trees, or perhaps the Sicilian Jews provided them with the raw material.

In Portugal the Jews were always allowed to cultivate the land and produce wine, while they were forbidden to do so in Spain under Christian rulers (see Kayserling, "Gesch. d. Juden in Portugal," p. 58).

In Greece the Jews during the twelfth century, says Hertzberg in his "Gesch. Griechenlands," were most prosperous as agriculturists. Benjamin of Tudela found Jews inhabiting the vicinity of Mount Parnassus occupied in tilling the soil ("Travels," ed. Asher, p. 16). In Italy the Jews were encouraged by Pope Gregory V. to be owners of land, though he would not countenance their having Christian slaves (Güdemann, "Gesch. d. Jüd. Cultur in Italien," p. 30). The Jews, first of Greece, then of Italy, devoted particular care to the culture of silk, which involved the plantation of mulberry-trees, and helped toward the improvement of land and commerce (see Grätz, "Gesch." v. 272, note 4; and Güdemann, "Gesch. d. Jüd. Cultur in Italien," p. 240).

In his "Gesch. d. Jüd. Cultur in Italien," p. 52, Güdemann calls attention to the warnings of the work Pirke Rabbi Eliezer against the wandering life of the trader, wherein occurs this sentence, A. ii.: "God particularly promised fertility of the land to the Israelites in order that they might lead a contented and quiet domestic life, and not be required to travel about from town to town."

In Central and Eastern Europe.

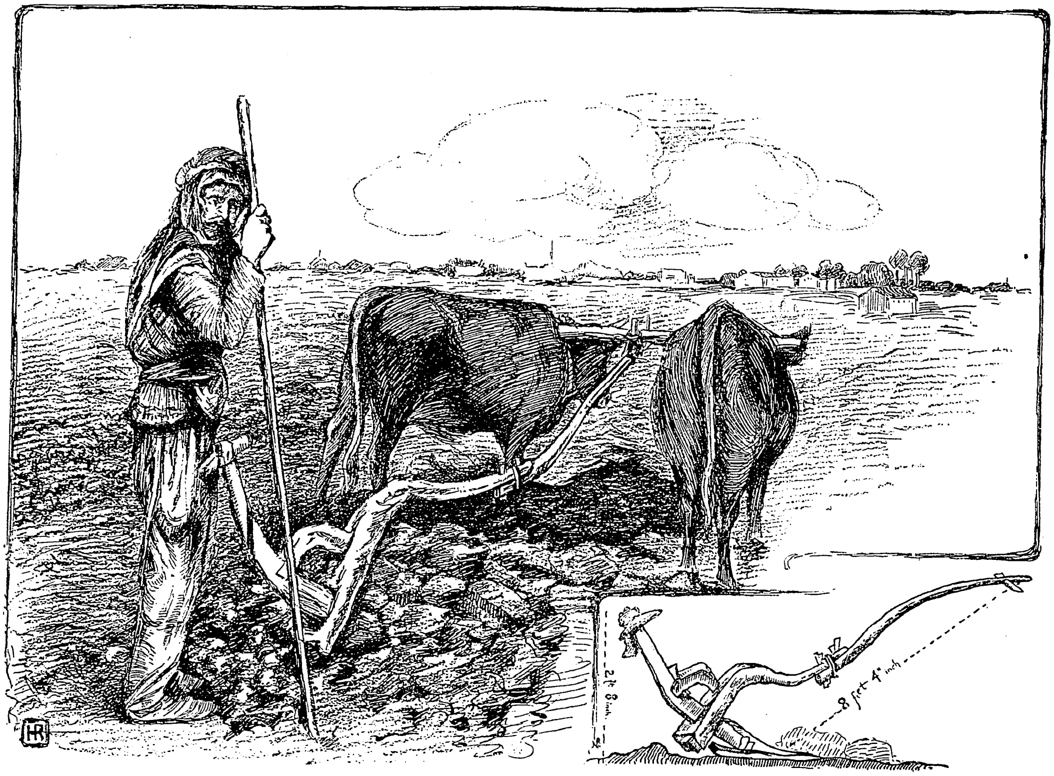
In Germany the Jews, being compelled by the Jewish law, which forbids the use of non-Jewish wine, to manufacture their own, produced sufficient to sell some of their own wine to non-Jews also. A decree of Henry IV. permitted the Jews to sell their own wine and drugs—revoking thereby one of Charlemagne forbidding the sale of the same (see Stobbe, "Gesch. d. Juden in Deutschland," p. 231, note 90). Henry IV. also permitted the Jews of Speyer to own vineyards and gardens, which fact makes it probable that they superintended the work themselves. The Jews of Silesia, Austria, Switzerland, and Frankfort-on-the-Main likewise possessed vineyards (see the quotation in Stobbe, "Gesch. d. Juden in Deutschland," pp. 177, 276, note 171).

In modern Europe the Jews—partly under the impulse of the governments, partly of their own free will—have endeavored to reawaken their ancient love for agricultural pursuits. The Jewish communities of Warsaw and Kalish in 1842, in response to a memorandum by Prince Paskyevitch, organized societies for the promotion of Agriculture with apparently great success, for the time (see Jost, "Neuere Gesch." ii. 293–313; Cassel, article "Juden," in Ersch and Gruber, p. 139). Still greater was the success of such efforts made in Bavaria (Scheidler, "Juden Emancipation," in Ersch and Gruber, p. 307, note 5, where reference is made to statistics showing that more than 20 per cent of the Jewish population of Bavaria were devoting themselves in 1844 to agricultural and artisan pursuits).

Among the Jews in the Caucasus many were formerly large owners of orchards and vineyards; some produced wine, others a species of tobacco (Andree, "Zur Volkskunde der Juden," p. 281). According to J. J. Benjamin ("Eight Years in Asia and Africa," 2d ed., 1858, pp. 96 *et seq.*), the more prosperous Jews in Kurdistan are farmers; they go with their wives and children to the fields and the vineyards in the morning, and return only in the evening. They literally observe the law of leaving the corners of the field and some of the grapes for the widows and orphans (Lev. xix. 9, 10).

In America.

On the virgin soil of America the Jews were among the pioneers of Agriculture. While Louis de Torres introduced tobacco into use for civilized mankind (Kayserling, "Columbus," p. 95), Jews transplanted the sugar-cane from Madeira to Brazil in 1548 (according to Fishell; see M. J. Kohler, "Publ. Am. Jew. Hist. Soc." ii. 94) or in 1531 (Lindo, in G. A. Kohut's article, *ibid.* iii. 135; compare Joseph ha-Kohen, in R. Gottheil's translation, *ibid.* ii. 133). During the seventeenth century the sugar industry was monopolized by the Jews, and with their expulsion from Brazil it was transplanted to the West Indies, where, in 1663, David de Mercato's invention of new sugar-mills benefited the sugar-trade in Barbados. The Jews in Georgia, chief among them Abraham de Lyon, transplanted vine and silk culture from Portugal to America ("Publ. Am. Jew. Hist. Soc." i. 10). But while De Lyon cherished great expectations in that direction, the Jews of Georgia in general found the production of indigo, rice, corn, tobacco, and cotton more profitable (*ibid.* p. 12). In fact, the cotton-plantations in many parts of the South were wholly in the hands of the Jews, and as a consequence slavery found its advocates among them. K.



Plowing in Palestine.
(After Benzinger, "Hebräische Archäologie.")

In Rabbinical Literature.

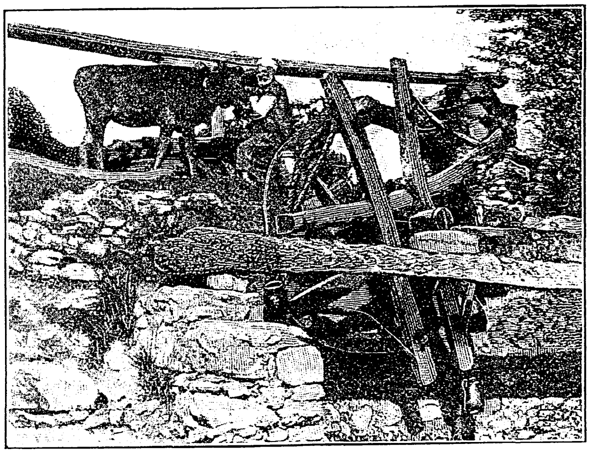
The following pithy sentences, culled from rabbinical literature, will serve to show the estimation in which Agriculture was held in the latter days of Jewish national life: "In time to come all handicraftsmen will turn to the working of the soil: for the soil is the surest source of sustenance to those that work it; and such occupation brings with it, moreover, health of body and ease of mind" (Yeb. 63*a*). "He that owns no land is no man" (*ib.*). "The verse, Deut. xxviii. 66, is to be thus expounded: 'Thy life shall hang in doubt before thee': this refers to him that buys his food-supplies from year to year; 'thou shalt fear day and night': this refers to him that buys them from week to week; 'thou shalt have none assurance of thy life': this refers to him that depends upon the store-keeper" (Men. 103*b*; Yer. Shab. viii. 11*a*; Yer. Shek. viii. 51*a*; Esther R., introduction). "He that toils and strives after money, the while he has no land of his own, what enjoyment hath he from all his travail?" (Lev. R. xxii.). "Although trading gives greater profits, these may all be lost in a moment; therefore, never hesitate to buy land." "Sow, but do not buy grain, even though grain be cheap and thy land be poor" (Yeb. 63*a*). "A man may not sell his field and put the money in his purse, or buy a beast, or furniture, or a house, except he be a poor man" (Sifra, Behar, 5). "When a man sold a field out of his patrimony, his relatives would bring barrels filled with cabbage-stalks and nut-shells and break them before him; the children would gather up the contents and shout, 'N. N. has cut himself off from his inheritance!'; and when he took it back again they did the same, shouting, 'N. N. has got back his patrimony'" (Yer. Ket. ii. 26*d*). "He that hath a little garden of his own, and fertilizes it, digs it, and enjoys its produce, is far better off than he that works a large garden upon shares" (Lev. R. iii.). "Hast thou a field? work it with all thy might: if a man make himself a slave unto his field, he will be satisfied with bread" (Sanh. 58*b*). "He that inspects his field every day will find a stater [Greek coin] in it" (Hul. 105*a*). In Eccl. R. ii. 20, a story is told of a very old man who labored early and late at planting trees, though, as the emperor Hadrian taunted him, he could not expect to enjoy their fruit: the moral of the interesting narrative being that every man is bound to till the ground, even though he may not expect to reap the fruit of his labor; for when he came into the world, he found that other men had subdued and cultivated it for him: therefore shall he not allow his portion to run wild or lie barren; for there are others that shall come after him.

F. de S. M.

—**Physical Aspects:** The various Physical Aspects of Agriculture among the Jews may properly be treated in their natural order of consideration: first as to the soil and climate; next as to the operations necessary to produce and secure crops.

Soil Conditions.

The soil of Palestine is of a most varied character and composition, consisting of alluvial deposits in the maritime plains and in the Jordan valley, and of the products of cretaceous limestone and basaltic rocks in the more elevated regions. The natural fertility of the former districts was carried into mountain regions by building low walls of "shoulder-stones" (Mishnah Sheb. iii. 9), and filling in the rock-ledges behind them with the inexhaustible alluvial earth of the valleys (*ib.* iii. 8). In this manner the mountainous districts of Samaria, Gilboa, Carmel, and other ranges were celebrated in ancient times for their fertility. But such artificial arrangements needed constant attention to keep them in condition and to protect them against heavy rains (see Anderlind, in "Zeit. Deutsch. Paläst. Ver." ix. 37); so that warfare and the subsequent depopulation have considerably diminished the productiveness of such regions. The lofty plain between Lake Gennesaret on the west and the Hauran range on the east, with its underlying volcanic substratum, proved a most fertile soil for wheat, as many as two and three crops a year being gathered. The most fertile fields, however, were liable to be more or less thickly strewn with boulders (Matt. xiii. 5 and parallels; Mishnah Kil. ii. 10, vii. 1), the Mishnah mentioning that occasionally these were too large for a man's unaided strength to remove (Sheb. iii. 7). The easiest and best use that could be made of the troublesome smaller stones which abounded in rich, rocky soil was to lay them up in fence-rows, as protection against roaming cattle: such stone-rows were numerous in the extreme—if one may judge from the fields of to-day (see illustration on p. 263). In some regions stones were so abundant that they had to be removed after each annual plowing (see Vogelstein, "Die Landwirtschaft in Palästina," p. 10, note 14).



Water-wheel in Palestine.
(From a photograph by Bonfils.)

In Mishnaic times various kinds of soil were distinguished and classified, such as *'idit*, soil of first quality; *benonit*, medium; and *zibburit*, poor soil (Giṭ. v. 1); also according to degree of moisture, "dry," "middling," and "arable" (Baraita, Ta'anit, 25*b*). Stones were held to show the fertility of the soil: if they were hard and flint-like (*ẓunama*), the soil was good; if of clayey consistency (*ḥarsit*), it was likely to be poor, forming hard clods and baking in the sun (Num. R. xvi.; Tan. Shelaḥ Leka, 12). Land which naturally produced thorn-bushes was good for wheat: if it grew weeds, it was fit for barley only (Yalḳut, Job, § 918; compare Jer. xii. 13). A soil which had produced a crop of flax was held to be excellent for wheat; and land was sometimes tested by sowing a small piece in flax (Kil. ii. 7). A southern exposure was found to be beneficial; but such land required irrigation (Josh. xv. 19, Men. 85*a*).

Climate.

In contrast with Egyptian agriculture (which depended solely upon the river Nile), in Canaan the "first rains and the latter rains" became necessarily matters of especial importance and significant blessing (Lev. xxvi. 3-5; Deut. xi. 13, 14). The first (autumn) rains began in the middle of November (Ḥeshwan, or Kislew) and were called *yoreh* or *moreh* (Deut. xi. 14, Jer. v. 24). These were succeeded by the heavy and continuous winter rains, and, finally, by the *malḳosh*, or spring showers, in the month of Nisan (Joel, ii. 23; Ta'anit, 6*a*). So important was the rain after the long Syrian summer of extreme heat had parched the land, that the blessing asked for in the formula of Deut. xxvi. 15 was interpreted as a petition for rain and dew—prayers for which were likewise interpolated in the daily ritual (Mishnah Ta'anit, i. 1). Fast-days were appointed in times of drought (*ib.* 4-7). The fall rains were considered requisite to soften the ground preparatory to plowing and seeding; and the spring rains were equally necessary for the filling up of the grain in the ear, as expressed by the fellahin's proverb of to-day: "A shower in April is worth more than a plow and a yoke of oxen" (Klein, in "Zeit. Deutsch. Paläst. Ver." iv. 72, quoted by Vogelstein, *l.c.* 4, note 23). The transition from the rainy period of spring to the drought of summer is gradual, the showers growing lighter and less frequent. The mountain streams, however, continue to run high for a brief period, and then gradually slacken and dry up entirely. From Nisan to Tishri a rainstorm is a rarity, moisture being furnished by the heavy night-dews, which sometimes wet the ground to such an extent as to give it the appearance of having been rained upon.

Crops.

Of all the crops planted wheat (*ḥiṭṭah*) was the most important in Palestine as elsewhere: so great was the fertility of the land that more wheat was produced than was required for home consumption; and it was exported in considerable quantities (I Kings, v. 25; Ezra, iii. 7; Ezek. xxvii. 17; Acts, xii. 20). Two kinds were distinguished, light and dark (B. B. v. 6). Barley (*se'orah*) was used for bread mainly by the poorer classes (Ruth, iii. 15; Mishnah Neg. xiii. 9), and was also used for feed for animals (Tosef., Soṭah iii. 4). Spelt (*kusemet*), an intermediate grain between wheat and barley, was customarily sown in the borders of fields. Oats (*shifon*) were not much grown. Millet (*doḥan*), beans (*pol*), and lentils (*'adashim*) were also widely cultivated for food (II Sam. xvii. 28, Ezek. iv. 9). Flax (*pishtah*) was certainly grown (Josh. ii. 6), and possibly cotton (*karpas*). See Barley, Beans, Lentils, Millet, Spelt, and Wheat.

The first crops planted were the pulse varieties, early in Ḥeshwan (October); barley followed a few days later, and wheat last of all. A noteworthy statute prohibited the sowing of a field "with mingled seed" (*kilayim*, Lev. xix. 19), an operation which in one harvest might exhaust the soil of all its fertile chemical constituents. Alongside of this may be placed the various humanitarian laws, reserving the corners of the harvest-field for the poor and the stranger (Lev. xix. 9), concerning the forgotten sheaf (Deut. xxiv. 19), and other similar regulations. The harvesting seasons were Nisan (April) for barley, Siwan (early June) for wheat, Tishri (September) for fruits. Concerning these latter, see the articles FIG, OLIVE, SYCAMORE, and VINE.

Clearing and Preparing the Land.

The various processes in Agriculture may now be considered. To cultivate land for the first time, it was necessary to clear it either of forest timber (Josh. xvii. 18) or of stones (Isa. v. 2). When thus cleared it was ready for plowing, variously called in Hebrew *nir*, *ḥarash* (to cut into), *palaḥ* (to cleave asunder), *pataḥ* (to open), etc. If the soil was clayey, the resulting clods were broken up with mattock or hoe; for in the subsequent harrowing (*sadad*, Job, xxxix. 10) only a light harrow, probably a thorn-bush, was employed. Manure was used: it consisted of wood-ashes (Mishnah Sheb. ii. 4), leaves (*ib.* 'Ab. Zarah, iii. 8), the blood of slaughtered animals (*ib.* Yoma, v. 6; Yer. Sheb. iii. 34), oil-scum, or of the usual house and farmyard refuse, into which straw or other litter had been trodden by cattle (Isa. xxv. 10); but whether it was applied before or after plowing does not appear. Manuring is referred to in Ps. lxxxiii. 10; Jer. viii. 2, and ix. 21. It was applied to trees, about their roots, to preserve them and to stimulate them into fruitfulness (B. Ḳ. iii. 3). The passages Isa. v. 24 and xlvii. 14 refer rather to clearing the field of standing stubble by fire than to the direct use of ashes as a fertilizer. The institution of the seventh-year fallow was also a valuable factor in maintaining the fertility of the soil.

The implements used in the subsequent processes were the plow, the hoe or mattock, and a harrow of some kind. The hoe (*'eder*) was used to break up fields too steep or too cramped for plowing. The plow, which was of wood, usually oak, was of the simplest and lightest construction, being carried to and from the field on a man's shoulder. Its essential feature was the upright J-shaped timber, shod sometimes with iron at the point (I Sam. xiii. 20), and with a short crosshead at the top to serve as a guiding handle. This upright passed through a hole in a horizontal beam, which consisted of two stout poles lashed together, to the further end of which the yoke was secured. Consisting of so many pieces (see illustration p. 266), and these connected not strictly in the direct line of draft, the work can not have been very perfectly done: no greater depth of soil than four or five inches being penetrated and torn up. For stony or rooty ground it was of course altogether useless; such had to be "picked" with a heavy hoe (Isa. vii. 25). This was shaped something like the American corn-knife, but, the blade being set at a very acute angle to the handle, it was possible to reenforce it for its rough work by a thong or rope, as shown in the illustration (p. 264).

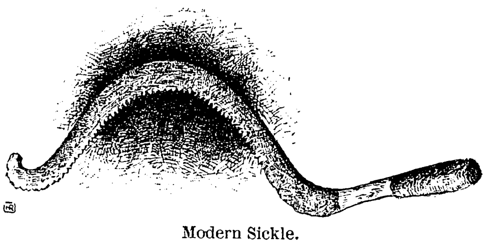
While the farmer's right hand grasped the handle of the plow, the team (*ẓemed*) of oxen (Amos, vi. 12), of cows (Job, i. 14, *Heb.*), or, sometimes, of asses (Deut. xxii. 10, Isa. xxx. 24), was urged onward with a goad (*malmad*, *dorban*)—a staff some eight feet long, provided with a sharp point for that purpose at one end, and at the other with a flat blade for cleaning the plow-point (Mishnah Oholot, xvii. 2) or for breaking chance clods—held in the plowman's left hand. As many as twelve teams were employed in the same field at one time; each, no doubt, in its own "land" or section (I Kings, xix. 19).

In Isa. xxviii. 25 three words are used for the act of sowing: namely, *hefiẓ* (to scatter) for sowing "fitches"; *zaraḳ* (to scatter) for sowing cumin; and *sum* (to place) for wheat and barley; the first two expressions evidently referring to broadcast sowing, the latter to drilling in the furrows. After sowing, the seed was plowed or brushed in with the light harrow to protect it from birds, mice, ants, and from the scorching sunshine. Sometimes the seed was sown broadcast before plowing, and covered in at one operation.

Egypt depended for irrigation upon Nile water lifted into elevated reservoirs, whence it was distributed to the fields through channels closed or opened by a hillock of earth, pushed into place by the foot (Deut. xi. 10). Palestine, on the contrary, had an abundance of brooks and rock-springs, ("fountains"); and was blessed with copious rains. From all these sources water was collected in cisterns, to guard against dry seasons when rain would be scarce and brooks and springs be dried up. An idea of the machinery used in Bible times may be obtained from that employed to raise the water from wells or springs in Palestine to-day. It consists of a horizontal wheel of roughly framed timbers, turned by a bullock or other animal tied to a sweep beneath it. This wheel connects directly with a vertical one of equally rude construction, carrying earthen jars, or other receptacles, fastened to its periphery. As these jars rise to the top they turn over and empty their contents into the conducting channels. (See illustration, p. 267.)

In addition, systems of channels and gutters were arranged to catch the heavy rains on inclined ground, and to distribute the water slowly and evenly over the soil. Such an artificially watered field was called *bet ha-shelaḥin* (place of pouring; see Job, v. 10, *Heb.*), while a field watered by rain was called *bet ha-ba'al* (place of rain; see B. B. iii. 1).

Crops ripe for harvesting were sometimes pulled up by the roots (Mishnah Peah, iv. 10), particularly pulse. Grain was sometimes dug up with the hoe, thus preparing the field for the next sowing (*ib.* Peah, iv. 4; B. M. ix. 1), but was more frequently cut with a *ḥermesh* (Deut. xvi. 9, xxiii. 26), or a *maggal*, or sickle (Joel, iii. *Heb.*, iv. 13; Jer. l. 16). Iron sickles of the earliest times have been found in the Tell el-Hesy excavations, as also some set with a cutting edge composed of flakes of flint (Mishnah Sheb. v. 6; see illus.). Barley was harvested at Nisan, Passover-time (Tosef., Suk. 3, 18); wheat and spelt a few weeks later (Tan., Wayḥi, 15; see also Ex. ix. 32); and grain-harvesting was finished by Pentecost (Siwan; Tosef., Suk. *ib.*).



Modern Sickle.

(From Benzinger, "Hebräische Archäologie.")

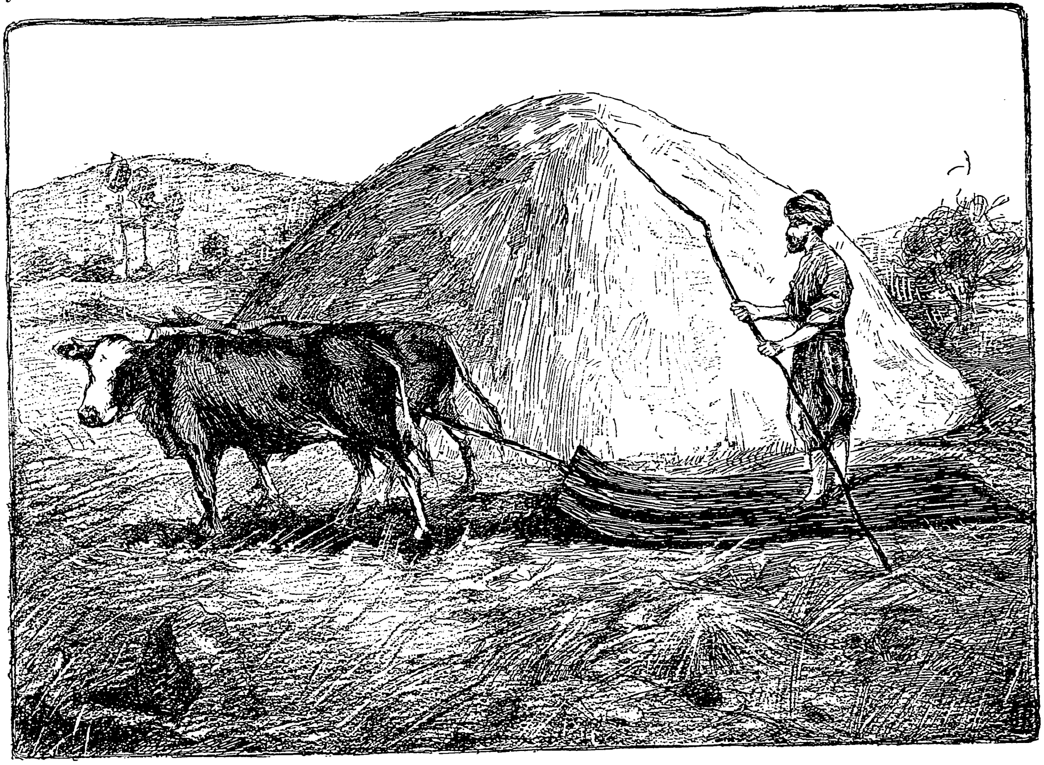
The single handfuls (*ẓebatim*, Ruth, ii. 16) were tied into sheaves (*alummim* or *alummot*, Gen. xxxvii. 7; Ps. cxxvi. 6) by their own straw, were piled into heaps (*'omer*, Lev. xxiii. 10; Job, xxiv. 10) and in due course were transported to the barns (*mezawim*, Ps. cxliv. 13) or the threshing-floor (*goren*), possibly in wagons (Amos, ii. 13), or, when in smaller quantity, in baskets or in panniers on asses, as in Egypt to-day.

Threshing and Winnowing.

There were two methods of threshing: *ḥabaṭ* (to beat out with a stick) and *dush* (to trample); the former evidently referring to the primitive practise of beating the full ears (or pods of pulse) with a rod or flail to extract the grain from the husks; the latter, to the trampling of them by cattle upon a hard and level floor (*goren*, Num. xv. 20, xviii. 27, 30; Ruth, iii. 2; II Sam. xxiv. 16). Sometimes the ears alone may have been stricken off the straw by the sickle and thrown upon the threshing-floor (Job, xxiv. 24); but the usual method was to scatter the loosened bundles of grain-bearing straw, as they came from the barn, upon the goren, to be threshed out, either by oxen, driven over them repeatedly (Hosea, x. 11)—thereby trampling them with their hoofs—or by causing cattle to draw certain heavy implements over the mass with the same result. These implements were the *ḥaruẓ* (Isa. xxviii. 27; Job, xli. 22) and the *morag* (Isa. xli. 15, I Chron. xxi. 23), both of which, to judge from their modern representatives, were heavy wooden drags, weighted additionally with large stones or with the driver's person; see illustration. The driver to-day not infrequently reposes at full length upon the drag, and even slumbers, while the docile oxen follow their monotonous round over the straw. The under side of these drags was fortified either with revolving metal disks, or, more commonly, with projecting teeth of stone (Isa. xli. 15)—little blocks of basalt, the size of a walnut in thickness—securely inserted in holes in the drag, and protruding a couple of inches (see Jastrow, "Dict." *s.v.* טורביל, p. 526, for citations).

These instruments are referred to figuratively in Amos, i. 3 and II Kings, xiii. 7. The humane legislation of the Pentateuch in Deut. xxv. 7 forbids the muzzling of the oxen while treading out the corn; and the Talmud (Kelim, xvi. 7) similarly enjoins that they be blindfolded as a safeguard against dizziness.

The result of so crude a system of threshing naturally was a large amount of worthless straw, torn into short lengths by the weighted teeth of the morag. Winnowing, as a consequence, became a very necessary and tedious operation. When sufficiently trampled and torn to pieces, the resultant mass of mingled grain, chaff, and short straw was tossed into the air with the *mizreh* (from *zarah*, to scatter; A.V. "fan," Isa. xxx. 24, Jer. xv. 7) and the *raḥat* (connected with *ruaḥ* = wind), properly a fork or a shovel: implements under these names are used in Palestine to-day. When a shovelful of the mingled mass upon the floor was lifted and thrown against the wind, the chaff (*moẓ*) was blown away (Ps. i. 4); the short straw would collect some distance away on the outer edge of the heap, and was used for provender (*teben*; Isa. xi. 7); while the heavier grain would fall at the winnower's feet (*'aremah*, Ruth, iii. 7; Cant. vii. 2). This grain was still further cleansed from ears which still held kernels, and from stubble, by being shaken through a sieve (*kebarah*, Amos, ix. 9). It is doubtful whether the word *nafah* (Isa. xxx. 28; A.V. "sieve") means a sieve at all. The mesh of the Palestinian sieve of to-day is made of slips of dried camel-hide, and is fine enough to pass the kernels and to hold the unthreshed



THRESHING IN PALESTINE.

ears which are then collected and again thrown upon the threshing-floor.

Various names for storehouses or barns are given: *maabus*, Jer. l. 26; *asam*, Deut. xxviii. 8, Prov. iii. 10; *mammegurot*, Joel, i. 17; *mezawim*, Ps. cxliv. 13; *miskenot*, Ex. i. 11; I Kings, ix. 19; in rabbinical writings also *oẓar*, *goren*, *megurah*, and *apoteki*, N. T. ἀποθήκη, all denoting magazines or granaries. Grain was sometimes stored in the field (Jer. xli. 8, Maksh. i. 6), probably in caves or cisterns, as is still the practise; in such receptacles it will remain good for years.

For a description of the various adverse influences to which the growing crops used to be exposed see Drought, East Wind, Locusts, Mildew.

AGRIGENTUM (ארגינטי, ארזינטי, ארייינטי; see Steinschneider, "Cat. Bodl." col. 1532; Luzzatto, "Hebr. Bibl." 1862, pp. 22, 46; now Girgenti): A town on the south coast of Sicily; was the seat of a large Jewish congregation as early as the time of Pope Gregory the Great (590-601). There is no information of the origin and age of this settlement and of its further history, and only the most meager details are available. Its internal management (see I. Loeb, in "Revue des Études Juives," xiii. 187 *et seq.*, xiv. 262 *et seq.*) and its relations with the non-Jewish population, as well as the social standing and mode of livelihood of its members, were no doubt identical with those prevailing all over Sicily. In the fifteenth century this congregation was still reckoned one of the most important in the island (Zunz, "Zur Geschichte," p. 495, and Güdemann, "Erziehungswesen," ii. 290). At that time it seems to have had an active intellectual life. The names and writings of several authors, whose chosen field was the Cabala, have come down to us. David of Agrigentum wrote a mystical commentary upon a special prayer ("Codex Oxford," 696, 8); and we have from Joseph ibn Shraga an extensive cabalistic commentary on passages from the Bible, Talmud, and Zohar, and on certain prayers ("Codex Bodl." 1663, 3, 4, 1666, 2221, 7, and "Codex British Museum," addition 27,014; compare Luzzatto). Ibn Shraga certainly, and David probably, had emigrated from Spain. With the year 1492, in which all Jews were banished from the island, the history of this congregation came to an end.

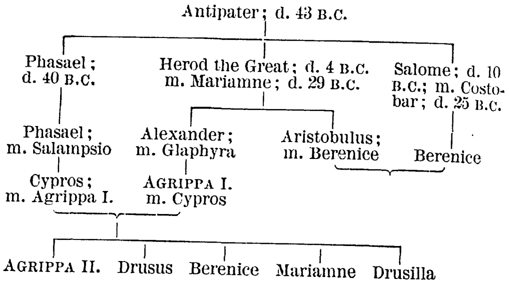
AGRIPPA I. (M. JULIUS AGRIPPA, also known as **Herod Agrippa I.**): King of Judea; born about the year 10 B.C. ("Ant." xiv. 9, § 2); assassinated in 44. His career, with its abundant and extreme vicissitudes, illustrates in a remarkable manner the complete dependence of the royal family of Judea, even for the means of subsistence, upon the favor of the Roman emperors of the first century. His descent and posterity are shown in the following table:

Sketch Pedigree of the Herodians.



Early Career.

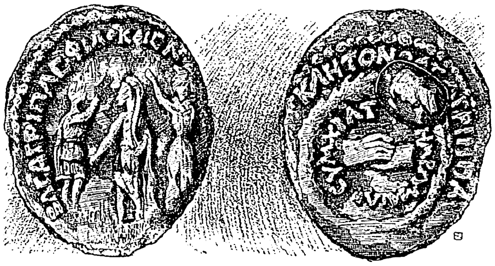
When six years of age he was sent to Rome for his education, and there enjoyed the companionship of the gifted Drusus Cæsar, son of Tiberius. The extravagance of court life accustomed him to splendor and luxury, and his prospects, which were brilliant, were the means of furnishing him with a never-failing supply of money, of which he availed himself in the style of a spendthrift. But his circumstances were changed in the year 23, when his friend and patron, Drusus, died suddenly. From that hour the emperor declined to receive the high-spirited young man, and very soon his boon companions also forsook Agrippa. Destitute of all resources, he meditated suicide; but at the request of his wife, Cypros, his sister Herodias, who had been since about the year 25 the wife of the tetrarch Herod Antipas, took pity on Agrippa and secured for him the appointment of market overseer in her new capital, Tiberias. But even this new fortune did not last; his brother-in-law took every opportunity to make Agrippa feel his dependent position. This Agrippa found too much to endure. He resigned his post, and, after many adventures, returned to Rome in 36. Here, once again, he succeeded in overcoming ill fortune by securing the patronage of the heir apparent, Caligula. With this return to prosperity his extravagant ideas resumed sway over him and brought him to want. Deeming himself free from listeners, he was one day thoughtless enough openly to wish for the time when Caligula would ascend the throne of the Cæsars. When this remark was carried to the aged Tiberius, he had him loaded with chains and cast into prison. He suffered here for six months in constant terror of death, until Caligula, having become emperor, freed him with his own hands, and appointed him to the tetrarchy of his uncle Philip, and to that of Lysanias, giving him the title of king. To these honors the senate added the rights and title of pretor.

This wonderful change in his fortune excited the undisguised envy of his sister Herodias, and led her to urge her incapable husband to secure for himself at least equal rank and titles from the emperor. But Agrippa defeated her purpose. Her petition to the emperor was forestalled by a message from Agrippa, containing half-veiled intimations that his brother-in-law was meditating treason and independence. This was sufficient to destroy Herod Antipas. Land and throne were taken from him, and the districts of Galilee and the south of Perea, administered by him, were transferred to the charge of Agrippa (39).

The king soon found opportunity to gain the gratitude and good wishes of his coreligionists. Caligula, whose extravagant desires and cruelty savored of insanity, conceived the idea of ordering that his statues be set up in all temples and receive divine honors. The Jews alone dared to offer resistance to this decree. They induced the Syrian governor, Petronius, to postpone this desecration of the sanctuary for a long time, and he at last determined to inform the emperor that the execution of his order would be impossible without terrible massacres. Agrippa happened to be in Rome at that time, and had succeeded in getting from Caligula a repeal of his odious edict (Philo, "Legatio ad Caium," §§ 30–43).

Agrippa and Caligula.

But when Petronius' report arrived that the Jews would rather suffer death than permit the erection of the imperial statues in their Temple, the emperor canceled his repeal, and ordered the forcible execution of his command. Fortunately, the tidings that the imbecile tyrant had been murdered by his body-guard arrived before his instructions to put his commands into effect (41). His successor, Claudius, showed himself grateful to Agrippa for important services rendered him, and upon his accession, placed under his rule the remainder of Palestine, the territories of Samaria, Judea, and Idumæa, formerly governed by Archelaus. Loaded with honors and titles, Agrippa returned home, and the few remaining years of his benevolent sway afforded the people a brief period of peace and prosperity. The evil consequences of a ruler's unbridled passions and tyranny had been sufficiently evident to him in Rome, and they had taught him moderation and strict self-control. His people regarded him with love and devotion, because he healed with tender hand the deep wounds inflicted upon the national susceptibilities by brutal Roman governors. He ruled his subjects with compassion and friendliness. Like the ancestral Asmoneans from whom he sprang through his noble grandmother Mariamne, he honored the Law. Like the merest commoner, he carried his basket of first-fruits to the Temple; with the people he celebrated appropriately the Feast of Tabernacles, and he devoted to the sanctuary a golden chain with which Caligula had honored him. On one occasion, while in the street, he met a bridal procession which drew up to let him pass, but he halted and bade it take precedence. He sought to lighten taxation, remitting the impost on houses in Jerusalem. On the coins minted by him he carefully avoided placing any symbols which could offend the people's religious sentiment. Thus, prosperity and comfort seemed to be dawning anew for the Jews.



Copper Coin of Agrippa I. Celebrating Treaty with Rome.

(From Madden, "Coins of the Jews.")

The Romans, however, became jealous of this rising prosperity, and—sometimes covertly, sometimes openly—laid all manner of obstacles in his way. When he began to repair the fortifications of the capital, he was abruptly bidden to cease. His attempts to fraternize with neighboring peoples—vassals of Rome—were construed as portending rebellion. His assassination at the games in Cæsarea, 44, must be considered as a stroke of Roman politics. His death, while in the full vigor of his years, was deeply lamented by his people, notwithstanding the fact that he had made many considerable concessions to heathen manners and customs. The Christians looked upon his death as a judgment for his undisguised hostility to their young community (Acts, xii.).

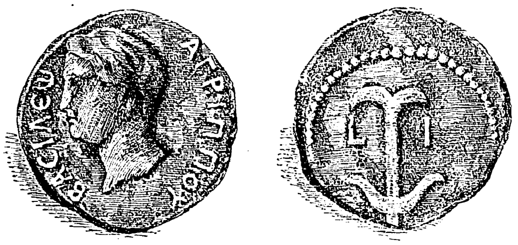
M. Br.

AGRIPPA II. (or in full **MARCUS JULIUS AGRIPPA**; known also as **Herod Agrippa II.**): Son of Agrippa I. He was born in the year 28, and, according to a statement that is not uncontradicted (Photius, "Bibliotheca," cod. 33), it is said that he died in the year 100. He was educated in Rome, where he saw much of the court life that had been so harmful to his father. It proved just as detrimental to him, for he reached maturity just at the time that Messalina and Agrippina dared to flaunt the most fearful depths of profligacy in public. On the sudden death of his father, the emperor Claudius desired him to enter into the full inheritance of all his rights and titles, but upon the advice of court favorites he refrained from doing so. Once again Judea was handed over to the care of procurators, and for the time being the young man was detained at court. Here he had the opportunity of being helpful to his coreligionists from time to time (Josephus, "Ant." xv. 11, § 4; xx. 1, § 2) and of acquiring proficiency in all the arts of courtly flattery.

Succeeds Herod II.

On the death of Herod II., Agrippa succeeded in having the former's post promised him. In the year 50, without regard to the rights of the heir to the throne, he had himself appointed ("B. J." ii. 12, § 1; "Ant." xx. 5, § 2; 9, § 7) to the principality of Chalcis by the emperor, and also to the supervisorship of the Temple at Jerusalem, which carried with it the right of nominating the high priest. Within three years—possibly before he left Rome to assume the dignity of his office—the emperor presented him with larger territory in exchange for Chalcis, giving him the tetrarchy of his great-uncle Philip—over which Agrippa's father had also ruled—together with that of Lysanias (Abilene), and the district of Varus ("Ant." xx. 7, § 1; "B. J." ii. 12, § 8). Nero, when he became emperor, added to this territory, giving him considerable tracts of Galilee and Perea.

These transfers took place probably in the years 53 and 61, and thus enabled him to inscribe these two years on his coins as the dates of the beginning of his reign ("Wiener Numismatische Zeit." iii. 451).

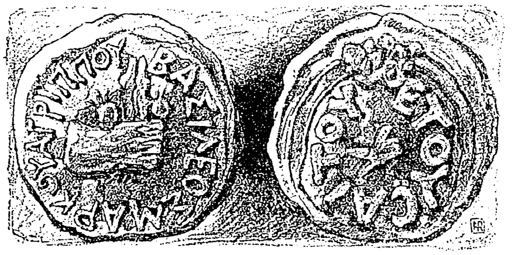


Copper Coin of Agrippa II., 10th year.
(From Madden, "Coins of the Jews.")

Coins of Agrippa.

In the stamping of these coins he showed no consideration whatever for the religious scruples of the Jews. Nearly all of them bear the names and effigies of the reigning emperor (10th year, sometimes his own also), and even heathen emblems (11th year). He abused the right to appoint and remove the high priests, and in his selections rarely took the fitness of the appointee into consideration. He lived in constant strife and quarrel with the priests. At one time he encroached on their privileges by ordering the Levites to assume garments similar to those of the priests (see Büchler, "Die Priester u. der Cultus," p. 144). At another time he added a watch-tower to the Herodian palace in Jerusalem, which permitted him to see into the Temple courts; but in defiance the priests raised the Temple wall.

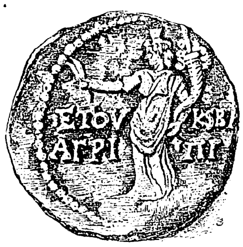
He gratified his desire for the erection of beautiful buildings, especially in his capital, Cæsarea Philippi, which he adorned with magnificent edifices, and which, in order to flatter Nero, he called Neronias ("Ant." xx. 9, § 4). He led a lordly life, devoid of care, without a thought for the unhappy destiny of his people, who were inevitably hastening toward their national downfall. Unlike his father, whom he otherwise emulated in all things, he abandoned all attempt to secure political independence for the Jews from their Roman master. When the final struggle broke out he saw safety and salvation for his people only in blind submission to the emperor, and employed his brilliant eloquence to warn the inflamed leaders against extremes, and counseled the return, so far as possible, to calmness and deliberation. But his words were without avail ("B. J." ii. 16, §§ 4, 5); he barely escaped from Jerusalem with his life. From that time he stood unreservedly on the side of the Romans, and even assisted them with his troops. He actually went so far, after the capture of Jotapata, as to deliberately invite Vespasian and his army to his capital, to celebrate the occasion of the conquest of the Jews. The drunken festivities and unrestrained debauchery that ensued lasted for three weeks. He then joined the conquerors in their victorious march onward.



Copper Coin of Agrippa II., 11th year.
(From Madden, "Coins of the Jews.")

Joins the Romans.

As a reward for this valuable aid against his own brethren the Romans spared his beautiful city, Tiberias. On receipt of the news of the downfall of Nero, Vespasian sent his son Titus, accompanied by Agrippa, to Italy to pay homage to the new emperor. While on their journey the tidings reached them that the new emperor had already been murdered; Titus turned back, but Agrippa continued his journey to Rome ("B. J." iv. 9, § 2). He left Rome only when he heard that Vespasian had been exalted to the imperial throne (Tacitus, "Hist." ii. 81), and joined Titus, to whom Vespasian had entrusted the continuation of the war, and remained with him until the destruction of the Temple (Tacitus, "Hist." v. 1). In compensation for this new aid against the Jews, Vespasian enlarged his dominions (Photius, "Bibliotheca," cod. 33), and conferred upon him, in the year 75, the rank of pretor (Dio Cassius, lxvi. 15).



Copper Coin of Agrippa II., 14th year, under Vespasian.
(From Madden, "Coins of the Jews.")

Character.

Of his religious life very little that is praiseworthy can be mentioned. It is true that he insisted that the heathen princes who wooed his handsome sister should undergo circumcision ("Ant." xx. 7, §§ 1, 3), and that once, suffering from a revulsion of feeling, he shed tears before the assembled congregation on the reading of the passage Deut. xvii. 15–20 (see Tosef., Soṭah, vii. 15; Yer. Soṭah, 22; Bab. Soṭah, 7, 8). But the people hated him for his arbitrary treatment of the high-priesthood, and for the adoption of the heathen emblems on his coins. He certainly never desired to embrace Christianity, for the utterance attributed to him in Acts, xxvi. 28, is evidently to be taken as a jest.

His private life seems to have been anything but creditable. The worst of reports were current at home, as well as in Rome, concerning his relations with his beautiful but profligate sister Berenice, afterward the mistress of Titus ("Ant." xx. 7, § 3; Juvenal, "Satires," vi. 153). He died childless (100), surviving the downfall of Judea only a few decades. Josephus, the historian, was indebted to him for numerous corrections and additions. Probably Agrippa gave him these for the purpose of justifying and defending his own acts ("Vita," § 65; compare Eusebius, "Hist. Eccl." iii. 9). With him the race of Herod ends.

AGRIPPA, CAIUS JULIUS: Mentioned as propretor of the Roman province of Asia in an inscription at Ephesus; was probably a descendant of the royal house of Herod. His father, referred to in the inscription in question as King Alexander, was doubtless the Alexander appointed by Vespasian as "king of an island in Cilicia" (Josephus, "Ant." xviii. 5, § 4) and would thus be great-grandson of Alexander, son of Herod the Great, by Mariamne (see genealogical abstract below). His descendants soon lost all connection with Judaism and disappeared in heathendom (Josephus, *ibid.* 141).

M. Br.

AGRIPPINA: The depraved daughter of Germanicus and wife of the emperor Claudius, who at times interested herself in the internal affairs of Judea. Upon the pressing representations of Agrippa II., she succeeded in inducing the emperor to dismiss the governor CUMANUS for his oppression of the Jews, and he was sent into exile (Josephus, "Ant." xx. 6, § 3; Schürer, "Gesch." 2d ed., i. 476; see Grätz, "Gesch. d. Juden," iii. 725). How far-reaching her influence was may be gleaned from the fact that her name, with that of her imperial husband, is frequently met with on Palestinian coins.

AGUDAT AḤIM ("United Brethren"): A name adopted by many Jewish societies throughout the world, the members of which pledge themselves to brotherly love, and to mutual assistance in time of need. In the United States the name of the birthplace of the majority of the members is added to the above designation, as: Agudat Aḥim Anshe Wilna, meaning "United Brethren of the Men of Wilna." The object of most of these societies is the alleviation of the immediate necessities of their members. Many of them have their own synagogues, where the members assemble for worship on the Sabbath and festivals, or even week-days. Some of them also own burial-places. A rabbi is engaged by some societies to lecture on Sabbaths or holidays. In Galicia there is a society of this name, the aim of which does not correspond with that of the above-mentioned societies, its purpose being to disseminate culture among the Jews of Galicia. It has already accomplished much good in combating anti-Semitism.

J. L. S.

AGUILAR (called also **Aguilar de Campo**): A district in the Spanish province of Valencia, which sheltered a considerable Jewish congregation in the Middle Ages. In consequence of the persecution by the Almohades, many of the Jews resident there pretended for a time to embrace Islam. In the year 1290 the Jews of the community paid 8,600 maravedis ($29,240 = £5,848) in taxes. In the civil war between Don Pedro the Cruel and his brother, Don Henry, the Jews of Aguilar suffered severely, and many of them were slain. A tombstone, with a Hebrew inscription dating from the fourteenth century, is to be found above the gate of Reinosa. The beautiful brass lamp, which toward the end of the sixteenth century still hung in the church of San Miguel in Aguilar, belonged originally to the synagogue there. It bears on its rim a Hebrew inscription, stating that it was made by Samuel ben Pinḥas Caro of Paredes. Many Spanish families have taken their name from this district.

AGUILAR, DIEGO D' (or **MOSES LOPEZ PEREIRA**): A Marano who flourished in the eighteenth century; born probably in Spain; died at London in 1759. In 1722 he went from Lisbon to London, and thence to Vienna. From 1725 to 1747 he held the tobacco monopoly in Austria, and had the power to establish factories and regulate prices. When in 1747 he besought the government to return to him a part of the money that he had deposited on account of the revenues, the empress Maria Theresa replied: "This appears to me just. I owe him much more; therefore, return it to him." Aguilar was a great favorite with the empress, who commissioned him to rebuild and enlarge the imperial palace at Schönbrunn, and he advanced 300,000 florins for the work. In recognition of his services Maria Theresa created him a baron and privy councilor to the crown of the Netherlands and Italy. Aguilar, who together with his family enjoyed the greatest freedom of belief, was the founder of the Spanish or Turco-Jewish community in Vienna, and succeeded in obtaining many concessions for the relief of his oppressed coreligionists. As a result of his efforts the Jews of Moravia were protected from pillage in 1742, and the intention of Maria Theresa to expel the Jews from the whole of the Austrian empire, in 1748 or 1749, was abandoned. He left Vienna suddenly in 1749, because the Spanish government demanded his extradition. He went to London, where he had a brother, who, like himself, was reputed to be very wealthy (see AGUILAR, EPHRAIM LOPEZ). Before leaving he presented the community which he had founded there, as well as the Spanish-Jewish community of Temesvar, with beautiful silver crowns for the scrolls of the Law, upon which his name was inscribed. On the Day of Atonement a prayer is still said for the repose of his soul by the Turco-Jewish community of Vienna.

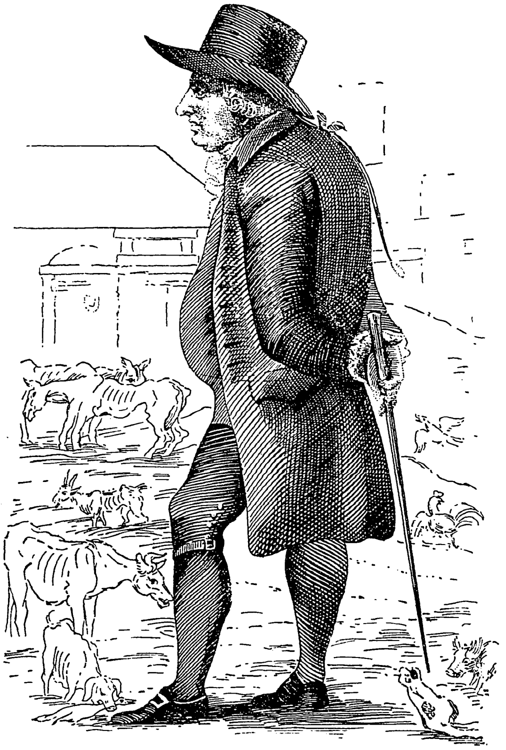
AGUILAR, EPHRAIM LOPEZ PEREIRA, BARON D': Second Baron d'Aguilar; born in Vienna in 1739; died at London, 1802. In 1757 he was naturalized in England, where he had settled with his father. He married in 1758 the daughter of Moses Mendes da Costa, who is reported to have brought him a fortune of £150,000. He succeeded to his father's title and fortune in 1759, and for a time lived in luxurious style with twenty servants at Broad Street Buildings. But by the Revolutionary War in America he lost an estate there of 15,000 acres, and subsequently became known as a miserly and eccentric person, giving up his mansion in Broad street as well as his country houses at Bethnal Green, Twickenham, and Sydenham. His establishment at Colebrook Row, Islington, was popularly styled "Starvation Farm," because of the scanty food provided for the cattle. He died there in 1802, leaving, hidden in various parts of his dwelling, a fortune valued at £200,000 to his two daughters who survived him.



Baron d'Aguilar on Starvation Farm.

(From Wilson, "Wonderful Characters.")

D'Aguilar held various positions in his own community, and served as treasurer of the Portuguese Synagogue; the minutes of the proceedings of the Mahamad bear the signature of Ephraim d'Aguilar. He was elected warden in 1765, but he declined to serve, and refused, on technical grounds, to pay the fine. Eight days were given him to accept or to submit to the penalty. He evidently submitted, for in 1767 he married the widow of Benjamin Mendes da Costa, which he would not have been able to do had he been lying under the ban. When he took up his eccentric life the couple separated. After twenty years a partial reconciliation took place between the baron and his wife, but only for a short time. He was again elected to office in 1770, and for some years thereafter remained a member of the synagogue.

G. L.—J.

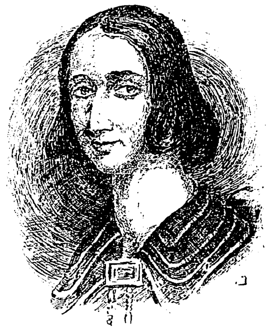
AGUILAR, GRACE: English novelist and writer on Jewish history and religion; born at Hackney, London, June 2, 1816; died at Frankfort-on-the-Main, September 16, 1847, where her remains were buried in the Jewish cemetery. She was the oldest child of parents descended from Portuguese Maranos who sought asylum in England in the eighteenth century. To strengthen her constitution, which from infancy had been feeble, she was taken to the seashore and to various rural localities in England. Her love of nature was cultivated by these experiences; and at the age of twelve she devoted herself of her own accord to the study of natural science, augmenting a collection of shells begun by her at Hastings, when only four years old, and supplementing it by mineralogical and botanical collections.

Early Training.

Grace Aguilar was educated mainly by her parents. Her mother, a cultivated woman of strong religious feeling, trained her to read the Scriptures systematically; and when she was fourteen her father read aloud to her regularly, chiefly history, while she was occupied with drawing and needlework. She was an assiduous musician till her health became impaired. Her reading, especially in history, was extensive; her knowledge of foreign literature was wide. She evinced a literary tendency at the age of seven, when she began a diary, which she continued almost uninterruptedly until her death. Before she was twelve she had written a drama, "Gustavus Vasa." Her first verses were evoked two years later by the scenery about Tavistock in Devonshire. The first products of her pen to be published (anonymously in 1835) were her collected poems, which she issued under the title "The Magic Wreath." Her productions are chiefly stories and religious works dealing with Jewish subjects. The former embrace domestic tales, tales founded on Marano history, and a romance of Scottish history, "The Days of Bruce" (1852). The most popular of the Jewish tales is "The Vale of Cedars, or the Martyr: A Story of Spain in the Fifteenth Century," written before 1835, published in 1850, and twice translated into German and twice into Hebrew. Her other stories founded on Jewish episodes are included in a collection of nineteen tales, "Home Scenes and Heart Studies"; "The Perez Family" (1843) and "The Edict," together with "The Escape," had appeared as two separate volumes; the others were reprinted from magazines. Her domestic tales, of which new editions still appear, are "Home Influence" (1847) and its sequel, "The Mother's Recompense" (1850), both of them written early in 1836, and "Woman's Friendship" (1851).

Literary Works.

The first of Miss Aguilar's religious works was a translation of the French version of "Israel Defended," by the Marano Orobio de Castro, printed for private circulation. It was closely followed by "The Spirit of Judaism," the publication of which was for a time prevented by the loss of the original manuscript. Sermons by Rabbi Isaac Leeser, of Philadelphia, had fallen into her hands and, like all other accessible Jewish works, had been eagerly read. She requested him to revise the manuscript of the "Spirit of Judaism," which was forwarded to him, but was lost. The authoress rewrote it; and in 1842 it was published in Philadelphia, with notes by Leeser. A second edition was issued in 1849 by the first American Jewish Publication Society; and a third (Cincinnati, 1864) has an appendix containing thirty-two poems (bearing date 1838–1847), all but two reprinted from "The Occident." The editor's notes serve mainly to mark dissent from Miss Aguilar's depreciation of Jewish tradition—due probably to her Marano ancestry and to her country life, cut off from association with Jews. In 1845 "The Women of Israel" appeared—a series of portraits delineated according to the Scriptures and Josephus. This was soon followed by "The Jewish Faith: Its Spiritual Consolation, Moral Guidance, and Immortal Hope," in thirty-one letters, the last dated September, 1846. Of this work—addressed to a Jewess under the spell of Christian influence, to demonstrate to her the spirituality of Judaism—the larger part is devoted to immortality in the Old Testament. Miss Aguilar's other religious writings—some of them written as early as 1836—were collected in a volume of "Essays and Miscellanies" (1851–52). The first part consists of "Sabbath Thoughts" on Scriptural passages and prophecies; the second, of "Communings" for the family circle.



Grace Aguilar.

In her religious writings Miss Aguilar's attitude was defensive. Despite her almost exclusive intercourse with Christians and her utter lack of prejudice, her purpose, apparently, was to equip English Jewesses with arguments against conversionists. She inveighed against formalism, and laid stress upon knowledge of Jewish history and the Hebrew language. In view of the neglect of the latter by women (to whom she modestly confined her expostulations), she constantly pleaded for the reading of the Scriptures in the English version. Her interest in the reform movement was deep; yet, despite her attitude toward tradition, she observed ritual ordinances punctiliously. Her last work was a sketch of the "History of the Jews in England," written for "Chambers's Miscellany." In point of style it is the most finished of her productions, free from the exuberances and redundancies that disfigure the tales—published, for the most part, posthumously by her mother. The defects of her style are mainly chargeable to youth. With her extraordinary industry—she rose early and employed the day systematically—and her growing ability of concentration she gave promise of noteworthy productions.

Miss Aguilar's later years were full of family trials. In 1835 she had an attack of illness, from the effect of which she never recovered. Finally her increasing weakness and suffering necessitated change of air, and in 1847 a Continental trip was arranged. Before her departure some Jewish ladies of London presented her with a gift and a touching address recounting her achievements in behalf of Judaism and Jewish women. She visited her elder brother at Frankfort, and at first seemed to benefit by the change; but after a few weeks she had to resort to the baths of Schwalbach. Alarming symptoms necessitated her return to Frankfort, and there she died. Her last words, spelled on her fingers, were, "Though He slay me, yet will I trust in Him," and her epitaph is the verse Prov. xxxi. 31.

H. S.

AGUILAR, JACOB DE: Pupil of Abraham de Fonseca at Hamburg, and ḥakam in one of the Brazilian communities, about 1640. M. K.

AGUILAR (AGUYLAR), MOSES RAPHAEL DE (not Raphael nor Raphael Moses): Born probably in Portugal; died in Amsterdam, Dec. 15, 1679. He was ḥakam and principal of the Talmud Torah at Amsterdam. In 1642 he went with Isaac Aboab da Fonseca, as ḥazan, to Brazil, where he remained till the reconquest of that country by the Portuguese, when he returned to Amsterdam and was reappointed to his former position. At the Talmud Torah he taught Talmud and Hebrew grammar. His mastery of Hebrew was so complete that he used this language in conversations with his pupils. He was a friend of the wealthy Abraham Israel Pereyra, for whose chief literary work he wrote an approbation (*haskamah*). For several years they were both adherents of Shabbethai Ẓebi. Aguilar continued in his office for forty years until his death. He left a large library, the catalogue of which was printed at Amsterdam in 1680. He published "Epitome da Grammatica Hebrayca" (Leyden, 1660), a second edition of which appeared at Amsterdam in 1661, under the title "Compendio da Epitome Grammatica," with a treatise on Hebrew poetry. He also wrote "Dinim de Sehita e Bedica," which was published at Amsterdam, 1681. It is said that he left about twenty Spanish, Portuguese, and Hebrew works in manuscript, "Tratado da Immortalidade da Alma" (manuscript of twenty pages quarto) being among them. M. K.

'AGUNAH: A woman whose husband has either abandoned her or, being absent, has not been heard from for some time. Having no proof of her husband's death, or being without a bill of divorce from him, her status as a wife remains forever unchanged; for Jewish law does not admit the presumption of death from a prolonged absence merely, nor can a wife obtain a divorce from an absent husband.

In order to mitigate the hardship arising from such cases the rabbinical law relaxed the strict rules regarding evidence—which, to establish a fact legally, required the testimony of two competent witnesses—and accepted testimony that in other cases would not have been deemed competent. If the absent husband sent a bill of divorce to his wife, the messenger was permitted to testify that it was written and signed in his presence; and this testimony was deemed equivalent to that of two witnesses (Giṭ. 2*b*). Another concession was made in permitting the witnesses to attest the bill of divorce, although they could neither read nor write. The bill was read to them, and a tracing was made for their signature (Giṭ. 9*b*; Maimonides, "Hilkot Gerushin," i. 23).

In case the husband died while absent from his wife, the testimony of one witness was deemed sufficient to prove death (Yeb. 122*b*), so that the woman might not become an 'Agunah (Yeb. 88*a*), it being almost impossible in most cases to obtain two witnesses to prove death in a foreign land. In this case even hearsay evidence, as well as the testimony of persons otherwise utterly incompetent, was received.

Maimonides ("Hilkot Gerushin," xiii. 29) sums up the matter in these words:

> "Let it not seem hard to thee that the sages have permitted remarriage of the wife upon the testimony of a woman, or a slave [male or female], or an idolater [speaking without motive], or upon hearsay or documentary evidence, and without cross-examination; for the Torah insists upon the testimony of two witnesses and upon the other rules of evidence only when the matter can not be otherwise determined—as, for instance, to prove murder, or to prove a loan—but where the matter can be otherwise determined and the testimony of a witness can be refuted, as in the case where he testifies that some one is dead, it is not to be presumed that he will bear false witness. Hence, the rule is relaxed so that Jewish women shall not be 'Agunot."

For 'Agunah in history see Geṭ; Social Life.

D. W. A.

AGUR BEN JAKEH.—Biblical Data: The compiler of a collection of proverbs found in Prov. xxx. The text (ver. 1) seems to say that he was a "Massaite," the gentilic termination not being indicated in the traditional writing "Ha-Massa" (compare Gen. xxv. 14). This place has been identified by some Assyriologists with the land of Mash, a district between Palestine and Babylonia, and the traces of nomadic or seminomadic life and thought found in Gen. xxxi. and xxxii. give some support to the hypothesis. Graetz, followed by Bickell and Cheyne, conjectures that the original reading is "Ha-Moshel," "the collector of proverbs." The true explanation is still uncertain. J. F. McC.

——In Rabbinical Literature: "Agur," and the enigmatical names and words which follow in Prov. xxx. 1, are interpreted by the Haggadah as epithets of Solomon, playing upon the words as follows: "Agur" denotes "the compiler; the one who first gathered maxims together." "The son of Jakeh" denotes "the one who spat out," that is, "despised" (from קוא, "to spit"), *le-Ithiel*, "the words of God" (*ot*, "word"; *El*, "God"), exclaiming, "I can [*ukal*] transgress the law against marrying many wives without fear of being misled by them." Another exposition is that "Agur" means "the one who is brave in the pursuit of wisdom"; "the son of Jakeh" signifies "he who is free from sin" (from *naḳi*, "pure"); *ha-massa* ("the burden"), "he who bore the yoke of God"; *le-Ithiel*, "he who understood the signs" (*ot*, "sign") and deeds of God, or he who understood the alphabet of God, that is the creative "letters" (*ot*, "letter") (see Ber. 55*a*); *we-Ukal*, "the master" (Tan., Waera, ed. Buber, 2, p. 18; Midr. Prov. xxx. 1; Yalḳ. on the passage, § 962). L. G.

AḤA or **AḤAI:** The name of nearly fourscore rabbis quoted in the Talmud and in midrashic literature. Some of these are misnamed through the errors of copyists; others appear but once or twice, and, consequently, can not be identified with any degree of certainty. Those mentioned below embrace the most prominent teachers of their respective generations; and the foremost of them are the following three sages, who are always quoted by that name, alone, without any patronymic or cognomen.

S. M.

AḤA (AḤAI) I.: A tanna of the second century, junior contemporary of Simon ben Yoḥai, with whom, as well as with others of the fourth and fifth tannaitic generations, he appears in halakic disputations. While he is, therefore, best known as a halakist, he is occasionally met also in the field of the Haggadah. Thus, commenting on Ex. xiv. 15, "Wherefore criest thou unto me? speak unto the children of Israel, that they go forward," he quotes Ps. cvi. 23, "Therefore he said that he would destroy them, had not Moses, his chosen, stood before him in the breach, to turn away his wrath, lest he should destroy them"; and remarks, "The Lord said to Moses, 'Why criest thou unto me? For thy sake I will save Israel. Had it not been for thy prayers I should have destroyed them ere this, because of their idolatry'" (Mek., Beshallaḥ, 3). Elsewhere he derives from Deut. vi. 7 ("And thou shalt talk of them [the commandments] when thou sittest in thine house, and when thou walkest by the way") the duty of man to have set hours for the study of the Torah, and not to make it subject to opportunity (Yoma, 19*b*; Tosef., Ber. 2, 2; Tosef., Shab. 15, 17; Bab. Shab. 127*a*; Tosef., Yeb. 14, 4; Tosef., Giṭ. 3, 1; Tosef., Niddah, 6, 13; Bab. Niddah, 21*b*).

S. M.

AḤA (AḤAI) II.: A Palestinian amora of the first amoraic generation (third century), surnamed Berabbi, Ha-Gadol or Roba ("the Great"). He systematized Baraitot at the Academy of Ḥiya ha-Gadol, and was teacher of Samuel ha-Zaḳen (Ber. 14*a*; Yer. Ber. ii. 5*a*; Yer. Sanh. ii. 20*c*, iv. 22*b*, v. 22*c*; Bek. 24*b*). The Midrash preserves the following homily of his on Num. xiii. 2: "Send thou men, that they may search the land of Canaan, which I give unto the children of Israel," the last clause of which appears to be superfluous. Prefacing this homily with a quotation from Isa. xl. 8, "The grass withereth, the flower fadeth; but the word of our God shall stand forever," he illustrates his subject with the following simile:

> "A king once had a friend with whom he made a covenant saying, 'Follow me and I will bestow a gift upon thee.' The friend obeyed the royal summons, but soon after died. Then the king spoke to his friend's son, saying, 'Although thy father is dead, I shall not cancel my promise of a gift to him; come, thou, and receive it.' The king is the Holy One—blessed be He! and the friend is Abraham, as it is said in Isa. xli. 8, 'the seed of Abraham my friend.' To him the Holy One had said, 'Follow me,' as we read in Gen. xii. 1, 'Get thee out of thy country unto a land that I will show thee.' And to him the Lord promised a gift; as it is said [Gen. xiii. 17], 'Arise, walk through the land; for I will give it unto thee'; and again [Gen. xiii. 15], 'All the land which thou seest, to thee I will give it, and to thy seed forever.' Abraham, Isaac, and Jacob were dead; but the Lord said to Moses, 'Although I promised to give the land to Israel's fathers, who are now dead, I shall not cancel my promise, but fulfil it to their children': thus we understand the text, 'The word of our God shall stand forever'" (Tan., Shelaḥ, 3; Num. R. xvi.).

S. M.

AḤA (AḤAI) III.: A Palestinian amora of the fourth century and associate of the most prominent teachers of the fourth amoraic generation, R. Jonah and R. Yose II. He was a native of Lydda in southern Palestine, but settled in Tiberias, where Huna II., Judah bar Pazi, and himself eventually constituted a bet din, or court of justice (Yer. Ter. ii. 41*d*; Yer. Shab. vi. 8*a*; Yer. B. B. viii. 16*a*; Yer. Sanh. i. 18*c*, end). Like his elder namesakes, he was a recognized authority on Halakah; but in Haggadah he surpassed them, being by far the most frequently quoted by haggadists of his own times and of subsequent generations. Commenting on Abraham's attempt to sacrifice Isaac, Aḥa tries to prove that the patriarch misunderstood the divine call. He refers to Ps. lxxxix. 35 [A. V. 34], "My covenant will I not break, nor alter the thing that is gone out of my lips," which he construes thus:

> "My covenant will I not break, even that covenant in which I have assured Abraham: 'In Isaac shall thy seed be called' [Gen. xxi. 12], nor alter the thing which is gone out of my lips, when I said to him, 'Take now thy son' [Gen. xxii. 2]. This may be compared to a king, who expressed to his friend a wish to see a tender child put on his table. His friend immediately went forth, and returned with his own child, whom he placed on the table before the king. He again went forth, and returned with a sword to slay the child, whereupon the king exclaimed, 'What art thou doing?' 'Sire,' replied the anxious friend, 'didst thou

not express a desire for a tender child on thy table?' To which the king answered, 'Have I asked for a dead child? It is a live one I desire.' Even so, said the Holy One—blessed be He!—to Abraham: 'Take now thy son, and offer him there for a burnt offering;' whereupon Abraham built an altar, and placed his son upon it. But when he stretched forth his hand for the knife, the angel cried out, 'Lay not thine hand upon the youth.' And when Abraham inquired, 'Didst thou not tell me to offer my son?' the angel retorted, 'Did I tell thee to kill him?'" (Tan., Wayera, ed. Buber, 40; Gen. R. lvi.).

One of Aḥa's epigrams reads, "The Jew needs privations to lead him back to God" (Cant. R. i. 4; Lev. R. xiii.). His gratitude to the defenders of his people he expressed by saying, "To him who speaks a good word for Israel, the Lord will assign an exalted station in the world; for it is written [Isa. xxx. 18], 'He will exalt him who has pity on you'" (Pesiḳ. R. 32, 196*a*). For other homiletic observations, see Pesiḳ. R. 4, 39*b*, xiii. 111*b*, xvii. 131*a*, 133*b*, xxi. 145*a*, xxx. 191*b*; Tan., ed. Buber, index of authors; Midr. Teh., ed. Buber, index; Pesiḳ. R., ed. Friedmann, index; see also a full account in Bacher, "Ag. Pal. Amor." iii. 106–163. S. M.

AḤA: Brother of Abba, the father of Jeremiah b. Abba; a contemporary of Abba Arika (third century). The latter said that in the history of the world there never had been a man so penitent as King Josiah, and after him came Aḥa, the brother of Abba (Shab. 56*b*). S. M.

AḤA B. ADDA: An amora of the fourth century; born and educated in Palestine. He emigrated to Babylonia, where he became a disciple of Rab Judah ben Ezekiel and of Rab Hamnuna II. He frequently reported decisions of his Palestinian teachers. He survived all his associates of the third amoraic generation. As he grew old he became weak and his hands trembled; and it is related that, to imitate his signature in a judicial document, a forger made his own hand tremble like that of the aged scholar (Ḳid. 30*a*; Sanh. 90*b*; Suk. 21*b*, 26*a*; B. B. 167*a*). That Aḥa loved virtue for virtue's sake may be inferred from the construction he put on Mal. iii. 18. He says: "'Then shall ye return, and discern between the righteous and the wicked.' This means between the believer and the unbeliever. 'Between him that serveth God for God's sake and him that serveth Him not for His sake;' that is, man should not use his knowledge of the Law as an ax to cut with or as a crown wherewith to crown himself" (Midr. Teh. to Ps. xxxi., ed. Buber; compare Ab. iv. 5). S. M.

AḤA AREKA. See Aḥa (Aḥai) B. Papa.

AḤA B. AWYA or **'AWA:** A Babylonian halakist of the third generation of Amoraim. He once visited Palestine, where he attended the lectures of Rab Assi (Yasa I.), and seems to have met Rabbi Johanan. He was a disciple of Rab Ḥisda in Babylonia, and appears frequently in controversy with Rab Ashi I. (Pes. 33*b*; Yeb. 117*a*; B. B. 3*a*, 46*b*, 56*a*; Ḥul. 31*a*, 50*b*). S. M.

AḤA BARDALA: A Babylonian amora of the first generation, a contemporary of Abba Areka (Suk. 26*a*; Beẓah, 14*a*; Giṭ. 14*a*). S. M.

AḤA OF DIFTI: A Babylonian amora of the sixth generation (fifth century), frequently found in halakic discussion with Rabina II. For a time he acted as counselor (ḥakam) of the exilarch (*resh galuta*) Mar Zuṭra I. (441–450). After the death of Naḥman b. Huna he would have been elected to the position of rector of the academy at Sura (once held by Ashi) but for the strategy of his friend Mar b. Ashi (Ṭabyomi), who considered himself entitled to the honor of filling the seat formerly occupied by his own father. While the members of the academy, resolved to elect Aḥa, were within, awaiting the appointed hour for voting, Mar had himself elected outside the academy (B. B. 12*b*; Yeb. 8*a*; Ned. 23*a*; Naz. 42*a*; Sanh. 42*a*; Men. 5*b*; Grätz, "Gesch. d. Juden," iv. 465, n. 68). S. M.

AḤA (AḤAI) B. ḤANINA: A Palestinian amora of the third and fourth centuries. He collected rare Baraitot among the leading scholars of Daroma in southern Judea, which he communicated to his colleagues elsewhere, even as far as the Babylonian academies. Often he reports Halakot on behalf of Joshua b. Levi (Ber. 8*b*; Suk. 54*a*; Yeb. 57*a*; Soṭah, 24*b*; Ḥul. 132*b*); also many Haggadot (see Bacher, "Ag. Pal. Amor." iii. 540–546). R. Levi, the famous haggadist of the second and third amoraic generations, received from Aḥa b. Ḥanina the reason for the collocation of the ninth and tenth benedictions in the Prayer of Benedictions, known by the name of "Shemoneh 'Esreh" (Yer. Ber. ii. 5*a*). He recommends visiting the sick as a means of facilitating a cure, declaring that every one who calls on a patient relieves him of one sixtieth part of his suffering (Ned. 39*b*). S. M.

AḤA BAR HUNA: A Babylonian amora of the fourth generation, disciple of Rabbah b. Naḥmani and of Sheshet. Ḥisda, another teacher of Aḥa, employed him for his halakic correspondence with Raba ben Joseph, who recognized in him a great and wise man (Pes. 47*a*, Yeb. 89*b*, Ned. 90*a*, B. B. 70*a*, Sanh. 43*a*, Shebu. 36*b*). It happened in his days that Ifra-Ormuzd, the queen-mother of Sapor II. of Persia, sent to Raba an animal to be sacrificed to the Jewish God and according to ancient Jewish rites; but as the sacrifices had ceased with the destruction of Jerusalem, Raba deputized Aḥa b. Huna, together with Rab Safra, to burn the proffered sacrifice on a sand-bank by the sea, on a pyre prepared of newly felled wood (Zeb. 116*b*).

S. M.

AḤA B. IḲA: A Babylonian amora of the fourth century, junior contemporary of Raba, and nephew of Aḥa b. Jacob. He is frequently quoted in halakic discussions by his contemporaries and successors, and received the title of Bar be-Rab (Fellow of the Academy) from his uncle Aḥa, with whom he carried on halakic controversies ('Er. 63*a*, Ket. 74*a*, Sanh. 42*a*, Naz. 42*a*). S. M.

AḤA OF IRAK: A Babylonian, who is alleged to have invented the Assyrian or Babylonian (superlinear) system of vowel-points and accents (נקוד). He is known only from Karaite sources, which are somewhat unreliable. Pinsker ("Liḳḳuṭe Ḳadmoniyot") thinks Aḥa is identical with Nissi ben Noah, the contemporary of Anan; and Graetz partly follows that opinion. But later investigators have proved that Nissi (if he existed at all) must have lived in the thirteenth century; his identity with Aḥa is, therefore, out of the question. Fürst places Aḥa in the first half of the sixth century, and thinks he may be identical with the Saborean Aḥa bar Abbuhu, who died in 511.

Bibliography: Fürst, *Gesch. d. Karäert.* i. 15, 133; Gottlober, בקורת לתולדות הקראים; Frankl, *Concerning Simḥa Pinsker*, in *Ha-Shaḥar*, viii.; Harkavy, *Notes to the Hebrew edition of Grätz, Gesch. d. Juden*, iii.; *Jew. Quart. Rev.* i. 243.

P. Wi.

AḤA B. ISAAC: A Palestinian amora of the third generation (fourth century), junior contemporary of Zeira I., Ami I., and Abba (Ba) b. Mamel (Yer. Shab. iii. 6*a*, vi. 8*a*). Speaking of the glories of Solomon's Temple, he relates that when King Solomon constructed the sacred edifice he placed in it all kinds of trees made of gold; and whenever any kind of tree blossomed outside, the corresponding one inside blossomed also. In proof of this, Aḥa quotes the Biblical passage (Isa. xxxv. 2), "It shall blossom abundantly, and rejoice even with joy and singing: the glory of Lebanon shall be given unto it, the excellency of Carmel and Sharon." Lebanon was the symbolic name of the Temple (Yer. Yoma, iv. 41*d*). S. M.

AḤA B. JACOB: A Babylonian amora, senior contemporary of Abaye and Raba (B. Ḳ. 40*a*), and a disciple of Huna, head of the academy at Sura. So incessant was his application to study that it undermined his health, and brought on a serious illness, from which, however, he recovered. Seeing some of his former schoolmates, who had contracted similar ailments and had become chronic sufferers, he applied to himself the Scriptural saying (Eccl. vii. 12), "Wisdom giveth life to them that have it" (Yeb. 64*b*). Nor did he long remember the warning of his early experience. He devoted all his days to the study of the Law; and when worldly avocations compelled him to "borrow" part of the day, he would "repay" it by studying at night ('Er. 65*a*). After his ordination as teacher he established himself at Paphunia (Epiphania; supposed to be on the Euphrates), where he became an authority on ritual matters, as well as a distinguished haggadist. By degrees he earned the reputation of being one of the foremost men of his age ('Er. 63*a*). He is also reported to have been a skilful writer of Torah scrolls (B. B. 14*a*; Ḳid. 35*a*; B. Ḳ. 54*b*; Niddah, 67*b*; Sanh. 46*b*). Fragments of his homiletic sayings are preserved in Shab. 85*a*; 'Er. 54*a*; Pes. 3*a*; Yoma, 19*b*, 75*b*; Ḥag. 13*a*; Ḳid. 40*a*. In halakic discussion he is quoted in Yer. Sheb. vi. 36*b*; Pes. 116*b*, 117*b*; Yoma, 76*a*; Ḳid. 35*a*; Sanh. 36*b*; Hor. 5*b*, 6*b*; Ker. 5*b*.

In addition to his diligent pursuit of halakic and haggadic studies Aḥa appears to have applied himself to philosophy and mysticism (Ber. 59*a*, Shab. 66*b*, B. B. 75*a*), and legend represents him as an adept in the occult sciences. It relates that a demon had established himself in the neighborhood of Abaye's academy, and greatly harassed the frequenters of the school, even when they walked together in daylight. No one seemed able to dislodge him. When Abaye was informed that Aḥa bar Jacob was on his way to Pumbedita, he arranged with the inhabitants of the city to refuse to accommodate him, so that he should be compelled to lodge in the academy. Aḥa arrived, and no sooner had he completed his arrangements for his night's rest than the demon appeared to him in the shape of a seven-headed hydra. Aḥa immediately betook himself to prayer; and at each genuflection one of the heads of the hydra dropped off. In the morning Aḥa reproachfully said to Abaye, "Had not heaven seen fit to work a miracle, my life would have been endangered" (Ḳid. 29*b*; see Bacher, "Ag. Bab. Amor." pp. 137–139). S. M.

AḤA B. JOSEPH: A Babylonian amora who flourished in the fourth and fifth centuries. His life was an unusually long one; for in his youth he attended Ḥisda's lectures (306), and in his old age discussed halakic matters with Ashi II. (died 427). It is stated that he was afflicted with asthma, for which Mar Ukba prescribed three ounces of asafetida to be taken in the course of three days. During another severe attack, he was treated medically by Kahana (Shab. 110*b*, 140*a*; B. M. 87*a*, 109*b*; Men. 35*b*; 'Er. 29*b*; Yeb. 31*b*; B. M. 109*b*; Ḥul. 105*a*). S. M.

AḤA (AḤAI) B. MINYOMI: A Babylonian amora of the fourth generation (fourth century), disciple of Naḥman b. Jacob, and contemporary of Abaye. Aḥa b. Minyomi was probably a brother of Adda b. Minyomi (Yeb. 94*a*; Ḳid. 66*a*; B. Ḳ. 106*a*; B. B. 148*b*, 159*b*; 'Ab. Zarah, 7*b*). S. M.

AḤA (AḤAI) B. PAPA or PAPI: A Palestinian amora of the third generation (fourth century). He was the contemporary of Abbahu ("Die Ag. der Pal. Amor." iii. 546), Zeira I., and Abba II. He was surnamed Arika, an appellation of disputed meaning (compare Jastrow, "Dict." under **אריכא**, and Abba Arika; Shab. 111*a*, 113*a*; Yer. R. H. iv. 59*b*; Yer. Yeb. viii. 9*b*). Referring to repentance, Aḥa is quoted as saying, "Great indeed is the power of repentance! It counteracts heavenly decrees, and even annuls heavenly oaths!" The same sentence is attributed to Abba b. Papa (Pesiḳ. xxv. 163*a*, Buber's note; see Bacher, "Ag. Pal. Amor." iii. 651). That repentance counteracts heavenly decrees, he proves from the life of Jeconiah, "Write ye this man [Coniah] childless" (Jer. xxii. 30); yet we find (I Chron. iii. 17) that Jeconiah was the father of no less than eight sons, among them Shealtiel. That repentance annuls heavenly oaths he deduces from the same message by Jeremiah (xxii. 24), "As I live, saith the Lord, though Coniah, the son of Jehoiakim king of Judah, were the signet upon my right hand, yet would I pluck thee thence"; but at a later date Haggai (ii. 23) says, "In that day, saith the Lord of hosts, will I take thee, O Zerubbabel, my servant, the son of Shealtiel, saith the Lord, and will make thee as a signet" (Cant. R. to viii. 6). S. M.

AḤA B. RAB: A Babylonian amora of the third and fourth generations (fourth century). He was a contemporary of Rabina I. and the senior of Aḥa b. Jacob. His opinions were supported by his grandson, Mesharsheya (Sanh. 76*b*, 77*a*; Ḥul. 33*a*). S. M.

AḤA (AḤAI) B. RABA: A Babylonian amora, son of Raba b. Joseph, and a contemporary of Amemar II. and of Ashi; died in 419. During the last five years of his life he filled the rectorate of the academy at Pumbedita (Shab. 93*b*; Yeb. 46*a*; B. B. 124*b*; Men. 3*b*; "Letter of Sherira"; Grätz, "Gesch. d. Juden," 2d ed., iv. 379). S. M.

AḤA SAR HA-BIRAH ("CASTELLAN"): A Palestinian amora of the third generation (fourth century), contemporary of Tanḥum b. Ḥiyya of Kefar Acco. No original decisions or doctrines are recorded under his name in the Talmud; but in behalf of others he reported several Halakot and precedents. If his surname did not come to him by inheritance (compare Jonathan Sar ha-Birah), the social position indicated by it enabled him to be helpful to his unfortunate coreligionists. On one occasion, with the assistance of Tanḥum, he ransomed some Jewish captives who were brought to Tiberias (Yeb. 45). From the fact that he is said to have twice submitted Halakot to the sages at Usha, it seems probable that this place, a former seat of the Sanhedrin, was, even down to Aḥa's days, a center of attraction for learned Jews (Ket. 22*a*, 88*a*; B. B. 146*a*; 'Ar. 22*b*). But it is more likely that the reporter of the Halakot in Ket. 22*a* and B. B. *l.c.* was a tanna of the same name. S. M.

AḤA (AḤAI) OF SHABḤA: A prominent Babylonian Talmudist of the eighth century. He enjoys the distinction of being the first rabbinical author known to history after the close of the Talmud. The gaon of Pumbedita having died, Aḥa was universally acknowledged to be the fittest man to succeed him. But a personal grudge entertained by the exilarch Solomon bar Ḥasdai induced the latter to pass over Aḥa, and to appoint Naṭronai, Aḥa's secretary, a man considerably his inferior in learning and general acquirements. Highly incensed at this slight, the eminent scholar left Babylonia and settled in Palestine, about 752–753, where he remained until his death. Notwithstanding Steinschneider ("Cat. Bodl." *s.v.*), who erroneously assigns 761 as the year, the exact date of his demise is unknown. It must have been in Palestine that Aḥa wrote his book entitled שאלתות ("Quæstiones" in the sense of disquisitions), as the title evinces; for this Aramaic word is employed in the sense of *quæstio* (the scientific investigation of a matter) by Palestinians only (Shab. 30*a*). "Sheilta" is of Palestinian origin, as is shown by the words *buẓina* and *bisha*, which accompany it. S. Mendelsohn is quite correct in his explanation of the term ("Rev. Ét. Juives," xxxii. 56). If, therefore, Simon Kahira made use of the "Sheiltot" in his Halakot, as is now certain, the statement of Abraham ibn Daud (according to whom Simon's work was completed in 750) must be erroneous, since Aḥa did not leave Palestine before 752; and we know that Samuel Gaon, whose successor he was to have become, did not die before 751–752. There are also other evidences of Palestinian influence in Aḥa's work. For example, his treatise indicates that besides the Babylonian Talmud (which, in the nature of things, was his chief authority) he made frequent use of the Yerushalmi, and of Palestinian Midrashim, Leviticus Rabbah, Ecclesiastes Rabbah, and Tanḥuma, all of which at this time were quite unknown in Babylonia (indeed, even Saadia Gaon, almost two hundred years later, knew comparatively little of them).

Aḥa's "Sheiltot."

The whole character of the "Sheiltot" is Palestinian; and, as such, they are quite distinct from the contemporary synopses of Judah Gaon and Simon Kahira, which confine themselves to important decisions of the Talmud, with the omission of all discussions, and with the addition of short elucidations of words. Aḥa's method is quite different from that of the Babylonian rabbis, who, caring little for the instruction of the common people, wrote scholastically. The "Sheiltot," on the contrary, were written for thoughtful laymen. Aḥa's treatises upon Biblical and rabbinical precepts, numbering 190 or 191 (see Mendelsohn, *l.c.* 59), with additions from later writers, were written with special reference to the practise of such moral duties as benevolence, love, respect for parents, and love of truth. They are based upon the order of the *parashot*, the weekly readings from the Law.

The beginning of the fourth "Sheilta," which is based upon the weekly lesson on "Noah," may serve as a specimen of the "Sheiltot." Stealing or robbery was explicitly forbidden to the Israelites; and the divine punishment for the transgression of this command is more severe than for other crimes. Thus, it is found that in the history of Noah, those of the generation of the Deluge suffered their hard fate solely on account of their violence, as it is said (Gen. vi. 13), "The end of all flesh is come before me; for the earth is filled with violence through them." This moral condemnation is elaborated by Aḥa, who quotes from the Talmud and Midrash many passages concerning the baseness and godlessness of such crimes. He follows this statement—preceded by the introductory formula, "It is, however, questionable" (*Beram ẓarik*)—with casuistic inquiries; as, for example, whether it is proper to include in the designation of robbery, for which the Law ordains a twofold restitution, the case of a theft committed in the interest of the victim

This illustration serves to show that the work is not intended for scholars alone, but also for popular instruction; and that the statement, so often repeated since the time of Meiri, that the "Sheiltot" was a book merely for the instruction of youth, is also baseless. It is more probable that it is a collection of haggadic-halakic sermons, which Aḥa delivered in Palestine, where certainly he was held in high regard. With the decline of rabbinical knowledge in Palestine, Aḥa would have found but few pupils for pure halakic instruction; and he therefore endeavored to add haggadic elements to his lectures, in obedience to the general disposition of the Palestinians, who just then favored Haggadah. This view best explains the word *derashah* (lecture), which occurs about thirty times in the "Sheiltot," in connection with the citation of passages from the Talmud. If the supposition be true that the "Sheiltot" were derived from sermons, they may properly be considered, in the form in which they appear, as extracts or abstracts of such sermons, giving the introduction and the conclusion of the original derashah; while of the derashah proper—which no doubt consisted of haggadic and halakic quotations from Talmud and Midrash—only the heading is mentioned. Considering them as portions of sermons, the frequent repetitions that occur in the "Sheiltot" are not strange, as this would happen to the best of preachers; while it would be difficult to explain them if they were found in the strictly literary productions of one man. Of course, there can be no certain conclusions concerning the composition of the "Sheiltot" until the manuscript has been examined. The printed text, while it contains much matter of later date, lacks much that, according to older authorities, was formerly included. An accurate edition of the "Sheiltot" would be very valuable for textual criticism of the Babylonian Talmud, as indeed for Aramaic philology in general, since Aḥa wrote in the Aramaic vernacular.

Aḥa's work very soon won great esteem; and the work "Halakot Gedolot," which does not date from the year 750, but belongs to the oldest literature of the gaonic times, copies no less than one hundred and fifty passages from the "Sheiltot." Sherira Gaon and his son, Hai Gaon, mention the book by title; and it was likewise freely consulted by Rashi and the author of the "'Aruk."

(1) The first edition of the "Sheiltot" appeared in Venice, 1546, and was succeeded by the following: (2) An edition with a short commentary by Isaiah Berlin (Dyhernfurth, 1786); (3) another under the title תועפות ראם, with the commentary of Isaac Pardo, Salonica, 1800–01; (4) with an extended commentary by Naphtali Ẓebi Judah Berlin (Wilna, 1861, 1864, 1867), which latter edition contains the commentary of Isaiah Berlin, as well as a number of variant readings taken from a manuscript of the year 1460, and a short commentary by Saul ben Joseph, who probably lived in the first half of the fourteenth century. Manuscripts of the "Sheiltot," but with essential divergences from the printed text, are to be found among the Hebrew manuscripts in the Bibliothèque Nationale, Paris, Nos. 308, 309, and in the Bodleian Library, Oxford, Nos. 539, 540, 1317. In the latter library may be found also the hitherto unprinted commentaries by Solomon ben Shabbethai (541), and Johanan ben Reuben (542).

AḤA B. SHILA OF KEFAR TAMRATA or **TEMARTA:** A haggadist of the second amoraic generation (third century). Commenting on Esth. ii. 23, "And it was written in the book of the chronicles before the king," he is reported to have pointed out therein a lesson of encouragement to the God-fearing. If the chronicles written by mortals assure rewards for good deeds, how much more ought we to be assured that the pious will be duly rewarded, when the Holy One—blessed be He!—shall produce His book, concerning which it is said (Mal. iii. 16), "And the Lord hearkened and heard it, and a book of remembrance was written before him" (Esther R. to ii. 23; compare Meg. 16*a*). S. M.

AḤA B. TAḤLIFA: Babylonian amora of the fourth and fifth centuries; disciple of Raba, friend of Aḥa b. Ika, and senior colleague of Rabina II. (Sanh. 24*a*, 'Er. 63*a*, Giṭ. 73*a*). S. M.

AḤA B. 'ULLA: Babylonian amora, who flourished in the fourth century; disciple of Ḥisda (Shab. 54*b*, 66*a*). He emigrated to Palestine, where R. Jonah gave him tithes, saying, "Not because Aḥa is of priestly descent, but because he is assiduous in the study of the Torah," quoting II Chron. xxxi. 4 in support of this action. Aḥa himself represents King David as faithfully discharging the duty of tithe-giving, quoting Ps. xl. 9, implying that David took care that nothing which was not duly tithed should enter his body. The enforcement of this resolution was, according to Aḥa, David's object in appointing Jonathan, son of Uzziah, "over the store-houses in the fields, in the cities, and in the villages, and in the castles" (I Chron. xxvii. 25; Pesiḳ. § 9, 98*b*; Tan., Reeh 14).

For another Aḥa b. 'Ulla, see Bacher, "Ag. Pal. Amor." iii. 654 *et seq.* S. M.

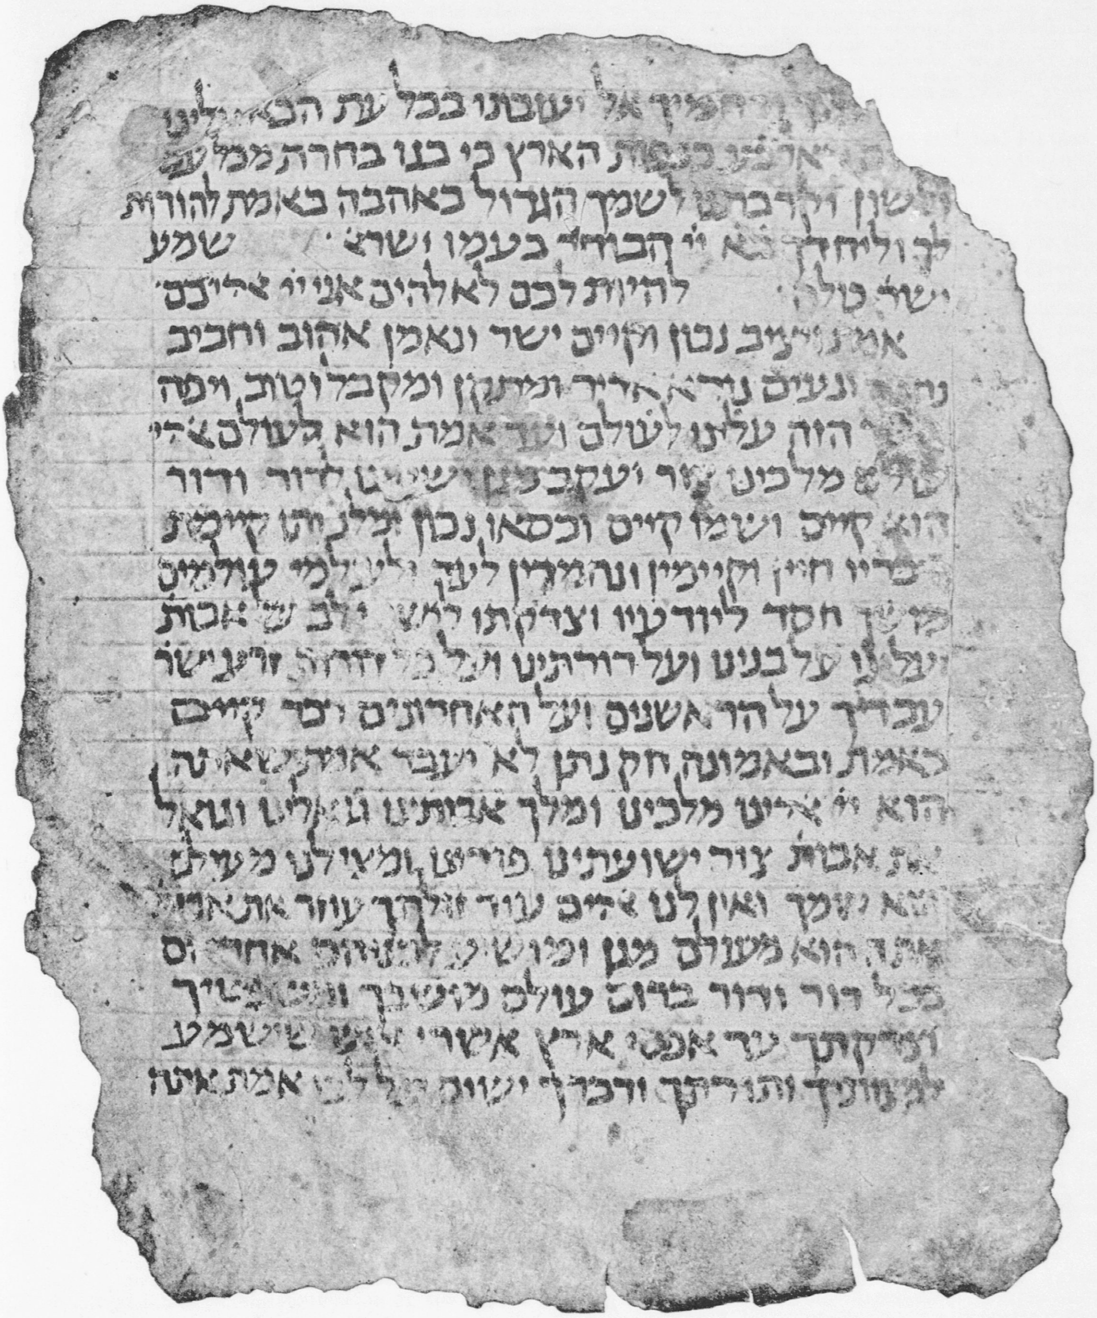
AḤA B. ZEIRA. See Ahabah (Ahawah) b. Zeira.

AHAB.—Biblical Data: King of northern Israel, 875–853 B.C. He was the son and successor of Omri, the founder of Samaria, and the first king of the Ten Tribes who was able to maintain a strong and stable government. Ahab inherited his father's military virtues and defended his country against the powerful Aramean (Syrian) kingdom of Damascus. Though often hard pressed by the Syrians, he defeated them in several battles and forced them to concede trading privileges in the great emporium of Damascus (855 B.C.). It was toward the end of his reign that his foreign relations became most trying. At this period, when hard pressed by Damascus, he lost the suzerainty over Moab, with the possession of valuable territory in the northern portion of that kingdom, all of which had been acquired by Omri. This expulsion of Israel is recorded by Mesha, the contemporary king of Moab, on the famous Moabite Stone now in the Louvre in Paris.

Ahab was the first king of Israel who came into conflict with Assyria, and he is also the first whose name is recorded on the Assyrian monuments (see Schrader, "K. A. T."). It was in 854 B.C. that a combination was formed by eleven of the princes of the Mediterranean coastland against Shalmaneser II., who made several invasions into the west country during his long and warlike career. In this alliance the king of Israel found himself for once fighting by the side of the king of Damascus (Benhadad II.). Shalmaneser, who tells of the affair in three distinct inscriptions, gives a list of the kings in the longest account (on his monolith inscription). Besides Israel and Damascus, it is stated that Hamath, Ammon, and Arabia sent contingents. Ahab put 2,000 chariots and 10,000 soldiers into the field. The confederacy was soon dissolved by the battle of Karkar, where the Assyrians were victorious, though Shalmaneser could not follow up his success. The Assyrian invasions of the lands bordering on Palestine were repeated, but it was long before either northern or southern Israel was directly attacked. In the next year (853 B.C.) the war with Damascus was renewed. Ahab secured the help of Jehoshaphat, king of Judah, and the two kings fought side by side at Ramoth in Gilead. In this battle Ahab disguised himself as a common soldier so as not to become a mark for the enemy, but an arrow, "shot at a venture," mortally wounded him, and he died at the close of the day.

Besides the above-mentioned wars, certain events of great importance marked the reign of Ahab. One of these was the establishment of close relations between the kingdoms of Israel and Judah, a policy which put an end to the rivalry that had existed between them since the days of the great schism. Another was the encouragement afforded by Ahab and his queen, Jezebel, to the worship of the Phenician Baal. Jezebel was a daughter of Ethbaal, king of Tyre, and the family alliance thus cemented, while it was of political and commercial advantage to Israel, resulted in great moral and religious injury through this idolatrous and sensual cult. A third noteworthy event was Ahab's cruel and oppressive dealing with Naboth of Jezreel whose property the king wished to secure, and who, upon his refusal to sell it, was put to death by false accusation at the instigation of Jezebel. For this outrage upon the rights of a freeholder, the prophet Elijah predicted a violent death for Ahab and Jezebel and the destruction of their dynasty. Noticeable also is the increase of luxury in Israel, in consequence of foreign trade and the ambition of the king and nobles. Ahab's palace of ivory (I Kings, xxii. 39) is an indication of the fashions of the time. Finally there was inaugurated in the reign of Ahab the régime of the preaching prophets, of whom Elijah was the first and greatest example (see I Kings, xvii.-xxii.). J. F. McC.

——**In Rabbinical Literature:** One of the three or four wicked kings of Israel singled out by tradition as being excluded from the future world of bliss (Sanh. x. 2; Tosef., Sanh. xii. 11). Midrash Konen places him in the fifth department of Gehenna, as having the heathen under his charge. Though held up as a warning to sinners, Ahab is also described as displaying noble traits of character (Sanh. 102*b*; Yer. Sanh. xi. 29*b*). Talmudic literature represents him as an enthusiastic idolater who left no hilltop in Palestine without an idol before which he bowed, and to which he or his wife, Jezebel, brought his weight in gold as a daily offering. So defiant in his apostasy was he that he had inscribed on all the doors of the city of Samaria the words, "Ahab hath abjured the living God of Israel." Nevertheless, he paid great respect to the representatives of learning, "to the Torah given in twenty-two letters," for which reason he was permitted to reign for twenty-two successive years. He generously supported the students of the Law out of his royal treasury, in consequence of which half his sins were forgiven him. A type of worldliness (Ber. 61*b*), the Crœsus of his time, he was, according to ancient tradition (Meg. 11*a*), ruler over the whole world. Two hundred and thirty subject



ין ורחמיך אל יעזבונו בכל עת הבא עלינו
מארבע כנפות הארץ כי בנו בחרת מכל עם
ולשון וקרבתנו לשמך הגדול באהבה באמת להודות
לך וליחדך בא' יי' הבוחר בעמו ישרא' שמע
ישר' כול' להיות לכם לאלהים אני יי' אלהיכם
אמת ויציב נכון וקיים ישר ונאמן אהוב וחביב
נחמד ונעים נורא אדיר ומתוקן ומקובל וטוב ויפה
הזה עלינו לעולם ועד אמת הוא לעולם אלהי
עולם מלכנו צור יעקב מגן ישענו לדור ודור
הוא קיים ושמו קיים וכסאו נכון ומלכותו קיימת
ודבריו חיין וקיימין ונחמדין לעד ולעולמי עולמים
[illegible] חסד ליודעיו וצדקתו [illegible] של אבות
ועלינו על בנינו ועל דורותינו ועל כל דורות זרע ישר'
עבדיך על הראשונים ועל האחרונים דבר קיים
באמת ובאמונה חק נתן לא יעבר אמת שאתה
הוא יי' אלהינו מלכנו ומלך אבותינו גואלנו וגואל
[illegible] אבות צור ישועתינו פודינו ומצילנו מעולם
הוא שמך ואין לנו אלה' עוד זולתך עזרת אבו'
אתה הוא מעולם מגן ומושיע לבניהם אחריהם
בכל דור ודור ברום עולם מושבך ומשפטיך
וצדקתך עד אפסי ארץ אשרי איש שישמע
למצותיך ותורתך ודברך ישים על לבו אמת אתה
